Utsarjana:—About the time of *utsarjana* also there was divergence of view. The Baud. gṛ. (I. 5. 163) prescribes that it may be performed on the full moon day of Pauṣa or Māgha. Āśv.gṛ.(III.5.14) requires Veda study after upākarma for six months and so if the upākarma was performed on the new moon of Śrāvaṇa the utsarjana according to it would be on the full moon of Māgha (vide III. 5. 20 also). The Pār. gṛ. II. 11 states that after having studied the Veda for five months and a half or for six months and a half they (teacher and pupils) should perform utsarga (i. e. the rite of closing the course of Vedic study). These periods are only approximate, since Pār. gṛ. II. 12 further on says that utsarjana should be performed in the month of Pauṣa when the moon is in the Rohiṇī nakṣatra (i. e. about the eleventh of the bright half) or in middle Aṣṭakā (i. e. 8th of the dark half of Pauṣa). The Gobhila gṛ. III. 3. 14 says that utsarga is performed on the full moon of Taiṣa (i. e. Pauṣa), while the Khādira gṛ. III. 2. 24 says that having studied the Veda for four months and a half they close the session on the full moon day of Pauṣa. The Śāṅ. gṛ. IV. 6. 1 holds that utsarjana should be performed on the first day of the bright half of Māgha; Yāj. I. 143 follows Pār. gṛ. II. 12 by saying that

utsarga takes place in Pauṣa on the Rohiṇī nakṣatra or on the 8th of the dark half, while Manu (IV. 95–96) says that after studying Veda for four months and a half from upākarma, utsarga should take place when the moon is in the Puṣya nakṣatra thereafter or on the first day of the bright half of Māgha. The Mānava gṛ. I. 4. 7 says that Veda study is stopped $4\frac{1}{2}$ or 5 or $5\frac{1}{2}$ months after upākarma. These several periods ($4\frac{1}{2}$ months, or $5\frac{1}{2}$ months or $6\frac{1}{2}$ months) and the various dates of utsarga in Pauṣa or Māgha were due to the fact that upākarma may take place on the full moon day of Śrāvaṇa or Bhādrapada (or even Āṣāḍha) or on the 5th of the bright half of Śrāvaṇa or on Hasta in Bhādrapada or Śrāvaṇa.

The Āśv. gṛ. III. 5. 13 extends the procedure of upākarma to utsarga and adds (III. 5. 20–22) that offerings of boiled rice are made to the same deities instead of clarified butter, then they take a bath and perform tarpaṇa of those very deities and of ācāryas, ṛṣis and pitṛs (as in brahmayajña). Nārāyaṇa states that in utsarjana there is no eating (of barley[1936] with curds) as there is in upākarma nor mārjana. Pār. gṛ. II. 12 gives the procedure of utsarjana as follows: "They (teacher and pupils) should go to the brink of water (a river &c.) and offer oblations of water (i. e. tarpaṇa) to the gods, to the metres, to the Vedas, ṛṣis, the ancient teachers, the Gandharvas, the other teachers, the year with its divisions, the Pitṛs, ācāryas, their (deceased) relatives. After having rapidly recited the Sāvitrī four times, they should utter loudly ' we have stopped (Vedic study).' There is anadhyāya in utsarjana for the same period as on upākarma and they should then continue the repetition (of the Veda) as before ". The Gobhila gṛ. III. 3. 15 says about utsarjana ' they go out of the village turning their faces to the east or north, they should approach water that is deeper than their waist, should bathe therein and should offer tarpaṇa to the vedas, ṛṣis and ācāryas.' A holiday was observed on the day of utsarjana for a day and half (pakṣiṇī) or three days after it (Manu IV. 97, Yāj. I. 144).

1936. तथोत्सर्गे। षण्मासानधीयीत। ..... मध्यमाष्टकायामेताभ्यो देवताभ्योऽन्नेन हुत्वाऽपोऽभ्यवयन्ति एता एव देवतास्तर्पयन्ति। आचार्यानृषीन् पितॄंश्च। एतदुत्सर्जनम्। आश्व. गृ. III. 5. 13–14, 20–23 ; पौष्यस्य रोहिण्यां मघयामायां वाऽष्टकायामघयायामुत्सृजेरन्नुदक्तां गत्वाग्निर्देवांश्छन्दांसि वेदानृषीन् पुराणाचार्यान् गन्धर्वानितराचार्यान् संवत्सरं च सावयवं पितॄनाचार्यान् स्वांश्च तर्पयेयुः सावित्रीं चतुरावृत्य विरताः स्म इति प्रब्रूयुः क्षपणं प्रवचनं च पूर्ववत्। पार. गृ. II. 12.

To give up Veda study for several months altogether was probably found undesirable. Therefore Manu IV. 98, Vas. Dh. S, 13. 6–7, Auśanasa (p. 515) and others prescribe that after utsarjana the Vedas should be studied till the next upākarma during the bright fortnights of the remaining months and the Vedāṅgas at one's will or in the dark fortnights. The Gobhila smṛti III. 134 says that after Dakṣiṇāyana (sun's passage in the southern celestial hemisphere) for six months one should not study the Upaniṣads and Rahasya texts. It appears that gradually the rite of utsarga in Pauṣa or Māgha came to be discontinued. Aṣṭāvakra[1937] on Mānavagṛhya I. 5. 1 deplores that in his day hardly any one was found to celebrate utsarga on the day specified by the sūtrakāra, that he was powerless to do anything or to upbraid any one but that he would only describe what the śāstra prescribed. Similarly the Smṛtyarthasāra, after describing the procedure of utsarjana, remarks (p. 11) 'after studying the Veda for a year utsarjana may be performed on the day of upākarma or may not be so performed'. Gobhila-Smṛti (III. 128–129, quoted in Sm. C. I p. 55) says 'when *dvijas* perform every year upākarma together with utsarjana according to the prescribed procedure, that results in the growth of the Vedas (Vedic study). Whatever act is performed even in sport by brāhmaṇas whose vedas have not grown stale, that act becomes successful.' Vide Śāṅ. gṛ. IV. 5. 16 to the same effect. It is on account of this idea that in the *saṅkalpa* the expression 'yāta-yāmatānirāsena' (by removing staleness) occurs. In modern times utsarjana is performed on the same day as upākarma, but precedes the latter. These two together being generally performed in Śrāvaṇa either on the full moon or on Śravaṇa nakṣatra or on the 5th of the bright half of Śrāvaṇa are designated by the word Śrāvaṇī.

The modern utsarjana of Ṛgvedins may be briefly described here: after ācamana, putting on a pavitra (a loop or ring) of darbhas (on the finger called anāmikā), prāṇāyāma, mentioning the time and place, a saṅkalpa (as set out above) is made; then pañcagavya is taken in by all; then the worship of Gaṇapati, then preparation of an altar for utsarjana homa is made, fire is invited with the verses 'juṣṭo damūnā' (Ṛg. V. 4. 5) and 'ehyagna' (Ṛg. I.

1937. यदा तु तस्मिन्काले न केचनोत्सर्गमनुतिष्ठन्तो दृश्यन्ते तदा किं कुर्मः कमुपालभेमहि । शास्त्रार्थस्तावद्यथास्माभिर्वर्णितः । अष्टावक्र on मानवगृह्य I. 5. 1; '...सह शिष्यैर्ग्रामाद्बहिर्जलान्त उत्सर्जनं कार्यं तर्पणं च । वर्षं चाधीत्योपाकर्मदिन उत्सर्जनं कार्यं न वा । तर्पणं कार्यमेव । स्मृत्यर्थसार p. 11.

76. 2), then the fire called *balavardhana* is established on the sthaṇḍila, then contemplation of fire with the verse 'catvāri śṛṅgā' (Ṛg. IV. 58. 3) and several *paurāṇika* verses ; then two samidhs are placed over the fire, then oblations of clarified butter are offered to the deities, Sāvitrī &c. (specified in upākarma above) and of boiled rice to 20 deities, Agni &c. (vide p. 814 above), then the rest is offered to Agni Sviṣṭakṛt, then ācamana, prāṇāyāma, then brahmayajña is performed, then he should say 'vṛṣṭir-asi vṛśca me pāpmānam-ṛtāt-satyam-upāgām' (Tai. Br. III. 10. 9); then all should say 'utsṛṣṭā vai vedāḥ' (the study of veda has been stopped); then clarified butter is offered into fire by way of prāyaścitta with the verses 'ayāścāgne' (Ap. M. P. I. 5. 18), 'ato devā' (Ṛg. I. 22. 16), 'idam viṣṇur' (Ṛg. I. 22. 17); then offering to Agni, Vāyu, Sūrya, Prajāpati respectively with the vyāhṛtis separately and together, then offering with the verses 'anājñātam' (Tai. Br. III. 7. 11), 'puruṣa-sammito' (Tai. Br. III. 7. 11), 'yat[1]pākatrā' (Ṛg. X. 2. 5), 'yad vo devā' (Tai. Br. III. 7. 11); then follows sarvaprāyaścitta with om and the vyāhṛtis; then mārjana (purification) with the verses 'āpo asmān mātaraḥ' (Ṛg. X. 17. 10), 'idamāpaḥ pravahata' (Ṛg. I. 23. 22), 'sumitrā na āpa' (Tai. S. I. 4. 45. 2-3); then he should think of the Ganges and other holy rivers; then he should honour Agni with the four verses 'Agne tvam no' (Ṛg. V. 24. 1-4) and offer the *upacāras* of sandal-wood paste, flowers &c.; then he should take holy ashes from the homa fire with the mantra 'mānastoke' (Ṛg. I. 114. 8) and apply the ashes to his forehead, throat, navel, right and left arms and head; then pray Agni to bestow śraddhā (faith), medhā (intelligence) &c. and then wind up the utsarjana with the words quoted below.[1938]

1938. अनेन उत्सर्जनहोमाख्येन कर्मणा भगवान् श्रीपरमेश्वरः प्रीयतां न मम। ओं तत्सद् ब्रह्मार्पणमस्तु।

CHAPTER XXIV

MINOR GṚHYA AND OTHER RITES

The gṛhyasūtras speak of certain other rites performed on certain fixed days in the year. Most of them have ceased to be performed in modern times, though vestiges of some of them appear even now. Gautama (VIII. 19) enumerates the seven pākayajñasaṁsthās among his forty saṁskāras. Out of these seven pākayajñas, aṣṭakā, pārvaṇa and śrāddha will be dealt with under śrāddha later on. The seven haviryajñas and the seven somasaṁsthās will be treated of in the note on Śrauta. A few of the other rites are briefly described below.

Pārvaṇa sthālīpāka:—Among the seven pākayājñasaṁsthās mentioned by Gaut. (VIII. 19) is the pārvaṇa sthālīpāka. When a person is married and returns to his house after marriage he causes the newly married bride to sacrifice a mess of cooked food. The wife husks the rice grains of which that sthālīpāka is prepared. She cooks the mess, sprinkles *ājya* on it, takes it from the fire. Then he sacrifices to the deities of the Vedic Darśa-Pūrṇamāsa and then to Agni Sviṣṭakṛt. With the remnants of the cooked food he feeds a learned brāhmaṇa and makes the present of a bull to that brāhmaṇa. From that time the householder constantly sacrifices on the days of the full moon and of the new moon a similar mess of cooked food sacred to Agni. In the case of one who has not kindled the three Vedic fires, the sthālīpāka is meant for Agni (it is Āgneya). In the case of an householder who keeps the three Vedic fires the sthālīpāka at Full moon is Agnīṣomīya and Aindra or Māhendra or Aindrāgna on the New moon day (Khādira gṛ. II. 2. 1-3, Āśv. Śr. I. 3. 8-12). Both the householder and his wife fast on the days of the full and new moon or they eat only once in the morning on those days (Āp. Dh. S. II. 1. 1. 4-5, Āśv. gṛ. I. 10. 2). This is briefly the pārvaṇa sthālīpāka. It is begun on the first full moon day after marriage and is continued throughout the lives of the husband and wife. In the sthālīpākas performed throughout life on the full moon and new moon there is no dakṣiṇā (of a bull).[1939] Vide for details

1939. एवमत ऊर्ध्वं दक्षिणावर्जमुपोषिताभ्यां पर्वसु कार्यः। आप. गृ. 7. 17.

Āśv. gṛ. I. 10 and Āp. gṛ. 7. 1–19 (among the sūtras) and Saṁskāra-kaustubha pp. 823 ff and Saṁskāraprakāśa pp. 904–906 among later digests.

Caitrī:—According to Haradatta on Gaut. VIII. 19 the caitrī rite is the same as śūlagava, known as Īśānabali to the students of the Āpastamba sūtra (Āp. gṛ. 19, 13 ff.) and this rite called Caitrī was performed on the full moon day of the month of Caitra. In the Śāṅ. gṛ. IV. 19 it is said that this rite takes place on the full moon day of Caitra and there is a brief description of it which is rather obscure (vide S. B. E. vol. 29, p. 132). The Vaik. IV. 8 describes it as follows: On the full moon day of Caitra the house is cleaned and decorated; the husband and wife deck themselves in new garments (lower and upper) and with flowers etc.; after two āghāras[1940] are made in fire and rice is cooked in a vessel for the deities, offerings are made of clarified butter, with the mantras 'gṛīṣmo hemanta' (Tai. S. V. 7. 2. 4) 'ūrṇam me pūryatām,' 'śriye jātaḥ' (Ṛg. IX. 94. 4), 'Vaiṣṇavam' (Tai. S. I. 2, 13. 3) and having offered oblations of boiled rice mixed with ghee to Madhu,[1941] Mādhava, Śukra, Śuci, Nabhas, Nabhasya, Īsa, Ūrja, Sahas, Sahasya, Tapas, Tapasya, to the deities of Ṛtus, to herbs, to the lords of herbs, to Śrī (goddess of wealth), to the lord of Śrī, to Viṣṇu; having worshipped to the west of the fire the goddess Śrī and the god Śrīpati whose face is turned eastwards, he announces the *havis* (sacrificial food) and having served to the recitation of the hymn to *anna* (food) the brāhmaṇas with cooked *caitrya* food he should himself eat in the company of his sapiṇḍas.

Sītāyajña (sacrifice to ploughed land):—In the Gobhila gṛ. IV. 4. 27 there[1942] is a brief description of the sacrifice performed at the time of ploughing by one who kept the smārta or aupāsana fire: 'on an auspicious constellation he should cook a mess of sacrificial food and should offer oblations to the following deities, viz. Indra, Maruts, Parjanya (rains), Aśani (thunderbolt), Bhaga. And he should also offer (clarified butter) to Sītā, Āśā, Araḍā, Anaghā.' In Pār. gṛ. II. 17 this rite is des-

1940. For āghāras see note 489 above.

1941. Madhu to Tapasya are the ancient twelve names of the months of the year mentioned in Tai. S. I. 4. 14. 1, Vāj. S. VII. 30.

1942. अथातो हलाभियोगः। पुण्ये नक्षत्रे स्थालीपाकं अपयित्वैताभ्यो देवताभ्यो जुहुयादिन्द्राय मरुद्भ्यः पर्जन्यायाशन्यै भगाय। सीतामाशामरडामनघां च यजेत। गोभिलगृह्य IV. 4. 27–29.

cribed in greater detail. But for want of space it is not set out here. The Pār. gṛ. in II. 13 speaks of a different rite to be performed at the time of taking out the plough and using it for ploughing.

Śrāvaṇī or Śravaṇākarma and Sarpabali :—Āśv. gṛ. II. 1.1–15, Pār. gṛ. II. 14, Gobhila gṛ. III. 7. 1-23, Śāṅ. gṛ.IV. 15, Bhār. gṛ. II. 1, Āp. gṛ. 18. 5–12 and others describe these two rites which are performed on the full moon day of Śrāvaṇa, whether the moon be in conjunction with the constellation of Śravaṇa or not. Āśv. gṛ. describes it as follows:[1943] "Having filled a new jar with the flour of unbroken grains of barley he places it on a new śikya (an arrangement of strings for holding pots etc.) along with a spoon for making offerings (*bali*). Having got ready fried barley grains he smears[1944] half of them with clarified butter. At sunset he prepares a mess of cooked food and a cake on one potsherd and offers oblations (of cooked food) with the four verses 'O Agni! lead us to wealth by a good path &c.' (Ṛg. I. 189. 1–4) verse by verse and offers with one hand the cake prepared on one potsherd with the mantra 'to the constant one, the Earth demon, svāhā.' The cake should have been completely submerged in clarified butter or its top may be visible; with the verse 'Agni, do not hand us over to evil' (Ṛg.I.189.5) he sacrifices over the entire cake the clarified butter in which the cake had been submerged. Reciting the verse 'may the steeds bring bliss to us in our invocations' (Ṛg. VII. 38. 7) he sacrifices into the fire the fried grains with his joined hands.[1945] He should give the other (not smeared with clarified butter) fried grains to his people (sons &c.). Out of the jar he fills the spoon with barley flour, goes out of the house with his face towards the east, pours down water on a pure spot and offers sacrifice with the mantra 'to the divine[1946] hosts of snakes,

1943. Vide appendix for the text.

1944. 'smears'–Nārāyaṇa explains that this should be done in the day and what follows is to be done after sunset.

1945. 'joined hands'–When the sacrificer joins his hands the applying of butter (upastaraṇa) and the putting of butter over the *havis* are done by another person.

1946. The words सर्पदेवजनेभ्यः स्वाहा may mean 'the serpents and the divine hosts.' In the Śat. Br. (S. B. E. vol. 44, pp. 367–368) 'Sarpavidyā and Devajanavidyā' are separate subjects of study. But as the rite is for propitiating the serpents, it is better to take the words to mean 'serpents that are a divine host.'

svāhā' and makes an obeisance to them with joined hands in the words 'the serpents that are terrestrial,[1947] that are aerial, that are celestial, that dwell in the several directions—to them I have brought this *bali*; to them I make ready this bali. Having gone round the bali with the right hand turned towards it, he sits down to the west of the *bali* (and recites the mantra) 'thou art a serpent; thou art the lord of serpents that creep; by food thou protectest men and by a cake the serpents, by sacrifice the gods, me who am in thee (i. e. who seek thy favour and protection) may not the serpents who also are in thee do any harm; I give over the Dhruvā (spoon) to thee.' Then with the words 'O firm one, I give over this one, this one to thee' he gives his people (son, unmarried daughter, wife) one by one. With the words 'O firm one, I give myself over to thee' he gives himself over at the end. Let no one pass between the sacrificer (and the bali) up till the rite of giving in charge (paridāna).[1948] 'To the divine hosts of serpents svāhā'-with these words let him offer a bali in the evening and in the morning till Pratyavarohaṇa. Some count the days till Pratyavarohaṇa[1949] (from Śrāvaṇa full moon) and offer the same number of balis on that very day (on which the śravaṇā rite takes place)." The Śāṅ. gṛ. IV. 15 has a similar ceremony called Śravaṇākarma; however it practically contains nothing beyond rules about the bali to serpents and it is worthy of note that some of the 16 upacāras associated with honouring a guest and with *devapūjā* are employed (in it and in Āp. gṛ. &c.) for honouring the serpents viz. offering a comb, unguents, flowers, thread (vastra), collyrium, mirror. The Pār. gṛ. II. 14 is more elaborate as to *sarpabali* and the deities to whom the oblations of cooked food are offered are 'Viṣṇu, Śravaṇa (nakṣatra), the Full moon day of Śrāvaṇa and the rainy season.' In Pār. gṛ. also, a comb, ointment, collyrium, garlands are offered to the serpents. Āp. gṛ. 18. 5-12, Hir. gṛ. II. 16 (S. B. E. vol. 30, pp. 237-239), Gobhila gṛ. III. 7. 1-23,

1947. 'The serpents that are terrestrial'. Note नमोस्तु सर्पेभ्यो ये केचन पृथिव्यामनु। येऽन्तरिक्षे ये दिवि तेभ्यः सर्पेभ्यो नमः। ये वामी रोचने दिवो ये सूर्यस्य रश्मिषु। येषामप्सु सदः कृतं तेभ्यः सर्पेभ्यो नमः। या इषवो यातुधानानां ये वा वनस्पतीरनु। ये वाऽवटेषु शेरते तेभ्यः सर्पेभ्यो नमः॥ तै. सं. IV. 2. 8. 3, काठकसं. 16. 15, वाज. सं. 13. 6-8 (same verses in all in almost the same words).

1948. Each son, daughter and wife are to be separately named and to be given in charge (of the serpent deity)-says Nārāyaṇa. Dhruva is the lord of serpents (Sudarśana).

1949. For Pratyavarohaṇa, vide below.

Bhār. gṛ. II. 1, Baud. gṛ. III. 10, Mānava gṛ. II. 16 and others contain similar elaborate rules about sarpabali, the Hir. gṛ. and Āp. gṛ. requiring that the flowers used should be of the *kiṁśuka* tree. It appears that when the husband was absent the wife was to offer the bali during the four months. The Mānava gṛ. II. 16. 6 adds that even the śūdra wife of a brāhmaṇa should silently offer the bali after washing her hands. Vide Śāṇ. gṛ. IV. 15. 20 also for the wife doing it silently.

Serpent worship arose from the fears entertained about the deadly effects of snake-bites. The serpent cult is very ancient as the quotation from the Tai. S. cited above shows. Vide also Atharvaveda VIII. 7. 23 and XI. 9. 16 and 24. In the Atharvaveda (VIII. 14. 14–16) the well known names of some mythical serpents viz. Takṣaka, Dhṛtarāṣṭra and Airāvata occur. The dangers from snakes must have intensified in the rainy season when serpents sought shelter in human habitations owing to vast areas being flooded and in search of their prey, viz. mice and frogs &c. Therefore the rite of offering a bali to serpents was performed on the full moon day of Śrāvaṇa and a bali was offered every day to serpents for four months till the full moon of Mārgaśīrṣa on which day took place the Pratyavarohaṇa (re-descent) i. e. discarding the use of cots for sleeping on and using the ground for that purpose. Fergusson in his famous work 'Tree and Serpent worship' (1868) traces serpent worship in the nations of antiquity, such as in Egypt, Judea, Greece &c. In the Mahābhārata *nāgas* figure very frequently. Vide Ādi. 35 and 123. 71, Udyoga 103, 9-16; Anuśāsana 150. 41 (where the names of seven nāgas that support the earth such as Vāsuki, Ananta &c. are specified). In Anuśāsana 14. 55 Śiva is said to have snakes on his body like *yajñopavīta*. The purāṇas are full of the stories of nāgas. Serpent worship continues to this day particularly in South India, but now serpents are worshipped on the 5th of the bright half of Śrāvaṇa instead of on the full moon day of Śrāvaṇa as in the times of the sūtras. This day is now called Nāgapañcamī and some account of it will be given later on under *vratas*. India possesses more varieties of serpents than any single country in the world and the toll of life taken by snake bites is very heavy as compared with any other country.

In certain medieval digests like the Saṁskāra-kaustubha (p. 122) a rite called Nāgabali is described. It is performed on Sinīvālī (a day on which the moon is seen, but there is amāvāsyā

thereafter) or full moon day or on the 5th or on the 9th when the moon is in Āśleṣā (of which serpents are the presiding deity). Its object is two-fold viz. to expiate the sin of having killed a snake or snakes and to remove the obstacle to progeny (supposed to arise from the wrath of serpents killed by a person). In this a figure of a serpent is made of the flour of rice or wheat or sesame which is then placed in a śūrpa (winnowing basket), then it is worshipped with the 16 upacāras (described above) and a bali of pāyasa (rice-milk) is offered to it; then after washing the hands and feet and sipping water a homa is performed with ordinary fire (but there is no sviṣṭakṛt offering); an oblation of clarified butter is offered with *om* and all the three vyāhṛtis into the mouth of the serpent figure and the rest of the *ājya* is sprinkled on its body, the serpent is praised with the mantras quoted above from Tai. S. IV. 2. 8. 3 and certain Purāṇa verses are repeated and the figure is thrown into the fire; then impurity (āsauca) is observed by the sacrificer and his wife for three days or one day; then eight brāhmaṇas are invited, they are supposed to stand in the place of the burnt effigy and upacāras are offered to them, they are fed and gifts are given to them; then a golden image of a serpent is put into the *kalaśa* (water-pot) and prayer is offered to it, and the golden image or its value or a cow is gifted to a brāhmaṇa.

The Pār. gṛ. (II. 15) describes a rite called Indrayajña on the full moon day of Proṣṭhapada (i. e. Bhādrapada). It is briefly as follows: Having cooked pāyasa (rice cooked in milk) for Indra[1950] and cakes and having placed (four) cakes round the fire, and having offered the two ājyabhāgas he offers the milk rice to Indra; he offers the *ājya* oblations to Indra, Indrāṇī (Indra's wife), Aja Ekapād, Ahirbudhnya and to the Proṣṭhapadās; he offers milk-rice to Indra; after he has eaten (a portion of the sacrificial food) he offers a bali to the Maruts; for Śruti says (Śat. Br. IV. 5. 2. 16) 'the maruts are the eaters of ahuta';[1951] the bali (to Maruts) is offered on leaves of the

1950. कर्क says 'ऐन्द्रग्रहणादिन्द्राय स्वाहेति होमो लभ्यते।.' आज्याहुत्यन्ते इन्द्राय स्वाहेति पायसेन होमः। ततः स्विष्टकृदादि'. The स्विष्टकृत् is to be performed with the remains of पायस.

1951. The शाङ्खायनगृह्य I.10 has the verse हुतोग्निहोत्रहोमेनाहुतो बलिकर्मणा। प्रहुतः पितृकर्मणा प्राशितो ब्राह्मणे हुतः॥'; vide Manu III. 74 quoted above. बलि is अहुत and so Maruts are called अहुतादः. The शतपथ passages are 'अहुतादो वै देवानां मरुतः' (IV. 5. 2. 16), 'मरुतो वा इदमश्वत्थेऽपक्रम्य तस्थुः क्षत्रं वा इन्द्रो विशो मरुतः' (IV. 3. 3. 6).

Aśvattha tree, because there is a Vedic passage (Śat. Br. IV. 3. 3. 6) 'the Maruts stayed in the Aśvattha tree.' He offers the bali with the passage 'Śukra-jyotir' (Vāj. S. 17. 80–85) mantra by mantra and with the mantra called *vimukha* which latter is to be revolved in the mind only (and not to be uttered loudly), for the śruti says 'these are their names'[1952] (Śat. Br. IX. 3. 1. 26). He repeats the mantra 'Indram daivīr' (Vāj. S. 17. 86); then follows the feeding of a brāhmaṇa.

The Kauśika sūtra (140) describes the procedure of a festival in honour of Indra for kings. It is begun on the eighth day in the bright half of Bhādrapada or Āśvina in which a banner is raised on Śravaṇa nakṣatra. Yāj. I. 147 declares a holiday for one day on the day on which the banner in honour of Indra is raised and when it is taken down. Aparārka (p. 190) quotes Garga to the effect that the banner is raised by the king on the 12th of the bright half of Bhādrapada when the moon is in conjunction either with Uttarāṣāḍhā, Śravaṇa or Dhaniṣṭhā and adds that it is taken down on the Bharaṇī nakṣatra after the full moon day of Bhādrapada. The Kṛtya-ratnākara (pp. 292–93) adds that during the days of the festival worship is offered to figures of Indra and his wife Śacī and son Jayanta made from pieces of sugarcane stalks and that it is not raised on Saturday or Tuesday or in periods of impurity due to birth or mourning or in portents like an earth-quake. From Ādiparva 63. 1–29 it appears[1953] that the festival (called

1952. In Vāj. S. 17. 80–85 there are names of Maruts. They are said (in 17. 86) to be the divine hosts that follow Indra. The शतपथ (IX· 3. 1. 26) says शुक्रज्योतिश्च चित्रज्योतिश्च सत्यज्योतिश्च ज्योतिष्माँश्चेति नामान्येषामेतानि. All the commentators of Pār. gṛ. say that विमुख is the mantra 'उग्रश्च भीमश्च ध्वान्तश्च धुनिश्च सासह्वांश्चाभियुग्वा च विक्षिपः स्वाहा॥' which is Vāj. S. 39. 7. But Oldenberg (in SBE vol. 29. p. 332) says in a note that the first part of Vāj. S. XVII. 86 is called 'Vimukha'.

1953. यष्टिं च वैणवीं तस्मै ददौ वृत्रनिबर्हणः। इष्टप्रदानमुद्दिश्य शिष्टानां प्रतिपालनम्॥ तस्याः शक्रस्य पूजार्थं भूमौ भूमिपतिस्तदा। प्रवेशं कारयामास गते संवत्सरे तदा॥ ततः प्रभृति चाद्यापि यष्टेः क्षितिपसत्तमैः। प्रवेशः क्रियते राजन्यथा तेन प्रवर्तितः॥ ..... भगवान्पूज्यते चात्र हंसरूपेण चेश्वरः॥ स्वयमेव गृहीतेन वसोः प्रीत्या महात्मनः। आदिपर्व 63. 17–19, 21–22. नीलकण्ठ notices in the last verse another reading रूपेण वासवः, while the cr. ed. of the महाभारत prefers हरत्यरूपेण शङ्करः (chap. 57. 21).

Indramaha) was started by Uparicara Vasu. It is stated therein that when that king was prevailed upon by Indra to desist from being a hermit in a forest and to rule over the country called Cedi, Indra gave him a bamboo staff as an affectionate gift and in honour of Indra the king planted it in the earth and since that time when the year ended a bamboo staff was raised by kings (and also other humbler persons) and next day it was decked with baskets full of fragrant substances and ornaments, and garlands were suspended from it. It is possible that the raising of a bamboo staff on the first day of Caitra every year in the Deccan and other places is reminiscent of this ancient festival in honour of Indra. The Bṛhatsaṁhitā (chap. 43) describes the origin of the Indramaha festival and devotes over sixty verses to the elucidation of the method of celebrating it. Viṣṇu gave to Indra a flag-staff to frighten asuras; in verse 8 it refers to Uparicara Vasu as the originator of the Indra festival, states on what auspicious conjunctions a carpenter and an astrologer should go to a forest and gives directions as to the tree to be selected (Arjuna tree being the best); then the tree is to be felled the next day and brought to the capital by the king on the eighth of the bright half of Bhrādrapada with a retinue of citizens, ministers and brāhmaṇas; the city should be decorated with fine *patākas* (flags) and toraṇas (festival arches); on the 11th there was to be a vigil, the trunk of the tree should be pared and chiselled and it should be placed on a *yantra* (a mechanical contrivance to raise it up), homa is to be offered; then it is to be raised up erect on the 12th of the bright half of Bhādrapada when the moon is in Śravaṇa nakṣatra or even without that being so; five or seven wooden figures (called śakrakumārīs) are also to be placed near it (to enhance the charm of the staff) and two smaller staffs (one $\frac{2}{3}$ and the other $\frac{1}{2}$ of the length of the principal staff) are also to be raised called Nanda and Upananda; another staff also is to be raised as Indra's mother; the staff was to be decked with several ornaments, baskets were to be hung round the staff, each one above the other and smaller in size, on the 4th day (from 12th tithi) verses in praise are to be recited and on the 5th day (from the 12th i. e. on 1st of the dark half) the staff is to be bidden farewell to.

Āśvayujī :—Gaut. VIII. 19 mentions Āśvayujī among the seven Pākayajñas as included in his 40 saṁskāras.

The Āśv. gṛ. II. 2. 1-3 describes[1954] the rite as follows : ' on the full moon day of Āśvayuja (i. e. Āśvina) the Āśvayujī rite (is performed). Having adorned the house, having bathed and put on clean (white) garments, they should take out a mess of cooked food for Paśupati and should offer it with the formula ' to Paśupati, to Śiva, to Śaṁkara, to Pṛṣātaka, svāhā.' He should sacrifice with his joined hands a mixture of milk and clarified butter with the formula ' may what is deficient in me be made complete (or full); may what is complete not deteriorate in me. To Pṛṣātaka, svāhā.'

The Śāṅ. gṛ. (IV. 16) requires that in this rite oblations of clarified butter should be offered to Aśvins, to the two stars of Aśvayuj nakṣatra, to the full moon of Āśvina; to Śarad (autumn) and to Paśupati and the mixture of milk and ājya is offered with the hymn Ṛg. VI. 28 (ā gavo agman) and that on that night the calves are allowed to join their mothers. Pār. gṛ. II. 16 calls this rite Pṛṣātakāḥ, but it prescribes the cooking of *pāyasa* (milk-rice) for Indra and offerings of that mixture with curds, honey and ghee are made to Indra, Indrāṇī, the Aśvins, to the full moon of Āśvina and Śarad (autumn). The Gobhila gṛ. III. 8. 1 also calls this rite Pṛṣātaka and it adds the tying to the arms &c. of amulets made of *lac* together with all sorts of herbs for the sake of prosperity. Vide also Khādira gṛ. III. 3. 1-5, Vaik. IV. 9 for this rite.

In most of the gṛhyasūtras another rite called Āgrayaṇa is described immediately after Āśvayujī. Haradatta on Gaut. VIII. 19 explains that in the Āśvayujī rite mentioned by Gaut. both the Āśvayujī described above from Āśv. gṛ. and Āgrayaṇa are included. Āgrayaṇa is also called ' Navayajña ' in Gobhila-smṛti (in verse III. 103) and Navasasyeṣṭi in Manu IV. 27.

1954. आश्वयुज्यामाश्वयुजिकर्म । निवेशनमलंकृत्य स्नाता शुचिवाससः पशुपतये स्थालीपाकं निरूप्य जुहुयुः पशुपतये शिवाय शङ्कराय पृषातकाय स्वाहेति । पृषातकमवशिष्टं जुहुयात्, ऊनं मे पूर्यतां पूर्णं मे मोपसदत् पृषातकाय स्वाहेति । आश्व. गृ. II. 2. 1-3. Nārāyaṇa explains that 'they' mean the sacrificer and his sons and other male descendants (who touch him). The word 'ni-rūpya' means that on the mess of cooked food, the two operations of nirvāpa (taking out a portion from the whole with the mantra पशुपतये त्वा जुष्टं निर्वपामि) and prokṣaṇa are to be performed and that the rest of the mess is to be eaten by the sacrificer and his family. पृषातक means 'milk mixed with clarified butter'. This is taken out with the *sruva* ladle. There is an offering to Sviṣṭakṛt Agni of the mess and of pṛṣātaka. खादिरगृह्य III. 3. 3 says पयस्यपनयेद्घृतं तत्पृषातकम्; vide also गोभिलस्मृति (in verse) III. 106.

Āgrayaṇa iṣṭi is prescribed in the Āśv. śrauta sūtra II. 9 and other śrauta sūtras for those who have consecrated the three vedic fires (i. e. āhitāgnis). According to Nārāyaṇa an āhitāgni is to perform this āgrayaṇa sacrifice of fresh corn according to the śrauta sūtra, but in case of difficulties he may do so in accordance with Āśv. gṛ. II. 2. 4 in the Tretā fires and that one who has not consecrated the three fires may offer the sacrifice in the *śālā* (i. e. aupāsana) fire. This āgrayaṇa rite is required even by the śrauta sūtra as to crops of rice, barley and śyāmāka [1955] only and no one was to make use of fresh corn of these three kinds without offering this sacrifice, but there was no restriction as to the use of other kinds of corn or as to vegetables &c. The word Āgrayaṇa is explained as [1956] 'that rite in which fresh fruits are first offered to gods' or 'that rite in which fresh corn is first offered or eaten'. The deities of the śrauta Āgrayaṇa are three, viz. Indrāgnī (or Agnīndrau), Viśvedevas, Dyāvāpṛthivī (heaven and earth), but in the gṛhya Āgrayaṇa, Agni Sviṣṭakṛt is added as the fourth (Śāṅ. gṛ. III. 8. 1, Āp. gṛ. 19. 7). Āśv. gṛ. (II. 2. 4-5) gives a very brief description 'united [1957] with the seasons, united with the manners, united with Indra and Agni, svāhā; united...with Viśvedevas, svāhā; united...with Heaven and earth, svāhā'- with these formulas a mess of cooked food is offered at the Āgrayaṇa by one who has set up the śrauta fires; also by one who has not set up the śrauta fires, (the same offerings are made) in the domestic (gṛhya) fire. Āp. gṛ. 19. (6-7) also is

---

1955. आश्व. श्रौ. II. 9.1 expressly says 'आग्रयणं व्रीहियामाकयवानाम्' and जयराम on पारस्करगृह्य quotes गृह्यसंग्रहकार 'नवयज्ञाधिकारस्थाः श्यामाका व्रीहयो यवाः । नाश्नीयात्तानहुत्वैवमन्येष्वनियमः स्मृतः ॥'. The मानवगृह्य II. 3. 9 has नानिष्ट्वाग्रयणेन नवसस्यस्याश्नीयात् ।.

1956. सुदर्शन on आप. गृ. 19. 6 says 'येन कर्मणा अग्रं नवान्नयं देवान्प्रापयतीति यत्कर्म कृत्वैव वाग्रयणं प्रथमायनं नवान्नप्राशनप्राप्तिर्भवतीति ।'; हरदत्त on the same says एतिरत्र प्राशनार्थः.

1957. सजूर्ऋतुभिः सजूर्विधाभिः सजूरिन्द्राग्निभ्यां स्वाहा । सजूर्ऋतुभिः... सजूर्विश्वेभ्यो देवेभ्यः स्वाहा । सजू...सजूर्द्यावापृथिवीभ्यां स्वाहेत्याहिताग्नेराग्रयणः स्थालीपाकः । अनाहिताग्नेरपि शालाग्नौ । आश्व. गृ. II. 2. 4-5 ; अनाहिताग्नेराग्रयणम् । नवानां स्थालीपाकं अपचित्वाग्रयणदेवताभ्यः स्विष्टकृच्चतुर्थाभ्यो हुत्वा तण्डुलानां हुस्रं पूरयित्वा गत्वाच्यौदनपिण्डं संवृत्योत्तरेण पशुयागास्तूप उद्धिश्येत् । आप. गृ. 19. 6-7. The मन्त्र is परमेष्ठ्यसि परमां मा श्रियं गमय (आप. म. पा. II. 18. 1). Sudarśana notes that some held that uncooked grains of fresh rice were to be swallowed while others held that one was to partake of a portion of the boiled rice cooked for sacrificing.

concise '(Now follows the description of) Āgrayaṇa for one who has not set up the śrauta fires. Having prepared a mess of cooked food with fresh corn, he offers oblations to the deities of the (Śrauta) Āgrayaṇa with Sviṣṭakṛt (Agni) as the fourth, he fills his mouth with grains of rice, swallows them, takes ācamana and having rolled up a lump of rice (from the mess of cooked rice) he throws it up on to the top of the dwelling with the next *yajus* (Ap. M. P. II. 18. 1).'

This rite is also described in Śāṅ. gṛ. III. 8, Pār. gṛ. III. 1, Gobhila gṛ. III. 8. 9-24, Khādira gṛ. III. 3. 6-15, Vaik. IV. 2, Mānava gṛ. II. 3. 9-14 &c.

There is one peculiarity in Vaik. viz. that it connects the Pitṛs also with this rite. According to Mānava gr. the Āgrayaṇa is performed on a parva day in Vasanta (spring) with fresh barley that is (then) harvested and with rice in śarad (autumn).

Vaik. VI. 19 prescribes the prāyaścitta of pādakṛcchra or a fast for using first fruits without performing Āgrayaṇa rite.

In modern times some vestige of this *Navayajña* (sacrifice of first fruits) still remains. The full moon day of Āśvina is still called in the Deccan 'navyācī paurṇimā' and a few ears of growing crops are picked up, are woven with flowers and tastefully arranged and the whole is suspended from the entrance door or its lintel.

Āgrahāyaṇī:—This is one of the seven pākayajñas mentioned by Gautama (VIII. 19) among his forty saṁskāras.

The full moon day of Mārgaśīrṣa is called Āgrahāyaṇī; the rite[1958] performed on that day is also called by the same name on account of association with it. *Pratyavarohaṇa* is a rite performed to signalise the giving up of the use of cots and high couches, recommended from the full moon of Śrāvaṇa for fear of snakes (as in Śāṅ. gṛ. IV. 15. 22). Some describe two rites separately, one on the full moon day of Mārgaśīrṣa and another called Pratyavarohaṇa on the first night of Hemanta (vide Āp. gṛ. 19. 3-5 and 8-12). There is some divergence as to the time and the exact procedure of this rite. Some (like Āśv. gṛ. II. 3. 1-2) hold that it may be performed on the 14th day of the bright

1958. आग्रहायणी मार्गशीर्षी पौर्णमासी तस्यां या क्रिया सापि तद्योगादाग्रहायणीत्युच्यते। प्रत्यवरोहणीति वा अस्या नामधेयम्। मातृदत्त on हिरण्य. गृ. II. 17. 1. Vide Tilak's 'Orion' (1893) pp. 73-90 for a learned and penetrating discourse on the word 'Āgrahāyaṇī.

half or the full moon day of Mārgaśīrṣa. Others restrict it to the full moon day. Very elaborate descriptions are given in Pār. gṛ. III. 2, Gobhila gṛ. III. 9. 1–23. As this rite has entirely gone out of vogue a brief description from the Āśv. gṛ. alone is appended[1959] here. "Having again (after Āśvayujī) renovated the house with plaster (of paint or cow-dung) and by levelling (the floor), they should offer after sunset oblations of pāyasa (milk-rice) with the mantras 'strike aside,[1960] O white one, with thy foot, with the front and back portions of the foot these seven women (daughters) of Varuṇa and all (females) that belong to the tribes of the king (of serpents). Inside the house of the white one the serpent did not kill any thing, adoration to the white one, the son of Vidārva, svāhā.' Here no oblation is offered to (Agni) Sviṣṭakṛt. While gazing fixedly at the fire he repeats in a low voice 'may there be no harm to us from the progeny[1961] of Prajāpati.' He should think in his mind of Hemanta (winter) saying 'be auspicious and well-disposed towards us.' To the west of the fire a well-spread layer of grass should be prepared; he should sit down on it and having recited in a low voice 'Be blissful, O Earth' (Ṛg. I. 22. 15) he should lie down on that layer with his people (sons &c.) with the head towards the east and face turned towards the north. The others may lie down according as space permits or each should lie down one after another, the elder one before the one next to him in years. Those (of the sacrificer's sons &c.) who know the mantras should murmur them (Ṛg. I. 22. 15 and the mantras referred to in sūtra 12 below). Getting up from the layer they should three times recite the mantra 'from that place may the gods protect us' (Ṛg. I. 22. 16); the same verse (they should repeat) a fourth time turning their faces to the south, to the west and the north.[1962] Having gathered together they should

1960. The two mantras अप श्वेत पदा जहि and न वै श्वेतस्या० occur in आप. म. पा. II. 17. 26-27, Pār. gṛ. II. 14 (in Śravaṇā-karma), Śāṅ. gṛ. IV. 18. 1, Mānava gṛ. II. 7. 1 (in all with variations).

1961. Serpents are said to be the progeny of Kaśyapa, a Prajāpati; vide सभापर्व 11. 18–19 where Kaśyapa is stated to be one of the Prajāpatis and Ādiparva 16, where it is said that from Kadrū one of the wives of Kaśyapa the snakes were born.

1962. Ṛg. I. 22. 16 is to be repeated thrice while facing the east and then each pāda of that verse is to be repeated while the face is turned to the south, the west and the north (the verse has only three pādas, being in the Gāyatrī metre).

repeat in a low tone the mantras sacred to the sun and the Svastyayana[1963] mantras, cook food and feed the brāhmaṇas and make the latter pronounce auspicious words." In the Pāli work called Aṅguttara-nikāya there is a section called Paccorohanivagga in which the Pratyavarohaṇa observed by brāhmaṇas is described. Vide Aṅguttara vol. V. (ed. by Hardy) p. 233 CXIX. and Z. D. M. G. vol. 52 pp. 149–151.

Āgrahāyaṇī has been described also in Khādira gṛ. III. 3. 1–26, Gobhila gṛ. III. 9, Mānava gṛ. II. 7. 1–5, Bhār. gṛ. II. 2, Āp. gṛ. 19. 3–5, Kāṭhaka gṛ. 60. 1 ff., Kauśika sūtra 24. 24–36 Hir. gṛ. II. 17. 1 (where Mātṛdatta says that Āgrahāyaṇī is also styled Pratyavarohaṇa). Baud. gṛ. II. 10 speaks of a rite called Pratyavarohaṇa to be performed at the beginning of each of the six ṛtus (seasons) and the intercalary month (if any). This is a different rite.

Śūlagava or *Īśānabali*:—This was originally an offering of the flesh of an ox to Śiva. There was some difference of opinion as to the time. Āśv. gṛ. IV. 9. 2 states that it was to be performed in Śarad (autumn) or in Vasanta (spring) under the constellation of Ārdrā. The Baud. gṛ. II. 7. 1–3 says that every year it was to be performed on the full moon day of Mārgaśīrṣa or on the Ārdrā nakṣatra[1964] in that month or whenever cattle suffer from some pest or disease. The Kāṭhaka gṛ. (52. 2–3) declares that the Śūlagava may be performed from various desires in śarad or vasanta and that according to some ācāryas there is no restriction as to season. The Bhār. gṛ. II. 8 and Hir. gṛ. II. 8. 2 say that it may be performed in the bright half of a month and on an auspicious nakṣatra.

Various explanations are given why this rite was called Śūlagava. Nārāyaṇa[1965] says Śūla here means one who has a

---

1963. According to Nārāyaṇa Ṛg. X. 158., Ṛg. I. 50. 1–9, I. 115. 1, and X. 37. 1 are called Saurya verses; while स्वस्त्ययनानि are the verses that contain the word *svasti* or a benediction, viz. Ṛg. I. 89. 1, V. 51. 11, X. 63. 1. Nārāyaṇa follows Āśv. Śr. Sūtra VI. 5. 18 as to Saurya hymns; but it is doubtful whether he is right as to the svastyayana verses. According to the Bṛhad-devatā VIII. 77, Ṛg. X. 178 is a svastyayana hymn.

1964. Rudra is the presiding deity of Ārdrā. Vide note 563 above.

1965. शूलोऽस्यास्तीति शूलः अर्शआदिभ्योऽच् । शूलिन्यर्थः । शूलिने रुद्राय गोपत्वेन यागः स शूलगवः । नारायण on आश्व. गृ. IV. 9. 1; शूलाङ्कितो गौः शूलगवः तथोपात्कर्मणि वृत्तिः । हरदत्त on same.

spit (or pointed rod) i. e. Śiva who is called Śūlin and that this sacrifice is offered to Rudra Śūlin with the ox as a sacrificial animal. Haradatta explains that here the ox is marked with the rod (of Śiva).

This rite is most elaborately described in Āśv. gṛ. IV. 9, Baud. gṛ. II. 7, Hir. gṛ. II. 8–9, Bhār. gṛ. II. 8–10, Pār. gṛ. III. 8. It appears that even in the times of the gṛhya sūtras there were many who did not like the rite of ox-flesh. The Baud. gṛ. (II. 7. 26–27) says[1966] that if a person cannot secure an ox he may sacrifice with a goat or ram or he may cook a mess of cooked food for Īśāna and with that he does everything that is to be done by means of an ox. The commentator Devapāla on Kāṭhaka[1967] gṛ. 52. 1 says that only a goat is offered and the bull is let off as the people are opposed to the idea of the sacrifice of an ox.

As this rite has totally gone out of practice only a brief description of it from the Mānava gṛhya[1968] (which is the briefest of all on this rite) is given here. 'Śūlagava is to be performed in Śarad for (propitiating) Rudra. In the north-east of the village and not near it (it is to be performed) at night and there is to be a sacrificial post, not chiselled (into an octagonal shape as in other sacrifices), in the midst of oxen. Before the (final offering) to Agni Sviṣṭakṛt (i. e. after performing the usual homa with boiled rice up to this point) he should fill eight vessels made of leaves with blood and offer them in the principal quarters and the intermediate quarters with the eight *anuvākas* (Tai. S. IV. 5. 1 ff. and Vāj. S. 16th adhyāya) beginning with 'adoration to thee, O Rudra, who are Manyu (wrath).' He should not bring the uncooked offerings into the village. He should bury into the ground the rest (of the animal offered) and its skin also. Some ācāryas say that in the pākayajñas in which animals are sacrificed there is no sacrificial post.'

Vāstu-pratiṣṭhā :—(construction and occupation of a new house).

The Āśv. gṛ. II. 7-9, āṅ. gṛ. III. 2-4, Pār. gṛ. III. 4, Āp. gṛ. 17. 1-13, Khādira gṛ. IV. 2. 6-22 and other gṛhya works deal with the matter of building a new house. Āśv. gṛ. (II. 7) says that one who intends to build a house should first examine the ground, which must be non-salinous, which should have herbs and trees, much kuśa and *vīraṇa* grass growing on it; that one should dig out thorny plants and plants having milky juice with their roots and remove them and also certain other plants like apāmārga, tilvaka, etc. He should select a spot where the waters coming together from all sides to the centre of it flow round the resting place having the latter on their right side and then are discharged off to the east without noise. Such a spot possesses all auspicious qualities. He should (Āśv. gṛ. II. 8) also dig a pit knee-deep in the ground to be examined and then fill the pit again with the earth taken out. If the earth taken out fills the entire pit and some earth remains, then the plot is excellent for building a house on; if all the earth dug out just fills the pit, it is of middle quality; if the earth is not enough to fill the pit the plot is to be rejected. Another method is to fill the pit with water and leave it there through the night. If in the morning there is water in the pit the ground is excellent; if it is moist only, the ground is of middle quality; if it is found dry in the morning the plot is to be rejected. The three *dvijātis* should respectively select white, red and yellow ground as a site for their house. The plot should be square or rectangular and the owner should draw a thousand furrows on it. 'With a śamī or udumbara branch he sprinkles the ground with water, going thrice round it with his right hand towards it and recites the Śantātīya hymn.[1969] He does this thrice pouring out water without interruption with the three verses 'āpo hi ṣṭhā' (Ṛg. X. 9. 1-3). Under the divisions of the bamboo which rests on the chief posts he should have the single rooms constructed. Into the pits in which the posts are to stand he should have an *avakā* and the water plant called śīpalā put down. Having put the plant into the pit in which the middle post is to stand he should spread on it east-ward pointed and north-ward pointed kuśa grass and should sprinkle

1969. This is Ṛg. VII. 35. 1-15 in which all verses (except 14 and 15) commence with the word 'śam' and also have the same word several times.

on the kuśas water into which rice and barley have been thrown with the words 'to the steady one, the earth demon, svāhā.' He should when the middle post is being erected repeat over it the two verses 'stand here &c.' and 'to thee the young child may come &c.' Over the bamboo staff when it is placed on the middle post he recites the hemistich 'rightly ascend the post &c.' On four stones on which dūrvā grass has been spread he should establish the water barrel with the words 'arise on the earth' or with the verse 'the arangara sounds &c.' He then should pour water into it with the verse 'hither may king Varuṇa come &c.' He then appeases it as follows: he puts gold into water in which rice and barley have been put and with that water he sprinkles it three times, going round it with his right turned towards it with the Śantātīya hymn. This he does three times pouring water without interruption with the three verses 'āpo hi ṣṭhā' (Ṛg. X. 9. 1-3). In the middle of the house he should cook a mess of food, sacrifice from it with the four verses 'Vāstoṣpate prati' (Ṛg. VII. 54. 1-3 and VII. 55. 1) verse by verse,[1970] should cook food which should be given to the brāhmaṇas to eat, whom he should cause to say 'lucky is the ground.'

The Matsyapurāṇa (chap. 252-257) deals at length with Vāstuśāstra, the construction of a house of various dimensions, its posts, the timber to be employed, the rites to be performed when laying the foundation and at later stages, the rite for Vāstuśānti (propitiatory rite for averting evil).

The Matsyapurāṇa[1971] (256. 10-11) states that a vāstuyajña has to be performed five times in relation to a house, viz. when laying down the foundation (lit. using the measuring line), when fixing the first post, when raising the first door frame, when entering the house (gṛhapraveśa) and when vāstuśānti is to be performed (for averting evil or on seeing portents). It briefly describes Vāstuyajña as follows (chap. 256. 5-9): On an auspicious day and moment, the stone should be laid over jewels and all seeds; similarly the post is to be worshipped at the hands of four brāhmaṇas; the priest who should wear

1970. The hymn Ṛg. VII. 54 has only three verses but four oblations are directed. Therefore the 4th oblation is to be offered with Ṛg. VII. 55. 1 which also is addressed to Vāstoṣpati.

1971. सूत्रपाते तथा कार्यमेवं स्तम्भोदये पुनः। द्वारवंशोच्छ्रये तद्वत् प्रवेशसमये तथा॥ वास्तूपक्रमणे तद्वद्वास्तुयज्ञस्तु पञ्चधा। ईशाने सूत्रपातः स्याद्वाग्नेये स्तम्भरोपणम्॥ मत्स्यपु. 256. 10-11.

white garments should be master of the Veda and should be accompanied by the artizans, should fix the post that is washed with water mixed with all herbs (or herbs called sarvauṣadhi) and covered with many whole rice and decked with clothes and ornaments to the accompaniment of Vedic mantras and the tunes of auspicious music; he should perform a homa with honey and clarified butter and should repeat the mantra 'vāstoṣpate prati' (Ṛg. VII. 54. 1); then the owner should feed brāhmaṇas with a dish of rice-milk. The Matsyapurāṇa notes that the foundation should be laid in the north-east corner and the first post fixed in the south-east. The Matsyapurāṇa (chap. 268) decribes the procedure of Vāstuśānti and remarks (verses 33–35) that it should be performed when beginning the construction of a temple or a house or a public park or when entering a town or one's house for the first time for averting all evil and it should also be performed every year in one's house. In that rite he should make the brāhmaṇas repeat the Rākṣoghna hymn and a hymn to Pavamāna Soma (one from Ṛg. IX. or IX. 1).

In modern times the ceremony of entering a newly built house is an important one, is an extensive affair and marked by great *éclat*. A very auspicious day is required for this ceremony and numerous astrological considerations enter into the choosing of a proper day. The ceremony of an entrance is preceded on the same day or on the previous day by a vāstuśānti (propitiatory rite) of which grahamakha (a rite for propitiating the planets) forms a part and the usual rites of worship of Gaṇeśa and the like (mentioned at pp. 213–218) have also to be performed. A few salient features are mentioned here. A maṇḍala is drawn divided into 81 squares, 62 *devatās* are invoked to be present in the maṇḍala, then a homa is offered to the nine planets with 28 oblations of fuel sticks, sesame and ājya to each planet and oblations are offered to other deities, the performer and his wife have holy water sprinkled over their heads from auspicious jars, the house is surrounded thrice with thread beginning from the east to the accompaniment of Rākṣoghna (Ṛg. IV. 4. 1–15 or X. 87. 1–25) and Pavamāna (Ṛg. IX. 1. 1–10) mantras and round the house water is continuously poured in a stream from a jar with the same two hymns. A pit is dug in the south-east corner of the house which is cowdunged, worshipped with flowers and sandalwood paste and a baked brick box containing seven kinds of corn, moss, flowers &c. is lowered into it and the pit is filled up. Then the house is entered to the accompaniment

of music by the owner who is accompanied by his wife, sons and brāhmaṇas and who holds in his folded hands an auspicious jar filled with water and having fresh sprouts, dūrvā grass thereon and marked with sandalwood paste and flowers and covered with cloth. The svasti hymn (vide note 1963 above) and the hymn beginning with 'kranikradat' (Ṛg. II. 42. 1-3) are recited and the auspicious jar is put down on a heap of corn. Then the brāhmaṇas perform puṇyāhavācana (vide note 503 above), they are honoured and utter 'may the house be lucky', dinner is given to the brāhmaṇas who pronounce benedictions, and the owner then takes his meal with his friends. [1972]

1972. The सङ्कल्प is 'अमुकगोत्रस्यामुकशर्मणो मम सपरिवारस्यास्मिन्वास्तौ चिरकालसुखनिवासपूर्वकनिखिलरोगविघ्नादिशान्तिसम्पदारोग्यपुत्रपौत्रधनधान्यादिसमृद्धिचिरजीवनस्थनिवाससिद्धिद्वारा श्रीपरमेश्वरप्रीत्यर्थमस्य वास्तोः शुभतासिध्यर्थं सग्रहमखां वास्तुशान्तिं करिष्ये'.

CHAPTER XXV

DANA (Gifts)

Manu (I. 86) and others state that in the four *yugas* (ages) viz. Kṛta, Tretā, Dvāpara and Kali, the principal aspects of religious life were respectively *tapas*, metaphysical knowledge, sacrifices,[1973] and gifts. Manu (III. 78) eulogises the stage of householder as the most worthy because all men in the other āśramas are cherished and fed with (Vedic) knowledge (as a teacher of Vedic students) and with food by him. Yama specifies the characteristic features of the four āśramas as follows: 'quiescence is the dharma of ascetics, cessation from taking ordinary food that of forest hermits, dāna (making gifts) that of householders and obedience (or service) that of brahmacārins.' Vide Dakṣa 1. 12-13 also for the peouliar outward characteristics of the four āśramas. Therefore the subject of *dāna* (gifts or charity) will now engage our attention.

Gifts of various kinds and donors have been highly eulogised in the Ṛgveda. There are *dānastutis* (eulogies of gifts) in Ṛg. I. 125 (where the gifts made by king Svanaya son of Bhāvayavya to Kakṣīvat are praised and dāna in general is eulogised in verses 5-7), I. 126. 1-5 (where the same praise is continued), V. 61 (where Śyāvāśva praises the donors Taranta, Purumiḷha and Ratha-vīti), VI. 47. 22-25 (praise of the donor Prastoka Sārñjaya), VII. 18. 22-25 (praise of the gifts made by Sudās Paijavana), VIII. 5. 37-39 (praise of Kaśu Caidya), VIII. 6. 46-48 (praise of Tirindira Pāraśavya), VIII. 46. 21-24 (praise of Kānīta), VIII. 68. 14-19, X. 62. 8-11 (praise of Sāvarṇi). Among the objects gifted the most prominent are cows. In Ṛg. I. 126. 3 Kakṣīvat represents[1974] that he received sixty thousand cows

1973. तपः परं कृतयुगे त्रेतायां ज्ञानमुच्यते। द्वापरे यज्ञमेवाहुर्दानमेकं कलौ युगे॥ मनु I. 86 = शान्तिपर्व 232. 28 = पराशर I. 23 = वायुपुराण 8. 65-66. यतीनां तु शमो धर्मस्त्वनाहारो वनौकसाम्। दानमेव गृहस्थानां शुश्रूषा ब्रह्मचारिणाम्॥ यम quoted in हेमाद्रि (दान० p. 6).

1974. उप मा श्यावाः स्वनयेन दत्ता वधूमन्तो दश रथासो अस्थुः। षष्टिः सहस्रमनु गव्यमागात्सनत् कक्षीवाँ अभिपित्वे अह्नाम्॥ ऋ. I. 126. 3. Sāyaṇa explains षष्ट्यधिकसहस्रं गवां समूहोऽनु आगात्.

from Svanaya, along with ten chariots to each of which four bay horses were yoked and in which young girls were seated. In Rg. VIII. 5. 37 reference is made[1975] to the gifts of ten thousand cows and of 100 camels by Kaśu Caidya. In Rg. V. 30. 12 a gift of 4000 cows to Babhru by the men of king Ṛṇañcaya is mentioned. Horses are also often described as objects of gift. e. g. Rg. V. 18. 5 (gift of 50 horses), VII. 16. 10, VIII. 46. 22 (gifts of 60000 horses, 2000 camels, 1000 bay mares and 10000 cows); VIII. 68. 17. For gifts of camels vide Rg. VIII. 5. 37, VIII. 46. 22. For gifts of young damsels vide Rg. I. 126. 3, VI. 27. 8, VII. 18. 22, VIII. 19. 36, VIII. 68. 17. The word 'vadhū' used in all these passages cannot mean that the young girls were meant to be the wives of the donees, since in some of them the 'vadhūs' gifted are as many as 10, 20 or even 50.[1976] So they were maid servants or female slaves. Rg. X. 117 contains an eulogy of the gift of food, the 6th verse of which is the basis of the later teaching of Manu III. 118, Viṣṇu Dh. S. 67. 43, Bhagavad-gītā 3. 13 and is as follows: 'the foolish man[1977] (who does not share with others) obtains food to no purpose; I say the truth that it is really his destruction; he does not offer food to Aryaman (i. e. to the gods) nor to his friend (or guest); one who takes food alone (without giving to others) partakes simply of sin.' This injunction was most assiduously followed at all times in India. In the Chān. Up. IV. 1-2 it is stated that Jānaśruti Pautrāyaṇa, a man of faith and very charitable, had erected everywhere shelters in order to feed at all times all people that came from all quarters. Rg. X. 107 (of 11 verses) is an apotheosis of dakṣiṇā (gift or sacrificial fee which generally consisted of a cow or cows), which word is repeated several times in almost every verse. Verses 2, 7 and 8 are very interesting 'Those who make gifts of dakṣiṇā (cows or fee) stand high in heaven, those who make gifts of horses stand in the world of the Sun, donors of gold secure immortality (become gods), those who give garments increase the duration of their life. Gifts endow (the donor) with horses, cows, the

1975. यथा चिच्चैद्यः कशुः शतमुष्ट्रानां दर्दृत्सहस्रा दश गोनाम्। ऋ. VIII. 5. 37; यदिं सहस्रा मघवन्त्यायुतासनमुष्ट्रानां विंशतिं शता। दश श्यावीनां शता दश हयवर्णीनां दश गवां सहस्रा॥ ऋ. VIII. 46. 22.

1976. अवाम्मे पौरुकुत्स्यः पञ्चाशतं त्रसदस्युर्वधूनाम्। महिह्नो अर्यः सप्तिः॥ ऋ. VIII. 19. 36.

1977. मोघमन्नं विन्दते अप्रचेताः सत्यं ब्रवीमि वध इत्स तस्य। नार्यमणं पुष्यति नो सखायं केवलाघो भवति केवलादी॥ ऋ. X. 117. 6. The last quarter is quoted by Kullūka on Manu III. 118. The verse occurs in तै. ब्रा. II. 8. 8.

moon (silver?), gold, food which is the life of us and the knowing (donor) makes gifts of his armour. Donors do not die (they reach immortality in heaven), they do not go down to a low goal, they are not harmed, nor do they suffer pain; dakṣiṇā renders unto these donors this whole world and also heaven'. Rg. VI. 47. 23 mentions that from Divodāsa gifts of ten horses, ten boxes (i. e. chariots or boxes of gold), ten garments, in addition to dinners and ten lumps of gold were received.[1978]

It appears that although in the Rg. gifts of horses are spoken of as next in importance to gifts of cows, popular sentiment changed very early. In the Pauṇḍarīka sacrifice the fee was a thousand horses and in the Jyotiṣṭoma one cow and one horse (Śabara on Jaimini III. 4. 28). The Tai. S. II. 3. 12. 1 says[1979] 'Varuṇa indeed seizes him (i. e. he suffers from dropsy) who accepts the gift of a horse and that one should offer to Varuṇa as many offerings prepared on four potsherds as the horses accepted.' Jaimini (III. 4. 28-31) establishes two propositions in connection with this that the *iṣṭi* to Varuṇa is to be performed when the gift of a horse or horses is accepted in a Vedic sacrifice and that the iṣṭi is to be performed by the donor (and not by the acceptor). The Kāṭhaka Saṁ. XII. 6 also recommends that the horse should not be accepted as a gift, as it has two rows of teeth. In the Tai. Br. II. 2. 5 reference is made to the gift of gold, clothes, a cow, a horse, a human being, a bedstead and several other objects and their presiding deities are said to be Agni, Soma, Indra, Varuṇa, Prajāpati &c. The Tai. S. II. 2. 6. 3 says 'he who accepts an animal with two rows of teeth, such as a horse or a human being, (thereby) secures (to himself) a portion of *ātman* (self); he should offer a mess cooked on twelve potsherds to Vaiśvānara.' Manu X. 89 forbids the sale of the horse and other animals with uncloven hoofs; but the Pehoa inscription from Garibnath temple shows that brāhmaṇas engaged in the sale of horses and that a tax agreed to be levied from vendors and purchasers was made into a permanent fund for temples and priests (vide E. I. vol. I. p. 186). Gaut. 19. 16 mentions the horse among objects that are gifted by way of

1978. दृशाश्वान्दृश कोशान्दृश वस्त्राधिभोजना। दृशो हिरण्यपिण्डान्दिवोदासादसानिषद् ॥ ऋ. VI. 47. 23.

1979. वरुणो वा एतं गृह्णाति योऽश्वं प्रतिगृह्णाति यावतोऽश्वान् प्रतिगृह्णीयात् तावतो वारुणांश्चतुष्कपालान्निर्वपेत्। तै. सं. II. 3. 12. 1.

penance for sins. The Śāṅ. Br. (25. 14) says [1980] that he who after promising to gift all, does not give all, is reduced to falling into a deep pit or is killed. The Ait. Br. (30. 9) enjoins [1981] that one should not accept a gift rejected by the priests and if one accepts it it should be given over to one's enemy.

The Śat. Br. (II. 2. 10. 6) says 'there are two kinds of devas, the gods (heavenly) and the human gods viz. brāhmaṇas who have studied the Veda and mastered it; sacrifice is divided between these two, i. e. oblations go to the gods and the fee to the learned brāhmaṇas who are the human gods. These two kinds of gods when gratified place him (the sacrificer) in nectar (or in the celestial world).' [1982] The Tai. S. VI. 1. 6. 3 states that 'it is indeed *tapas* when [1983] a man makes a gift of what he owns.' We saw above (note 11) how the Br. Up. V. 2. 3 inculcates the three virtues of self-restraint, charity (*dāna*) and compassion. In the Ait. Br. 39. 6 [1984] it is stated that the king when anointed should make gifts of gold, fields and cattle. But it appears from the story of Viśvakarman Bhauvana narrated in the Ait. Br. (39. 7) and also in the Śat. Br. (XIII. 7. 1. 13–15) that when he desired to make a gift of the earth to his priest Kaśyapa as sacrificial fee the earth appeared and sang a verse 'no mortal must give me away as a gift; O Viśvakarman Bhauvana, you desired to give me away; I shall plunge into the midst of water, so that this your promise to Kaśyapa is fruitless.' It seems however that gifts of villages had come to be made very early. The Chān. Up. IV. 2. 4–5 narrates how Jānaśruti desirous of learning the saṁvarga lore

from Raikva offered a thousand cows, a golden chain, a chariot to which mules were yoked, his own daughter (as a wife) and certain villages to Raikva, which came to be known as Raikvaparṇa villages in the country of Mahāvṛṣa, where Raikva lived.

The literature on *dāna* is of enormous extent. Apart from casual references in the other *parvans* of the Mahābhārata, the major portion of the Anuśāsana parva is devoted to the various aspects of dāna. The Purāṇas, particularly Agni (chap. 208–215 & 217), Matsya (chap. 82–91 and 274–289) and Varāha (chap. 99–111), contain numerous verses on dāna. There are digests specially devoted to the topic of dāna, the most extensive and important being Hemādri's Dānakhaṇḍa (of the Caturvargacintāmaṇi), Dānakriyākaumudī of Govindānanda, the Dānamayūkha of Nīlakaṇṭha, the Dānavākyāvali of Vidyāpati, the Dānasāgara of Ballālasena and the Dānaprakāśa of Mitramiśra. Only a brief summary of the topics dealt with in all these is attempted below.

What constitutes gift (dāna) according to the śāstra has been discussed from very ancient times. There is a distinction between *yāga*, *homa* and *dāna*. The first is constituted by abandoning something that belongs to one, intending it for a deity and accompanying it with Vedic mantras; homa is throwing into fire something belonging to oneself over which one abandons one's ownership and which (thing) is intended for a deity; dāna consists in the cessation of one's ownership over a thing and creating the ownership of another over that thing and this last occurs when the other accepts the thing, which acceptance may be mental or vocal or physical; vide Śabara on Jaimini IV. 2. 28 (quoted above in note 1703), VII. 1. 5, IX. 4. 32 and the Mit. on Yāj. II. 27.[1985] The Mit. explains that physical acceptance may be effected in various ways such as by actually receiving the thing in one's hand, by simply touching it and quotes a smṛti which illustrates this 'one should give (and the donee may accept) a deer skin (by touching it) on the hairy side, a cow by its tail, an elephant by

1985. एष च यजिः यद् द्रव्यं देवतामुद्दिश्य मन्त्रेण त्यज्यते। शबर on जै. its trunk, a horse by its mane, a female slave by (touching) her head'. The Mit. adds that as it is impossible to accept a field physically (except by enjoying its fruits) its acceptance is effected by some enjoyment, however small, of its produce. The Viṣṇudharmottara quoted in Dānakriyākaumudī p. 7 gives more examples of the method of acceptance. Vide Bṛhat-Parāśara (chap. VIII. p. 242) for copious illustrations of the way in which a gift is to be accepted according to the nature of the thing given. The word 'pratigraha' has a technical meaning in Dharmaśāstra. Medhātithi on Manu IV. 5 says [1986] 'merely taking a thing (from another) does not constitute pratigraha (as understood in Dharmaśāstra). The latter word is applicable only to a particular kind of acceptance viz. when a person accepts what is given by the donor with the idea that he (the donor) will derive from that act some unseen spiritual result (adṛṣṭa or puṇya) and when in making the gift a vedic mantra is repeated. When one gives alms, no mantra (such as 'devasya tvā') is repeated and hence that is not the *dāna* spoken of by śāstra, nor does any one apply the word *pratigraha* to the acceptance of an article given through affection to a friend or a servant.' When such a word as vidyādāna (gift of learning to a pupil) is used, the word *dāna* is employed there in a figurative sense only; otherwise the teacher will have to give a dakṣiṇā to the pupil, whereas it is the pupil who may give a dakṣiṇā to the teacher. When some gift is made to an image, the word dāna in that case is also used in a secondary sense, as the image cannot accept the gift. Therefore Devala defines *dāna* (of the *śāstric* kind) [1987] as 'that is described as dāna when wealth is given according to śāstric rites so as to reach a receiver who is a fit recipient as defined in the śāstra. What is given to a worthy person without an eye to any particular object (to be achieved by such gift) but solely with the idea of doing one's duty, that is called dharmadāna'. The Dānamayūkha p. 3 explains that the definition of dāna given by

1986. नैव ग्रहणमात्रं प्रतिग्रहः। विशिष्ट एव स्वीकारे प्रतिपूर्वो गृह्णातिर्वर्तते। अदृष्टबुद्ध्या दीयमानं मन्त्रपूर्वं गृह्णतः प्रतिग्रहो भवति। न च भैक्षे देवस्य त्वादिमन्त्रोच्चारणमस्ति। न च प्रीत्यादिना दानग्रहणे। न च तत्र प्रतिग्रहव्यवहारः। मेधा० on मनु. IV. 5.

1987. अर्थानामुचिते पात्रे यथावत्प्रतिपादनम्। दानमित्यभिनिर्दिष्टं व्याख्यानं तस्य वक्ष्यते॥ देवल quoted by अपरार्क p. 287, दानक्रियाकौमुदी p. 2, हेमाद्रि (दानखण्ड p. 13), दानवाक्यावलि (D. C. Ms. No. 368 of 1891-95) folio 2 b. The last reads श्रद्धया for यथावत्. पात्रेभ्यो दीयते नित्यमनवेक्ष्य प्रयोजनम्। केवलं धर्मबुद्ध्या यद्धर्मदानं तदुच्यते॥ देवल quoted by हेमाद्रि (दान p. 14).

Devala applies to the best kind of dāna (called sāttvika) and not to dāna in general. If a gift is sent to a person, but it is lost while on its way or it is stolen and never reaches the donee, then there is no acceptance and so no complete dāna and the donor cannot reap the reward of dāna in such a case.

There are six aṅgas (constituent elements) of dāna, as stated by Devala,[1988] viz. the donor, the donee, śraddhā (charitable attitude), the subject of gift which must have been acquired by the donor in a proper way, a proper time and a proper place. The first four are clearly indicated in Manu IV. 226-227. These six will have to be dealt with one after another.

One important word that deserves consideration in the subject of dāna is *iṣṭāpūrta*. That word has a high antiquity. It occurs in the Ṛgveda and the sense seems to be 'the cumulative spiritual result or merit due to a man's performance of sacrifices and charitable acts'. Ṛg. X. 14. 8 is addressed to one recently[1989] dead 'may you join the pitṛs, may you be united with Yama, and with your *iṣṭāpūrta* in the highest heaven'. The word, though employed in the singular (probably as a samāhāra-dvandva compound), consists of two parts, iṣṭa (what is sacrificed) and pūrta (what is filled). In the Atharvaveda also the word occurs 'may the iṣṭāpūrta of our ancestors save us (from our enemy); I seize yonder (man or enemy) with divine wrath' (II. 12. 4). Vide also Atharvaveda III. 29. 1. Sometimes the two components are employed separately or in the dual when compounded. The Tai. S. V. 7. 7. 1-3 has the interesting observation[1990] 'when he comes by the Devayāna paths, then make ye his iṣṭāpūrta manifest to him; whatever sacrifice was offered, whatever was handed over, whatever was given and the dakṣiṇā offered, may Agni present in all actions place all that in heaven among the gods for us.' The Tai. Br. II. 5. 5 says[1991] 'may Iṣṭa and pūrta last for endless

years; having sacrificed with an offering that is ever-lasting, a man ascended to the highest and ever-lasting world' and Tai. Br. III. 9. 14 remarks "the brāhmaṇa should sing 'you made gifts, you performed sacrifices, you cooked food (for serving to others).' Indeed iṣṭāpūrta belongs to a brāhmaṇa; he makes him (the king) prosper by iṣṭāpūrta." The Vāj. S. XV. 54 says 'O fire, may you be awake (or kindled), may you be watchful for us; join with iṣṭāpūrta (the sacrificer) and him with his iṣṭāpūrta.' The Kaṭhopaniṣad I. 1. 8 states that when a brāhmaṇa guest is allowed to stay in a house without being served with food he destroys the iṣṭāpūrta, the issue and the cattle of the householder. The Muṇḍaka Up. I. 2. 10 condemns those who regard iṣṭāpūrta as the highest and do not hold that there is anything higher than that and states that they have to come down to this world or to a lower world again after enjoying the blessings of Heaven.

Aparārka (p. 290) quotes the Mahābhārata for defining iṣṭa and pūrta [1992] 'whatever is offered in the single fire (i. e. gṛhya fire) and what is offered in the three śrauta fires and the gifts made inside the vedi (in śrauta sacrifices) are called *iṣṭa*; while dedication of deep wells, oblong large wells and tanks, temples, distribution of food, and maintaining public gardens—these are called pūrta.' Aparārka quotes Nārada also 'Honouring a guest and performance of vaiśvadeva constitute *iṣṭa* while the dedication of tanks, wells, temples, places for public distribution of food and gardens is called pūrta and also gifts made at the time of eclipses, or on the sun's passage in a zodiacal sign or on the 12th day of a month.' Hemadri (Dāna p. 20) quotes Śaṅkha that nursing of those who are ill constitutes pūrta. Manu (IV. 226–227) ordains 'one should always assiduously perform *iṣṭa* and *pūrta*, which when done with śraddhā and with wealth justly acquired become inexhaustible. One should ever resort to dānadharma (that mode of dharma which consists in gifts) which is either iṣṭa or pūrta, according

1992. महाभारतम्। एकाग्निकर्म हवनं त्रेतायां यच्च हूयते। अन्तर्वेद्यां च यद्दानमिष्टमित्यभिधीयते॥ वापीकूपतडागानि देवतायतनानि च। अन्नप्रदानमारामः पूर्तमित्यभिधीयते। अपरार्क p. 290 (vide note 370 for वापी &c.); the 2nd verse is अत्रि 44, while अत्रि 43 defines इष्ट as अग्निहोत्रं तपः सत्यं वेदानां चैव पालनम्। आतिथ्यं वैश्वदेवश्च इष्टमित्यभिधीयते॥. लिखित 5 is the same as अत्रि 43. Vide हेमाद्रि (दान p. 20) where एकाग्नि० and अग्निहोत्र० are ascribed to शङ्ख; also यम 68–70 and अग्निपुराण 209. 2–3 which define इष्ट and पूर्त almost in the same words as अत्रि.

to one's means, after meeting a worthy person (as recipient) and with a pleased attitude of mind.'

Any one including women and śūdras could make gifts. So much emphasis was laid on the duty to make gifts that Aparārka quotes a verse[1993] 'two persons should be drowned in water after tying round their neck a large stone, viz. a rich man not making gifts and a poor man who is not a *tapasvin* (who undergoes austerities or who is restrained).' It is stated in Atri 46, Likhita 6 and other smṛtis that[1994] 'Iṣṭa and pūrta are dharma common to all twice-born classes; the śūdra has authority to perform pūrta dharma, but not the Vaidika dharma (sacrifices etc.).' According to Devala the donor should be free from incurable or disgusting diseases, be religious, charitably inclined, free from vices, pure and following a blameless profession for livelihood. Several smṛtis note that it is a rare sight to see a man giving away in charity wealth earned by him. Veda-vyāsa[1995] (IV. 60) says 'amongst a hundred men, one may be found to be brave, among thousands a learned man, among hundreds of thousands an orator, but a donor may or may not be found.'

A good deal has already been said above (pp. 113–114) about the persons fit to be donees (*pātra*) and an unfit one. A few more words may be added here. Dakṣa III. 17–18 states 'a gift made to one's parents, guru, friend, to a well conducted man, to one who has laid the donor under obligation, to the poor, the helpless, those endowed with special excellence, leads to rewards, while gifts made to rogues, to bards, to wrestlers, to those who devote time to bad lores, to gamblers and deceitful persons, to cāṭas, to cāraṇas and thieves brings no

1993. द्वावेवाप्सु प्रवेष्टव्यौ गले बद्ध्वा महाशिलाम् । धनवन्तमदातारं दरिद्रं चातपस्विनम् ॥ quoted by अपरार्क p. 199, दानवाक्यावलि folio 2 a. This is उद्योगपर्व 33. 60 (which reads द्वावम्भसि निवेष्टव्यौ).

1994. इष्टापूर्तं द्विजातीनां धर्मः सामान्य इष्यते । अधिकारी भवेच्छूद्रो पूर्ते धर्मे न वैदिके ॥ अत्रि 46, लिखित 6 and quoted by Aparārka p. 24 as जातूकर्ण्य's. अपापरोगी धर्मात्मा दिक्सुरव्यसनः शुचिः । अनिन्द्याजीवकर्मा च षड्भिर्दाता प्रशस्यते ॥ देवल quoted by अपरार्क p. 288, हेमाद्रि (दान p. 14). पापरोगs are said to be eight such as Tuberculosis etc.

1995. शतेषु जायते शूरः सहस्रेषु च पण्डितः । वक्ता शतसहस्रेषु दाता भवति वा न वा ॥ वेदव्यास IV. 60.

fruit (or merit).[1996] Manu 4. 193-200 (= Viṣṇu Dh. S. 93. 7-13) contains a list of persons to whom gifts should not be made, such as a brāhmaṇa who is like a cat or hypocrite or who does not know the veda. Bṛhad-Yama III. 34-38 enumerates those brāhmaṇas who are unfit to be invited at a śrāddha or to be donees such as lepers, those who suffer from incurable diseases, those who officiate at sacrifices for śūdras, a devalaka and seller of Veda (teaching it with a prior stipulation for money) and in IV. 55-56 says that gifts made to brāhmaṇas that are addicted to bad actions, that are covetous, devoid of Veda study and sandhyā performance, who have swerved from the vows proper (for brāhmaṇas), who are wicked and who are immersed in pleasures of sense become fruitless. Vanaparva (200. 5-9) enumerates 16 futile gifts such as to one who left off the order of *saṁnyāsa* or of wealth acquired by unjust means &c. Almost the same verses occur in Bṛhat-Parāśara (VIII. pp. 241-242), which are quoted in Par. M. I, part 1, p. 188. Vide also Vṛddha-Gautama (III. chap. pp. 508-509) for numerous futile gifts. It is one's duty to give food at the end of Vaiśvadeva to all (vide note 1779 above) and the Viṣṇudharmottara directs that as to gifts of food and clothing the only consideration is whether the donor is hungry or in need of clothes and not caste nor qualities.[1996a] When on seeing a needy person the donor feels pleasure and indicates it by a smiling face, when he shows honour and is free from a feeling of ill-will or irritation (towards the suppliant), that is said to be śraddhā, according to Devala.[1997] Manu IV. 235 says that he who gives a gift with honour and he who accepts it with honour both go to heaven, but if the reverse is the case they go to hell.

Numerous rules are laid down about the things that can be the subject of gifts (i. e. about *deya*). Whatever is in this

1996. मातापित्रोर्गुरौ मित्रे विनीते चोपकारिणि। दीनानाथविशिष्टेषु दत्तं च सफलं भवेत्॥ धूर्ते वन्दिनि मद्ये च कुवैद्ये कितवे शठे। चाटचारणचौरेषु दत्तं भवति निष्फलम्॥ दक्ष III. 17-18, the 2nd verse being quoted by अपरार्क p. 286. About the meaning of cāṭa that occurs in many grants there is no unanimity. The Mit. on Yāj. I. 336 (चाटतस्कर &c.) explains चाटाः प्रतारकाः विश्वास्य ये परधनमपहरन्ति. Vide E. I. vol. IX p. 284 n. 10, p. 294, XI. p. 176, XIV. p. 156 for discussion of the meaning.

1996a. अन्नाच्छादनदानेषु पात्रं नैव विचारयेत्। अन्नस्य क्षुधितं पात्रं विवस्त्रो वस्त्रस्य चेति। विष्णुधर्मोक्तेः। दानमयूख p. 5.

1997. सौहृदयाद्यभिसंप्रीतिरर्थिनां दर्शने सदा। सत्कृतिश्चानसूया च तद्दानं श्रेष्ठमिति कीर्त्यते॥ देवल quoted by अपरार्क p. 288.

world a most desirable thing and what one prizes most in one's house may be given to a man endowed with good qualities by a donor who desires inexhaustible (merit) from it—Anuśāsana parva 59. 7.[1998] According to Devala, that is a proper subject for a gift, which has been acquired by the donor himself without causing pain or loss to another or without worry or trouble to himself, whether it be small or valuable (or much).[1999] It is not the extent of the gift that causes greater or lesser merit. Merit (*puṇya*) of gifts depends upon the mental attitude, the capacity of the giver and the way in which the donor acquired his wealth. If a man[2000] were to give even the whole earth acquired by unjust means, or if he makes a gift without śraddhā (as defined) or to an unworthy person he would secure no prosperity (religious merit) thereby. On the other hand by making a gift of even a handful of vegetables with a heart full of śraddhā and to a very worthy person, he may secure all prosperity. If one possessing a thousand makes a gift of 100 or one having ten makes a gift of one and another gives only water according to his ability, they all reap an equal reward.

Among *deya* things, some are the best, some middling, some inferior. Food,[2001] curds, honey, protection, cow, land, gold, horse and elephant—gifts of these nine are said to be the best; learning, house for shelter, domestic paraphernalia (like cots), medicine—these four are said to be middling; shoes, swings, carts, umbrellas, vessels, seats, lamps, wood, fruits and whatever is old and worn out and all other unspecified objects are inferior. Yāj. (I. 210–211) appears to have this difference in view when he says that a man, making a gift of land (capable

1998. यथाविष्टतमं लोके यच्चापि दयितं गृहे । तत्तद्गुणवते देयं तदेवाक्षयमिच्छता ॥ अनुशासनपर्व 59. 7 = मार्कण्डेय 35. 52–53 = मत्स्य 72. 39. This is विष्णुध. सू. 92. 32.

1999. अपराबाधमक्लेशं स्वयं येनार्जितं धनम् । स्वल्पं वा विपुलं वापि देयमित्यभिधीयते ॥ देवल quoted in अपरार्क p. 288.

2000. अन्यायाधिगतां दत्त्वा सकलां पृथिवीमपि । श्रद्धाविर्जमपात्राय न कांचिद् भूतिमाप्नुयात् ॥ प्रदाय शाकमुष्टिं वा श्रद्धाभक्तिसमुद्यताम् । महते पात्रभूताय सर्वाम्युदयमाप्नुयात् ॥ देवल quoted by अपरार्क p. 290; सहस्रशक्तिश्च शतं शतशक्तिर्दशापि च । दृष्टादृष्टश्च यः शक्त्या सर्वे तुल्यफलाः स्मृताः ॥ आश्वमेधिकपर्व 90. 96–97; एकां गां दशगुर्दद्याद् दश दद्याच्च गोशतीं । शतं सहस्रगुर्दद्यात्सर्वे तुल्यफला हि ते ॥ अग्निपुराण 211. 1.

2001. अन्नं दधि मधु त्राणं गोभूरुक्माश्वहस्तिनः । दानान्युत्तमदानानि उत्तमद्रव्यदानतः ॥ विद्या चाच्छादनावासपरिभोगौषधानि च । दानानि मध्यमानीति मध्यमद्रव्यदानतः । उपानत्पेडुयानानि छत्रपात्रासनानि च । दीपकाष्ठफलादीनि चरमं बहुवार्षिकम् ॥ बहुत्वादर्घजातानां संख्या शेषेषु नेष्यते । अधमान्यवशिष्टानि सर्वदानान्यतो विदुः ॥ देवल quoted by अपरार्क pp. 289–90, हेमाद्रि (दान० pp. 16.)

of yielding a crop or fruits), lamp, wood, garment, water (water-reservoir), sesame, ghee, house for travellers, money for settling a person as a married man (or bringing about his marriage by finding a girl for him), gold, draught ox, is honoured in the heavenly world, while one who makes a gift of a house, corn (of various kinds), protection from danger, shoes, umbrella, flowers, unguents, conveyance (chariot &c.), tree, a desired thing, a cot secures endless happiness. Gifts of three things are said to be superior to the gift of anything else and are styled[2002] *atidāna*, viz. of cows, land and Sarasvatī (vidyā) according to Vas. Dh. S. 29. 19 and Bṛhaspati 18. Vas. Dh. S. 29. 19, Manu 4. 233, Atri, 340, Yāj. I. 212 say that the gift of *vidyā* is the best of all gifts such as those of water, food, cows, land, garments, sesame, gold and clarified butter. On the other hand Anuśāsana-parva (62. 2) and the Viṣṇudharmottara (quoted by Aparārka p. 369) say that the gift of land surpasses all other gifts. The Viṣṇu Dh. S. 92. 1 says that the gift of protection from danger (abhayadāna) is the highest. The gifts of certain objects were called *mahādānas*. These and a few other dānas will be dealt with in some detail later on.

Dānas are divided into *nitya*[2003] (called ājasrika by Devala), *naimittika* and *kāmya*. Whatever is given everyday (such as food after Vaiśvadeva &c.) is nitya, what is given at certain specified times (such as on eclipses) or on account of doing certain acts (such as penance for lapses) is called naimittika; what is given through the desire of securing progeny, victory, prosperity, heaven or a wife is called kāmya (as it springs from a desire). Dedication of a garden or of a well &c. is called dhruvadāna (permanent gift) by Devala; while the Kūrma-purāṇa adds to the well-known three a fourth division called *vimala* (pure) defined by it as 'what is given to those who know brahma for securing the grace of God with a mind full of devotion.' Vas. Dh. S. 29. 1–15, Viṣṇu Dh. S. 92 and Manu IV. 229–232 (which are repeated in Vṛddha-Gautama, chap. XI. p. 586) and many of the purāṇas are eloquent over what

2002. त्रीण्याहुरतिदानानि गावः पृथ्वी सरस्वती। अतिदानं हि दानानां विद्यादानं ततोधिकम्। वसिष्ठ 29. 19; अति दानानि सर्वाणि पृथिवीदानमुच्यते। अनुशासन 62. 2.

2003. प्रपारामतडागादि सर्वकामफलं ध्रुवम्। तदाजस्रिकमित्याहुर्दीयते यद्दिने दिने॥ अपत्यविजयैश्वर्यस्त्रीबालार्थं यदिष्यत। इच्छासंस्थं तु तद्दानं काम्यमित्यभिधीयते॥ कालापेक्षं क्रियापेक्षमर्थापेक्षमिति स्मृतम्। त्रिधा नैमित्तिकं प्रोक्तं सहोमं होमवर्जितम्॥ देवल quoted by अपरार्क p. 289 and हेमाद्रि (दान० p. 16); यद्दीश्वरप्रीणनार्थं ब्रह्मविद्भ्य प्रदीयते। चेतसा भक्तियुक्तेन दानं तद्विमलं शिवम्॥ कूर्मपुराण quoted by हेमाद्रि (दान. p. 17).

rewards a man reaps by making gifts of water, food, sesame &c. The Bhagavad-gītā (17. 20-22) divides dānas into sāttvika, rājasa and tāmasa and defines them as follows: When a gift is made because one feels it one's duty to make it and at a proper time and place and to a worthy person who will not return it, it is called sāttvika; when it is made with an expectation of the donee doing a good turn in return or with a view to securing some reward therefrom and is given grudgingly, it is rājasa; when a gift is made at an improper time or place and to an unworthy person and without showing honour to the recipient and with disrespect (or contempt), it is declared to be tāmasa.

Many texts emphasize a rule similar to that in the Bible 'But when thou doest alms, let not thy left hand know what thy right hand doeth, that thine alms may be in secret'–Matthew VI. 3-4. Yogi-Yājñavalkya says[2004] that the reward of making gifts secretly, possessing knowledge without being puffed up and engaging in *japa* without others seeing it is infinite. Devala says 'sacrifice, gift and study lose their power and perish by being declared to others, by boasting about them or by repenting of having done them. Therefore one should not without good reason (such as protecting a gift &c.) proclaim one's meritorious act.'

Certain things when offered voluntarily by a person with his own hand must be accepted and not spurned even by one who does not ordinarily accept gifts. Manu IV. 247-250, Yāj. I. 214-215, Āp. Dh. S. I. 6. 19. 13-14, Viṣṇu Dh. S. 57. 11 declare that kuśas, vegetables (raw), milk, fish, fragrant substances, flowers, curds, clay, flesh, a bedstead, a seat, fried barley, water, precious stones, fuel-sticks, fruits and roots, honey, food offered without being asked (except of the impotent, of prostitutes and of *patita*) must not be spurned, but must be accepted.

Certain objects could not be donated either because one had no ownership over them or because the sages forbade such gifts. Jaimini (VI. 7. 1-7) establishes several propositions, viz. that one can make a gift only of what one owns, that one cannot make

2004. प्रच्छन्नानि च दानानि ज्ञानं च निरहंकृतम्। जप्यानि च सुगुप्तानि एषां फलमनन्तकम्॥ योगियाज्ञवल्क्य quoted in गृह. र. p. 243; लघुशातातप 149 is प्रत्यक्षानि (?) च दत्तानि ..... तपांसि ..... अनन्तकम्॥; इष्टं दत्तमधीतं वा विनश्यत्यनुकीर्तनात्। श्रद्धाशुद्धशोचनाभ्यां च भग्नतेजो विपद्यते। तस्मादात्मकृतं पुण्यं न वृथा परिकीर्तयेत्। देवल quoted by अपरार्क p. 290, हेमाद्रि (दान. p. 17).

a gift of one's relatives (parents, sons and others) in the Viśvajit, that a sovereign cannot make a gift of the whole of his kingdom, that horses cannot be gifted in that sacrifice as śruti forbids such a gift in that sacrifice, that a śūdra who serves the sacrificer merely as a duty cannot be given away and that whatever is of the full ownership of a person at the time of giving the dakṣiṇā can alone be gifted in the Viśvajit sacrifice. Nārada[2005] (dattāpradānika 4–5) forbids eight kinds of gifts viz. of what is handed over to a creditor by a debtor for delivery to a third person, what is borrowed for use (such as an ornament on a festive occasion), a pledge, property jointly owned with others, a deposit, son and wife, one's entire property when one has children, what has been already promised to another man. Dakṣa III. 19–20 enumerates nine things as not proper subjects of gifts (adding to Nārada's list 'a friend's wealth and gift through fear' and omitting 'what is already promised to another'). Yāj. II. 175 is of similar import. Aparārka p. 779 quotes verses of Bṛhaspati and Kātyāyana to the same effect. Vide above (pp. 507–508) as to a man's power over his children.

The texts took care to set limits to a man's generosity. After emphasizing in very eloquent language the obligation to share one's possessions, however meagre, with others, Veda-Vyāsa[2006] (IV. 30–31) inculcates the doctrine that charity begins at home. Āp. Dh. S. II. 4. 9. 10–12, Baud. Dh. S. II. 3. 19 ordain that one should not stint one's dependents (whom one is bound to maintain), one's servants and slaves for distributing food to guests and others. Yāj. II. 175 prescribes that one should make gifts in such a way as not to cause detriment to one's family. Bṛhaspati[2007] explains this by saying that one may give away

2005. अन्वाहितं याचितकमाधिः साधारणं च यत्। निक्षेपः पुत्रदारांश्च सर्वस्वं चान्वये सति। आपत्स्वपि हि कष्टासु वर्तमानेन देहिना। अदेयान्याहुराचार्या यच्चान्यस्मै प्रतिश्रुतम्॥ नारद (दत्ताप्रदानिक 4–5); सामान्यं याचितं न्यास आधिर्दारा: सुहृद्धनम्। भयार्दितं च निक्षेपः सर्वस्वं चान्वये सति। आपत्स्वपि न देयानि नव वस्तूनि सर्वदा। यो ददाति स मूढात्मा प्रायश्चित्तीयते नरः॥ दक्ष III. 19–20.

2006. यद्ददासि विशिष्टेभ्यो यज्जुहोषि दिने दिने॥ तत्ते वित्तमहं मन्ये शेषं कस्यापि रक्षसि॥ किं धनेन करिष्यन्ति देहिनो गत्वरायुषः। यद्वर्धयितुमिच्छन्ति तच्छरीरमशाश्वतम्॥ ग्रासाद्धर्मपि ग्रासमर्थिभ्यः किं न दीयते। इच्छानुरूपो विभवः कदा कस्य भविष्यति॥ प्राणनाशस्तु कर्तव्यः यः कृतार्थः स नो मृतः। अकृतार्थस्तु यो मुग्धः प्रायः खरसमो हि सः॥ मातापितृषु यद्दत्तं भ्रातृषु श्वशुरेषु च। जायापत्येषु यो दद्यात् सोऽनन्तः स्वर्गसंक्रमः। पितुः शतगुणं दानं सहस्रं मातुरुच्यते। भगिन्यां शतसाहस्रं सोदरे दत्तमक्षयम्॥ वेदव्यासस्मृति IV. 16, 18, 24, 26, 30–31 quoted by हेमाद्रि (दान) p. 33; vide अग्निपुराण 209. 32–33.

2007. कुटुम्बभक्तवसनाद्देयं यदतिरिच्यते। मध्वास्वादो विषं पश्चाद् दातुर्धर्मोऽन्यथा भवेत्॥ बृहस्पति quoted by अपरार्क p. 780 and हेमाद्रि (दान० p. 44).

wealth that is over and above what is required for maintaining one's family and for clothing and that the charity of one who disregards this rule is something that is sweet like honey at first but like poison in its effect. In this Bṛhaspati only echoes what Manu says (XI. 9-10) 'the charity of him who has wealth enough to make gifts to strangers, when his own people live a life of misery, is only a false imitation of dharma (and not the true dharma), it is at first like honey but will taste like poison (later). Whatever a man does for his welfare in the next world by stinting those whom he is bound to maintain results in unhappiness to him while living and also after death'. The Anuśāsana parva (37. 2-3) declares that if one makes a gift stinting one's servants, he makes himself a sinner, even though one may say that one would give whatever any one begs for (compare Luke VI. 30 'give to every man that asketh of thee'). Hemādri quotes[2008] Śivadharma to the effect that a man should set apart three parts out of five from his acquisitions for himself and his family and two parts for dharma, as life is evanescent.

Certain things were forbidden to be accepted as gifts. The gift of animals with two rows of teeth was forbidden by śruti (vide Śabara on Jaimini VI. 7. 4 quoted above). Vas. Dh. S. 13. 55 declares that a brāhmaṇa should not accept the gift of weapons, poisonous substances and spirituous liquor. Manu IV. 188 states that a brāhmaṇa who is not learned should not accept the gift of gold, land, horses, cow, food, garment, sesame, clarified butter; but if he accepts he is reduced to ashes (i. e. perishes) like wood. Hemādri (Dāna p. 57) quotes the Brahmapurāṇa that a brāhmaṇa should not accept the gifts of ewes, horses, precious stones, an elephant, sesame and iron, and that one who accepts a gift of antelope skin or sesame would not be born again as a male and that if a person accepts the bedstead, ornaments and the clothes of one who is dead he would go to hell.

As to the proper times for gifts, several rules are laid down. Apart from the daily duty to make gifts (Yāj. I. 203) gifts had to be made on special occasions and if so made were more meritorious than the gifts made daily. Laghu-Śātātapa (145-153)

2008. तस्मात् त्रिभागं वित्तस्य जीवनाय प्रकल्पयेत् । भागद्वयं तु धर्मार्थमनित्यं जीवितं यतः ॥ शिवधर्म quoted by हेमाद्रि (दान. p. 44) and दानमयूख p. 5.

says [2009] that a gift must be made on the first day of each *ayana* (the sun's passage to the north or south), at the beginning of Ṣaḍasīti and while an eclipse of the sun or moon is in progress and that the rewards of the gifts made on these occasions are inexhaustible. Vanaparva 200. 125 is to the same effect. A gift made on Amāvāsyā imparts rewards a hundred times (of the reward of making it on any ordinary day), a thousand times when made on the suppression of a tithi, a hundred thousand times when made on the equinoctial day and a gift brings endless rewards when made on Vyatīpāta. Saṁvarta (208–209) says that gifts made on the *ayana* day, equinoctial day, vyatīpāta, the suppression of a tithi and on the eclipses of the sun and moon, on new moon day, 12th day, saṁkrānti (sun's passage into a zodiacal sign) becomes inexhaustible and these tithis are highly commended and so also Sunday for a bath, japa, homa, dinner to brāhmaṇas, fast and gifts.[2010] Śātātapa (146) states that 16 *ghaṭikās* before and also after the moment when the sun enters a new zodiacal sign is the holy time for gifts, while others give 30 ghaṭikās (before and after) for Karkaṭaka (Cancer saṁkrānti), 20 for Makara (Capricorn) and 105 for Tulā (Balance) and Meṣa (Aries). Viśvarūpa on Yāj. I. 214–217 states that the times specified as the proper occasions for śrāddha are all of them the most appropriate times for making gifts. Vide Prajāpati 25 and 28 and Atri 327 for similar rules. Śaṅkha says that if amāvāsyā falls on Monday, the 7th tithi on Sunday, 4th on Tuesday, 8th on Wednesday—these four are like

2009. अयने विषुवे चैव षडशीतिमुखेषु च । चन्द्रसूर्योपरागे च दत्तमक्षयमुच्यते ॥ वनपर्व 200. 125; अयनादौ सदा दद्याद् द्रव्यमिष्टं गृहे वसन् । षडशीतिमुखे चैव विषुवे चन्द्रसूर्ययोः ॥ लघुशातातप 145, quoted as शातातप by अपरार्क p. 291. The sun's entrance into the signs of Gemini, Virgo, Sagittarius and Pisces is called षडशीति; vide बृहत्पराशर p. 245 and अपरार्क p. 292 quoting वसिष्ठ, अग्निपुराण 209. 9–10.

2010. शतभिन्दुक्षये दानं सहस्रं तु दिनक्षये । विषुवे शतसाहस्रं व्यतीपाते त्वनन्तकम् ॥ लघुशातातप 150 quoted as व्यास's by अपरार्क p. 292; विश्वरूप p. 144 also quotes the first पाद. When three *tithis* occur on the same day it is called दिनक्षय as the middle one is suppressed in the calendars (vide अपरार्क p. 292); शतभिन्दु० is quoted as याज्ञ० by हेमाद्रि (दान p. 69). व्यतीपात is one of the 27 योगs beginning with विष्कम्भ and is defined as श्रवणाश्विधनिष्टार्द्रानागवैष्णतमस्तके । यद्यमा रविवारेण व्यतीपातः स उच्यते ॥ (बृहन्मनु according to अपरार्क p. 426)—when the moon is in the constellations of Śravaṇa, Aśvinī, Dhaniṣṭhā, Ārdrā, Āśleṣā (first quarter) and amāvāsyā falls on Sunday it is Vyatīpāta. Even Bāṇa in the Harṣacarita IV states that Harṣa was born on a day that was free from all inauspicious conjunctions such as Vyatīpāta.

eclipses and so gifts made on these days yield infinite rewards (quoted by Hemādri, dānakhaṇḍa p. 66). The Viṣṇu Dh. S. chap. 89 deals with the rewards of the gifts of various articles made on the full moon days of the twelve months of the year. Anuśāsana chap. 64 speaks of dānas on the 27 nakṣatras from kṛttikā.

The general rule was that gifts were not to be made at night. But there are several exceptions. Atri 327 states that a gift even at night is commended on the occasions of eclipses, marriages, saṁkrāntis and the birth of a child. Devala [2011] quoted in Par. M. I. part I, p. 194 has a similar verse and the Par. M. adds that only on the Cancer and Capricorn saṁkrāntis are gifts allowed to be made at night.

The above rules about the special occasions for gifts are amply borne out by epigraphic evidence. A few examples may be cited. A very large number of grants on copper and stone relate to gifts of lands and villages at the time of solar eclipses. For example, vide Tiwarkhed plate of Rāṣṭrakūṭa Nannarāja dated *śake* 553 (653 ?) in E. I. vol. XI. p. 279, I. A. vol. VI, p. 73 (in *śake* 534 i. e. 613 A. D.), the grant of 30 *nivartanas* of land purchased for 30 gadyāṇakas of gold on a total eclipse of the sun in 754 A. D. in the time of Cālukya Kīrtivarman II (E. I. vol. III. p. 6), E. I. vol. III. p. 193 (of *śake* 716), E. I. vol. IX, p. 100 (in 660 A. D.). Grants on the occasion of a lunar eclipse are found in J. B. B. R. A. S. vol, 20, p. 135 (Navsari plates of Rāṣṭrakūṭa Mahāsāmanatādhipati Karkarāja issued in *śake* 738, i. e. 817 A. D.), in E. I. vol. I. p. 341 (Patna Inscription of the time of Yādava Siṅghaṇa dated *śake* 1128 i. e. 1207 A.D.), E.I. vol. 19, p. 41, E.I. vol. 20, p. 125 (in *saṁvat* 1108). Grants on *ayana* days may be seen in I. A. vol. 12, p. 193 (Haddāla plates of the Cāpa Mahāsāmantādhipati Dharaṇī-varāha issued in *śake* 836), the Sañjan grant of Amoghavarṣa dated *śake* 793 (Uttarāyaṇa-Mahāparvaṇi). Grants on Saṁkrāntis are found in E. I. vol. VIII. p. 182 (Dhulia plate of Karkarāja dated *śake* 701), E. I. vol. XII. p. 142 (in 1087 A. D.), E. I. vol. VIII. p. 159 (in *saṁvat* 1207). It may be noted that not only on the sun's passage in a rāśi, but even on Jupiter's passage in a rāśi (Taurus in this case) a grant was made as seen in Lucknow Museum plate of Kīrtipāla (E. I. vol. VII, p. 93 in *saṁvat* 1167 i. e. 1111 A. D.). A village was

---

2011. राहुदर्शनसंक्रान्तिविवाहात्ययवृद्धिषु । स्नानदानादिकं कुर्युर्निशि काम्यव्रतेषु च ॥ देवल quoted by हेमाद्रि (दान p. 81).

granted on Viṣuvasaṁkrānti to a brāhmaṇa in honour of Buddha by Mahīpāla I, a king of Bengal (vide E. I. vol. XIV, p. 324). For grants on Akṣaya Tṛtīyā (3rd of the bright half of Vaiśākha) vide E. I. vol. 14, p. 198 (when 32 villages were granted to 500 brāhmaṇas in saṁvat 1156) and E. I. vol. VII. p. 98 (Lar plates of Govindacandra of Kanoj in *saṁvat* 1202). For a grant made on Mahākārtikī (the full moon day of Kārtika) vide E. I. vol. X, p. 75 (which is a grant to several brāhmaṇas for enabling them to offer *bali*, *caru*, *vaiśvadeva*, *agnihotra* and the five *mahāyajñas*, in Kalacuri *saṁvat* 292 i. e. about 540 A. D.).

The places (*deśa*) where gifts are to be made are also specified in the smṛtis, purāṇas and digests. Gifts[2012] made in the house yield ten times as much merit (as when made elsewhere), a hundred times when made in a cowpen, a thousand times when made in sacred places (*tīrthas*) and an infinite number of times when made near an image (or liṅga) of Śiva. The Skandapurāṇa[2013] quoted by Hemādri (dāna p. 83) states that Benares, Kurukṣetra, Prayāga, Puṣkara (Ajmer), the banks of the Ganges and of the ocean, Naimiṣa forest, Amara-kaṇṭaka, Śrīparvata, Mahākāla (at Ujjayinī), Gokarṇa, Veda-parvata—these and the like are declared to be holy places resorted to by gods and *siddhas*; all mountains, all rivers and the ocean are holy; the habitations of cows, siddhas and sages are also holy; whatever is donated in these sacred places confers infinite reward.

When making a gift of anything one has to pour water on the hand of the donee. Āp. Dh. S. II. 4. 9. 9–10[2014] states that all gifts are to be made with water except in the case of vedic sacrifices where they are to be made as directed by the vedic texts. Gautama V. 16 says the same. In the case of all gifts they are to be accompanied by a separate dakṣiṇā. The Agnipurāṇa[2015] 211. 31 makes an exception in the case of gifts of

2012. गृहे दशगुणं दानं गोष्ठे चैव शताधिकम्। पुण्यतीर्थेषु साहस्रमनन्तं शिवसन्निधौ॥ quoted in दानमयूख p. 8.

2013. वाराणसी कुरुक्षेत्रं प्रयागः पुष्कराणि च। गङ्गासमुद्रतीरं च नैमिषामरकण्टकम्॥ श्रीपर्वतमहाकालं गोकर्णं वेदपर्वतम्। इत्याद्याः कीर्तिता देशाः सुरसिद्धनिषेविताः। सर्वे शिलोच्चयाः पुण्याः सर्वा नद्यः ससागराः। गोसिद्धमुनिवासाश्च देशाः पुण्याः प्रकीर्तिताः। एषु तीर्थेषु यद्दत्तं फलस्यानन्त्यकृच्चवेत्। स्कन्दपुराण q. by हेमाद्रि (दान p. 83).

2014. सर्वाण्युदकपूर्वाणि दानानि। यथाश्रुति विहारे। आप. ध. सू. II. 4. 9. 9–10; स्वस्तिवाच्य भिक्षादानमप्युदकपूर्वम्। ददातिषु चैवं धर्मेषु। गौ. V. 16–17.

2015. अदत्तदक्षिणं दानं व्रतं चैव सुपोत्तम। विफलं तद्विजानीयाद्भस्मनीव हुतं हविः॥ भविष्यपुराण quoted by हेमाद्रि (दान p. 111); अन्येषां चैव दानानां सुवर्णं दक्षिणं स्मृता। सुवर्णे दीयमाने तु रजतं दक्षिणेष्यते॥ q. in हेमाद्रि (दान p. 112); this is अग्निपुराण (211. 30) and दानक्रियाकौमुदी p. 11 quotes it from अग्नि०

gold, silver, copper, husked rice, corn, daily śrāddha and daily devapūjā (which may be without dakṣiṇā). That dakṣiṇā should consist pre-eminently of gold, but if gold itself is the article donated then the dakṣiṇā may be of silver. In the case of very costly gifts like *tulāpuruṣa*, the dakṣiṇā may be one hundred or fifty or 25 or ten *niṣkas* or one-tenth of the price of the thing gifted or according to ability.

Hemādri (Dāna pp. 96–97) and Dānamayūkha (pp. 11–12) quote verses from the Viṣṇudharmottara stating the presiding deities of the several articles that are donated (such as Agni of gold, Prajāpati of dāsas, Rudra of cows &c.) and adds that wherever no presiding deity is specifically named Viṣṇu is the presiding deity. Those very verses are quoted as from the Kapilapañcarātra in the Dānakriyākaumudī (p. 5). The Agnipurāṇa (209. 40–48) has similar verses. This notion is derived from the Brāhmaṇas and Śrautasūtras which speak of Rudra as the presiding deity of the gifts of cows, Soma of garments, Prajāpati of human beings and so on (vide Tai. Br. II. 2. 5, Āp. Śr. 14. 11. 3).

The general procedure of making gifts may be stated here once for all. The donor and the donee should have taken their bath and should wear two white garments each, the donor should wear a pavitra, perform ācamana, should face the east, should wear the sacred thread in the upavīta form, be seated on a pure seat (of kuśa &c.) and seat the donee on a seat and make him face the north, then the donor should utter the name of the subject of gift, its presiding deity and the purpose for which he makes the gift, and say 'I make a gift to you of such and such an article,' pour water on the donee's hand, and when the donee says 'give' the donor should sprinkle water on the subject of gift and place it into the hand of the donee, who utters the syllable 'om' and says 'svasti'. Then dakṣiṇā is given to the donee. The detailed formula is set out below.[2016] Necessary changes

2016. The formula may be described as follows: अद्य अमुके मासि अमुके पक्षे अमुकतिथौ अमुकराशिस्थे भास्करे भारतवर्षाख्यभूप्रदेशे सूर्यग्रहणादौ अमुकगोत्रः अमुकशर्मा अमुककामः अमुकगोत्राय अमुकप्रवराय अमुकशर्मणे ब्राह्मणाय इदममुकद्रव्यं अमुकदैवतं तुभ्यमहं संप्रददे इति द्विजकरमध्ये सकुशं जलं दद्यात्। ग्रहीता करमध्येन गृहीत्वा स्वस्तीति ब्रूयात्। अद्येत्यादि॰ अमुककामनया कृतस्य अमुकदानकर्मणः प्रतिष्ठार्थं दक्षिणां अमुकगोत्राय अमुकशर्मणे ब्राह्मणाय तुभ्यमहं संप्रददे न मम इति दक्षिणां दद्यात्। Vide अग्निपुराण 209, हेमाद्रि (दानखण्ड) pp. 506–7 and दानक्रियाकौमुदी pp. 14 ff. for the procedure. The अग्निपुराण 209. 59–61 mentions the following purposes for which gifts are usually made 'पुत्रपौत्रगृहैश्वर्यपत्नीधर्मार्थसद्गुणाः। कीर्तिविद्यामहाकाम-सौभाग्यारोग्यवृद्धये। सर्वपापोपशान्त्यर्थं स्वर्गार्थं भुक्तिमुक्तये। एतत्तुभ्यं संप्रददे प्रीयतां मे हरिः शिवः॥

have to be made as to the statement of the occasion, the receipt of the subject of gift &c. (if it is land or a house, it cannot be received in the hand; the donee simply walks round it or on it or enters it).

Yāj. I. 133 prescribes that the king should daily make gifts to brāhmaṇas learned in the Veda, of milch cows, gold, land, houses and the requisites of marriage (i. e. maidens, expenses of marriage &c.). This was nothing new that was prescribed by Yāj. It has been followed for ages by the kings. The Vanaparva[2017] 186. 15 states that he who makes a gift of a maiden in the brāhma form or of land enjoys bliss in the world of Indra. We find from the inscriptions of Uṣavadāta [2018] (probably in the 1st century A. D.), son-in-law of Nahapāna, at Karle and Nasik that he gave 3 lakhs of cows, 16 villages to gods and brāhmaṇas, fed one lakh of brāhmaṇas every year, got eight brāhmaṇas married at his own expense at Prabhāsa (in Kathiawar), built flights of steps on the river Bārṇāsā, constructed quadrangles, houses and halting places (*pratiśraya*) at Bharukaccha (modern Broach), Daśapura (in Malwa), Govardhana (Nasik) and Śorpāraga (modern Sopara), constructed wells and tanks; kept free ferry boats over the rivers Ibā, Pārādā, Damaṇā, Tāpī, Karabeṇā, Dāhanukā (all between Thana and Surat); established meeting halls and shelters for gratuitous distribution of water; conferred 32000 cocoanut trees in Nanangoḷa (modern Nargol) on the assembly of brāhmaṇas of the Caraka Śākhā at Rāmatīrtha in Śorpāraga and three other places. He adds that he purchased from a brāhmaṇa for 4000 kārṣāpaṇas a field that originally belonged to the brāhmaṇa's father and made a grant of it for supplying food to the assembly

of monks coming from all quarters that dwelt in the cave constructed by him. This is certainly a formidable list of benefactions for one ruler.

As to spending money for the marriages of brāhmaṇas and settling them as householders, a few words may be said here. Dakṣa[2019] III. 32-33 says 'The merit of him, that establishes a brāhmaṇa who is without father or mother by performing his saṃskāras and by getting him married, is beyond reckoning' A man does not secure that bliss by observance of agnihotra or the performance of Agniṣṭoma, which he secures by establishing a brāhmaṇa in life'. Aparārka (p. 377) quotes a long passage from the Kālikāpurāṇa about *Naiveśika* dāna. Its purport is briefly as follows: 'The donor should choose eleven brāhmaṇas of śrotriya families (devoted to the study of the Veda) and of good character and conduct, should build eleven houses for them, should get them married at his expense, should furnish the houses with stores of corn, with cattle and maid servants, beds, seats, vessels of clay and copper and other utensils for taking food and with garments; and having thus furnished the houses, should settle the eleven brāhmaṇas in the eleven houses and for their maintenance bestow upon each one hundred *nivartanas* of land or a hamlet, or half a village; he should induce the brāhmaṇas to be agnihotrins. By so doing he secures all the merit that is secured by the performance of sacrifices, vratas, various dānas or pilgrimages to sacred places and enjoys in heaven all pleasures. A man who is unable to do as much as above may settle only one brāhmaṇa according to his means and he secures the same rewards'. In the Epigraphic records there are numerous instances of kings spending for the marriages of brāhmaṇas. For example, the Aphsad Inscription of Ādityasena (vide Gupta Inscriptions No. 42, p. 203) speaks of gifts of agrahāras on the marriages of one hundred brāhmaṇa girls to brāhmaṇas. A copper-plate grant of the Śilāhāra prince Gaṇḍarāditya speaks of the king having got 16 brāhmaṇas married at his expense and of having created endowments of three *nivartanas* for each for their maintenance at the time of their marriages (vide J. B. B. R. A. S. vol. 13, p. 1, dated 1032 *śake*). As the brāhmaṇas were supposed to lead a

2019. मातापितृविहीनं तु संस्कारोद्वाहनादिभिः । यः स्थापयति तस्येह पुण्यसंख्या न विद्यते ॥ न तच्छ्रेयोऽग्निहोत्रेण नाग्निष्टोमेन लभ्यते । यच्छ्रेयः प्राप्यते पुंसा विप्रेण स्थापितेन वै ॥ दक्ष III. 32-33. The first is quoted by अपरार्क p. 378.

life of comparative poverty, plain living and high thinking and as they were the inheritors, preservers and transmitters of the sacred literature of the country, as they also engaged in teaching without stipulating for any fee, the State that had in those days no settled educational system as in modern times deemed it its duty to provide the resources which would enable the brāhmaṇas to carry on their self-imposed task. Yāj. II. 185 declares that the king should set apart in his capital a place for the habitation of brāhmaṇas learned in the Veda, should establish them there, should provide means of maintenance for them and then say to them 'follow your duties' (svadharma). Aparārka quotes (p. 792) thereon from Bṛhaspati several verses that add 'the king should bestow on the brāhmaṇas who are learned and kindle the sacred fires (agnihotrins) houses and lands under his own edicts from which no taxes in the present or future would be levied. The brāhmaṇas so settled should perform for the citizens their religious rites whether daily or to be performed on occasions or *kāmya* or for averting evil omens or for the sake of prosperity and should give decisions in the cases of doubts. They should make rules and conventions for the whole village or for corporations and guilds and for religious purposes. Those rules must be observed and when there is trouble caused by rogues and thieves all must join to put it down and that object must not be left to one person.'[2020] These prescriptions indicate what benefit was expected of the marriages and settlement of learned brāhmaṇas. Kauṭ. II. 1 also prescribes that lands free from taxes and fines should be settled upon *purohitas*, śrotriyas &c. There is nothing peculiar to India or to the caste system in this. Among the numerous charitable purposes mentioned in the preamble to the Statute of Elizabeth (43 Eliz. chap. 4) which (preamble) is even now applicable in England 'the marriage of poor maids' is one.

The gift of land has been eulogized as the most meritorious of all gifts from ancient times. Vas. Dh. S. 29.16 quotes a verse which is found also in Bṛhaspati 7, Viṣṇudharmottara and Matsyapurāṇa (quoted by Aparārka pp. 369, 370), the

2020. वेदविद्याविदो विप्राञ्श्रोत्रियानग्निहोत्रिणः । आहूय स्थापयेत्तत्र तेषां वृत्तिं प्रकल्पयेत् ॥ अनाच्छेद्यकरास्तेषां प्रदद्याद्गृहभूमिकाः । मुक्ताभाव्याश्च नृपतिर्लेखयित्वा स्वशासनैः ॥ नित्यं नैमित्तिकं काम्यं शान्तिकं पौष्टिकं तथा ॥ पौराणां कर्म कुर्युस्ते सन्दिग्धे निर्णयं तथा ॥ ग्रामश्रेणिगणार्थं तु संकेतसमयक्रिया । बाधाकाले तु सा कार्या धर्मकार्ये तथैव च ॥ चाटचोरभयं बाधा सर्वसाधारणा स्मृता । तत्रोपशमनं कार्यं सर्वैरेकेन केनचित् ॥ बृहस्पति quoted by अपरार्क p. 792.

Mahābhārata (Anuśāsana 62. 19) and which says 'whatever[2021] sin a man may commit when in straitened circumstances, he is purified therefrom by making a gift of only as much land as is equal to *gocarma*'. Aparārka (pp. 368, 370) quotes many verses from the Viṣṇudharmottara, the Ādityapurāṇa, the Matsyapurāṇa on the high rewards reaped by the gift of land. The Vanaparva[2022] (93. 78–79) declares 'whatever sins a king is guilty of in bringing the earth under his control, all those he gets rid of by performing sacrifices with munificent gifts; by bestowing on brāhmaṇas lands and cows in thousands, the king becomes free from all sins as the moon is freed from darkness' (Rāhu). Anuśāsana 59. 5 voices the popular sentiment that 'gifts of gold, cows and land save even the wicked'.

2021. यत्किंचित्कुरुते पापं पुरुषो वृत्तिकर्शितः। अपि गोचर्ममात्रेण भूमिदानेन मुच्यति॥ वसिष्ठ 29. 16, अनुशासन 62. 19, बृह. 7, भविष्यपुराण 4. 164. 18. The मिता. on या. I. 210 quotes it as Manu's and reads the 2nd पाद as 'ज्ञानतोऽज्ञानतोऽपि वा'. Bṛhaspati defines gocarma as equal to ten nivartanas and a nivartana is defined by him as land that is 30 rods (square) with a rod of ten cubits. दशहस्तेन दण्डेन त्रिंशद्दण्डैर्निवर्तनम्। दश तान्येव विस्तारो गोचर्मैतन्महाफलम्॥ बृह. 8. The मिताक्षरा on या. I. 210 quotes बृह. as सहस्तेन...दश तान्येव गोचर्म दत्त्वा स्वर्गे महीयते। शातातप I. 17 also reads 'दशहस्तेन &c'. Bṛ. 9 gives another definition of gocarma 'that extent of land which a thousand cows with their calves and a bull occupy without being compelled to stand doing nothing is called gocarma' सवृषं गोसहस्रं तु यत्र तिष्ठत्यतान्त्रितम्। बालवत्सामधृतानां तद्गोचर्म इति स्मृतम्॥. पराशर XII. 49 says that that land which a hundred cows with one bull occupy without being closely packed together is gocarma. Viṣṇu Dh. S. 5. 181 defines gocarma differently as 'that much land of whatever extent the crops raised on which will maintain one man for a year'. Vide Aparārka p. 1225 and Hemādri (Vratakhaṇḍa, part 1 pp. 52–53) for several definitions of gocarma. The word *nivartana* is very ancient. Kauṭ. (II. chap. 20) says that daṇḍa is equal to four *aratnis*, ten daṇḍas are equal to one *rajju* and 3 rajjus are equal to a *nivartana* (so that a nivartana is 30 daṇḍas). The Baud. Dh. S. (III. 2. 2–4) speaks of a brāhmaṇa who maintains himself by cultivating six nivartanas of land. A field of 100 nivartanas is mentioned in Nasik Inscription No 5 (E. I. vol. VIII p. 73). The word nivartana occurs also in a grant of the Pallava king Śivaskandavarman (E. I. vol. I p. 6). Vide E. I. vol. XI p. 280 for a note on *nivartana*.

2022. यद्वेनः कुरुते किंचिद्राजा भूमिमवाप्नुवन्। सर्वं तत्प्रवृते पश्चाद्यज्ञैर्विपुलदक्षिणैः॥ ब्राह्मणेभ्यो ददद् ग्रामान्गाश्च राजन् सहस्रशः। मुच्यते सर्व पापेभ्यस्तमोभ्य इव चन्द्रमाः॥ वनपर्व 33. 78–79.

As gifts of land were so highly valued, the smṛtis contain numerous rules about them. Yāj. (I. 318–320)[2023] prescribes the following rules: ' when a king makes a gift of land or bestows a nibandha he should execute a writing (about the gift) for the information of future good kings. He (the king) should issue a permanent edict bearing his signature and the date on a piece of

2023. दत्त्वा भूमिं निबन्धं वा कृत्वा लेख्यं तु कारयेत् । आगामिभद्रनृपतिपरिज्ञानाय पार्थिवः ॥ पटे वा ताम्रपट्टे वा स्वमुद्रोपरिचिह्नितम् । अभिलेख्यात्मनो वंश्यानात्मानं च महीपतिः ॥ प्रतिग्रहपरीमाणं दानच्छेदोपवर्णनम् । स्वहस्तकालसंपन्नं शासनं कारयेत्स्थिरम् ॥ या. I. 318–320. विश्वरूप on या. I. 318–320 reads दानाच्छेदोपवर्णनम् and remarks 'एतद् दानफलम्, एतदाच्छेदनफलं षष्टिं वर्ष...नरके वसेत् इत्यादि.' For the verse षष्टिं... वसेत् vide Appendix. Nibandha is a fixed payment to be made every year or month or on certain occasions to a person or temple or the like, as for example of so many betel leaves or betelnuts out of each load of betel leaves or nuts. It is translated rather inaccurately as corrody by Colebrooke and others. Viśvarūpa on Yāj. II. 124 explains it as 'a permanent endowment' (akṣayanidhi); the Mit. explains 'एकस्य भाण्डभरकस्येयन्तो रूपकाः एकस्य पर्णभरकस्येयन्ति पर्णानि'. The Mit. explains 'दानच्छेदोपवर्णनम्' differently as 'दीयते इति दानं क्षेत्रादि तस्य च्छेदः...नद्यावाटौ (—घाटौ ?) निवर्तनं तत्परिमाणं च तस्योपवर्णनम्'; अपरार्क p. 579 'अस्मिन् ग्रामे प्रतिक्षेत्रं क्षेत्रस्वामिनैतद्धनमस्मै प्रत्यब्दं प्रतिमासं वा देयम्'. This passage of Yāj. is cited in *The Collector of Thana* v. *Hari* 6 Bom. 546 (F. B.) at pp. 557–558 and the definition of nibandha from the Vyavahāramayūkha in *Ghelabhai* v. *Hargovan* 36 Bom. 94 at p. 101. One of the verses of बृहस्पति is अनाच्छेद्यमनाहार्यं सर्वभाग्यविवर्जितम् । चन्द्रार्कसमकालीनं पुत्रपौत्रान्वयागतम् ॥ (अपरार्क p. 579). For examples of the grants of nibandhas, vide E.I. vol. XIV p. 295 at p. 309 where memerous dues on articles are given to a temple by the Paramāra king Cāmuṇḍarāja (on one bharaka of candied sugar and jaggery one varṇakā and on loads of cotton thread dyed with mañjiṣṭhā one rupee, one cocoanut on a load of cocoanuts, one betel-nut from one thousand nuts, one palikā on each jar of ghee or oil), E. I. vol. XII at p. 331 (Inscription at Yewur dated 1105 A. D. as to a gift of nibandha for the benefit of a temple of Keśava ' on sales of areca nuts an impost of five areca nuts on each gold piece and 25 leaves on each load of betel leaves '), E. I. vol. XI p. 26 at p. 30 the grant of one *hāra* of barley corn for each water wheel for the worship of a Jain saint in saṁvat 1167), E. I. vol. XI. p. 35 (grant in saṁ. 1189 for two *palikās* of oil from each oil-mill payable to the shrine of a Jain saint), E.I. vol. XI. p.37. In the Mathurā Brāhmī Inscription of the 28th year of the reign of the Śaka king Devaputra Huviṣka (about the beginning of the 2nd century A.D.) a permanent endowment was called ' akṣayanīvi (E. I. vol. 21 p. 55 at p. 60). So also the same word is used in the Nālandā stone Inscription of the time of Yaśovarmadeva with regard to a Buddhist temple (E. I. vol. 20 p. 37 at p. 39). Vide also E. I. vol. 15 p. 15 and E. I. vol. 17 p. 345 at p. 348. The Gupta Inscription No. 62 (p. 261) records the gift of twelve golden *dīnāras* made as an akṣayanīvi (a permanent endowment) from the interest of which one *bhikṣu* was to be fed every day.

cloth or on a copper-plate marked at the top with his seal and write down thereon the names of his ancestors and of himself, the extent (or measurements) of what is gifted and set out the passages (from smṛtis) that condemn the resumption of gifts '. Viśvarūpa the oldest extant commentator of Yāj. states that the edict or order should also bear the names or signatures of the royal officers such as ājñā, dūtaka, the name of the place where the king's army is encamped &c. and that the names of women (such as the queen mother or queen) should be mentioned, and that verses stating the result of resuming gifts made by former kings should find place in the edict. Aparārka (pp. 579-580) quotes long extracts from Bṛhaspati and Vyāsa on the same subject. Bṛhaspati says that a royal edict recording a gift of land should be executed on a piece of cloth or on copper-plate, should state the place (of issue) and (the names of) the king's ancestors, that it should be stated to last till the sun and moon endure, that it was not to be resumed or taken back and was to be free from all future taxes and that it was to go on to the sons and grandsons from generation to generation (of the donee), it should state that heaven would be the reward of the donor and those that continued the gift, that the result of the resumption of the gift would be hell for 60,000 years to the resumer and it should bear the king's seal, the year, the month, the fortnight and day and should bear the signature of the superintendents (royal officers). Vyāsa after stating these requisites adds that the edict should be addressed to brāhmaṇas and other respectable people, to the king's officers, to all householders and to all others including medas and cāṇḍalas, that it should state that the gift is made for securing merit for one's parents and one's self.

The thousands of copper-plate grants and inscriptions on stone published so far show that these directions contained in Yāj., Bṛ. and Vyāsa have been followed to the letter from at least the 5th century onwards. In the earliest inscriptions verses about the merit of gifts and the sin of resumption do not occur. For example, in Gupta Inscription No. 8 (pp. 36 ff) dated 88 of the Gupta Era (i. e. 407-8 A. D.) of Chandragupta II the only words (in prose) are 'whoever would cut off this charitable gift would be guilty of the five great sins'; similarly in the Gupta Inscription No. 5 (p. 32) dated Gupta era 93 the words are 'whoever would destroy this charity now set on foot would be guilty of the murder of brāhmaṇas and cows and of the five

sins that bring immediate punishment'. In the Inscriptions of the early Pallava king Śivaskandavarman also (E. I. vol. I p. 7) such verses are not found. In the copper-plate grant of Skanda-gupta (dated 146 Gupta year i. e. 465–66 A. D., Gupta Inscriptions[2024] No. 16, p. 68) there is a verse on the point, but it is not one of those that are found in most inscriptions.

In the earliest records verses lauding gifts and deprecating their resumption are few (one or two) but in later records their number increases. For example, in the copperplate of Maitraka Vyāghrasena (E. I. vol. XI, p. 221) there are only two verses and in the plates of Dhruvasena dated Gupta-Valabhi saṁvat 206 and 210 respectively there are only two and three verses (E. I. vol. XI. pp. 107, 111), while there are 16 verses in an inscription of Yaśaḥkarṇadeva dated in Kalacuri *saṁvat* 823 (E. I. vol. XII p. 205) and 15 verses in the copperplate grant of Cāhamāna Ratnapāla dated in Vikrama saṁvat 1176 (E. I. vol. XI, pp. 312–313). In most of the inscriptions containing these laudatory and imprecatory verses, they are cited as from Vyāsa or Manu or from smṛti in general. In the Appendix[2025] a list of about forty such verses is given and in the footnotes it is pointed out wherever possible from what smṛti or other source they are taken and a reference is made to some of the earliest inscriptions and grants where they occur. The references will show that these verses occur in inscriptions from all parts of India. Two of the most usual verses are: 'the earth was donated by many such kings as Sagara and others; whatever king is lord of the earth at any particular time enjoys the reward (merit) of the gift of that land. The donor of land enjoys bliss in heaven for sixty thousand years and he who

2024. यो व्यक्तमेद्दायामिमं निबद्धं गोप्तो गुरुघ्नो द्विजघातकः सः। तैः पातकैः पञ्चभिरन्वितोघर्मश्चेश्वरः सोपपातकैश्च। From Gupta Inscription No. 16 at p. 71. In the Sanjan plates of Amoghavarṣa I (E. I. vol. 18 p. 235 at p. 251) occurs besides 6 verses the following prose passage 'यश्चाज्ञानतिमिरपटलावृतमतिराच्छिद्याद्याच्छिद्यमानकं चानुमोदेत स पञ्चभिर्महापातकैः सोपपातकैश्च संयुक्तः स्यादिति।'. Vide also E. I. XI. (of Valabhi era 206) p. 107 for the same words.

2025. Vide Pargiter's paper in J. R. A. S. for 1912 pp. 248–255 for some verses relating to gifts of lands in land grants. He deals with only seven verses and refers only to the Purāṇas and the Mahābhārata. In my notes (in the appendix) an attempt has been made to trace some of them to the smṛtis. It is quite possible to trace more of these verses in the smṛtis if a more thorough search were made than I could find time to make.

destroys (or resumes) it or who abets the destruction dwells in hell for the same period.' In spite of such imprecations it appears that lands donated by former kings were sometimes confiscated by their successors. For example, in an inscription of Indrarāja III dated *śake* 836 it is stated that the king restored four hundred villages that had been confiscated by former kings (E. I. vol. IX, p. 24 at p. 33 'pūrvapṛthvīpāla-viluptāni); in the Talmanchi plates of Cālukya Vikramāditya I (dated 660 A. D.) there is a recital that 'he re-established the endowments of temples and brāhmaṇas that had been lost in the three kingdoms' (E. I. vol. IX. p. 100). The Rājatarangiṇī (V. 166-170) states that king Śaṁkaravarman (in the first half of the 10th century), the son of Avantivarman, deprived temples of all their properties for replenishing his treasury emptied by his vices.[2026] Parāśara (XII. 51) says that the sin of resuming land already donated cannot be expiated even by performing a hundred Vājapeya sacrifices or by the gift of millions of cows. In the Khoh plates of Parivrājaka Mahārāja Saṁkṣobha (Gupta Inscriptions No. 25 p. 115) dated Gupta *saṁvat* 209 (528-529 A. D.) there is a peculiar curse pronounced on him who would interfere with his gift 'him who would interfere with this gift I shall, though functioning in another body (on account of rebirth), consume (burn) with terrible curses (or imprecatory thoughts)'. Vide also Gupta Ins. No. 23 p. 107 of G. S. 191. When a grant of a village or villages was made kings excepted therefrom grants already made in favour of shrines of gods and brāhmaṇas. For example, in the Pikira Grant of Siṁhavarman (E. I. VIII. p. 162) it is stated 'this village is granted by us as a gift to brāhmaṇas excepting the cultivated lands given as endowment to gods' (devabhogahalavarjam). In E. I. vol. X. p. 88 (of 697 *śake*) the grant excludes 'the portion already bestowed on gods and brāhmaṇas' (pūrvapratta-deva-brahma-dāya-rahitaḥ). The grant of the village by the Candella king Paramardideva in saṁ. 1236 expressly excludes five halas (land measure) of land granted to Buddha (i. e. to a temple of Buddha then existing). Vide E. I. XX. at p. 129. This shows that a Hindu king respected an endowment already made to a shrine of Buddha or to a monastery of Buddhists (devaśrī-buddha-satka-pañcahalam

2026. आरब्धैर्यसनैर्भूम्ना क्षीणकोशः क्षणे क्षणे। देवादीनां स सर्वस्वं जहारायास-युक्तिभिः॥ ... ग्रामान्देवगृहग्रामान्राजा प्रतिकरेण सः। स्वयं स्वीकृत्य चोत्पत्तिं क्षमां कार्यक इव व्यधात्॥ राजतरङ्गिणी V. 166 and 170.

bahiṣkṛtya). Vide also I. H. Q. vol. VIII for 1932 p. 305 (plates of Bhoja dated *saṁ.* 1079 where the expression ' devabrāhmaṇa-bhuktivarjam ' occurs); E. I. vol. II p. 360 (*saṁ.* 1162); E. I. 14, p. 194 (*saṁ.* 1150); E. I. vol. I, p. 85 at p. 88 (G. S. 334). There are many instances where kings making grants of a field say that they purchased it from the owner and then bestowed it. For example, in E. I. vol. 17 p. 345 there is a grant by Kumāragupta (G. S. 193) of this character and see p. 856 above where such a grant is referred to. Even in the most ancient grants what is granted is set out with great particularity. A few examples will show this. In the Nasik Inscription No. 3 of Vāsiṭhīputa[2027] Siri-Puḷumāyi (E. I. vol. 8 p. 65) the grant is in these words ' And to this village of Sāmalipada (Śālmalipadra) we grant the immunity belonging to monk's land, making it not to be entered by royal officers, not to be touched (by any of them), not to be dug for salt, not to be interfered with by the district police, (in short) to enjoy all kinds of immunities '. So also the Mayidavolu plates [2028] of the Pallava Śivaskandavarman state (E. I. vol. VI, p. 87) ' to this village of Viripara we grant all the immunities enjoyed by the *brahmadeyas.* Let it be free from digging for salt, free from being interfered with by the district police (or officers), free from supply of bullocks in succession, free from the entrance of soldiers, free from supply of boiled rice, water pots, cots and lodgings, with these and all other immunities prescribed (by rules) regarding all *brahmadeyas*, we have caused it to be exempted '. In the Gupta Inscriptions No. 55, p. 235 (the Chammak copperplate of Pravarasena II)[2029] there are numerous words about the various taxes and exactions remitted which it is difficult to understand at this distance of time, but some of

2029. चर्माङ्कनामग्रामः ... अतिसृष्टः । अथास्योचितां पूर्वराजानुमतां चातुर्वेद्यग्राममर्यादां वितरामः । तद्यथा अकरदायी अभटछात्रप्रवेश्यः (अभटचाटप्रवेश्यः?) अपारंपरगोबलिवर्दः अपुष्पक्षीरसन्दोहः अचारासनचर्माङ्कारः अलवणक्लिन्नक्रेणिखनकः सर्वविष्टिपरिहारपरिहृतः सनिधिः सोपनिधिः सक्तृतोपक्तृतः आचन्द्रार्कादित्यकालीयः पुत्रपौत्रान्वयगमकः भुञ्जतां न केनाचिद् व्याघातः कर्तव्यः । Gupta Ins. p. 238; at p. 136 (G.S. 214) the words are ग्रामौ ... सोद्रङ्गौ सोपरिकरौ अचाटभटप्रवेश्यौ राजाभाव्यसर्वकरप्रत्यायोत्पद्यकोत्पद्यमानकसमेतौ...चोरदण्डवर्जितौ (here only the fines imposed upon thieves were exempted from the gift).

which may be stated 'it was to be free from taxes, not to be entered by the regular soldiers, nor by *cāṭas*, it was to be entirely free from all obligations of forced labour, it was to carry with it hidden treasure and all deposits.'

It is often stated in the grants that lands or villages are granted with the eight *bhogas* (vide E. I. vol. VI. at p. 97, the Gadag Ins. of Hoysala Vīra-Ballāḷa in *śake* 1114). The eight *bhogas* are enumerated in some of the inscriptions themselves. In the Śrīśaila plates of Virūpākṣa (of *śake* 1388) they are stated to be nidhi (treasure trove), nikṣepa (what is deposited on the land), vāri (water), aśman (stones, mines), akṣiṇī (actual privileges), āgāmi (future profits), siddha (what is already brought under cultivation), sādhya (waste land that may in future be turned into cultivable land).[2030] In the times of the Marathas when lands or villages were granted it was usual to put in such words as 'jalataru-tṛṇa-kāṣṭha-pāṣāṇa-nidhi-nikṣepa' (water, trees, grass, wood, stones, treasure-trove and deposits). It has been decided by the modern Indian Courts that these words conferred on the grantee ownership in the soil itself and that in the absence of these words it is possible to hold that the grant was only of the royal share of the revenue and not of the soil itself.[2031]

The question whether the king is the owner of all land in his kingdom has been discussed from very ancient times. Jaimini (VI. 7. 3) states the proposition that in the Viśvajit sacrifice (where the sacrificer has to donate everything that belongs to him) even the emperor cannot make a gift of the whole earth of which he may be the ruler, since the earth is common to all (to the sovereign as well as to those who cultivate

2030. निधिनिक्षेपपाषाणसिद्धसाध्यमिति ख्यातमष्टभोगैश्च संयुतम् ॥ E. I. vol. 15 at p. 22; in the Conjeevaram plates of कृष्णदेवराय (śake 1444), the verse runs 'निधिनिक्षेपपाषाणसिद्धसाध्यजलान्वितम् । अक्षिण्यागामिसंयुक्तमेकभोग्यं सदूहम् ॥'. Vide also E. I. vol. I. at p. 400 (śake 1451, in Canarese) 'निधिनिक्षेपजलपाषाणअक्षिणी आगामिसिद्धसाध्यं गळेव अष्टभोगतजःस्वाम्यसर्वोत्पत्तिसकलबलिसहितवागि' E. I. vol. XIII p. 34 n 1 and I. A. vol. 19. p. 244 for the meaning's of these words.

2031. For a grant where these words occur and which was held to be of the soil, vide *Ravji* v *Dadaji* 1 Bom. 523; for a grant which was held to be of the royal share of the revenue only, vide the grant in *Vaman* v the *Collector of Thana* 6 Bom. H. C. R. (A. C. J.) 191. Vide also *Amrit Vaman* v *Hari* 44 Bom. 237 about the interpretation of the words 'water, grass &c.'.

it and make use of it). Śabara[2032] elaborates this by adding that others have as much right over the earth as the emperor, that the emperor is entitled to a share of crops produced from the earth as his since he protects them; but that all other persons also walk on the earth, produce crops on it, get their sustenance from it and so they also have rights over the earth and therefore there is no difference between the emperor and other persons as to rights over the earth. This view is relied upon by the Vyavahāramayūkha[2033] which says 'therefore it is said in the 6th chapter of Jaimini that the whole earth cannot be given away by the emperor and a province by a feudatory chief. The ownership in the several villages and fields on the entire earth or in a province belongs to the holders of the land alone, while kings are entitled only to collect taxes. Therefore when kings now make what are technically called gifts of fields, no gift of land (soil) is effected thereby, but only provision is made for the maintenance of the donee (from the taxes which are alienated by the king). Where however houses and fields are purchased from the holders thereof (by the king) he has also ownership (over the fields &c.) in those cases and he in such cases secures the full merit of the gift of land (if he makes a gift of such fields)'. These passages embody the important proposition that the state is not the owner of all lands, but is only entitled to levy taxes from the holders of land.

There is another view also according to which the king was the owner of lands and the subjects were only occupants. This latter view, being more convenient and paying, has been adopted in modern times by the British Government in its policy and legislation (e. g. *vide* section 37 of the Bombay Land Revenue Code, Bombay Act V. of 1879). The Mit. on Yāj. I. 318 states[2034] that the words of Yāj. imply that the privileges of

2033. Vide for the text my edition of the व्यवहारमयूख p. 91.

2034. अनेन भूपतेरेव भूमिदाने निबन्धदाने वाधिकारो न भोगपतेरिति दर्शितम् । मिता. on या. I. 318. Numerous grants were addressed to rāṣṭrapati, viṣayapati, bhogapati &c. Vide Gupta Ins. No. 24 p. 110, E. I. XI at p. 82 (1076 sam.) and XII at p. 34 for the word 'bhoga' in the sense of a district in a kingdom'. Bhukti also has the same sense.

making a gift of land or of a *nibandha* belonged only to the king and not to the governor of a province or a district under the king. The Mit. on Yāj. II. 114 quotes a smṛti[2035] 'land passes on the happening of six circumstances viz. with the consent of one's village, of one's agnatic relations, of *sāmantas*, and of one's coparceners and when accompanied with water and (dakṣiṇā of) gold' and remarks that the consent of *sāmantas* (neighbours) is only necessary as a safeguard against disputes about boundaries and that of the villagers is necessary for giving notice of the alienation to all. As the king is not mentioned here, the king's consent does not appear to have been necessary for the gift of land by a private person. But it appears that the king's consent was sometimes sought for gifts by private persons and obtained e. g. in Gupta Ins. No. 31 p. 135 Mahārāja Śarvanātha (G. S. 214) approves of a gift of two villages made to a person and his sons and grandsons in succession for the worship of the goddess Piṣṭapurikādevī by a donee to whom they had been originally granted.

On account of the great value attached to copper-plate grants as documents of title, there were great temptations to forge them. In the Madhuban copper-plate of Harṣa (E. I. vol. VII. p. 155 at p. 158) reference is made to a grant fabricated by a certain brāhmaṇa named Vāmarathya about a village called Somakuṇḍakā. Manu IX. 232 prescribes death as the penalty for fabricators of royal charters. Vide Fleet on 'Spurious Indian Records' in I. A. vol. 30, p. 201.

From Manu and other smṛtikāras it appears that so far as lands already brought under cultivation are concerned they appear to hold that the ownership of the land is in the cultivators and the king is only entitled to levy taxes for the protection he affords. In Manu VII. 130–132 it is stated 'the king should take a fiftieth part of cattle and gold and a sixth, 8th or 12th part of the crops and a sixth part of trees, flesh, honey, ghee, perfumes, herbs, liquids, flowers, roots and fruits &c.' and in X. 118 Manu allows the king to raise his demand in times of emergency to a fourth of the produce of land. Manu IX. 44 states that a field belongs to him who uproots the stems of trees and shrubs from waste or uncultivated land. Manu VIII. 39 provides that in ancient treasure-

2035. स्वग्रामज्ञातिसामन्तदायादाद्यमतेन च । हिरण्योदकदानेन यद्भिर्मच्छति मेदिनी ॥ मिता. on या. II. 114.

trove found underneath the ground and in mines the king is entitled to a share because he affords protection and because he is lord of the earth. This militates against the view that the king is the owner of all lands, since, if that were so, Manu would have declared that the king took all the mines and treasure found in a cultivated field. In VIII. 243 Manu prescribes a fine for a cultivator not cultivating his field at the proper time or allowing the crops to be eaten up. But this would not make the king the owner, since the fine is imposed because the king is deprived of his share of taxes by the action of the cultivator. All these passages show that Manu held that the ownership of arable land was in the cultivator himself and the king was only entitled to demand a certain share of the produce (which is designated *bhāga* or *kara* as in Manu VII. 133). This is further supported by the conduct and practice of powerful but good kings who purchased lands from their holders when they wanted to donate lands already cultivated. It may be conceded that land that was waste or not cultivated by anybody was deemed to belong to the king. Manu (VII. 115–119) enjoins that the king should appoint a headman for a village and officers for ten, 20,100 and a thousand villages, that each of the preceding one was to report to the officer next above him about crimes and other matters, that the headman of a village was to take for his livelihood the perquisites (such as food, fuel &c.) that the king could daily demand from the villagers, and that the other officers were to be remunerated by grants of plots of land (which when first granted must have been uncultivated). Kauṭ. II. 1 states that land prepared for cultivation may be granted to cultivators who will pay a tax for life, that lands may be confiscated from those who do not cultivate them and may be given to others, that lands bestowed upon superintendents, accountants and similar persons as remuneration cannot be sold and mortgaged by them. For want of space this subject cannot be further pursued here. In modern times opinion has been sharply divided on the question whether the revenue from the land is in the nature of rent or is a tax. Baden Powell in 'Land Systems of British India' vol. I, pp. 240, 280 holds that land revenue is not rent but is a tax. In an elaborate judgment delivered by Sir Michael Westropp C. J. after exhaustively reviewing the original sanskrit texts (pp. 30–39) and the works and reports of famous statesmen and writers such as Elphinstone, Munro, Mill and Wilson (pp. 39–53) the conclusion arrived at is stated to be that 'the proprietary

right of the sovereign derives no warrant from the ancient laws or institutions of the Hindus and is not recognized by modern Hindu lawyers as exclusive or incompatible with individual ownership' (p. 53).[2036]

The word *agrahāra* has been applied to the grant of lands or villages to brāhmaṇas from very ancient times. It occurs frequently in the Mahābhārata e. g. Vanaparva 68. 4, Āśramavāsiparva 2. 2, 10. 41, 13. 11, 14. 14, 25. 5. Vide E. I. vol. I, p. 88 (grant of the Valabhi king Dhruvasena III. in G. S. 334 i. e. 653-654 A. D.) and in the Madhuban copper-plate of Harṣa dated in the 25th year of his reign (i. e. 631, A. D., E. I. vol. I, p. 73 and VII at p. 158).

Gifts of certain kinds are called Mahādānas. According to the Agnipurāṇa[2037] (209. 23-24) the Mahādānas were ten, viz. gifts of gold, horses, sesame, elephants, maids, chariots, land, house, a bride, and a dark-brown (*kapilā*) cow. The Mahādānas are, however, usually enumerated as 16 in the purāṇas (vide Matsya, chap. 274-289, Agni. chap. 210, Liṅgapurāṇa II, chap. 28 ff). The sixteen mahādānas are: Tulāpuruṣa (weighing a person against gold or silver which is then distributed among brāhmaṇas), Hiraṇyagarbha, Brahmāṇḍa, Kalpavṛkṣa, Gosahasra, Kāmadhenu (or Hiraṇyakāmadhenu), Hiraṇyāśva, Hiraṇyāśvaratha (or simply Aśvaratha), Hemahastiratha (or simply Hastiratha), Pañcalāṅgala, Dharādāna (or Haimadharādāna), Viśvacakra, Kalpalatā (or Mahākalpa-), Saptasāgara, Ratnadhenu, Mahābhūtaghaṭa. In the Liṅgapurāṇa (Uttarārdha, chap. 28 ff) the names are somewhat different. The names of these Mahādānas (of some at least) go back to centuries preceding the Christian Era. The word 'Mahādānāni' occurs in the Mahābhārata (Āśramavāsi-parva 3. 31, 13. 15). In the Hathigumpha Inscription of Khāravela (2nd century B. C.) Kalpavṛkṣa appears to be mentioned (E. I. vol. XX. p. 79). Bāṇa often refers to Mahādānas in general and Gosahasra in particular.[2038] It has already been shown (on

2038. द्विग्गजनिधाविच्छिन्नमहादानसन्तानम् । कादम्बरी para 85 (two meanings of दान); दीयमानानेकगोसहस्रशृङ्खलायमान इवापलायत कलिः ... महादानविधानकलकलाभिद्रुता इव ग्राम्यकुक्कुटपक्षवः । हर्षचरित III, 11th para.

p. 856) how Uṣavadāta made extensive gifts some of which fall under mahādānas. The Tulāpuruṣa is very frequently spoken of in the Epighraphic records. The Cambay plates of the Rāṣṭrakūṭa king Govinda IV (dated *śake* 852) state that the king was weighed against gold (E. I. vol. VII. p. 26). Vide also E. I. vol. XI p. 112 (in Dantivarma Ins. of *śake* 675), E. I. vol. IX, p. 24 (Rāṣṭrakūṭa Indrarāja III weighed against gold in *śake* 836), E. I. vol. XI, p. 20 at p. 23 (Hematulā of Govindacandra mentioned in *saṁ.* 1186), E. I. vol. XIV, p. 197 (dated *saṁ.* 1156, when 32 villages were given as dakṣiṇā after the two mahādānas of tulāpuruṣa and gosahasra); E. I. vol. VII, p. 17 (refers to tulāpuruṣa of Kṛṣṇarāya of Vijayanagara in *śake* 1437). The tulādāna is mentioned in the ancient Tamil work Śilappadikāram (vide p. 311 of Prof. Dikshitar's translation). In E. I. vol. XII, at p. 10 it is stated that king Lakṣamaṇasena of Bengal granted a village as dakṣiṇā when he performed the Mahādāna called Hemāśvaratha. The Sanjan plates of Amoghavarṣa (dated *śake* 793) speak of the Hiraṇyagarbha mahādāṇa performed by Danti-durga at Ujjayinī (E. I. vol. XVIII, pp. 235, 238). In the Śrīraṅgam plates of Devarāya II of Vijayanagara dated *śake* 1350 it is stated that the prince gave a dinner to one lakh of brāhmaṇas at the holy place or Prayāga (modern Allahabad) and on a lunar eclipse performed the Pañca-lāṅgala vrata (J. B. B. R. A. S. vol. XIII, p. 1 at p. 3).

Brief notes will now be added for setting out the procedure of the mahādānas. The Matsya-purāṇa (chap. 274–289) devotes about 400 verses to these. Aparārka (pp. 313–344) not only quotes almost all these verses of the Matsya-purāṇa, but also adds further details from the Bhaviṣyottara-purāṇa in certain cases. Hemādri (Dānakhaṇḍa pp. 166-345) is far more elaborate and quotes (in addition to the Matsya) long passages from the Liṅga, Garuḍa and other purāṇas and from works on Tantra and the Āgamas. The Dānamayūkha devotes pp. 86–151 to the 16 mahādānas. The Matsyapurāṇa (274. 11–12) states that the mahādānas were performed by such ancient heroes and kings as Vāsudeva, Ambarīṣa, Bhārgava, Kārtavīrya Arjuna, Rāma, Prahlāda, Pṛthu and Bharata. It then gives general directions about the construction of the *pandal* (maṇḍapa) required in making these mahādānas. The maṇḍapa may be of various sizes, 16 aratnis (one *aratni* being equal to 21 aṅgulas of the donor) or 12 or 10 cubits (one cubit being the length of the arm from the tip of the middle finger to the end

of the elbow), should have four doors and a vedi (raised platform) of seven or five cubits prepared with bricks, there was to be an arch on the vedi for holding the balance, it should have nine or five kuṇḍas[2039] (pits in the ground for holding fire) or one kuṇḍa, two auspicious water jars were to be placed at each door of the pandal, the tulā was to have two posts and a cross beam of the same wood (such as aśvattha, bilva, palāśa &c.) and was to be decked with golden ornaments. These details have to be passed over here for want of space. The rest of the procedure about tulāpuruṣa is briefly as follows (Matsya, chap. 274): Priests knowing the four Vedas were to be placed on the four sides respectively (viz. Ṛgvedins to the east, Yajurvedins to the south, Sāmavedins in the west and Ātharvaṇas in the north). Then four homas were to be offered to Gaṇeśa, the planets, the lokapālas, the eight Vasus, the Ādityas, the Maruts, to Brahmā, Viṣṇu, Śiva, the sun and the herbs and Vedic hymns referring to these were to be recited.

At the end of the homa, the guru invokes with flowers and incense the *lokapālas* (lords of the worlds or quarters) with *paurāṇika* mantras, viz. Indra, Agni, Yama, Nirṛti, Varuṇa, Vāyu, Soma, Īśāna, Ananta and Brahmā. Then the donor should give golden ornaments, ear ornaments, golden chains, wristlets, rings, clothes to the priests and double (what is given to each *ṛtvik*) to the guru. Brāhmaṇas should then recite the vedic hymn on śānti (propitiatary verses averting evil).[2040] Then the donor again bathes and clad in white garments and wearing garlands of white flowers and having flowers in his folded hands invokes the balance that is supposed to be Govinda (Viṣṇu), and after per-ambulating the balance, he should step

2039. There is a work called Kuṇḍārka by Śaṁkara, son of Nīlakaṇṭha, which in 15 stanzas succinctly gives all information about kuṇḍas. They are of ten kinds, circular, lotus-like, crescent-shaped, yoni, triangular, quadrangular, pentangular to octagonal. The diagonal drawn from north-east to south-west may be one hasta, two hastas, four, 6 or eight according as the oblations to be offered are 1000 or more up to 10,000 or from 10,000 up to a lakh, or from a lakh up to ten lakhs (4 hastas), from ten lakhs up to a crore (six hastas) and any number beyond a crore (8 hastas). This extent is necessary for preventing the oblations from falling outside the kuṇḍa. Kuṇḍas of different forms were employed according to the rites performed. Vide Hemādri (dāna, pp. 125–134) for further details.

2040. The hymn 'śam na indrāgnī' Ṛg. VII 35. 1–15, in the first 13 verses of which the words 'śam naḥ' occur at the commencement.

into one pan and in the other pan brāhmaṇas should place pure gold. Then the earth should be invoked and thereafter the donor should leave the balance and give half of the gold to the guru and the other half to the brāhmaṇas, pouring water on their hands before doing so and he may also make grants of villages to the guru and other priests. Then he should honour brāhmaṇas, other respectable people and the poor and helpless with gifts. One who performs this rite stays for innumerable years in the world of Viṣṇu. The same procedure was applied to weighing a man against silver or camphor (Aparārka p. 320, Hemādri, dānakhaṇḍa p. 214). Apart from kings who got themselves weighed against gold as shown above, lesser persons such as ministers sometimes indulged in this mahādāna, as Caṇḍeśvara, a minister of the Mithilā kings, states with pride in his Vivādaratnākara (vide H. D. vol. I, p. 370).

Hiraṇyagarbha:—(Matsya 275, Liṅgapurāṇa II. 29). The preliminary procedure about the pandal, the time, place, the materials, the puṇyāhavācana, the invocation of the lords of quarters is the same in this and the other mahādānas as in tulāpuruṣa. The donor should then bring forward a golden kuṇḍa (basin or vessel) 72 fingers high and 48 broad and having the shape of a *muraja* (tabor) but looking like the interior surface of a golden lotus (with eight petals). The golden vessel (it is called Hiraṇyagarbha) should be placed on a heap of sesame. Then the golden vessel is to be addressed with *paurāṇika* mantras, identifying it with Hiraṇyagarbha [2041] (the Creator). He should then enter the golden vessel, sit facing the north, hold in his hands golden images of Brahmā and Dharmarāja and hold his head for five breaths between his knees (to simulate the position of the foetus in the mother's womb). The guru then repeats on the golden vessel the mantras of garbhādhāna, puṁsavana and sīmantonnayana (and mentally revolves the other procedure of these); the guru thereafter makes the donor rise out of the golden vessel to the accompaniment of auspicious music. Then the remaining twelve saṁskāras are [2042] performed symbolically on the donor,

2041. Rg. X. 121. 1-10 is a hymn to Hiraṇyagarbha and begins 'Hiraṇyagarbhaḥ samavartatāgre bhūtasya jātaḥ patir-eka āsīt'.

2042. Hemādri (dāna, pp. 230–231) quotes verses to the effect that garbhādāna is to be imitated by sprinkling the juice of dūrvā in the right nostril of the donor, sīmantonnayana by the presence of the fruit of udumbara (as in that rite), annaprāśana by feeding brāhmaṇas with pāyasa (rice cooked in milk) and so on.

who repeats the mantra to Hiraṇyagarbha and says 'formerly I was born from my mother but only as a mortal, now being born of you I shall assume a divine body.' Then the donor, seated on a golden seat, is bathed with the mantra 'devasya tvā' (vide above note 653a) and he distributes the golden vessel among the guru and other priests.

Brahmāṇḍa:—(Matsya 276). In this dāna, two vessels (pans) of gold are to be prepared resembling the two halves of a hemisphere (to represent the dome of heaven above and the earth below). The two halves are to be made of gold weighing from 20 *palas* to a thousand according to the donor's ability and their length and breadth should be from 12 to 100 fingers; the pans should have (golden) figures of the eight *diggajas*, the vedas and six aṅgas, of the eight lokapālas and of brahmā in the middle of them, of Śiva, Viṣṇu, the sun on their top, of Umā and Lakṣmī, of Vasus, Ādityas and Maruts inside; the two should be covered with a silk garment and placed on a heap of sesame; eighteen kinds of corn should be arranged round them. Then in the eight quarters from the east golden images of Anantaśayana (Viṣṇu lying on the snake), Pradyumna, Prakṛti, Saṁkarṣaṇa, the four vedas, Aniruddha, Agni, Vāsudeva should be respectively arranged. Ten jars covered with cloth should be placed near; gifts of ten cows with golden-tipped horns, with copper vessels (for milking them) and covered with garments should be made and gifts of sandals, umbrellas, seats, mirrors should be made and the golden pans (called Brahmāṇḍa) should be addressed in *paurāṇika* verses and the gold should be distributed to the guru and priests (2 parts to the guru and one part to each of eight priests).

Kalpapādapa or *Kalpavṛkṣa*:—(Matsya 277, Liṅga II. chap. 33). A golden tree is to be manufactured with several fruits hanging down from it and with many ornaments and clothes. The gold may be from three palas to a thousand according to one's means. From half of the gold the Kalpapādapa is to be prepared and placed on a heap (prastha is a measure of 32 palas) of jaggery, with images of Brahmā, Viṣṇu and Śiva and the sun and five branches and the other four trees, Santāna, Mandāra, Pārijātaka and Haricandana are to be made each from ¼ of the one half of the gold taken and planted respectively in the east, south, west and north. Under the Kalpavṛkṣa, figures (golden) of Kāmadeva (*the god of* love) and his four wives are to be placed. Eight jars filled

with water and covered with silk cloth and surrounded by lamps, chowries, umbrellas are to be arranged and 18 *dhānyas* [2043] also; prayers are to be offered to the Kalpavṛkṣa to ferry the donor over the ocean of *saṁsāra*; then the kalpavṛkṣa is to be donated to the guru and the other four trees [2044] to four priests. Aparārka (p. 326) quotes Bhaviṣyottara to the effect that a sonless man or woman should make this mahādāna.

Gosahasra:—(Matsya 278, Liṅga II. 38). The donor should subsist for three days or one day on milk alone and then the preliminary procedure of invoking lokapālas, puṇyāhavācana, homa etc. should be gone through. Then fragrant substances should be applied to the body of a bull made to stand on the altar and ten cows out of 1000 should be selected. They should be covered with clothes, have their horns gold-tipped and the hoofs tipped with silver and these cows should be brought inside the pandal and honoured. A golden image of Nandikeśvara (Śiva's bull) having golden bells round its neck, covered with silken cloth, scents and flowers, with horns gold-tipped, should be placed in the midst of the ten cows. The donor should bathe in water that is medicated with the herbs called sarvauṣadhi [2045] and with flowers in his folded hands invoke the cows with mantras expressing the greatness of cows and address the image of Nandikeśvara as Dharma and should bestow the golden image of Nandi on the guru with two cows and donate one cow each to eight priests and to other brāhmaṇas five or ten cows each out of the remaining. The owner should then subsist on milk alone for one day and should be continent that day. The donor would dwell in the world of Śiva and would save his pitṛs and maternal grand-father and other maternal ancestors.

Kāmadhenu:—(Matsya 279, Liṅga II. 35). The figures of a cow and a calf should be made from very pure gold, either one thousand or 500 or 250 *palas* in weight and one without

---

2043. The following verse enumerates the 18 dhānyas 'श्यामाकधान्ययवसुद्गतिलाणुमाषगोधूमकोद्रवकुलत्थसतीनशिम्बैः । अष्टादशं चणकलायमयोष्टराजमाषप्रियङ्गुसहितं च मसूरमाहुः ॥ (अपरार्क p. 323). मत्स्य 276. 7 speaks of 'eighteen dhānyas'.

2044. The Kalpapādapas (wish-yielding trees) are said to be five 'Mandāra, Pārijātaka, Santāna, Kalpavṛkṣa and Haricandana'. पञ्चैते देवतरवो मन्दारः पारिजातकः । सन्तानः कल्पवृक्षश्च पुंसि वा हरिचन्दनम् ॥.

2045. The सर्वौषधि are ten 'कुष्ठं मांसी हरिद्रे द्वे मुरा शैलेयचन्दनम् । वचाभ्रमकसुस्तं च सर्वौषध्यो दश स्मृताः ॥' छन्दोगपरिशिष्ट quoted by दानमयूख p. 17.

much wealth may make them from even three *palas* of gold. The skin of a black antelope should be spread over the altar, thereon a *prastha* of jaggery should be kept and on it the golden cow should be placed being decked with jewels, surrounded by eight auspicious jars, fruits, eighteen kinds of grains, chowries, copper vessel, lamps, an umbrella, two silken garments, bells, neck ornaments &c. The donor should invoke the cow with *paurāṇika* mantras and then make a gift of the cow and calf to the guru. Hemādri (dānakhaṇḍa, pp. 265–274) quotes passages from the Matsya, Agni, and Liṅga purāṇas and from the Kāmika and other works.

Hiraṇyāśva:—(Matsya 280). On the altar deer skin should be spread and sesame placed and a golden horse is to be made from gold of the same weight as in Kāmadhenu and the donor is to invoke the image of the horse (identified with the supreme God) and the image is to be donated to the guru. Hemādri (dānakhaṇḍa p. 278) adds that the horse figure is to have silver welded on in five places,[2046] viz. the four feet and the mouth.

Hiraṇyāśvaratha:—(Matsya 281). A golden chariot should be made with figures of seven or four horses, four wheels, a golden flagstaff surmounted by a sapphire jar. There are to be four auspicious jars. Then this is donated along with chowries, an umbrella, silken garments and cows according to one's means.

Hemahastiratha:—(Matsya 282). A golden chariot resembling a toy-cart should be made with four wheels, having figures of eight lokapālas, Brahmā, Śiva, the Sun, with Nārāyaṇa, Lakṣmī and Puṣṭi in the middle of it, on the flag-staff there should be an eagle and the figure of Gaṇeśa on the end of the pole, there should be four golden elephants. Then it is to be invoked and donated.

Pañcalāṅgalaka:—(Matsya 283). Five ploughshares should be made of some strong wood (teak, sandal &c.) and five of gold, ten fine oxen should be decked with gold on their horns and with pearls on their tails, silver on their hoofs and a gift of these and of land equal to one kharvaṭa, kheṭa[2047] or village or

---

2046. A horse that is white in five parts of the body viz. the four feet and the mouth is deemed as very auspicious and called 'pañcakalyāṇaka'.

2047. हेमाद्रि (दानखण्ड p. 288) quotes from the मार्कण्डेयपुराण 'सोत्सेधप्रमाकारं सर्वतः खातकावृतम्। योजनार्धार्धविष्कम्भमष्टभागायतं पुरम्॥ तद्वर्धेन तथा खेटं तत्पादेन च खर्वटम्॥ तथा क्षुद्रजनप्राया सुसमृद्धकृषीवला। क्षेत्रोपभोगभूमध्ये वसति ग्रामसंज्ञिता॥'.

a gift of one hundred or fifty *nivartanas* according to one's means should be made. A brāhmaṇa with his wife is to be honoured with golden chains, rings, silken garments, wristlets.

Dharādāna or *Haimadharādāna* :—(Matsya 284). A golden figure of the earth resembling Jambudvīpa is to be made with mountains on the borders and mount Meru in the middle, showing hundreds of figures and the seven oceans, made out of from five *palas* up to 1000 palas of gold according to one's means. Then it is to be invoked with many verses and half or $\frac{1}{4}$ of it is to be donated to the guru and the rest to the other priests.

Viśvacakra :—(Matsya 285). A wheel with 16 spokes and 8 fellies should be made of gold, which may be in weight from 20 *palas* to a thousand *palas* according to one's means. On the first nave there should be the figure of Viṣṇu in yoga posture, with the conch and cakra near him and the figures of eight goddesses. On the second nave the sages Atri, Bhṛgu, Vasiṣṭha, Brahmā, Kaśyapa and the ten avatāras of Viṣṇu should be carved, on the third Gaurī and the mother-goddesses, on the 4th the twelve Ādityas and four Vedas, on the fifth the five *bhūtas* (elements, earth &c.) and the eleven Rudras, on the sixth the eight lokapālas and the eight elephants of the quarters, on the seventh eight[2048] missiles and (eight) auspicious things and on the 8th the gods at intervals. Then the donor should invoke this wheel and donate it.

Mahākalpalatā :—(Matsya 286). Ten *kalpalatās* with figures of various flowers and fruits should be made of gold, they should have figures of Vidyādhara couples, of deities resembling lokapālas and the several *śaktis*, viz. Brāhmī, Anantaśakti, Āgneyī, Vāruṇī and others and above all there should be a canopy. Two of the kalpalatās should be placed in the middle of a circle drawn on the altar and the other eight in the eight quarters on the altar. There should be ten cows and jars. Two should be bestowed on the guru and the remaining eight on eight priests.

2048. The eight missiles are 'खड्गशूलगदाशक्तिकुन्ताङ्कुशधनूंषि च। स्वधिति-श्चेति शस्त्राणि तेषु चापं प्रशस्यते ॥ गरुडपुराण quoted in हेमाद्रि (दानखण्ड p. 331) and the eight maṅgalya things are 'दक्षिणावर्तशङ्खश्च रोचना चन्दनं तथा। मुक्ताफलं हिरण्यं च छत्रं चामरमेव च ॥ आदर्शश्चेति विज्ञेयं मङ्गल्यं मङ्गलावहम् ॥ पराशर in the same.

Saptasāgaraka :—(Matsya 287). Seven vessels (kuṇḍas) with a diagonal of either 10½ aṅgulas (prādeśa) or 21 aṅgulas should be made from gold weighing from 7 *palas* to a thousand *palas* according to one's means. The seven vessels should be respectively filled with salt, milk, clarified butter, jaggery, curds, sugar, holy water. In the several kuṇḍas golden images of Brahmā, Viṣṇu, Śiva, the Sun, Indra, Lakṣmī and Pārvatī should be dipped and all jewels should be thrown in them and all dhānyas should be arranged round them. A homa to Varuṇa should be performed and then the donor should invoke the seven oceans (symbolized by the seven kuṇḍas) and then they should be donated.

Ratnadhenu :—(Matsya 288). The figure of a cow is to be made of precious stones. 81 *padmarāga* (ruby) stones are to be placed in the mouth of that figure, a hundred *puṣparāga* stones in the tip of her nose, a golden *tilaka* on her forehead, a hundred pearls in the eyes, a hundred pieces of coral on the two eyebrows, two pieces of mother-o'pearl represent the ears, there should be golden horns, and the head should be of one hundred diamond stones, with one hundred on her neck, one hundred sapphires on the back, a hundred lapis lazuli on the sides, crystal on the belly, a hundred saugandhika stones on the waist, hoofs of gold and tail of pearls and other parts of the cow's body are to be represented in a similar manner with various precious stones and the tongue with sugar and dung with jaggery, urine with ghee and a calf is to be made with ¼ of what is required for the cow and then both are donated.

Mahābhūtaghaṭa :—(Matsya 289). A golden jar is to be set with precious stones with a diagonal of from 10½ aṅgulas to 100 aṅgulas. It is to be filled with milk and clarified butter and on it figures of Brahmā, Viṣṇu and Śiva are to be drawn as in the case of Kalpavṛkṣa, and the figures of the earth raised by the great boar, of Varuṇa on his conveyance of Makara, of Agni on a ram, of Vāyu (on a deer), of Gaṇeśa on a rat should be kept in the jar together with the figures of Ṛgveda having a rosary, Yajurveda holding a lotus, Sāmaveda holding a lute, Atharvaveda holding *sruc* and *sruva* ladles and Purāṇas (the fifth veda) holding a rosary and water jar. The golden jar then should be donated.

Most of the smṛtis highly extol the gift of a cow or cows. Manu IV. 231 states that the donor of a cow reaches the world

of the Sun. Yāj. (I. 204-205), Agnipurāṇa 210. 30 prescribe that when making a gift of a cow, she should have the horns and hoofs tipped with gold and silver respectively, she should be accompanied with a bell metal vessel (for milking her) and she should be covered with cloth, she should be mild in temper and the gift should be accompanied with a money payment and that whoever makes such a gift stays in heaven for as many years as there are hair on the cow's body. Vide Saṁvarta verses 71, 74-75 also. In the Anuśāsana-parva[2049] (51. 26-34 and chapters 77, 78 and 81) there are frequent eulogies of cows. Anuśāsana 57. 28-29 are just like Yāj. I. 204-205. Anuśāsana (83. 17-18) explains that the cow is a constituent element of sacrifice, that the cow nourishes men (with milk), that their progeny (the oxen) are useful in agriculture and therefore cows deserve the highest praise. Aparārka (p. 295-297) quotes numerous passages from the purāṇas eulogizing cows. Among cows kapilā is the best for gift (Anuśāsana 73. 42 and 77. 8). Anuśāsana (77. 10 ff) explains why the dark-brown cow (kapilā) is the best. Yāj. I. 205 states that if the cow donated is kapilā it saves (from sin) the donor's family up to seven generations (including himself). Aparārka p. 297 quotes Saṁvarta to the effect that the *kapilā* cow is equal to ten ordinary cows. The Varāhapurāṇa chap. 111 deals with the gift of a kapilā cow. The method of giving a cow is briefly as follows[2050] (Hemādri, Dānakhaṇḍa p. 451 ff, Dānamayūkha pp. 185-186): The cow is made to stand facing the east together with her calf and is worshipped by the donor (after having bathed and tied his top-knot) who sits near the tail and the donee sits facing the north. The donor holds in his hand a vessel containing

2049. गोभिस्तुल्यं न पश्यामि धनं किंचिदिहाच्युत ॥ कीर्तनं श्रवणं दानं दर्शनं चापि पार्थिव । गवां प्रशस्यते वीर सर्वपापहरं शिवम् ॥ ..... स्वाहाकारवषट्कारौ गोषु नित्यं प्रतिष्ठितौ । गावो यज्ञस्य नेत्र्यो वै तथा यज्ञस्य ता मुखम् ॥ ..... गावः स्वर्गस्य सोपानं गावः स्वर्गेऽपि पूजिताः ॥ अनुशासन 51. 26 and 33; अनुशासन 71. 33 is दृष्वा धेनुं सुव्रतां कांस्यदोहां कल्याणवत्सामपलायिनीं च । यावन्ति रोमाणि भवन्ति तस्यास्तावद्वर्षाण्यश्नुते स्वर्गलोकम् ॥. This is like या. I. 205.

2050. One of the mantras is 'यज्ञसाधनभूता या विश्वस्याघमणाशिनी । विश्वरूपः परो देवः प्रीयतामनया गवा ॥'. The procedure in the दानमयूख is 'अथेत्यादि ..... गोदानं करिष्य इति सङ्कल्प्य प्राङ्मुखीं सवत्सां गां विप्रं च संपूज्य सप्तधर्णमाज्यपात्र हस्ते गृहीत्वा तत्र पुच्छं घृताक्तं कृत्वा विप्रहस्ते कुशतिलजलाद्याय उक्तफलेऽभिमतफलमुक्त्वा यज्ञसाधन ..... मनया गवेति मन्त्रं ..... पौराणमन्त्रं च पठित्वा जलमुत्सृजेत् । दानप्रतिष्ठार्थं दक्षिणां दत्त्वा ब्राह्मणधेनू अनुव्रज्य गावः सुरभयो नित्यं... इति यमोक्तां गोमतीं विद्यां जपेत् । दानमयूख pp. 185-186. हेमाद्रि and दानमयूख quote *gomati* verses from the महाभारत also viz. अनुशासन 78. 23-25.

clarified butter in which a piece of gold is put. The tail of the cow is dipped into the butter and then taken out and placed into the right hand of the donee with the hair turned towards the east and also water, sesame and kuśa grass are placed in the donee's right hand. The donor holds in his hand a vessel full of water from which he sprinkles water with *paurāṇika* mantras, gives dakṣiṇā and then the cow starts with the donee and the donor follows them a few steps and repeats certain verses eulogizing cows. The Agnipurāṇa (210. 34) specially recommends that one who is at the door of death should make the gift of a cow (particularly a dark one) who would enable him to cross the blazing river in the world of Yama called Vaitaraṇī (and hence the cow is also called Vaitaraṇī).

Yāj. I. 206–207 (206 = Agnipurāṇa 210. 33), Viṣṇu Dh. S. 88. 1–4, Vanaparva 200. 69–71, Atri 333, Varāhapurāṇa 112 [2051] attach special importance to the gift of a cow when she is just on the point of giving birth to a calf (and therefore styled 'ubhayatomukhī) and the donor is said to stay in heaven as many years as the hair on the body of the cow and her calf. Aparārka (pp. 299–301) quotes a long prose extract from Cyavana on the procedure of this gift. When the head of the calf has appeared, the donor should say to the worthy donee 'accept this cow for conferring a favour on me and not because you desire this gift' and repeat Ṛg. IV. 19. 6. Then taking hold of the cow with the formula 'ka idam kasmā adāt' (Atharvaveda III. 29. 7, Āśv. Śr. 5. 13, Āp. Śr. 14. 11. 2), the donor takes down the calf and recites in a loud voice Ṛg. IV. 27. 1 ('garbhe nu'). Then after kindling fire the donor repeats mantras addressed to the gods, pitṛs, rivers, mountains, plants, seas, serpents, herbs respectively viz. Ṛg. I 139. 11, X. 16. 12, X. 75. 5, IX. 75. 4, III. 8. 11, VII. 49. 1, VI. 75. 14, I. 90. 6. Then the donor should propitiate the Earth with mantras (addressed to the Earth) viz. Ṛg. I. 112. 1, I. 22. 13, I. 185. 7, I. 164. 41; the donor should offer 84 oblations of clarified butter, feed brāhmaṇas and receive

2051. यावद्वत्सस्य वै पादौ शिरश्चैव प्रदृश्यते। तस्मिन्काले प्रदातव्या प्रयतेनान्तरात्मना॥ अन्तरिक्षगतो वत्सो यावद्योन्यां प्रदृश्यते। तावद्दौः पृथिवी ज्ञेया यावद्गर्भं न मुञ्चति॥ यावन्ति तस्या रोमाणि वत्सस्य च युधिष्ठिर। तावद्युगसहस्राणि स्वर्गलोके महीयते॥ वनपर्व 200. 69–71. या. I. 207 and वराहपुराण 112. 28 are almost the same as वनपर्व 200. 70.

their benedictions in the terms of Rg. V. 51. 11 ('svasti no'). The gift of such a cow with the paraphernalia of gold or silver, fields, corn, clothes, salt and the like, sandal-wood, releases a man from the sins of eating or drinking forbidden food, brāhmaṇa murder, incest &c.

In imitation of the gift of the cow gifts of certain articles were made and they are also described as *dhenus*. The Matsyapurāṇa (chap. 82. 17–22) speaks of ten dhenus viz. of guḍa (jaggery), ghṛta (ghee), tila (sesame), jala (water), kṣīra (milk), madhu (honey), śarkarā (sugar), dadhi (curds), rasa (other liquids) and godhenu (cow itself). It gives (chap. 82) a detailed description of guḍadhenu and adds that the liquid dhenus should be kept in jars and others should be in heaps, that the same procedure applies to all, and that some add suvarṇadhenu, navanīta-dhenu (cow of butter) and ratnadhenu (cow of jewels). The Agnipurāṇa (210. 11–12) enumerates the same ten dhenus. In the Anuśāsana-parva 71. 39–41 the three dhenus of *ghṛta*, *tila* and *jala* are mentioned. The Varāhapurāṇa (chap. 99–110) describes in detail twelve dhenus, viz. all mentioned in the Matsya (except ghṛta and godhenu) and navanīta, lavaṇa (salt), kārpāsa (cotton) and dhānya (corn). The procedure of all is more or less the same. Black antelope skin four cubits in length is to be spread on the ground that has been cowdunged and has darbhas strewn on it with the neck portion to the east (this represents the cow) and a smaller skin is also spread (to represent the calf). If it is guḍa-dhenu it is made of 2 or 4 bhāras [2052] and the calf is made with one fourth of that for the cow. Various articles such as conch shells, sugarcane pieces, pearls, chowries, coral &c. are placed on the skin, to represent the various limbs of the cow, which is worshipped with *dhūpa* (incense) and lamps and invoked with *paurāṇika* mantras. Then the articles are donated to a brāhmaṇa. Hemādri (Dāna, p. 401) notes that according to the Padmapurāṇa a single jar of liquids and one droṇa of solids constitute these dhenus, while

2052. अपरार्क pp. 304–5 quotes मत्स्य 82. 17–22 and the following verses. Vide Aparārka p. 303 and Agnipurāṇa 210. 17–18 from which the following table may be set out : five कृष्णलs=one माष, 16 माषs=one सुवर्ण, 4 सुवर्णs=one पल, 100 पलs=तुला, 20 तुलाs=भार. Vide Manu VIII. 134–135, Yāj. I. 363–364 (which say that four or five suvarṇas are equal to a पल).

the Dānaviveka establishes that *kumbha*[2053] is equal to 1000 palas and others hold that *kumbha* contains 512 palas. These several dhenus may be donated on eclipses, on the full moon days of Kārtika and Māgha, on *Yugādi* days or when the 7th *tithi* of a month falls on a Sunday and that the donor should subsist for three days on the substance to be donated. Aparārka pp. 303–313, Hemādri (Dāna.) pp. 397–466, Dānamayūkha pp. 172–184 dilate upon these dhenus, but all those details are passed over here for want of space.

It appears that on account of the high merit associated with the gift of cows, donors sometimes passed old and weak cows on to donees. The Kaṭhopaniṣad I. 1. 3 appears to contain a condemnation of such practices.[2054] "He who makes gifts of cows that simply drink water and eat grass, but yield no milk and do not possess strength (to conceive and produce calves) reaches those worlds called 'anandāḥ' (without delights)." The Mahābhārata (Anuśāsana 77. 5–6) echoes the very words of the Kaṭhopaniṣad. In the Anuśāsana-parva 66. 53[2055] it is said that one should not bestow on a brāhmaṇa a cow which is lean or is without her calf, which is barren and diseased, which is wanting in a limb or is exhausted. Hemādri (Dāna, pp. 448–449) quotes this and other passages of similar import that state that

---

2053. प्रस्थ, आढक, द्रोण and खारी are ancient measures of corn. Even Pāṇini mentions some of these. Vide Pāṇ. V. 1. 33 and V. 4. 110 (for khārī), V. 1. 53 (for āḍhaka). The Āp. Dh. S. II. 8. 20. 1 mentions droṇa. There was no unanimity as to their exact extent. Aparārka (p. 305), Hemādri (Vratakhaṇḍa) part I (p. 57), Par. M. II. part 1, p. 141 quote verses (the latter two say from Bhaviṣyapurāṇa) which give the following table: 2 पल = प्रसृति, 2 प्रसृति = कुडव, 4 कुडव = प्रस्थ, 4 प्रस्थ = आढक, 4 आढक = द्रोण, 16 द्रोण = खारी. Parāśara VI. 70 says that 2 prasthas are equal to āḍhaka and 32 prasthas are equal to a droṇa and the Par. M. remarks देशभेदेन शास्त्रद्वयस्य व्यवस्थापनीयत्वात्. Vide मिता. on या. III. 265 and 274, लीलावती of भास्कराचार्य (verses 7–8). According to Aparārka (p. 846) a kumbha is equal to 2 droṇas. The Prāyaścitta-tattva (p. 514) quotes the Kalpataru to the effect that 10 droṇas are equal to a khārī and 20 droṇas to a kumbha.

2054. पीतोदका जग्धतृणा दुग्धदोहा निरिन्द्रियाः। अनन्दा नाम ते लोकास्तान्स गच्छति ता ददत् ॥ कठोप० I. 1. 3; पीतोदकां जग्धतृणां नष्टक्षीरां निरिन्द्रियाम्। जरारोगोपसंपन्नां जीर्णां वापीमिवाजलाम्। दत्त्वा तमः प्रविशति द्विजं क्लेशेन योजयेत् ॥ अनुशासन 77. 5–6.

2055 न कृशां नापवत्सां वा वन्ध्यां रोगान्वितां तथा। न व्यङ्गां न परिश्रान्तां वृथावृं ब्राह्मणाय दे ॥ अनुशासन 66. 53.

the man who makes a gift of such a useless cow enters into the darkness of hell.

The Matsyapurāṇa (chap. 83. 92) speaks of ten kinds of *dānas* called *parvatadānas* or *merudānas*, viz. of dhānya (corn), lavaṇa (salt), guḍa (jaggery), hema (gold), tila (sesame), kārpāsa (cotton), ghṛta (ghee), ratna (precious stones), rajata (silver), śarkarā (sugar). The Agnipurāṇa (210. 6–10) enumerates these ten. Aparārka (pp. 344–354) quotes all the chapters of the Matsya. Hemādri (Dāna, pp. 346–396) not only dilates upon these ten dānas, but speaks of 12 of such dānas from Śaiva works like the Kālottara. These *dānas* were called *parvata*, *śaila* or *acala* because the substances were heaped up like hills. The procedure in all of them is the same. A square platform inclined towards the north-east or east was to be prepared, smeared with cowdung and strewn with kuśa grass. In the midst of it a heap was to be made to represent a mountain with smaller heaps to represent hills at the foot of the mountain. In the case of the mountain of dhānya, it is to be made with 1000 or 500 or 300 *droṇa* measures of corn. Three trees of gold are to be planted on the middle of it and in the four directions lotus-like plants of pearls, *gomeda* and *puṣparāga*, emeralds and sapphires, lapis lazuli respectively. Many more picturesque features such as gold and silver images of 81 gods are described in the Matsya. A guru and four priests are to be chosen for homa and 13 *āhutis* are to be offered to each of the gods. In the gift of salt, from 1 to 16 droṇas thereof are to be employed, in the gift of jaggery from 3 to 10 bhāras, in that of gold from 1 to 1000 *palas*, in that of sesame from 3 to 10 droṇas, of *kārpāsa* from 5 to 20 bhāras, of ghee from two *kumbhas* to 20, of *ratnas* from 200 pearls to 1000, with attendant hills of precious stones ¼ of the pearls, of cotton from 20 *palas* to 10 thousand, of sugar from half a bhāra to 8 bhāras.

The smṛtis, purāṇas and digests speak of the gifts of many animals such as of elephants, horses, buffaloes, of articles like clothes, deer-skins, umbrellas, shoes, which are all passed over here. But two or three of these many *dānas* deserve notice. Aparārka (pp. 375–376) extracts a long passage from the Bhaviṣyottara about constructing in the month of Caitra a *maṇḍapa* for the distribution of water to travellers in the midst of a city or in a waterless desert or near a temple. A brāhmaṇa was to be engaged for wages to distribute water and this was to be continued for four months or at least three fortnights,

Another important gift is that of manuscripts of the epics, dharmaśāstras and purāṇas. Aparārka (pp. 389–403) and Hemādri (Dāna, pp. 526–540) quote from the Bhaviṣyottara,[2056] Matsya and other purāṇas long extracts about the merit secured by making such gifts, the Matsya in particular also stating the number of verses in each of the 18 purāṇas. The Agnipurāṇa also in speaking of the gifts of MSS. of purāṇas states the number of verses in each (chap. 272). The Bhaviṣya-purāṇa states that books may be placed in a maṭha for the use of all people and that he who arranges for the reading of books in the temples of Śiva, Viṣṇu or the Sun reaps the merit of the gifts of cows, land and gold. E. I. vol. 18 p. 340 records a gift to a temple in which provision is made for the reading of the Mahābhārata from a part of the income (in Kerala in the 11th century A. D.). The Agnipurāṇa 211. 61 eulogises also the gifts of the works called Siddhāntas.

In medieval and modern times gifts were and are made with a view to propitiate the planets. And this sentiment can be traced back to the days of the sūtras. Gaut.[2057] XI. 15 advises the king to perform the rites that experts in astrology and in portentous signs might indicate (as necessary) for averting evil consequences and states (XI. 16) that according to some ācāryas the welfare of the king depends upon the performance of such rites. The Āśv. gṛ. (III. 12. 16) states that the purohita should direct the king to fight from the direction or side on which the sun is or (if fighting at night) from the side on which Venus shines (and not from a side opposite to them). Yāj. (I. 295–308) deals with Grahaśānti (propitiation of planets). He states that he who desires prosperity, or the averting of calamities, or good rains, long life and health and also wants to harm his enemies by magic rites should perform a sacrifice; that the nine planets are the Sun, the Moon, Mars, Mercury, Jupiter, Venus, Saturn, Rāhu and Ketu; that images

2056. वस्त्रयुग्मेन संयुक्तं पुस्तकं प्रतिपादयेत् ॥ सामान्यं सर्वलोकानां स्थापयेद्यथ वा मठे । ..... शिवालये विष्णुगृहे सूर्यस्य भवने तथा । यः कारयति धर्मात्मा सदा पुस्तकवाचनम् ॥ गोभूहिरण्यवासांसि शयनान्यासनानि च । प्रत्यहं तेन दत्तानि भवन्ति पुरुषर्षभ भविष्योत्तर quoted by अपरार्क pp. 389 and 391.

2057. यानि च दैवोत्पातचिन्तका ब्रूयुस्तान्याद्रियते । तदधीनमाप ह्येके योगक्षेमे प्रतिजानते । गौतम XI. 15–16; आदित्यमौशनसं वावस्थाय प्रयोधयेत् । आश्व. गृ. III. 12. 16. Vide या. I. 295 = मत्स्यपुराण 93. 2 and या. I. 302, 303 = मत्स्य 93. 27–28.

of the planets are to be made respectively of copper, crystal, red sandal-wood, gold (for both Mercury and Jupiter), silver, iron, lead and bell-metal or they may be drawn on a piece of cloth in these colours or may be painted in circles on the ground with colours; that flowers and clothes may be offered to them of the respective colours described above; fragrant substances, incense of *guggulu* should be offered to them and oblations of cooked food may be made to them in fire with the following mantras respectively, viz. Ṛg. I. 35. 2, Vāj. S. 9. 40, Ṛg. VIII. 44. 16, Vāj. S. 15. 54, Ṛg. II. 23. 15, Vāj. S. 19. 75, Ṛg. X. 9. 4, Vāj. S. 13. 20, Ṛg. I. 6. 3. The fuel-sticks to be offered to the nine planets should respectively be of the following trees and plants: of arka plant, palāśa, khadira, apāmārga, pippala, undumbara, śamī, dūrvā and kuśa grass. 108 or 28 *samidhs* of each of these should be thrown into the fire, they being anointed with honey, clarified butter, curds and milk. The foods on which the brāhmaṇas are to be regaled at dinner in the *grahayajña* are respectively rice mixed with jaggery, rice cooked in milk, haviṣya food (i. e. the food on which the ascetics live), corn that ripens in sixty days cooked in milk, curds and rice, rice with clarified butter, rice mixed with crushed sesame, flesh (with rice), rice of various colours. The fee (dakṣiṇā) to be paid should respectively be a milch cow, conch, a draught ox, gold, clothes, horse (white), dark cow, iron weapon, a goat. 'The rise and fall of kings depend upon the (aspects of) planets and the existence and destruction of the world depend upon planets; therefore the planets should be honoured the most'—says Yāj. I. 308.

The Matsya-purāṇa[2058] in chap. 93 contains a detailed procedure of grahaśānti and chapter 94. (1-9) describes how the images of the nine planets are to be represented. Vide Vaik. IV. 13 and also Baud. gṛ. śeṣa-sūtra I. 16 for a similar treatment. In modern times the *dānas* (articles donated) to propitiate the nine planets are those stated in the

2058. The mantras of the nine planets slightly differ in the Matsya-purāṇa (93. 33-37) from those of Yāj. I. 300-301. Matsya 93. 59-63 names the same dakṣiṇās as Yāj. and Aparārka p. 575 quotes those verses. All the nine verses of Matsya 94 are quoted by the Mit. on Yāj. I. 297-98. Yāj. probably meant to rely only on the Vāj. S., but as some of the mantras occur in the Ṛg., references to the latter have been given.

Dharmasindhu [2059] quoted below. The S. R. M. (pp. 123–164) contains a long-drawn procedure of Grahamakha, a rite to propitiate the planets. A Grahamakha is either *nitya* (on Viṣuva day, *ayana* day, birth nakṣatra), *naimittika* (to be performed on such occasions as upanayana) and kāmya (for removal of adversity &c.)

Aparārka (pp. 365–366 on Yāj. I. 209) quotes a long passage from the Nandipurāṇa about the founding of hospitals (ārogya-śālā) where medicines were supplied free to patients. 'Since the four *puruṣārthas* (goals of life) viz. dharma, artha, kāma and mokṣa, depend upon health, he who provides for securing this may be said to have made gifts of everything.' The passage further states that a competent physician should be appointed. Hemādri (dāna, pp. 893–95) quotes the same passage and another from the Skandapurāṇa to the same effect.

The smṛtis prescribe that when a man accepts as a gift what he should not accept, he incurs sin from which he becomes free by giving up the thing, by reciting certain vedic mantras, (like the Gāyatrī) and by *tapas* (prāyaścitta). Vide Manu XI. 193 (= Viṣṇu Dh. S. 54. 28). This sin is said to be due to 'asat-pratigraha' which may arise either from the caste or actions of the donor (e. g. the donor may be a cāṇḍāla or *patita*) or from the time or place (e. g. taking a gift in Kurukṣetra or in an eclipse) or from the object given (such as a gift of wine or of an ewe, of the bed-stead of a deceased person or of the cow called 'ubhayatomukhī'). Yāj. III. 289 and Manu XI. 194 (=Viṣṇu Dh. S. 54. 24) prescribe for *asat-pratigraha* the penance of staying in a cow-stable for one month subsisting on milk alone, observing complete celibacy, repeating the Gāyatrī mantra 3000 times every day. The donor, in the above cases, may incur no sin, but the donee does. The Dānakriyākaumudī (pp. 84–85) quotes passages from several purāṇas condemning the acceptance of gifts on the Ganges and other sacred rivers and places, and the gifts of elephants, horses, chariots, the beds

2059. अथ ग्रहप्रीत्यर्थं दानानि । माणिक्यगोधूमधेनुरक्तवस्त्रगुडहेमताम्ररक्तचन्दन-कमलानि रवेः प्रीत्यर्थं दानानि । वंशपात्रस्थतण्डुलकर्पूरमौक्तिकश्वेतवस्त्रघृतपूर्णकुम्भवृषभा-श्वस्य । प्रवालगोधूममसूरिकारक्तवृषगुडसुवर्णरक्तवस्त्रताम्राणि भौमस्य । नीलवस्त्रसुवर्ण-कांस्यमुद्गाश्मन्महासीहास्तिदन्तपुष्पाणि बुधस्य । पुष्परागमणिहरिद्राशर्करा श्वपीतधान्यपीत-वस्त्रलवणहेमवर्णानि गुरवोः । चित्रवस्त्रश्वेताश्वधेनुवज्रमणिसुवर्णरजतगन्धतण्डुलाः शुक्रस्य । इन्द्रनीलमाषतैलतिलकुलित्थमहिषीलोहकृष्णधेनवः शनेः । गोमेदाश्वनीलवस्त्रकम्बलतैलतिल-लोहानि राहोः । वैदूर्यतैलतिलकम्बलकस्तूरीछागवस्त्राणि केतोर्दानानि । शनिपीडापरिहारार्थं शनिवारे तैलाभ्यङ्गस्तैलदानं च । धर्मसिन्धु II. part 2 p. 135.

and seats used by the dead, black deer-skin, the cow called ubhayatomukhī. The Dānacandrikā[2060] quotes the Padmapurāṇa to the effect that a brāhmaṇa who is in great difficulty to maintain himself may accept a gift on the banks of the Ganges and other sacred rivers, but should himself make a gift of the 10th part of it and then he would incur no sin.

We have already seen (pp. 838–39) how even in the Ṛgveda various rewards are promised to those who make gifts of cows, horses, gold or clothes. The Tai. S. I. 8. 4. 1 makes it a matter of give and take between gods and man (dhehi me dadāmi te ni me dehi ni te dadhe). The same sentiments and notions continued down to the latest ages and are re-inforced by further and very detailed promises of rewards for several kinds of gifts. Vas. Dh. S. 29. 2–27, Viṣṇu Dh. S. 91–92, Saṁvarta verses 46–93 may be read in this connection.

A gift once completed by acceptance is irrevocable. Yāj. II. 176 prescribes 'what is promised should be given and what has been donated should not be taken back'. Nārada[2061] (Dattāpradānika, verse 8) declares that the price of goods (delivered), wages, what is paid for pleasure (derived from dancers &c.), a gift made through affection, a gift made through gratitude (for favours received), money paid for a bride (to her kinsmen) and gifts for religious and spiritual purposes—these are given irrevocably. But a gift though promised was not complete and irrevocable in all cases. Gaut. V. 21 declares that a gift, though promised, need not be completed if the donee to whom it is promised is a person guilty of irreligious or improper conduct (such as visiting prostitutes). Manu VIII. 212 is similar in import. Kātyāyana states[2062] that if a man of his own free will promises a gift to a brāhmaṇa, but does not carry out that promise, he becomes a debtor (to that brāhmaṇa) in this world and the next. This means that a gift promised to a brāhmaṇa, though not completed by acceptance and delivery,

2060. अथ चेत्प्रतिगृह्णीयाद् ब्राह्मणो वृत्तिकर्शितः। वृशांशमर्जितं दद्यादेवं धर्मो न हीयते॥ इति पाद्मात्। दानचन्द्रिका p. 10 (Gaikwad Oriental Series of tr.).

2061. पण्यमूल्यं श्रुतिस्तुष्ट्या स्नेहात्प्रत्युपकारतः। श्रीशुल्काद्युग्रहार्थं च दृत्तं दानविदो विदुः॥ नारद (दत्ताप्रदानिक 8); भृत्या तुष्ट्या पण्यमूल्यं श्रीशुल्कप्रत्युपकारिणे। श्रद्धानुग्रहणं प्रीत्या दृत्तमष्टविधं विदुः॥ बृहस्पति quoted in स्मृतिच० (व्यव. p. 193). मातापित्रोर्गुरौ मित्रे विनीते चोपकारिणि। दीनानाथविशिष्टेभ्यो दत्तं तु सफलं भवेत्॥ नारद quoted in स्मृतिच० (व्यव. p. 193), which explains सफलं फलातिशयोपेतमित्यर्थः।

2062. प्रतिश्रुत्याप्यधर्मसंयुक्ताय न दद्यात्। गौ. V. 21; स्वेच्छया यः प्रतिश्रुत्य ब्राह्मणाय प्रतिग्रहम्। न दद्यादृणवद्दाप्यः प्राप्नुयात्पूर्वसाहसम्॥ कात्यायन quoted by अपरार्क p. 783 and स्मृतिच० (व्यव. p. 142).

could not be revoked and could be enforced in a court as a debt and the promisor fined for breach.

Gautama states (V. 22) that the promises made by those who were carried away by rage or extreme joy or who were under a sense of dread or were ill or distressed or covetous or made by a minor (under 16) or an extremely old man or by one who is a fool (or under delusion) or was intoxicated or made by a lunatic may be revoked by them and in doing so they incur no sin or blame. Nārada [2063] (Dattāpradānika, verses 9–10) amplifies this by stating 16 kinds of invalid gifts, viz. all those in Gautama (except those due to joy and covetousness) and also what is promised as a bribe, promises in jest, giving to a person mistaking him for another, gift induced by fraud or made by one who is not his own master, gift made to a man with the idea of getting something in return (but who does not do so), gift to a person who is unworthy, though he proclaimed himself to be worthy, and a gift for a purpose which is sinful. Kātyāyana (quoted by Aparārka p. 781) is just like Nārada and adds that if a man is in danger of life and promises the gift of all his wealth to whosoever may save him, he may resile from the promise. Aparārka p. 782 quotes verses from Bṛhaspati similar to Nārada's. Manu VIII. 165 declares that a sale, mortgage or gift brought about by fraud, or every transaction in which a trick is played, may be set aside (by the king). Though a gift made by one who is ill or distressed (ārta) is declared by Gautama to be revocable, Kātyāyana [2064] states an exception viz. that when a man whether in sound health or suffering from a disease declares a gift for religious purposes and dies without completing it, then his son (or other heir) should be made to carry out that gift. This verse contains the germ of the idea of wills, since the mere declaration of the intention of a man to make a gift for religious purposes is here

2063. क्रुद्धहृष्टभीतार्तलुब्धबालस्थविरमूढमत्तोन्मत्तवाक्यान्यनृतान्यपातकानि । गौ. V. 22. अदत्तं तु भयक्रोधशोकवेगसमन्वितैः । तथोत्कोचपरीहासव्यत्यासच्छलयोगतः बालमूढास्वतन्त्रार्तमत्तोन्मत्तापवर्जितैः । कर्ता ममायं कर्मेति प्रतिलाभेच्छया च यत् । अपात्रे पात्रमित्युक्ते कार्ये वा धर्मसंज्ञिते । यद्दत्तं स्याद्विज्ञानाद्वृत्तमिति तत्स्मृतम् ॥ नारद.

2064. स्वस्थेनार्तेन वा देयं श्राद्धितं धर्मकारणात् । अदत्त्वा तु मृते दाप्यस्तत्सुतो नात्र-संशयः ॥ कात्यायन quoted in अपरार्क p. 782, स्मृतिच्० (व्यव. p. 184). Vide *Bhupati Nath* v. *Ram Lal* 37 Cal. 128 (F. B.) at p. 136 where this passage of Kāt. is quoted along with the Mit. and a passage from the Mahānirvāṇa Tantra.

made enforceable after his death. Aparārka p. 782 conveys that the word 'son' is only illustrative and that every heir taking the estate is liable to make good the promise of the deceased.

In modern times a gift or bequest for *dharma* without any qualifying expression is held to be too vague an indication of the donor's or testator's intention to constitute a valid gift to charity and is declared to be void for uncertainty. Vide 6 Bom. 24, 14 Bom. 482, 17 Bom. 351, 23 Bom. 725, 735 (P. C.). But this is opposed, as pointed out in 30 Mad. 340 at pp. 342–346, to the spirit of the ancient Hindu law. The word 'dharma' when used in relation to gifts had a well-recognized meaning and not a vague uncertain one. It means 'iṣṭa' and 'pūrta' gifts according to Manu IV. 227. It appears that in 23 Bom. 725 their Lordships of the Privy Council rested content with the meaning of the word given in Wilson's Dictionary, did not examine any original Sanskrit texts to find out the meaning of the word dharma used in connection with gifts and applied the principles laid down in such English cases as *Morice* v. *The Bishop of Durham* (9 Ves. 399 and 10 Ves. 522). But there is no reason why the charitable intention being quite clear the court as representing the king should not have by framing a scheme applied the property donated or bequeathed to one charitable purpose out of the several objects specified in the definition of pūrta on principles analogous to the doctrine of *cy-près*.[2065]

2065. Vide Lewin's 'Law of Trusts' (14th ed. of 1939) pp. 472–474 where several cases are cited out of which *In re Pyne* (1903) Ch. 83 would support the argument advanced above.

CHAPTER XXVI

PRATIṢṬHA AND UTSARGA

Pratiṣṭhā and *Utsarga* (foundation of temples and dedication of wells, tanks, parks &c. for the benefit of the public).

The subject of gifts naturally leads on to the topics of *pratiṣṭhā* and *utsarga*. We saw above (p. 157 *f. n.* 370) how the construction of temples, wells and similar religious and charitable foundations and institutions was included under pūrtadharma and how śūdras were entitled to perform such dharma. The Mit. on Yāj. II. 114 points[2066] out that women (and widows) were entitled to spend on *pūrta* objects, though they were not authorized to perform *iṣṭa* dharma (i. e. vedic sacrifices &c.). Modern decisions have gone so far that a Hindu widow whose powers of alienating for secular purposes property inherited from her husband are very limited has been held to possess greater powers of alienation if the alienation be made for the spiritual benefit of her deceased husband and dedications by her of a small fraction of the property for the continuous benefit of the soul of the deceased owner have been upheld.[2067] Such works of public utility have been highly recommended from very ancient times. Śabara[2068] on Jaimini I. 3. 2 refers to the smṛti rules about charitable objects which are based on such *śruti* passages as 'O Agni, who art ancient and a king, thou art to the man who desires to offer a sacrifice like *prapā* (shed where water is distributed to travellers) in a desert'. In

2066. किं च यज्ञशब्दस्य धर्मोपलक्षणपरत्वे स्त्रीणामपि पूर्तधर्माधिकाराद्ग्रहणं युक्ततरम्। मिता. on या. II. 114.

2067. Vide *Sardar Singh* v. *Kunj Behari* L. R. 49 I. A. 383 p. 391 (a gift made by a widow of a small part of her husband's property to the temple of Jagannātha at Purī for bhoga i. e. food offerings to the deity was upheld); *Thakur Indraj Bux* v. *Thakur Sheo Naresh*, 2 Lucknow 713 (where a temple erected and endowed by a widow for the benefit of her husband's soul as well as of her own by alienating about $\frac{1}{20}$th part of the entire property left by her husband was held to be valid).

2068. प्रपास्तडागानि च परोपकाराय न धर्मायेत्येवावगम्यते। तथा च दर्शनम्। धन्वन्यिव प्रपा असीति॥ तथा स्थलयोदकं परिगृह्णन्तीति च। शबर on जै. I. 3. 2; धन्वन्यिव प्रपा असि त्वमग्न इयक्षवे पूरवे प्रत्न राजन्॥ ऋ. X. 4. 1; भोजस्येदं पुष्करिणीव वेश्म परिष्कृतं देवमानेव चित्रम्। ऋ. X. 107. 10.

Ṛg. X. 107. 10 a puṣkariṇī (a tank) is mentioned. The Viṣṇu Dh. S. (chap. 91. 1–2) states 'one who digs a well (for the public) has (the consequences of) half his sins destroyed when the water has begun to flow forth; one who dedicates a pond is forever happy (free from thirst) and attains the world of Varuṇa.' Bāṇa in his Kādambarī (para 44)[2069] mentions that smṛtis enjoined upon men the foundation (for public use) of halls, shelters, wells, *prapās*, gardens, temples, embankments, water wheels &c. Some sages went so far as to say that the reward of sacrifices is only heaven, but by pūrta (consecration of temples, tanks and gardens) one secures release from *saṁsāra*.[2070] This shows that charitable works for the use of the public or large sections of the public came to be regarded as more meritorious than sacrifices the gifts in which benefited only brāhmaṇas.

From very ancient times the procedure of dedicating a well or tank to the public has been settled. Among the earliest is the one in the Śāṅkhyāyana gṛ. V. 2 (S. B. E. vol. 29 pp.134–135) which is as follows: Now about the censecration of ponds, wells and tanks. In the bright fortnight or on an auspicious *tithi* (day) having cooked a caru (boiled food) of barley in milk he (the donor) should sacrifice with the two verses 'tvam no agne' (Ṛg. IV. 1. 4–5) and with the verses 'ava te heḷa' (Ṛg. I. 24. 14), 'imam me varuṇa' (Ṛg. I. 25. 19), 'uduttamaṁ Varuṇa' (Ṛg. I. 24. 15), 'imām dhiyam' (Ṛg. VIII. 42. 3) and with the words 'the domestic one, he who goes away from the house, the refreshing one, he who goes into the kennel, he who dwells in the kennel, he who comes out of it, the greedy one, the destroyer of enemies' to the different directions beginning with the west (Vāruṇī, one over which Varuṇa presided) from left to right. In the centre he makes oblations with milk with the verses 'viśvatas cakṣuruta' (Ṛg. X. 81. 3), 'idam Viṣṇur' (Ṛg. I. 22. 17); he plunges into the water with the verse 'yat kim cedam Varuṇa' (Ṛg. VII. 89. 5).[2071] A cow and a pair of

2069. स्मृतिशास्त्रेणेव सभावसथकूपप्रपारामसुरसदनसेतुयन्त्रप्रवर्तकेन ..... विलासिजनेनाधिष्ठिता (उज्जयिनी)। कादम्बरी para 44.

2070. इष्टापूर्ते स्मृतौ धर्मौ श्रुतौ तौ शिष्टसंमतौ। प्रतिष्ठाद्यं तयोः पूर्तमिष्टं यज्ञादिलक्षणम्॥ मुक्तिमुक्तिप्रदं पूर्तमिष्टं भोगार्थसाधनम्। कालिकापुराण quoted in कृत्यरत्नाकर p. 10.

2071. Even in the e. g. Ṛg. in VII. 49. 3 (yāsām rājā varuṇo yāti madhye) Varuṇa is the lord of waters and therefore it is appropriate that in dedicating wells and tanks to the public Varuṇa should be invoked in several verses.

clothes are the fee for this sacrifice. Then follows the feeding of brāhmaṇas.

The Āśv. gṛ. pariśiṣṭa IV. 9, Pār. gṛ. pariśiṣṭa, Matsyapurāṇa chap. 58, Agnipurāṇa chap. 64 contain a more extensive procedure about the dedication of wells and reservoirs of water. That in the Pār. gṛ. pariśiṣṭa is briefly as[2072] follows: "In the northward passage of the sun, in the bright half, on an auspicious day, tithi, vāra (week day), *nakṣatra* and *karaṇa* the donor should cook *caru* sacred to Varuṇa of barley, offer the two ājyabhāgas and sacrifice in fire ten oblations of clarified butter with the mantras, Ṛg. IV. 1. 4, IV. 1. 5, I. 25. 19, I. 24. 11, Kāt. śr. 25. 1. 11 (ye te śatam Varuṇa), ayāścāgne (Kāt. śr. 25. 1. 11), Ṛg. I. 24. 15, Ṛg. I. 24. 8, Vāj. S. IV. 36, Vāj. S. VIII. 24.[2073] He then sacrifices (ten oblations) of the mess of cooked food to Agni, Soma, Varuṇa, Yajña, Ugra, Bhīma, Śatakratu (Indra), Vyuṣṭi (prosperity), Svarga (Heaven) and lastly to Agni Sviṣṭakṛt (with svāhā at the end of each as in 'agnaye svāhā'). After partaking of the remains of the cooked food he should introduce aquatic animals (like fishes and tortoises in the pond &c.) and having bathed and decked a cow he should make the cow enter the reservoir, repeat the Puruṣasūkta (Ṛg. X. 90. 1–16) and donate that cow to the ācārya and should also make presents to him of two ear-rings, clothes and of another cow as fee and give a dinner to brāhmaṇas." Aparārka (p. 413–414), the Nirṇayasindhu and others add from the Bahvṛca gṛ. pariśiṣṭa that when the cow enters the water, he should repeat a mantra 'may you make this water holy: may the water always be pure, holy and ambrosia-like; while saving me (from sin) may you bathe in sacred water; she crosses from region to region and also saves (me and others)'; and that the donor holds the end of the cow's tail, enters the water and brings her out in the north-east corner (of the reservoir). This procedure

2072. अथातो वापीकूपतडागारामदेवतायतनानां प्रतिष्ठापनं व्याख्यास्यामस्तत्रोदगयन आपूर्यमाणपक्षे पुण्याहे तिथिवारनक्षत्रकरणे च गुणान्विते तत्र वारुणं यवमयं चरुं श्रपयित्वाज्यभागाविघ्राज्याहुतीर्जुहोति त्वं नो अग्ने स त्वं नो अग्ने इमं मे वरुण तत्त्वा यामि ये ते शतमयाश्वाग्न उद्भुत्तमसुरं हि राजा वरुणस्योत्तम्भनमग्नेरनीकमिति दृशत्वे हुत्वा स्थालीपाकस्य जुहोत्यग्नये स्वाहा शतक्रतवे स्वाहा व्युष्टये स्वाहा स्वर्गाय स्वाहेति यथोक्तं स्विष्टकृत्प्राशनान्ते जलचराणि क्षिप्त्वालंकृत्य गां तारयित्वा पुरुषसूक्तं जपन्नाचार्याय वरं दत्त्वा कर्णवेष्टकौ वाससि धेनुर्दक्षिणा ततो ब्राह्मणभोजनम्। पार. गृ. परिशिष्ट.

2073. The ten verses are quoted in full in the Dānakriyākaumudī pp. 175–176.

does not apply to the consecration of a well. In that case a cow is only made to go round the well.

Gradually the procedure prescribed in the purāṇas came to have the upper hand so much so that Aparārka (p. 15) says that in pratiṣṭhā the procedure prescribed in the purāṇas has to be followed and no other.[2074]

Aparārka (pp. 409-414), Hemādri (Dāna pp. 997-1029), Dānakriyākaumudī (pp. 160-181), Jalāśayotsarga-tattva of Raghunandana, the Pratiṣṭhāmayūkha and Utsargamayūkha of Nīlakaṇṭha, Rājadharmakaustubha (pp. 171-223) and several other works give a very comprehensive procedure of the consecration of wells, ponds and tanks, based upon the gṛhya-pariśiṣṭas, the purāṇas such as the Matsya chap. 58, the Tantras, Pāñcarātra and other works. This procedure is passed over here. The idea[2075] was that unless the reservoir was consecrated in the way prescribed its water was not holy and when consecrated it became holy. Pratiṣṭhā generally means dedicating to the public with prescribed[2076] rites. Utsarga means 'divesting oneself of ownership over a thing and dedicating it for the use of all.' There were four principal stages in the procedure of pratiṣṭhā; first the saṅkalpa,[2077] then the homa, then the utsarga (i. e. declaration that the thing has been dedicated) and lastly the dakṣiṇā and feeding of brāhmaṇas. In *Deosaran Bharthi* v. *Deoki Bharthi* 3 Patna 842 it was said (at p. 850) 'the essential ingredient that constitutes a gift whether of movable or of immovable property in the Hindu Law is the *Saṅkalpa* and the *Samarpaṇa* whereby the property is completely given away and the owner completely divests himself of the ownership in the

2076. प्रतिष्ठापनं सविधिकोत्सर्जनमित्यर्थः। दानक्रियाकौमुदी p. 166.

2077. The सङ्कल्प would be in the form अद्येत्यादि अमुकगोत्रोऽमुकशर्माहं चतुर्णवान्तमहीदानफलसमफलविष्णुकामसमन्वितवरुणलोकप्राप्तिकामो वारुणविधिना जलाशयोत्सर्गकर्म करिष्ये। दानक्रियाकौमुदी p. 167; the उत्सर्ग is made in some such words as ओं अद्येत्यादि अमुकगोत्रोऽमुकशर्माहं चतुर्णवान्त ..... प्राप्तिकामश्चतुः-सेत्यवच्छिन्नं वरुणादिदैवतमिमं जलाशयमुचितं सर्वभूतेभ्य उत्सृजे। दानक्रिया० p. 179; at the end of the rite the donor recited the verse 'सामान्यं सर्वसत्त्वेभ्यो मया वृत्तमिदं जलम्। धर्मार्थकाममोक्षेषु साधनं स्याद्वृहन्निशम्॥' quoted in राजधर्मकौस्तुभ pp. 179 and 216.

property'. In the case of temples, the proper word to use is pratiṣṭhā and not utsarga.

There is a difference in the technical meaning of *dāna* and *utsarga*. In the former the donor gives up his ownership over a thing, makes another the owner of it and cannot thereafter use it nor has he any control over it. When a man makes an *utsarga*, he no doubt gives up his ownership, but he gives up the thing for the benefit of all (as in the formula above he uses the word 'sarvabhūtebhyaḥ') and so the opinion of most writers is that he can as a member of the public make use of the thing dedicated by him, though there were a few authors who recommended that he should not do so.[2077a]

Reservoirs of water that are dug out by man are of four kinds, kūpa, vāpī, puṣkariṇī and taḍāga.[2078] Some of the works define kūpa as a well that is from five to fifty cubits in length (if rectangular) or in diameter (if it is circular). It has generally no flight of steps to reach the water. Vāpī is a well with a flight of steps on all sides or on three or two sides or one side only and its mouth may be from 50 to 100 cubits; a puṣkariṇī is from 100 to 200 cubits in length or diameter and a taḍāga (a tank) is from 200 to 800 cubits. The Matsyapurāṇa 154. 512 states that a vāpī is equal to ten kūpas (in merit) and a *hrada* (deep reservoir) is equal to ten vāpīs; a son is equal to ten *hradas* and a tree is equal to ten sons. According to the Vasiṣṭha-saṃhitā quoted by Raghunandana a puṣkariṇī is up to 400 cubits and a taḍāga is five times as much. At certain auspicious times only the consecration of wells and tanks is to take place.[2079]

Trees have been highly prized in India at all times. They were useful in sacrifices for making the yūpa (the post to

which the sacrificial animal was tied), for idhma (samidhs which were thrown into fire), for the several ladles like sruva, juhū etc. The Tai. Br. I. 1. 3 speaks of seven holy trees. The Tai. S. III. 4. 8. 4 states that idhma (samidhs) should be of the nyagrodha, udumbara, aśvattha and plakṣa trees, as they are the abodes of Gandharvas and Apsarases.[2080] Besides trees with their verdant foliage looked beautiful and the leaves of some of them (such as the mango tree) are hung up even now in pandals and at entrances of houses as auspicious in marriage and other ceremonies. Hemādri cites a passage from the Brahmapurāṇa that the twigs and leaves of the Aśvattha (the *pipal* tree), udumbara, plakṣa, cūta (mango) and nyagrodha are styled pañcabhaṅga[2081] and are auspicious in all rites. The palāśa tree was held to be so sacred that one was not to make seats, sandals or tooth brush from it or its branches and twigs (Baud. Dh. S. II. 3. 25). Trees gave shelter against heat and also yielded flowers and fruits (for worship of gods and pitṛs). When felled their wood was useful in building houses, for making implements of husbandry and for producing heat and warmth. In his 7th Pillar Edict (of Delhi-Topra) Aśoka mentions the construction of wells at a distance of 8 krośas and the planting of banyan trees and mango groves (C. I. I. vol. I pp. 134–135). The Mahābhāṣya (vol. I. p. 14) quotes a portion of an ancient verse which conveys that if a person waters and tends mango trees, his pitṛs feel extremely pleased.[2082] Manu IV. 39 and Yāj. I. 133 require the snātaka to circumambulate well-known trees (like aśvattha) if he meets them on the way. The Kādambarī also refers to this practice of worshipping trees, particularly by women desiring to have a son.[2083] The Mahābhārata (Anuśāsanaparva 58. 23–32) highly eulogizes plant life and divides plants into six kinds viz. vṛkṣa (tree), latā (creepers that cling to trees), vallī (creepers that spread on the ground), gulma (bushes), tvaksāra

(trees whose bark is strong, while the inside is hollow, like bamboos) and grass and adds that he who plants trees is saved (in a future existence) by them just as sons do and that they should be tended like sons.[2084] The Viṣṇu Dh.S.91.4 says the same thing. Hemādri (Dāna pp. 1030–31) cites a long passage from the Padmapurāṇa how by planting different trees and plants like aśvattha, aśoka, tamarind, pomegranate and others a man secures such rewards (respectively) as wealth, removal of sorrow, long life, a wife, &c. Vṛddha-Gautama (Jiv., part 2. p. 625) identifies the Aśvattha tree with Śrī Kṛṣṇa. The Mahābhārata (Śānti 69. 42) forbids even the felling of the leaves of trees like the aśvattha that have a platform [2085] built for them (caitya). Śāntiparva 184. 1–17 graphically describes how trees have life since they feel pain and pleasure and grow though cut. The Bhaviṣyapurāṇa quoted in the Utsarga-mayūkha (p. 16) states 'he who plants either one aśvattha or one picumarda or one nyagrodha or ten tamarind trees, or the three trees i. e. kapittha, bilva and āmalaka or plants five mango trees would not see hell (i. e. would not be condemned to hell for his sins).[2086] The Matsyapurāṇa (chap. 270. 28–29) requires that to the east of the *maṇḍapa* of a temple fruit-bearing trees should be planted, to the south trees that contain milky sap, to the west a reservoir of water with lotuses therein should be constructed and to the north a flower garden and *sarala* and tāla trees. Vas. Dh. S. 19. 11–12 prescribes that no one should injure (i. e. cut) trees that yield fruits and flowers except only for purposes of cultivating the land [2087] (and for sacrificial purposes, as laid down in Viṣṇu Dh. S. 51. 63). The Viṣṇu Dh. S. V. 55. 59 prescribes that the king should award the highest fine, the middling fine, or a fine of 100 kārṣāpaṇas or of one kārṣāpaṇa respectively against those who wrongfully cut a tree bearing fruit or a tree that bears flowers, or who cut creepers and shrubs or grass.

Hemādri (Dāna. pp. 1029–1055) deals at length with the planting of trees, the dedication of a garden and the merit

acquired by making gifts of various trees. The procedure of dedicating a garden is prescribed in Śāṅ. gṛ. V. 3, Āśv. gṛ. pariśiṣṭa IV. 10, the Matsyapurāṇa 59, Agnipurāṇa 70 and in many other works. It is modelled on the dedication of wells and tanks. The Matsyapurāṇa expressly states that the procedure of the consecration of a tank is extended to the consecration of everything, such as a *prāsāda* (a large house or hall for public use), a garden &c., the only difference being that the mantras are different.[2088] The procedure in Śāṅ. gṛ.[2089] (V. 3) is: Having established the sacred fire in that garden and having cooked a mess of food, the donor should sacrifice with the words (Viṣṇave svāhā, Indrāgnibhyām svāhā, Viśvakarmaṇe svāhā) and with verses Ṛg. III. 8. 6 ff. (yān vo naro), verse by verse. Then he recites over the garden the verse Ṛg. III. 8. 11 ' vanaspate śatavalśo vi roha.' The fee for the sacrifice is gold.

Devatā-pratiṣṭhā—(Consecration of an image in a temple).

Though the dharmasūtras speak as shown above of images and temples, it strikes one as somewhat strange that none of the principal gṛhya and dharma-sūtras contains any procedure of consecrating an image in a temple, while in the purāṇas and some of the digests much space is devoted to the topic of devatāpratiṣṭhā. The Matsyapurāṇa in chap. 264 and the Agnipurāṇa in chap. 60 and 66 deal with devatāpratiṣṭhā in general. There are special chapters in the purāṇas on the consecration of the image of Viṣṇu or of Śiva or the Liṅga. It would be impossible to deal in any detail with all this matter. The worship of god can be done in two ways, viz. without any outward symbol and with a symbol. The first is achieved by a prayer and offering oblations into fire; the second by means of images. But even image worshippers are quite conscious that god is pure consciousness (*cit*), is one without a second, is without parts and without a physical body, and that the various images

2088. एवमेव पुराणेषु तडागविधिरुच्यते। कूपवापीषु सर्वासु तथा पुष्करिणीषु च॥ य एष विधिर्दृष्टः प्रतिष्ठासु तथैव च। मन्त्रतस्तु विशेषः स्यात् प्रासादोद्यानभूमिषु॥ मत्स्यपुराण 58. 50–52. पादपानां विधिं वक्ष्ये तथैवोद्यानभूमिषु। तडागविधिवत्सर्वमाचार्य जगतीश्वर। मत्स्य 59. 3.

2089. अथारामेऽग्निमुपसमाधाय स्थालीपाकं श्रपयित्वा विष्णवे स्वाहेन्द्राग्निभ्यां स्वाहा विश्वकर्मणे स्वाहेति पाल्वो नर इति मन्त्रपूर्वं जुहुयाद्वनस्पते शतवल्शा इत्यभिमन्त्र्य हिरण्यं दक्षिणा च। शां. गृ. V. 3.

in which he is thought as in-dwelling are so imagined for the benefit of worshippers.[2090]

The worship of god through the medium of images is again two-fold, viz. done in one's house and in a public temple. The latter is, according to many works, the best and the completest, since it allows of the celebration of festivals and the performance of the varied items or modes of worship (*upacāra*). Private worship of idols in one's house has already been dealt with above (pp. 726–736) under Devapūjā. Now the worship of images in temples remains to be dealt with. The establishment of images in temples is again of two kinds viz. calārcā (where the image can be lifted up, moved to another place) and *sthirārcā* (where the image is fixed on a pedestal or is not meant to be lifted up or moved). The consecration of these two differs in certain details.

Here numerous matters have to be considered. The principal matters to be attended to according to the Matsyapurāṇa (264–66) are : the auspicious time for the consecration of an image, the erection of a maṇḍapa to the east or north of the temple, the erection of a vedi therein, erection of four *toraṇas* (arched gates) for the maṇḍapa, placing two auspicious jars at each of four gates filled with scented water and herbs and covered with mango leaves and white cloth, raising of banners all round the *maṇḍapa*, worship of lokapālas (guardian deities of quarters), erecting another maṇḍapa for bathing the image in, bringing the image and honouring the artizans, drawing lines on the image or liṅga with a golden needle to represent the lustre of eyes, the selection of a qualified sthāpaka or ācārya and of from eight to 32 other priests (called mūrtipa); taking the image or liṅga to the *maṇḍapa* meant for bathing the image, bathing the image to the accompaniment of music with pañcagavya mixture, with mṛttikā (loose earth), with holy ashes and water ; rendering it pure by repeating four mantras (viz. samudrajyeṣṭhāḥ, āpo divyāḥ, yāsām rājā and āpo hi ṣṭhā, which are respectively Ṛg. VII. 49. 1–3 and X. 9. 1); offering worship after the bath to the image with sandalwood paste and covering it with a garment (with the verse ' abhi vastrā ' Ṛg. IX. 97. 50), placing the image in a standing position with the mantra ' uttiṣṭha ' (Ṛg. I. 40. 1) ; placing the image in a chariot with the verses

2090. चिन्मयस्याद्वितीयस्य निष्कलस्याशरीरिणः । उपासकानां कार्यार्थं ब्रह्मणो रूपकल्पना ॥ quoted in the देवप्रतिष्ठातत्त्व of रघुनन्दन (p. 50).

'ā mūraja' and 'rathe tiṣṭhan' (Ṛg. VI. 47. 31 and VI. 75. 6) and entering it in the maṇḍapa with the verse 'ā kṛṣṇena' (Ṛg. I. 35. 2); placing the image on a bed on which kuśa grass and flowers are strewn with the face (of the image) towards the east; placing a water jar (called nidrākalaśa) having gold in it and a piece of cloth at the mouth towards the head of the image with the mantras 'āpo devīr' (Tai. S. VII. 3. 13. 1) and 'āpo asmān' (Ṛg. X. 17. 10); placing under the head of the image silken pillows, sprinkling honey and clarified butter, and worshipping with mustard with the verse 'āpyāyasva' (Ṛg. I. 91. 16 or IX. 31. 4) and 'yā te rudra' (Tai. S. IV. 5. 1. 1); offering worship with sandalwood paste and flowers and tying a band (*pratisara*) on the right hand (of the image) with 'bārhaspatya' mantra; placing a parasol, chowrie, mirror, jewels, auspicious herbs, household utensils, fine vessels and seats by the side of the image with the verse 'abhi tvā' (Ṛg. VII. 32. 22); honouring the image with the presentation of various foods and condiments with the verse 'tryambakaṁ yajāmahe' (Ṛg. VII. 59. 12); placing four priests and four door-keepers in the four directions viz. a priest knowing Ṛgveda in the east and so on and each of the four priests is to repeat from his own Veda several hymns and verses e. g. the Ṛgvedin priest should recite Śrīsūkta (Ṛg. I. 165), Pavamāna hymn (from Ṛg. IX. 1), Śāntikādhyāya (Ṛg. X. 16), then a hymn to Indra. Then the ācārya is to perform homa towards the head of the image with Śāntika mantras and offer into the fire 1000 *samidhs* (fuel sticks) each of palāśa, udumbara, aśvattha, apāmārga and śamī trees and then touch the feet of the god; preparing nine kuṇḍas each one cubit square and offering into them one thousand *samidhs* each time on touching the navel, the chest and the head of the image; remembering the eight forms (mūrti) of god viz. the earth, fire, the sacrifice, the sun, the water, wind, moon and *ākāśa* and offering homa to these with *vaidika* mantras; placing auspicious jars near each kuṇḍa; bathing the image at every watch and offering incense, food (*naivedya*), sandalwood paste; offering *bali* to all beings, and dinner to brāhmaṇas and persons of other castes at one's desire; celebrating a festival at night with dances, song and music; this may go on from one day to seven days (it is called adhivāsana); then the temple building is to be sprinkled over; finding out a place for the image either to the north or slightly to the north-east in the temple; a stone in the form of a tortoise is to be placed on the temple floor;

preparing a piṇḍikā and bathing it with pañcagavya with mantras; then raising the image with the mantra 'uttiṣṭha' (Ṛg. I. 40. 1), bringing it in the inmost chamber of the temple and placing it on the pīṭha (pedestal), offering it *arghya* water, pādya water, *madhuparka*; then the nyāsa (depositing) of eight kinds of jewels viz. diamond, pearl, lapis luzuli, conch, crystal, puṣparāga, indranīla and nīla in the eight directions from the east, also of eight kinds of grains viz. wheat, barley, sesame, mudga, nivara, śyāmāka, mustard and rice and also eight fragrant things such as white and red sandal-wood, agaru, uśīra &c. Nyāsa of all these is to be made after repeating *om* and the *paurāṇika* mantras (with 'namo namaḥ' at end) of the eight guardians (lokapālas) viz. Indra, Agni, Yama, Nirṛti, Varuṇa, Vāyu, Soma, Īśāna and also of Brahmā (9th) and Ananta (10th); raising the image and fixing it in the scooped up portion of the pedestal with the mantra 'dhruvā dyaur' (Ṛg. X. 173. 4); placing one's hand on the head of the image and contemplating on the well-known form of the deity that is established, whether Viṣṇu, Śiva, Brahmā, the Sun; repeating appropriate mantras (viz. those of Rudra, Viṣṇu, Brahmā, the Sun in the case of the respective gods whose image is established); establishing deities near the principal image of the god's dependants (such as Nandī in the case of Śiva); invocation (āvāhana) of the principal deity with its attendants with *paurāṇika* mantras; bathing the image with curds, milk, clarified butter, honey and sugar and then with water in which flowers and scents are mixed up; repeating the following mantras again and again viz. 'yaj-jāgrato dūram-upaiti' (Vāj. S. 34. 1), 'tato virāḍ-ajāyata' (Vāj. S. 31. 5), 'sahasraśīrṣā' (Ṛg. X. 90. 1), 'yenedam bhūtam' (Vāj. S. 34. 4), 'na tvāvām' (Ṛg. VII. 32. 23); touching four times with water the feet, the waist and head (of the image); giving gifts of clothes, ornaments &c. to the ācārya and to the poor, the blind and the distressed and to others that may be gathered to see; filling with sand any aperture in any direction in which the image appears to be unstable and performing propitiatory rites for the guardian of that quarter and making gifts suitable to each lokapāla; celebrating a festival for three, five or seven days.

The general procedure of consecrating an image has been given above at some length from the Matsyapurāṇa in order to convey some idea how in the first centuries of the Christian era the consecration of images was done. It will be noticed

that mostly vedic mantras were employed though a few *paurāṇika* mantras also occur. In medieval digests like the Devapratiṣṭhātattva other elements were added from Tantra works. Special attention may be drawn to the fact that in the above procedure the word prāṇapratiṣṭhā does not occur in the Matsya. Raghunandana (in Devapratiṣṭhātattva) quotes Devīpurāṇa to the effect that prāṇapratiṣṭhā is done after touching the cheeks of the image with the right hand and that without this vivification a mere image does not attain to the position of a deity worthy of worship. In the Devapratiṣṭhātattva, the Nirṇayasindhu, the Rājadharma-kaustubha and other works the prāṇapratiṣṭhā is based on the 23rd chapter (*paṭala*) of the Śāradātilaka (verses 72–76). The mantra is given below.[2091]

The Devapratiṣṭhātattva (p. 505) quotes the Hayaśīrṣapañcarātra to the effect that generally a brāhmaṇa should officiate at the consecration of an image of Viṣṇu, but a kṣatriya can officiate for a vaiśya or a śūdra yajamāna and a vaiśya may do for a śūdra yajamāna, but a śūdra cannot officiate.

In the Matsyapurāṇa, the Agnipurāṇa, the Nṛsiṁhapurāṇa, the Nirṇayasindhu and many other works there are descriptions of the consecration of the images of Vāsudeva, of a liṅga and other deities, which are all passed over here for want of space. In these works following Tantric practices three kinds of nyāsas viz. Mātṛkānyāsa, Tattvanyāsa and Mantranyāsa are referred to. The Mātṛkānyāsa consists in repeating the letters of the alphabet from a (including 'am' and 'aḥ') to ḷ (in the form of *akārāya*

2091. अस्य प्राणप्रतिष्ठामन्त्रस्य ब्रह्मविष्णुरुद्रा ऋषयः ऋग्यजुःसामानि छन्दांसि क्रियामयवपुः प्राणाख्या देवता । आं बीजं क्रौं शक्तिः प्राणप्रतिष्ठायां विनियोगः । ..... देवं स्पृष्ट्वा जपेत् । ओं आं ह्रीं क्रों अं यं रं लं वं शं षं सं हंसः देवस्य प्राणा इह प्राणाः । ओं आं ह्रीं क्रों ..... हंसः देवस्य जीव इह स्थितः । ओं आं ह्रीं ..... हंसः देवस्य सर्वेन्द्रियाणि । ओं आं ह्रीं ... ... हंसः देवस्य वाङ्मनश्चक्षुःश्रोत्रजिह्वाघ्राणप्राणा इहागत्य स्वस्तये सुखेन सुचिरं तिष्ठन्तु स्वाहेति । ततोऽर्चाहृदयमुद्रां दत्त्वा जपेत् । अस्यै प्राणाः प्रतिष्ठन्तु अस्यै प्राणाः क्षरन्तु च । अस्यै देवत्वमर्चायै मामहेति च कञ्चनेति । निर्णयसिन्धु III पूर्वार्ध p. 349. There are slight variations in other works. The verses of the शारदातिलक are पाशाङ्कुशपुटा शक्तिर्वाली बिन्दुविभूषिता । याद्याः सप्त सकारान्ता व्योम सद्येन्दुसंयुतम् ॥ तदन्ते हंसमन्त्रः स्याद्दन्तेऽमुष्यपदं वदेत् । प्राणा इति वदेत्पश्चादिह प्राणास्ततः परम् ॥ अमुष्य जीव इह स्थितस्ततोऽमुष्यपदं वदेत् । सर्वेन्द्रियाण्यमुष्यान्ते वाङ्मनश्चक्षुरन्ततः ॥ श्रोत्रघ्राणपदे प्राणा इहागत्य सुखं चिरम् । तिष्ठन्त्वग्निवधूरन्ते प्राणमन्त्रोयमीरितः ॥ मध्यमुष्यपदं पूर्वं पाशादीनि प्रयोजयेत् । प्रयोगेषु समाख्यातः प्राणमन्त्रो मनीषिभिः ॥ शारदातिलक 23. 72–76. The देवप्रतिष्ठातत्त्व p. 506 quotes these and the explanations of राघवभट्ट the oom. of the शारदातिलक and reads the मन्त्र as आं ह्रीं क्रों यं रं लं वं शं षं सं हों हंसः अमुष्य &c.

namaḥ svāhā) and offering an oblation in fire. The Tattvanyāsa consists in repeating ' Ātmatattvāya namaḥ, svāhā ' and the same formula as to Ātmattvādhipati, Kriyāśakti, Śivatattva (or Viṣṇutattva), Śivatattvādhipati, Icchāśakti, Vidyātattva, Vidyātattvādhipati, Ādhāraśakti. The Mantranyāsa is as follows : taking a mantra of certain letters for a god (e. g. one of 12 letters as in ' om namo bhagavate Vāsudevāya ') one has to repeat each letter in the formula ' om oṁkārāya namaḥ svāhā '.

The Dharmasindhu III (pūrvārdha) sets forth a brief procedure of the consecration of images in which only one priest is required (vide pp. 333–34). In modern times also the procedure of devatāpratiṣṭhā contains numerous elements and is extremely long.

The Vaikhānasa Smārtasūtra (IV. 10–11) contains perhaps the earliest extant detailed description of the consecration of the image of Viṣṇu. But it appears to have been mainly concerned with an image installed in private houses or with the worship of an image by one individual. It is briefly as follows:[2092] After the daily homa comes the daily worship of Viṣṇu, which (worship) comprehends in itself the worship of all gods. A brāhmaṇa passage (Ait. Br. I. 1) says ' Agni is indeed the nethermost (or the lowest) among gods and Viṣṇu the highest; between these two stand all the other deities '. Therefore having established in one's house the highest god Viṣṇu the householder worships him at the end of the evening and morning homa. He should make an image of Viṣṇu in length not more than six fingers ; he should perform its consecration in the bright half (of a month) on an auspicious nakṣatra. Three days before he should prepare the space (kuṇḍa) of the gṛhya fire and perform the several rites of prokṣaṇa, drawing lines as described (in Vaik. I. 9). Then he is to perform homa up to āghāras (as described above pp. 210–11). Then he performs the sacrifices to the limbs in the words ' to the teeth, svāhā : to the jaws, svāhā ', and other oblations with the six mantras beginning with ' ato devā ' (Ṛg. I. 22. 16–21). Then he performs while repeating audibly the hymn to Puruṣa (Ṛg. X. 90. 1–16) the opening of the eyes (of the god Viṣṇu) with a golden needle. Having spread in a river or a pond or in a vessel filled with water cloth and kuśa grass with the mantras beginning ' ye te śatam ' (mentioned in Vaik. III. 17) he lays down (the

2092. Vide Appendix for the text.

image of) the god on these with the head turned to the east and leaves the image there. On the second day after he bathes, he offers at night the āghāra in the usual way; he brings eight jars, fills them successively with pañcagavya, ghee, curds, milk, water mixed with whole rice, water with fruits, water with kuśa grass, water with jewels (pearls &c.); worships the god, bathes the image with the (contents of) the (eight) jars successively with the following mantras: 'vasoḥ pavitram' (Vāj. S. I. 31), 'agna āyāhi', 'iṣe tvōrje tvā,' 'śam no devīr,'[2093] 'catvāri śṛṅgā' (Ṛg. IV. 58. 3), 'somo dhenum' (Ṛg. I. 91. 26), 'catvāri vāk' (Ṛg. I. 164. 45), 'idam viṣṇur' (Ṛg. I. 22. 17); he further bathes the image with perfumed waters to the accompaniment of the mantras 'āpo' (Ṛg. X. 9. 1), 'hiraṇyavarṇāḥ' (Tai. S. V. 6. 1. 1) and the pavamāna section. He then makes to the north of the fire a vedi (altar) with rice, places a seat on it, spreads cloth on it, places the god thereon and having decked (the image) with clothes &c. worships the image. He has the benediction pronounced (by the brāhmaṇas), he touches the pratisara (a band or ribbon) with the svasti hymn[2094] and ties it (on the right hand of the image) with the mantra 'svastidā viśaspatir' (Ṛg. X. 152. 2). He then lays the god down as before. After filling with purified clear water a jar that is not dark-coloured, he places it by the (right) side of the image, touches it with the syllable 'om' and throws into it a bunch of kuśa grass, whole rice, a piece of gold and a jewel (pearl). Having meditated on the god who is really without parts as residing in his own heart and also in the clear water, as golden in splendour, as having red face, eyes, hands and feet, as wearing the *śrīvatsa* mark and a yellow garment, as having (in his hands) the conch and the disc, as of benign countenance and as possessed of all parts (i. e. complete) he should bow before him. Having sprinkled water round the fire and having lauded the work of the hotṛ, he invokes the god by name in the southern praṇidhi vessel in the words 'om bhūḥ puruṣam' (āvāhayāmi) and performs invocations in the same way with vyāhṛtis separately and together and of Nārāyaṇa,

---

2093. Iṣe tvorje tvā, agna āyāhi, śam no devīr—are the beginnings of the three Vedas, Yajurveda (Śukla and Kṛṣṇa), Sāmaveda and Atharvaveda. In the Śaunakīya recension of the Atharvaveda the first verse is 'Ye triṣaptāḥ' and 'śam no devīr' is Atharva I. 6. 1.

2094. The स्वस्तिसूक्त is स्वस्ति नो मिमीताम् &c Ṛg. V. 51. 11-15, in each verse of which the first word is *svasti*.

Viṣṇu, Puruṣa, Satya, Acyuta, Aniruddha, Śrī, Mahī. Having poured out the rice (for the sacrificial offering) he sacrifices four times with ghee and with a hymn to Viṣṇu, with the Puruṣasūkta (Ṛg. X. 90), with the mantras beginning with 'ato devāḥ ' (Ṛg. I. 22. 16-21) and with the mantra 'medinī devī'; he should then offer the mess of boiled rice sprinkled over with clarified butter after invoking the god's names (Keśava and 11 others mentioned in Vaik. III. 13). On the following morning he bathes, placing the god in the standing position after uttering 'om'; carries the image with the jar while muttering the śākuna hymn (Ṛg. II. 42. 1-3 and II. 43. 1-3) in the north-western direction into his house or in a temple or in the agnihotra-shed; placing down on the pedestal meant for the image jewels and gold he instals the image of Viṣṇu saying ' I install Viṣṇu ' while repeating a hymn to Viṣṇu and the hymn to Puruṣa (Ṛg. X. 90). He makes a *nyāsa* on the head, on the navel, on the feet and the chest of the image of the syllables svaḥ, bhuvaḥ and bhūḥ and om; fixing his mind on the god with the mantra ' idam Viṣṇur ' (Ṛg. I. 22. 17) and taking with a bunch of kuśa grass the clear water that has been already poured in the jar and that has already the *śakti* (power personified) in it, he makes (the water) flow on the head of the image and performs the invocation with the words ' I invoke Viṣṇu '. Having propitiated by worship as laid down in the śāstric rules he presents the sacrificial food (to the image).

In Vaik. IV. 12 the daily worship of Viṣṇu is set out.

The practice of attaching dancing girls to temples is of respectable antiquity. The origin of this practice appears to be analogous to the institution of Vestal virgins in Rome. The Rājataraṅgiṇī (IV. 269) speaks of two dancing girls attached to a temple (devagṛhāśrite nartakyau) who danced and sang at a place as it was the custom of their family, though the temple itself was buried underground. In the Vaghli (Khandesh District) stone Inscription dated *śake* 991 (1069-70 A. D.) there is a grant of Govindarāja making provision for dancing and singing by damsels[2095] (vilāsinī). In the Inscription of the Cāhamāna king Jojaladeva dated *saṁvat* 1147 (1090-91 A. D.) the courtezans of all temples are said to have been ordered to come in their best dress and celebrate a festival with music (E. I. vol. XI. 26 and 27) and the king records an imprecation

2095. पादकं गीतनृत्यार्थं विलासिणिसमन्वितम् (E. I. vol. II p. 227).

against all who might stop that practice. The Iṭṭagi (20 miles east of Gadag) inscription dated 1112 A. D. records (E. I. vol. XIII. p. 58) that a brāhmaṇa named Mahādeva donated houses for the retinue of dancing girls and other attendants of the gods at Iṭṭagi. This practice of *devadāsīs* (minor girls dedicated to the service of temples) or *bhāvins* (which term is known in the southern parts of the Ratnagiri district) was held by the modern Indian Courts to be immoral and whoever disposes of any person under the age of 18 years (or obtains possession of any person) with intent that such person shall at any age be employed or used for the purpose of prostitution or illicit intercourse with any person or with knowledge that the person is likely to be employed or used for any such purpose at any age is liable to be prosecuted under Sec. 372 and 373 of the Indian Penal Code (as amended by Act 18 of 1924).[2096] In Bombay there is the Bombay Devadasis Protection Act (Bombay Act X. of 1934) which declares the performance of ceremonies for dedicating an unmarried woman to an idol or temple illegal and renders the dedicator or abettor thereof liable to punishment (one year's imprisonment or fine or both).

Punaḥ-pratiṣṭhā:—(Re-consecration of images in temples). The Brahmapurāṇa quoted by the Devapratiṣṭhātattva and the Nirṇayasindhu says 'when an image is broken into two or is reduced to particles, is burnt, is removed from its pedestal, is insulted, has ceased to be worshipped, is touched by beasts like donkeys or falls on impure ground or is worshipped with *mantras* of other deities or is rendered impure by the touch of outcasts and the like—in these ten contingencies, god ceases to indwell therein.' When an image is polluted by (contact with) the blood of a brāhmaṇa or by the touch of a corpse or the touch of a *patita* it should be re-consecrated. If an image is broken in parts or reduced to particles it should be removed according to *śāstric* rules and another should be installed in its place. When

2096. Vide *Queen Empress* v *Tippa*, 16 Bom. 737; *Reg.* v. *Jaili Bhavin* 6 Bom. H. C. R. 60 (Crown Cases) for convictions for dedication of minor girls to temple-service and marrying them to an idol; also 1 Mad. 164, 15 Mad. 41 and 75. The Marathi word '*bhāvin*' is derived from bhāvinī (a woman having bhāva) and bhāva in the language of Sanskrit rhetoric means 'love of god' (ratir-devādi-viṣayā ..... bhāva iti proktaḥ 'Kāvyaprakāśa IV. 35). Vide Enthoven's 'Tribes and castes of Bombay' vol. I. pp. 145-147 for information about *Bhāvins*.

an image is broken or stolen a fast should be observed. If images of metal such as of copper are touched by thieves or cāṇḍālas they should be purified in the same way in which polluted vessels of those metals are purified and then they should be re-consecrated. If an image properly consecrated has had no worship performed without pre-meditation (i.e. owing to forgetfulness or neglect) for one night or a month or two months or the image is touched by a śūdra or a woman in her monthly illness, then the image should have water *adhivāsa* (placing in water) performed on it and it should be bathed with water from a jar, then with *pañcagavya*, then it should be bathed with pure water from jars to the accompaniment of the hymn to Puruṣa (Ṛg. X. 90) repeated 8000 times, 800 times or 28 times, worship should be offered with sandal-wood paste and flowers, naivedya (food) of rice cooked with jaggery should be offered. This is the way in which the re-consecration is effected.

Jīrṇoddhāra (rehabilitating old or dilapidated temples &c.). This subject is closely connected with the preceding topic and is dealt with in the Agnipurāṇa, chap. 67 and 103 (about liṅgas); the Nirṇayasindhu (III. pūrvārdha p. 353), the Dharmasindhu (III. pūrvārdha p. 335) give an extensive procedure following the Agnipurāṇa. This is done when the image in a temple or a liṅga is burnt, or reduced to particles or is removed to another place. The Agnipurāṇa (103. 4) says that if an image or liṅga is carried off by the strong current of a river, it may be re-consecrated elsewhere according to the rites prescribed in the śāstra. According to the Agnipurāṇa [2097] (103. 21) a liṅga that is reputed to have been established by the asuras (like Bāṇāsura) or famous sages or by gods or by those who were expert in Tantra should not be removed to another place, whether it be worn out or broken, even after the performance of prescribed rites. The Agnipurāṇa prescribes (chap. 67. 3-6) that an image of wood when extremely worn out may be burnt, one of stone may be thrown into water, one made of metal or of a jewel (pearl &c.) should be thrown into very deep water or the sea after carrying it covered with cloth in a cart to the accompaniment of music and on the same day another of the same dimensions and substance should be installed after the purification of the image is effected. When the daily worship of an image

2097. नादेयेन प्रवाहेण तद्पाक्रियते यदि । ततोन्यत्रापि संस्थाप्य विधिदृष्टेन कर्मणा ॥ असुरैर्मुनिभिर्वैस्तन्त्रविद्भिः प्रतिष्ठितम् । जीर्णं वाप्यथवा भग्नं विधिनापि न चालयेत् ॥ अग्निपुराण 103. 4 and 21.

had been stopped of set purpose or when it is touched by śūdras and the like, purification can be effected only by re-consecration. Re-consecration can be done even in intercalary months or when Venus is too near the sun to be visible. When a temple or a well or a tank is breached or when a garden embankment or a public hall is injured, one should offer four oblations of clarified butter with the four verses 'idam Viṣṇur' (Ṛg. I. 22.17), 'mā nastoke' (Ṛg. I. 114. 8), 'Viṣṇoḥ karmāṇi' (Ṛg. I. 22. 19), 'pādosya' (Ṛg. X. 90. 3), and then a dinner may be given to brāhmaṇas.

The procedure of *jīrṇoddhāra* is given at length in the Nirṇayasindhu, the Dharmasindhu and other works. Vṛddha-Hārīta IX. 409–415 also deals with re-consecration. Śaṅkha-Likhita quoted in the Vivāda-ratnākara and other works say that when an image, a garden, a well, a bridge (over a moat or river), a flagstaff, a dam, a reservoir of water are breached, they should be repaired (or raised), re-consecrated and the person guilty of breach should be fined 800 paṇas.[2098] When worship was stopped, some authors prescribed re-consecration, while others prescribed only prokṣaṇa as laid down in the Devapratiṣṭhā-tattva (p. 512) or Dharmasindhu (III pūrvārdha p. 334).

The Kirāḍu (Jodhpur) Inscription of the time of king Bhīmadeva of Aṇahillapāṭaka records that in place of an image broken by Turuṣkas (Moslems) a new one was installed in *saṁvat* 1235 (1178–79 A. D.) by the wife of Tejaḥpāla, a subordinate officer of the feudatory Cāhamāna Mahārājaputra Madanabrahma (vide E. I. vol. XX, Appendix p. 56 No. 381).

Maṭhapratiṣṭhā:—(the founding of a monastery or a college for teachers and pupils.)

The founding of maṭhas appears to have been not very ancient. The Baud. Dh. S. (III. 1. 16) in speaking of a householder who is an *agnihotrin* remarks 'after departing from his house he (the householder) stops at the extremity of the village, builds there a hut (kuṭī), or a cottage hall (maṭha) and enters it'. Here maṭha does not appear to have any technical sense. In the lexicon of Amara a maṭha is defined as 'a place where pupils (and their teacher) reside'. A temple

2098. प्रतिमारामकूपसंक्रमध्वजसेतुनिपानभङ्गेषु तत्समुत्थापनं प्रतिसंस्कारोऽशतं च। वि. र. p. 364. The निर्णयसिन्धु explains समुत्थानं प्रतिक्रिया प्रतिसंस्कारः पुनः प्रतिष्ठा अशतं पणा दण्डश्चेत्यर्थः। (III, पूर्वार्ध p. 352.)

and a maṭha were both established from the same religious motive or sentiment, but they served different purposes. A temple was built principally for the purpose of prayer and worship. It also often provided for religious instruction, for the recitation of the Mahābhārata, the Rāmāyaṇa and the purāṇas, for *kīrtans* to the accompaniment of music. But these latter were only secondary purposes. In the case of the maṭhas they were primarily intended for the instruction of pupils or the laity by some great teacher in the tenets of a sect or in the doctrines of some philosophy or in some branch of learning such as grammar, mīmāṁsā, astronomy and the like. In many cases shrines or temples are associated with or affiliated to the maṭhas, but the worship of a particular deity is not the primary object of maṭhas. Maṭhas among the followers of the Vedic religion probably owed their origin to the example of Buddhist monasteries (vihāras)[2099]. The foundation of maṭhas received a great fillip after the times of the celebrated *Advaita* teacher, the great Śaṅkarācārya, whom tradition credits with having established for the propagation of his system of Vedānta four maṭhas at Śṛṅgerī, Purī (Govardhanamaṭha), Dvārakā (Śāradā-maṭha) and Badarī (Jyotirmaṭha). Vide E. C. vol. VI Sg. No. 11 (an inscription dated 1652 A. D.) where reference is made to a grant in Śṛṅgapura, the dharmapīṭha established by Śaṅkarācārya, to the famous maṭha at Śṛṅgerī for the worship of Mallikārjuna, Vidyā-śaṅkara-svāmī and Śāradāmbā. Other āoāryas like Rāmānuja and Madhva established their own maṭhas and the number of maṭhas is now legion. Originally a maṭha started by a sannyāsin like the great Śaṅkarācārya must have had no property, as ascetios were prohibited by the śāstras from possessing property, except such articles of personal use as clothes, sandals, religious books on paim leaf or paper &c. Besides sannyāsins were required not to stay long in one place. So people built shelters for them, in order to accommodate them when they visited their town or village and these were probably originally called maṭha, which in its narrow sense means a place where an ascetio resides. In its wider sense it means an institution where a teacher presides and instructs several disciples in religious and analogous tenets, practioes and dogmas. But gradually the zeal and devotion of the disciples and followers of the great

2099. Vide Cullavagga VI. 2 and 15 (S. B. E. vol. XX. pp. 160-169 and p. 209) for *vihāras* and their condition.

teachers endowed the maṭhas with considerable moveable and immoveable properties. The origin of maṭhas (spoken of as maṭṭams in South India) has been lucidly set forth as follows in *Sammantha Pandara v. Sellappa Chetti* 2 Mad. 175 at p. 179 'a preceptor of religious doctrine gathers around him a number of disciples whom he initiates into the particular mysteries of the order and instructs in its religious tenets. Such of these disciples as intend to become religious teachers renounce their connection with their family and all claims to the family wealth and as it were affiliate themselves to the spiritual teacher whose school they have entered. Pious persons endow the schools with property which is vested in the preceptor for the time being and a home for the school is created and a maṭṭam constituted. The property of the maṭṭam does not descend to the disciples or elders in common; the preceptor, the head of the institution, selects from among the affiliated disciples him whom he deems the most competent and in his own life-time instals the disciple so settled as his successor, not uncommonly with some ceremonies. After the death of the preceptor the disciple so chosen is installed in the *gaddi* and takes by succession the property which has been held by his predecessor. The property is in fact attached to the office and passes by inheritance to no one who does not fill that office. It is in a certain sense trust property; it is devoted to the maintenance of the establishment, but the superior has a large domain over it, and is not accountable for its management nor for the expenditure of the income, provided he does not apply it to any purpose other than what may fairly be regarded as in furtherance of the object of the institution. Acting for the whole institution he may contract debts for purposes connected with his *maṭṭam* and debts so contracted might be recovered from the maṭṭam property and would devolve as a liability on his successor to the extent of the assets received by him'. Vide also *Giyana Sambandha Pandar Sannadhi v. Kandasami Tambiran* 10 Mad.375, pp.384–389; *Vidyapurna Tirtha Swami v. Vidyanidhi Tirtha Swami* 27 Mad. 435 at pp. 438–439, 451, 453–55, *Kailasam Pillai v. Nataraja*, 33 Mad. 265 (F. B.) at pp. 267, 273–277 for further remarks on the origin, growth and objects of maṭhas.[2100]

2100. Vide Rājataraṅgiṇī VI. 87–88 where the king is said to have donated to the head of a maṭha (maṭhādhipati) where pupils were taught almost all his wealth.

The head of a maṭha is called svāmī, maṭhapati or maṭhādhipati or *mahanta* (usually written as *mohunt* in the Law Reports). The head of the maṭha is usually appointed according to the custom and practice of each maṭha, generally in one of three ways, *viz.* (1) the head for the time selects from among his disciples a fit one to succeed him, (2) the disciples elect one from among themselves to succeed on the demise of the head, (3) the ruling power or the original founder or his heirs appoint the head when there is a vacancy.

That temples and maṭhas have throughout the centuries been supplementary to each other, both ministering to the religious and spiritual wants of the people can be shown by a few examples. It has been seen how Bāṇa (in the seventh century) refers to the recitation of the Mahābhārata in the temple of Mahākāla at Ujjayinī. The Rājataraṅgiṇī (V. 29) states how king Avantivarman of Kashmir appointed one Rāmaṭa Upādhyāya to the post of expounder (vyākhyātṛpadaka) of grammar in a temple (about 900 A. D.). The Agnipurāṇa[2101] enjoins that in a temple of Śiva or Viṣṇu or the Sun if any one reads a book he may thereby acquire (the merit of) the imparting of all knowledge. Some maṭhas on the other hand provided for instruction not only in spiritual knowledge but also in secular knowledge. In the Patna Inscription of the time of the Yādava king Siṅghaṇa, we read that Caṅgadeva, the court astronomer and astrologer, established in *śake* 1128 (1207 A. D.) a maṭha for the study of the Siddhānta-śiromaṇi (an astronomical work) of Bhāskarācārya, the grandfather of Caṅgadeva (E. I. vol. I. p. 338), the maṭha being endowed with lands and other sources of income by two feudatories of Siṅghaṇa. Vide also E. C. vol. VI. Sg. No. 11 referred to above (p. 907) where in endowing the maṭha at Śṛṅgerī provision was made for the worship of Mallikārjuna and Śāradāmbā.

A passage quoted in the Dānacandrikā from the Skandapurāṇa states that a maṭha should be provided with cots and seats, should be thatched with grass and provided with platforms and should be donated to brāhmaṇas or ascetics at some auspicious time; by so doing a man secures all his desires and if he has no worldly desires he secures release (from *saṁsāra*).[2102]

2101. शिवालये विष्णुगृहे सूर्यस्य भवने तथा। सर्वदानप्रदः स स्यात्पुस्तकं वाचयेत्तु यः॥ अग्निपुराण 211. 57.

2102. कृत्वा मठं प्रयत्नेन शयनासनसंयुतम्। तृणैराच्छादितं चैव वेदिकाग्निः सुशोभितम्। पुण्यकाले द्विजेभ्यो वा यतिभ्यो वा निवेदयेत्॥ सर्वान् कामानवाप्नोति निष्कामो मोक्षमाप्नुयात्॥ स्कन्दपुराण quoted in दानचंद्रिका p. 152.

The word maṭha was sometimes used in the sense of a *dharmaśālā*, a place provided for the temporary residence of travellers from distant parts. For example, the Rājataraṅgiṇī VI. 300 states that queen Diddā constructed (about 972 A. D.) a maṭha for the residence of the people from Madhyadeśa, Lāṭa and Saurāṣṭra.

Throughout India for many centuries there have been well-endowed temples and maṭhas. But how the rulers or the ancient and medieval courts of justice regulated the administration of these institutions or their funds or how they prevented or stopped maladministration or misappropriation is not dealt with exhaustively anywhere.

In *Girijanund Datta Jha v. Sailajanund Datta Jha* 23 Cal. 645 it is observed as follows (at p. 653) ' notwithstanding the existence of numerous richly endowed Hindu shrines all over India from the earliest times, the Hindu Law strictly so called is, as Sir T. Strange complains (see his Hindu Law, Ed. of 1839, vol. 1, p. 32) meagre in its provisions relating to religious endowments, a fact which may perhaps be accounted for on the supposition that the high reputation for piety and purity of character justly enjoyed for the most part by the priestly classes of ancient India who had the management of the shrines was deemed a sufficient safeguard against breach of duty, so as to render detailed rules of law to regulate their conduct unnecessary '. In the following some of the meagre material that can be gathered from Dharmaśāstra works and analogous writings is set out. Manu (XI. 26) first appeals to the religious sentiments of people by declaring that the wicked man who from greed seizes the property of gods or of brāhmaṇas feeds in another world on the leavings of the food of vultures. Śabara remarks (on Jaimini[2103] IX. 1.9) that when it is said that a village or field belongs to a god, that is not a literal expression but used only in a secondary sense. That is said to be owned by a person which one can use as one likes; a field or a village cannot be used by a deity; but the attendants on the god (or temple) are maintained out of what is donated to a temple or god. From this it follows that all those rules that apply to a gift to a human being do not apply to a property dedicated to an

2103. देवग्रामो देवक्षेत्रमिति उपचारमात्रम्। यो यदभिप्रेतं विनियोक्तुमर्हति तत्तस्य स्वम्। न च ग्रामं क्षेत्रं वा यथाभिप्रायं विनियुङ्क्ते देवता। ..... देवपरिचारकाणां तु ततो वृत्तिर्भवति देवताद्वारेण परमुक्तम्। शबर on जै. IX. 1. 9.

idol. Medhātithi[2104] (on Manu XI. 26 and II. 189) points out that images cannot be said to be owners in the literal sense, but only in a secondary or ideal sense, since the idol in a shrine cannot use the property at its will nor can it safeguard it and ownership consists in being able to use the thing owned as one desires and in being able to preserve it. In modern times courts in India have laid down that an idol is a juridical person capable of holding property, though from the vary nature of the case the possession and management of the property rests with a manager or a trustee. A maṭha is in the same position as an idol. The rights of the idol or of the maṭha can be safeguarded and vindicated in a court of law only by the manager or trustee of the temple or by the head (called mohunt) of the maṭha.[2105] Vide *Bhupati Nath v. Ram Lal* 37 Cal. 128 (F. B.) at pp. 145–153 where Mr. Justice Mukerji examines at length passages of Śabara, Medhātithi, the Dāyabhāga and its commentators to explain what is meant by a gift to an idol according to the notions of the Hindu writers. Manu and other smṛtikāras lay down that it is part of the king's duty to prosecute and fine persons interfering with or destroying the property of temples. Yāj. II. 228 prescribes a fine of 40, 80 or 160 *paṇas* respectively for cutting off the twigs, principal branches of trees or the entire trees themselves that grow on built up platforms or in cemeteries or on boundaries or in holy places or near temples. Yāj. (II. 240 and 295) prescribes the highest ammercement for fabricating a false edict or for tampering with royal edicts by inserting more or less than what is intended to be granted by the king. The Mit. on Yāj. II. 186 says that the king should sedulously safeguard all rules made about the pastures for cows (in a village) or about the preservation of tanks and temples. Manu IX. 280 requires the king to pronounce the death sentence on those who break into a royal storehouse or an armoury or a temple and prescribes that the breaker of an image shall repair the whole damage and also pay a fine of five hundred paṇas. Kauṭ. III. 9 prescribes punishment

2105. Vide *Prosunno Kumari* v *Golab Chand* L. R. 2. I. A. 145 at p. 152; *Pramatha Nath* v *Pradyumna* L. R. 52 I. A. 245, 251–52.

for encroachment on temples. From the Kauṭilīya[2106] we know that kings appointed an officer called 'devatādhyakṣa' (Superintendent of temples) and that when the king's treasury became empty it was part of the duty of that officer to bring together all the wealth of the temples in the forts and other parts of the country and the king could in an emergency use that wealth (and probably used to return it later when financial stringency ceased). Among matters called prakīrṇaka (miscellaneous) of which the king was to take cognisance *suo motu* without anybody's complaint, Nārada includes (in verse 3) 'abstraction of gifts' and 'gifts of villages and towns to brāhmaṇas' (verse 2). According to the Sm. C. among the topics called *chalas*[2107] were two viz. the destruction of a reservoir of drinking water and of a temple. Kātyāyana states that mere wrongful possession for any length of time of women, of state property and of temple property would not confer ownership on anybody. These texts indicated that the Government of the day protected temple properties, tanks, wells and the like that were dedicated to the public and exercised powers of superintendence and correction in matters affecting them. Yāj. II. 191 says that those who look after the business of guilds etc. in which many are interested should be students of the Veda, men of rectitude and free from greed. They are styled *kāryacintaka* by him. Bṛhaspati[2108] quoted by Aparārka says (p. 796) that these kāryacintakas (committee) should consist of two, three or five persons and that if there be disagreement between the larger bodies and the committee the king should decide that dispute and should bring round to the proper path whoever might be in the wrong. It appears that from very ancient times (3rd or 2nd century B. C.) the committee in charge of religious foundations was called goṣṭhī and the

2108. द्वौ त्रयः पञ्च वा कार्याः समूहहितवादिनः । कर्तव्यं वचनं तेषां ग्रामश्रेणिगणादिभिः ॥ बृहस्पति quoted by अपरार्क p. 796; मुख्यैः सह समूहानां विसंवादो भवेद्यदि । तदा विचारयेद्राजा स्वमार्गे स्थापयेच्च तान् ॥ अपरार्क p. 794.

members goṣṭhika[2109]. In some inscriptions the superintendent of a temple is called *sthānapati* (vide Śrīraṅgam plates of Devarāya II dated *śake* 1356 in E. I. vol. 18, p. 138). In the Sirpur Stone Inscription of Mahāśivagupta (about 8th or 9th century A. D.) of Mahākosala provision is made for a portion of the property granted being heritable by the sons and grandsons of the donees only if they were worthy, kept up agnihotra, studied the six aṅgas and had clean mouths and did not engage in service and further that if the heir did not possess these qualities or died without leaving a son &c., then another person, a relative with the requisite qualifications, could be made the recipient of that share, and he was to be elderly and learned and was to be chosen by mutual agreement and the king's express order was not to be necessary for his selection.[2110] Paiṭhīnasi quoted by Aparārka p. 746 ordains that the king should not deprive temples and corporations of their properties. A record from Malabar of the 11th century A. D. gives the details of temple administration in Kerala, that was in the hands of Yogam (corporation) wielding independent power (E. I. vol. 18 p. 340). The Peshwa's Government at Poona often interfered when disputes arose about properties dedicated to shrines and tombs of saints between the managers of the temples or among the heirs of the saint to whom lands had been originally donated. For example, the Peshwa made an award in 1744 A. D. about the principal religious and charitable institution in the Deccan, viz. the Chinchvad Samsthan, whereby he set apart one half of all properties bestowed on the shrine at that place for purely religious and charitable purposes and distributed the other half between the manager and his kinsmen who were all descendants of the original founder, Shri Moraya Gosavi (vide *Chintaman v. Dhondo*

2109. Vide E. I. vol. II. p. 87 (votive inscription from Sanchi) at p. 92 where mention is made of Bodha-goṭhī (Bauddha goṣṭhī); E. I. vol. I. p. 184 at p. 188 (for goṣṭhika), E. I. VIII p. 219 (Abu inscription No. 2 dated 1230 A. D.) which gives the names of the committee of management who and whose descendants were to manage the foundation (अत्र च धर्मस्थाने कृतश्रावकगोष्ठिकानां नामानि यथा। ... ... एतदीयसन्तानपरम्परया च एतस्मिन् धर्मस्थाने सकलमपि स्नपनपूजासारादिकं सदैव करणीयं निर्वाहणीयं च).

2110. I. vol. XI. p. 190 verses 30–32.

15 Bom. 612 at p. 615). A similar award was made by the Peshwa in 1777-78 A. D. about the Brahmanal Samsthan in the Satara District (vide *Annaji v. Narayana* 21 Bom. 536). This privilege of ancient rulers to redress grievances and correct abuses in the management of religious and charitable endowments devolved upon the British Government as laid down by the Privy Council in *Rajah Muthu Ramlinga v. Perianayagum Pillai*, L. R 1 I. A. 209 at p. 232 'It is evident...that the British Government, by virtue of its sovereign power, asserted as the former rulers of the country had done, the right to visit endowments of this kind and to prevent and redress abuses in their management'. The Indian Central and Provincial Legislatures have placed on the Statute book many Acts regulating religious and charitable endowments. A list of the most important of these enactments is given below.[2111]

Property dedicated to a god is called 'devottara' (the word being written as *debutter* in the Law Reports, particularly from Bengal). Vide *Sham Charan Nandi v. Abhiram Goswami*, 33 Cal. 511 at p. 523. A good deal of litigation comes up to the courts about the rights and liabilities of the trustees and the *sevakas* (called *Shebait* in Bengal), about their mismanagement of the temple properties and their removal and so forth.

Among impartible things Manu (IX. 219) included *yogakṣema*. The Mit. on Yāj. II. 118-119 shows that several meanings were attached to that expression by various writers, but that relying upon a verse of Laugākṣi it prefers the meaning of iṣṭa and pūrta. Therefore the Mit.[2112] declares that gifts dedicated by a person to the public by expending ancestral wealth such

as tanks, gardens, and temples could not be partitioned by the sons and grandsons. In modern times also the same is the rule. Besides properties dedicated to temples and other religious and charitable purposes are generally inalienable, according to legislative enactments and judicial decisions,[2113] except where an alienation is absolutely necessary for the upkeep of the religious worship or for the benefit and preservation of the institution.

A question arises whether, when a work of public utility is dedicated, the founder possesses any control over the thing dedicated and if so to what extent. The Vîramitrodaya (on Vyavahâra[2114]) furnishes an answer to this question. The following is the gist of its argument keeping as close to the original as possible. When a man throws an oblation into fire, his ownership over the oblation comes to an end; but the oblation belongs to nobody. No human being has accepted it. Yet the sacrificer can prevent any one who wants to desecrate the offering by bringing it into contact with something impure from doing so and can see to it that the offering is reduced to ashes in the fire undisturbed. Similarly when a tank or a garden is dedicated to the public, the ownership of the founder in the thing is gone, but there is no other individual owner and no new ownership arises in any single person; yet the founder can prevent a third person making himself owner of the thing dedicated to the public and it cannot be argued that the founder cannot interfere for protecting the thing and that there is no blame if he does not safeguard the assumption of ownership by a third person. The practice of respectable people viz. the exercise of the right of preservation in the case of both (i. e. in the case of what is offered into the fire and what is dedicated to the public) is based on this consideration. The śâstric injunction about *utsarga* does not merely contemplate the divesting

---

2113. Vide for example Bombay Act II of 1863 (Summary Settlement Act, sec. 8). Vide *Prosonno Kumari* v. *Golab Chand* L.R. 2 I. A. 245.

2114. किंतु वादुरेव यथेष्टविनियोगार्हस्वत्वापगमेपि परस्वत्वापत्तिफलाभावे दानशब्दार्थानिष्पत्तेर्विधिशिरस्कफलार्थिनः प्रतिपादनावधिपरिपालनीयत्वरूपं स्वत्वमस्त्येव । यथा हुते हविषि भस्मसाद्भावावधि अस्पृश्यस्पर्शादिनिषेधाश्रवणनिमित्तदोषश्रवणान्तरोधेन । तथा चान्यस्वत्वानुत्पत्तावपि न मध्यकस्वपरिग्रहाद्यनिवारणादिदोषः । शिष्टाचारोप्युभयत्र परिपालनरूपस्तन्मूलक एव । न चोत्सर्गमात्रस्य तत्र त्वया विध्यनुपगमात्परस्वत्वापादनादर एव न स्यादिति वाच्यम् । तादृशोत्सर्गस्यैव विधितात्पर्यविषयत्वात् । होमस्थलेप्यन्यथा भस्मसाद्भावानादरापत्तेः । वीरमित्रोदय, व्यवहार (portion on विभाग edited by G. S. Sarkar chap. I sec. 50 and Jiv. ed. p. 544).

of one's ownership and dedication to the public, but also that the thing dedicated be enjoyed by the public without interference or encroachment, just as in homa also one does not merely desire to throw an oblation into fire (and rest content with that) but one desires to see that the oblation is reduced to ashes and is not rendered impure. This shows that the founder of a temple or the builder of a tank or garden would always retain a power to preserve the thing dedicated.

Questions as to whether a new image can be substituted by the trustee or the *shebait* of a temple or whether he can remove the image to another place do come before the courts. Vide *Kali Kanta Chatterji v. Surendra* 41 C. L. J. 128 ; *Pramatha Natha v. Pradyumna Kumar* 30 C. W. N. 25 (P. C.) where the P. C. laid down (p. 33) that family idols are not merely movable chattels and that their destruction, degradation and injury are not within the power of the founder or other custodian for the time being; vide *Hari Raghunath v. Anant Bhikaji* 44 Bom. 466, where it was held that the manager of a public temple has no right to remove the image from the old temple and instal it in another new building, especially when the removal is objected to by a majority of the worshippers.

CHAPTER XXVII

VĀNAPRASTHA (forest hermit)

Vaikhānasa appears to have been the ancient name for Vānaprastha. In the Anukramaṇī one hundred Vaikhānasas are said to have been the seers of Ṛg. IX. 66 and a Vamra Vaikhānasa is the seer of Ṛg. X. 99. The Tai. Ā. I. 23 connects the word Vaikhānasa with the *nakhas* of Prajāpati (ye nakhās te vaikhānasāḥ).[2115] It appears that in ancient times there was some work called Vaikhānasa śāstra which treated of the rules for forest hermits. Gaut. III. 2 uses the word Vaikhānasa for this āśrama. Baud. Dh. S. II. 6. 19 defines a vānaprastha[2116] as one who follows the practices laid down in Vaikhānasa-śāstra. Vṛddha-Gautama (chap. VIII, p. 564) appears to suggest that Vaikhānasas and Pāñcarātrikas were two schools of Vaiṣṇavas, the former calling Viṣṇu by the appellations of Puruṣa, Acyuta and Aniruddha, while the Pāñcarātrikas spoke of Viṣṇu as having the four *mūrtis* or *vyūhas* viz. Vāsudeva, Saṅkarṣaṇa, Pradyumna and Aniruddha.[2117] The Par. M. vol. I, part 2, p. 139 after quoting Vas. Dh. S. 9. 11 (śrāmaṇakenāgnimādhaya) remarks that Śrāmaṇaka is Vaikhānasa-sūtra that propounds the duties of *tapasvins*. Kālidāsa in the Śākuntala speaks of the life led by the charming Śakuntala in Kaṇva's hermitage as *vaikhānasa vrata*[2118] (I. 27). Manu VI. 21 describes the Vānaprastha as abiding by the views (*mata*) of Vaikhānasa and Medhātithi explains that Vaikhānasa is a śāstra in which the duties of the forest hermit are expounded. The Mahā-

2115. ये नखास्ते वैखानसाः। ये वालास्ते वालखिल्याः। तै. आ. I. 23.

2116. वानप्रस्थो वैखानसशास्त्रसमुदाचारः। बौ. ध. सू. II. 6. 19.

2117. पुरुषं च ततः प्रोक्तमच्युतं च युधिष्ठिर। अनिरुद्धं च मां प्राहुर्वैखानसविदो जनाः॥ अन्ये त्वेवं विजानन्ति मां राजन् पाञ्चरात्रिकाः। वासुदेवं च राजेन्द्र सङ्कर्षणमथापि वा। प्रद्युम्नं चानिरुद्धं च चतुर्मूर्तिं प्रचक्षते॥ वृद्धगौतम VIII. p. 564. These and other verses are quoted as from आश्वमेधिकपर्व by परा. मा. I. part 1 p. 366. अप्पयदीक्षित in his वेदान्तकल्पतरुपरिमल (Vijianagram Series) p. 453 tells us that, according to the वैखानसशास्त्र, the Pāñcarātra school is not Vaidika.

2118. वैखानसं किमनया व्रतमात्मदानाद् व्यापाररोधि मदनस्य निवेदितव्यम्। शाकुन्तल I. 27.

bhārata[2119] (Śānti 20. 6 and 26. 6) states that the view of the Vaikhānasas is that it is better to have no desire for amassing wealth than to hanker after wealth. Śaṅkarācārya on Vedānta-sūtra III. 4. 20 speaks of the third āśrama as vaikhānasa and as indicated by the word *tapas* used in Chān. Up. II. 23. 1.

The word *vānaprastha* is according to the Mit. the same as vanaprastha, which means 'one who stays in a forest in a pre-eminent way' (by observing a strict code of life). Kṣīra-svāmī derives it differently.[2120]

The time for becoming a forest hermit arises in two ways. According to the Jābālopaniṣad quoted above (p. 421) a man may become a vānaprastha immediately after the period of student-hood or after passing some years as an householder. Manu (VI. 2) indicates the age by saying 'when a householder sees his skin wrinkled and his hair growing white and sees the sons of his sons he may betake himself to the forest'. The commentators were divided in their opinions, some holding that all three conditions (wrinkles, grey hair and seeing son's sons) must be fulfilled before one could become a forest hermit, others held that only one of them need be fulfilled and others again said that these conditions are only indicative of the age viz. that a man must be old or over 50. Kullūka on Manu III. 50 quotes a smṛti 'a man may resort to a forest after 50'.

Gaut. III. 25-34, Āp. Dh. S. II. 9. 21. 18—II. 9. 23. 2, Baud. Dh. S. III. 3, Vas. Dh. S. IX, Manu VI. 1-32, Yāj. III. 45-55, Viṣṇu Dh. S. 95, Vaik. X. 5, Śaṅkha-smṛti VI. 1-7 (in verse), Śāntiparva 245. 1-14 and Anuśāsana 142, Āśvamedhika-parva 46. 9-16, Laghu-Viṣṇu III, Kūrmapurāṇa (uttarārdha chap. 27) contain numerous rules about forest hermits. The principal points are stated below with a few references:

(1) One may go to a forest with one's wife or one may leave her in charge of one's sons (Manu VI. 3, Yāj. III. 45). The wife may accompany if she desires. Medhātithi notes that some explained that if the wife was young he may place her in charge of the sons and that an old wife may accompany her husband.

2119. वैखानसानां कौन्तेय श्रूयते वचनं यथा । इहेह धनहेतोर्यस्तस्यानीहा गरीयसी ॥ शान्तिपर्व 20. 6-7.

2120. वने प्रकर्षेण नियमेन च तिष्ठति चरतीति वनप्रस्थः वनप्रस्थ एव वानप्रस्थः संज्ञायां वैदर्यम् । मिता० on या. III. 45. क्षीरस्वामी on वानप्रस्थ however says 'प्रतिष्ठन्ते अस्मिन् प्रस्थः वनप्रस्थे भवो वानप्रस्थः वैखानसाख्यः.'

(2) He takes with him to the forest his three Vedic fires and his gṛhya fire[2121] together with such sacrificial utensils as the ladles called *sruc, sruva.* Ordinarily the wife's co-operation is required in offering sacrifices, but when the wife is given in charge of the sons, her co-operation then is supposed to be dispensed with or it may be held that she has consented to all acts by agreeing to stay with the sons. On repairing to the forest he should perform the śrauta sacrifices of new moon and full moon, the *āgrayaṇa iṣṭi*, the *cāturmāsyas, Turāyaṇa and Dākṣāyaṇa* (Manu VI. 4. 9-10, Yāj. III. 45). The sacrificial food was to be prepared from corn like *nīvāra* growing in the forest. It appears that according to some writers the forest hermit was to give up his śrauta and gṛhya fires and kindle a new fire in accordance with rules laid down in the śrāmaṇaka[2122] (i. e. the Vaikhānasa sūtra) and offer sacrifices therein. Vide Gaut. III. 26, Āp. Dh. S. II. 9. 21. 20 and Vas. Dh. S. IX. 10.[2123]

2121. If he has followed the *ardhādhāna* mode, then he has separate śrauta and gṛhya fires ; but if he has followed the ' sarvādhāna ' mode, then he has only śrauta fires, which alone he takes with him. When a man consecrates the three śrauta fires he may do so with half of his smārta fire and keep the other half of the smārta fire. This is ardhādhāna. If he does not keep the *smārta* fire separate it is sarvādhāna. Vide Āp. Śr. V. 4. 12–16, V. 7. 8 and Nirṇayasindhu (III pūrvārdha, p. 370). If he has no śrauta fires then he takes only the gṛhya fire. One who has no wife living can also become a forest hermit. Vide Mit. on Yāj. III. 45. Dākṣāyaṇa is a modification of the Darśapūrṇamāsa sacrifice (Āp. Śr. III. 17. 4 and 11, Āśv. Śr. II. 14. 7ff and com. on Kāt. Śr. I. 2. 11) and Turāyaṇa is an iṣṭyayana according to Āśv. Śr. II. 14. 4–6 and a sattra according to Āp. XXIII. 14. 1.

2122. Medhātithi on Manu VI. 9 states that the Śrāmaṇaka fire is to be kindled hy him only whose wife is dead or who becomes a forest hermit immediately after the close of the period of student-hood.

2123. आवणकेनाग्निमाधाय । गौ. III. 26 ; आमणकेनाग्निमाधायाहिताग्निः ... ... स्यात् । वसिष्ठ IX. 10. हरदत्त on गौ. explains ' आवणकं नाम वैखानसं शास्त्रम् '. These words occur also in Baud. Dh. S. II. 6.20. मेधातिथि explains that he is to swallow holy ashes in order to deposit fires in his self, while Nārāyaṇa explains that he is to do so by repeating the *mantra* ' Yā te agne yajñiyā ' (Tai. S. III. 4. 10. 5). The Baud. Dh. S. II. 10. 30–31 refers to this ' भवतं नः समनसाविति आत्मन्यग्नीन्समारोपयते । या ते अग्ने यज्ञिया तनूरिति त्रिभिरेकैकं समाजिघ्रति ।'. The Vaik. IX. 1–5 details how a person on entering the order of vaikhānasas is to establish the śrāmaṇaka fire. At first it deals with the establishment of śrāmaṇka fire by one whose wife accompanies him and then hy one whose wife does not accompany him and winds up सम्यस्य भेदः आमणकाग्निरित्याहुः । तस्मादेतद्विधानमेनमग्निं च आमणकमित्याह विखनाः । अपत्नीकश्च भिक्षुवदग्नौ होमं हुत्वा ... ... वने निवसेत् तपसां आमणमेतन्मूलम् ।

Ultimately he is to leave the keeping of fires by depositing the sacred fires in his own self according to the rules prescribed (in Vaikhānasa sūtra). Vide Manu VI. 25, Yāj. III. 45.

(3) He has to give up all food that he used to partake of when he was in his village and also all household paraphernalia (cows, horses, beds &c.) and subsist on flowers, fruits, roots and vegetables growing in the forest on land or in water or on corn fit for sages such as nīvāra and śyāmāka (Manu VI. 5 and 13, Gaut. III. 26 and 28). But he has to avoid partaking of honey, flesh, mushrooms growing on the ground, and the vegetables called Bhūstṛṇa, Śigruka, the Śleṣmātaka fruit, though these are forest produce (Manu VI. 14). Gautama allowed him as a last resort to partake of the flesh of animals killed by carnivorous beasts. Yāj. III. 54–55, Manu VI. 27–28 allow him to beg for alms at the dwellings of other hermits or allow him to go to a village and bring by begging silently eight morsels of food. He can use salt prepared by himself only (Manu VI. 12).

(4) He has to perform the five daily sacrifices to gods, sages, Manes, men (guests) and to bhūtas with food fit for ascetics or with fruits, roots and vegetables and give alms thereout (Manu VI. 5 and 7, Gaut. III. 29–30, Yāj. III. 46).

(5) He has to bathe thrice in the day, in the morning, at noon and in the evening (Manu VI. 22 and 24, Yāj. III. 48, Vas. IX. 9); while Manu VI. 6 appears to prescribe a bath twice a day only in the morning and in the evening. So there was an option.

(6) He was to wear a deer-skin or a tattered garment (i.e. one of bark or kuśa grass or the like) and allow his hair and nails to grow. Vide Manu VI. 6, Gaut. III. 34, Vas. IX. 11.

(7) He should be devoted to the study of the Veda and recite it inaudibly (Āp. Dh. S. II 9. 22. 9, Manu VI. 8, Yāj. III. 48).

(8) He should live a life of complete continence, should be self-restrained, friendly (to all), collected in mind, ever liberal but never a recipient and be compassionate towards all beings (Manu VI. 8, Yāj. III. 45 and 48). In view of Yāj. III. 45, Vas. IX. 5 and Manu VI. 26, Kullūka seems [2124] to be

2124. वानप्रस्थो ब्रह्मचारी साग्निः सोपासनो व्रजेत् । या. III. 45; ऊर्ध्वरेताः । वासिष्ठ IX. 5.

wrong in holding that if a forest hermit takes his wife with him he may cohabit with her at the prescribed times.

(9) He is not to use corn growing on ploughed land in the forest even if the owner neglects to garner it nor is he to eat fruits and roots growing in villages (Manu VI. 16 and Yāj. III. 46).

(10) He may cook wild corn or he may eat only what becomes naturally ripe (like fruits) or he may pound between stones the grain to be used by him, or may employ his teeth only as mortar and he is not to employ ghee in his cooking or religious rites but only the oil of wild fruits (Manu VI. 17 and Yāj. III. 49).

(11) He is to eat only once either in the day in the 4th part (of the day divided into eight) or at night or he may take food every alternate day or once after two or three days (Viṣṇu Dh. S. 95. 5-6, Manu VI. 19). He may also follow the method of the penance of Cāndrāyaṇa (stated in Manu XI. 216) or he may subsist on wild fruits, roots and flowers only (Manu VI. 20-21, Yāj. III. 50) or may eat only once at the end of a fortnight (according to one's ability). He may reduce gradually the quantity of food he takes, ultimately subsisting on water alone or on wind (Āp. Dh. S. II. 9. 23. 2, Manu VI. 31). Vide Viṣṇu Dh. S. 95. 7-12 also.

(12) He may accumulate food materials only for a day or a month or a year (but never for more than a year) and should throw away his stored food material every year in the month of Āśvina (Manu VI. 15, Yāj. III. 47, Āp. Dh. S. II. 9. 22. 24).[2125]

(13) He should practise severe austerities by standing in the midst of five fires (4 fires in the four directions and the blazing sun overhead), by standing in the open in the rains, by wearing wet garments in winter (Manu VI. 23-34, Yāj. III. 52, Viṣṇu Dh. S. 95. 2-4) and thus habituate his body to privations and mortifications.

(14) He should gradually give up residing in a house, but should stay under a tree and subsist only on fruits and roots[2126] (Manu VI. 25, Vas. IX. 11, Yāj. III. 54, Āp. Dh. S. II. 9. 21. 20).

2125. नवे सस्ये प्राप्ते पुराणमनुजानीयात् । आप. ध. सू. II. 9. 22. 24.

2126. वृक्षमूलनिकेतन ऊर्ध्वं षड्भ्यो मासेभ्योऽनग्निरनिकेतः । वासिष्ठ IX. 11.

(15) At night he should sleep on the bare ground, should pass the day either sitting or moving about or in the practice of Yoga and should make no effort to enjoy the things that give pleasures (Manu VI. 22 and 26, Yāj. III. 51).

(16) He should study the various texts of the Upaniṣads for the purity of his body, for the increase of his knowledge and ultimately for realising *brahma* (Manu VI. 29–30).

(17) If the forest hermit suffers from some incurable disease and cannot properly perform his duties or feels death to be near, he should start on the great journey (Mahāprasthāna) turning his face towards the north-east, subsisting on water and air only, till the body falls to rise no more (Manu VI. 31, Yāj. III. 55). The Mit. and Aparārka (p. 945) on Yāj. III. 55 quote a smṛti 'a forest hermit may resort to the distant journey or may enter water or fire or may throw himself from a precipice'.[2127]

The Baud. Dh. S. III. 3 gives an intricate classification of vānaprasthas. They are either *pacamānakas* (who take cooked or ripe food) or *apacamānakas* (who do not cook their food). Each of these two classes is again sub-divided into five. The five *pacamānakas* are sarvāraṇyakas, vaitusikas, those who subsist on fruits, roots and bulbous roots, those who subsist on fruits only, those who subsist on vegetables only. Sarvāraṇyakas are of two kinds, viz. *indrāvasiktas* (who bring creepers, shrubs and cook them, offer agnihotra therewith and offer it to guests and eat the rest) and *reto-vasiktas* (who bring the flesh of animals killed by tigers, wolves or hawks and cook it and offer to Agni &c.). The *apacamānakas* are five viz. unmajjakas (who do not employ implements of iron or stone for holding food), *pravṛttāśinaḥ* (who eat food from their hands, without using any vessel), *mukhenādāyinaḥ* (who eat food with their mouth, without using their hands, as beasts do), *toyāhāras* (who subsist on water only), *vāyubhakṣāḥ* (who observe total fast). These are according to Baud. the ten *dīkṣās* of Vaikhānasas. Manu also (VI. 29) calls the rules to be observed by forest hermits dīkṣās.

Bṛhat-Parāśara (chap. XI. p. 290) speaks of four divisions of vānaprasthas viz. Vaikhānasa, Udumbara, Vālakhilya and

2127. वानप्रस्थो दूराध्वानं ज्वलनाम्बुप्रवेशनं भृगुपतन वाह्वतिष्टेत्। इति स्मरणात्। मिता० on या. III. 55 (the printed text of मिता० reads धीराध्वानं while अपरार्क reads दूराध्वानम्).

Vanevāsī; while Vaikh. VIII. 7 says that the vānaprasthas are either *sapatnīka* (who stay with their wife) or *apatnīka* and the first are of four varieties viz. Audumbara, Vairiñca, Vālakhilya and Phenapa. The Rāmāyaṇa (Araṇya, chap. 10. 2–6) speaks of forest hermits under various designations such as the Vālakhilyas, Aśmakuṭṭas &c.

Any person of the three higher varṇas could become a vānaprastha, but a śūdra could not do so. Manu VI. 1 when starting the topic of vānaprasthas employs the word ' dvija '. In the Śāntiparva 21. 15 it is stated that a kṣatriya after transferring the kingdom to his son should subsist in a forest on wild food and follow the śrāvaṇa scriptures.[2128] In the Āśvamedhika-parva 35. 43 it is expressly stated that the order of vānaprasthas is meant for the three *dvijātis*.[2129] The Mahābhārata cites many examples of royal personages becoming vānaprasthas. Yayāti after crowning his youngest and most dutiful son Pūru as a king is said to have become a forest hermit (Ādiparva 86. 1) where he practised various austerities (Ādi. 86. 12–17) and ultimately ended his life by fasting (Ādi. 75. 58). In the Āśramavāsi-parva (chap. 19) the blind king Dhṛtarāṣṭra is said to have become a forest hermit with his wife Gāndhārī who put on bark garments and deer-skin. The Par. M. (I. part 2, p. 139) relying on Manu VI. 2, Yama and other sages states its view that men of the three varṇas could become forest hermits. Women also could repair to the forest. The Mausala parva (7. 74) states that when Kṛṣṇa left the mortal body, Satyabhāmā and other queens of Kṛṣṇa entered the forest having resolved to undergo severe austerities. The Ādiparva (128. 12–13) narrates that, on the death of Pāṇḍu, Satyavatī with her two daughters-in-law repaired to a forest for austerities and died there. Vide also Śānti 147. 10 (for Mahāprasthāna) and Āśramavāsiparva. 37. 27–28. According to Vaik. VIII. 1 and Vāmanapurāṇa 14. 117–118 a brāhmaṇa could pass through all four āśramas, a kṣatriya through three (he could not be a sannyāsin), a vaiśya

2128. पुत्रसंक्रामितश्रीश्च वने वन्येन वर्तयन् । विधिना श्रावणेनैव कुर्यात्कर्माण्यतन्द्रितः ॥ शान्तिपर्व 21. 15. श्रावण seems to be a variant for श्रामण or श्रामणक. Vide note 2123 above.

2129. वानप्रस्थं द्विजातीनां त्रयाणामुपदिश्यते । सर्वेषामेव वर्णानां गार्हस्थ्यं तद्विधीयते ॥ आश्वमेधिकपर्व 35. 43; सत्यभामा तथैवान्या देव्यः कृष्णस्य संमताः । वनं प्रविविशुः राजंस्तापस्ये कृतनिश्चयाः ॥ मौसल 7. 74; जलमग्निस्तथा वायुरथवापि विकर्षणम् । तापसानां प्रशस्यन्ते गच्छ सञ्जय मा चिरम् ॥ आश्रम० 37. 27–28; ब्राह्मणस्याश्रमाश्चत्वारः क्षत्रियस्याद्यास्त्रयो वैश्यस्य द्वावेव । वैखानसस्मार्त VIII. 1.

through two (brahmacarya and gārhasthya) and a śūdra could resort to only one viz. the householder's mode of life. Vide the story of Śambūka referred to above (p. 119).

The question whether ending one's life by starting on the Great Journey or by falling from a precipice is sinful exercised the minds of many writers on dharmaśāstra. The Dharmaśāstra writers generally condemn suicide or an attempt to commit suicide as a great sin. Parāśara (IV. 1-2) states that if a man or woman hangs himself or herself through extreme pride or extreme rage or through affliction or fear he or she falls into hell for sixty thousand years.[2130] Manu V. 89 says that no water is to be offered for the benefit of the souls of those who kill themselves. The Ādiparva (179. 20) declares that one who commits suicide does not reach blissful worlds. Vas. Dh. S. (23. 14-16) ordains "whoever kills himself becomes *abhiśasta* (guilty of mortal sin) and his *sapiṇḍas* have to perform no death rites for him ; a man becomes a killer of the self when he destroys himself by wood (i. e. by fire), water, clods and stones (i. e. by striking his head against a stone), weapon, poison, or ropes (i. e. by hanging). They also quote a verse 'that *dvija* who through affection performs the last rites of a man who commits suicide must undergo the penance of Cāndrāyaṇa with Tapta-kṛcchra". Vas. Dh. S. 23. 18 prescribes a prāyaścitta for merely resolving to kill oneself (even when no attempt is made). Yama (20-21) prescribes that when a person tries to do away with himself by such methods as hanging, if he dies, his body should be smeared with impure things and if he lives he should be fined two hundred *paṇas* ; his friends and sons should each be fined one *paṇa* and then they should undergo the penance laid down in the śāstra.[2131]

In spite of this general attitude, exceptions were made in the smṛtis, the epics and purāṇas. When a man was guilty of brāhmaṇa murder, he was allowed to meet death at the hands of archers in a battle who knew that the sinner wanted to be killed in that way as a penance or the sinner may throw himself head

2130. अतिमानादतिक्रोधात्स्नेहाद्वा यदि वा भयात् । उद्बध्नन्पियात्स्त्री पुमान्वा गतिरेषा विधीयते ॥ पूयशोणितसंपूर्णे अन्धे तमसि मज्जति । षष्टिं वर्षसहस्राणि नरकं प्रतिपद्यते ॥ पराशर IV. 1-2.

2131. आत्मानं घातयेद्यस्तु रज्ज्वादिभिरपक्वकैः । मृतोऽमेध्येन लेप्तव्यो जीवतो द्विगुणं दमः ॥ बध्नन्यास्तत्सुताभ्राणि प्रत्येकं पणिकं दमम् । प्रायश्चित्तं ततः कुर्युर्यथाशास्त्रमचोदितम् ॥ यम 20-21.

downwards in fire (Manu XI. 73, Yāj. III. 248). Similarly the drinker of spirituous liquor expiated his sin by taking boiling wine, water, ghee, cow's milk or urine and dying thereby (Manu XI. 90-91, Yāj. III. 253, Gaut. 23. 1, Vas. Dh. S. 20. 22). Vide also Vas. Dh. S. 13. 14, Gaut. 23. 1, Āp. Dh. S. I. 9. 25. 1-3 and 6 for similar deadly penances for incest and for drinking liquor and for theft. The Āp.Dh.S. (I.10.28. 15-17) quotes Hārīta who condemns such penances involving death.[2132] At extremely holy places like Prayāga, the Sarasvatī and Benares persons were allowed to kill themselves by drowning with the desire of securing release from *saṁsāra*. The Śalyaparva (39. 33-34) states 'whoever abandons his body at Pṛthūdaka on the northern bank of the Sarasvatī after repeating Vedic prayers would not be troubled by death thereafter'.[2133] The Anuśāsanaparva (25. 62-64) says that if a man knowing the Vedānta and understanding the ephemeral nature of life abandons life in the holy Himālayas by fasting, he would reach the world of *brahma*. Vide also Vanaparva 85. 83 (about suicides at Prayāga). The Matsya-purāṇa (186. 34-35) eulogises the peak of Amarakaṇṭaka by stating 'whoever dies at Amarakaṇṭaka by fire, poison, water or by fasting enjoys the pleasures (described in verses 28-33). He who throws himself down (from the peaks of Amarakaṇṭaka) never returns (to saṁsāra).'[2134]

There are historical examples of this practice supplied by Epigraphy. The Khairha plates of Yaśaḥkarṇadeva (dated Kalacuri *saṁvat* 823 i. e. 1073 A. D.) narrate that king Gāṅgeya obtained release along with his one hundred wives at the famous banyan tree of Prayāga (E. I. vol. XII. p. 205 at p. 211).[2135] King Dhaṅgadeva of the Chandella dynasty is said to have lived for more than 100 years and to have abandoned his body at Prayāga while contemplating on Rudra (E. I. vol. I. p. 140). The Cālukya king Someśvara after performing yoga

rites drowned himself in the Tuṅgabhadrā in 1068 A. D. (E. C. vol. II. Sk. 136). The Raghuvaṁśa VIII. 94 poetically describes how Aja in his old age when his health was shattered by disease resorted to fasting and drowned himself at the confluence of the holy rivers, the Ganges and the Śarayū, and immediately attained the position of a denizen of Heaven.

Apart from suicide for purposes of penance or at holy places the smṛtis allowed, as said above, a forest hermit to start on the great journey to meet death and also allowed in certain circumstances death by entering fire, or by drowning or by fasting or by throwing oneself from a precipice even for those who were not hermits. Gautama (14. 11) prescribes that no mourning need be observed for those who wilfully meet death by fasting, or by cutting themselves off with a weapon, or by fire, or poison or water or by hanging or by falling from a precipice. But Atri (218-219) states some exceptions viz. 'if one who is very old (beyond 70), one who cannot observe the rules of bodily purification (owing to extreme weakness &c.), one who is so ill that no medical help can be given, kills himself by throwing himself from a precipice or into fire or water or by fasting, mourning should be observed for him for three days and śrāddha may be performed for him.[2136] Aparārka (p. 536) quotes texts of Brahmagarbha, Vivasvat and Gārgya about an householder 'he who suffering from serious illness cannot live, or who is very old, who has no desire left for the pleasures of any of the senses and who has carried out his tasks may bring about his death at his pleasure by resorting to mahāprasthāna, by entering fire or water or by falling from a precipice. By so doing he incurs no sin and his death is far better than *tapas*, and one should not desire to live vainly (without being able to perform the duties laid down by the śāstra).[2137] Aparārka (p. 877) and Par. M. (I. part 2, p. 228) quote several verses from Ādipurāṇa about dying by fasting, by entering fire or deep water or by falling from a precipice, or by going on mahā-

2136. वृद्धः शौचस्मृतेर्लुप्तः प्रत्याख्यातभिषक्क्रियः । आत्मानं घातयेद्यस्तु भृग्वग्न्यम्बुमहाम्बुभिः ॥ तस्य त्रिरात्रमाशौचं द्वितीये त्वस्थिसञ्चयम् । तृतीये तूदकं कृत्वा चतुर्थे श्राद्धमाचरेत् ॥ अत्रि 218-219 quoted by मेधातिथि on मनु V. 89, मिता० on या. III. 6, अपरार्क p. 902 (as from Aṅgiras), परा. मा. I. part 2 p. 228 (as from ज्ञाततप).

2137. तथा च ब्रह्मगर्भः । यो जीवितुं न शक्नोति महाव्याध्युपपीडितः । सोग्न्युदकमहायात्रां कुर्वन्नात्र दुष्यति ॥ विवस्वान् । सर्वेन्द्रियविरक्तस्य वृद्धस्य कृतकर्मणः । व्याधितस्येच्छया तीर्थे मरणं तपसोधिकम् ॥ तथा गार्ग्योपि गृहस्थमधिकृत्याह । महाप्रस्थानगमनं ज्वलनाम्बुप्रवेशनम् । भृगुपतनं चैव वृथा नेच्छेत्तु जीवितुम् ॥ quoted by अपरार्क p. 536.

prasthāna in the Himālāyas or by abandoning life from the branch of the vaṭa tree at Prayāga, the verses declaring that not only does such a man not incur sin but he attains the worlds of bliss. In the Rāmāyaṇa (Araṇya, chap. 9) Śarabhaṅga is said to have entered fire. We find that the Mṛcchakaṭika (I. 4) speaks of king Śūdraka as having entered fire. In the Gupta Inscriptions No. 42, the great Emperor Kumāragupta is said to have entered the fire of dried cowdung cakes. The editor remarks that there is necessarily no reference to the fact that the emperor voluntarily embraced death by fire. But it appears that there is no great propriety in the description if all that is meant is that the Emperor's corpse was burnt with 'karīṣa'.

Some put forward a Vedic passage 'one who desires heaven should not (seek to) die before the appointed span of life is at an end (of itself)' as opposed to the permission for suicide given by the smṛtis. Medhātithi on Manu VI. 32 [2138] quotes this Vedic text and explains it away by saying that if *śruti* intended to lay down an absolute prohibition against suicide in every case, it would have simply said 'one who desires heaven should not (seek to) die'. The Vāj. S. (40. 3) contains a verse saying 'whoever destroy their self reach after death *Asura* worlds that are shrouded in blinding darkness', which really refers to persons ignorant of the correct knowledge of the Self. But this has been interpreted by many as referring to those guilty of suicide (ātmahan). Vide Uttararāmacarita IV, after verse 3 [2139] and Bṛ. Up. IV. 4. 11 for a verse similar to that in the Vāj. S. The Rājataraṅgiṇī (VI. 1411) refers to officers appointed by the king to superintend *prāyopaveśa* (resolving on death by fasting).

Among Jains a similar rule prevailed. The Ratnakaraṇḍaśrāvakācāra (chap. 5) of Samantabhadra (about 2nd century A. D.) dilates on Sallekhanā, which consists in abandoning the body for the accumulation of merit in calamities, famines,

2138. नन्वत्र च तस्माद्ध न पुरायुषः स्वःकामी प्रेयादिति श्रुतिस्तत्र कुतो वानप्रस्थस्य शरीरत्यागः । उच्यते । जरसा विशीर्णस्यानिष्टसम्वर्शनादिना वा विद्विते प्रत्यासन्ने सुस्थौ सुमूर्षतो न श्रुतिविरोधः । एवं हि तत्र श्रूयते न पुरायुष इति । अवस्थाविशेषे ह्यनभिप्रेते मरणे एतावदेवावक्ष्यत् स्वःकामी प्रेयादिति । मेधा. on मनु VI 32. Vide कुल्लूक on मनु VI. 31 for an explanation of the same Vedic quotation.

2139. अन्धतामिस्रा ह्यसूर्या नाम ते लोकास्तेम्यः प्रतिविधीयन्ते ये आत्महातिन इत्येवमुपयो मन्यन्ते । उत्तररामचरित IV after verse 3.

extreme old age and incurable disease.[2140] The Kālandrī (Sirohi State) Inscription records the suicide of a Jain congregation by fasting in *saṁvat* 1389 (E. I. vol. XX., appendix p. 98 No. 691).

From the account of the death of Kalanos the Indian gymnosophist at 73 given by Megasthenes (Mc Crindle p. 106) we can gather that the practice of religious suicide prevailed long before the 4th century B. C. Strabo (XV. 1. 4) states that with the ambassadors that came to Augustus Cæsar from India also arrived an Indian gymnosophist who committed himself to the flames like Kalanos who exhibited the same spectacle before Alexander.

In the times of the purāṇas the method of starting on mahāprasthāna and suicide by entering fire or falling from a precipice came to be forbidden and was included in Kalivarjya.[2141]

It will be noticed that some of the duties and regulations prescribed for vānaprasthas are practically the same as those for sannyāsins. For example, the rules laid down in Manu VI. 25–29 for forest hermits are almost the same as those for *parivrājakas*[2142] (Manu VI. 38, 43, 44). The Āp. Dh. S. employs the same words twice in delineating the characteristics of both (II. 9. 21. 10 and 20). The order of hermits gradually leads on to or rather passes over into that of sannyāsins. Both have to observe celibacy and restraint of senses, both have to regulate the intake and quality of food, both have to contemplate on the passages of the Upaniṣads and strive for the knowledge of *Brahman*. There were no doubt some differences. The vānaprastha could be accompanied by his wife at least in the beginning, a sannyāsin could not be so. A vānaprastha had to keep fires, perform the daily and other yajñas at least in the beginning, the sannyāsin gave up his fires. The vānaprastha had to concentrate upon tapas, upon inuring himself to privations, severe austerities, and self-mortification, while the sannyāsin

was concerned principally with *saṁyama* (restraint or quiescence of senses) and contemplation of the highest Reality, as stated by Śaṁkarācārya on Vedāntasūtra III. 4. 20.[2143] Owing to the great similarity and virtual fusion of the two āśramas the stage of vānaprastha came to be gradually ignored and people passed from the householder's life directly to the life of sannyāsa. Govindasvāmī on Baud. Dh. S. III. 3. 14–17 remarks that the ācārya (Baudhāyana) should be asked why he describes the two orders of vānaprastha and sannyāsa as distinct.[2144] In course of time no one probably became a vānaprastha and therefore having recourse to the stage of vānaprastha came to be forbidden in the Kali age.[2145]

CHAPTER XXVIII

SANNYĀSA

Sannyāsa.—(the order of ascetics). That the Chān. Up. was well aware of the three āśramas of student-hood, house-holder and forest hermit has been shown above (p. 420). It is somewhat doubtful whether the Chān. Up. regarded sannyāsa as the fourth and the last stage in a man's life when ideally planned. It merely states that 'one that holds fast by the realization of *brahman* attains immortality'. But it appears that a stage of the abandonment of worldly riches, a life of begging and contemplation of the Absolute and its realization had been known to the earliest Upaniṣads like the Bṛhadāraṇyaka. Whether it was the fourth stage or whether it could be reached even in the stage of brahmacarya or of a house-holder is left in doubt so far as the older Upaniṣads are concerned. The Jābālopaniṣad (4) has been quoted above (p. 421) to show that it gave an option either to regard sannyāsa as the 4th stage in a man's life or to resort to it immediately after any of the first two *āśramas*.

In the Bṛ. Up. (II. 4. 1) we see that Yājñavalkya [2146] when about to become a *parivrājaka* (a wandering ascetic) tells his wife Maitreyī that he was going to leave home and that he wanted to divide whatever wealth he had between her and her co-wife Kātyāyanī. This shows that a *parivrājaka* had even then to leave home and wife and to give up all belongings. The same Upaniṣad in another place (III. 5. 1) states 'those who realize *Ātman* give up the hankering after progeny, possessions and heavenly worlds and practise the beggar's mode of life; therefore the brāhmaṇa, having completely mastered (and so risen beyond) mere learning, should seek to be like a child (i. e. should not make a parade of his latent capacities or knowledge) and having completed (gone beyond) knowledge and

2146. मैत्रेयीति होवाच याज्ञवल्क्य उद्यास्यन्वा अरेऽहमस्मात्स्थानादस्मि हन्त तेऽनया कात्यायन्याऽन्तं करवाणीति। बृह. उ. II. 4. 1; एतं वै तमात्मानं विदित्वा ब्राह्मणाः पुत्रैषणायाश्च वित्तैषणायाश्च लोकैषणायाश्च व्युत्थायाथ भिक्षाचर्यं चरन्ति। ... ... तस्माद् ब्राह्मणः पाण्डित्यं निर्विद्य बाल्येन तिष्ठासेत्। बाल्यं च पाण्डित्यं च निर्विद्याथ मुनिरमौनं च मौनं च निर्विद्याथ ब्राह्मणः। बृह. उ. III. 5. 1. Vide Vedāntasūtra III. 4. 47–49 and 50 for a discussion of this last passage.

bālya (child-like behaviour) he should attain to the position of a *muni*, and having risen beyond the stage of a *muni* or non-*muni*, should become a real brāhmaṇa (one who has realized *brahman*). Vide also Br. Up. IV. 4. 22 for similar words and sentiments. The Jābālopaniṣad (5)[2147] declares that the ascetic (*parivrāṭ*) wears discoloured (not white) garments, has a tonsured head, has no possessions, is pure, hates (or injures) no one, begs for alms and thereby tends to attain non-difference from *brahman*. In the Paramahaṁsa, the Brahma, the Nārada-parivrājaka, and the Sannyāsa Upaniṣads numerous rules are laid down about sannyāsa. But the antiquity and the authenticity of these Upaniṣads is extremely doubtful and therefore passing them over attention will be confined to the dharmasūtras and other ancient smṛtis.

Gaut. III. 10–24, Āp. Dh. S. II. 9. 21. 7–20, Baud. Dh. S. II. 6. 21–27 and II. 10, Vas. Dh. S. X., Manu VI. 33–86, Yāj. III. 56–66, Vaik. IX. 9, Viṣṇu Dh. S. 96, Śāntiparva chap. 246 and 279, Ādiparva chap. 119. 7–21 and Āśvamedhika 46. 18–46, Śaṅkha-smṛti (VII. in verse), Dakṣa VII. 28–38, Kūrmapurāṇa (Uttarārdha, chap. 28), Agnipurāṇa 161 and many other smṛtis and purāṇas dilate upon the characteristics and duties of ascetics (*yatidharma*). Some of the most salient features are set out below with a few references.

(1) In order to qualify himself for sannyāsa, a person had to perform a sacrifice to Prajāpati in which whatever he had he distributed to priests and the poor and the helpless (Manu VI. 38, Yāj. III. 56, Viṣṇu Dh. S. 96. 1, Śaṅkha VII. 1).[2148] The Yatidharmasaṅgraha (p. 13) prescribes that the Prājāpatyeṣṭi should be performed by him who had kept the three vedic fires and the iṣṭi to Agni should be performed by others who kept only the gṛhya fire. The Jābālopaniṣad 4 adds that the sacrifice should be for Agni (and not for Prajāpati as some hold). The

2147. अथ परिव्राड् विवर्णवासा मुण्डोऽपरिग्रहः शुचिरद्रोही भैक्षणो ब्रह्मभूयाय भवतीति । जाबालोपनिषद् 5, quoted by शङ्कराचार्य in his भाष्य on बृह. उ. III. 5. 1 as śruti.

2148. यस्यैतानि सुप्तुद्धानि जिह्वोपस्थोदरं शिरः । संन्यसेदकृतोद्वाहो ब्राह्मणो ब्रह्मचर्यवान् ॥ वृसिंहपुराण 58. 36. स्मृतिसु. (वर्णाश्रम) p. 173 quotes it as of व्यास and reads सुप्तुसानि, and करः for शिरः. अपरार्क p. 951 quotes this from वृसिंहपुराण but reads सुप्तुसानि and शिरः; बौधायनानुक्तं पुरश्चरणादिकं च कृत्वा तथाधीतवेदो जपपरायणो जातपुत्रो दीनान्धकृपणार्पितार्थो यथाशक्त्यजवृश्च भूत्वा ..... चतुर्थाश्रमं प्रविशेज्जाब्यथा । मिता० on या. III. 56–57.

Nṛsiṁhapurāṇa (60. 2-4) requires that before entering upon this order one should perform eight śrāddhas. The Nṛsiṁhapurāṇa 58. 36 allows every one who is a vedic student to become an ascetic if his tongue, his sexual emotions, his appetite for food and his speech are pure (i. e. under strict control). The eight śrāddhas are daiva (to Vasus, Rudras, Ādityas), ārṣa (to the ten sages viz. Marīci and others), divya (to Hiraṇyagarbha and Vairāja), mānuṣya (to Sanaka, Sanandana and five others), bhautika (to five bhūtas, pṛthvī &c.), paitṛka (to Kavyavād fire, Soma, Aryaman, pitṛs called Agniṣvātta &c.), mātṛśrāddha (to ten mātṛs such as Gaurī, Padmā), ātmaśrāddha (to Paramātman). Vide Yati-dh. p. 9 and Sm. M. p. 177. Manu is careful to point out (VI. 35-37) that a man should fix his mind on mokṣa after studying the Veda, procreating sons, performing sacrifices i. e. after discharging his debts to the sages, the pitṛs and gods. Baud. Dh. S. II. 10. 3-6 and Vaik. IX. 6 state that an householder who has no children or whose wife is dead or who has established his children in the path of dharma or who is over 70 may become an ascetic. Kauṭilya (II. 1) prescribes that if a person embraces the order of ascetics without making proper provision for his wife and sons he shall be punished with the first ammercement.[2149] He has to deposit his fires in himself and leave home (Manu VI. 38).

(2) After leaving home, wife, children and possessions, he should dwell outside the villages, should be homeless and stay under a tree or in an un-inhabited house wherever he may be when the sun sets and should always wander from place to place; but he may remain in one place only in the rainy season[2150] (Manu VI. 41, 43-44, Vas. Dh. S. X. 12-15, Śaṅkha VII. 6). Śaṅkha (quoted by the Mit. on Yāj. III. 58) allows him to stay in one place only for two months in the rains, while Kaṇva says that he may stay one night in a village and five in a town (except in the rains). When he follows the rule of staying four or two months in one place, he should do so from the full moon of Āṣāḍha or an ascetic may always stay on the banks of the Ganges.

2149. पुत्रदारमतिविधाय प्रव्रजतः पूर्वः साहसदण्डः स्त्रियं च प्रव्राजयतः। कौटिल्य II. 1.

2150. अनित्यो वसति यतेः। ग्रामान्ते देवगृहे शून्यागारे वा वृक्षमूले वा। अरण्यनित्यः। वसिष्ठ X. 12-13, 15; शून्यागारनिकेतः स्यादग्रसार्थगृहो मुनिः। शङ्ख VII. 6; the words यत्रसार्थगृहो मुनिः occur in वनपर्व 12. 11 also.

(3) He should always wander alone without a companion, as by so doing he will be free from attachments and the pangs of separation. Dakṣa (VII. 34–38) emphasizes this[2151] point very well 'the real ascetic always stays alone; if two stay together, they form a pair; if three stay together they are like a village and if more (than three stay together) then it becomes like a town. An ascetic should not form a pair or a village or a town; by so doing he swerves from his *dharma*, since (if two or more stay together) they begin to exchange news about the ruling prince, about the alms obtained and by close contact sentiments of affection, jealousy or wickedness arise between them. Bad ascetics engage in many activities viz. expounding (texts) for securing money or honour and also gathering pupils round them. There are only four proper actions for an ascetic and no fifth viz. contemplation, purity, begging, always staying alone'. Nārada says 'there are six acts which ascetics must do as if ordered by the king under the threat of a penalty viz. begging, *japa*, contemplation, bath (thrice daily), purity and worship of Śiva or Viṣṇu (quoted in Yati-dh. p. 62 and Sm. M. p. 188).[2151a]

(4) He should be celibate, should always be devoted to contemplation and spiritual knowledge and should be unattached to all objects of sense and pleasure (Manu VI. 41 and 49, Gaut. III. 11).

(5) He should move about avoiding all trouble or injury to creatures, should make all creatures safe with him, should bear with indifference all disrespect, should entertain no anger towards him who is furious with him, should utter benedictions over him also who runs him down, should never utter an untruth (Manu VI. 40, 47–48, Yāj. III. 61, Gaut. III. 23).

(6) He should neither kindle śrauta fires nor gṛhya fire nor even ordinary fire for cooking food and should subsist on

2151. a नारदवचनम्। भिक्षाटनं जपो ध्यानं स्नानं शौचं सुरार्चनम्। कर्तव्यानि षडेतानि यतीनां भूपदण्डवत्॥ quoted in यतिधर्मसंग्रह p. 62, as मेधातिथि's in स्मृतिह. p. 188.

food obtained by begging (Manu VI. 38 and 43, Āp. Dh. S. I. 9. 21. 10, Ādiparva 91. 12).

(7) He may enter a village for begging food only once a day, he should not ordinarily stay in a village at night (except in the rains) but if he stays at all he should do so only for one night (Gaut. III. 13 and 20, Manu VI. 43, 55).

(8) He should beg alms from seven houses without selecting them beforehand (Vas. Dh. S. X. 7, Śaṅkha VII. 3, Ādi. 119. 12 'five or ten houses'). Baud. Dh. S. (II. 10. 57–58) prescribes that he should visit for alms the houses of brāhmaṇa householders of the Śālīna and Yāyāvara types and should only wait for as much time as would be required for milking a cow. Baud. Dh. S. II. 10. 69 quotes the view of others that an ascetic may take alms from persons of all varṇas or food from only one among dvijātis; Vas. X. 24 also says that he should beg of brāhmaṇas only. The Vāyupurāṇa I. 18. 17 prescribes that ascetics should not eat food belonging to one man (but should eat food collected from several houses), or flesh or honey should not accept āmaśrāddha (i. e. śrāddha with uncooked food), should not use salt directly or by itself (i. e. they may eat vegetables in cooking which salt has been used). According to Uśanas (quoted in Sm. M. p. 200 and Yati-dh. pp. 74–75) food obtained by begging is of five kinds viz. *mādhukara* (collecting food from any three, five or seven houses at random just as bees collect honey from any flowers), *prākpraṇīta* (when a request is made by devotees to take food at their houses even before the ascetic gets up from his bed), *ayācita* (when invitation to take food at his house is given by a man before the ascetic starts on his begging round), *tātkālika* (the food that is announced by a brāhmaṇa the moment the ascetic approaches), *upapanna* (cooked food brought to the *maṭha* by devoted disciples or other people). Vas. Dh. S. X. 31 says that a brāhmaṇa ascetic should avoid food at śūdra houses and Aparārka p. 963 explains this as implying that in the absence of brāhmaṇa houses an ascetic may beg for food from kṣatriyas and vaiśyas. In later times begging alms from persons of all castes was forbidden, being included among *kalivarjya* actions ('yates tu sarva-varṇeṣu na bhikṣācaraṇam kalau'). Vide Sm. M. p. 201. It was stated by Parāśara and Kratu that no fault attaches to an ascetic if he being very old or very ill took food from a single person on a certain day or for several days or begged for food at the house of his sons,

friends, teacher or brothers or wife (vide Sm. M. p. 201, Yatidh. p. 75). According to Parāśara I. 51 and the Sūtasaṁhitā (Jñāna-yoga-khaṇḍa 4. 15–16) the first claim on the food oooked in the house is that of an ascetic and a brahmacārin and one has to perform the Cāndrāyaṇa penance for taking one's meals without giving alms to them. In giving food to an ascetic first water is poured on his hand, then food is given and then again water is poured on his hand (Parāśara I. 53 quoted by Haradatta on Gaut. V. 16). Vide Āp. Dh. S. II. 2. 4. 10 and Yāj. I. 107.

(9) He should go out for begging when the smoke from kitchens has ceased to rise and when the noise of pestles has died down and the live coals (in the kitchen) have been extinguished and the plates used for the dining (by the householders) have been kept aside i. e. he should beg food in the evening (Manu VI. 56, Yāj. III. 59, Vas. X. 8, Śaṅkha VII. 2). He should not take as alms honey or flesh (Vas. X. 24). He should not endeavour to secure alms by the practice of predicting, interpreting portents and omens or by the practice of describing the consequences indicated by them, nor by astrology nor by expounding the principles of a lore nor by casuistry (or discussion) nor should he approach a house that is already besieged by hermits, brāhmaṇas, birds and dogs, beggars or others (Manu VI. 50–51).

(10) He should not eat food to satiety, but should eat only as much as is necessary to keep body and soul together and should not feel delight when he gets substantial alms nor feel dejected when he gets little or nothing (Manu VI. 57 and 59, Vas. X. 21,22 and 25, Yāj. III. 59). There is a famous verse 'an ascetic should take only eight morsels of food, a forest hermit 16, a householder 32 and a vedic student an unlimited number' (Āp. Dh. S. II. 4. 9. 13, Baud. Dh. S. II. 10. 68).

(11) He should hoard nothing and he should own or possess nothing except his tattered garments, his water jar, begging bowl (Manu VI. 43–44, Gaut. III. 10, Vas. X. 6). Devala quoted by the Mit. on Yāj. III. 58 declares that the ascetic should possess only a water-jar, a pavitra (oloth for straining water), pādukās, an āsana and a kanthā (wallet for protection from extreme cold). The Mahābhārata states that wearing ochre-coloured garments, shaving the head, and keeping a water jar and three staffs—these are only outward signs meant

to secure food and do not lead to mokṣa[2151b] (dialogue of Janaka and Sulabhā). The Mahābhāṣya (vol. I. p. 365) also declares that a man is known to be a parivrājaka on seeing his three staffs. The Vāyupurāṇa I. 8 (quoted by Aparārka pp. 949–950) lays down what he should possess. He should take a staff of bamboo the outward surface of which is intact, which is not formidable and which has the *parvans* (the parts between the joints) of equal length, which is surrounded by a rope of cow's tail hair four aṅgulas in length and has three knots and which he holds in his right hand; he should have a śikya (loop on which to carry his jar or other things) made of kuśa or cotton or hemp threads or strings and of the form of a lotus and six muṣṭis (fists) in length; he should also have a water jar and a pātra (vessel or bowl for begging); he may have a seat (āsana) of wood square or round in size for sitting on or for washing his feet; he should have a loin-cloth to cover his private parts and a kanthā (patched garment or wallet) for protection against cold and he may have two pādukās (sandals). He should have only these and should not accumulate anything else.

(12) He should wear garments only for covering his private parts and may wear such garments as were worn by others and are used by him after washing (Gaut. III. 17–18), while Ap. Dh. S. (II. 9. 21. 11–12) states that he should wear clothes thrown away by others and that some say that he may be naked. Vas. (X. 9–11) says that he should cover his body with a piece of cloth (śāṭī) or with deer skin or with grass cut down for cows. Baud. Dh. S. II. 6. 24 requires that his garments should be ochre-coloured (quoted by Aparārka p. 962).

(13) The begging bowl and the plate from which the ascetic eats should be made of clay or wood or of a gourd, or of bamboo which should be without holes and he should not use metal vessels; and these vessels are to be cleaned with water and scoured with cow's hair (Manu VI. 53–54, Yāj. III. 60 and Laghu-Viṣṇu IV. 29–30).

(14) He should pare his nails, cut all his hair and beard (Manu VI. 52, Vas. Dh. S. X. 6); but Gaut. III. 21 appears to

---

2151 b. काषायधारणं मौण्ड्यं त्रिविष्टब्धं कमण्डलुम् । लिङ्गान्यत्राश्रमेतानि न मोक्षापेति मे मतिः ॥ quoted from the महाभारत in the वेदान्तकल्पतरुपरिमल p. 639 on वेदान्तसूत्र III. 4. 18; त्रिविष्टब्धकं च दृष्ट्वा परिव्राजक इति । महाभाष्य vol. I. p. 365 (on पा. II. 1. 1).

allow him an option viz. he may tonsure the whole head or keep only a top-knot.

(15) He should sleep on raised ground (sthaṇḍila), should feel no concern if he suffers from an illness, he should neither welcome death nor should he feel joy for continuing to live, but he should patiently wait till the time of death, as a servant waits till the time he is hired expires (Manu VI. 43 and 46).

(16) He should generally observe silence except when he repeats the Vedic texts learnt by him (Manu VI. 43, Gaut. III. 16, Baud. Dh. S. II. 10. 79, Āp. Dh. S. II. 9. 21. 10).[2152]

(17) He should be *tridaṇḍī* (carrying three staffs) according to Yāj. III. 58, while Manu VI. 52 simply says he should be *daṇḍī* (i. e. carrying a staff). The word *daṇḍa* is used in two senses, a staff of bamboo or restraint. Baud. Dh. S. II. 10. 53 gives an option that he may be *ekadaṇḍī* or a tridaṇḍī and also says that he should not cause harm to creatures by speech, actions and mind (II. 6. 25). Manu XII. 10, which is the same as Dakṣa (VII. 30), declares that that man is called tridaṇḍī who has restraint over his speech, mind and body. Dakṣa makes certain apt remarks 'Even gods who pre-eminently possess the *sattvaguṇa* are carried away by pleasures of sense; what of men? Therefore he who has given up his taste for pleasures should resort to daṇḍa; others cannot do it as they will be carried away by pleasures. An ascetic is not called *tridaṇḍī* by carrying bamboo staffs; he is *tridaṇḍī* who has the spiritual daṇḍa in him. Many people make their livelihood under the guise of (carrying) three daṇḍas' (VII. 27–31, quoted by Aparārka p. 953). Restraint of speech requires that he should observe silence, restraint of action that he should cause injury to no creature and restraint of mind that he should engage in prāṇāyāma and other yogic practices. Dakṣa himself says (I. 12–13) that the three staffs are the special outward sign of a yati as the girdle, deer-skin and staff are the outward signs of the vedic student or long nails and beard are *indicia* of the forest hermit. Laghu-Viṣṇu IV. 12 says he may be *ekadaṇḍī* or *tridaṇḍī*. The Jīvanamuktiviveka (p. 154)

2152. अनग्निरनिकेतः स्यादग्रमाक्षारणो मुनिः । स्वाध्याय एवोत्सृजमानो वाचं ग्रामे प्राणवृत्ति प्रतिलभ्यानिहोऽनमुत्रश्चरेत् । आप. ध. सू. II. 9. 21. 10; the words स्वाध्याय ..... वाचं are quoted by Saṁkara in his bhāṣya on Bṛ. Up. III. 5. 1.

quotes verses to the effect 'he who wields the staff of the knowledge of Reality is called ekadaṇḍī, while he who merely holds a stick in his hand without knowledge and eats everything (or has all sorts of desires) reaches terrible hells'.

(18) He should recite the vedic texts referring to yajñas or gods or texts of a metaphysical character found in the Vedānta (such as 'satyam jñānam-anantam brahma' in Tai. Up. 2. 1). Vide Manu VI. 83.

(19) He should walk after ascertaining with his eye that the ground he treads is pure, should drink water after passing it through a piece of cloth (in order to prevent ants &c. being taken in by him), he should utter words purified by truth and should do what his conscience (inner voice) decides to be right or proper (Manu VI. 46, Śaṅkha VII. 7, Viṣṇu Dh. S. 96. 14–17).

(20) In order to generate the feeling of *vairāgya* (desirelessness) and to curb his senses he should make his mind dwell upon the body as liable to disease and old age and as packed full of impurities; and should revolve in his mind the transitory nature of all mundane things, the trouble one has to undergo in body and mind from conception to death, the incessant round of births and deaths (Manu VI. 76–77, Yāj. III. 63–64, Viṣṇu Dh. S. 96. 25–42).

(21) Truthfulness, not depriving another of his possessions or his due, absence of wrath (even against one who harms), humility, purity (of body and food &c.), discrimination, steadiness of mind (in sorrow), quiescence (or restraint) of mind, restraint of senses, knowledge (of the self), these are the dharma of all varṇas (or these constitute the essence of dharma). And these have to be acquired most of all by the ascetic, since the outward signs, viz. the scanty clothing, the water jar &c. are not the real means of discharging the real duties of sannyāsa, as anyone can possess these outward signs. Vide Manu VI. 66, 92–94, Yāj. III. 65–66, Vas. X. 30, Baud. Dh. S. II. 10 55–56, Śānti. 111. 13–14, Vāyupurāṇa vol. I. 8. 176–178 (ten characteristics, five called vratas and five upavratas).

(22) He should endeavour to purify his mind by prāṇāyāma and other practices of yoga and thereby enable himself gradually to realize the Absolute and secure final release (Manu VI. 70–75, 81, Yāj. III. 62, 64).

In many works ascetics are divided into four classes. The Mahābhārata (Anuśāsana 141. 89) says that ascetics are

of four sorts, kuṭīcaka, bahūdaka, haṁsa and paramahaṁsa, each later one being superior to each preceding one.[2152a] Vaik. VIII. 9, Laghu-Viṣṇu IV. 14–23, Sūtasaṁhitā (Mānayoga khaṇḍa chap. 6), Bhikṣukopaniṣad, Prajāpati (quoted by Aparārka p. 952) define these four. They do not all agree. The kuṭīcaka, as the name itself implies, is one who resorts to sannyāsa in his own house or in a hut erected by his sons, begs food of his sons and relatives, wears the top-knot, the sacred thread, has the three staffs, carries a water-jar and stays in the same hut. The description of these four contained in Vaik.,[2153] being probably among the oldest available, is set out here. The kuṭīcakas stay in the hermitages of sages like Gautama, Bharadvāja, Yājñavalkya and Hārīta, take eight morsels of food every day, know the essence of the path of Yoga and hanker only after mokṣa (release). The bahūdakas have three staffs, the water-jar and wear garments dyed with ochre, beg for food at seven houses of sage-like brāhmaṇas or other well-conducted men but avoid taking flesh, salt and stale food. The haṁsas stay not more than one night in a village and not more than five nights in a town for alms or subsist on cow's urine or dung, or fast for a month or always perform the cāndrāyaṇa penance. Pitāmaha quoted in Sm. *M.* (varṇāśrama p. 184) states that the haṁsas carry only one daṇḍa, enter a village only for alms and otherwise stay under a tree or in a cave or on a river bank.

The Paramahaṁsas always stay under a tree or in an uninhabited house or in a burial place and either wear a garment or are naked; they are beyond the pairs of dharma and adharma, truth and falsehood, purity and impurity. They treat all alike, they regard all as the Self, to them a clod of earth or gold is the same and they beg alms from persons of all varṇas. The description in the Bhikṣukopaniṣad is almost in the same words

---

2152. a चतुर्विधा भिक्षवस्ते कुटीचकबहूदकौ । हंसः परमहंसश्च यो यः पश्चात्स उत्तमः ॥ अनुशासनपर्व 141. 89 quoted by अपरार्क p. 95 and कुल्लूक on मनु VI. 86. अग्निपुराण 161. 18 and Laghu-Viṣṇu 4. 11 are the same.

2153. तत्र कुटीचका गौतमभारद्वाजयाज्ञवल्क्यहारीतप्रभृतीनामाश्रमेष्वष्टौ ग्रासान्भ्यरन्तो योगमार्गतत्पराः मोक्षमेव प्रार्थयन्ते । बहूदकास्त्रिदण्डकमण्डलुकाषायधातुवस्त्रग्रहणवेषधारिणो ब्रह्मविद्गृहेषु चान्येषु साधुवृत्तेषु मांसलवणपर्युषितान्नं वर्जयन्तः सप्तागारेषु भैक्षं कृत्वा मोक्षमेव प्रार्थयन्ते । हंसा नाम ग्रामे चैकरात्रं नगरे पञ्चरात्रं वसन्तस्तदुपरि न वसन्तो गोमूत्रगोमयाहारिणो वा मासोपवासिनो वा नित्यचान्द्रायणव्रतिनो नित्यमुत्थानमेव प्रार्थयन्ते । परमहंसा नाम वृक्षैकमूले शून्यागारे श्मशाने वा वासिनः साम्बरा वा दिगम्बरा वा । न तेषां धर्माधर्मौ सत्यानृते शुद्धाशुद्धादि द्वैतम् । सर्वसमाः सर्वात्मानः समलोष्टकाञ्चनाः सर्ववर्णेषु भैक्षाचरणं कुर्वन्ति । वैखानससूत्र VIII. 9.

and also contains the words of the Jābālopaniṣad as to Paramahaṁsas. It appears that long before the Āp. Dh. S. (II. 9. 21. 13–17) i. e. at least five or six centuries before Christ there were people who thought that an ascetic was beyond all *vidhi* (injunctions to do a thing) and niṣedha (prohibition), that he was above the ordinary rules about truthfulness or falsehood, that he should not care for pleasure or pain or for the study of the Vedas, or for this world or the next, he should simply seek to realize the Self, that when he realizes the Self all his sins, if any, would be liquidated thereby. Āp. combats these ideas by saying that such sentiments were opposed to the śāstras laying down rules about ascetics, that by realizing the Self, he cannot be free from the effects of what he does or the consequences of having a body. The sentiments which Āp. controverts arose from such passages as the one[2154] in the Bṛ. Up. IV. 4. 23 'This is the eternal greatness of the man who realizes *brahma* that by the actions he does, he does not add to it or detract from it. Therefore one should only know the real nature of that greatness; he on knowing *brahma* is not affected by an evil action.' In the Kauṣītaki Bṛ. Up. III. 1 it is stated[2155] 'whoever realizes One (the Supreme Spirit), his worlds (i. e. his position) are not destroyed by any action of his, not even if he kills his parents, not even by theft nor by the murder of a learned brāhmaṇa.' These words are not to be taken literally, they are merely a boastful utterance (a prauḍhivāda), they are really laudatory statements emphasizing the supreme value of the realization of *brahman*. Similarly the Chān. Up. IV. 14. 3 says 'just as water does not stick to a lotus-leaf, so sinful actions do not cling to him who knows this'. In the same Upaniṣad (V. 2. 1) we read 'to him who knows this, nothing becomes unfit as food.' The Upaniṣads, however, generally lay great stress on moral virtues and emphasize that a high moral life is absolutely necessary for the seeker after spiritual truth. Vide Bṛ. Up. IV. 4. 23, Chān. Up. III. 14. 1, Kaṭha Up.

2154. एष नित्यो महिमा ब्राह्मणस्य न वर्धते कर्मणा नो कनीयान्। तस्यैव स्यात्पदवित्तं विदित्वा न लिप्यते कर्मणा पापकेन॥ इति। बृह. उ. IV. 4. 23, quoted in गौ. ध. सू. II. 6. 36 and II. 10. 7–9.

2155. स यो मां विजानीयान्नास्य केन च कर्मणा लोको मीयते न मातृवधेन न पितृवधेन न स्तेयेन न भ्रूणहत्यया। कौषी. उप. III.1; यथा पुष्करपलाश आपो न श्लिष्यन्त एवमेवंविदि पापं कर्म न श्लिष्यत इति। छा. उप. IV. 14. 3; न ह वा एवंविदि किंचनानन्नं भवतीति। छा. उप. V. 2. 1; न च नियोगाभावात्सम्यग्दर्शिनो यथेष्टचेष्टाप्रसङ्गः। सर्वत्राभिमानस्यैव प्रवर्तकत्वादभिमानाभावाच्च सम्यग्दर्शिनः। शाङ्करभाष्य on वेदान्तसूत्र II. 3. 48.

I. 2. 23, I. 3. 8–9 and 12. The position of the Vedāntasūtra (in III. 4.27-31) is that the seeker after eternal truth must be endowed with restraint of senses and quiescence of mind and he cannot act just as he pleases (ŚabdaścātoSkāmakāre) and spurn all rules of morality. Śaṁkarācārya on Vedānta-sūtra II. 3. 48 and other places makes this position perfectly clear. Viśvarūpa on Yāj. III. 66 states that even ascetics of the paramahaṁsa type are not allowed (by Yāj. and other sages) to behave as they please. The Par. M. (I. part 2, pp. 172–176) says that the paramahaṁsa should have only one daṇḍa and argues that paramahaṁsas are of two kinds viz. *vidvat* (those who have already realized *brahman*) and *vividiṣu* (those who are eager seekers after realization) and relies on Bṛ. Up. III. 5. 1 for the former and Bṛ. Up. IV. 4. 22 and Jābālopaniṣad for the latter. Yājñavalkya is an example of *vidvat-sannyāsa*, which leads to *jīvanmukti* (i. e. release even when the body still persists), while the latter (vividiṣā-sannyāsa) leads to release after the body is no more (i. e. videha-mukti). Vide Jīvan-muktiviveka p. 4 ff.

The Jābālopaniṣad[2156] (6) describes the state of paramahaṁsas at great length. They are sages like Saṁvartaka, Āruṇi, Śvetaketu, Durvāsas, Ṛbhu, Nidāgha, Jaḍabharata, Dattātreya, Raivataka; they do not exhibit any visible signs of their order or any visible rules of conduct; though they are really not mad they behave like one mad; they go out for alms only for keeping body and soul together; they are unaffected by acquisition or absence (of alms), they have no house but wander about and stay in a temple or on a heap of grass, on an ant-hill, or at the foot of a tree or on a river bank or in a cave, they have attachment for nothing, they are centred in contemplation of the One Spirit. According to Sūtasaṁhitā

2156. तत्र परमहंसा नाम संवर्तकारुणिश्वेतकेतुदुर्वास-ऋभुनिदाघजडभरतदत्तात्रेय-रैवतकप्रभृतयोऽव्यक्तलिङ्गा अव्यक्ताचारा अनुन्मत्ता उन्मत्तवदाचरन्तः ... ... प्राणसंधारणार्थं यथोक्तकाले विमुक्तो भैक्षमाचरन् ... ... लाभालाभयोः समो भूत्वा शून्यागारदेवगृहतृणकूटवल्मीकवृक्षमूल ..... स्थण्डिलेषु तेष्वनिकेतवास्यप्रयत्नो निर्ममः शुक्लध्यानपरायणो... अशुभकर्मनिर्मूलनपरः संन्यासेन देहत्यागं करोति स परमहंसो नाम । जाबालोपनिषद् 6. The story of संवर्तक who was a great Yogin and wandered about naked is found in आश्वमेधिकपर्व chap. 6 and Śaṁkara on V. S. III. 4. 37 also refers to that story. The words तत्र परमहंसा नाम ... ... रैवतकप्रभृतयः are quoted by सायण on तै. आ. II. 11 and अव्यक्त ... ... उन्मत्तवदाचरन्तः are almost like वसिष्ठ X. 18-19.

(II. 6. 3–10) it is only haṁsa and paramahaṁsa that give up śikhā and the sacred thread.

The Sannyāsopaniṣad (13) adds two more varieties to the four enumerated above viz. 'turīyātīta' and 'avadhūta' and defines them as follows: 'turīyātīta' (one who is beyond the 4th stage viz. of paramahaṁsa) eats only fruits in the way cows take food (i. e. he does not hold them in his hands), if he takes cooked food then only from three houses, he wears no cloth, his body only continues to live (but he is not conscious of that fact), he deals with his body as if it were dead. The avadhūta is beyond all restrictions, he takes food from all varṇas except those who are charged with mortal sins or are *patita* (outcasts) and eats like an ajagara (a *boa constrictor*) i. e. lying down and opening only his mouth without any effort and is solely absorbed in the contemplation of the real nature of the Spirit. Medhātithi[2157] (on Manu VI. 32) is quite emphatic that sannyāsa does not consist in defying all the rules of śāstra, but in giving up the sentiment of egoism and of possessiveness and that it is not true to say that for the sannyāsin all rules (even of morality) are non-existent.

One important question on which opinion was sharply divided is whether sannyāsa was allowed to all the three varṇas or only to brāhmaṇas. Those who held that it was allowed only to brāhmaṇas argued as follows: In the Bṛ.[2158] Up. IV. 4. 22 we find the words 'this Self brāhmaṇas seek to know by the study of the Veda'; similarly Bṛ. Up. III. 5. 1 states 'after knowing this Self, brāhmaṇas give up the hankering after progeny, wealth and heavenly worlds and practise begging' and Muṇḍaka I. 2. 12 'closely examining the worlds that are the rewards of actions, a brāhmaṇa should come to be disgusted &c.'. Here, the word 'brāhmaṇa' being used, *śruti* indicates that brāhmaṇas alone can be sannyāsins. Manu (VI. 38)

2157. अथाप्युच्येत कर्मसंन्यासिनो निवृत्तिमार्गावस्थायिनो नैव कोचिच्छास्त्रार्थविधयः सन्तीति । नायं शास्त्रार्थः । अहंकारममकारत्याग एव संन्यासो वक्ष्यते नाशेषशास्त्रार्थत्यागः । मेधा० on मनु VI. 32.

2158. तमेतं वेदानुवचनेन ब्राह्मणा विविदिषन्ति । बृह. उ. IV. 4. 22; एतं वै तमात्मानं विदित्वा ब्राह्मणाः ..... व्युत्थायाथ भिक्षाचर्यं चरन्ति । बृह. उ. III. 5. 1; परीक्ष्य लोकान् कर्मचितान् ब्राह्मणो निर्वेदमायान्नास्त्यकृतः कृतेन । मुण्डकोप. I. 2. 12. शङ्कर on बृह. उ. III. 5. 1 says 'ब्राह्मणानामेवाधिकारो व्युत्थाने अतो ब्राह्मणग्रहणम्' and on IV. 5. 15 (at end) says 'इतरवर्णापेक्षया वा यावज्जीवश्रुतिः । न हि क्षत्रिय-वैश्ययोः पारिव्राज्यप्रतिपत्तिरस्ति । तथा 'मन्त्रैर्वस्योदितो विधिः' 'ऐकाश्रम्यं त्वाचार्याः' इत्येवमादीनां क्षत्रियवैश्यापेक्षत्वम् ।'.

begins his description of the 4th stage with the words 'a brāhmaṇa should leave his house and go into the world as a wanderer' and winds up the chapter (VI. 97) by saying 'I have declared this fourfold procedure in relation to brāhmaṇas'. Laghu-Viṣṇu V. 13 emphatically states that the ascetic order is meant only for brāhmaṇas and the other three āśramas are meant for all dvijas. Those who assert that all the regenerate classes can resort to sannyāsa hold that the word 'brāhmaṇa' in the upaniṣads is used only as illustrative (*upalakṣaṇa*) and not in an exclusive sense and that a Sūtrakāra (Kātyāyana) expressly says [2159] 'the three varṇas after studying the Veda can pass through four āśramas'. The Jābālopaniṣad (4) ordains 'whether a man has fulfilled his *vratas* or not, whether he has performed samāvartana (the ceremonial bath after studying Veda) or not, whether his fires (Vedic) have ceased or not he should resort to the wandering ascetic's life the very day on which he feels disgust with mundane affairs'.[2160] It thus allows even a brahmacārī to become an ascetic; a kṣatriya and vaiśya could be a brahmacārī. Yāj. III. 32 states that sannyāsa is a means of purification (of the mind) in the case of twice-born classes. Besides the only condition precedent mentioned by the Jābālopaniṣad for resorting to pravrajyā (ascetic life) is *vairāgya* and whoever feels the latter is authorized to betake himself to that stage. Yāj. III. 61 while laying down the observances of ascetics employs the word 'dvijaḥ' and not 'brāhmaṇaḥ'. The Kūrma-purāṇa also says (Uttarārdha 28. 2) that a dvija should become an ascetic.

Both these opposing views are supported by the most famous authors. The first view that only brāhmaṇas can be sannyāsins is affirmed by the great Śaṁkarācārya in his bhāṣya on Bṛ. Up. III. 5. 1 and IV. 5. 15, It is most interesting and also very refreshing that Sureśvara [2161] in his Vārtika on Śaṁkara's

2159. त्रयाणां वर्णानां वेदमधीत्य चत्वार आश्रमा इति सूत्रकारवचनाच्च द्विजातिमात्रस्याधिकारमाहुः। मिता. on या. I. 56-57. The स्मृतिच० I. p. 65 states that the सूत्रकार is कात्यायन.

2160. पुनरव्रती वा व्रती वा स्नातको वाऽस्नातको वोत्सन्नाग्निको वा यदहरेव विरजेत्तदहरेव प्रव्रजेत्। जाबालोप. 4.

2161. त्रयाणामपि वर्णानां श्रुतौ संन्यासदर्शनात्। ब्राह्मणस्यैव संन्यास इति भाष्यं विरुध्यते॥ बृह. उ. भाष्यवार्तिक p. 758, v. 1651; त्रयाणामविशेषेण संन्यासः श्रूयते श्रुतौ। यद्दोपलक्षणार्थं स्याद् ब्राह्मणग्रहणं तदा॥ कर्माधिकारविच्छेदि ज्ञानं चेदभ्युपेयते। श्रुतोधिकारनियमो व्युत्थाने क्रियते बलात्॥ प्रत्यग्न्याथात्म्यविज्ञानस्वभावश्चेत्समर्थ्यते। व्युत्थानं यस्य यस्य स्यात्स स व्युत्थातुमर्हति। सुरेश्वरवार्तिक on बृह. उ. भाष्य (III. 5. 1); on the verse 'त्रयाणाम्', आनन्दगिरि remarks 'भाष्याभिप्रायमुक्त्वा स्वाभिप्रायेण ब्राह्मणग्रहणस्यार्थमाह.'

bhāṣya on Bṛ. Up. III. 5. 1 first explains the views of his guru, then enters the lists against his great master and combats his views with cogent arguments. Most of the medieval writers and works such as Medhātithi on Manu (VI. 97), the Mit., the Madanapārijāta (pp. 365–373), the Smṛtimuktāphala (Varṇāśrama p. 176) uphold the view that only brāhmaṇas can resort to the 4th āśrama, while a few works like the Smṛticandrikā (I. p. 65) support the second view. The position of Viśvarūpa[2162] (on Yāj. III. 61) that only brāhmaṇas can resort to sannyāsa causes great perplexity. Sureśvara and Viśvarūpa are generally regarded as identical (vide H. D. vol. I. pp. 261–263 and Journal of the Andhra Historical Society for 1931, vol. V, p. 187). But Sureśvara holds the view that the word brāhmaṇa in the relevant texts is only illustrative. Therefore it follows that either Sureśvara changes his views or that Sureśvara and Viśvarūpa are not identical. Ānandagiri in his commentary on Sureśvara's Vārtika (p. 759) cites passages from the Mahābhārata (Ādi. 119) to establish that kṣatriyas could resort to sannyāsa.[2163] Śāntiparva (63. 16-21) allows sannyāsa to kings when their life is about to end. But the general words of Śānti 62. 2 appear to be in conflict with this.[2164] Kālidāsa states that Raghu became a *yati* when he grew old, installed his son on the throne and stayed in a cottage outside the capital and draws a very poetic and striking picture of the contrast between the old king turned ascetic and the prince become king (Raghu-vaṁśa VIII. 14 and 16).

So far as the smṛti texts and the medieval works are concerned a śūdra could not become a sannyāsin. The Śāntiparva (63. 11–14) is quite clear that a śūdra cannot be a bhikṣu. It also (18. 32)[2165] informs us that in its day many (probably

including śūdras) assumed the outward signs of the 4th āśrama, got their heads tonsured and moved about in ochre-coloured garments (kāṣāya) for securing alms and gifts. But there are clear indications that śūdras did assume even in the times of ancient smṛtis the ascetic's garb and mode of life. The Viṣṇu Dh. S. V. 115 and Yāj. II. 241 (as read by Viśvarūpa) prescribe the fine of one hundred *paṇas* for one who gave a dinner to śūdra ascetics in rites for gods and the manes. When the Āśramavāsika-parva 26. 33 states that Vidura was buried as an ascetic, the commentator Nīlakaṇṭha remarks that this indicates that even śūdras can follow the mode of the ascetic life.[2165a]

It appears that even women could in rare cases adopt the ascetic's life in ancient brāhmaṇic times. The Mit. on Yāj. III. 58 quotes a sūtra of Baud. (strīṇām caike) to the effect that according to some ācāryas even women could adopt the ascetic mode of life. Patañjali in his Mahābhāṣya (vol. II. p. 100) speaks of a woman ascetic (parivrājikā) named Śaṅkarā. Yama quoted in the Sm. C. (on vyavahāra p. 254) declares ' neither in the Vedas nor in the dharmaśāstras is pravrajyā enjoined for women ; (procreation and care of) progeny from a male of the same varṇa as herself is her proper *dharma*, this is the established rule.' [2166] The Sm. C. gives in a far-fetched way absence of sexual intercourse as the meaning of pravrajyā here. Atri (136–137) lays down that six actions by women and śūdras lead to sinfulness viz. japa, tapas (austerities), pravrajyā (ascetic's life), pilgrimages, endeavour to secure miraculous power by repeating spells, sole devotion to the worship of a goddess.[2167] In the drama called Mālavikāgnimitra Kālidāsa describes the Paṇḍitā Kauśikī as wearing the garb of an ascetic (in I. 14). It must be said that the general trend of Hinduism is against women adopting the homeless or ascetic life. The Jātakas (e. g. IV. 392) rarely speak of cāṇḍālas as adopting the homeless condition.

2165. a भो भो राजन्न दृश्यन्यमेतद्बिदुरसंज्ञकम् । कलेवरमिदैवं ते धर्म एष सनातनः॥ लोकाः सान्तानिका नाम भविष्यन्त्यस्य भारत । यतिधर्मसमाप्तोसौ नैष शोच्यः परंतप॥ आश्रमवासिक 26. 32–33; शूद्रयोनौ जातानामपि यतिधर्मोस्तीति दर्शितम् । नीलकण्ठ.

2166. यत्तु यमेनोक्तं स्त्रियाः श्रुतौ वा शास्त्रे वा प्रव्रज्या न विधीयते । प्रजा हि तस्याः स्वो धर्मः सवर्णादिति धारणा॥ ..... प्रव्रज्या ब्रह्मचर्यमित्यर्थः । स्मृतिश्च. (व्यवहार p. 254).

2167. अतःपरं प्रवक्ष्यामि स्त्रीशूद्रपतनानि च । जपस्तपस्तीर्थयात्रा प्रव्रज्या मन्त्रसाधनम् । देवताराधनं चैव स्त्रीशूद्रपतनानि षट् । अत्रि 136–137.

When the question is asked whether śūdras or women could resort to sannyāsa there is likely to be some confusion. The word 'sannyāsa' conveys two ideas: abandonment of all actions (kāmya karma) that spring from the desire to secure some object or other and secondly, following a certain mode of life (āśrama) the outward signs of which are carrying a staff and the like and the entrance into which is preceded by the utterance of the *praiṣa*. The Jīvan-muktiviveka[2168] (p. 3) states that mokṣa (amṛtatva) depends upon *tyāga* (abandonment) as stated in the Kaivalyopaniṣad (2) 'not by actions, nor by progeny nor by wealth, but by *tyāga* some attained *mokṣa*' (release). For such abandonment even women and śūdras are eligible, the best example of a woman giving up everything being that of Maitreyī, the wife of Yājñavalkya, who plainly told the sage (Bṛ. Up. IV. 5. 3–4), 'what have I to do with that which will not make me immortal (will not release me from *saṁsāra*)?' The Bhagavad-gītā (18. 2) also declares that sannyāsa means the giving up of actions springing from desires (to secure certain objects). The Jīvan-muktiviveka further states that by resorting to the āśrama of sannyāsa the mother and the wife of a sannyāsin are supposed not to be born again as women (but they may be born as men). So women and śūdras may abandon all actions, though they could not adopt the peculiar ascetic mode of life with its outward symbols. According to Śrīkara's bhāṣya on Vedāntasūtra I. 3. 34 the order of sannyāsa, the peculiar rules of which are recommended by Vedic texts, is only for the three varṇas, while mere nyāsa (abandonment of worldly pleasures and desires) can be resorted to by women, śūdras and mixed castes.[2169]

Some espoused the view that *sannyāsa* was meant only for the blind, the cripple and the impotent, that is, for persons who possessed no eligibility (*adhikāra*) for the performance of

2169. ब्रह्मक्षत्रियवैश्यानां श्रौतसंन्यास इष्यते । शूद्रस्त्रीसङ्कराणां च न्यासमश्रौतसंज्ञिकम् । शिखासूत्रैकसंयुक्तं दण्डकाषायलाञ्छनम् । श्रौतसंन्यास इत्युक्तं न्यासस्य वचनं यथा ॥ श्रौताश्रौतविभेदेन संन्यासं द्विविधं स्मृतम् । कन्थाकाषायदण्डैकशिखासूत्रादिसंयुतम् । श्रौतसंन्यासमित्युक्तं साक्षान्मोक्षैकसाधनम् । quoted by शंकर in भाष्य on वेदान्तसूत्र III. 4. 22 (भावशब्दाच्च).

Vedic rites. Śaṁkarācārya in his bhāṣya on V. S. III. 4. 20 refutes the view that the passage of the Jābālopaniṣad (4) cited above relates to those who are not eligible for performing Vedic rites and establishes that that passage has in view the general prescription that there is a stage of life called pārivrājya (sannyāsa) meant for all that seek release from *saṁsāra*. Sureśvara in his Vārtika on Śaṁkara's Bṛ. Up. bhāṣya (p. 1908 v. 1144) also refutes the view.[2170] Medhātithi on Manu VI. 36 rejects this view (of some) by saying that the blind or cripple cannot follow the rules and practices (such as not staying in one village for more than one night) just as they cannot perform Vedic rites and hence it could not have been intended by the smṛti writers that sannyāsa was only for the blind and the cripple, nor can the impotent take to sannyāsa as no upanayana is performed in their case. The Mit. on Yāj. III. 56 follows Medhātithi. The Sm. Mu. (p. 173) and Yati-dh. (pp. 5–6) quote verses to the effect that 'the son of an apostate from sannyāsa, one having bad nails or black teeth, one emaciated by phthisis, one devoid of a limb–these do not deserve to resort to sannyāsa. Similarly those who are guilty of mortal sins or are suspected of them or are *vrātyas*, those who have left the path of truth, purity, sacrifices, *vratas*, tapas, charity, study of the Veda and homa should not be allowed to take up the ascetic life'.

One of the principal rules for a *yati* was that he was to leave wife and home and never to think of sexual matters or to revert to the life of a house-holder. Atri[2171] (VIII. 16 and 18) declares 'I see no penance (expiation) for that twice-born man, who, after having resorted to the duties of a celibate (sannyāsin), falls off from that stage; he is neither a dvija nor a śūdra, his children become cāṇḍālas called Vidūra'. Saṁkara on V.S. (III. 4. 42) explains that these words are only intended to emphasize the great effort required to remain celibate as a sannyāsin and that expiations are as a matter of fact prescribed for a *bhikṣu* having sexual intercourse. Dakṣa VII. 33 requires the king to brand on the forehead with the mark of

2170. काणकुण्ठादिविषये यत्तु कैश्चित्प्रकल्प्यते । पारिव्राज्यं न तद्युक्तमनहङ्डेय-कपतः । बृह. उ. भाष्यवार्तिक p. 1908 verse 1144.

2171. आरूढो नैष्ठिकं धर्मं यस्तु प्रच्यवते द्विजः । प्रायश्चित्तं न पश्यामि येन शुध्येत्स आत्महा ॥ ..... ये च प्रव्रजितापत्या या चैषां बीजसन्ततिः । विदूरा नाम चाण्डाला जायन्ते नात्र संशयः ॥ अत्रि VIII. 16 and 18. The first is quoted by शङ्कर on वेदान्तसूत्र III. 4. 41.

dog's foot and banish from the kingdom a person who after becoming a sannyāsin does not abide by its rules (of celibacy &c.). It has been seen above that a man who falls away from the order of sannyāsins became a slave of the king for life (p. 185). Atri requires a sannyāsin not to stay even for a day in the place where live his father and mother, brother and sister, wife or son or daughter-in-law, his agnates or cognates or friends, or his daughter or her sons (Sm. Mu. p. 206).

Originally these injunctions about complete restraint and abandonment of sexual life and total lack of property were faithfully followed by ascetics. The great ācārya Śaṁkara was a celibate all his life, but he is said to have established four *maṭhas* as stated above (p. 907) for the propagation of his doctrines and philosophy at Śṛṅgapura (modern Śṛṅgerī) and other places. Pious devotees bestowed considerable donations on these *maṭhas*. In course of time these *maṭhas* went on increasing and huge properties came to be under the control of the pontiffs of these several maṭhas. There arose ten orders of *advaita* sannyāsins alone [2172] viz. tīrtha, āśrama, vana, araṇya, giri, parvata, sāgara, sarasvatī, bhāratī and purī. These ten orders are said to be the pupils in succession of the four disciples of Śaṁkara i. e. the first two of Padmapāda, the next two of Hastāmalaka, the next three of Troṭaka (or Toṭaka) and the last three of Sureśvara. The several maṭhas at Śṛṅgerī, Kāñcī, Kumbhakoṇam, Kuḍalgi, Saṅkeśvara, Śivagaṅgā have been quarrelling among themselves as to their jurisdictions [2173] and their rights to claim monetary payments from the people and to exercise spiritual authority in matters of expiations, excommunication &c. To support the claims of the various *maṭhas* pedigrees of

2172. योगपट्टं च द्रातव्यं वेदान्ताभ्यासतः परम् । ततो नाम प्रकर्तव्यं गुरुणा सर्वसंमतम् ॥ तीर्थाश्रमवनारण्यगिरिपर्वतसागराः । सरस्वती भारती च पुरी नाम यतेर्दश । श्रीपाद-संज्ञया वाक्यं (वाक्यं ?) नाम तस्य यथातथम् । अद्यारभ्य त्वया कार्यं दीक्षाद्याख्यादिकं सदा । योगपट्टोपि दातव्यः शिष्ये सम्यक् परीक्षिते । quoted in स्मृतिमु. (वर्णाश्रम) p. 182 and यतिध. सं. p. 103. Vide Wilson's 'Religious Sects of the Hindus' in Works vol. I. (1861) p. 202, Dr. Farquhar's 'Outlines of the Religious Literature of India' (1920) p. 174 for the *dasnamis* (the ten appellations of advaita orders).

2173. Vide Rajvade, Khaṇḍa 21 (in Marathi) letter No. 190 at p. 240, dated *śake* 1763 where the claim is made by the Karavīra maṭha that its jurisdiction extends from the river Malāpahārī towards the north and that the Śṛṅgerī maṭha has no jurisdiction in that area.

teachers [2174] and pupils appear to have been fabricated, no two of which agree *in toto* and in some of them Sureśvara is said to have lived for 700 or 800 years. The disciples of Rāmānuja and Madhva also have many *maṭhas* of their own. Vallabhācārya (one of the great ācāryas that interpreted the Vedānta-sūtras) and his disciples do not accept the order of sannyāsa. According to them in the Kali age sannyāsa is forbidden for the seeker as it leads on to regret and worry [2174a] (if its rules are to be strictly observed) and that the *parityāga* (abandonment) that is the essence of sannyāsa does not consist in resorting to the 4th āśrama but in behaving in the way in which bhaktas (devotees) like Uddhava acted (vide Bhāgavata III. 4). Most of these maṭhas have large endowments or incomes which are spent in pomp and show (e. g. keeping golden images and paraphernalia). Very few of the heads are really learned even in ancient Sanskrit Literature in all its branches, they are impervious to modern tendencies and requirements, are obscurantists and generally oppose all ideas of reform. Only a very few maṭhas are presided over by persons who have been celibate throughout their lives. Most of them originally were householders and then took to sannyāsa. Besides the succession to the *gādi* is often a hole and corner affair. When the incumbent is about to die the influential and intriguing persons round him catch hold of some aspiring householder, make him a disciple of the dying sannyāsin and afterwards he is installed as the pontiff.

2174. Wilson's 'Religious Sects of the Hindus' vol. 1, p. 201 (for 29 ācāryas of Śṛṅgerī from Govinda, the teacher of Śaṁkara, to the present day; J. B. B. R. A. S. vol. X. pp. 373–74 for 56 occupants of the Śṛṅgeri *gādi* from Śaṁkara; and 'Shankaracharya and his school' (1923) by the late Mr. M. R. Bodas, which last (in Marathi) is a very valuable work, containing lists of pontifical succession of five maṭhas (pp. 91–103) and also the Maṭhāmnyāsetu (in Sanskrit) mentioning the several maṭhas, their traditions, mottoes &c.

2174 a. वल्लभाचार्य in his संन्यासनिर्णय, (published by M. T. Telivala in 1918 with eight commentaries) states 'अतः कलौ स संन्यासः पश्चात्तापाय नान्यथा। पाण्डित्यं भवेज्ञापि तस्माज्ज्ञाने न संन्यसेत् ॥ 16; तस्माद्युक्तप्रकारेण परित्यागो विधीयताम्। अन्यथा भ्रश्यते स्वार्थादिति मे निश्चिता मतिः ॥ 21'. पुरुषोत्तम in his oom. (called विवरण) on verse 16 remarks that *bhaktas* (those who follow the path of *bhakti*, devotion to Kṛṣṇa) should resort to renunciation (*parityāga*) in the way which Lord Kṛṣṇa ordered his great devotee Uddhava to follow (vide Bhāgavata III. 4. 20–21) and not by way of sannyāsa taught by those who follow the path of knowledge 'यस्माद्विधिवासंन्यासस्य कलौ खेदाद्विजनकत्वं विद्वत्संन्यासस्य चासम्भवस्तस्माद् ज्ञानमार्गे वैधं संन्यासं न कुर्यात्।'

He retains his attachment to his former family and uses a good deal of the income for his relatives and friends. Real reform of the *maṭhas* cannot come unless great improvements are made in selecting a successor. There must be several disciples, the selection must not be made on the incumbent's death-bed, representative bodies must have a voice in the selection. The heads of ascetic maṭhas have often come to the courts on questions about dignity, jurisdiction and properties. For example, in 3 Moore's Indian Appeals p. 198 the Śṛṅgerī Pontiff claimed a declaration that he alone was entitled to proceed on the public road in a palanquin crosswise and for an injunction restraining the *Swami* of the Lingayats from doing so; in *Madhusudan Parvat v. Shree Madhav Teertha*, 33 Bom. 278, the Śaṁkarācārya of the Śāradā maṭha at Dwarka sued for a declaration that the defendant was not entitled to the title and dignities of a Śaṁkarācārya and that he was not entitled to call for or receive any offerings from people at Ahmedabad or other places in Gujarat either in his assumed capacity of a Śaṁkarācārya or as a Śaṁkarācārya of the Jyotir-maṭha (this claim was also rejected on the grounds that the suit was not of a civil nature and that the offerings were voluntary).

In *Vidya Shankara v. Vidya Narsimha*, 51 Bom. 442 (P. C.) the Privy Council had to deal with a pretty tangle of claims between four persons, the plaintiff and the defendant each claiming to be the lawful Śaṁkarācārya of Sankeshwar and Karvir maṭha and both having selected a disciple to succeed them. These illustrations indicate how the world-renouncing ideal of conduct set forth by the great Śaṁkarācārya is honoured in modern times by those who swear by his name. They should lay to heart the words of the Jīvanmuktiviveka and the quotation in it from Medhātithi (pp. 158–159) [2175] viz. 'if an ascetic secures a maṭha as a fixed place of residence and thereon a sentiment of ownership arises in him his mind will be disturbed when loss or expansion of the maṭha takes place; therefore an ascetic should not possess a maṭha nor should he have vessels of gold or silver for his use nor should he gather pupils round

2175. यदि नियतवासार्थं कंचिन्मठं संपादयेत्तदानीं तस्मिन्ममत्वे सति तदीपहानिवृद्ध्योश्चित्तं विक्षिप्येत । ... ... यथा मठो न परिग्रहीतव्यस्तथा सौवर्णराजतादीनां भिक्षाचमनाद्यिपात्राणामेकमपि न गृह्णीयात् । ... ... मेधातिथिरपि । आसनं पात्रलोपश्च संयमः शिष्यसंग्रहः । द्विधास्तापो वृथालापो पतेर्बन्धकराणि षट् ॥ ... ... क्षुद्भयालाभपूजार्थं यशोर्थं वा परिग्रहः ॥ शिष्याणां न तु कार्पण्यात्स ज्ञेयः शिष्यसंग्रहः ॥ जीवन्मुक्तिविवेक pp. 158–159.

himself for securing service from them or in order that they may honour him, spread his fame, or bring money to him, but he may gather disciples only for removing their ignorance.'

In J. R. A. S. for 1925 pp. 479-486 Dr. J. N. Farquhar contributes a very learned article on the organization of the sannyāsins of the Vedānta. Therein he shows how Moslem armed *fakirs* molested and even killed Hindu ascetics, how Madhusūdana Sarasvatī approached the Emperor Akbar, how failing to get complete redress he initiated kṣatriyas and vaiśyas into seven out of the ten orders of sannyāsins and armed them, how these sannyāsins fought against the moslem fakirs and also among themselves, how even non-brahmin women are initiated into the *giri* and *purī* orders and how in Northern India the pure monastic orders are those of tīrtha, āśrama and sarasvatī. This innovation later on led to serious consequences. The sannyāsins and fakirs infested the province of Bengal and their incursions and depredations caused great alarm in the first days of the British rule (latter half of the 18th century [2176]). This shows how the rule of *ahiṁsā* enjoined upon ascetics became perverted. Various estimates have been made about the number of persons in India professing to lead the ascetic life. They could easily have been 10 per cent of the population, particularly in Northern India. They generally led very indolent, parasitic and dissolute lives. There are however, reasons to believe that in recent times the number of so-called sannyāsins is being substantially reduced owing to several causes. There have been swarms of monks and nuns in Christian countries also. Before the suppression of the monasteries by Henry VIII in England about 400 years ago, the number of monks, nuns and persons dependent on them was enormously large. Vide 'English monks' by Geoffrey Baskerville, p. 285, (f. n. 2) where the figures of monks and nuns in England, France and Spain at various periods are given.

According to both ancient and modern Hindu Law, when a man became a sannyāsin, he became cut off from his family and lost all his rights to property, partition and inheritance in that family. Vas. Dh. S. 17. 52 lays down that those who resort to another āśrama (i. e. vānaprastha or sannyāsa) are excluded

2176. Vide 'Sannyasi and Fakir raiders in Bengal' by Rai Saheb Jamini Mohan Ghosh (1930) for a detailed and interesting account.

from their share (in the family property).[2177] This result, however, does not follow by merely wearing the garments of a sannyāsin, but in order that this result may follow a person must have performed the necessary ceremonies for entering the order of sannyāsins. On the other hand whatever belongs to a sannyāsin such as his clothes, his sandals, his books would not devolve on his blood relations as heirs but will go to his spiritual heir (viz. his pupil). Vide Yāj. II. 137 and the Mit. thereon. These rules, however, do not apply to a śūdra turning an ascetic. He does not become severed from his family by entering the order of asceticism, unless a usage to that effect is established. Vide *Somasundaram v. Vaithilinga*, 40 Mad. 846 (at p. 869), *Harishchandra v. Atir Muhmud*, 40 Cal. 545.

The most serious inroad, however, on the ideal of sannyāsa was made when people professing to be ascetics were allowed to have wives or concubines. The Vāyupurāṇa (quoted in the Yati-dharmasaṅgraha p. 108) invokes dire consequences on him who after becoming a sannyāsin has sexual intercourse, viz. he becomes a worm in ordure for 60,000 years, passes through the lives of a rat, a vulture, a dog, a donkey, a pig, a tree without flowers and fruit, a goblin and then he is born as a cāṇḍāla. The Rājataraṅgiṇī (III. 12) records[2178] that when the queen of Meghavāhana built a monastery she established in a portion of it ascetics who followed the rules of conduct laid down for their order and in the other portion ascetics, who were condemnable because of their acting like householders, together with their wives, sons, cattle and wealth. In the Presidency of Bombay several cases have come before the courts about the rights of succession to Gharbhari Gosavis[2179] (i. e. ascetics who have a house and family). Vide *Gosain Rambharti v. Mahant Surajbharti*, 5 Bom. 682 (where it was held that a Gosavi who succeeded as a disciple to a mohunt did not forfeit his rights by subsequent marriage), *Balgir v. Dhondgir*, 5 Bom. L. R. 114, *Gitabai v. Shivbakas*, 5 Bom. L. R. 318, *Hirabharthi v. Bai Javer*, 30 Bom. L. R. 1555.

2178. अर्धे यत्क्षिप्तः शिक्षाचारास्तत्रापितास्तया । अर्धे गार्हस्थ्यगर्ह्यांश्च सक्षीपुत्रपशुश्रियः ॥ राजतरङ्गिणी III. 12.

2179. Vide Steele's 'Law and oustoms of Hindu castes,' Appendix B on pp. 444–446 'Gharbaree Gosavies' by Mr. Warden.

In the Gupta Inscriptions we have several records of a line of kings who were the feudatories of the imperial Guptas and who bear the appellation 'nṛpati-parivrājaka' (kingly ascetics). Fleet thinks (p. 95 n. 1) that the word means no more than what is conveyed by such words as 'rājarṣi', but this is unconvincing. Their gotra was Bharadvāja and the founder is said to have been an incarnation of Kapila (p. 115). It is likely that the founder, after being a king, ultimately became a sannyāsin and his descendants (in the fashion poetically described by Kālidāsa) also became ascetics after adorning the throne for some time. Hence they probably came to be called nṛpati-parivrājakas. It is interesting to note that Vyāsa quoted in Sm. M. (p. 176) and Yati-dh. (pp 2-3) forbade sannyāsa in the Kali age, though he made an exception to this extent that as long as the division of society into varṇas existed and as long as the Veda was studied so long sannyāsa could be resorted to in the Kali age.[2180] Nāgeśa in his Vrātyatāprāyaścitta-nirṇaya (p. 46) makes the curious statement that according to the Sannyāsa-paddhati of Vyāsa a wise brāhmaṇa should not resort to sannyāsa when 4400 years of the Kali age will have expired (i. e. after 1299 A. D.).[2181] This dictum was probably due not only to the difficulties of observing to the letter the code of life sketched for sannyāsins, but also to the fact that about 1299, the whole of India was being harassed by Moslem invaders and adventurers who made the helpless sannyāsins the first target for their fanatic zeal and persecution. The Nirṇaya-sindhu (III, pūrvārdha, end) quotes the above verse of Vyāsa and remarks that this prohibition of sannyāsa is meant to apply to sannyāsa with three daṇḍas.

The Baud. Dh. S. II. 10. 11-30, the Baud. gṛ. śeṣasūtra IV. 16, the Vaik. IX. 6-8 contain the procedure of becoming a sannyāsin. That of the Baud. Dh. S. being probably the most

2180. व्यासः। अग्न्याधेयं गवालम्भं संन्यासं पलपैतृकम्। देवरेण सुतोत्पत्तिं कलौ पञ्च विवर्जयेत्॥ इति। तस्यापवादमाह स एव। यावद्वर्णविभागोऽस्ति यावद्वेदः प्रवर्तते। तावन्न्यासोऽग्निहोत्रं च कर्तव्यं तु कलौ युगे॥ इति। स्मृतिमु. p. 176 (वर्णाश्रम); यतिधर्मसंग्रह pp. 2-3.

2181. चत्वार्यब्दसहस्राणि चत्वार्यब्दशतानि च। कलेर्यदा गमिष्यन्ति तदा त्रेतापरिग्रहः। संन्यासश्च न कर्तव्यो ब्राह्मणेन विजानता। संन्यासपद्धति of व्यास quoted in नागेश's व्रात्यताप्रायश्चित्तनिर्णय p. 46; also in निर्णयसिन्धु III. पूर्वार्ध end.

ancient among extant works is briefly set out below:[2182] After having cut the hair on the head, the beard, the hair on the body, the nails, he makes ready three sticks, a loop of strings, (a piece of cloth as) a water strainer, a jar and a bowl. Having taken these he should go to the end of his village, or to the extremity of the boundary of his village, or the fire-hall; he should partake of clarified butter, milk and curds (mixed together) and should fast or drink water. Then he should recite the vyāhṛtis separately preceded by 'om' and followed by the words 'I enter the Sāvitrī' and by one *pāda* of the sacred Gāyatrī and then all together.[2183] Before sunset, he heaps fuel on the gārhapatya fire (if he has maintained Vedic fires), brings the anvāhāryapacana (dakṣiṇāgni) to the spot, takes the flaming āhavanīya fire out of the gārhapatya, melts clarified butter on the gārhapatya, cleanses it (with blades of kuśa), takes four portions of the butter in the spoon called '*sruc*' and offers in the āhavanīya fire on which fuel-sticks have been heaped a full oblation (i. e. whole spoonful) four times saying 'om svāhā'. This is called Brahmānvādhāna (putting fuel-sticks on fire for securing knowledge of *brahman*). Then in the evening after agnihotra has been offered, he strews grass to the north of the gārhapatya fire, places on the grass sacrificial vessels in pairs with the upper parts turned downwards, spreads darbha grass to the south of the āhavanīya fire on the seat meant for the brahmā priest, covers it with black antelope skin and remains awake the whole of that night. Then he rises at the time (muhūrta) sacred to Brahmā and offers agnihotra in the early morning at the proper time. Then after covering the part of the altar called pṛṣṭhyā and bringing water he prepares an offering for Agni Vaiśvānara cooked on twelve pot-sherds. That well-known iṣṭi will be the last he will perform. Afterwards, he throws in the āhavanīya fire those sacrificial vessels which are not made of stone or earth. And throwing the two araṇis (the wooden logs by the friction of which fire was

---

2182. The central ideas of the ceremony are the renunciation of all worldly ties, contempt of the world and all earthly riches, a life of ahiṁsā and contemplation on and realization of the Absolute Brahman. The summary is close to the original, only omitting a few quotations, a few repetitions and some matters that have already been dealt with.

2183. He will say 'ओं भूः सावित्रीं प्रविशामि तत्सवितुर्वरेण्यम्, ओं भुवः सावित्रीं प्रविशामि भर्गो ..... महि। ओं स्वः सा ..... शामि धियो ..... यात् and lastly ओं भूर्भुवः स्वः सावित्रीं प्रविशामि तत्स ..... यात्. Vide बौ. ध. सू. II. 10. 14–17. This is called सावित्रीप्रवेश.

produced for vedic rites) into the gārhapatya fire with the words 'may you two be of one mind with us' he (mentally) deposits the three fires in himself. Repeating the mantra 'yā te agne yajñiyā tanūr' (Tai. S. III. 4. 10. 5) he inhales the smell of the smoke of each of the three fires thrice. Then standing within the sacrificial enclosure he says thrice in a low voice and thrice aloud the words 'om bhūḥ, bhuvaḥ svaḥ. I have entered the order of sannyāsa (lit. I have abandoned), I have entered the order of sannyāsa, I have entered the order of sannyāsa'. Lastly he pours out as much water as will fill his joined hands saying 'I promise that no injury will proceed from me to any creature'. He must henceforward restrain his speech. He holds his staff saying 'thou art my friend, protect me'. He takes the *śikya* (loop of strings) with the words 'yadasya pāre rajasaḥ' (Tai. S. IV. 2. 5. 2); he takes the cloth for straining water with the text 'yena devāḥ pavitreṇa' (Tai. Br. I. 4. 8 and Nirukta V. 6); he takes the water jar reciting 'yena devā jyotiṣordhvam' (Tai. S. V. 7. 2. 2); he takes the bowl after reciting the seven vyāhṛtis. Taking with him the staffs, the loop of strings, the cloth as a water strainer, the water-pot and the bowl he goes to a place where water can be had, bathes, sips water and sprinkles himself (performs *mārjana*) with the Surabhimatī[2184] verse (dadhi-krāvṇo, Ṛg. IV. 39. 6), with Abliṅgā verses, Vāruṇī verses, Hiraṇyavarṇā verses (Tai. S. V. 6. 1. 1 = Atharvaveda I. 33. 1-4) and Pāvamānī verses (Ṛg. IX. 1 &c.). While still in the water he performs sixteen prāṇāyāmas after (mentally going over) the Aghamarṣaṇa verses (Ṛg. X. 190. 1-3), comes out of the water on the bank, wrings his garments, puts on another pure (washed) garment, sips water, takes the cloth for straining water with the words 'om bhūr bhuvaḥ svaḥ' and performs *tarpaṇa* to the seven[2185] vyāhṛtis. He then fills his joined hands with water and performs *tarpaṇa* to the Manes just in the same way as he did to the gods, then he worships the sun with the two verses 'udu tyam' (Ṛg. 1. 50. 1) and 'citram' (Ṛg. I. 115. 1). He then offers *tarpaṇa* to the Ātman (self) with 'the syllable *om* is *brahma*; this light (the sun) that diffuses warmth is indeed

---

2184. Vide note 755 for Surabhimatī, Abliṅgā and Vāruṇī verses. The Tai. Br. III. 9. 7 calls Ṛg. IV. 39. 6 Surabhimatī.

2185. The तर्पण will be in the form ओं भूस्तर्पयामि and so on for भुवः, स्वः, महः, जनः, तपः, सत्यम्. This is देवतर्पण. The पितृतर्पण will be ओं भूः स्वधा, ओं भुवः स्वधा and so on.

brahma; this which gives warmth is indeed the Veda; this indeed that sheds warmth is the (proper) object of knowledge'; then he worships the *Ātman* with the words 'the Self is brahman, it is light'. Let him repeat the Gāyatrī verse one thousand times or an unlimited number of times. Repeating 'om bhūrbhuvaḥ svaḥ' he takes up the water strainer (cloth) and fetches water. Let him not thereafter perform *ācamana* with water that has not been drawn up (from a well), which has not been strained[2186] and which has not been completely cleansed. Let him not wear thereafter whitegarments. He may carry one staff or three. He has to keep the following vows: ahiṁsā (abstaining from injury to any creature), truthfulness, not depriving others of any property of theirs, continence, and liberality. There are five minor vratas (vows) viz. absence of anger, waiting upon the guru, avoidance of carelessness (or rashness), cleanliness, purity in food. Then follow rules as to begging for alms (some of them are at pp. 933-934 above). When he returns from begging, he places the alms in a pure spot, washes his hands and feet and announces (the alms) first to the sun with the verses 'udu tyam' (Ṛg. 1. 50. 1) and 'citram' (Ṛg. I. 115. 1); he also announces the alms to *brahman* with the text 'brahma jajñānam' (Tai. S. IV. 2. 8. 2 = Atharvaveda IV. 1. 1). It is declared (in Vedic texts) that after the *brahmādhāna* the sacred fires are contained in the sacrificer himself; his prāṇa, apāna, vyāna, udāna and samāna represent the five fires gārhapatya, anvāhāryapacana (dakṣiṇāgni), āhavanīya, sabhya and āvasathya. These five fires indeed abide in the *Ātman*; he, therefore, offers (the oblations) in the *Ātman* only. This sacrifice offered in the soul, which is centred in and based on the Ātman, leads the soul to bliss. Giving compassionately portions of the alms to creatures and sprinkling the remainder with water, he should partake of it as if it were some medicine. After he has eaten and taken ācamana he worships the sun with the Jyotiṣmatī[2187] verse viz. 'ud vayam' (Ṛg. I. 50. 10) after inaudibly muttering the

2186. Vide Manu VI. 46 for straining water. 'Liberality'—the ascetic has *ex hypothesi* no property, but his *tyāga* may consist in imparting knowledge and giving his mss. or books to the needy.

2187. Ṛg. I. 50. 10 is उद्वयं तमसस्परि ज्योतिष्पश्यन्त उत्तरम् । It contains the word ज्योतिः and is therefore styled ज्योतिष्मती. Bühler is inaccurate in holding the verse 'udvayam' as different from Jyotiṣmatī (vide S. B. E. vol. 14 p. 281). The words वाजे आसचसोः गाणः are also अथर्ववेद 19. 60. 1.

two texts 'vāṅ me āsan' (Tai. S. V. 5. 9. 2) and 'nasoḥ prāṇaḥ' (Tai. Ār. X. 72). Let him eat food given without asking, regarding which nothing has been settled beforehand and which comes to him by chance and so much only as is necessary to support life.

Now they quote the following rules for the case where the teachers explain the Upaniṣad 'standing (in the day), keeping silence, sitting (at night) in the posture[2187a] of crossed legs, bathing thrice a day, he shall subsist entirely on rice grains, oil-cake, food from barley, sour milk and milk'. It is declared in Vedic texts 'on that occasion he shall keep strict silence and converse as much as is necessary with the teachers deeply versed in the three vedas, with ascetics or other learned persons in the several āśramas, after pressing the teeth together, all the while contemplating on what he hears, but not in such a way as would cause a breach of his vow. He may keep only one of the rules out of the three viz. standing (in the day), rigid silence and sitting with crossed legs (at night) and not all together. Eight things do not cause him who is intent on vows as above to break his own vow viz. water, roots, clarified butter, milk, sacrificial food, the wish of a brāhmaṇa, an order of his guru, and medicine. Let him mutter the mantras in the evening and morning that are repeated in the Agnihotra. He should perform his evening sandhyā adoration with mantras addressed to Varuṇa[2188] and in the morning with those addressed to Mitra (Rg. III. 59). It is declared in the Veda 'limited in number are the *ṛk* verses, the *sāmans* and the *yajus* formulæ, but there is no limit to this that is *brahma*.' In this way (i. e. repeating om) the ascetic may give up the rest of the Veda, but should stand firm by the root of the Veda (viz. om). The Veda is the tree and its root is praṇava (om). He should meditate on 'om'. Prajāpati has declared that praṇava leads on to union with *brahman*. Let him cleanse the vessel of *brahman* with seven vyāhṛtis.[2189]

2187 a. वीरासन is defined as 'एकं पादमथैकस्मिन् विन्यस्योरौ तु संस्थितम्। इतरस्मिंस्तथैवोरुं वीरासनमुदाहृतम्॥' कालिदास in रघुवंश 13. 52 refers to this posture in योग.

2188. The Vāruṇī verses meant here are the three verses यच्चिद्धि occurring in Tai. S. III. 4. 11. 6 and the Maitrī verses are the three verses मित्रस्य चर्षणीधृतो, मित्रो जनान्, प्र स मित्र in Tai. S. III. 4. 11. 5.

2189. ब्रह्मभाजन may mean the bowl for alms or the body of the ascetic. This shows that besides 'om' he should also frequently recite the seven vyāhṛtis.

Among medieval works the Smṛtyarthasāra (pp. 96-97), the Sm. M. (pp. 177-182), the Yati-dh. (pp. 10-22), the Nirṇaya-sindhu (III. Uttarārdha pp. 628-632), the Dharmasindhu give various detailed procedures. Many of the medieval works and manuals (paddhatis) on sannyāsa frequently refer to a work called Brahmānandī, which I have not been able to secure. The procedure in the Dharmasindhu contains the following elements. Sannyāsa is to be resorted to in the northward passage of the sun and for a man who is about to die even in the southward passage. He should find out a teacher possessed of the virtues of quiescence and note for three months the duties of ascetics in his company, should purify himself with *japa* of the sacred Gāyatrī, Rudra mantras and by Kuṣmāṇḍa homa (for which see Tai. Ār. II. 7). He should then make a saṅkalpa [2190] after reciting the place and time on a *riktā tithi* and should perform the prāyaścitta of *catuḥkṛcchra* by giving a cow or money for each as stated above (pp. 199-200). Then he should begin to perform on the 11th or 12th day 16 śrāddhas of himself and sapiṇḍīkaraṇa. Then he is to perform eight śrāddhas (vide above p. 932) and *tarpaṇa* as a subordinate part (aṅga) of these eight śrāddhas. On the day these eight śrāddhas are performed or on the next day he should shave off the whole head after keeping six hairs out of his top-knot, pare his nails, then take his bath, then he is to donate to brāhmaṇas and his sons all his wealth except his wearing apparel and the materials for *homa*. The garments he is to wear should be dyed with red chalk; he should secure a bamboo staff as high as his head &c. and as thick as his finger and brought by a brāhmaṇa; that staff should be sprinkled over with water from a conch to the accompaniment of 'om', the *puruṣa* hymn (Ṛg. X. 90) and such names (of Viṣṇu) as Keśava. He should also keep ready a water jar, a strip for his loins and a garment to cover his body and a wallet and *pādukās* (sandals). He should declare his resolve (saṅkalpa) to become a paramahaṁsa and perform the worship of Gaṇeśa, puṇyāhavācana, worship of mother goddesses and Nāndī-śrāddha. He should then perform *japa* by saying 'namaḥ' to Brahmā (in the dative), Viṣṇu, Rudra, Sūrya, Soma, Ātman, Antarātman, Paramātman and also repeat the first *pādas* of each of the four

2190. Vide p. 267 above for रिक्तातिथि. The सङ्कल्प will be मम करि संन्यासेधिकारार्थं चतुःकृच्छ्रात्मक प्रायश्चित्तं प्रतिकृच्छ्रं तत्प्रत्याम्नायधेनुनिष्क्रयद्वारा-हमाचरिष्ये कृच्छ्रप्रत्याम्नायधेनुनिष्क्रयं द्रव्यं विप्रेभ्यो दातुमुत्सृजे।

Vedas. He should then eat three handfuls of barley flour with 'om' and touch his navel. He should then sip thrice clarified butter or water mixed with milk and curds repeating the mantras 'trivṛd-asi', 'pravṛd-asi', 'vivṛd-asi' (all three in Vāj. S. 15. 9) and then drink water with the mantra 'may the waters purify' (Tai. Ār. 10. 23), then perform ācamana and declare his resolve to fast. Then comes Sāvitrīpraveśa (as in Baud. above); then he should kindle his gṛhya fire or if he has no gṛhya fire then he should bring domestic fire with the mantra 'pṛṣṭo divi' (Ṛg. VII. 5. 27) and kindle it with the three mantras 'tat savituḥ', 'tām savituḥ' and 'viśvāni deva' (Ṛg. III. 62. 10, Vāj. S. 17. 74, Ṛg. V. 82. 5). Then comes brahmānvādhāna before sunset (see above p. 954). He should thereafter perform evening sandhyā adoration, homa and vaiśvadeva and keep awake the whole night near the fire. Then the next morning after the daily homa and Vaiśvadeva he should offer a mess of cooked food to Agni or Vaiśvānara and perform the homa to prāṇa and others, the puruṣasūkta homa and Virajā homa. The Virajā homa is a lengthy performance and the principal elements in it are: the offering of 40 oblations of each out of the three viz. fuel-sticks, boiled rice and clarified butter after repeating certain formulae such as 'may my five prāṇas be purified, may I be light (illumination) free from *rajas* (the principle of activity or obstruction) and from evil, svāhā; this is for the prāṇa and the rest, it is not mine.' In this way oblations are offered to five senses, the mind, *buddhi*, seed, thought and saṅkalpa, to the constituents of the body, to the several limbs of the body (head, hands and feet &c.), to *puruṣa* and others, to the five elements, to the five guṇas of the elements, to the five kośas (sheaths) and several others. Then an oblation of ājya is made to Prajāpati. Then he should recite the Puruṣa hymn (Ṛg. X. 90) and the first sentences of the four Vedas, offer oblations to Agni Sviṣṭakṛt, distribute gifts to students and others, he should burn his wooden utensils in his gṛhya fire if he has kept one and donate the metal vessels to his guru, then he should deposit the fire in himself by reciting 'ayam te yoniḥ' (Ṛg. III. 29. 10) and 'yā te agne yajñiyā' (Tai. S. III. 4. 10. 5) thrice and should face and take in the blaze and warmth of his gṛhya fire, should take a black antelope skin and leave his house. He should give blessings to his sons and other near relatives and bid good-bye to them with the words 'to me belongs no one nor do I belong to any one.' Then he should go to a reservoir of water, take in his folded hands water and offer it

to all gods with the hymn Ṛg. X. 103 (1–13). He should declare a resolve to resort to sannyāsa for the realization of *brahman* and offer three handfuls of water in the reservoir. He should then discharge water into the reservoir from his joined hands saying 'I have given up the hankering for sons, wealth, worlds and for everything, may there be safety to all creatures from me, svāhā.' Then he should again declare that he has abandoned everything, all pleasures, all sentiments of anger &c., all joys of flowers, scents, dancing and music, all duties of varṇa and āśramas &c.; he should also declare 'I shall not cause any injury to any creature in thought, word or by the body; may all creatures have no fear of me.' He should think of the sun and other gods as witnesses to this declaration and standing in navel-deep water should again perform the Sāvitrīpraveśa and offer water in declaring 'I have risen beyond the desire for sons, worlds and wealth and shall practise begging.'

After this comes the utterance of the *praiṣa* (the call or direction). In a low, moderate and loud voice the entrant should declare 'om, bhūḥ I have given up everything, om bhuvaḥ, I have ....., om svaḥ, I have....., om bhūr bhuvaḥ svaḥ, I have given up everything' and should discharge water in the reservoir of water with the words 'may there be no injury to all creatures from me, svāhā.' He should pluck out the top-knot, take out his sacred thread and hold them in his hand and offer them in water with water with the words 'water is indeed all deities, I sacrifice (the top-knot and sacred thread) to all gods, svāhā' and then he should send up a prayer to Vāsudeva. Then he should remove his wearing apparel and walk five steps with his face to the north. Then the ācārya should bow to the entrant and should hand over to the latter a piece of loin cloth and upper garment and a staff. The entrant should wear them and hold the staff with appropriate mantras and also a water jar and an āsana (a seat). He should then hold a fuel-stick in his hand, bow to his guru, sit down in the eagle posture and make a request to the guru in the words 'Oh teacher, who are like the Lord of the Universe to me, save me who am scorched by the fire of saṁsāra and who am bitten by Death; I have thrown myself on your mercy' and also repeat the verse 'yo brahmāṇam' (Śvetāśvatara Up. VI. 18 quoted in note 856 above).[2191] Having

2191. The verse यो ब्रह्माणं...मुमुक्षुर्वै शरणमहं प्रपद्ये ॥ (श्वेताश्वतरोप. VI. 18) is very appropriate to the occasion.

waited upon the guru with these words and placing his right knee on the ground, he should clasp the feet of his guru and should say 'teach, Sir, *brahma* to me.' The guru should contemplate on his soul as *brahman*, should recite over a conch full of water the sacred syllable 'om' twelve times, should pour the water from the conch on his disciple, should recite the propitiatory verse 'śam no mitraḥ' (Ṛg. I. 90. 9), then lay his hand on the head of the disciple, should recite the Puruṣa hymn (Ṛg. X. 90), should place his hand on the heart of the disciple and mutter the mantra[2192] 'I place thy heart in disciplined obedience to me,' the guru should then mutter in the right ear of the disciple the syllable 'om' and should enlighten him about the significance of 'om' and of pañcīkaraṇa;[2193] he should then impart to the disciple one of the four great Vedānta sentences (mahāvākya) 'prajñānam brahma' (Ait. Up. III. 3), 'ayam-ātmā brahma' (Bṛ. Up. II. 5. 19), 'tat tvam-asi' (Chān. Up. VI. 8. 7), 'aham brahmāsmi' (Bṛ. Up. I. 4. 10) in accordance with the tradition of his school and enlighten him about the meaning thereof. Then he should give to the disciple a name ending in tīrtha, āśrama &c. according to the tradition of his order. Then the guru may bring about what is called paryaṅkaśauca and give to the disciple the *yogapaṭṭa*.

The paryaṅka-śauca (purification by being seated on a stool &c.) may be briefly described. On an auspicious day a householder seats the ascetic in front of him on a wooden stool or seat, places five heaps of earth to his left and also to his right and also pure water on both sides. Then the householder simultaneously washes the two knees of the ascetic with water and earth from the first heap of earth on the left. Then he should wash his own left hand with earth and water taken from the half of the first heap on the right and with the remain-

---

2192. मम व्रते हृदयं ते दधामि मम चित्तमनुचित्तं ते अस्तु । मम वाचमेकव्रतो जुषस्व बृहस्पतिष्ट्वा नियुनक्तु मह्यमिति । This occurs in आश्व. गृ. I. 21. 7 and पार. गृ. II. 2 in उपनयन where the teacher addresses the boy in these words. The same words are addressed in the marriage rites by the bridegroom to the bride, as e.g. in Pār. gṛ. I. 8 (where प्रजापति is substituted for बृहस्पति).

2193. पञ्चीकरण is a Vedānta doctrine analogous to त्रिवृत्करण (which occurs in the Chān. Up. VI. 3 and 4 and V. S. III. 4. 20). Vide the वेदान्तसार for it and the work called पञ्चीकरण by Śaṁkarāchārya (in Benares Sanskrit series).

ing half of the first heap on the right he should wash both his hands seven times with the same water. With the second heap on the left he should wash simultaneously the two thighs (jaṅghā) of the ascetic four times and with one half of the second heap on the right he should wash his own left hand seven times and with the other half of the second heap (on the right) he should wash both his hands four times. The ankle, the upper part of the foot and the lower part (sole) of the foot of the ascetic are respectively washed with the third, fourth and fifth heap on the left and his own left hand and both hands are washed a certain varying number of times with 3rd, 4th, 5th heaps on the right.

The yogapaṭṭa (lit. the cloth of *yoga*, union with Spirit) is given in the following way: After the ascetic has undergone paryaṅkaśauca, he should cleanse his waist, wear a string round his waist and his loin cloth and cover his waist with a piece of cloth. He should then sit with his guru's permission on a high seat and should propound some Vedānta topic in the presence of the persons assembled. The ascetic guru should sprinkle on the head of his ascetic disciple water from a conch to the accompaniment of the Puruṣa hymn (Ṛg. X. 90), should honour him by offering clothes, sandalwood paste, flowers, incense, lamp and *naivedya*. He (the guru) should hold a piece of cloth over the head of the disciple, recite along with the other yatis the chapter called Viśvarūpa (11th chapter of the Bhagavadgītā) from the 15th verse to the 33rd verse. He should then give the name already determined upon to the disciple and say to him 'Henceforward you may admit to saṁnyāsa one who is eligible for it, initiate him and give him the yogapaṭṭa.' Then the disciple bows to the *yatis* older than himself. Then the guru gives to the disciple a waist-thread and a staff marked with five *mudrās* and should offer his own salutation to the disciple according to the tradition of his order. Other ascetics and house-holders also should bow to the disciple, who should only repeat the word 'Nārāyaṇa,' should leave the high seat and seat his guru thereon, should bow to the guru according to the rules of the order and to the other ascetics.[2194]

2194. Vide Dharmasindhu III (uttarārdha), Yati-dh. pp. 102–103 for yogapaṭṭa.

The Jābālopaniṣad (5)[2195] allows saṁnyāsa to those even who are suffering from disease and are about to die, all that is required being that they should declare in words and resolve in their mind to enter the order of saṁnyāsa. No extensive ceremonial is required. Aṅgiras and Sumantu quoted in Sm. M. (pp. 174 and 182) state 'when a man is shattered by old age or harassed by his enemies or is suffering from (an incurable) disease he may resort to saṁnyāsa by merely uttering the *praiṣa* (vide above p. 960) and no further rites would be absolutely necessary. He should recite thrice in the morning, at noon and in the evening, 'I have given up everything (or entered upon saṁnyāsa)' and further say 'I forswear whatever action I may have done through ignorance, indolence or carelessness; I shall cause no harm to creatures with my hands or feet, with my speech, body or mind; may all creatures have no fear from me.' The Dharmasindhu (III, uttarārdha) says that in this saṁnyāsa for those at the door of death the absolutely essential elements are the resolve (saṁkalpa), the uttering of the *praiṣa* and the giving of the promise of non-injury and the rest of the rites may or may not be performed according to circumstances. Even now such a saṁnyāsa (called āturasaṁnyāsa) is sometimes resorted to by religious-minded men *in extremis*, the only essentials gone through being *saṁkalpa* (declaration of resolve), *kṣaura* (tonsure of the head), sāvitrīpraveśa (described above at p. 954) and praiṣoccāra (utterance of *praiṣa*).

One question on which controversies have raged from very ancient times is whether an ascetic should give up his top-knot and sacred thread also. The Jābālopaniṣad[2196] (5) states

---

2195. यद्यातुरः स्याम्मनसा वाचा संन्यसेत् । जाबालोपनिषद् 5; आतुराणां च संन्यासे न विधिर्नैव च क्रिया। प्रैषमात्रं समुच्चार्य संन्यासं तत्र पूरयेत्॥ संन्यस्तोहमिति ब्रूयात्सवनेषु त्रिषु क्रमात्। त्रीन्वारांस्तु त्रिलोकात्मा शुभाशुभविशुद्धये॥ यत्किंचिदिदन्धर्मं कर्म कृतमज्ञानतो मया। प्रमादालस्यदोषाद्यत्तत्सर्वं संत्यजाम्यहम्॥ एवं संचिन्त्य भूतेभ्यो वृथाबभयदक्षिणाम्। पद्भ्यां कराभ्यां चिरहजाहं (विहरजाहं) वाङ्मायमानसैः। करिष्ये प्राणिनां हिंसां प्राणिनः सन्तु निर्भयाः॥ सुमन्तु quoted in स्मृतिमु. p. 174; vide चतिथ. सं. p. 2 for a similar quotation from Aṅgiras. The परा. मा. I. 2. p. 149 quotes the verse आतुराणां च संन्यासे as from महाभारत.

2196. अथ हैनमत्रिः पप्रच्छ याज्ञवल्क्यं पृच्छामि त्वा याज्ञवल्क्य अयज्ञोपवीती कथं ब्राह्मण इति। स होवाच याज्ञवल्क्यः। इदमेवास्य तद्यज्ञोपवीतं य आत्मा। जाबालोपनिषद् 5; तत्र परमहंसानां ..... त्रिदण्डं कमण्डलुं शिक्यं पात्रं जलपवित्रं शिक्यं यज्ञोपवीतं च इत्येतत्सर्वं भूः स्वाहेत्यप्सु परित्यज्यात्मानमन्विच्छेत्। जाबालोपनि. 6. This is referred to in वेदान्तकल्पतरुपरिमल p. 641.

that Atri asked Yājñavalkya how a man who did not wear a yajñopavīta (when he became an ascetic) could still be a brāhmaṇa and that the great sage replied that in the case of the ascetic the Self was his yajñopavīta and the same Upaniṣad (6) states that the paramahaṁsa is to abandon in water the three daṇḍas, the water-jar, the śikya, the begging bowl, the water-strainer, the topknot and yajñopavīta and should be a seeker after the Self. In the Āruṇika Up. (2) it is said[2197] that he should discharge his yajñopavīta on the earth or in water and that he should give up his śikhā and the sacred thread. Śaṁkara in his bhāṣya on Bṛ. Up. III. 5. 1 sets out at some length the arguments and the authorities on both sides and ultimately gives it as his own view that the sacred thread and *śikhā* should be given up by the ascetic. Viśvarūpa on Yāj. III. 66 also discusses this matter and propounds the same view. On the other hand Vṛddha-Hārīta[2198] VIII. 57 declares 'if an ascetic gives up the acts peculiar to brāhmaṇas, viz. keeping a topknot and wearing a sacred thread, he becomes a cāṇḍāla while alive and is born a dog after death.' The Jīvanmukti-viveka (p. 6 ff.) and Par. M. I. part 2, p. 164 ff. discuss this point and arrive at the same conclusion as Śaṁkara. The Mit. on Yāj. III. 58 gives an option. In modern times saṁnyāsins give up these two.

Some special rules are laid down about the *āhnika* (daily rites) of ascetics.[2199] They have to perform śauca, brushing the teeth, bath, just as house-holders have to do. Manu V. 137 (= Vas. Dh. S. VI. 19, Viṣṇu Dh. S. 60. 26, Śaṅkha 16. 23-24) says that forest hermits and ascetics have respectively to perform three and four times as much śauca (bodily purification) as house-holders. As to food, it has already been seen (p. 935) that they are to eat only once and only eight morsels. Ascetics have to worship Puruṣottama (i. e. Vāsudeva with his four forms), Vyāsa (with his four pupils, Sumantu, Jaimini, Vaiśampāyana, Paila), the Bhāṣyakāra Śaṁkara (with his four pupils) and so on. Certain rules are laid down for an ascetic as regards

2197. तं होवाच प्रजापतिस्तव पुत्रान्भातॄन्बन्धवादीन्न् शिखां यज्ञोपवीतं यागं स्वाध्यायं ..... ब्रह्माण्डं च विसृजेत् । ..... गृहस्थो ब्रह्मचारी वा वानप्रस्थो वा उपवीतं भूमावप्सु वा विसृजेत् । आरुणिकोपनिषत् 1-2.

2198. शिखायज्ञोपवीतादि ब्रह्मकर्म यतिस्त्यजेत् । स जीवन्नेव चण्डालो मृतः श्वानोभिजायते ॥ बृद्धहारीत VIII. 57.

2199. Vide Yati-dh. p. 95 for details of the daily worship by ascetics.

giving and receiving honour or salutation. An ascetic should bow to gods and to older ascetics who act according to the rules of their order, but should not offer *namaskāra* to an house-holder even if the latter be well-conducted. If another person bows to an ascetic, the latter should not pronounce any benediction but should only utter the word[2200] 'Nārāyaṇa.' When an ascetic (even one who has taken saṁnyāsa on his death-bed) dies, he is to be buried and not cremated. No mourning is to be observed for a *yati* when he dies (Atri 97) and no śrāddhas are to be offered on his death except the pārvaṇa on the 11th day after death (vide Aparārka p. 538). If an ascetic hears of the death of his son or any other relative, he does not become impure and has not to bathe but on hearing of his mother's or father's death he has to bathe, though he observes no mourning[2200a]

According to the theory of Dharmaśāstra, the king is not only the head of the civil administration and the fountain of justice, but he is also the final controlling authority in preserving religious and spiritual institutions, he is to see that people follow the dharma, to punish them for breaches of the religious and spiritual codes and to see to the administration to them of appropriate penances. In short, he is also the Defender of the Faith. Vide Gaut. XI. 9-11, Viṣṇu Dh. S. III. 2-3, Nārada (prakīrṇaka) verses 5-7, Yāj. I. 337 and 359, Atri 17-20, Manu VII. 13. But he regulated spiritual and religious matters not by his arbitrary authority but on the advice of his *purohita* and ministers and after taking the opinion of the assemblies (*pariṣad*) of learned men. Whenever difficult questions arose about the validity of anything from the religious point of view or about penances for lapses, or about excommunicating or outcasting a man the opinion of the assembly of learned men was sought. Therefore, detailed rules are laid down in the Dharmasūtras and smṛtis about the constitution of *pariṣads*. In modern times, the British Government being neutral in matters religious or ecclesiastical, the ascetic heads of the various maṭhas have been in the habit of assuming to themselves jurisdiction

---

2200. स्वधर्मस्थान्यतीन् वृद्धान् देवांश्च प्रणमेद्यतिः। नान्यमाश्रमिणं किंचित् प्रशस्तमपि तं नमेत्। अपि शास्त्रसमायुक्तं सदाचारसमन्वितम्। साधुवृत्तं गृहस्थाद्यं न नमस्येत् कचिद्यतिः॥ हारीत, प्रणतं न यतिर्मूयाद्दाशिषं व्यासशासनात्। नारायणेति च ब्रूयात्प्रणताय विपश्चिते॥ अत्रि, both quoted in स्मृतिच. p. 206.

2200 a. Vide संन्यासपद्धति of तोरो बद्रदेव (extracted from his work called प्रतापनारसिंह, D. C. No. 119 of 1882-83) folio 51 a 'न स्नानमाचरेन्निधनं पुत्रादेर्निधने श्रुते। पितृमातृक्षयं श्रुत्वा स्नानाच्छुध्यति साम्बरम्॥'.

over persons professing to follow their dogmas in ecclesiastical matters such as prescribing penances for lapses, settling disputes between castes, and deciding upon questions of outcasting. A few words must be said about the *pariṣads* and about the claims of the Śaṁkarācāryas (the modern heads of maṭhas) to regulate religious matters affecting their followers.

Among the oldest texts on this point is the one contained in the Tai. Up. I. 11. viz. the exhortation of the teacher on the eve of the student's departure at the close of his studies.[2201] 'If you have hereafter a doubt about any rite or about a course of conduct, you should behave in the way in which the brāhmaṇas of your place, who are thoughtful, intent (upon doing their duties), act spontaneously (without being urged by any one), are not hard-hearted and have an eye only to dharma (and not to *kāma* or *artha*) will behave. The same holds good about your conduct towards persons charged (generally falsely) with sins or lapses'.

The words 'sabhā' (Rg. X. 34. 6) and 'samiti' (Rg. X. 97.6) occur even in the Ṛgveda but their exact significance is doubtful and the former word at least seems to bear the sense of 'gambling hall' in some passages. In the Upaniṣads, however, the words samiti and pariṣad assume a more definite sense, meaning 'an assembly of learned men in a particular locality'. The Chān. Up. V. 3. 1 states that Śvetaketu Āruṇeya [2202] repaired to the assembly (*samiti*) of the Pañcālas (where Pravāhaṇa Jaivali put him five questions of a metaphysical and esoteric nature). The Bṛ. Up. VI. 2. 1 when narrating the same episode employs the word 'pariṣad'. These passages establish that in the times of the Upaniṣads there were assemblies of learned men where intricate questions were discussed. Gaut. 28. 46 prescribes just as the Tai. Up. I. 11 does that in matters about which there is no certain rule (or there is doubt) one should do what is commended by respectable persons not less than ten in number, who are clever in discussion and are above covetousness.[2203] The Āp. Dh. S. I. 3. 11. 34 declares that holidays other

2202. श्वेतकेतुर्हारुणेयः पञ्चालानां समितिमेयाय तं ह प्रवाहणो जैवलिरुवाच। छा. उप. V. 3. 1; श्वेतकेतुर्ह आरुणेयः पञ्चालानां परिषदमाजगाम। बृह. उप. VI. 2. 1.

2203. अनाज्ञाते दृष्टापरैः शिष्टैकवाक्यिभिरलुब्धैः प्रशस्तं कार्यम्। गौ. 28. 46; यथोक्तमन्यवृत्तः परिषत्सु। आप. ध. सू. I. 3. 11. 34.

than those stated by him may be observed as settled by *pariṣads*. The Baud. Dh. S. II. 1. 44-45 prescribes "the relatives of a brahmacārī who is guilty of sexual intercourse should empty a water pot in the *pariṣad* and the offender should confess 'I, so and so by name, am guilty of such and such a misdeed' and that after the erring person has performed penance and when he has touched water, milk, ghee, honey and salt, the brāhmaṇas should ask him 'have you performed the penance?' The other shall then reply 'yes'; then they shall admit him who has performed penance to all sacrificial rites making no difference between him and others."[2204] This clearly establishes that at least five centuries before the Christian era it was the privilege of the assembly of the learned brāhmaṇas to administer penance to a sinner and then restore him to all rights of interdining and other social intercourse. Vas. Dh. S. I. 16 declares 'there is no doubt that whatever persons who have studied dharmaśāstra and the three Vedas expound as purifying themselves and others is the proper dharma.' Āp. Dh. S. I. 1. 1. 2 declares that the conventions of those that know dharma are the authoritative standard (of conduct for ordinary men). When the smṛtis declare that Veda, smṛti and the usages of śiṣṭas are the three sources of dharma (e.g. Vas. Dh. S. I. 4-5) they convey that śiṣṭas can *and* should determine from time to time what is religious conduct. When Bṛhaspati enjoins that doubts about dharma should not be settled by blindly following the letter of śāstras, but that logic and reasoning should be employed, he strikes the true note of the spirit of the ancient sages.[2204a] Vide also Manu XII. 106 and Gaut. XI. 23-24 for the importance of *tarka* in settling matters of dharma. Manu XII. 108 states 'if one were to ask how one should act in matters of dharma on which no express rule is declared in this work, the reply is that in such cases what is declared to be a proper rule of conduct by respectable (śiṣṭa) brāhmaṇas would undoubtedly be the dharma.' Yāj. III. 300 requires that a person guilty of a sin or lapse should declare it to an assembly of learned brāhmaṇas and undergo such *vrata* (penance and

2204. अथास्य ज्ञातयः परिषदुदपात्रं निनयेयुरसावहमित्थंभूत इति। चरित्वापः पयो घृतं मधु लवणमित्यारब्धवन्तं ब्राह्मणं ब्रूयुश्चरितं व्रतमेत्योमितीतरः प्रत्याह चरितनिर्वेशं सवनीयं कुर्युः॥ बौ. ध. सू. II. 1. 44-45.

2204 a. केवलं शास्त्रमाश्रित्य न कर्तव्यो हि निर्णयः। युक्तिहीने विचारे तु धर्महानिः प्रजायते॥ बृहस्पति quoted in स्मृतिच. (व्यवहार p. 24.)

observances) as is approved of by the *pariṣad*. Śaṁkarācārya in his bhāṣya on Bṛ. Up. IV. 3. 2 makes the very significant [2205] remark "it is therefore that in coming to a decision on a subtle point of dharma, it is desirable to have a pariṣad working and a specially distinguished person is wanted (to give the lead) as stated in the rule 'a *pariṣad* should consist of not less than ten persons or of three or of one (specially distinguished)'." These several authorities establish that for over 1500 years before the great Śaṁkarācārya the *pariṣad* of learned brāhmaṇas was the acknowledged authority for settling doubtful points of dharma and administering penances on lapses from proper conduct, and that Śaṁkarācārya himself acknowledged this privilege of the *pariṣad*.

The next question is: what is the number of persons required to constitute a *pariṣad* for deciding on doubtful points of dharma and what their qualifications should be. According to Gaut. 28. 46–47 a *pariṣad* should consist of at least ten [2206] persons viz. four, each of whom has mastered one Veda, three members who are respectively a (perpetual) student, a house-holder and a saṁnyāsin and three more each of whom has studied distinct dharmaśāstras. Vas. Dh. S. III. 20, Baud. I. 1. 8, Parāśara VIII. 27 and Aṅgiras declare that four persons each of whom has mastered one of the four Vedas, one who knows the Mīmāṁsā, one who has studied the six subsidiary lores of the Veda, one who has studied dharmaśāstra and three persons who are a house-holder, a forest hermit and a saṁnyāsin constitute a pariṣad of ten. Manu XII. 111 defines the ten as consisting of three masters of each of the three Vedas (excluding the Atharvaveda), one who has studied Logic, a student of Mīmāṁsā, a student of Nirukta, a master of dharmaśāstras and three members in each of the first three āśramas. Bṛhaspati [2207] quoted in Par. M. II. 1 p. 218 declares that a pariṣad may be constituted by seven or five persons sitting together who have studied the Vedas, their six subsidiary lores and dharmaśāstra and that such a pariṣad resembles a solemn

sacrifice. Vide also Aṅgiras quoted by Aparārka p. 23 for seven or five men as constituting a *pariṣad*. Vas. Dh. S. III. 7, Yāj. I. 9, Manu XII. 112, Parāśara VIII. 11 state that at least four or three men should constitute a pariṣad, but they should be students of each of the four Vedas, should be agnihotrins and should have also studied dharmaśāstra. If even three cannot be found then even a single man can declare the dharma in case of doubt (Gaut. 28. 48), but he must possess special qualifications. Gaut. 28. 48, Manu XII. 113 (= Atri 143) require that he must be the best of brāhmaṇas, a śiṣṭa and a deep student of the Veda. Yāj. I. 9, Parāśara VIII. 13, Aṅgiras[2208] say that a single person who is the best among ascetics possessing knowledge of the Self may form a *pariṣad* and declare what the proper rule is on a point of doubt. Though the texts permit in extreme cases a single man to declare dharma in case of doubt they give emphatic warning that this should not be done as far as possible. Baud. Dh. S. I. 1. 13 observes[2209] 'the way of dharma is very subtle and difficult to follow and it has many entrances (i. e. it appears different in different circumstances); therefore a person though knowing much should not undertake single-handed to propound the proper course of conduct in case of doubt.' The texts also emphasize that doubtful points of dharma are not to be decided by the votes of ignorant people, even if they muster in thousands. Manu XII. 114-115 (=Baud. Dh. S. I. 1. 17 and 12=Vas. Dh. S. III. 5-6=Parāśara VIII. 6 and 15) state 'Even if thousands of brāhmaṇas who have observed no *vrata* and who have studied no Vedic mantras and who make their living merely by virtue of their caste come together they do not constitute a *pariṣad*. When such foolish persons deluded by ignorance and ignorant of dharma declare (a penance for a sin) the sin is multiplied a hundred-fold and reaches the propounders.'

The Mit. on Yāj. III. 300 remarks that the number mentioned as constituting a *pariṣad* is not material, that all that is meant is that for lesser sins a small number of learned men can

2208. मुनीनामात्मविद्यानां द्विजानां यज्ञयाजिनाम् । वेदव्रतेषु स्नातानामेकोपि परिषद्भवेत् । पराशर VIII. 13; यतीनां सत्यतपसां ज्ञानविज्ञानचेतसाम् । शिरोव्रतेन स्नातानामेकोपि परिषद्भवेत् ॥ अङ्गिरस् quoted by अपरार्क p. 23 and परा. मा. II. part I. p. 217. The मुण्डकोपनिषद् III. 2. 10 states that those alone who have performed śirovrata are eligible for being taught brahmavidyā.

2209. बहुद्वारस्य धर्मस्य सूक्ष्मा दुरनुगा गतिः । तस्माद्न वाच्यो ह्येकेन बहुज्ञेनापि संशये ॥ बौ. ध. सू. I. 1. 13=मत्स्यपुराण 143. 27 (which transposes the halves) =वायुपुराण 57. 112.

declare the penance, but in the case of serious sins, the number of persons who constitute the parişad should be large. Devala[2210] quoted in the Mit. on Yāj. III. 300 says that when the sin is not grave, brāhmaṇas may declare the penance without reference to the king (and restore the sinner to his privileges) but when the sin is grave, then the king and brāhmaṇas must carefully examine the matter and then declare the penance. Parāśara (VIII. 28-29) ordains[2211] 'brāhmaṇas should declare penance for sins with the king's consent, that they should not declare the expiation of sins by penance of their own motion and that if the king decides to give prāyaścitta without reference to brāhmaṇas, the sin becomes increased a hundred-fold.' It is the duty of the *parişad* to declare an appropriate penance when a man comes to it, declares his lapse and seeks to be freed from the taint and if the *parişad* knowing what the appropriate penance is refuses to administer it, they incur the same sin as that committed by the man who approaches them.[2212] Parāśara VIII. 2 prescribes that one should on being convinced of his having committed a sin at once repair to the assembly of learned men, should prostrate himself on the ground before them and request them to administer prāyaścitta (expiation). The Mit. on Yāj. III. 300 quotes Parāśara that the sinner should announce his sin after offering the present of a cow or a bull or the like to the *parişad*.

It will be shown immediately below that these rules of the smṛtis were observed to the letter by Hindu kings and learned brāhmaṇas in medieval times. When the successors of Śaṁkarācārya began to interest themselves in the work done by the parişads for centuries before the advent of the first ācārya cannot be ascertained. A large part of Northern India was under Moslem rule for about 500 years from about 1200 A. D. and a portion of the Deccan and a part of South India also were under Moslem rule for about three hundred years. Numerous documents have been published by the late Mr. Vishvanath K. Rajwade (a scholar

who made unique contributions to the elucidation of Maratha History, Marathi Philology and Marathi Literature) and his friends. From these it appears that during the time of the Maratha domination learned brāhmaṇas of holy places like Paithan, Nasik and Karad were consulted in religious matters by the king or his minister, that the holders of the '*gādi*' of Śaṁkarācārya at Saṁkeśvara and Karavīra and other seats were also rarely consulted in these matters and that it is only after the advent of the British rule that[2213] the Śaṁkarācāryas have begun to claim almost exclusive jurisdiction in ecclesiastic matters and in restoring men to their castes or excommunicating them for lapses. It will be seen from passages quoted below that both the learned brāhmaṇas at holy places like Karad and the Śaṁkarācāryas claim the exclusive right in these matters by reason of immemorial usage.

In several works it is said that the *pariṣad* must be constituted by śiṣṭas (vide Gaut. 28. 46). Śiṣṭa is variously defined by some smṛti works. The Baud.[2214] Dh. S. (I. 1. 5–6) says 'Śiṣṭas are those who are free from envy and pride, who keep only as much corn as is measured by kumbhī (vide p. 111 *f. n.* 235), who are free from greed and from hypocrisy, arrogance, covetousness, delusions and anger. Those are śiṣṭas who have studied the Veda according to the prescribed method, together with its appendages (viz. Itihāsa and Purāṇas), who know how to draw inferences from that and who tend to make people realize the teaching of the Veda.' The Mahābhāṣya defines śiṣṭas in almost the same words as Baud. Dh. S. I. 1. 5. Vas. Dh. S. 1. 6 defines śiṣṭa as one whose mind is free from desires.

2213. Vide Rajwade's Khanda 21 published by the Bhārata-itihāsa-saṁśhodhaka Maṇḍala at Poona, letter No. 205 at pp. 256–58 dated *śake* 1778 (1856 A. D.) for the claim of the Śaṁkarācārya of Karavīra 'मठाधिकारी वगैरे याची वहिवाट पाहून निग्रह ठेवणें अगर शुद्ध करणें हा अधिकार मठकरवीर संस्थानचा आहे. कराडकर यांनीं दूरग्यान धांदल करून पत्र लिहिलें हें बरोबर नाहीं.' On the other hand letter No. 227 in the same volume at p. 276 dated *śake* 1778 addressed to the assembly of brāhmaṇas at Kasegaon by the assembly of Karahāṭa (Karad in Satara District) asserts 'पूर्वीपासून आचार व्यवहारपद्म प्रायश्चित्त करण्याचा अधिकार क्षेत्राचा पूर्वापार असून &c.'

2214. शिष्टाः खलु विगतमत्सरा निरहंकाराः कुम्भीधान्या अलोलुपा दम्भदर्पलोभमोहक्रोधविवर्जिताः । धर्मेणाधिगतो येषां वेदः सपरिबृंहणः । शिष्टास्तद्वदमानज्ञाः श्रुतिप्रत्यक्षहेतवः ॥ बौ. ध. सू. I. 1. 5. 6. This last is Manu XII. 109 and Vas. VI. 43 (with slight variations). शिष्टः पुनरकामात्मा । वसिष्ठ I. 6. Compare महाभाष्य vol. III. p. 174 'एतस्मिन्नार्यनिवासे ये ब्राह्मणाः कुम्भीधान्याः अलोलुपा अगृह्यमाणकारणाः किंचिदन्तरेण कस्याश्चिद् विद्यायाः पारगास्तत्रभवन्तः शिष्टाः ।'

The Matsyapurāṇa [2215] 145. 34-36 and Vāyu, vol. I. 59. 33-35 derive the word śiṣṭa and restrict it to Manu, the seven sages and other similar great sages, who in each æon (Manvantara or yuga) settle the rules of conduct for succeeding ages.

It is well-known that Shivaji, the great founder of the Maratha Empire, established a council of eight ministers, viz. Mukhya Pradhāna, Amātya, Saciva, Mantrī, Senāpati, Paṇḍitarao, Nyāyādhīśa and Sumanta. 'The jurisdiction of the Paṇḍitarao extended over [2216] all religious matters, he was to examine and decide disputes about dharma and adharma, he was to honour śiṣṭas (respectable people) on behalf of the king, was to make his signature expressing his approval of the writings (decisions) about ācāra, vyavahāra and prāyaścittas (made by learned brāhmaṇas). He was to superintend and carry into immediate execution gifts, propitiatory rites (for the king).' This shows that even in matters of prāyaścitta (penance for lapses and sins) the final control rested with the Paṇḍitarao, who used to send doubtful matters to learned brāhmaṇas at holy places like Wai, Nasik, Karad for their opinions and accept them. There are letters which show that the Paṇḍitarao convened meetings of learned brāhmaṇas and with their approval declared prāyaścitta in the case of a brāhmaṇa who had been forcibly converted by Mahomedans and who was thereafter restored to caste.

That sometimes the Pontiff of the Saṅkeśvara *maṭha* was consulted even in disputes about rights to lands and villages follows from a decision contained in Rao Bahadur Vad's work pp. 203-210 (of 1730 A.D.). Here a dispute arose between Śrīkarācārya (to whom a village had been donated by king Rājārāma) and his agnates, who, taking advantage of the fact that the gift-deed was made in the name of five persons including Śrīkarācārya, put forward their claims to that village. This dispute was referred to the Svāmī of Saṅkeśvara and Karavīra who decided on the authority of Vijñāneśvara, the Vyavahāramayūkha and the Dānakamalākara that though the document was

2215. शिष्येर्धातोश्च निष्ठान्तात् शिष्टशब्दं प्रचक्षते । मन्वन्तरेषु ये शिष्टा इह तिष्ठन्ति धार्मिकाः । मनुः सप्तर्षयश्चैव लोकसंतानकारिणः । तिष्ठन्तीह च धर्मार्थं तान् शिष्टान् संप्रचक्षते । तैः शिष्टैश्चलितो धर्मः स्थाप्यते वै युगे युगे । मत्स्य 145. 34-36.

2216. Vide 'Sanads and Letters' in Marathi selected by Rao Bahadur Vad (1913) p. 123 'पण्डितराव यांणीं सर्व धर्माधिकार, धर्म अधर्म पाहून विचिक्षा करावी. शिष्टांचे सत्कार करावे. आचार, व्यवहार, प्रायश्चित्त पत्रें होतील त्यांजवर संमत चिह्न करावें. दानप्रसङ्ग, शान्ति, अनुष्ठान तत्काळीं करवावे. '

executed in the name of five persons, the gift of the village with water, kuśa and gold was made to Śrīkarācārya alone and that therefore he alone was the true owner.

There are cases where the head of the Karavīra maṭha issued an order (in śake 1644 i. e. 1722 A. D.) asking people to dine with a brāhmaṇa whose wife had illicit connection with a *gosāvi* and who had performed the necessary prāyaścitta.[2217]

On the other hand in numerous instances the assembly of learned brāhmaṇas was approached either by the Paṇḍitarao or by the interested parties themselves to declare the proper penance and restore the guilty party to his caste.[2218] Numerous documents and letters showing the part played by the family of Gijre at Karad (in the Satara District) in the matter of giving decisions on questions of dharma-śāstra have been published by the late Mr. V. K. Rajvade. One Gangadhara Ranganatha Kulkarni of Harsul[2218a] was forcibly converted by the Moslems; then the Maratha king Sambhaji ordered his minister the Paṇḍitarao to restore him to his caste after giving him appropriate prāyaścitta and the Paṇḍitarao called a meeting of learned brāhmaṇas, looked into works like the Mitākṣarā and with the approval of the brāhmaṇas administered prāyaścitta to him and sent him on a pilgrimage. There is a similar case in which the Paṇḍitarao under orders from the king writes to the

This order was issued by Moreshwar Panditarao in *śake* 1608 (1686 A. D.). Vide for Netaji Palkar's conversion and reconversion शिवकालीन पत्रव्यवहार, खण्ड १५ (published by Satkāryottejaka Sabhā at Dhulia) document No. 282 (at p. 289) dated *śake* 1612 (1690 A. D.) 'अवरंगजेबाने स्वाराज्य लोक आहे ती त्यांस मुसलमान करावे असे केले आहे त्यामसाणें मुसलमान केले मागे नेतोजी राजे व साबाजी घाडगे व जानोजी राजे व कितेक ब्राह्मणही या प्रांतीचे बाटविले' and शिवकालीनपत्रसारसंग्रह, खण्ड १ published in 1930 by the Shivacharitrakāryālaya at Poona, entry No. 1863 of 24th July 1676 A. D.

learned brāhmaṇas of Karad about the prāyaścitta to be administered to one Khandu Jadhav [2219] who had been forcibly made by the Moslems to eat their food and in which he informs the brāhmaṇas that a fee of two rupees should be taken from the man. It may be noted in passing that Raje Netaji Palkar who was one of the great commanders under Shivaji, the founder of the Maratha Empire, was made a moslem by the Mogul Emperor Aurangzeb and was subsequently taken back into the Hindu fold by Shivaji. In another document [2220] the learned brāhmaṇas of Poona, 46 in number, write to the brāhmaṇas of Karavīra about one Narasiṁha Bhaṭṭa Toro of Paithan who had engaged as a priest in a Vedic sacrifice in which he had offered the effigy of an animal made of flour, who had therefore been made outcast and who was subsequently restored to the caste after undergoing penance.

The above brief account will show that for hundreds of years even before the first Śaṁkarācārya flourished it was the privilege of the assembly of learned brāhmaṇas to decide doubtful points of religious conduct and prescribe penances for lapses, that the same privilege continued undisturbed till the advent of the British rule, that rarely the heads of the maṭhas, by virtue of their eminent position, their supposed detachment from and renunciation of worldy affairs and their reputation as ascetics, were asked to decide (following Yāj. I. 9) doubtful points of religious and theological importance, that it is only during the last few decades that such heads began to claim exclusive jurisdiction in such matters.

It is desirable in the interest of the solidarity of the several Hindu castes and the rapid growth of progressive and advanced views that matters of practices, penances and restoration to caste should be in the hands of the bodies of learned men or the caste itself than in the hands of a single ascetic styling himself Śaṁkarācārya, who often happens to know nothing of dharmaśāstra and only puts his seal of approval on what interested persons that are round him say.

2219. Vide भारत इतिहास-संशोधक-मंडळ, तृतीयसंमेलनवृत्त p. 94 'आज्ञापत्र राजेश्री वेदशास्त्रसंपन्न कऱ्हाडक्षेत्रस्थ समस्तब्रह्मवृन्दयेषु या प्रति रघुनाथभट्ट पैठितरा नमस्कार. श्रीछत्रपतीनीं आज्ञा केली ऐसी जे खण्डु जाधव याजवर्ती यवनानीं जोरावरि करून आपले अन्न खाविले त्यास राजश्री स्वामी छत्रपतीनी क्षेत्रास पाठविणें त्याजवरून खण्डु जाधव पाठविला आहे. यापासून दोन रुपये घेणें यास निबन्ध प्रायश्चित्त देणें. त्यास शुद्धपत्र देऊन हुजुर रवाना करणे. विलंब न लावणें हे नमस्कार. इदं विज्ञप्तिः.'

2220. Vide the Marathi Quarterly journal called 'संशोधक' for Śake 1857 vol. IV (for April 1935).

After this review of the stage of saṁnyāsa we see that asceticism presents several aspects viz. fasting or at least reducing the intake of food, abstention from meat and drink and pleasures of sense, total absence of sexual gratification and suppression of the sexual emotion, vow of silence, sleeping on bare ground, nakedness or making use of minimum clothing, contempt for the world and its riches. The Hindu Scriptures however do not enjoin self-infliction of pain or flagellation that was indulged in by monks in the early centuries of Christianity. Asceticism in the several forms indicated above is a feature common to all religions. It is the fashion to assert that Indians[2221] have the highest regard for asceticism and that the men whose memories they cherish as ideals of human conduct are ascetics. This statement is only partially true. Christ also taught abandonment of worldly ties and the spurning of riches as the best for entering the Kingdom of Heaven (vide Matthew 19. 21, Luke 14. 26 and 33, St. John 2. 15-16). It is only during the last three or four hundred years that Western peoples have given up much of what was thought for centuries to be the main teaching of Christ and regard successful men of action or politicians or men of martial exploits as their ideals and heroes. In India also martial glory has often raised men to the position of heroes or *avatāras*, but only when they delivered their countrymen from the tyranny and persecution of evil men or foreigners. Paraśurāma, Rāma and Kṛṣṇa are *avatāras* because they fought against tyranny and barbarity and not because they brought as large a slice of the earth under their domination as possible for purposes of exploitation or vainglory. Martial exploits for self-aggrandisement or for domination for domination's sake have never evoked great enthusiasm in India. Shivaji, the great hero of the Marathas, was paid almost divine honours even during his life-time not for his martial exploits, but for his having freed the Marathas and other peoples from Moslem tyranny, persecution, religious intolerance and fanaticism.

2221, Vide ' Mystics, ascetics and saints of India ' (1903) by J. C. Oman p. 271 ' it is the ascetic profession that time out of mind has been a pre-eminent dignity in the eyes of the Indian people. '

CHAPTER XXIX

SRAUTA (VEDIC) SACRIFICES*

Introductory

A deep study of Vedic sacrifices is quite essential for the proper understanding of the Vedic Literature, for arriving at approximately correct statements about the chronology, the development and the stratification of the different portions of that Literature and for the influence that that Literature exerted on the four varṇas and the caste-system, on the splitting up of the brāhmaṇas themselves among several sub-castes[2222] and on the institution of gotras and pravaras. Early European scholars generally paid scant attention to the deep study of the Vedic sacrifices and endeavoured to understand the meaning of the Vedas principally by reference to grammar, comparative philology and the comparison of several passages containing the same word or words. Max Müller put forward a tentative scheme of chronology based mostly on subjective considerations and prompted by the great prejudice felt by European scholars generally against admitting any great antiquity for the Vedas. Therefore the endeavour of most European scholars has been to show that the *mantras* could not have been composed before 1400 B. C. It is beyond the scope of this work to enter into any discussion about the dates of the various sections of the Vedic Literature. It must be here said, however, that I do not subscribe to the view that 1400 B. C. is the uppermost limit of the original composition of the Vedic hymns. The hymns may have been composed for aught we know several thousand years

---

* In this chapter a few special abbreviations have been employed as follows: Āp. = Āpastamba-śrautasūtra (ed. by Dr. Garbe), Āśv. = Āśvalāyana-śrautasūtra (in the Bibliotheca Indica series), Baud. = Baudhāyana-śrautasūtra (ed. by Dr. Caland), Jai. = the Pūrvamīmāṁsā sūtra of Jaimini with Śabara's bhāṣya (in the Ānandāśrama series), Kāt. = Kātyāyana-śrautasūtra (ed. by Dr. Weber), Sat. or Satyāṣāḍha = Satyāṣāḍha-śrauta-sūtra (in the Ānandāśrama series), Śāṅ = Śāṅkhyāyana-śrauta-sūtra (ed. by Hillebrandt in the B. I. series).

2222. Some of the brāhmaṇa sub-castes such as the Kāṇvas, Maitrāyaṇīyas, Carakas and Jūbālas owe their origin to their ancestors having studied particular Vedic Śākhās.

before that date. Most of the Vedic Saṁhitās that we now have are arranged (except the Ṛgveda to some extent) definitely for the various aspects of the cult of the sacrifice and indicate a state of things when different priests were required for the sacrifices, who used *mantras* from the collections they had studied.

For a thorough understanding of Vedic sacrifices, the several Veda Saṁhitās, the Brāhmaṇas and the Śrauta sūtras must be carefully studied. Among works in English that are very helpful must be mentioned, Haug's translation (with notes) of the Aitareya Brāhmaṇa, Prof. Eggeling's translation of the Śatapatha Brāhmaṇa with notes (S. B. E. vol. XII, XXVI, XLI, XLIII, XLIV), Prof. Keith's 'Religion and Philosophy of the Veda and Upaniṣads', translation of the Black Yajurveda (2 vol. in Harvard Oriental Series) and of the Ṛgveda Brāhmaṇas (one volume in the same series), Kunte's 'Vicissitudes of Aryan civilization in India.' (1880) particularly pp. 167–232. Besides these Weber and Hillebrandt have written in German scholarly works on Vedic sacrifices; Caland and Henry published a very learned, exhaustive and methodical work in French on the Agniṣṭoma (1906). In this connection the late Dr. S. V. Ketkar's labours and researches embodied in his Marathi Encyclopædia (vol. 2 and 5) are worthy of special consideration, since they furnish a much-needed corrective to the somewhat one-sided views of most European scholars that have written on Vedic Literature, though one is bound to differ from him in several matters.[2223] The following pages are based principally on the original texts, though here and there the works of modern scholars have been availed of.

In his Pūrvamīmāṁsāsūtra, Jaimini submits thousands of texts to the principles of mīmāṁsā elaborated by him and arrives at definite conclusions on matters affecting the details of various sacrifices. An attempt has been made in these chapters on śrauta to include many of his conclusions, a task, which so far as I know, has not been essayed by any modern writer on dharma or śrauta up till now.

2223. Prof. Dumont's 'L'Agnihotra' (1939) came into my hands when these pages were passing through the press. Hillebrandt's 'Das Altindische Neu-und Vollmondsopfer' (Jena, 1879) and 'Ritual-Litteratur Vedische Opfer und Zauber' (1897, in the Encyclopædia of Indo-Aryan Philology and Antiquities) deservedly enjoy a high reputation among works on śrauta sacrifices.

The fundamental conceptions of *Yajña* (sacrifice) go back to Indo-European[2224] antiquities though the traces are rather faint. But it is quite clear that the cult of the sacrifice had been much developed in the Indo-Iranian period. There is a very striking resemblance between the Vedic Agniṣṭoma and the Homa ceremony of the Parsis (vide Haug's Ait. Br. vol. I, Introduction p. 59 ff). There are numerous words indicative of the cult of the sacrifice both in the Vedic language and in the ancient Parsi religious books. For example, words like atharvan, āhuti, uktha, barhis, mantra, yajña, soma, savana, stoma, hotṛ do also occur in the ancient Parsi religious scriptures.[2225] Though Vedic sacrifices are now very rarely performed (except a few simple ones like the Darśa-pūrṇamāsa and the Cāturmāsyas), they were in great vogue several centuries before the Christian era. Centuries after the advent and spread of Buddhism we learn from inscriptions and literary traditions that kings often performed the ancient solemn Vedic sacrifices and gloried in having done so. In the Harivaṁśa (III. 2. 39–40), in the Mālavikāgnimitra (Act V, which speaks of Rājasūya), in the Śuṅga Inscription from Ayodhyā (E. I. vol. XX. p. 54) Senāpati Puṣyamitra is said to have performed the Aśvamedha (or Rājasūya). In the Hathigumpha Inscription (E. I. vol. XX. at p. 79) king Khāravela is extolled as having performed the Rājasūya. In the Bilsad stone Inscription of Kumāragupta dated in the Gupta year 96 (i. e. 415–6 A. D.) it is stated that his great ancestor Samudragupta performed the Aśvamedha that had gone out of vogue for a long time (cirotsannāśvamedhāhartuḥ, in Gupta Inscriptions at p. 43). In the Pardi plates (of Cedi *saṁ.* 207 i. e. 456–7 A. D.) the Traikūṭaka king Dahrasena is described as the performer of Aśvamedha (E. I. vol. X. p. 53). The Pīkira grant of Siṁhavarman (E. I. vol. VIII. p. 162) describes the Pallavas as the performers of many Aśvamedhas and another Pallava grant (in E. I. vol. I p. 2 at p. 5) refers to the performance of Agniṣṭoma, Vājapeya and Aśvamedha. The Chammak plate of the Vākāṭaka king Pravarasena II (Gupta Inscriptions No. 55

2224. Vide Prof. A. B. Keith's 'Religion and Philosophy of the Veda and Upaniṣads' (1925), vol. II pp. 625–26 on 'the Indo-European Fire-cult' and pp. 257–312 of vol. I for 'the nature of the Vedic sacrifice'; 'L' Agniṣṭoma' by Caland and Henry, p. 469 ff.

2225. Vide Hillebrandt's 'Ritual-Litteratur Vedische Opfer und Zauber' (1897) p. 11 for a long list of such words.

p. 236) speaks of Pravarasena I as the performer of many Śrauta sacrifices.[2226]

The original worship of fire may have been individualistic as well as communal or tribal. The daily agnihotra was an individual affair ; but as even simple iṣṭis like darśapūrṇamāsa required four priests, and Soma sacrifices required 16 priests and costly preparations, these sacrifices partook more or less of a public or at least congregational character. It appears that as most brāhmaṇas were poor and could not carry on even the daily agnihotra, which pinned them down practically to one place and did not allow them to move out of the village for securing their livelihood, even agnihotra must have been comparatively rare in early times. Such Vedic sentences as ' one who has begot a son or sons and whose hair is still black should consecrate the Vedic fires ' (quoted by Śabara on Jaimini I. 3. 3 and cited on p. 350 above) establish that agnyādhāna was advised for brāhmaṇas when they had reached middle age (and not before). The daily agnihotra required the maintenance of at least two cows, besides thousands of cow-dung cakes and fuel-sticks. For the maintenance of agnihotra and the performance of darśapūrṇamāsa (in which four priests were employed) and the Cāturmāsyas (where five priests were required) the house-holder was required to be well-to-do. And the Soma sacrifices could be performed only by kings, nobles and the rich and by those who could collect large subscriptions. We find that kings while making grants often expressed that the object of the grants was to enable the brāhmaṇa donees to offer *bali*, and *caru* and to perform *agnihotra*. For example, in the Sarsavni plates of Buddharāja dated in Kaṭaccuri *saṁ.* 361 i. e. 609–10 A. D. the grant is made for *bali*, *caru* and *agnihotra* and in the Damodarpur plates (dated 443–44 and 447–48 A.D.) the grants are made for agnihotra and for the performance of the five daily yajñas.[2227] During the centuries of Moslem domination no help from royalty could be expected and so the institution of Vedic sacrifices languished. In the last hundred years or so, solemn

2226. अग्निष्टोमातिरात्रवाजपेयबृहस्पतिसवसाद्यस्कचतुरश्वमेधयाजिनः । . These very words occur in the Dudia plates, E. I. Vol. III. p. 258 at p. 260.

2227. Vide E. I. vol. VI p. 294 at p. 298 ' बलिचरुवैश्वदेवाग्निहोत्रादिक्रियोत्सर्पणार्थम् ' (in Sarasvni plates) ; E. I. vol. XV. p. 113 ' अग्निहोत्रोपयोगाय ' (p. 130), ' पञ्चमहायज्ञप्रवर्तनाय ' (p. 133), बलिचरुसत्रप्रवर्तनगन्धधूपपुष्पमापणनधूपदीपाद्युपयोगाय ' (p. 143) of the Damodarpur plates.

Vedic sacrifices have been performed only rarely. But, since many of the gṛhya ceremonies as set forth in the gṛhya sūtras closely imitate the procedure of the Vedic fire cult and Vedic sacrifices formed the first and foremost manifestation of the sentiments of faith and worship in India, a work dealing with Dharmaśāstra cannot be said to have dealt with its subject completely and adequately if the treatment of Vedic sacrifices were left out altogether, the following bare outline is presented here, the more so as sacrifices were the first *dharmas* according to Ṛg. X. 90. 16.

The Śrauta-sūtras contain a very detailed, meticulously accurate and vivid description of the several sacrifices that were performed in ancient times. These works were manuals compiled for the practical purpose of giving directions to those who engaged in such sacrifices. They are based on ancient Brāhmaṇa texts, which they quote at every step, many individual sūtras being couched in the very language of the Brāhmaṇas, and on actual practice and only bring together what was in vogue. The object of the following pages is not to present a thorough and detailed treatment of Vedic sacrifices, but only to indicate what the cult of the Vedic sacrifice was like and to furnish a brief description of some prominent sacrifices. The treatment is mainly based on the Śrautasūtras of Āśv., Āp., Kāt., Baud., Satyāṣāḍha with occasional references to the Saṁhitās and Brāhmaṇas. The several divergences among the sūtras, the *paddhatis* and modern practice are not generally dwelt upon for the sake of saving space. One very useful work is a compilation called 'Śrautapadārthanirvacana,' by Nageshwar Shastri published in the Benares Sanskrit series, though one of its drawbacks is that it gives no references to any texts. The Mīmāṁsā-vidyālaya at Poona has prepared sets of all the utensils required in sacrifices and has published an album containing pictures of utensils and maps of various altars required in Vedic sacrifices. The Cāturmāsyas, the Paśubandha, the Jyotiṣṭoma have been described in some detail, the darśapūrṇamāsa has been dealt with *in extenso*, and other sacrifices have been only briefly touched upon in this work.

We find that even in the remotest ages when the hymns of the Ṛgveda Saṁhitā were composed and compiled, the main features of the sacrificial system had been evolved. That there were three fires appears clear from Ṛg. II. 36. 4 (where Agni is asked to sit down in three places), I. 15. 4, V. 11. 2 ('men

kindle Agni in three places'). The Gārhapatya fire is expressly named in Ṛg. I. 15. 12. The three *savanas* (i. e. pressings of Soma in the morning, mid-day and evening) are mentioned in Ṛg. III. 28. 1 (prātaḥ-sāva), III. 28. 4 (mādhyandina savana), III. 28. 5 (tṛtīya savana), III. 52. 5–6 and in IV. 12. 1 (where it is said that the sacrifice gives food to Agni three times on all days), IV. 33. 11. It may be affirmed that the sixteen priests[2228] required in Soma sacrifices were probably well-known to the composers of the Ṛgveda hymns; Ṛg. I. 162. 5 mentions hotṛ, adhvaryu, agnimindha (agnit or āgnīdhra), grāvagrābha (grāvastut), śaṁstā (praśāstṛ or maitrāvaruṇa), suvipra (brahmā?); Ṛg. II. 1. 2 refers to hotṛ., potṛ., neṣṭṛ, agnit, praśāstṛ (maitrāvaruṇa), adhvaryu, brahmā; Ṛg. II. 36 speaks of hotṛ, potṛ (v. 2), āgnīdhra (v. 4), brāhmaṇa (brāhmaṇāccha*m*sin) and praśāstṛ (v. 6). In Ṛg. II. 43. 2 we have *udgātā*. In Ṛg. III. 10. 4, IX. 10. 7, X. 35. 10, X. 61. 1 seven hotṛs are referred to and in Ṛg. II. 5. 2 the potṛ priest is spoken of as the 8th. The word 'purohita' occurs very frequently (Ṛg. I. 1. 1, I. 44. 10 and 12, III. 2. 8, IX. 66. 20, X. 98. 7). The Ṛgveda names Atirātra (VII. 103. 7), Trikadruka (II. 22. 1, VIII. 13. 18, VIII. 92. 21, X. 14. 16). The yūpa (the post to which the sacrificial animal was tied) and its top called caṣāla are

---

2228. The sixteen priests (ṛtvij) are : होता मैत्रावरुणोऽच्छावाको ग्रावस्तुदध्वर्युः प्रतिप्रस्थाता नेष्टोन्नेता ब्रह्मा ब्राह्मणाच्छंस्याग्नीध्रः पोतोद्गाता प्रस्तोता प्रतिहर्ता सुब्रह्मण्य इति । आश्व. श्रौ. IV. 1. 6, आप. श्रौ. X. 1. 9. Of these hotṛ, adhvaryu, brahmā and udgātṛ are the four principal ones and the three that follow each of them in the above enumeration are their assistants. The functions of the four principal priests are referred to in Ṛg. X. 71. 11. In Ṛg. II. 43. 1 we have the singer of Sāmans. In Agnihotra only adhvaryu is required, in the Agnyādheya, Darśapūrṇamāsa and other iṣṭis four priests are required viz. adhvaryu, āgnīdhra, hotṛ and brahman; in the Cāturmāsyas five are required viz., the four (of darśapūrṇamāsa) and the pratipasthātṛ; in the animal sacrifices a sixth is added viz., the maitrāvaruṇa. In Soma sacrifices all sixteen are required. In the cāturmāsya called sākamedha the āgnīdhra is addressed as *brahmaputra* (vide Āsv. Śr. II. 18. 12) and this may explain Ṛg. II. 43. 2 (cited on p. 27 above) where the word 'brahmaputra' occurs). Vide Tai. Br. II. 3. 6 and Baud. II. 3 for these provisions about the number of priests required. Some added a 17th priest called *sadasya* and Baud. II. 3 gave him three assistants also, though the Śat. Br. X. 4. 2. 19 forbids the employment of a 17th priest. There are other persons required in a sacrifice, such as the Śamitṛ, the aamasādhvaryus, but they are not called *ṛtvij*. Vide Ap. XXII. 1. 3-6 for the Trikadruka called Jyotir, Gauḥ and Āyuḥ.

mentioned in Rg. I. 162. 6. Rg. III. 8 is full of the praise of the yūpa. The person who killed the animal sacrificed (the śamitṛ) is mentioned in Rg. 162. 10 and V. 43. 4. The Gharma (the pot of boiled milk required in the Pravargya rite or perhaps the Dadhigharma in the mādhyandina savana) is mentioned in Rg. III. 53. 14, V. 30. 15, V. 43. 7. It was believed that the animal offered in a sacrifice went to heaven.[2229] Fire for sacrifice was produced by attrition from two *araṇis* (vide Rg. III. 29. 1-3, V. 9. 3, VI. 48. 5). The darvi (Rg. V. 6. 9), sruc (Rg. IV. 12. 1, VI. 11. 5), juhū (Rg. X. 21. 3) are mentioned in the Rg. Numerous verses in praise of gifts occur in the Rg. which have been pointed out above (pp. 837-839). In Rg. III. 53. 3 there is a clear reference to the call or permission sought by the hotṛ (āhāva) and the response of the adhvaryu (*pratigara*).[2230] Rg. X. 114. 5 speaks of the twelve *grahas* (cups) of Soma. In Rg. I. 28. 1-2 reference is made to the broad-bottomed stone (grāvan) used for beating Soma stalks, the mortar in which Soma is pounded and the adhiṣavaṇa (pressing) board. In Rg. I. 20. 6, I. 110. 3, I. 161. 1 and VIII. 82. 7 the wooden vessel called 'camasa' used for drinking Soma is spoken of. The word 'avabhṛtha' (concluding bath in a Soma sacrifice) occurs in Rg. VIII. 93. 23. In Rg. X. 51. 8-9 the words prayāja and anuyāja occur. The ten Āprī hymns of the Rgveda indicate that at the time of their composition the animal sacrifice had already some of the principal features that are seen in the śrauta sūtras.

Some of the general rules applicable in all śrauta rites may be stated once for all. Vide Āśv. śr. I. 1. 8-22. Unless otherwise expressly stated, the sacrificer should always face the north, should sit down cross-legged, and the sacrificial materials (like kuśa grass &c.) should have their ends pointed towards the east. The sacred thread should be worn in all rites in the *upavīta* form, except where the nivīta or prācīnāvīta form is expressly ordained; wherever a limb (aṅga) is mentioned or no particular limb is mentioned, it is the right limb (hand, foot, finger) that is meant; wherever the word 'dadāti' (he

2229. न वा उ एतन्म्रियसे न रिष्यसि देवाँ इदेषि पथिभिः सुगेभिः । हरी ते युञ्जा पृषती अमूतासुपास्थाद्वाजी धुरि रासभस्य ॥ ऋ. I. 162. 21. Vide also Rg. I. 163. 13. The Tai. Br. III. 7. 7 has the first half of Rg. I. 162. 21 and reads the 2nd half as ' यत्र यन्ति सुकृतो नापि दुष्कृतस्तत्र त्वा देवः सविता विधातु '

2230. In the morning *savana* the hotṛ seeks permission in the words शोंसावोम् and the adhvaryu responds with 'शंसामो दैवोम्'.

gives) is used the yajamāna (the sacrificer) is the agent of the action. Kāt. śr. I. 10. 12 states that the yajamāna is the actual performer in the case of gifts or repeating texts where the word 'vācayati' occurs in the sūtras or in anvā-rambhaṇa, or in choosing a boon, in the case of observances (such as truthfulness), and in the case of measures (i. e. when it is said that a thing should be of the height of a man, it is the sacrificer's height that is meant). When any rite is prescribed without expressly stating the performer, it is the hotṛ who does it and in the case of *prāyaścittas* wherever the words 'juhoti' and 'japati' occur the brahmā priest is the agent to do those latter acts. When the first *pāda* of a ṛk is mentioned for being employed in any rite the whole verse is intended to be recited; when the first words of a hymn are mentioned for being employed in a rite, but the words quoted in the sūtra do not amount to a *pāda*, the whole hymn is to be repeated in that rite; wherever more than the first pāda of a verse is mentioned, it is intended that three verses are to be recited (that verse and the two following). Japa, āmantraṇa, abhimantraṇa, āpyāyana, upasthāna and mantras that indicate the rite that is being performed are to be recited in a low voice (upāṁśu). A special rule (apavāda or viśeṣavidhi) is stronger than a general rule (prasaṅga).

Other general propositions are: Yāga (sacrifice) is constituted by *dravya* (material), *devatā* (deity) and *tyāga* and yāga means abandonment of *dravya* intending it for a deity; *homa* means the offering of dravya in fire intending it for a deity. Yajatis (sacrificial rites) for which no express reward is declared [2231] by the texts are the aṅga (subordinate part) of the principal yāga. Mantras are of four categories viz. ṛk, yajus, sāman and nigada; [2232] ṛks are metrical; a yajus has no restriction as to metre, but it is a complete sentence (Kāt. śr. I. 3. 2); a sāman is sung; nigadas are *praiṣas* i. e. words addressed to another calling upon the latter to do a certain thing e. g. 'prokṣaṇīr-āsādaya, srucaḥ sammṛḍḍhi' (Kāt. Śr.

2231. यजतयश्चाफलसंयुक्तास्तद्वत्। कात्या. श्रौ. I. 2. 4; vide जैमिनि IV. 4. 34 for a similar rule.

2232. The division into ṛk, yajus, and sāman was made even before the Ṛk-saṁhitā was composed. For ṛk, vide Ṛg. X. 71. 11 and X. 90. 9, for *yajus* Ṛg. V. 62. 5 and X. 90. 9, for sāman Ṛg. VIII. 95. 7 and I. 164. 25 (the two famous chants called Rathantara and Gāyatra are named). The word 'nivid' occurs in Ṛg. I. 96. 2.

II. 6. 34). They are yajus, but they are distinguished from ordinary *yajus* formulæ by the fact that nigadas are uttered loudly, while ordinarily a yajus is recited in a low voice. Jaimini in II. 1. 38–45 brings out this distinction between ordinary *yajus* and nigada. Vide Jaimini II. 1. 35–37 for the definitions of ṛk, sāman and yajus. Verses from the Ṛg. and Sāmaveda are recited loudly, all yajus are muttered in a low voice except āśruta (i. e. passages like 'āśrāvaya'), pratyāśruta (the response 'astu śrauṣat'), pravara-mantra (agnir devo hotā &c., set out in note 1139 above), saṃvāda (requests and permissions as in 'brahman, shall I sprinkle with water' and 'yes, do sprinkle'), sam-praiṣa (summons to do something as 'prokṣaṇīr-āsādaya). Loudness is of three kinds, high-pitched, middle-pitched and low-pitched. The Sāmidhenī verses are to be recited in a middle pitch, all mantras in the rites from anvādhāna upto ājyabhāga in Jyotiṣṭoma and prātaḥ-savana are to be recited in a low pitch, while in all rites in darśapūrṇamāsa the mantras are to be recited in a low pitch from ājyabhāga to sviṣṭakṛt. The rest of the mantras in darśapūrṇamāsa after sviṣṭakṛt and in Tṛtīya Savana are to be recited in high pitch. Mantras that are being recited at the time of doing anything (and produce the idea 'I shall do it') are to be recited first and then the act is to be begun (e. g. cutting is to be done immediately on reciting 'iṣe tvā'). Vide Jaimini XII. 3. 25. An act is to be begun to be performed the moment the reciting of a mantra accompanying it is finished (Kāt. I. 3. 5–7). Utkara is the spot where the dust of the Vedi is swept up and *praṇītā* is water kept in a vessel to the north of the āhavanīya after repeating a mantra over it. The sacrificial ground where the fires are maintained is called vihāra (Śabara on Jaimini XII. 2. 1 says 'vihāra iti gārhapatyādiragnistretocyate viharaṇāt'). The way for going to or coming from the vihāra is between the praṇītā (water) and utkara in the case of iṣṭis (i. e. to the east of utkara and to the west of praṇītā) and between the utkara and the cātvāla pit in other cases (Āp. śr. I. 1. 4–6, Kāt. śr. I. 3. 42–43). This path for going to the vihāra is called tīrtha. The cātvāla is a pit which is required only in soma and animal sacrifices. Many sacrificial utensils are required out of which the sruva (which may be called the dipping spoon) is made of khadira wood and is one aratni in length and has a mouth (or bowl) that is rounded and is as wide as the front joint of the thumb. The *sruc* (offering ladle) is one cubit in length, has a bowl at one end of the shape and

size of the palm, that has a spout resembling a swan's bill in shape. Sruc is of three kinds: juhū (ladle) made of palāśa, upabhṛt of aśvattha and the dhruvā is made of vikaṅkaṭa wood and all other sacrificial utensils are made of vikaṅkaṭa, but those that are not directly connected with homa are made of varaṇa tree; the sword called sphya is made of khadira (Kāt. I. 3. 31–39). The principal *yajñapātras* (or yajñāyudhas as they are often called) are given in the note below.[2233]

All saṁskāras (like adhiśrayaṇa, paryagnikaraṇa, heating a sacrificial utensil) are to be done (except when expressly stated

---

2233. The Tai. S. I. 6. 8. 2–3 says 'यो वै दश यज्ञायुधानि वेद सुखतोस्य यज्ञः कल्पते स्रुग्श्च कपालानि चाग्निहोत्रहवणी च शूर्प च कृष्णाजिनं च शम्या चोलूखलं च मुसलं च दृषच्चोपला चैतानि वै दशयज्ञायुधानि।'. Vide also Śat. Br. I. 1. 1. 22 for these ten and Kāt. II. 3. 8. Jaimini III. 1. 11 says that the passage about the ten yajñāyudhas is a mere anuvāda and not a vidhi and hence all are not to be employed in all actions, but only where each is suitable or is prescribed by a special text. Vide also Jai. IV. 1. 7–10. The adhvaryu or yajamāna places the *pātras* in twos at a time. The kapālas (potsherds) whatever their number form one pātra; they are pieces broken from a jar. The pairs are: sphya (the wooden sword) and kapāla, then the śūrpa (made of split bamboo or of *naḍa* grass or of reed) and agnihotra-havaṇī and so on. The com. on Kāt. II. 3. 8 says that whatever pātras may be required in the several rites are to be got ready and he enumerates many such pātras. The juhū, upabhṛt and dhruvā symbolically represent respectively the right arm, the left arm and the trunk of yajña. Vide Śat. Br. I. 3. 2. 2. The number of kapālas varies according to the rite that is performed and the sūtra of the performer. Besides the ten principal ones enumerated above there are others that are required viz. जुहू, उपभृत्, ध्रुक्, ध्रुवा, प्राशित्रहरण, इडापात्र, नेक्षण, पिष्टोल्हपनी, प्रणीताप्रणयन, आज्यस्थाली, वेद, दारुपात्री, पोक्त्र, वेदपरिवासन, धृष्टि, इध्मप्रव्रश्चन, अन्वाहार्यस्थाली, नदन्ती, फलीकरणपात्र, अन्तर्धानकट. Vide com. on Kāt. I. 3. 36 for the names and sizes of all these and other utensils and for directions on the materials of which they are to be made. When the person who has maintained the sacred fires dies he is cremated with his Vedic fires and his wooden sacrificial vessels 'आहिताग्निमग्निभिर्दहन्ति यज्ञपात्रैश्च' quoted by Śabara on Jaimini XI. 3. 34. Vide Śat. Br. XII. 3. 5. 2. This is what is called प्रतिपत्तिकर्म of the utensils. This means that the utensils are placed on the several limbs of his corpse (e. g. the juhū in the right hand) and his body and they are burnt together. That is the final disposal of the yajñapātras. Jaimini (XI. 3. 43–44) declares that though the yajñapātras are set out in the 'śruti' texts when speaking about paurṇamāsī iṣṭi, still they are to be made ready at agnyādheya and are to be kept throughout since that date till the sacrificer's death and that their cremation with the sacrificer's body is their final disposal (pratipatti).

to the contrary) by the gārhapatya fire, but the cooking of a *havis* may be done on either gārhapatya or āhavanīya according to one's sūtra. When the material is not specified, *homa* is performed with clarified butter and all homas are done in the āhavanīya when there is no express text and the juhū ladle is to be employed in offering homa (Kāt I. 8. 44–45). Those parts that are to be done with Ṛg. mantras are to be done by the hotṛ priest (unless there be a special direction or reason to the contrary), the adhvaryu does what is to be done with Yajurveda, the udgātṛ with Sāmaveda and the brahmā priests with all the three Vedas [2234] (vide Ait. Br. 25. 8). Brāhmaṇas alone are to be priests (Jai. XII. 4. 42–47). The sacrificer's wife is seated south-west of the gārhapatya fire and her face is turned towards the north-east (Kāt. II. 7. 1). At the beginning of an iṣṭi or other rite five operations (called bhūsaṁskāra) are to be performed on the mound (khara) of the āhavanīya and also on that of the dakṣiṇā fire viz. parisamūhana (sweeping round with wet hand) thrice from the east to the north, smearing thrice with cowdung (gomaya-upalepana), drawing with the wooden sword (sphya) three lines from south to north but towards the east (i. e. the last is to be in the east) or from east to west but towards the north, to remove the dust from those lines with the thumb and the ring finger, and sprinkling thrice with water (abhyukṣaṇa).

Agnyādheya [2235]

Gaut. (VIII. 20–21) enumerates seven *haviryajñas* and seven *somasaṁsthās*. Agnyādheya is the first of the seven *haviryajñas*. Agnyādheya is the same as agnyādhāna. It is an *iṣṭi*, which word means 'a sacrifice performed by a sacrificer and his wife with the help of four priests' (vide above note 2228). The details of a model iṣṭi are given later on under darśapūrṇamāsa. Agnyādheya occupies two days, the first day called *upavasatha* being taken up by preliminary matters and the 2nd with performance of the main rites. There are two times for the performance of agnyādheya. It may be done on one of the seven nakṣatras, viz., Kṛttikā, Rohiṇī, Mṛgaśīrṣa, Pūrvā Phalgunī, Uttarā Phalgunī, Viśākhā, Uttarā Bhādrapadā. Āp. adds other nakṣatras viz. Hasta, Citrā and states the several

2234. तदाहुर्महाधवाः । यद्वैव होत्रं क्रियते यजुषाध्वर्यवं साम्नोद्गीथं ब्रह्मत्वं त्रयी विद्या भवति । अथ केन ब्रह्मत्वं क्रियत इति । ऋच्या विद्ययेति ब्रूयात् । ऐ. ब्रा. 25. 8.

2235. For the treatment of *agnyādheya* vide Tai. Br. I. 1. 2–10, I. 2. 1, Śat. Br. II. 1 and 2; Āśv. II. 1. 9 ff, Āp. V. 1–22, Kāt. IV. 7–10, Baud. II. 6–21.

appropriate nakṣatras when the sacrificer desires certain results (V. 3. 3–14). According to Śat. Br. II. 1. 2. 17 and Āp. V. 3. 13 a kṣatriya should consecrate sacred fires on the Citrā nakṣatra. Or agnyādheya may be done on a parva day in spring by a brāhmaṇa, in summer, in the rainy season and autumn respectively by a kṣatriya, a vaiśya and an upakruṣṭa (for the latter vide p. 74 above). But even when choosing the season, one must have regard to the seven nakṣatras specified above. Āp. states that the setting up of the fires may take place on Full moon or New moon day and that *hemanta* or *śarad* is the proper season for a vaiśya, the rainy season for a rathakāra (carpenter) or all the varṇas may first consecrate the fires in *śiśira* (Āp. V. 3. 17–20). Vide Jai. II. 3–4 about the meaning of the Vedic passage 'a brāhmaṇa should set up fires in spring' (Tai. Br. I. 1. 2). The Śat. Br. (III. 1. 2. 19) appears to condemn the setting up of fires by reliance on nakṣatras and recommends (XI. 1. 1. 7) that agnyādhāna should be performed on the New moon of Vaiśākha on which there is Rohiṇī nakṣatra. In case of difficulty one may perform agnyādheya in any season and if one has resolved upon performing a soma sacrifice one need not stop to consider the season or nakṣatra. The man who wants to perform agnyādheya must not be too young nor too old (vide p. 979 above).

Agnyādheya means the placing of burning coals for the generation of the gārhapatya and other fires at a particular time and place by a particular person to the accompaniment of certain mantras.[2236] Agnyādheya comprehends the several acts from the bringing of the *araṇis* (two wooden logs) to the offering of pūrṇāhuti. When this last takes place the person who engages in the rites attains the position of an āhitāgni (one who has consecrated the sacred Vedic fires). Agnyādhāna is meant for all sacrificial rites and not merely for enabling a man to perform darśapūrṇamāsesṭi (Jai. III. 6. 14–15, XI. 3. 2). The sacrificer should bring home through the adhvaryu priest two araṇis from an aśvattha tree that grows inside a śamī tree with the *mantra* 'yo aśvatthaḥ śamī-garbhaḥ' (Āśv. II. 1. 17). The branch to be cut must be one on the east or north side of the tree and its foliage must be turned towards the east or north. When the branch falls on the ground the portion of it that

2236. नारायण on आश्व. श्रौ. II. 1. 9. explains 'विशिष्टकाले विशिष्टदेशे विशिष्टपुरुषेण विशिष्टैर्मन्त्रैर्गार्हपत्याद्यग्न्युत्पत्त्यर्थं यद्दारूणां निधानं तदग्न्याधेयमुच्यते । अग्नीनामाधेयमग्न्याधेयं तत्कर्तव्यमित्यर्थः ।'.

touches the ground should be used for making the lower *araṇi*. Two araṇis (logs of the branch) should be cut off, planed and formed into rectangular pieces and they should be allowed to become dry. In the lower araṇi there is a spot called *devayoni* (the place of origin of the god i. e. fire) which is 8 and 12 aṅgulas from the two ends of the lower araṇi (of 24 aṅgulas) where by means of a drill inserted in the upper araṇi fire is produced by attrition. According to Baud. each araṇi is 16 aṅgulas long, twelve in breadth and 4 in height, while according to Kāt. (as quoted in com. on Āp.) it is 24 aṅgulas long. According to Āp. (V. 1. 3) the aśvattha may not be growing inside a śamī tree. The two araṇis are invoked (abhimantraṇa) with the formula 'aśvatthād...dhehi āyur-yajamāne' (Tai. Br. I. 2. 1.) and the adhvaryu brings together on the altar (vedi) seven items that are earthy and seven items that are of wood or five of each or 8 earthy items (if those of wood are seven). The eight earthy items are : sand, saltish earth, the earth from a hole infested by mice, the earth from an ant-hill, the clay (sūda) from the bottom of a reservior of water that never dries up, earth that is struck by wild boars, pebbles, gold (Āp. V. 1. 4 ff.) with mantras appropriate[2237] to each. The seven wooden items are : (parts of) aśvattha, udumbara, parṇa (palāśa), śamī, vikaṅkaṭa, a tree struck by lightning (or by wind or cold) and a lotus-leaf. Baud. II. 12 enumerates these somewhat differently. The sacrificer prepares a raised place for worship (devayajana)[2238]

2237. In Tai. Br. I. 2. 1 occur most of the mantras referred to by Āp. under agnyādheya.

2238. Several rules are laid down about the choosing of the place of worship (devayajana) in Śat. Br. III. 1. 1, Ait. Br. I. 3, Drāhyāyaṇa Śr. I. 1. 14–19 &c. It should be the highest place and in its vicinity there should be no spot which is on a higher level than it, it should be even and firm and incline towards the east or north, being a little higher in the south. It should have many plants growing on it and in front of it there should be water (a well &c.) or a large tree or a public road. The Śat. Br. III. 1. 1. 5 emphasizes that if one secures learned and skilful priests it does not matter what kind of sacrificial ground one selects. The Ait. Br. I. 3 requires that the dīkṣita is to walk about and sit usually in the devayajana, and he must not leave it at all at sunrise, sunset and when priests are engaged in *āśrāvaṇa* (saying 'O śrāvaya'). Vide Sāyaṇa on Tai. S. I. 2. 1 for yajñaśālā and com. on Kāt. VII. 1. 19–24 for the same. The yajñaśālā is called 'dīkṣitavimita' in the Ait. Br. I. 3 and it is the same as prācīnavaṃśa-śālā. Iṣṭis are performed in the prācīnavaṃśa-śālā, but the Uttaravedi required in animal, soma and some other sacrifices is outside it. Further rules are given under Agniṣṭoma.

sloping towards the east with the mantra 'uddhanyamānamasya' (Tai. Br. I. 2. 1), sprinkles it with water to the accompaniment of the mantra 'śam no devīr' (Ṛg. X. 9. 4=Tai. Br. I. 2. 1), and constructs a shed having the end of the principal bamboo or ridge turned northwards or eastwards. Beneath the middle of the ridge of the hut towards one end is the place (*āyatana*) meant for the gārhapatya fire; the place of the āhavanīya fire is to the east of the gārhapatya at a distance of eight prakramas[2239] for a brāhmaṇa, eleven and twelve for a kṣatriya and vaiśya respectively or all may have it 24 steps (pada) or at a distance found by the eye to approximate to the distances stated (without actual measurement). The place for the dakṣiṇāgni is near the gārhapatya to the south-east after a third of the distance between the gārhapatya and āhavanīya. There are to be separate sheds for the āhavanīya fire and the gārhapatya in elaborate sacrifices but for the ordinary sacrifices like darśapūrṇamāsa one shed only is usually constructed which houses all the three fires. It is laid down that only Vedic rites are to be performed with the three fires, and that they were not to be used for ordinary cooking or for secular purposes (vide Jaimini XII. 2. 1–7). The sabhya fire is to be established in front of the āhavanīya in the gambling hall and the āvasathya fire is in a shed (for guests) to the east of the sabhya.[2240]

The sacrificer gets the hair on the head and face shaved, pares his nails and then bathes; the wife also does the same except shaving the hair on the head. The husband and wife are to establish fires after wearing two silken garments each, which are to be given up to the adhvaryu at the time of distributing dakṣiṇā (after the rite of agnyādheya is finished). The sacrificer should perform the *saṁkalpa* (words indicating resolve) of performing agnyādheya and choose his priests (ṛtvig-varaṇa)

2239. According to the com. on Āp. V. 4. 3 a *prakrama* is equal to two or three *padas*, a pada being 15 aṅgulas (Baud.) or 12 aṅgulas (Kāt.). But the com. on Kāt. VIII. 3. 14 says that a pada is equal to two prakramas. The gārhapatya was also called prājahita (vide Jaimini XII. 1. 13) and the Dakṣiṇāgni was called anvāhāryapacana, because on it was cooked the boiled rice with which piṇḍa-pitṛyajña was performed on the new moon. Vide Manu III. 123, Tai. Br. I. 1. 10 and 'दक्षिणाग्नावन्वाहार्यं पचति' quoted by शबर on जै. XII. 2. 3.

2240. The com. on Āp. V. 17. 1 notices divergent views about sabhya and āvasathya fires, some holding that these were not to be established at all, others holding that they are optional, while Āp. makes them obligatory.

by touching their hands with appropriate mantras and offer them madhuparka (vide Āp. X. 1. 13-14 for the mantras 'agnir-me hotā &c.). In the afternoon or when the sun is over the trees the adhvaryu should fetch a portion of fire from the aupāsana (gṛhya fire) and kindle a fire called brāhmaudanika (one prepared for brahmaudana)[2241] to the west of the place for the gārhapatya or he may take up the whole of the *aupāsana* fire (of the yajamāna) or he may generate fire by attrition. He should prepare a sthaṇḍila (an altar of sand &c.) and should draw thereon three lines from west to east and three lines from south to north and should sprinkle water on the sthaṇḍila and then he should bring burning coals from the aupāsana fire and place them on the lines so drawn. If he takes up the whole of the aupāsana fire, then he should take on two leaves of udumbara a cake of barley flour and another of rice and should throw on the place of the brāhmaudanika fire the barley cake to the west and the rice cake to the east and then establish the fire thereon. The adhvaryu puts apart at night to the west of the brāhmaudanika fire on the red hide of a bull having the neck part to the east and the hair outside or on a bamboo utensil four dishfuls of rice[2242] grains after repeating the mantra 'devasya' and with the words 'I set apart what is pleasing to prāṇa that is brahman,' which are repeated four times (with prāṇa, apāna, vyāna and lastly with brahman only) or he may do so silently. He cooks the grains (of rice or barley) in four vessels filled with water, he does not cleanse the rice grains with his hand after pouring them into the water, nor does he drain off the water while cooking; some cook the grains in milk. From the cooked food (the brahmaudana) he takes some in a spoon (darvī) and offers it into (the brahmaudanika) fire with the mantra 'pra vedhase kavaye' (Rg. V. 15. 1 = Tai. Br. I. 2. 1). He should say 'this is for Brahman; not mine.' Having put the cooked food separately into four dishes and pouring plenty of ghee over it, the sacrificer draws the plates over the ground towards the priests without letting them go and brings them near the four priests who are descendants of illustrious sages. The remaining portion of the brahmaudana

---

2241. The reason why ब्रह्मौदन is so called is given by Sāyaṇa on Tai. Br. I. 1. 9 'ब्रह्माणं देवमुद्दिश्य होमार्थं ब्राह्मणानामृत्विजां च प्राशनार्थं च पच्यमान ओदनो ब्रह्मौदनः'.

2242. The putting apart of grains from a large receptacle on to a smaller receptacle for use in sacrifice later on is called *nirvāpa*.

is drawn out of the pots, the rest of the clarified butter is poured over it and three *samidhs* of a citriya[2243] aśvattha that are wet (not dry), that are a span in length and have on them their leaves and fruits are dipped therein and turned about therein with a mantra and then they are put on the fire to the accompaniment of three gāyatrīs (addressed to Agni) for brāhmaṇas, three Triṣṭubhs for kṣatriyas and three Jagatīs for vaiśyas (the verses are set out in Āp. V. 6. 3).

When the *samidhs* are offered into fire he (sacrificer) gives three heifers to the adhvaryu and a similar number to each of the brāhmaṇas who eat the brahmaudana. This brahmaudana along with the gifts of heifers and offering of samidhs may be performed daily for one year before the date of agnyādhāna. These samidhs must be offered by everyone intending to set up the three sacred fires 12 days, three days, two days or a day before the day of *agnyādheya*. He (sacrificer) has to keep certain observances viz. he does not partake of flesh, does not cohabit, others do not take away fire from his house; he subsists (for three days) only on milk or on boiled rice, he has to speak the truth and to avoid sleeping on a cot. If for some reason the sacrificer is unable to perform agnyādheya in a year (or 12 days &c.) from the time he offered brahmaudana he should again cook brahmaudana, offer the samidhs and then should perform agnyādhāna when he can do so.[2244] On the night previous to the day of agnyādhāna the adhvaryu (according to Bharadvāja, all the priests) keeps certain observances viz. he does not eat flesh nor does he approach his wife.

On that night a goat having dark spots on its skin is tied towards the north of the place for the gārhapatya fire with a mantra 'prajā' agne &c.'. The yajamāna observes a vow of silence on that night and people keep him awake that night by playing upon a lute and a flute (but there is an option viz. he may not keep awake nor observe silence). The sacrificer remains awake the whole of that night placing pieces of wood on the brāhmaudanika fire with the verse 'śalkair-agnim &c.' (but if he does not keep awake he heaps on the fire logs of wood

---

2243. The Tai. Br. (I. 1. 9.) employs the words 'citriyāśvatthasyādadhāti' and Sāyaṇa explains 'अश्वत्थग्रामोऽश्वत्थचित्रक इत्युच्यते । योऽश्वत्थो ग्रामादेश्चिह्नीभूतस्तदीयाः समिध आदध्यात् ।'

2244. The Tai. Br.. I. 1. 9 says 'ब्रह्मौदनं पचति' ... ग्राभ्नन्ति ब्राह्मणा ओदनम् । ... पशोर्न संवत्सरे नोपनमेत्तस्मिन् पुनरादध्यात् ।'.

at one time and then goes to sleep).[2245] At day-break the adhvaryu heats the two araṇis against that fire with two verses 'jātavedo bhuvanasya &c.' and 'ayam te yonir-ṛtviyaḥ' (both in Tai. Br. I. 2.1). Then the brāhmaudanika fire is extinguished, the two araṇis are invoked with the verse 'agnī rakṣāṁsi' and the yajamāna keeps waiting for the araṇis that are brought with the verse 'mahī viśpatnī.' The adhvaryu hands over the araṇis to the sacrificer with the verse 'dohyā ca te', who receives them with a verse and immediately invokes them with two verses. Both (adhvaryu and yajamāna) repeat in a low voice the formula 'mayi gṛhṇāmyagre &c.'. The adhvaryu arranges the place for the gārhapatya with the verse 'apeta vīta' and sprinkles it with water with 'śam no devīr.' He does the same for the places (āyatanas) of the dakṣiṇa fire (to the south-east) and of āhavanīya, sabhya and āvasathya fires. Even since ancient times there have been agnihotrins who did not set up the sabhya and āvasathya fires. Half of the sand (that has already been brought among the *sambhāras*) is divided into two parts, one (i. e. $\frac{1}{4}$ of the whole heap) being scattered over the place of the gārhapatya and the other ($\frac{1}{4}$) over the place of the dakṣiṇāgni. The other half of the sand heap is divided into three parts each of which is scattered in the places of the other three, āhavanīya, sabhya and āvasathya (but if no sabhya nor āvasathya is to be kept then the half is entirely scattered over the āhavanīya place). In the same way the other earthy materials are placed over the places of the fires with appropriate mantras. After he places the lime stones or pebbles on the various places he brings to his mind his enemy. Then he spreads the various materials on the fire places and after mixing together the materials of wood to the accompaniment of two mantras he scatters them just as he scattered the sand (after dividing them as stated above). He casts to the north over the materials a piece of gold on the place of the gārhapatya[2246] and invokes it with a mantra and assigns at a distance a piece of silver for his enemy or throws it into water if he has no enemy. The same process (of casting a golden piece) is followed as to the places of the other fires. He removes the ashes of the brāhmaudanika fire (that

2245. Tai. Br. I. 1. 9 has 'शल्कैस्तां रात्रिमग्निमिन्धीत। तस्मिन्नुपपशुपधमरणी निधेत्। Most of the mantras required here occur in Tai. Br. I. 2. 1.

2246. Though gold is among the earthy materials, it was not dealt with while the other earthy things were being divided.

has been extinguished as stated already) and in its place deposits the two araṇis from which he produces fire by drilling. When the first rays of the sun spread in the sky (i. e. before the sun's disc is seen, but the eastern horizon is lit up by rays) he places the upper araṇi on the lower one to the accompaniment of the 'daśa-hotṛ'[2247] formulae. While generation of fire by attrition is proceeding a white or red horse from whose eyes no water drops (i. e. who is not blear-eyed) and whose knee is dark (or any horse with full testicles) is kept present and a *sāman* of Śakti Sāṅkṛti is sung; when smoke rises a *sāman* of Gāthina Kauśika is sung and also the verse 'araṇyor-nihito' (Rg. III. 29. 2).

He (the adhvaryu) invokes the fire with the mantra 'upāvaroha jātavedaḥ' (Tai. Br. II. 5. 8) the moment it is produced. Then the adhvaryu makes the sacrificer recite the *catur-hotṛ* (mantras)[2248] and invokes the fire when kindled with the mantra 'ajannagniḥ'. When the fire is produced the yajamāna bestows on the adhvaryu the most desirable fee (i. e. a cow), which he accepts with a mantra. After the fire is produced, the yajamāna breathes over it with the formula 'prajāpatistvā' (Tai. S. IV. 2. 9. 1). The adhvaryu holds over the fire his folded hands turned downwards with a verse, makes it blaze forth by means of fuel-sticks with the words 'samrāḍasi' (Tai. S. IV. 3. 6. 2), holds it in his folded hands turned upwards, sits down on a seat and while the Rathantara and Yajñāyajñiya sāmans are being chanted, he establishes the gārhapatya fire on the *sambhāras* (the earthy and wooden materials scattered as above) by repeating certain mantras according as the sacrificer

---

2247. The daśa hotāraḥ are the ten sentences occurring in Tai. Ā. III. 1. viz. ओं चित्तिः स्रुक्। चित्तमाज्यम्। वाग्वेदिः। आधीतं बर्हिः। केतो अग्निः। विज्ञातमग्निः। वाक्पतिर्होता। मन उपवक्ता। प्राणो हविः। सामाध्वर्युः।. Vide Ait. Br. 24. 6 for the ten in a different order. It should be noted that here ten things connected with the human body are identified with ten things connected with *homa*.

2248. The *catur-hotṛs* are the mantras in Tai. Ā. III. 1–5 commencing with 'cittiḥ sruk'. Vide also Tai. Br. III. 12. 5 and note 904. The Ait. Br. 24. 4 says 'देवानां वा एतद्यज्ञियं मुखं नाम यच्चतुर्होतारः'. The daśahotṛ mantras in the preceding note are only a portion of the catur hotṛ (vide Sāyaṇa on Tai. Br. III. 12. 5). In the Tai. Br. I. 1. 8 it is said एषन्तरमभिगायते गार्हपत्य आधीयमाने। ... ... वामदेव्यमभिगायत उद्यूह्यमाणे। ... ... बृहदभिगायत आहवनीय आधीयमाने।

has a certain gotra[2249] (or pravara) and the first vyāhṛti (i. e. bhūḥ) or the first two vyāhṛtis (bhūḥ, bhuvaḥ), the first two Sarparājñī formulæ and the first of the Gharmaśiras texts. The formula for establishing the gārhapatya according to the gotra is stated in note 2249. When establishing the gārhapatya on the *sambhāras* the adhvaryu further repeats certain mantras (given in Āp. Śr. V. 12. 2) and then the yajamāna invokes the fires with the mantra 'sugārhapatyo' (Tai. Br. I. 2. 1) and the adhvaryu makes the yajamāna repeat the Gharmaśiras formulæ. The adhvaryu strews darbhas round the gā-hapatya (i. e. he does paristaraṇa).

The procedure for establishing the āhavanīya is to be so arranged that the fire is actually established when half of the sun's disc rises above the eastern horizon. The adhvaryu lights fuel-sticks on the gārhapatya for being carried forward and he takes in a vessel the sand on which fire would be supported to the accompaniment of four verses. Then while carrying the fire, he raises a little the kindled bundle of fuel-sticks and holds the fire on the sand. Then the adhvaryu makes the yajamāna repeat in the right ear of the horse the Agnitanū formulæ (set out in Āp. Śr. V. 13. 7), holds the fire for some time and then lays it down in the place for the āhavanīya.

2249. When the sacrificer is a Bhārgava the formula is भृगूणां त्वा देवानां व्रतेनादधामीति भार्गवस्यादध्यात्. If he is an Āṅgirasa or any brāhmaṇa who is not a Bhārgava or Āṅgirasa the formulæ are respectively अङ्गिरसां त्वा &c. and आदित्यानां त्वा. In the case of a king, a kṣatriya, a vaiśya or a rathakāra sacrificer the formulæ respectively are वरुणस्य त्वा राज्ञो व्रतपते ... दधामि, इन्द्रस्य त्वेन्द्रियेण व्रतपते...दधामि, मनोस्त्वा ग्रामण्यो व्रतपते ... दधामि, ऋभूणां त्वा देवानां &c. Vide तै. ब्रा. I. 1. 4. for the mantras भृगूणां त्वा &c. The सर्पराज्ञी formulæ are भूमिर्भूम्ना द्यौर्वरिणान्तरिक्षं महित्वा उपस्थे ते देव्यदितेऽग्निमन्नाद्यायादधे । &c. in तै. सं. I. 5. 3 and in I. 5. 4 it is stated सर्पा वै जीर्यन्तोऽमन्यन्त स एतं कसर्णीरः काद्रवेयो मन्त्रमपश्यत् ... ... सर्पराज्ञियाऋभिर्गार्हपत्यमादधाति &c. सत्याषाढ says (III. 4) 'भूमिर्भूम्नेति चतस्रः सर्पराज्ञियः.' The formulæ called *gharmaśirāṁsi* are set out in Āp. śr. V. 12. 1 and Satyāṣāḍha III. 4. They occur in तै. ब्रा. I. 1. 7 and are : घर्मः शिरस्तदयमग्निः सं प्रियः पशुभिर्भुवत् । छर्दिस्तोकाय तनयाय यच्छ ॥ वातः प्राणस्तदयमग्निः सं प्रियः पशुभिर्भुवत् । त्वचिर्तं तोकाय तनयाय पितुं पच्च ॥ अर्कश्चक्षुस्तदसौ सूर्यस्तदयमग्निः सं प्रियः पशुभिर्भुवत् । यत्ते शुक्रं शुक्रं घर्मः शुक्रा तनूः शुक्रं ज्योतिरजस्रं तेन मे दीदिहि तेन त्वादधेऽग्निनाग्ने ब्रह्मणा ॥. Out of these घर्मः ... ... यच्छ is repeated when establishing गार्हपत्य, वातः प्राण ..... पच्च, when establishing अन्वाहार्यपचन (दक्षिणाग्नि) and अर्कश्चक्षु ..... ब्रह्मणा when establishing आहवनीय. Vide तै. ब्रा. I. 1. 8 for this. The Gārhapatya mound is circular, that of the Āhavanīya is square and that of the Dakṣiṇāgni is semi-circular. All three are about one square *aratni* in area.

The Āgnīdhra priest then brings domestic fire or produces fire by attrition, sits down with his knees raised up, and establishes the dakṣiṇāgni, while the Yajñāyajñīya sāman is being chanted and follows the procedure of repeating formulæ according to the gotra (as above) and repeats the 2nd vyāhṛti (bhuvaḥ), the three Sarparājñī formulæ and the 2nd Gharmaśiras (viz. the verse 'vātaḥ ... ... paca'). After repeating several other formulæ (as in Āp. Śr. V. 13. 8) he sets down dakṣiṇa fire on the *sambhāras*.

The fire brought for establishing[2250] dakṣiṇa fire may be fetched from the house of a brāhmaṇa, a kṣatriya, a vaiśya or a śūdra who is extremely prosperous like an asura (if the sacrificer desires prosperity), but he should thereafter never eat at that man's house; or (according to Baud. Śr. II. 17) it may be brought from the gārhapatya fire or according to Āśv. from the house of a vaiśya or of any rich man or it may be produced by attrition.

When the āhavanīya fire is being taken (in a vessel) from the gārhapatya the Vāmadevya is chanted and they proceed towards the east preceded by the horse,[2251] repeating three mantras. To the south of the *vihāra* the brahmā priest makes a chariot or a chariot wheel move up till three revolutions of the wheel take place (six times for an enemy). A third part of the distance (between the gārhapatya and the place for āhavanīya) the fire is carried at the height of the knee, the 2nd third at the height of the navel, the last third at the height of the mouth. No one is to come between the sun and the fire. He takes the fire with both his hands stretched to the right. In the middle of the distance the yajamāna gives a gift to the priest. In the middle of the distance the adhvaryu puts down a piece of gold and then crosses over it with the mantra 'nākosi.' The adhvaryu makes the horse that faces the east go over the sambhāras to their north with its right hoof placed in such a way that the live coals of the fire when established would fall on the foot-print made by the horse and making the horse turn to its right he again makes the horse go over the sambhāras with a formula 'yadakrandaḥ' (Ṛg. I. 163. 1). The horse is held

2250. अपि वा गार्हपत्यादेवान्वाहार्यपचनमादधाति । बौ. श्रौ. II. 17; उत्सर्गेऽपराह्णे दक्षिणाग्निमानीय विद्रुकुलाद्वित्तवतो वैकयोनेय इत्येके म्रियमाणं वा प्रज्वलयारणिमन्तं वा मथित्वा गार्हपत्यादाहवनीयं ज्वलन्तमुद्धरेत् । आश्व. श्रौ. I. 2. 1.

2251. Vide Tai. Br. I. 1. 7 for the mantra प्राचीमनुप्रदिशं (which is mentioned in Āp. V. 14. 5) and the words प्राञ्चोऽश्वमधना अभिप्रयान्ति.

facing the west to the east of the place for the āhavanīya. The horse must be young and according to Paiṅgyāyani Brāhmaṇa a young bull may do (if a horse is not available). According to the Bahvṛca Brāhmaṇa the (āhavanīya) fire should be established on the footmark of an animal called Kamaṇḍalu or of a goat (according to Vājasaneyaka). Then the sacrificer mutters auspicious formulæ[2252] and sends to his enemy (a curse) with the formula 'go to him, O fire, with thy terrible forms.' Having invoked the fire with the verse 'Yad-idam divaḥ' (Tai. Br. I. 2. 1) he turning his face to the west and standing to the east establishes the āhavanīya fire. The āhavanīya is laid down upon the sambhāras when the Bṛhat Sāman, the Śyaita, Vāravantīya and Yajñāyajñiya are being chanted, and the procedure of repeating consecrating mantras according to gotra is being followed, when all the vyāhṛtis, all the Sarpa-rājñī mantras, the third Gharmaśiras formula and certain other verses are recited.[2253] The sacrificer invokes the āhavanīya when it is being established with the formula 'ānaśe &c.' (which occurs in Tai. Br. I. 1. 7) and he follows the priest (whether adhvaryu or āgnīdhra) in repeating the various vyāhṛtis, the Sarparājñī verses and the Gharmaśiras formulæ. The fire when established should be propitiated with clarified butter and plants (i. e. fuel-sticks) after repeating certain formulæ (set out in Āp. V. 16. 4). The sāmans are sung by the brahmā priest in Agnyādheya (and there is no udgātṛ priest).[2254]

The *sabhya* and āvasathya fires are established with domestic fire or fire produced by attrition or with fire taken from the

Tai. Br. I. 1. 7 has the words यजमानः शिषा जपति and the verses ये ते &o. (set out in Āp. V. 15. 2).

2253. The verses 'abhi tvā śūra' (Ṛg. VII. 32. 22), 'kayā naścitra' (Ṛg. IV. 31. 1), 'tvām-iddhi havāmahe' (Ṛg. VI. 46. 1), 'aśvam na tvā vāravantam' (Ṛg. I. 27. 1), 'abhi pra vaḥ surādhasam' (Ṛg. VIII. 49. 1), 'yajñāyajñā vo' (Ṛg. VI. 48. 1) are respectively the sāmans called Rathantara, Vāmadevya, Bṛhat, Vāravantīya, Syaita and Yajñāyajñiya. All these verses occur in the Sāmaveda (vide vol. III. p. 83, 87, 330, vol. I. p. 120, 483 and 147 respectively, B. I. series). Vide Tai. S. V. 5. 8. 1-2, Ait. Br. 19. 6 for the names of these and other *sāmans*. Jai. (III. 3. 9) declares that, though sāman verses are as a rule to be chanted loudly, in ādhāna they are to be uttered inaudibly (upāṁśu), since ādhāna is to be done with yajurveda procedure.

2254. Jaimini in Pūrva-mīmāṁsāsūtra (X. 8. 9-11) discusses the question whether the brahmā priest must chant these gānas or whether there is an option. Vide Tai. Br I. 1. 8.

āhavanīya, according to the mode of establishment dependent on the gotra as stated above. He puts on each fire three samidhs of the aśvattha tree with three verses (Ṛg. IX. 66. 19, 21, 20) and three samidhs of śamī smeared with ghee after repeating certain mantras (Ṛg. IV. 58. 1–3). Or these samidhs may be offered in the āhavanīya (if sabhya and āvasathya are not kept up).

Then he offers a pūrṇāhuti,[2255] the sacrificer gives gifts, mutters certain auspicious formulæ, waits in worship upon the five (or three) fires. Then if the yajamāna is a kṣatriya dice play takes place. The gifts given to all the four priests are cloth, a cow and bull, and a new chariot, while a goat, pūrṇapātra and a pillow of several coloured threads are given to the āgnīdhra, a horse to brahmā, a bull to adhvaryu, and a dhenu to the hotṛ. There are larger gifts specified according to the sacrificer's ability.

Kāt. (IV. 10. 16) ordains that after establishing the Vedic fires the yajamāna should observe complete celibacy for 12 nights, 6 nights or at least three nights, should sleep near the fires on the ground (and not on a cot), should offer *homa* of milk to the fires. Baud. II. 20 prescribes further observances for twelve days.

Punarādheya: When within a year after a man sets up the Vedic fires he suffers from severe illness (such as dropsy) or suffers loss of wealth or his son dies or his near relatives are harassed or made captive by his enemies or he becomes cripple in a limb, or if he is desirous of prosperity or fame he again sets up the fires. The procedure is essentially the same as for agnyādheya with a few differences e. g. fires are fed with kuśa

---

2255. The com. on Kāt. IV. 10. 5 explains पूर्णया स्रुचा आहुतिः पूर्णाहुतिः. The procedure ordinarily applying to all āhutis of clarified butter is: The adhvaryu puts butter into the butter-pot, which is placed on the gārhapatya fire to melt. Having wiped the sruva (dipping spoon) and juhū (offering spoon) with darbha grass and having taken the butter pot off the fire he dips two darbha blades used as strainers (*pavitra*) into the heated butter and fills the juhū with the sruva. Then he takes a *samidh*, walks over to the north side of the āhavanīya, strews darbha grass round it and puts the samidh on that fire. Then he sits down with bent right knee, pours the butter in the juhū on to the fire with the word svāhā and the sacrificer utters the formula 'agnaya idam na mama'. This holds good in agnyādheya and agnihotra, but in many other rites the principal (pradhāna) offerings are offered while the priest is standing.

grass and not with wood nor with fuel-sticks, the two ājyabhāgas are for agni alone (while in the model sacrifice they are for Agni and Soma), the punarādheya is performed in the rainy season and at mid-day. Other differences and details are passed over.[2256] Jai. (VI. 4. 26–27) states that punarādheya is a prāyaścitta only if both the fires (gārhapatya and āhavanīya) have been extinguished or discontinued and (in X. 3. 30–33) that when punarādheya is resorted to for some desired object, the fees that are prescribed in agnyādhāna are not the fees to be given, but other dakṣiṇā is given.

Agnihotra

According to Gau. VIII. 20 there are seven forms of haviryajñas of which agnihotra is the second. From the evening of the day of *agnyādheya* the house-holder has to perform agnihotra[2257] (burnt offering of cow's milk &c.) twice daily in the evening and morning to the end of his life or till he becomes a saṁnyāsin, or as the Śat. Br. (XII. 4. 1. 1) says 'Those who offer agnihotra indeed enter upon a long sacrificial session; agnihotra indeed is a *sattra* that ends with old age or death, since he becomes free from it only by old age or death.' Satyāṣāḍha prescribes (III. 1) that from the time of setting up the three śrauta fires, agnihotra and darśapūrṇamāsa are obligatory on all members of the twice-born classes and he holds that the niṣāda and rathakāra also are bound to perform them, though other sūtrakāras are opposed to this. Vide pp. 45–47 above. Jai. (VI. 3. 1–7 and 8–10) holds that agnihotra being obligatory, it may be undertaken even by him who is not able to perform every detail of it in its entirety, but that a kāmya rite should be undertaken only by him who is able to carry out every detail. Vide also Jai. II. 4. 1–7 where 'yāvajjīvam-agnihotram juhoti' is explained as laying down a

---

2256. Vide Tai. S. I. 5. 1–4, Tai. Br. I. 3. 1, Sat. Br. II. 2. 3, Āśv. II. 8. 4–14, Āp. V. 26–29, Kāt. IV. 11, Baud. III. 1–3 for details.

2257. The word agnihotra is derived in the Tai. Br. II. 1. 2 as the rite in which *homa* is offered to Agni and Sāyaṇa says अग्नये होत्रं होमोऽस्मिन्कर्मणि इति चतुर्थीहिश्चुत्पत्त्याऽग्निहोत्रमिति कर्मनाम । अग्नये होत्रमिति तदुक्तवच्युत्पत्त्या हविर्नाम. Vide Jai. I. 4. 4 (which establishes that in अग्निहोत्रं जुहोति स्वर्गकामः the word 'agnihotra' is the name of a rite). The Sat. Br. XII. 4. 1. 1 says 'दीर्घसत्रं ह वा एत उपयन्ति येऽग्निहोत्रं जुह्वत्येतद्वै जरामर्यं सत्रं यदग्निहोत्रं जरया वाव ह्येवास्मान्मुच्यते मृत्युना वा'. सत्याषाढ (III. 1) says 'आधानादग्निहोत्रं दर्शपूर्णमासौ च नियतौ। निषादरथकारयोराधानादग्निहोत्रं दर्शपूर्णमासौ च नियच्येते।'.

characteristic required of the performer. The several sūtras present differing details and mantras.[2258] According to one view all the three fires are permanently maintained by the house-holder[2259] (Kāt. IV. 13. 5); according to others only the gārhapatya is permanently kept (Āp. VI. 2. 13) and the dakṣiṇāgni is permanently kept only if it was set up by attrition at the time when the house-holder performed agnyādheya. The house-holder calls upon the adhvaryu to bring the āhavanīya from the gārhapatya in the evening and also in the morning; this is so only if the yajamāna engages an adhvaryu in the daily agnihotra, but if the yajamāna does the daily agnihotra himself this call is unnecessary. As to the dakṣiṇāgni in the daily agnihotra, Āśv. (II. 2. 1) mentions several alternatives viz., it may be brought from the house of a vaiśya or from the house of any rich man or it may be produced by attrition or it may be kindled into flames if it is kept permanently. He should take burning coals from the kindled gārhapatya in a vessel and carry them to the place of the āhavanīya with the mantra 'devam tvā devebhyaḥ śriyā uddharāmi' and should repeat when carrying the burning coals towards the east the mantra 'raise me up from sin that I knowingly or unknowingly may have committed; save me from all the sin that I may have committed in the day' (this in the evening agnihotra, in the morning agnihotra it being said 'sin that I committed at night'). Vide Āśv. II. 2. 3 and 6, Āp. VI. 1. 7, Baud. III. 4. He should face the sun and place the burning coals in the āhavanīya mound with the mantra (amṛtāhutim &c., in Āśv. II. 2. 4, Āp. VI. 1. 8, Baud. III. 4). In the morning agnihotra also he should face the sun and do other things stated above. According to Kāt. (IV. 13. 2) the evening agnihotra is to be commenced before the sun sets and the morning one before the sun rises. Āśv. says that the homa is performed

---

2258. Vide Śat Br. II. 2. 4 ff, Tai. Br. II. 1. 1–11, Ait. Br. 25. 1–7, Āp. 6, Kāt. 4. 12–15, Āśv. II. 2–5, Baud. III. 4–9, Sat. III. 7.

2259. Those called *gataśrī* perpetually maintain the three fires (Kāt. IV. 13. 5 and Āp. VI. 2. 12). They are a thoroughly learned brāhmaṇa, a victorious kṣatriya king and a vaiśya who is the leading man of his village. 'गतश्रियस्तु सर्वेऽग्नयः सदा धार्यन्ते। त्रयो ह वै गतश्रियः श्रुश्रुवान् ब्राह्मणः क्षत्रियो विजयी राजा वैश्यो ग्रामणीरिति' पद्धति in com. on Kāt. IV. 13. The word 'gataśrī' occurs in Tai. S. II. 5. 4. 4 and Śat. Br. I. 3. 5. 12. 'त्रयो वै गतश्रियः श्रुश्रुवान् ग्रामणी राजन्यस्तेषां महेन्द्रो देवता' तै. सं. II. 5. 4. 4. गतश्री is to be explained as 'गता गता श्रीर्यैनासौ, गता श्रीर्यमिति वा' com. on कात्या. IV. 13. 5.

after the sun sets. There have been two views on this point from very ancient times viz. whether agnihotra is to be performed before sunrise or after sunrise. Vide Ait. Br. 24. 4-6 and Kauṣītaki Br. II. 9. Āp. (VI. 4. 7-9) mentions four views as to both evening or morning time for agnihotra viz. it should be the *saṁdhi* of day and night for both or it may be when the first star is seen or in the first watch of the night or in the 2nd (for evening agnihotra) and at dawn, or when a part of the disc of the sun just appears on the horizon or after the sun comes up. The householder performs agnihotra after finishing his *saṁdhyā* adoration. There is a difference of opinion, some holding that the homa in the gṛhya fire should precede the agnihotra in the Vedic fires, while others hold that it should come after the Vedic agnihotra.[2260] The house-holder after performing saṁdhyā follows either of two modes (Kāt. IV. 13. 12 and IV 15. 2, Āp. VI. 5. 3, according to his śākhā), goes towards the āhavanīya through the space between the places of the gārhapatya and dakṣiṇāgni or by a route to the south of these two fire places and having gone round the āhavanīya sits down to the south in his usual place (or crosses from the western side of the āhavanīya and sits down to its south) and the wife also sits in her place (Kāt. IV. 13. 13, Āp. VI. 5. 1-2). The householder then sips water (performs *ācamana*) with the words ' vidyudasi vidya me pāpmānam-ṛtāt satyam-upaimi mayi śraddhā' (Āp. VI. 5. 3). The wife also sips water.[2261] Then both husband and wife should observe silence till the agnihotra (morning or evening) is gone through. A man who has no wife can perform the daily agnihotra (vide Ait. Br. 32. 8). The adhvaryu performs *parisamūhana* (wiping with the wet hand from the north-east to the north) thrice for the three fires. He strews round the

2260. संध्यावन्दनानन्तरं पूर्वमग्निहोत्रहोमस्ततः स्मार्ताग्नौ । तदुक्तम् । होमं चैतानिके कृत्वा स्मार्तं कुर्याद्विचक्षणः । स्मृतीनां वेदमूलत्वात्स्मार्तं केचित्पुरा विदुः ॥ इति । com. on कात्या. श्रौ. IV. 13. 12 and cited as भरद्वाज's in the चन्द्रोदय quoted in आचाररत्न p. 52.

2261. The paddhati in the com. on Kāt. IV. 13 remarks उपवेशनव्यतिरिक्तं पत्नी किमपि न करोतीति संप्रदायः । तच्च साधुतरम्. This shows how gradually the wife lost all importance in Vedic rites and came to be a mere silent spectator of all the weary details that had to be gone through by the sacrificer and the priest. Jaimini VI. 1. 17-21 stated generally that the husband and wife co-operated in performing yajña, but in VI. 1. 24 he qualifies the general statement by saying that the wife cannot do all the actions which are to be done by the sacrificer, but only those which she is expressly asked to do in the texts.

āhavanīya fire darbha grass (performs paristaraṇa) in such a way that the darbhas to the east and west have their ends turned to the north and of those to the north and south turned to the east and the strewing proceeds from the east, then to the south, then to the west and then to the north. In the same way he strews darbha grass round the gārhapatya and then round the dakṣiṇāgni. Taking water in his right hand, he sprinkles it round the āhavanīya first, beginning from the northeast and ending in the north. Then he walks towards the west pouring a continuous stream of water from the āhavanīya up to the gārhapatya. He then sprinkles (performs *paryukṣaṇa*) the gārhapatya from left to right and then the dakṣiṇāgni. Or one may sprinkle water (and this is the usual order now in the Deccan) round the gārhapatya first and then round dakṣiṇāgni and then pour a stream of water from the gārhapatya to the east up to the āhavanīya (Āśv. II. 2. 14). Āśv. (II. 2. 11–13) says that the mantra in paryukṣaṇa is 'ṛtasatyābhyām tvā paryukṣāmi' and each fire is sprinkled thrice, water being taken freshly at each time and the mantra being repeated each time and that sprinkling may first be done round the dakṣiṇāgni, then round gārhapatya and then āhavanīya. Vide Kāt. IV. 13. 16–18, Āp. VI. 5. 4.

The homa is performed with cow's milk for him who performs agnihotra as a sacred duty and not for any particular reward in view, but one who desires to secure a village or plenty of food, or strength or brilliance may employ respectively yavāgū (gruel), cooked rice, curds or clarified butter (Āśv. II. 3. 1–2). Then an order is issued to the person engaged to milk the agnihotra cow[2262] that stands to the south of the sacrificial ground with her face to the east or north and that has a male calf. At the time of milking the calf is to the south of the cow, and first sucks milk and then the calf is removed and the milking is done. The person to milk the cow should not be a śūdra (Kāt. IV. 14. 1), but Āp. (VI. 3. 11–14) allows even a śūdra to milk the cow, while Baud. (III. 4) says that he must be a brāhmaṇa. Rules are laid down about the udders from which milk is to be drawn and about persons for whom it is to be drawn (Śat. III. 7 based on Tai. Br. II. 1. 8). The milking is not to be begun by pressing the udders, but by making the

2262. Tai. Br. II. 1. 6 identifies the cow with agnihotra and II. 1. 7 states that the cow's milk in its various stages belongs to various deities since the time it is in the udder (when it is Raudra) till after it is offered (when it is dear to Indra).

calf suck them first (na stanān sammṛśati' Āp. VI. 4. 2 based on Tai. Br. II. 1. 8). Milking is to be begun the moment the sun sets (Āp. VI. 4. 5). The vessel in which the milk is to be held is of earthenware manufactured by an ārya (i. e. one who belongs to the three regenerate classes), but without using a wheel and the vessel must have a wide mouth and straight sides and not slanting ones (Kāt. IV. 14. 1, Āp. VI. 3. 7). It is called agnihotrasthālī (Āp. VI. 3. 15). The adhvaryu takes from the gārhapatya fire some burning coals for boiling the milk and keeps them to the north of the gārhapatya in a separate spot. Then he goes near the cow, holds the vessel in which the cow has been milked, brings it towards the east of the āhavanīya, sits to the west of the gārhapatya and heats the vessel on the burning coals mentioned above. He takes a darbha blade (other than one of those that are strewn round the gārhapatya), kindles it and holding it over the milk illuminates the milk with its light. He then takes water in a sruva and sprinkles one drop or some drops into the boiling milk (Āśv. II. 3. 3 and 5). He should then again hold a burning blade (the same blade used before) over the hot milk and light it up. He does this thrice and then casts away the blade to the north.[2263] There was a difference of view whether the milk to be offered should be brought to the boiling point or should only be simply hot (vide Śat. Br. II. 3. 1. 14-16 and com. on Kāt. IV. 14. 5). Then the pot of milk is slowly lifted with three mantras and drawn down to the north from the burning coals (Āśv. II. 3. 8, Tai. Br. II. 1. 3 'vartma karoti'). Then the burning coals on which the milk was boiled or heated are thrown back in the gārhapatya fire. Then a sruva and sruc both made of vikaṅkaṭa wood are cleaned with the hand (to remove dust) and are heated on the gārhapatya (or āhavanīya according to Āp. VI. 7. 1). He then again heats the sruc and sruva on the gārhapatya, asks the yajamāna 'shall I take out milk from the pot[2264] with the sruva)' and the yajamāna

2263. The Tai. Br. II. 1. 3 says उदीचोऽङ्गारान् निरूह्याधिश्रयति। घृतान् करोति। ... अभिघोषयति। ... त्रिः पर्यग्निकरोति। ... उदीचीनमुद्वासयति। . The sprinkling of water from the sruva on the milk is called pratiṣeka (Āp. VI. 6. 3-4). This is referred to in Tai. Br. II. 1. 3. The sruc with which agnihotra is offered is called agnihotra-havaṇī, which is made of vikaṅkaṭa wood, is as long as one's arm or *aratni* (Āp. VI. 3. 6 and com. thereon).

2264. Āp. VI. 7. 1 states that words addressed by the adhvaryu differ according to the time 'हिरण्मयादिरण्मयपलाशा श्रोतो यज्ञानामित्यग्निहोत्रहवणीमभिमन्त्र्योच्छ्रयेष्यानि हव्यं देवेभ्यः पात्मनो यजमानमिति सायमाह। श्रोक्षणयामीति प्रातः।'

replies standing 'Yes, do take out'. Then the adhvaryu holds in his right hand the sruva ladle and in his left hand the agnihotra-havaṇī with its mouth turned upwards, pours out into the agnihotra-havaṇī milk from the milk pot (already heated) with the sruva four times [2265] and keeps the sruva in the milk pot. In Āp. VI. 7. 7-8 and Āśv. II. 3. 13-14 it is said that the adhvaryu knowing the mind of the householder should draw the fullest ladle for the most favourite son of the sacrificer or if the latter desires that the eldest son should be most prosperous and the later ones less and less, then the first ladle is filled to the fullest; on the other hand if he wishes the youngest to be prosperous then the last ladle drawing is the fullest. Then the adhvaryu carrying a *samidh* of palāśa wood a span in length over the rod of the sruc (inserting his finger between the two), holds the two together over the gārhapatya very near its flames, carries the *sruc* towards the āhavanīya holding it as high as his nose; when in the midst of the distance between the gārhapatya and the āhavanīya, he brings the sruc down (to the level of his navel) and then again raising it up as high as his mouth, he reaches the āhavanīya and places the *sruc* and *samidh* on darbha blades (on the *kūrca*, says Baud. III. 5) to the west of the āhavanīya. He himself sits to the northwest of the āhavanīya facing the east, bends his knees, holds the sruc in his left hand and with the right hand offers the *samidh* [2266] in the midst of the āhavanīya fire with the mantra 'rajatām tvāgnijyotiṣam' (according to Āśv. II. 3. 15). Then he sips water with the mantra 'vidyud-asi vidya me pāpmānam-ṛtāt-satyam-upaimi' (Āp. VI. 9. 3, Āśv. II. 7. 16). When the samidh has caught fire and is burning brightly, he offers the first oblation (of milk) on the samidh about two finger-breadths from its root with the mantra 'om bhūr-bhuvaḥ-svarom, agnirjyotir jyotiragniḥ svāhā' (Vāj. S. III. 9). According to Kāt. he may optionally repeat the mantra

---

2265. Milk is poured five times for those who are called pañcāvattins such as householders whose gotra is Jamadagni (Āp. VI. 8. 2). According to Baudhāyana (pravarādhyāya 5) Vatsas, Bidas and Āṛṣṭiṣeṇas are pañcāvattins. Āp. sets out the five mantras repeated at each of the five times when *milk is poured with the sruva*.

2266. The mantras differ according to the sūtra. According to Āp. VI. 9. 3 one samidh or two or three may be offered and he prescribes different mantras for the three. The Tai. Br. II. 1. 3 upholds the offering of only one samidh.

'sajūr devena' (Vāj. S. III. 10). According to Āp. (VI. 10. 8)[2267] in the evening agnihotra the mantra is 'agnirjyotir' &c; while in the morning agnihotra it is 'sūryo jyotir-jyotiḥ sūryaḥ svāhā' (Vāj. S. III. 9). Then he places the sruc on the kuśa blades and looks at the gārhapatya with the thought 'bestow on me cattle'. Then he again takes up the sruc, makes a second offering (of milk) which is larger in measure than the first one, but this is offered silently, while he contemplates upon Prajāpati in his mind[2268]. This second offering is made to the east or north of the first in such a way that the two will not come in contact. He keeps more milk in the sruc than what is taken up in making the second offering. He then raises the sruc twice (thrice according to Āp. VI. 11. 3) in such a way that the flames of the fire turn north-wards and places the *sruc* on the kūrca. He scours with his hand turned downwards the spout of the ladle and then rubs his hand to which some drops of the milk stick on the north side of the kūrca (the points of the kuśas that are towards the north) with the words 'salutation to the gods' (Kāt. IV. 14. 20) or 'to you for securing cattle'. Āp. (VI. 10. 10) says that he scours in the evening the *sruc* (in order to remove what sticks to it) from the end of the handle down to the bowl with the mantra 'iṣe tvā' (Tai. S. I. 1. 1. 1.) and in the morning from the bowl to the end of the ladle with the mantra 'ūrje tvā' (Tai. S. I. 1. 1. 1). Then while the palm is turned upwards, and while he wears his sacred thread in the prācīnāvīta mode he places his fingers to the south of the roots of the kuśa blades on the ground silently or with the mantra 'svadhā pitṛbhyaḥ' (Kāt. IV. 14. 21 and Āśv. II. 3. 21) or 'svadhā pitṛbhyaḥ pitṝn jinva (Āp. VI. 11. 4). Then he sips water (but with the sacred thread in the upavīta form) with his face turned to the east. Then he walks to the place of the gārhapatya, takes a fuel-stick (samidh) in his hand while standing. He then sits down to the northwest of the gārhapatya with his face turned towards the

2267. The Tai. Br. II. 1. 2. says तस्माद्‌ग्नये सायं हूयते सूर्याय प्रातः ।. According to the Tai. Br. II. 1. 9 the mantras are 'अग्निर्ज्योतिर्ज्योतिरग्निः स्वाहेति सायं जुहोति ... सूर्यो ज्योतिर्ज्योतिः सूर्यः स्वाहेति प्रातः ।'. Āp. VI. 10. 8 has the same words. Āp. VI. 10. 9 (alternatively) and Śat. III. 7. prescribe a joint mantra for a joint deity 'अग्निर्ज्योतिर्ज्योतिः सूर्यः स्वाहेति सायं सूर्यो ज्योतिर्ज्योतिरग्निः स्वाहेति प्रातः'.

2268. Vide तै. सं. II. 5. 11. 5 'तस्मान्मनसा प्रजापतये जुह्वति', Śat. Br. I. 3. 5. 10, Tai. Br. II. 1. 2. आश्व. II. 3. 19 says प्रजापतिं मनसा ध्यायात् तूष्णीं होमेषु सर्वत्र.

east, bends his knee, offers the *samidh* in the gārhapatya fire, then drawing out in the sruva milk from the pot offers it into the fire with a mantra ('tā asya sūdadohasaḥ' Ṛg. VIII. 69. 3, according to Āśv. II. 3. 26, or 'iha puṣṭim puṣṭipatir.....puṣṭipataye svāhā', according to Kāt. IV. 14. 23). He offers a second oblation of milk by the sruva silently according to Kāt. (IV. 14. 24) or with the words 'bhūrbhuvaḥ svaḥ suprajāḥ prajābhiḥ syām suvīro vīraiḥ suposaḥ poṣaiḥ' and with at least any three verses addressed to Agni and with the verses 'agna āyūṁṣi pavase' Ṛg. IX. 66. 19–21 (according to Āśv. II. 3. 27–29). Then he offers one oblation of milk with the sruva ladle into the dakṣiṇāgni with the words 'annādāyānna-pataye svāhā' and a second one silently. He then touches water, turns northwards and with one of his fingers (with the ring finger 'anāmikā' according to Kāt. IV. 14. 26) he takes out what remains in the sruc and licks it noiselessly without allowing it to come in contact with his teeth. He then sips water and licks it a second time and then sips water. He then takes into another vessel or on his own palm all remnants (of milk &c.) in the sruc and licks the contents of the vessel or his palm once with his tongue. According to Āp. (VI. 11. 5 and VI. 12. 2) and Baud. III. 6 he holds the sruc in such a way that its rod is turned east or north, and licks [2269] the sruc itself twice, fills it with water, pours down to the west the water (from the ladle) with the mantra 'propitiate those who partake of leavings', sips water, and wipes the agnihotrahavaṇī with darbha blades. Then he washes his hand, performs ācamana twice, goes near the āhavanīya, sits down, fills the sruc with water and spills the water from the ladle to the north of the āhavanīya with the words 'devān jinva;' he repeats the same process again and wearing the sacred thread in the prācīnāvīta form and turning to the south he pours water to the south of the āhavanīya for the pitṛs with the words 'pitṝn jinva'. He then repeats the same process as for gods and sprinkles water upwards in the north-east a third time with the words 'sapta-ṛṣīn jinva'. He fills the sruc a fourth time, removes the darbhas from the place (kūrca-sthāna) where they were placed to the west of the āhavanīya,

2269. The licking of the agnihotrahavaṇī is one of the actions forbidden in the Kali age 'अग्निहोत्रहवण्याश्च लेहो लीढापरिग्रहः' quoted in Sm. C. I. p. 12;' vide com. on Śat. III. 7 'प्राग्दण्डयोदग्दण्डया वा स्रुचा द्विराचामति द्विश्च निर्लेढि' where it is said 'अत्र स्मृतावग्निहोत्रहवण्याः कालौ लेहनप्रतिषेधात्तस्याचमनमपि प्रतिषिद्धमतो हस्तेनेत्याह भाष्यकृत्।'

pours down water on that place thrice, so as to end the stream in the east or north. He then heats the sruc and sruva on the āhavanīya fire together and keeps them on the antarvedi or hands them over to an attendant. He then offers three samidhs to each of the three fires in the order in which he performed paryukṣaṇa (i. e. in the order āhavanīya, gārhapatya, dakṣiṇāgni, or gārhapatya, dakṣiṇāgni, āhavanīya). After this the house-holder engages in waiting upon agni with *vātsapra* prayers or in a brief worship by repeating only ' bhūrbhuvaḥ svaḥ &c.' (Vāj. III. 37); then he pays silent homage to the āhavanīya and sits near it for a moment; then he sleeps or sits near the gārhapatya; then he performs paryukṣaṇa for all the fires, then the householder breaks silence and performs ācamana and then when he goes out he contemplates in mind the dakṣiṇāgni. The wife also performs ācamana (at the end) silently.

According to Kāt. (IV. 12. 1-2) the upasthāna (worship or homage) of the fires in the evening after oblations are offered in agnihotra with the Vātsapra mantras (Vāj. S. III. 11. 36 and Śat. Br. II. 3. 4. 9-41) is optional and the householder may simply repeat one verse (Vāj. S. III. 37 and Śat. Br. II. 4. 1. 1-2). Āp. (VI. 16. 4 and 6) prescribes as upasthāna the six verses ' upaprayanto ' (Tai. S, I. 5. 5) and several others, which are passed over for want of space. There were several views about upasthāna, some holding that upasthāna was to be performed only in the evening and not in the morning, others holding that it was to be performed at both times but only with the Vātsapra mantras (Ṛg. X. 45) or with the Gosūkta (Ṛg. VI. 28) or Aśvasūkta (Ṛg. I. 163). Vide Āp. VI. 19. 4-9 to VI. 23.

Āp. (VI. 15. 10-13) has certain interesting rules about agnihotra in the case of kṣatriyas. At first he says a kṣatriya should permanently maintain the āhavanīya fire, but he does not perform the daily agnihotra. He should however send food from his house to a brāhmaṇa at the time when the agnihotra homa is ordinarily performed, whereby he secures the performance of agnihotra, but the adhvaryu should make the rājanya recite the mantras of the worship of fire (agnyupasthāna noted above). A rājanya however who has performed somayāga and always speaks the truth may perform agnihotra daily. Āśv. (II. 1. 3-5) says that a kṣatriya (and a vaiśya) may perform agnihotra on the New Moon and Full Moon days, that on other

days he should send cooked food to a brāhmaṇa who is devoted to his duties and that a kṣatriya or vaiśya who always abides by truth (in thought and word) and has offered a soma sacrifice may engage in daily agnihotra. It is probable that these rules were made to allow more time to kṣatriyas and vaiśyas for their chief occupations. According to Āp. VI. 15. 14–16, Āśv. II. 4. 2–4 and others the householder should every day personally perform the agnihotra, but if he cannot do that, he must do it personally at least on *parva* days and on other days a priest, a pupil or a son may perform his agnihotra for him.

The procedure in the morning agnihotra is the same as the evening agnihotra except in a few details e. g. the paryukṣaṇa mantra in the morning is different in Āśv. II. 4. 25 'satyaṛtābhyām tvā paryukṣāmi', while in the evening it is 'ṛtasatyābhyām tvā &c.' (Āśv. II. 2. 11), the samidh is offered into fire in the morning with the mantra 'hariṇīm tvā sūryasjyotiṣam-aharisṭakām-upadadhe svāhā' (while in the evening the mantra is 'rajatām tvāgnijyotiṣam rātrim-iṣṭakām-upadadhe svāhā' Āśv. II. 4. 25 and II. 3. 15); the mantra in offering an oblation of milk in the fire in the morning is 'bhūrbhuvaḥsvarom, sūryo jyotir jyotiḥ sūryaḥ svāhā', while in the evening the word 'agniḥ' is substituted for 'sūryaḥ' (Āśv. II. 4. 25 and II. 3. 16). Vide Kāt. IV. 15 for further details.

The sūtras set out rules about what the householder is to do when he leaves his homa for one night or for a longer period. Vide Śat. Br. II. 4. 1. 3–14, Āśv. II. 5, Āp. VI. 24–27, Kāt. IV. 12. 13–24. According to Āśv. the important rules are: he kindles the fires into flames, sips water (ācamana) and performs the worship of the āhavanīya, gārhapatya and dakṣiṇāgni by going near them and repeating respectively the three mantras 'śaṁsya paśūn me pāhi', 'narya prajām me pāhi' and 'atharva pitum me pāhi' (all three in Vāj. S. III. 37). Then while standing near the dakṣiṇāgni he should look at the other two with the mantra 'imān me mitrāvaruṇāu gṛhān gopāyatam ..... punarāyanāt' (Kāṭhaka S. VII. 3., Mai. S. I. 5. 14, with variations). He then traces the same way back and comes to the āhavanīya and offers worship to it with the mantra 'mama nāma' (Tai. S. I. 5. 10. 1, quoted in note 553 above). He should then start on his journey without looking back at his fires and should mutter the hymn 'mā praṇama.' When he reaches a place from which the roof of his fire-house is not visible he may break silence. On reaching the road leading from his house to

his destination he should recite 'sadā sugaḥ' (Rg. III. 54. 21). When he returns from his journey to his village, he should repeat 'api panthām' (Rg. VI. 51. 16). He should then observe silence, take fuel-sticks in his hand and on learning that his fires have been kindled into flames (by his son or pupil) he should look at the āhavanīya with two verses (set out in Āśv. II. 5. 9). Then placing the samidhs he does homage to the āhavanīya with the verse 'mama nāma tava ca' (Tai. S. I. 5. 10. 1) and then he places samidhs on the āhavanīya, gārhapatya and dakṣiṇāgni with one mantra each (which are Vāj. S. III. 28-30).

These rules apply when the house-holder alone goes on a journey leaving the wife at home. When the house-holder is away alone it is his duty to perform all actions at the time of agnihotra and darśapūrṇamāsa (such as sipping water) which he can perform without his fires and to go mentally [2270] through the whole procedure and to observe all vratas (such as subsisting on roots and fruits when required). Vide Āp. IV. 16. 18, Kāt. IV. 12. 16 and com. thereon. When he goes on a journey alone he should entrust his fires to his wife and should appoint a priest to perform the necessary rites (vide note 1634 above). When the house-holder starts on a journey accompanied by his wife he should take his fires with him. If both husband and wife go on a journey without taking their fires with them, then a priest cannot offer the agnihotra homa in their absence and on return the house-holder has to again set up the fires (has to perform *punarādhāna*).[2271]

2270. 'मनसा नैत्यकं कर्म प्रवसन्नप्यतन्द्रितः । उपावेक्ष्य शुचिः सर्वं यथाकालमनुव्रजेत् । गोभिलस्मृति II. 157; प्रवसन् विहारमभिमुखो याजमानं जपति । आप. IV. 16. 18.

CHAPTER XXX

DARŚA-PŪRṆAMĀSA [2272]

The Darśapūrṇamāsa sacrifice is the pattern or archetype (*prakṛti*) of all other iṣṭis (which are called vikṛtis or modifications). The śrauta sūtras therefore describe first the Darśapūrṇamāsa at length, though in the order of time agnyādhāna comes first. Āśv. II. 1. 1 says that all iṣṭis, sacrifices in which an animal is offered and those in which soma is offered are explained by the Paurṇamāsa iṣṭi. According to Āp. III. 14. 11–13 a person, after he sets up the three fires, has to perform the Darśapūrṇamāsa throughout his life (till he becomes a saṁnyāsin) or for thirty years (after which he may stop) or till he becomes very old (and unable to perform the rite).[2273]

The word 'amāvāsyā' literally means 'the day when (the sun and the moon) dwell or are together.' It is that *tithi* (day) on which both the sun and the moon are the nearest to each other, while paurṇamāsī is 'the *tithi* on which the sun and the moon are at the greatest distance from each other.' Pūrṇamāsa means 'that moment when the moon is full.' *Darśa* has the same sense as amāvāsyā. Darśa is taken to mean 'the day on which the moon is seen only by the sun and by no one else.' Darśa (*m*) and pūrṇamāsa (*m*) secondarily mean the rites that are performed on the amāvāsyā and the paurṇamāsī respectively.[2274] An iṣṭi means a sacrifice in which the sacrificer employs four priests.

2272. Vide Tai. S. I. 1. 1–13, I. 6–7, II. 5–6, Śat. Br. I. (S. B. E. vol. 12 pp. 1–273), Āśv. I. 1. 4–I. 13. 10, Āp. I–IV, Kāt. II–IV. 5, Baud. I.

2273. 'यावज्जीवं दर्शपूर्णमासाभ्यां यजेत' quoted by Śabara on Jai. X. 8. 36. Vide Śat. Br. XI. 1. 2. 13 (S. B. E. vol. 44, p. 5) for 30 years. तस्माद् यावज्जीवं यजेत। त्रिंशतं वा वर्षाणि। जीर्णो वा विरमेत्। Āp. III. 14. 11–13.

2274. Vide वैजयन्ती on सत्याषाढ (I. 1. 'संपूर्णे वा') "गोभिलः। यः परमो विप्रकर्षः सूर्याचन्द्रमसोः सा पौर्णमासी यः परमः संनिकर्षः साऽमावास्या। ... तथा पूर्णो मासश्चन्द्रमा यस्मिन्क्षणे स इष्यपि पूर्णमासस्य निर्वचनदर्शनात्। ... यतो न दृश्यते सूर्यसहभावात्ततो 'अमावस्यदन्यतरस्याम्' (पाणिनि 3. 1. 122) इति पाणिनिस्मृत्यापि च सह वसतश्चन्द्रार्कावस्मिन्निति स्वमावास्याशब्दस्तथा च सूर्येणैव दृश्यते नान्येनेति दर्शशब्दो व्याख्यातः।".

A sketch of the darśapūrṇamāsa iṣṭi is given below principally based upon the śrautasūtras of Satyāṣāḍha and Āśvalāyana.

One who has performed agnyādheya should begin the performance of darśapūrṇamāsa on the first Full Moon day after it. The iṣṭi on the Full-moon day may occupy two days, but all the actions to be performed in it can be compressed into one day.[2275] If extended over two days it is performed on the full moon day and the *pratipad* (the first day of the dark half that follows the Full Moon day), the former being called *upavasatha* day[2276] and the latter *yajanīya* day. On the upavasatha day agnyanvādhāna (offering fuel-sticks into fire) and paristaraṇa are performed in the case of the pūrṇamāsa rite and on the yajanīya day the rest is performed. If it is the first pūrṇamāsa iṣṭi or the first darśa iṣṭi, then the sacrificer has to perform the Anvārambhaṇīyā iṣṭi, which is briefly described in the note below.[2277]

On the morning of the full moon day the sacrificer, after the performance of his daily agnihotra, sitting on a seat of darbhas to the west of the gārhapatya, holding kuśa grass in his hand and performing prāṇāyāma and accompanied by his wife, makes a *saṁkalpa* (resolve) as noted below.[2278] Then he says to the four priests viz., adhvaryu, brahmā, hotṛ and āgnīdhra

---

2275. Vide com. on Kāt. II. 1. 16–17 'पौर्णमासे यद् द्वयहकर्तव्यमुक्तं तदेकस्मिन्नेवाहन्यग्न्यन्वाधानादि कर्मापवर्गान्तं भवति। अस्मिन्पक्षे प्रातः प्रतिपद्दिन एव सर्वमग्न्यन्वाधानादि कर्मापवर्गान्तं कर्तव्यम्। न पूर्वेद्युरग्न्यन्वाधानदिने प्रतिपदः प्रधानकालत्वाद्ङ्गानां प्रधानकालस्य न्याय्यत्वात्। तत्र च व्रतोपायनीयाशनाराण्याशनान्यवरारोशयनानि न भवन्ति। उक्तकालाभावात्। ...अन्यद्यूपनादि सर्वं भवत्येव।'

2276. The Śat. Br. I. 1. 7 derives the word by saying that as all the gods betake themselves to the sacrificer's house and abide by him (from 'vas' with 'upa') it is called upavasatha. Com. on Āp. I. 14. 16 says 'श्वो यागार्थं अग्निसमीपे नियमविशिष्टो वास उपवासः'; 'यद्यप्यानां देवतानां योग्निसमीपे वासः स उपवसथस्तत्संबन्ध्यहरौपवसथमन्वाधानदिनमिति यावत्।' com. on सत्याषाढ I. 3. p. 99.

2277. At first two oblations are offered to Sarasvatī with two mantras from Tai. S. III. 5. 1. 1. and the anvārambhaṇīyā follows. In this a cake cooked on eleven potsherds is offered to Agni and Viṣṇu, a *caru* to Sarasvatī, a cake on twelve potsherds to Sarasvat and a cake on eight potsherds to Agni Bhagin. Jaimini (IX. 1. 34–35) establishes that the anvārambhaṇīyā is not repeated every time, but is performed only once. Vide Tai. S. III. 5. 1, Āśv. II. 8, Āp. V. 23. 4–9, Baud. II. 21 for further details.

2278. The संकल्प is श्रीपरमेश्वरप्रीत्यर्थं पौर्णमासेष्ट्या यक्ष्ये; on amāvāsyā he employs the word दर्शेष्ट्या for पौर्णमासेष्ट्या.

'I choose thee, so and so by name, as my adhvaryu, as my brahmā, as my hotṛ and as my āgnīdhra.' The adhvaryu takes fire from the gārhapatya, carries it to the āhavanīya mound and also to the dakṣiṇāgni mound and places a fuel-stick with its end to the east on the āhavanīya with the verse 'mamāgne varco'[2279] (Ṛg. X. 128. 1, Tai. S. IV. 7. 14. 1). The adhvaryu and sacrificer perform *japa* by muttering three verses[2280] (from Tai. Br. III. 7. 4 set out in Śat. I. 2. p. 71). While he is between the two fires (āhavanīya and gārhapatya) he mutters standing a verse 'antarāgni...manīṣayā' (Tai. Br. III. 7. 4). Then he offers a *samidh* into the gārhapatya fire with Ṛg. X. 128. 2 (=Tai. S. IV. 7. 14. 1, 'mama devā vihave'). The adhvaryu and sacrificer mutter two verses 'iha prajā &c.' and 'iha paśavo' (Tai. Br. III. 7. 4, Śat. I. 2. p. 71). The adhvaryu then places a *samidh* on the dakṣiṇa fire with 'mayi devā' (Ṛg. X. 128. 3, Tai. S. IV. 3. 14. 1). Then the two mutter a verse 'ayam pitṝṇām' (Tai. Br. III. 7. 4). Those who maintained sabhya and āvasathya fires offered samidhs to them with mantras[2281] (from Tai. Br. III. 7. 4).

If the sacrificer is one who has already performed a soma sacrifice then he has to go through the ceremony called 'śākhāharaṇa'. Such a sacrificer had to offer *sānnāyya* (which is

---

2279. A mantra is ordinarily to be recited after saying 'om'. But this is not the rule in śrauta rites and so this has not been stated in the text everywhere. The fuel-stick may be offered either by the sacrificer or by the adhvaryu (Kāt. II. 1. 2).

2280. The first verse is अग्निं गृह्णामि सुरथं यो मयोभूर्य उद्यन्तमारोहति सूर्यमह्नः। आदित्यं ज्योतिषां ज्योतिरुत्तमं श्वो यज्ञाय रमतां देवताभ्यः॥ This is repeated if the pūrṇamāsa iṣṭi extends over two days, but if performed in one day he has to say अद्य यज्ञाय for श्वो यज्ञाय. The third verse is इमामूर्जं पञ्चदशीं ये प्रविद्वांस्तान्देवान् परिगृह्णामि पूर्वः। अग्निर्हव्यवाडिह तानावहतु पौर्णमासं हविरिदमेषां मयि स्वाहा॥ On the darśeṣṭi he repeats अमावास्यं हविः for पौर्णमासं हविः in the above.

2281. There is a great divergence of view as to the mantras, the order of the fires and the number of samidhs. Kāt. (II. 1. 3–4) prescribes the offering of two samidhs in each fire (one with a mantra and the other silently). The hymn Ṛg. X. 128 or Tai. S. IV. 3. 14 is called 'Vihavya'. In the Ṛg. it has nine verses, in the Tai. S. it has ten. Some held that three verses of this hymn should be repeated for each fire (Āp. I. 1. 5). The order of fires was, according to some, first gārhapatya, then dakṣiṇāgni, then āhavanīya (Kāt. II. 1. 6). Some said that only the *vyāhṛtis* were to be uttered when offering fuel-sticks (Āp. I. 1. 7, Kāt. II. 1. 6). Another view was that fuel-sticks were to be offered silently.

prepared by adding to fresh heated milk the sour milk or curds of the preceding night's milking).[2282] According to the Tai. S. II. 5. 4. 1 sānnāyya was offered only by a somayājī. Sānnāyya was offered to Indra or Mahendra (Śat. Br. I. 6. 4. 21 and Kāt. IV. 2.1 0). The Tai. S. II. 5. 4. 4 says that only one who is *gataśri* (explained above in note 2259) can offer sānnāyya to Mahendra, while Sat. (I. 4 p. 103) says that for a year or two after somayāga the sānnāyya should be offered to Indra and then to Mahendra. In the full moon iṣṭi the deities to whom puroḍāśa (cake) is offered are Agni and Agnīṣoma and in it ājya is offered to Prajāpati silently between the two puroḍāśas. In the new moon iṣṭi the deities of puroḍāśa are Agni and Indrāgni and sānnāyya is offered by a somayājī to Indra or Mahendra instead of the puroḍāśa to Indrāgni (Āśv. I. 3. 9–12).

Now *Śākhāharaṇa* (which applies only to him who has performed soma-yāga and only in darśeṣṭi) will be described. The adhvaryu fetches a fresh branch of the palāśa or śamī tree, which (branch) is taken from the eastern, northern or north-east side of the tree, which has many leaves and which has not a dried up end. Vide Jai. IV. 2. 7 about the text 'he brings a branch turned to the east' &c. He cuts it off with the words 'iṣe tvā' (Tai. S. I. 1. 1. 1), then touches water, makes it straight or wipes it down with 'ūrje tvā' (Tai. S. I. 1. 1. 1), brings it towards the sacrificial ground with a verse 'imām prācīm' (Tai. Br. III. 7. 4 set out in Āp. I. 2. 1, Sat. I. 2, p. 76). With that branch he drives away (or separates) from their mothers six calves with the mantra 'vāyavas sthopāyavas stha' (Tai. S. I. 1. 1. 1). The adhvaryu makes the cows (of the sacrificer) start for the pasture with the mantra 'devo vaḥ savitā prārpayatu...mā vaḥ stena īśata māgha-śaṁsaḥ' (Tai. S. I. 1. 1), invokes them, when they have started, with a mantra 'śuddhā apaḥ suprapāṇe pibantīḥ' (Ṛg. VI. 28. 7, Tai. Br. II. 8. 8 set out in Sat. I. 2. p. 79). Then he returns to the house of the sacrificer with 'dhruvā asmin.....bahvīḥ' (Tai. S. I. 1. 1) and keeps the branch in a well-known place (so that it might not fall or be lost) on the sacred fire ground or on a wooden frame near the fires with 'protect the cattle of the sacrificer' (Tai. S. I. 1. 1). Jai. (III. 6. 28–29) states that śākhāharaṇa is meant for both evening and morning milking.

2282. Vide Haug's tr. of Ait. Br. p. 443 for the preparation of sānnāyya.

The sacrificer[2283] crosses by the west of the āhavanīya to its south and performs ācamana (sipping water). Then he contemplates on the sea and pays homage to the deities viz. Agni, Vāyu, Āditya and Vratapati in the manner set out below.[2284]

Barhirāharaṇa (bringing in the bundles of sacred kuśa grass for use). There are various stages in this operation, each stage having its own mantra. The mantras are short prose formulæ which occur in the Tai. S. I. 1. 2. They are not set out in detail here. The various stages are: he (adhvaryu) takes up a sickle or the rib of a horse or ox kept to the north of the gārhapatya with the famous mantra 'devasya tvā savituḥ prasave ..... ādade' (I take thee at the impulse of God savitṛ &c.). He pays homage to the gārhapatya with a mantra. The sickle (but not the rib) is heated on the gārhapatya fire. He then goes to the east or north of the sacrificial ground (vihāra) for some distance, finds out a spot where the desired grass grows, leaves aside one clump of darbhas from those growing there and marks as many clumps of darbha as he feels would be enough for his purpose, leaves one clump or one or two blades with the words, 'I leave you aside as the portion of beasts', touches those darbhas that he intends to cut with 'this is for the gods', holds them by his closed fingers (of the left hand), rubs them upwards with his right hand, brings the sickle in close contact with them, repeats a mantra over the grass and cuts off as much as can be held in his closed fingers the nails of which touch each other. This first handful of blades that are cut is called *prastara*. Then he further cuts an uneven number of handfuls of darbhas (3, 5, 7, 9, 11),[2285] repeating the same processes and mantras for each handful, touches the stumps from which blades are cut off with the mantra 'God Barhis! may you grow into a hundred shoots' and touches the region of his heart with 'may

---

2283. In the case of one who has not performed somayāga and who therefore offers no sānnāyya the actions from cutting off a twig to its being laid down are not done, but the first important matter that is begun in his case is fetching *barhis* (kuśa grass). Vide Baud. I. 1 'पशु वै न संनयति बर्हिः प्रतिपदेव'.

2284. अग्ने व्रतपते व्रतं चरिष्यामि तच्छकेयं तन्मे राध्यताम् । वायो व्रतपते व्रतं ... राध्यताम् । आदित्य व्रतपते ... राध्यताम् । व्रतानां व्रतपते ... राध्यताम् । . Vide Tai. S. I. 5. 10. 3 for the first and Tai. Br. III. 7. 4 for all.

2285. Āp. I. 4. 3 and Baud. I. 2 speak of an uneven number of *muṣṭis*, while Sat. I. 2, p. 84 says they may be even or uneven in number.

we grow into thousand branches'. He touches water and passes round a handful of darbhas a cord (śulba) from left to right, then puts thereon another handful of darbhas and passes a cord round it. In this way three or five handfuls are surrounded by a cord, which has its end stretched on the ground towards the east or north. Then heaps of blades are added on and over the last heap the *prastara* is placed. The whole is then firmly bound with the cord and a knot is made. He takes hold of the bundle thus tied, raises it up, places it on his head, returns with it by the way he went, keeps it inside the *vedi* on some grass (and not on the bare ground) near the spot where the middle paridhi would be. He pronounces over the barhis thus placed a mantra and keeps the barhis near the gārhapatya on a mat or the like. He also cuts off silently and brings along with *barhis* other darbhas called *paribhojanīya* and dried up kuśa grass also (ulaparāji).[2286]

Idhmāharaṇa (bringing the wood-sticks). Twenty-one wood-sticks of palāśa or khadira are required, out of which 15 are meant for throwing into the fire at the time of repeating the sāmidhenī verses, three are paridhis,[2287] two samidhs are to be used at the two *āghāras* and the 21st is the stick for *anūyājas*. A cord is made of darbhas and spread on the ground with its end to the north, the idhma is heaped on it with a mantra (Āp. I, 6. 1, Sat. I. 2. p. 89). The bundle is tied with the cord and a knot is made and the idhma is laid alongside of the *barhis*. The pieces of wood that are thrown off when cutting the idhma are called *idhmapravraścana*. A bunch of darbhas called *veda* is made of the size of the knee of a calf by doubling and tying the darbhas with a cord and cutting the

2286. The paribhojanīya darbhas are meant for making seats for the priests, the sacrificer and his wife. Vide Haug's tr. of Ait. Br. p. 79 for a note on barhis, paribhojanīya and *veda*. Āp. I. 6. 4 states that while making the veda bunch the mantra 'tvayā vediṁ vividuḥ' (Tai. Br. III. 7. 4) is recited.

2287. परिधि means an encircling stick of wood 'अग्नेः परितो धीयन्ते तानि दारूणि परिधयः' com. on Sat. I. 2, p. 88. They are of some sacrificial tree such as palāśa, kāśmarya, khadira, udumbara &c. They may be undried or dried but must have the bark on. The middle one is the thickest, that to the south is the longest, that to the north is the thinnest and shortest. Vide Āp. I. 5. 7–10 and Kāt. II. 8. 1 for paridhis. The paridhis are about three spans or one *bāhu* long, while samidhs are two spans (prādeśa, distance between the thumb and index finger when both are stretched away from each other).

darbhas about one span above the tying cord and a mantra is repeated over it ('vedosi' &c. in Sat. I. 2. p. 90). This veda is employed in sweeping the vedi with a mantra. It is given to the wife when she has to repeat a mantra in any action (compare Āśv. I. 11. 1). The out portions of darbhas of which veda is formed are called *veda-parivāsana*. These two, idhma-pravraścana and veda-parivāsana, are placed together. He takes up a branch, outs off its leaves (but not all) inside the vedi, so ohisels one end of it as to make of it a shovel. This is called upaveṣa[2288]. He recites a mantra over it (upaveṣosi... bhavāsi naḥ, Ap. I. 6. 7, Sat. I. 3. p. 91). In the Full moon sacrifice the upaveṣa is made silently. He plaoes on the upaveṣa a triple (made of three darbhas) band of darbhas in such a way that the roots and end portions of both are in contaot but they are not tied together into a knot over it. The saorifioer invokes this triple band called pavitra with a mantra 'trivṛt palāśe &c.' (Tai. Br. III. 7. 4, Āp. I. 6. 10, Sat. I. 3. p. 92).

After this in the afternoon the piṇḍa-pitṛyajña is performed in the darśeṣṭi, but not in the pūrṇamāsa iṣṭi. Piṇḍa-pitṛyajña is separately desoribed below.

If the sacrificer has celebrated the soma saorifice at some time then he has to perform *sāyam-doha*. When the household has offered the evening agnihotra, he spreads darbhas to the north of the gārhapatya, washes the sānnāyya utensils (that are the same as are required for sāyam-doha) in twos and lays them on the darbhas with their mouths turned downwards. The utensils are stated in the note below.[2289] He then makes

---

2288. अङ्गारप्रेषणार्थं काष्ठमुपवेष इति समाख्यायते । com. on Āp. I. 6. 7. It is one span long. Com. on kātyā. II. 4. 26 says 'उपवेषोऽङ्गारापोहनसमर्थं हस्ताकृति काष्ठम्'. It is of palāśa and one end of it is made to resemble a shovel.

2289. अग्निहोत्रहवणीमुखाद्युपवेषं शाखापवित्रमभिधानीं निदाने दोहनमयस्पात्रं दोहपात्रं च पिधानार्थम् । Satyāṣāḍha I. 3. p. 93. These are eight. Vide Āp. I. 11. 5 for these. For agni-hotrahavaṇī and upaveṣa vide notes 2263 and 2288 above. *Ukhā* is the same as the kumbhī of Āp. Ukhā is an earthen vessel or pan. *Abhidhānī* is a rope for tying the oow (or the calf according to com. on Āp.). The two *nidānas* are ropes for tying the hind feet of the oow near her hoofs and knees. *Dohana* is the pot in which the oow is milked. There is a wooden or metal lid to cover the dohana. Śākhāpavitra is made from the branch out of which the upaveṣa was prepared and consists in the top of that branch which is tied round with three darbhas like a braid (according to Śr. P. N.).

two pavitras (strainers, purifiers) of two darbhas that are alike in appearance and colour, a span in length, the tips of which are not cut, but which are cut from their stems with a knife or sickle by having a blade of grass or wood placed over them (but not with the nails) with a mantra 'pavitre stho' (Tai. Br. III. 7. 4) and are invoked with a mantra (prāṇāpānau &c.). The adhvaryu wipes them with water upwards (from the bottom) with the mantra 'you two are holy by the mind of Viṣṇu'. Jai. III. 8. 32 (and also Śabara thereon) says that the two pavitras and the vidhṛtis (described later on) are not taken from the cut barhis, but from the kuśa grass called paribhojanīya. The adhvaryu loudly announces 'purify the cow, the ropes and all the utensils'.[2290] The adhvaryu places the two pavitras inside the agnihotra-havaṇī, pours water therein, purifies the water by moving the pavitras eastward and then backwards and raising them up thrice with their tips to the north by repeating the mantra in the gāyatrī metre 'devo vaḥ savitotpunātu' (Tai. S. I. 1. 5. 1) once,[2291] there being a rest at the end of each pāda (and twice silently). He invokes the water with 'āpo devīr-agrepuvā...(Tai. I. 1. 5. 1, Vāj. S. I. 12-13), then turns the mouths of the vessels upwards and sprinkles them thrice with the water (leaving no water in the agnihotrahavaṇī) and with 'may you purify for this divine rite, for the worship of gods' (Tai. S. I. 1. 3. 1). He keeps the two pavitras in a well-known place. He waits for the cows coming from the pasture with a mantra 'etā ācaranti' (Tai. Br. III. 7. 4).[2292] The adhvaryu takes the upaveṣa with 'thou art dhṛṣṭi, impart brahma' (Tai. S. I. 1. 7. 1), takes out with the upaveṣa burning coals from the gārhapatya to its north. He places the ukhā on those coals and kindles burning coals round it with 'may you become hot with the *tapas* of Bhṛgus and Aṅgirases' (Tai. S. I. 1. 7. 2). Then he issues a direction to the milker of the cow "announce

---

2290. Most of the mantras in the śāyaṁdoha are taken from the Tai. S. I. 1. 3 and 5, 7 and Tai. Br. III. 7. 4 and they are not specified in each case. Some mantras are sautra. Each action is accompanied by a mantra which directly or indirectly refers to it. As the Ait. Br. I. 4 says एतद्वै यज्ञस्य संसृष्टं यद्रूपसंसृष्टं यत् कर्म क्रियमाणमृग्यजुर्भ्यामिवदतीति।

2291. According to Āp. I.11.9 the three *pādas* of the mantra accompany each act of *utpavana*. उत्पवनमुद्वृगग्राभ्यां पवित्राभ्यामूर्ध्वपवनं शोधनमपाम्। पाणिका हस्तद्वयेन पवित्रे गृहीत्वोत्पुनन्ति तन्मूलमन्त्रेष्वृग्यम्। com. on Sat. I. 3. p. 94.

2292. From Āp. I. 11. 10 it appears that the mantra 'etā ācaranti' is recited by the sacrificer.

to me when the calf joins the cow". He places the *śākhāpavitra* with its tip to the east (to the north in the morning milking) in the ukhā with a mantra, touches the ukhā and restrains his speech[2293] holding the *śākhāpavitra*. The person who is to milk the cow takes the abhidhānī (the rope) with 'adityai rāsnāsi' (Tai. S. I. 1. 2. 2) and the two nidāna ropes silently and makes the calf join the cow with 'thou art Pūṣan'. The adhvaryu issues a direction that no one is to pass between the cow that is being sucked by the calf and the sacrificial ground (vihāra) and all obey it. The adhvaryu invokes the cow with a mantra and the milker sits down near the cow to milk her with a mantra.[2294] The householder repeats a mantra when the cow is being milked and another when he hears the sound of the streams of milk falling into the vessel. The milker brings the milk to the adhvaryu, who asks him 'whom did you milk, declare to us, (this is) an offering to Indra, it is vigour'. The milker refers to the cow by her name (such as Gaṅgā) and adds 'in whom milk has been placed for gods and men'. The adhvaryu replies 'she (the cow named) is the life of all'. The adhvaryu places the pavitra in the kumbhī (or ukhā) and pours therein the milk across the pavitra with a mantra. The adhvaryu gets two more cows milked in the same manner (i. e. with the same mantras &c.) except the directions (such as no one should come &c.). The only difference is that the names of the cows will be different (such as Yamunā) and that the 2nd and 3rd cows are referred to by him respectively as 'viśvavyacāḥ' and 'viśvakarmā' instead of 'viśvāyuḥ' (in his prativacana). After three cows are milked he loudly utters thrice 'milk much for Indra, may the offering (havya) increase for the gods, for the calves, for men; be ready for milking again'. If there are more cows (generally six are referred to) they also are got milked with the same mantras as for the first cow or silently and the adhvaryu does not hold his tongue, nor does he

---

2293. The com. on Ap. I. 12. 5 explains that 'vāgyamana (holding one's tongue) means 'not uttering any word except a mantra'. 'मन्त्रादन्यस्याव्याहरणं वाग्यमनं यदि प्रमत्तो व्याहरेदिति लिङ्गात्' com.

2294. The cow is to be made to yield milk by the sucking of the calf and not by manipulating the udders with the hand. 'वत्सेन च दोहार्थं प्रसवः साध्यः' com. on Sat. I. 3. p. 96. The तै. ब्रा. II. 1. 8 (न संसृजति) forbids manipulation of the udders with fingers to induce the flow of milk. Ap. I. 12. 15 says that there is an option as to whether a śūdra can be the milker in this sacrifice.

touch the kumbhī while the other cows are being milked. Jai. (XI. 1. 47–53) concludes that the passage of Tai. Br. about milking the other three cows is a mere anuvāda and not a *vidhi* and Śabara quotes passages of the śruti that on that night no agnihotra is offered with milk and the children in the house do not get any milk (as all milk is used up for the sānnāyya). When all are milked, if any drops have fallen about (on the ground &c.) he repeats a mantra (Tai. S. I. 1. 3. 1) and invokes the pot in which sānnāyya is to be prepared with a mantra. He washes the inside of the milking vessel with water and then pours that water into the pot (in which sānnāyya is to be prepared). He heats the milk and pours over it (i. e. does *abhighāraṇa*) clarified butter silently. He draws the heated pot from the burning coals in such a way as to make a line on the ground and places it to the east, north or north-east with a mantra. When the bottom of the heated vessel cools, he adds curds to it in order to coagulate the fresh milk with 'I add soma (i. e. curds) to thee in order to turn thee into curds for Indra' (Tai. S. I. 1. 3).[2295] He adds to the vessel what remains sticking to the pot or sruc after agnihotra was offered with a mantra or silently. He pours water in the vessel that is meant as a lid or cover and places that cover or lid on the pot of heated milk. If the covering be of earthenware he throws thereon grass or a twig. He takes out the śākhāpavitra with a mantra (if a palāśa branch was used) or silently (if one of śamī was used) and keeps it in a secure place. He keeps the sānnāyya in the gārhapatya side of the vihāra on a *śikya* or some such contrivance with 'O Viṣṇu, guard the offering'.

He brings another branch with which or with darbhas he separates the calves for the morning milking (on the principal day). The same procedure as for *sāyaṁdoha* is followed in the

2295. There were several views here about adding curds. One, two or three cows are milked on the day previous to the upavasatha day (i.e. on the 14th) and that milk is used to acidify the fresh heated milk of the evening of the upavasatha day. Another method was to milk the cow or cows on the 12th, then to add the curds of that to the milk of the 13th day and add all the curds of those two days to the milk of the 14th day i. e. milking and adding of curds was to go on continuously from the 12th, 13th and 14th or from 13th or from 14th. Vide Āp. I. 13. 12 and Sat. I. 3, p. 99. If no curds be available he adds either rice or pieces of palāśa bark or wild or village badara fruit or pūtīka plant (the pratinidhi of soma) to the milk to make it sour. Vide Āp. I. 14. 1, Sat. I. 3. p. 100.

morning milking (of the principal day). There are a few differences as to mantras, as to not adding coagulating substance, which are passed over.

After the *sāyaṁdoha* (evening milking) the adhvaryu directs (āgnīdhra or some other priest or himself) 'strew kuśa grass round the fires, first round āhavanīya, then gārhapatya, then dakṣiṇāgni' or the order may be first gārhapatya, then dakṣiṇāgni and lastly āhavanīya. The darbhas strewn on the south and north have tips turned to the east. The sacrificer mutters a mantra when kuśas are being strewn.

Having done so much he observes the amāvāsyā as an *upavasatha*. Thus on the amāvāsyā day he performs agnyanvādhāna (offering fuel-sticks into fires), separating the calves with the branch, sāyamdoha, bringing *barhis* and *idhma*, preparing the veda and vedi and observing some vows. But two of these viz. separating calves from their mothers and sāyaṁdoha are performed only by him who has already performed a soma sacrifice. In the case of the pūrṇamāsa iṣṭi if spread over two days, on the Full moon day only agnyanvādhāna and strewing kuśas round the fires are gone through and on the next day are performed the bringing of barhis and idhma and making of *veda* and all the other rites. If the iṣṭi is to be performed in one day only, then kuśa grass is strewn round the fires after the making of the *veda* bunch.

About sānnāyya Sat. states some divergent views. The Kāpeyas held that even one who has not performed soma-yāga may offer sānnāyya and the deity in his case will be Indra and after he offers Soma, the deity for sānnāyya will be Mahendra. According to Śabara on Jai. X. 8. 44 the Gopāyanas held that one who has not performed a soma sacrifice may offer sānnāyya. According to Sat. himself, for a year or two after Somayāga the deity will be Indra and then Mahendra if the sacrificer so desires. Persons of the Aurva and Gautama gotras and those who are *gataśrī* (vide note 2259) may if they like offer sānnāyya to Mahendra even before performing Somayāga. Compare Āp. I. 14. 8-11 and vide Jai. X. 8. 35-46 (about the two puroḍāśas and sānnāyya).

On the principal day (i. e. the first day of the dark half in the case of pūrṇamāsa) the sacrificer offers his daily *agnihotra* before sunrise and begins after sunrise the performance of the pūrṇamāsa iṣṭi (and in the case of the darśeṣṭi before sunrise).

He washes his hands with water with the mantra "May I be able to carry out this rite meant for you two and for gods" (Tai. S. I. 1. 4. 1). From the place of the gārhapatya fire to the āhavanīya he spreads a line of dry kuśa grass continuously with their tips to the east (without leaving any space uncovered) with the mantra 'thou art the continuity of the sacrifice, I spread thee for the continuity of sacrifice, thee for the continuity of the sacrifice' (Tai. Br. III. 2.4) and then spreads another line of kuśas to the south and another to the north of this first line silently. To the south of the āhavanīya, seats of kuśa grass are made ready for the brahmā priest and the sacrificer, that of the brahmā being to the east of the seat of the sacrificer and directly to the south of the āhavanīya and of the sacrificer to the south of the south corner of the east side of the vedi. To the north of gārhapatya kuśas are strewn with their tips to the east or north and on them the sacrificial implements (yajñapātras) are placed in twos after being washed with water and with their mouths turned down, viz., the sphya and kapālas &c. (vide above note 2233 for the ten). This is called pātrāsādana (placing the utensils near).[2296]

Then follows *brahmavaraṇa.*

The sacrificer sitting on a seat with his face to the north then chooses his brahmā priest who faces the east near the utkara with the formula[2297] 'O! Lord of the earth! Lord of the worlds! Lord of great being (Heaven?)! I choose thee as brahmā' (Tai. Br. III. 7. 6). The brahmā priest when so chosen mutters a long formula (which is given in Āp. III. 18. 4 from the Tai. Br. III. 7. 6 and part of which is translated here) 'I am the Lord of the earth, Lord of the worlds, lord of the great being. Being impelled by god Savitṛ I shall perform the duties of a priest. God Savitṛ! Here they choose thee (who art) Lord of speech, as the divine

---

2296. Besides the above the following are also placed:—स्रुचं चोपभृतं च स्रुवं च ध्रुवां च प्राशित्रहरणं चेडापात्रं च मेक्षणं च पिष्टोपधीं च प्रणीताप्रणयनं चाज्यस्थालीं च वेदं च दारुपात्रीं च योक्त्रं च वेदपरिवासनं च धृष्टिं चेध्मप्रव्रश्चनं चान्वाहार्यस्थालीं च मद्वलीं च यानि चान्यानि पात्राणि तान्येवमेव द्वन्द्वं संसाद्य। बौ. I. 4; vide also सत्याषाढ I. 4 which adds कुटच, explained as पाषाणः कुट्टनसाधनम्.

2297. The choosing of brahmā takes place on the north of the vedi near the utkara, and then the brahmā priest comes to the south of the āhavanīya either from the east side or the west side of the āhavanīya according to one's Śākhā; vide (Kāt. II. 1. 21 and com.).

brahmā priest; I proclaim this to mind, mind proclaims to Gāyatri ... the Viśve Devas to Bṛhaspati, Bṛhaspati to Brahmā, Brahmā is bhūḥ, bhuvaḥ, suvaḥ. Bṛhaspati is the priest of the Gods, I am the brahmā priest of human beings'. Then he loudly says 'O Bṛhaspati, protect the sacrifice' (*ibid.*) and crossing the altar by the west of the āhavanīya towards the south of the āhavanīya, stands to the south of his seat with his face to the north, takes a kuśa blade from the blades on the seat prepared for him, casts it to the south-west (the direction of Nir-ṛti, ill-luck) with the words 'avaunt,'[2298] Daidhiṣavya (son of a re-married widow?), get up from this place, occupy the seat of another, who is more ignorant than me' (Tai. S. III. 2. 4. 4.), touches water and sits down on his seat with face to the east with a mantra and then faces the āhavanīya with a mantra 'Here do I, impelled by God Savitṛ, sit on the seat of Vasu (or prosperity) lower in level (than the āhavanīya mound), I occupy the seat of Bṛhaspati, this I declare to Agni, to Vāyu, to the Sun, to the Earth' (vide Āp. III.18.4, Kāt. II. 1. 24). The brahmā is required to be the most learned in Vedic lore (brahmiṣṭha, as Āp. III. 18. 1 says) and he is to observe silence while mantras are being repeated and superintends all actions. His permission is asked by the adhvaryu at the time of doing most of the acts, such as leading forward the praṇītā water, sprinkling the bundle of fuel-sticks and kuśa grass. There are four priests in darśapūrṇamāsa (vide note 2228). The sacrificer also crosses by the west side of the āhavanīya to its south, throws away silently a blade of kuśa from his seat and then sits down on the seat prepared for him, with his face to the east. The adhvaryu takes two darbhas of equal thickness, the tops of which are not cut off and makes them a span in length by cutting off their roots (without using his nails).[2299]

The adhvaryu, sitting to the west (or north) of the gārhapatya fire, takes a camasa (a rather flat vessel or pan) in which water is to be carried forward with 'to thee for Dakṣa' (Āp. I. 17. 1) and washes it thrice with water once with mantra and twice silently. The mantra is 'thou art made of plants, may

2298. अहे वैधिषव्योदतस्तिष्ठाप्यस्य सदने सीद योऽस्मत्पाकतर इति ब्रह्मासदनमीक्षते । ब्रह्मासदनात्तूर्णं निरस्यति निरस्तः पाप्मा सह तेन यं द्विष्म इति । कात्या. II. 1. 22-23.

2299. The two darbha blades are called *pavitra* (neuter noun) and the process described here is called *pavitrakaraṇa* and has been described above.

you be washed for gods, may you shine for the gods, may you be pure for gods' (Āp. I. 16. 3). He keeps the two pavitras in the camasa and pours water in the camasa with 'who takes you, let him take you, for whom shall I take you, I take you for him, you for prosperity' (Āp. I. 16. 3) and at the same time contemplates on the Earth with 'I take you with this' (not uttered). He fills the vessel so as to leave some space at the top and purifies the water by the process called utpavana (described above in note 2291). He then invokes them with 'may the divine waters, that are the first purifiers and the leaders carry this sacrifice to the front, may they place the lord of the sacrifice in front, Indra chose you in his fight with Vṛtra, you chose him in the fight with Vṛtra, you are sprinkled' (Tai. S. I. 1. 5. 1). The adhvaryu then asks the permission of the brahmā priest in the words 'Brahman! shall I carry forward the water' and issues a direction 'sacrificer, observe silence'. The brahmā priest mutters a mantra 'Lead forward the sacrifice, sustain these deities, may the sacrificer be on the back of heaven. Place this sacrifice and the sacrificer in the world where the seven sages and other men of holy deeds dwell' and loudly says 'yes, do carry the water forward'. The adhvaryu then repeats the verse 'who carries you forward? Let him carry you forward. I carry forward the divine waters; may they sit round our sacrifice, conveying to the sacrificer thousandfold prosperity, the waters that delight in drink, having a shining (or oily) appearance'. He holds the water in a vessel which is covered by the sphya that has its tip to the east and that is held level with his nose and carries it forward without allowing even a drop to fall down. When the water is being carried the sacrificer invokes it with a mantra.[2300] The adhvaryu places the water vessel (praṇītāpātra) on darbha grass to the north of the āhavanīya with the mantra 'you are sanctified by brahma (prayers); who employs you? Let him employ for (securing) all desires, for the worship of gods (Āp. IV. 4. 4)' and then covers the vessel with kuśas. All these acts constitute *praṇītāpraṇayana*. While the water is being placed near the āhavanīya the sacrificer invokes it with the immediately preceding mantra and passes his eye over the whole of the sacrificial ground. No one is to pass between the āhavanīya and the praṇītā water (Kāt. II. 3. 4).

2300. The mantra is धूम्र कक्ष वाजु चर्कृ च गोंब्य वह्नु च सं च धूँश्च धूँश्च धूंश्चेकारत्रयः पूर्वसमा विराजो या इदं विश्वं भुवनं व्याबभूवुस्ता नो देवीस्तरसा संविदानाः स्वस्ति पथे नयत प्रजानतीः। It occurs in आप. IV. 4. 4.

The principal purpose of the praṇītā waters is that they are used for making the ground grains into a dough for puroḍāśa and their final disposal is to be poured into the vedi (Jai. IV. 2. 14–15). The adhvaryu comes back by the same way that he went, places down the sphya among the yajñapātras and touches the sacrificial utensils with his hand wearing a pavitra with the mantra 'may the divine groups enter into the sacrificial utensils'.

Then follows *nirvāpa*[2301] (taking out handfuls of grains or a portion of other sacrificial material). The adhvaryu takes in his hand the ladle called agnihotra-havaṇī with 'thou art made of a tree for dakṣa' (strength). Then he holds it in his left hand and takes the winnowing basket (śūrpa) in his right hand with 'to thee for the all-pervading (yajña)'. Then he heats it (ladle) on the gārhapatya fire with 'the *rakṣas* (evil spirit) is burnt, the enemies are burnt'. He then touches water.[2302] The adhvaryu asks the permission of the sacrificer in the words 'sacrificer ! shall I take out sacrificial material' and the sacrificer replies 'yes, do take out'. The adhvaryu then utters the words 'I go towards the wide space' and approaches a cart or wooden frame (śakaṭa) standing to the west of the āhavanīya or gārhapatya containing either rice or barley grains (in the husk), which has the shafts turned to the east or north, which has the yoke joined to it and is covered with mats. While touching the right side of the yoke he mutters 'thou art dhūr (destructive fire), injure the destructive (enemy), destroy him who seeks to destroy us and whom we seek to destroy'. He touches the left shaft and mutters the mantra 'thou art of the gods (i. e. belongest to them), thou art the purest (or the most generous), the fullest, the dearest, the best carrier, the best summoner of the gods'. He places (firmly touches with) his right foot on the left wheel (of the śakaṭa) with 'Viṣṇu traversed thee'. He mounts the cart with his left foot with 'thou art an unbent receptacle of *havis*, mayst thou be strong and not

2301. The mantras required here occur in Tai. S. I. 1. 4 and Vāj. S. I. 7 ff and so are not indicated in each place. 'देवतार्थत्वेन द्रव्यस्करणं निर्वापः' com. on Āp. I. 17. 10.

2302. Whenever any mantra referring to evil spirits and the like is uttered, one has to touch water thereafter before doing anything else. Vide 'रौद्रं राक्षसमासुरमाभिचरणिकं मन्त्रमुक्त्वा पितृमात्मानं चालभ्योपस्पृशेत्' कात्या. I. 10. 14.

break (or bend)'. He makes an opening by removing the mats covering the śakaṭa and looks at the corn to be used for making the puroḍāśa and at the mats while repeating twice the mantra 'I look at thee with the eye of Mitra, do not be afraid, do not tremble, I shall not injure thee'. He touches the corn (to be used for puroḍāśa) with 'may you sustain strength', then touches his own heart with 'put milk in me' and touches water. Then he throws aside a blade of grass or clod of earth with 'warded off is the evil spirit', touches water and repeats the Daśahotṛ mantras.[2303] He places the two pavitras in the winnowing basket (silently), takes one handful of the grain (from the cart) with 'may the five fingers give you for protection, and not to the enemy' (Maitrāyaṇīya S. I. 1. 5), puts (empties) the handful in the sruc (agnihotrahavaṇī) and puts in the winnowing basket (on which the two *pavitras* have been kept) four handfuls of grain by means of the agnihotra-havaṇī, three with the mantra (repeated thrice) 'at the command of god Savitṛ, with the arms of Aśvins, with the hand of Pūṣan I take out thee that art dear to Agni'[2304] and the fourth silently. Jai. (IX. 1. 36-37) concludes that this mantra is the same even in all modifications of the darśapūrṇamāsa and Śabara explains 'savituḥ prasave' as meaning 'urged by the yajamāna' (or when the sun rises), 'aśvins' as meaning the sacrificer and his wife (as they make a gift of the horse in agnyādheya) and pūṣan as meaning 'yajamāna' himself (who supports all). In Jai. XI. 4. 44-45 it is stated that the mantra for nirvāpa 'devasya tvā', the mantra for cutting off barhis (barhirdevasadanam dāmi) are to be repeated and not to be uttered only once. In Jai. V. 2. 4-5 it is established that all the saṁskāras are to be performed on all the grains after four handfuls are taken and not on each handful as it is taken out. The sacrificer invokes with a mantra while the adhvaryu is making the *nirvāpa* 'I call here Agni, the hotṛ and the gods that are well disposed to sacrifice; may the gods, pleased in mind, come and may they partake of this my offering.' Having finished the taking out of grains in

2303. The 'daśahotṛ' mantras are 'चित्तिः स्रुक् चित्तमाज्यं' &c. quoted in note 2247 above.

2304. If the puroḍāśa is meant for Agni and Soma (jointly) as in pūrṇamāsa, the words 'agnīṣomābhyām juṣṭam' will be substituted for 'agnaye juṣṭam' and the names of other deities in the cases of other puroḍāśas. Vide Kāt. II. 3. 21, Āp. I. 18. 1, Jaimini IX. 1. 38-39.

four handfuls, (the adhvaryu) throws on them some more grains with his hand. If no cart is available, he keeps an earthen vessel on the sphya placed on the altar with its tip to the north or east and takes out the grains from that vessel (this is the modern practice) and then removes the wooden sword from underneath it. The same procedure is followed in the case of puroḍāśas for other deities. The adhvaryu touches the grains taken out with 'this of the gods' and touches the rest (remaining in the śakaṭa or vessel) with 'this is ours together (with the gods).' He invokes the grains taken out with 'I take (or invoke) thee for increase and not for malevolence.' He moves out of the mats covering the cart (or from near the vessel) taking with him the śūrpa with 'thee I release from the fetters of Varuṇa' (compare Maitrāyaṇī S. I. 1. 5). He looks at the sacrificial ground, the fires, the utensils, the priests with 'may I see heaven' and at the āhavanīya with 'the light of Vaiśvānara (Agni).' He gets down from the cart with 'may the posts (or mansions) of Heaven and Earth, stand firm' (if corn is taken from a vessel he only mutters these words). He invokes the grains that have fallen down (when four handfuls were taken out) with 'to Heaven and Earth, svāhā' and goes near the gārhapatya with 'follow wide space (or sky).' He puts down the śūrpa (containing the corn taken out) near the gārhapatya to its west (or near that fire on which in that particular rite he has to bake the cake) with 'I make you sit on the lap of Aditi'[2305] and consigns it to the protection of that deity (for which the cake is meant) with 'O fire! protect the sacrificial material.'[2306] The adhvaryu pours water in the (agnihotrahavaṇī) ladle to which the awns of the rice or barley grains stick and purifies it thrice with the two pavitras (blades of kuśa) held in the hands and with the mantra 'may god Savitṛ &c.' (vide p. 1024 above) and invokes it with 'may the divine waters' &c. Then the adhvaryu seeks the permission of the brahmā priest with 'Brahman! shall I sprinkle' (with holy water the sacrificial material). The brahmā priest mutters 'sprinkle the sacrifice, sustain these deities &c.' and loudly says 'Yes, do sprinkle.' The adhvaryu then sprinkles water thrice, once with the mantra 'at the command of Savitṛ ..... I sprinkle

2305. Aditi in this passage means the earth, according to the Tai. Br. III. 2. 4.

2306. If the cake is meant for Agni and Soma then the mantra would be अग्नीषोमौ हव्यं रक्षेथाम्.

thee that are dear to Agni' (or Agni and Soma or other deity as the case may be) and twice silently. One should so sprinkle that drops of water may not fall on the fire. He then upturns the sacrificial utensils (i. e. instead of their mouths being down, their mouths are now upturned) and sprinkles them thrice with water with 'may you become pure for divine rite, for worship of gods'.[2307] The rest of the water taken for sprinkling is placed to the east of the gārhapatya (in a sruc). It is stated by Jaimini (IX. 1. 2-3) that the prokṣaṇa of the mortar and pestle or the mill-stones has an unseen spiritual result (apūrva).

The adhvaryu sits to the west of the gārhapatya, takes hold of the black antelope skin lying on the altar with 'thou art the whirl of the wind' and shakes it thrice on the utkara holding it in such a way that the neck portion is up and the hairy portion inside (towards himself) with 'destroyed is the evil spirit, destroyed are the enemies'. To the west of the utkara he spreads the antelope[2308] skin with its neck portion westwards (Śat. Br. I. 1. 4. 5) and its hairy portion upwards with "thou art the skin of Aditi'. The portion[2309] of the skin near the anus (of the animal) is twisted below the hairless part and both parts are held together with 'may the earth know thee'. While still touching the skin he places the mortar on it with 'thou art the adhiṣavaṇa (the utensil for pressing or beating the grains) made of a tree, may the skin of Aditi know

---

2307. The com. on Kāt. II. 3. 40 याभिरद्भिर्हविषः पात्राणां च प्रोक्षणं कृतं ताः प्रोक्षण्यः अग्निहोत्रहवणीस्थाः।

2308. The black antelope skin has been throughout the ages a symbol of holiness and vedic culture. It is therefore that āryāvarta was defined, as shown above (p. 13), as that territory where the black antelope wanders naturally. Vide Śat. Br. I. 1. 4. 1-2, where yajña is said to have escaped from the gods and wandered about as a black antelope and the white, black and yellow hairs of the antelope are said to represent respectively Ṛg, Sāman and Yajus. On account of its holiness, the antelope skin is employed for husking and bruising the grains (from which the cake is to be made).

2309. प्रति त्वा पृथिवी वेत्तिति पुरस्तात्प्रतीचीं भसदमुपसमस्यति। सत्याषाढ I. 5; आप. I. 19. 5 has पुरस्तात् ... स्यति. The com. on both give slightly different interpretations. भसदं कटिप्रदेशं पुरस्ताद्भागेनाधस्तात्प्रतीचीं गमयित्वानन्तरप्रदेशेन सह द्विगुणितां करोतीत्यर्थः। com. on Āp. The tail portion is twisted under the skin so as to make one portion a little higher than the rest and so as to make the mortar or mill-stone placed on the skin to incline in one direction.

thee'. Holding the mortar (ulūkhala) by the left hand he pours into its mouth the sacrificial materials (unhusked grains of rice or barley) thrice with 'thou art the body of Fire,[2310] thou art a prompter of speech, I take thee for the enjoyment of the gods' and a fourth time silently. He takes the pestle with 'thou art a stone (hard like a stone), though produced from a tree; mayst thou so strike this sacrificial material for the gods that it will be enjoyable to them!' and beats the grains in the mortar thrice with 'may I strike the evil spirit, the enemy of heaven, away!' (the mantra is recited only once according to Jai. XI. 4. 42). After striking thrice the adhvaryu utters a summons to haviṣkṛt, with 'come, O Haviṣkṛt' (repeated thrice)[2311]. When the grains begin to be husked the adhvaryu utters a call to Āgnīdhra 'strike loudly'. The āgnīdhra takes *kuṭaru* (aśman, a stone) with 'thou art a stone, thou art one that makest a hymn of praise (or glory)' and he strikes therewith the large mill-stone (dṛṣad) that is placed on the altar (twice, once with mantra and once silently) and the smaller one (upalā) once with 'proclaim food (to the gods), proclaim strength; may you (all sacrificial utensils) proclaim that (the food) is full of excellent flavour; may we conquer the hordes (of enemies) by this noise'. The āgnīdhra may

---

2310. As fire blazes forth when oblations are thrown on it, the grains (from which a cake is to be prepared) are said to be the body of fire. One can speak loudly only if one is well-fed and so the grains are said to be prompters of speech.

2311. The praiṣa (summons) is हविष्कृदे3हि हविष्कृदे3हि हविष्कृदे3हि. The figure 3 is used to show that the preceding letter is *pluta* (of three moras). Haviṣkṛt literally means 'one who separates the grains from the husks.' According to Tai. Br. III. 2. 5 the summons is addressed to many divine haviṣkṛts 'हविष्कृदेहीत्याह य एव देवानां हविष्कृतः। तान् ह्वयति त्रिर्ह्वयति त्रिरत्या हि देवाः.' In the case of the brāhmaṇa sacrificer the call for the person who separates is हविष्कृदेहि, for a kṣatriya sacrificer हविष्कृदाग्नहि, for a vaiśya हविष्कृदाद्रव and for the śūdra हविष्कृदाधाव. Or the first call may be employed for all. Vide Satapatha I. 1. 4. 12, Āp. I. 19. 9–10, Sat. I. 5. According to some हविष्कृत् is पर्जन्य. The com. on Āp. explains that 'śūdra' here stands for निषादस्थपति. हविष्कृत् means 'the person who prepares the havis' as also the formula used to call him. On the Vedic text 'हविष्कृदेहीति त्रिरवग्रहाह्वयति' Jaimini concludes that this sentence contains an injunction to summon thrice the wife or other separater of grains (III. 2. 5–9). Jai. (XII. 2. 11) establishes that there is no haviṣkṛt call in savanīya puroḍāśas. According to Śat. Br. I. 1. 4. 13 the wife formerly rose to the haviṣkṛt call but in its time either the wife or the āgnīdhra priest rose.

strike silently with the yoke-pin (śamyā) instead of using a stone (Āp. I. 20. 4). He repeats this thrice (i. e. striking with a stone or yoke-pin is done nine times in all). After this the sacrificer's wife or some one else (such as the āgnīdhra) threshes the grains in the mortar (Kāt. II. 4. 14). Jai. (XI. 1. 27) states that the beating has a seen purpose (viz. removal of husk) and so it is to be continued as long as required for effecting that purpose. Jai. (IV. 2. 26) further lays down that the Vedic sentence ' vrīhīn-avahanti ' is a restrictive injunction (niyamavidhi) in that, when unhusking can be effected either by using the mortar and pestle or by some other method (such by using the nails) it restricts one to the former method. The adhvaryu then holds the winnowing basket near the mouth of the mortar to its east or north with the words ' thou art grown by rain '[2312] (as it is made of bamboo) and touches the beaten grains (to be used for puroḍāśa) with ' you are grown by rain '. He then puts with his hand the beaten grains into the winnowing basket with ' may (the śūrpa) know thee ' (the grains as its own). Holding the śūrpa over the *utkara* he thrice winnows the grains and frees them from the husk (which falls on the *utkara*) with ' thrown away is the evil spirit, thrown away are the enemies ' (i. e. the husks are meant to be the portion of evil spirits). He makes the husks sticking to the śūrpa fall on the utkara with ' blown away are the enemies '. He puts the husks from the place of the utkara over the (middle) potsherd (on which the cake is to be baked) and places them (the husks) underneath the black antelope skin in its north-west corner with ' thou art the portion of evil spirits '. He does not look at these husks. He presses down with his hand the spot where the husks are kept with ' pressed down is the evil spirit '. He touches water, sprinkles the potsherd (on which the husks were) with water and keeps the potsherd in its place. He separates the husked and unhusked grains with ' may the wind separate you.' He then pours out the grains of rice from the śūrpa in the pot with the words ' may the god Savitṛ with his golden hands (rays) accept you '. He then takes them and pours them in the mortar and issues a direction (praiṣa) to the sacrificer's

2312. The word वृद्ध is employed in all these mantras for attaining prosperity. Vide Tai. Br. III. 2. 5 ' वर्षवृद्धा वा ओषधयः । वर्षवृद्धा इषीका. संवृद्ध्यै.' Jaimini IV. 1. 26 has a discussion on the placing of husks or the potsherd on which the puroḍāśa is to be baked.

wife to make the rice free from the thin coating of husk.[2313] The wife or some one else or a *dāsī* (a maid-servant) does the threshing several times, then she hands over the pestle to the āgnīdhra who beats with the pestle the grains and then the wife does the final beating with 'may you become pure for the gods, shine for the gods, purify for the gods'. The adhvaryu puts the kaṇas (little particles of rice grains) separated from the polished grains of rice in a vessel, cleanses the polished grains that are in the śūrpa with water. That portion which remains after the grains are beaten thrice is made to flow towards the utkara with the water (collected in another vessel) that is used in washing the polished grains with 'this is the portion of evil spirits. May the waters carry it forward from this place, svāhā', the water being also poured inside the vedi. Then he repeats the whole procedure about the black antelope skin from its being taken up to its being spread already described. Then the adhvaryu places the yoke-pin (śamyā) with its head (kumba, thick part) to the north on the antelope skin with 'thou art the support of the heavenly world'; he establishes[2314] the larger mill-stone (dṛṣad) with its face to the east on the śamyā in such a way as to cover the śamyā with its western half with 'thou art intelligence (though) made of a stone; may the support of heaven know thee'; then he places the smaller mill-stone on the larger one with 'thou art intelligence (though) a child of the mountain; may the dṛṣad know thee'. The adhvaryu then bends and looks at the polished grains that are in the śūrpa with 'you are honeyed rays'. He spreads the polished grains on the larger mill-stone thrice with 'at the command of god Savitṛ.....hands of Pūṣan' (vide p. 1024 for the omitted words). I spread you, you are corn, satiate the gods' and once silently. He draws the smaller mill-stone over the grains to the east with 'to thee for prāṇa'[2315], to the west with 'to thee for apāna',

2313. The वैघ is 'त्रिष्फलीकर्तवै' (Āp. I. 20. 11 and सत्याषाढ I. 5). फलीकरणं तण्डुलेभ्यः कणानां वियोगकरणम् । com. on सत्याषाढ I. 5. This is to be done thrice, once by the wife, then by the āgnīdhra, and then again by the wife. If the wife is not available, then the third is done by the adhvaryu himself. The mantra is recited only once. Vide 'यो वा कश्चिद्विद्यमानायाम्' आप. I. 20. 13 and com. 'अविद्यमानायामनालम्भुकत्वादिना निमित्तेनासंनिहितायामभावे च तस्या इत्यर्थोऽविशेषात्.'

2314. The skin is the earth. He holds with his left hand the skin, the yoke-pin, the larger mill-stone successively as he proceeds.

2315. उच्छ्वासनिश्वासतत्संबंधिनौ वृत्तयः प्राणापानव्यानाः । सायण on तै. सं. I. 1. 6 'प्राणाय त्वाऽपानाय त्वा व्यानाय त्वा.'

and holds it firmly in the middle of the lower mill-stone with 'to thee for vyāna'. Ultimately he grinds towards the east with 'I hold this (smaller mill-stone) for the life (of the sacrificer) in a long and continuous series[2316] of actions (here grinding)'. Thereafter he continuously grinds the grains at his pleasure. He throws the ground grains from the larger mill-stone with the smaller mill-stone on to the antelope skin with 'May God Savitṛ with his golden hands (rays) accept you' and bends down to look at the ground grains with 'I look at you with an unimpaired eye.' He then issues a direction to the wife 'grind (or pound) without scattering (the grains away from the larger mill-stone or from the antelope skin) and make them into fine flour.' Either the wife grinds or a maid-servant (dāsī) may do so (Āp. I. 21. 8–9); and then keeps aside the well-ground flour in a well-known place. The adhvaryu heats on the gārhapatya water called *madantī*[2317] brought from the praṇītā water. The offerings (of cooked vegetable food) are cooked either on the gārhapatya or on the āhavanīya fire.

The adhvaryu, after sitting to the west of the gārhapatya, takes the upaveṣa with 'thou art dhṛṣṭi (bold one), give brahma (holy food?).' He separates two burning coals from the western portion of the gārhapatya fire with the upaveṣa and keeps them on the eastern side of the gārhapatya mound itself. He casts outside one of the two coals to the north-west of the gārhapatya with 'O Fire! Dash aside the fire that eats (cooks) raw food (not cooked in accordance with śāstra); and forbid that fire that eats flesh (cooks ordinary meat food).' He then touches water, places the remaining coal on that spot on the west (of the gārhapatya mound where he has to place the potsherds) with 'bring that fire that worships the gods.' He then places the middle one[2318] (of the eight potsherds) thereon with 'thou art firm, make the earth firm, strengthen life, progeny and surround the sacrificer with his kinsmen.' He lays a

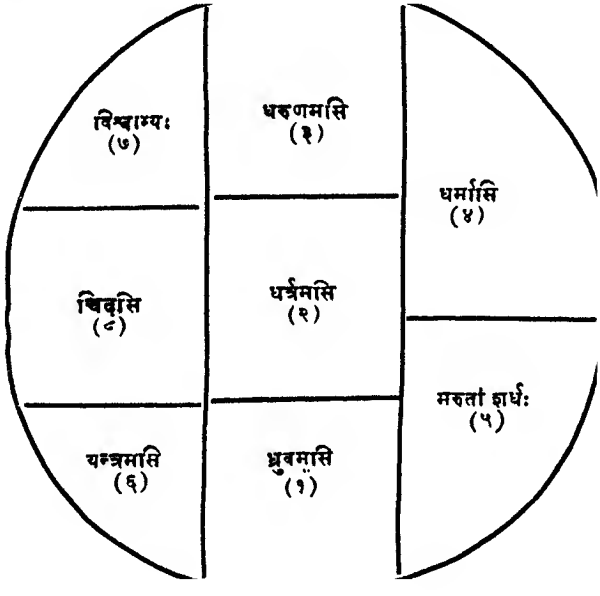
2316. Or मसिति may refer to the skin (vide Uvaṭa on Vāj. S. I. 20 where this mantra occurs).

2317. According to Āp. I. 23. 24 the kapālas are first arranged (kapālopadhāna) and then the madantī water is heated, while Satyāṣāḍha (I. 5–6) reverses these processes.

2318. According to Vaikhānasa the southern of the two burning coals is cast aside. Vide com. on Satyāṣāḍha I. 6. p. 133. According to Āp. I. 22. 2 the coal that is not cast away is placed to the south on the gārhapatya mound and thereon the first potsherd is laid.

burning coal on that potsherd with 'burnt is the evil spirit, burnt are the enemies.' The potsherds, whether eight, eleven or more or less, are arranged on the gārhapatya mound. To the east of the central one he places a kapāla with 'thou art the supporter, make the aerial space firm, strengthen prāṇa and apāna, surround the sacrificer with his kinsmen.' Then a third is placed to the east of the 2nd with 'thou art dharuṇa (supporter), support heaven, the eye, the ear and surround &c.' He places the 4th kapāla to the south-east with 'thou art dharma (supporter), support the directions, the home, progeny, surround &c.'; he places the fifth to the south-west with 'thou art the strength (or host) of maruts'; he places the 6th in the north-west with 'thou art a restrainer, support the directions, wealth, prosperity, surround &c.'; he places the 7th to the north-east with 'I place thee that art uninjured from all the directions for the reconciliation (or love) of all kinsmen'; and lastly the remaining one to the north with 'thou art *cit*[2319] (intelligence).'

2319. The arrangement of eight potsherds according to Sat. I. 6 is shown in the diagram. The arrangement according to Āp. I. 22-23 and Kāt. II. 4. 27-34 somewhat differs. The com. on Kāt. II. 4. 37 explains how eleven potsherds are to be arranged and how less or more are to be arranged. Eggeling summarises the com. in S. B. E. vol. 12 p. 34n. Vide Tai. S. I. 1. 7 for ध्रुवमसि &c.



In modern times many agnihotrins do not generally employ eight or eleven potsherds but employ one earthen brick (that would have the shape of the kapālas when placed together), on which lines are scratched to indicate the number of kapālas. Then taking coals from the gārhapatya he spreads the coals on the potsherds (whether 8, 11 or more or less) with the veda bunch repeating for each potsherd 'may you be heated by the tapas of Bhṛgus and Aṅgirases.'

The adhvaryu heats the pātrī (the puroḍāśa pātrī, according to Kāt. II. 6. 49) that is washed with water on the fire on which the cake is to be baked and when it is heated and slightly cooled he places the pavitras on it and pours on to it across the pavitras the flour (of ground and bruised grains) from the black antelope skin with the *yajus mantra*[2320] 'devasya tvā ... agnaye juṣṭam saṁvapāmi' thrice and once silently. While pouring the ground grains he restrains his speech and gives up the restraint only when he spreads holy ashes over the puroḍāśa (vide below). He purifies the flour by moving forwards and backwards and raising up the two pavitras (darbha blades) the tips of which are turned northwards thrice (i. e. he performs *utpavana*) once with the mantra 'haryos-tvā vārābhyām-ut-punāmi' or with the mantra 'devo vaḥ' (vide note 2291 above). He takes in the sruva ladle water from the praṇītā water, and supporting it on the *veda* bunch pours that water on the flour with a mantra 'waters have joined with waters &c.' (Tai. S. I. 1. 8. 1) and also pours thereon the hot water from the *madantī* vessel with the mantra[2321] 'you are generated from waters' and mixes the flour through and through on all sides with the water from left to right with 'may you be well mixed up with water' (Tai. S. I. 1. 8. 1). He stirs and mixes the flour and water with the *mekṣaṇa*[2322] with 'I mix thee together for generation', and makes a ball (of the flour) with 'thou art the head of the sacrifice'. He then

2320. Appropriate changes will have to be made according to the deity for whom the cake is meant (i. e. either अग्नये or अग्नीषोमाभ्यां &c.). Vide Āp. I. 24. 1 and यथा दैवतमेवैनानि संवपति in Tai. Br. III. 2. 8.

2321. Flour becomes well mixed up when it is wetted with hot water. 'You are &c.'—these words are addressed to the flour. Vide Haug's translation of Ait. Br. p. 3 n. 3 as to how the cake is baked.

2322. The mekṣaṇa is a rod of aśvattha wood one *aratni* long having at one end a square board four aṅgulas in length (to be used like a mixing spoon).

divides the ball into two parts with 'may you (two) become separate according to the respective shares (of the deities)'. He makes two balls of equal size from the dough and touches the two separately with 'this for Agni' and 'this for Agni and Soma.'[2323] From the group of potsherds to the south he removes the burning coals with the *veda* bunch with 'Here do I remove the face from the approaching (or attacking) army' and then removes the coals also from the group of potsherds that are to the north. Taking the ball of flour that is to be placed on the southern potsherds with 'thou art the head of the sacrifice' he bakes the ball with 'thou art heat and bestower of all life' and similarly bakes the other ball on the northern group of potsherds in the same way.[2324] He makes the cake assume the shape of a tortoise, but its back should be neither too high nor too low like an *apūpa* and the cake should be as large as the hoof of a horse.[2325] He spreads the cake so that it covers all the potsherds with 'may thou spread wide' (i. e. have progeny &c.). He puts water in the vessel (with the water from which the flour was mixed up) and sweeps the surface of the cake from left to right with his wet hand in such a way that the cake will have a skin-like continuous surface with 'mayst thou take on a skin'. He passes a burning firebrand thrice round each cake with 'vanished is the evil spirit, vanished are the enemies'. He applies over the cakes the flames of burning darbhas with 'may the god Savitṛ bake thee in the kindled (fire) called nāka'. He applies heat by passing round the cakes burning fire-brands with 'may fire not burn thy body! O Fire, protect the offering'. He spreads over the cake ashes in which there are also burning coals with 'mayst thou be connected with prayer'. The adhvaryu issues a direction (to the āgnīdhra) 'bake the cakes without burning them' and here he gives up the restraint of speech (that was imposed as stated above).

He heats with a burning firebrand the water used for wiping the fingers and for scouring the vessels and draws with the *sphya* to the west of the āhavanīya (or gārhapatya) three lines

---

2323. In पूर्णमासेष्टि the two balls are for Agni and Agnī-ṣomau and in darśa for Agni and Indrāgnī.

2324. Āp. (I. 24. 6-7) says that the first ball is baked on all the eight potsherds for Agni and then the other ball is baked.

2325. अतुच्छमनपूपाकृतिमश्वशफमात्रं कूर्मस्येव प्रतिकृति करोति। आप. I. 25. 4, सत्या. I. 6. p. 141. 'तत्रापि कश्चित्कूर्मस्तुङ्गः कश्चिदपूपाकृतिरपूपवन्निम्नस्तदुभयविलक्षणो नात्युच्चो नातिनीच इत्यर्थः' com. on सत्या.

(on the vedi) running from south to north (or optionally from west to east, according to Āp. I. 25. 14); he pours that water on each of the three lines thrice in such a way that the water let fall on one line does not become mixed with that poured on the next line and that in pouring water he proceeds from east to west with 'to Ekata, svāhā! to Dvita, svāhā! to Trita, svāhā!' (Tai. S. I. 1. 8. 1).[2326]

To the west of the āhavanīya he constructs a vedi, which is in length as much as the height of the sacrificer or which is as long as required for one's purpose and which has curved sides.[2327] The sacrificer repeats a verse 'I make a mansion for him &c.' (Tai. Br. III. 7. 6) and touches the spot where the vedi is to be made. The adhvaryu sweeps the spot of the vedi with the veda bunch once with the mantra 'they knew the vedi by means of the veda bunch &c.' (Tai. Br. III. 3. 9) and twice silently before the dust and weeds are removed.[2328] The yajamāna invokes the vedi when it is being swept by repeating certain verses viz. 'you, a young lady, with four tufts of hair &c.' (Tai. Br. III. 7. 6). The adhvaryu takes the sphya

---

2326. The story of Ekata, Dvita and Trita who are called āpya occurs in Tai. Br. III. 2. 8. In the Ṛg. we frequently come across Trita, a devotee of Indra, who is there sometimes called Āptya. Vide Ṛg. I. 105. 9, VIII. 12. 16, VIII. 47. 13. Trita is said to be the seer of Ṛg. IX. 102 and X. 1-7.

2327. According to the com. on Sat. I. 6, p. 145 the vedi should be 4 aratnis or 96 aṅgulas in length. According to Kāt. II. 6. 2-10 the vedi should be 4 aratnis on the west side and 3 on the east, three finger breadths deep, should slope towards the east or north, should be contracted in the middle, the corners of its eastern side (called *aṁsas*, shoulders) should envelope the āhavanīya mound and all the herbs growing thereon and the roots should be uprooted. The vedi is deemed to have the shape of a young woman with broad hips (the two corners of the west side are called *śroṇi*) and a slender waist and verses are repeated which describe it in terms of a well-decked young lady. 'पुरस्तादंहीयसी पश्चात्प्रथीयसी मध्ये संनततरा भवति' आप. II. 3. 2. In the figure here the vedi is away from the gārhapatya. This is so for those who follow the sūtra of Āpastamba. For those who follow Satyāṣāḍha the vedi begins much nearer to the gārhapatya than is seen in the figure here and the dakṣināgni is also nearer the gārhapatya.

2328. वेदेन बर्हिः..... विश्वव्दानिरिति पुरस्तात्स्तम्बयजुषो वेदेन बर्हिः श्रिः संमार्ष्टि। पूर्वार्धादेवेतृतीयदेशे स्तम्बयजुर्हरति। सत्या. I. 6. pp. 145-146, आप. II. 1. 3-4. The com. on आप. II. 1. 4 says स्तम्बयजुरिति सतृणाः पांसवोऽभिधीयन्ते तद्योगात्कर्म च क्वचित्। It is called स्तम्बयजुः because the stalk of darbha is cut after reciting a yajus formula.

(wooden sword) along with two darbhas with 'I take you at the impulse of Savitṛ ..... with the hands of Pūṣan', invokes it with 'thou art the arm of Indra', cleanses upwards the tip of the sphya with a darbha with 'thou art wind with a thousand tips (or edges) and a hundred sharp brilliances' and places a darbha with its tip to the north or east on the eastern portion of the vedi at a spot which is 32 aṅgulas from the eastern side of the vedi (i. e. $\frac{1}{8}$ of the length of the vedi) with 'thou art armour for the earth.'[2329] He strikes the darbha with the *sphya* saying 'O Earth, meant as the place for worshipping gods, may I not injure the root of thy herb'. He moves aside with the sphya the dust together with the cut blade of darbha with 'struck aside is the demon Araru from the earth'. He removes the dust and the blade with the sphya outside the vedi towards the utkara[2330] with 'go to the cowpen, the place of the cows.' While this is being done the sacrificer recites by way of invocation 'O gods! I cut off with the bolt of Indra the head of him who hates me &c.' (Tai. Br. III. 7. 6). The adhvaryu looks at the vedi with 'may Heaven rain on thee' and at the sacrificer with 'may rain shower on thee'. The āgnīdhra sits down with the palms of his hands turned upwards to the north of the vedi and outside it on a spot at the distance of two *padas* (footsteps) from the north side of the vedi with 'salutation to heaven and to the earth.' The adhvaryu spreads near the āgnīdhra the dust together with the cut blade of grass at the distance of one *prakrama* to the north of the vedi from a spot which is 32 aṅgulas (or $\frac{1}{8}$ of the vedi) from the eastern side of the vedi[2331] with 'O God Savitṛ! bind with a hundred fetters in the most distant region him who hates us and him whom we hate; do not free them from the fetters'. The āgnīdhra covers with both his

---

2329. Vide Tai. S. II. 6. 4, Tai. Br. III. 2. 9, Śat. Br. I. 2. 5. 7–20 for details about the construction of the vedi. According to Sat. (II. 6, p. 152) following Vedic texts, the vedi is prepared on the Paurṇamāsī day in the Pūrṇamāsa iṣṭi and on the previous day in the darśeṣṭi. Jaimini V. 1. 29 explains the consequences of this on the order in which the various actions are performed.

2330. The उत्कर is called गोस्थान, as गो means speech and as the āgnīdhra sits near the utkara and makes the pratyāśrāvaṇa formula अस्तु श्रौषट् from near it.

2331. This defines the position of the *utkara*. यथान देव सवितरित्यु-चरतः पुरस्ताद्वितुतीयदेश उदग्द्विपदेऽपरिमिते वा वेदेर्निर्वपति स उत्करः । आप. II. 1. 6-7. उत्किरति अस्मिन् सतृणं पांसुमित्युत्करः । com. on Sat. I. 6. p. 148.

hands[2332] joined together the place of the utkara with 'the restless one is held down' and remains so. The adhvaryu strikes the vedi with the sphya a second time and a third time and the same procedure is followed by him and by the āgnīdhra as at the first striking except that one *mantra* is different for each priest at each of the two strikings. The adhvaryu strikes with the sphya a fourth time but silently and all actions of the first striking are repeated but without mantras. The adhvaryu removes all the remnants of the darbhas from the vedi, the yajamāna recites the invocatory verse 'I cut off the head' &c. and the āgnīdhra covers a fourth time with his hands with 'may Araru not spring upwards to thy heaven'. The adhvaryu then draws with the sphya on the vedi a line from the south corner of the west side of the vedi towards the east up to the southern shoulder (on the east side of the vedi) with[2333] 'may the Vasus enfold you with the Gāyatrī metre'. He draws a line on the western side of the vedi towards the north with 'may the Rudras enfold thee with the Triṣṭubh metre' and draws a line from the northern corner of the west side towards the east with 'may the Ādityas enfold thee with the Jagatī metre'. While this is being done the yajamāna mutters a verse 'O Bṛhaspati, envelope the vedi &c.'. He makes the shoulders of the vedi raised up and envelope the āhavanīya mound and the two corners on the western side turned towards the gārhapatya and the vedi is contracted in the middle. The adhvaryu issues a direction[2334] (to himself

---

2332. The action of covering with the hands symbolizes the consequence desired viz., that the enemy is confined to the spot to which he is consigned and cannot escape therefrom. Vide Tai. Br. III. 2. 9 for exposition.

2333. परिग्रहण means 'drawing lines with the sphya round the vedi in order to indicate the extent of the vedi.' 'परिगृह्णाति परि समन्तात्स्फ्येन रेखाकरणादिना इयती वेदिरिति ज्ञापनार्थं परिगृह्णाति' com. on Kāt. II. 6. 25. The enveloping with lines may be done up to the middle of the vedi or up to the shoulders (the corners of the east side of the vedi) or up to the āhavanīya mound. पूर्वपरिग्रह (or-परिग्राह) and उत्तरपरिग्रह or-परिग्राह are technical expressions, the first refers to the actions done from enveloping with the mantra to Vasus up to the Āgnīdhra digging the vedi and levelling it. 'पूर्व परिग्रहमित्यस्य कर्मणः संज्ञा संव्यवहारार्था। ..... आगतेनेत्युत्तरतः उत्तरओणेरारभ्य उत्तरपार्श्वे पुरस्ताद्वेदिमध्ये यावत् अंसपर्यन्तमाहवनीयान्तं वा परिग्रहणं कार्यम्।' com. on Kāt. II. 6. 25. पूर्वपरिग्राह is somewhat like the first rough plan and उत्तरपरिग्राह conveys the idea of final completion.

2334. Really this is a mere mantra for *japa*.

or to the āgnīdhra or to the attendants if any) 'O men! make this vedi and make it occupied by the Vasus, Rudras, Ādityas &c.' (Kāṭhaka Saṁ. I. 9). The āgnīdhra digs up with the sphya the upper layer of dust with 'Araru has been struck off from the earth, bring here him who worships the gods' and carries the dust so dug towards the utkara. When this is being done the sacrificer recites two texts. The āgnīdhra digs the ground from west to east for making the vedi with 'at the prompting of God Savitṛ, the worshippers do their work'. Whatever roots remain in the ground he removes with the sphya, and all dust that remains he removes to the utkara. The adhvaryu addresses the brahmā priest 'O brahman! shall I undertake the further enfolding of the vedi'. The brahmā priest mutters a mantra 'O Bṛhaspati, enfold the vedi &c.' and loudly replies, 'Yes (om), do enfold'. He enfolds the vedi from the south, west, and north respectively[2335] with 'thou art ṛta (right), thou art the abode of ṛta, thou art the glory of ṛta'. The yajamāna mutters while this is being done a verse 'O Bṛhaspati! enfold the vedi' (same as the one recited by the brahmā above). The adhvaryu says 'thou art dhā (support of the *havis*), thou art svadhā (the source of piṇḍas offered to Manes), thou art the wide earth, thou art rich' and makes the surface of the vedi level by means of the sphya from east to west. The yajamāna invokes the vedi with a mantra 'Having become the earth, it nourished greatness &c.' (Tai. Br. III. 7. 6). The adhvaryu addresses a mantra[2336] (Tai. S. I. 1. 9) to the vedi 'O virapśin! Before the cruel (Araru) creeps out &c.', holds the sphya in a slanting position in a spot which is beyond $\frac{1}{3}$ of the length of the vedi from its western side and issues a direction[2337] 'obtain or set down the

---

2335. The words ऋतमसि, ऋतसदनमसि, ऋतश्रीरसि are addressed to the vedi. They are from Tai. S. I. 1. 9.

2336. According to Sāyaṇa, विरप्शिन् is irregular for विरप्शिनि addressed to the vedi and means 'having priests.'

2337. The मैत्र is मोक्षणीरासादयेध्मावदिरुपसादय ध्रुवं च ध्रुचश्च संसृड्डि पत्नीं संनह्याज्येनोदेहीति ।. Vide Tai. Br. III. 2. 9 and Sat. I. 6. p. 153. According to Sat. this is addressed to himself by the adhvaryu who does all these actions in order. According to Kāt. II. 6. 36–37 the direction is addressed to āgnīdhra and according to the com. on Āp. II, 3. 11 there is an option. Even if the yajamāna has two or more wives the direction is still पत्नीं संनह्य, since the rule is that there is no

(*Continued on next page*)

water for sprinkling, put down the idhma (fuel-sticks) and barhis (kuśa grass), clean the *sruva* and the *sruc* ladles, gird up the wife (of the sacrificer), and come out with clarified butter.' Then the āgnīdhra (or adhvaryu) places two pavitras inside the agnihotrahavaṇī (sruc), pours water into it, draws the sphya in a slanting position (from the spot where it had been held fixed) a short distance to the north thereby causing a furrowed line on the vedi, holds the sphya in the left hand inside the vedi and the agnihotrahavaṇī in the right hand, drops a little water from the agnihotrahavaṇī on to the furrowed line made by the sphya and places the agnihotrahavaṇī (containing the water) on the spot where the sphya had been originally held fixed slantingly with 'O abode of ṛta.' The adhvaryu brings to his mind him whom the yajamāna hates. When the prokṣaṇī waters are being placed the yajamāna mutters a mantra. The adhvaryu throws the sphya in such a way that it falls on the utkara with 'thou art produced from a tree, thou hast a hundred points, thou art the death of the enemy.' Then seizing the sphya with his fist by the bulging part thereof he draws it towards the east from the utkara. He washes his hands on the utkara and also the sphya with water but does not touch with his bare hand the point of the sphya (i. e. he cleans the other parts of the sphya with his hand by pouring the water thereon and cleans the point by only pouring water thereon). To the north of the āhavanīya he places with both hands the *idhma* and *barhis*, the latter to the north of the former. The sphya is placed near the praṇītā waters to their west (Kāt. II. 6. 43).

With the ends of the blades cut off in making the veda bunch he (the āgnīdhra or adhvaryu himself) wipes the sruva and the three ladles viz. juhū, upabhṛt and dhruvā), invokes them with 'you are not sharpened (and yet) you destroy our enemies.' He takes up the sruva and the sruc ladles with 'Agni summons you, who are filled with butter, for the worship

---

(*Continued from last page*)

ūha in the model sacrifice. Vide Jaimini IX. 3. 20. The next sūtra extends the same rule to vikṛti sacrifices also. In XII. 1. 29 Jaimini establishes that at the time of dīkṣā in a Soma sacrifice the wife is girt up with the yoktra, a fresh girding up is hence not necessary in the prāyaṇīyā and other iṣṭis that are constituent elements in somayāga. Jaimini I. 4. 11 explains that the word prokṣaṇī is used here in its etymological sense.

of the gods,' heats them on the āhavānīya or gārhapatya with 'burnt is the evil spirit, burnt are the enemies, I heat you with the very dazzling light of Agni.' He cleans the sruva, the bowl by rubbing its inside several times and its outside on all sides once with the tips [2338] (of the vedaparivāsanāni) and its rod with the roots (of the portions of the cut blades) with 'May I not brush the place of cows ! I clean thee that art strong (or possessed of food) and that subduest enemies ' (Tai. S. I. 1. 10. 1). He cleans the juhū ladle, the bowl by rubbing its inside several times from west to east with the tips (of the cut portions), its outside from east to west with the middle portions and its rod with the roots with ' may I not brush out speech and life-breath, I clean thee &c.' He cleans the upabhṛt, the inside from east to west (as for sruva), the outside from west to east with the middle portions and the rod with the roots with ' may I not rub out the eye and the ear, I clean thee &c.' He cleans the dhruvā ladle as he did the sruva, with the difference that the mantra is ' may I not rub out progeny and home &c.' He does not allow a cleaned vessel to come in contact with one that is not cleaned, but if they are brought in contact he again heats the vessel (already cleaned) and cleans it again. He takes up the vessel called prāśitraharaṇa, [2339] heats it on the fire (but without mantras) and cleans it, the bowl with the tips (of cut blades) on all sides from the outside to the inside and the rod with the roots ' with may I not brush out food, progeny and prosperity, I clean thee that art strong and subduest enemies '. According to Āp. II. 4. 10 and com. on Sat. I. 7 p. 158 the sruc ladles and the prāśitraharaṇa are laid on darbhas in front of the utkara or to its west on the north side of the vedi. He sprinkles with water the cut portions of the veda bunch with

---

2338. The portions cut off in making the veda bunch (called vedaparivāsanāni) have three parts, अग्र (tips), मध्य and मूल. The first and last are employed in cleaning the स्रुव. The mantra in Tai. S. I. 1. 10 is गोष्ठं मा निर्मृक्षं वाजिनं त्वा सपत्नसाहं संमार्ज्मि, वाचं प्राणं चक्षुः श्रोत्रं प्रजां योनिं मा निर्मृक्षं वाजिनीं त्वा सपत्नसाहीं संमार्ज्मि. गोष्ठं ..... साहं संमार्ज्मि is uttered when cleaning स्रुव, वाचं प्राणं मा निर्मृक्षं वाजिनीं त्वा सपत्नसाहीं संमार्ज्मि for जुहू, चक्षुः श्रोत्रं मा निर्मृक्षं वाजिनीं त्वा सपत्नसाहीं संमार्ज्मि with उपभृत्, प्रजां योनिं मा निर्मृक्षं वाजिनीं.....संमार्ज्मि with ध्रुवा. 'प्रतीचीमग्रादारभ्य पात्रवृष्णसंधिपर्यन्तं, संधिमारभ्याग्रपर्यन्तं प्राचीम् ' com. on Sat. I. 7 p. 158.

2339. Prāśitra is a portion of the *havis* left over after offering into the fire, that is to be given to the brahmā priest and prāśitraharaṇa is the vessel that holds it and that is made of khadira wood, is shaped like a cow's ear, is one span long and has a rod four angulas in length.

which the vessels were cleaned and offers them into that fire [2340] (gārhapatya or āhavanīya) on which the vessels were heated with 'this artistic thing (the darbha that springs from water) spread down from heaven, it resorts to the spaces of the earth; we destroy our enemy with it that has a thousand shoots, svāhā!' (Tai. Br. III. 3. 2).

Then comes *patnīsaṁnahana* (girding up of the sacrificer's wife).

The āgnīdhra takes up the veda bunch, the *āyasthālī*, [2341] *yoktra*, and the two darbha blades used as *pavitra*. The wife (of the sacrificer), while sitting to the south-west of the gārhapatya with knee raised up or standing is girt up by the āgnīdhra (by the adhvaryu, according to com. on Āp. II. 5. 6) with the yoktra (cord of muñja grass) with the mantra, 'I hoping for a favourably disposed mind, progeny, good luck, beautiful body and observing the vratas of Agni, gird up myself for meritorious actions' (Tai. S. I. 1. 10. 1). In modern practice the wife girds up her waist with the yoktra herself. He does not gird her up over the garment worn round the waist but inside it (Āp. II. 5. 5 says there is an option). The yoktra has a loop at one end in which the other end is inserted and the cord is passed round the waist of the wife twice, a knot like that of the top-knot (śikhā of a man) is made to the north of the navel with 'may Pūṣan tie a knot for you' and it is drawn to the south of the navel from left to right. She waits upon (does adoration to) the gārhapatya by standing and saying 'O fire, Lord of the house, call me near'. Standing to the west of the gārhapatya she pays

2340. According to Kāt. II. 6. 50 the cut blades used in scouring the vessels are thrown on the utkara. Āp. II. 5. 1 gives an option.

2341. The ājyasthālī is a pot in which clarified butter is taken with a mantra after the pavitra blades are placed therein and from which the sruc ladles are filled. The yoktra is a triple (having three strands) cord of *muñja* grass with which the waist of the sacrificer's wife is girt with a mantra by the āgnīdhra at the direction of the adhvaryu in sacrificial rites. The wife is made fit for participation in the sacrifice by being girt up. Vide Tai. Br. III. 3. 3 'आशासाना सौमनसमित्याह। मेधामेवैना केवलीं कृत्वा आशिषा समर्धयति। अग्नेरव्रता ... कमित्याह। एतद्वै पत्नियै व्रतोपनयनम्। तेनैवैना व्रतमुपनयति।'. According to some (Āp. II. 5. 3) the mantra 'ईक्षेक्षेक्ष' is recited by the wife. The words in Sat. 1. 7 p. 160 are 'उत्तरतो नाभेर्निष्टर्क्यं ग्रन्थिं कृत्वा'. निष्टर्क्यः ग्रन्थिः means शिक्षाकृतिः ग्रन्थिः (com. on Āp. II. 5.6) i.e. a knot that can be unloosened by untwisting. Girding her up represents making her undergo a *vrata* for the sacrifice, as stated by the Tai. Br. quoted above.

adoration to the wives of the gods[2342] with 'May you wives of the gods summon me near you' and she looks at the same spot (west of gārhapatya and not east) with 'O wife, O wife (of the god)! this is thy world, salutation to thee, do not injure me'. She sits facing the north at a place which is south-west of the gārhapatya with 'May I have no widowed state just as Indrāṇī has none.[2343] May I have good sons like Aditi! O gārhapatya endowed with all means, I sit down near thee for good progeny' (Tai. Br. III. 7. 5). On sitting down she mutters (japati[2344]) 'O fire! we, who have virtuous husbands and who have good progeny, who are not treated with contempt, have sat down near thee, that destroyest enemies and that cannot be destroyed (Tai. S. I. 1. 10. 1-2); may my sons be destroyers of enemies and my daughter be ruling (a queen); I also am victorious (over my co-wives) and my glory with my husband is highest (Ṛg. X. 159. 3).' The āgnīdhra opens the mouth of the big jar (covered with a piece of cloth or the like) in which ghee has been stored with 'may Pūṣan open thy mouth' and takes from it into another vessel ghee that should be a little more than what would be required in the rite, heats it on the dakṣiṇa fire with 'Viṣṇu traversed this' (Ṛg. I. 22. 17). He takes up from the spot where all utensils have been placed the ājyasthālī (pot for clarified butter) with 'thou art Aditi, whose pavitra is not cut off' and pours into that pot in which two pavitras are placed plenty of clarified butter[2345] 'thou art the milk of the great ones (the cows), the fluid of herbs, I take out from thee that art inexhaustible a portion for the worship of gods (this is the nirvāpa of clarified butter). He melts the butter in the ājyasthālī on the burning coals of the southern portion of the gārhapatya

---

2342. The region of the wives of the gods is to the west of the gārhapatya.

2343. In Ṛg. X. 86. 11 (and Tai. S. I. 7. 13. 1) we read इन्द्राणीमासु नारिषु सुभगामहमश्रवम्। न ह्यस्या अपरं च न जरसा मरते पतिर्विश्वस्मादिन्द्र उत्तरः॥

2344. The com. on Sat. I. 7. p. 161 significantly remarks that the mantras to be repeated by the wife should be learnt by her from her father or husband before *agnyādhāna* 'एते मन्त्रा आधानात्पूर्वं पितुः पत्युर्वा सकाशाद्धीत्य प्रयोज्याः'.

2345. The com. on Āp. II. 6. 1 notices that in the absence of ghee made from cow's milk, ghee made from the milk of a she-buffalo or a she-goat may be used as a substitute or even sesame oil. But the mantra is the same (there is no *ūha* of the words referring to cows that occur in the mantra).

fire with 'to thee for sap', takes it down (from the coals) with 'to thee for strength', holds it over the veda bunch and hands both the pot and the veda bunch to the wife. She first closes her eyes and then holding her breath (opens her eyes and) looks down on the clarified butter with 'thou art the milk of cows; the fluid of herbs, I look on thee for securing good progeny with an invincible eye' (Tai. S. I. 1. 10. 3). The āgnīdhra places the ājyasthālī on the northern portion of the gārhapatya fire and melts it with 'thou art light'; he takes it from the fire with 'to thee for light' and carries it to the south of the āhavanīya with 'follow after light'. He melts it on that fire with 'may Agni not remove thy light'. He takes up the pot and returns by the way he went and places it with a mantra 'thou art the tongue of Agni' (Tai. S. I. 1. 10. 3) to the north of the prokṣaṇī waters on the line drawn with the sphya.

The adhvaryu and the yajamāna both close their eyes, holding their breath, (open their eyes and) look down upon the clarified butter with 'thou art ājya, thou art truth ..... may I partake of thee' (a long mantra from Tai. S. I. 6. 1. 1-2). The adhvaryu purifies (performs *utpavana* of) the ājya thrice with two pavitras[2346] the points of which are held towards the north by continuously carrying them backwards and forwards with 'thou art bright, thou art the flame, thou art light' (Tai. S. I. 1. 10. 3). He performs *utpavana* of the prokṣaṇī water with 'devo vaḥ savitotpunātu &c.' (Tai. S. I. 1. 10. 3). The adhvaryu fills with the sruva ladle that has no trace of anything sticking to it and that is held in the right hand clarified butter inside the vedi, while holding the sruc together with the veda bunch in the left hand. The juhū ladle is so held that its bowl is alongside of the hollow of the ājyasthālī, that of the upabhṛt is near the middle of the ājyasthālī and the dhruvā is on the ground. In the juhū and dhruvā four ladlings are made with sruva while in the upabhṛt eight are made[2347], but the upabhṛt contains the smallest portion of ājya, the juhū contains a good deal and the dhruvā contains

2346. The com. on Sat. I. 7. p. 165 explains how this particular utpavana is done 'आज्यस्थाल्यां पवित्रे पश्चाद्भागमारभ्य प्राग्भागं नीत्वा पुनः पश्चाद्भागमानीय ततो मन्त्रेणोत्पुनाति' पुनर्द्विरेवमेव।'. The Ṛgvedins move the pavitras from the west to the east only.

2347. There are various views about the number of times ājya is poured with the *sruva* into the three ladles (sruc). Vide Āp. II. 7. 4-6, Sat. I. 7 pp. 165-167. The general rule is stated above.

the largest quantity. When the juhū is being filled the mantras are four 'śukram tvā...gṛhṇāmi pañcānām tvā...dhartrāya gṛhṇāmi' (Tai. S. I. 1. 10. 3 and I. 6. 1. 2-3); in the case of the upabhṛt the mantras are eight 'pañcānām tvartūnām... suvīryāya tvā...gṛhṇāmi'; in the case of the dhruvā the mantras are 'suprajāstvāya tvā gṛhṇāmi..... devatābhyo gṛhṇāmi' (Tai. S. I. 6. 1. 3). The yajamāna also invokes with the same mantras when the ladling is going on. The adhvaryu removes the ājyasthālī together with the veda and sruva from the vedi, keeps the ājya in some place other than the utkara, invokes the prokṣaṇī waters with 'the divine waters (āpo devīr &c., Tai. S. I. 1. 5. 1) and seeks the permission of the brahmā priest with 'brahman, shall I sprinkle.' When the brahmā says 'yes' he sprinkles thrice the idhma (fire-wood brought, vide p.1014 above), the veda bunch and the vedi, each with a separate mantra (from Tai. S. I. 1. 11. 1). He places the whole bundle of *barhis* with the knot to the east inside the vedi with a (*sautra*) mantra 'we had recourse to barhis &c.' and sprinkles the tips, the middle portions and the roots of the *barhis* respectively with 'to thee for heaven', 'to thee for the aerial region', 'to thee for the earth.' While the sprinkling proceeds the yajamāna repeats a verse 'may the waters and herbs be well disposed to the yajamāna &c.' (Āp. IV. 6. 1). He dips the tips of the barhis in the water contained in the agnihotra-havaṇī and then the roots also. He sprinkles over the knot of the barhis from east to west water from the sruc over which he places his hand (so that water oozes over it from his finger tips) with 'to you for nourishment' (Tai. S. VII. 1. 11). He pours down the remaining prokṣaṇī water from the southern corner (śroṇi) of the west side of the vedi to its north corner with 'svadhā to the pitṛs, mayst thou be strength for the barhiṣad pitṛs, may you (the particles of water) go to the earth with strength' and the yajamāna says 'this is for the Barhiṣad pitṛs.'

Now comes *barhirāstaraṇa* (strewing the vedi with kuśa grass). He loosens the knot of the bundle of *barhis* with 'may Pūṣan loosen thy knot'. He takes in his hand the prastara bunch drawing it towards the east slowly from the bundle of barhis (as if towards the āhavanīya) with 'thou art the crest (stūpa) of viṣṇu i. e. yajña (Tai. S. I. 1. 11). With 'I implant prāṇa and apāna in the yajamāna' he places the two pavitra blades (used in utpavana above) on the prastara, hands it over to the brahmā priest, who passes it on to the

yajamāna who holds it in his hand. He strews darbha[2347a] grass on the vedi and places the cord that tied the barhis thereon with 'God Barhis! I strew thee that art soft like wool, as a good seat for the gods'. The darbhas are spread in three or five series (or divisions) beginning from the west side of the vedi towards the east (or the reverse according to some) in such a way that the tips of one set that is already spread cover the roots of the next and the grass is so thickly strewn that the ground below cannot be easily seen. When the kuśa grass is being strewn the yajamāna recites a mantra 'O barhis, that are soft like wool, being spread ..... place me in heaven &c.' (Tai. Br. III. 7. 6), when the vedi is covered with the middle division of the barhis he recites the mantra 'this young lady with four tufts of hair &c.' (Tai. Br. III. 7. 6) and when the vedi is completely covered he recites a long passage 'May you be auspicious to me ..... increase food, strength, spiritual lustre, martial brilliance, prosperity, progeny, cattle for me &c.' (Tai. Br. III. 7. 6).

He takes out two blades (to be used later) for the anūyājas and keeps them separately to the east, feeds the āhavanīya with fire-wood, takes back the prastara from the hand of the yajamāna, and while holding the prastara himself places the three encircling fuel-sticks (*paridhi*) round the āhavanīya fire. The middle paridhi is placed on darbhas to the west of the āhavanīya with the tip towards the north with[2348] 'thou art gandharva &c.'. While the middle paridhi is being placed the yajamāna recites a mantra (Tai. Br. III. 7. 6). The other two paridhis are laid to the south and north of the āhavanīya place with their tips to the east, the southern one extending a little beyond the āhavanīya place and touching the middle paridhi and the northern one also touches the middle paridhi. The yajamāna repeats two long passages when the southern and northern paridhis are being laid (portions of which are identical

---

2347a. According to the Tai. Br. III. 3. 6 barhis represents human beings and the vedi represents the earth. 'बर्हिः स्तृणाति । प्रजा वै बर्हिः । पृथिवी वेदिः । प्रजा एव पृथिव्यां प्रतिष्ठापयति ।'. In Tai. Br. III. 3. 6 we have यजमानो वै प्रस्तरः which Jai. I. 4. 23 says is a mere arthavāda.

2348. The mantra for the middle paridhi is गन्धर्वोसि विश्वावसुर्विश्व-स्मादीषतो यजमानस्य परिधिरिह ईडितः, that for the southern paridhi is इन्द्रस्य बाहुरसि दक्षिणो यजमानस्य ... ईडितः, that for the northern one is मित्रावरुणौ स्थोत्तरतः परिधत्तां ध्रुवेण धर्मणा ... ईडितः. These occur in Tai. S. I. 1. 11 and Vāj. S. II. 3.

with that repeated by the yajamāna for the middle paridhi). The adhvaryu invokes the āhavanīya 'may the sun guard you against all injuries whatever' (Tai. S. I. 1. 11). He places (in the midst of the āhavanīya fire) two samidhs with their ends turned upwards on which the āghāras (will be offered later on), one to the south with the mantra 'O Fire, the wise one, may we kindle thee &c.' (vītihotram tvā kave &c. Ṛg. V. 26. 3 or Tai. S. I. 1. 11) and the other to the north of it silently. From the midst of the barhis he takes two darbhas of equal length, that have no blade hhooting from inside of them; these are called vidhṛti and are laid down on the barhis strewn on the vedi in the middle portion of the latter with their tips turned northwards with 'you two are the regulators of people'. When the vidhṛtis are being laid down the yajamāna repeats a long passage 'I cut off my enemies with the vidhṛtis.....may you support life, progeny and cattle in me' (Tai. Br. III. 7. 6). The adhvaryu keeps the prastara bunch on these two vidhṛtis with 'sit in this abode of Vasus, Rudras and Ādityas' (Tai. S. I. 1. 11) and the yajamāna repeats a mantra 'this prastara is the support of both Prayājas and Anūyājas &c.' (Tai. Br. III. 7. 6). The adhvaryu places the juhū on the prastara in such a way that its rod will be alongside of the roots of the prastara bunch with a mantra.[2349] The upabhṛt is placed to the north of the juhū in such a way that its root is very much to the west of the root of the juhū and it is underneath the *vidhṛtis*, and the dhruvā is placed to the north of the upabhṛt over the vidhṛtis and its root is very much to the west of that of the upabhṛt. The three should not be so placed as to touch each other. The yajamāna repeats three passages (all from Tai. Br. III 7. 6) addressed to the three ladles when they are being placed. The adhvaryu lays down the sruva to the south of the juhū (or to the north of the dhruvā but a little behind its bowl) with 'thou art a bull possessed of strength, I seat thee in the extent of vaṣaṭkāra'. He places the ājyasthālī also in such a spot as space would permit. The yajamāna repeats a mantra for sruva and another for ājyasthālī (Tai. Br. III. 7. 6). The adhvaryu invokes the ladles (srucs) with 'these sat in the world of good deeds; O Viṣṇu! protect them, protect the sacrifice

2349. The same mantra is repeated for all three, only the name of the particular sruc being inserted 'जुहूरसि घृताची नाम्ना प्रियेण नाम्ना प्रिये सदसि सीद। उपभृदसि घृताची ... सीद। ध्रुवासि घृताची ... ... सीद। Vide Tai. S. I. 1. 11 and compare Vāj. S. II. 6.

and the lord of sacrifice and me who bring sacrifice' (Tai. S. I. 1. 11, Vāj. S. II. 6). He invokes the clarified butter with 'you are all-pervading, belong to Viṣṇu and are the abodes of Prajāpati'. He takes in his hand the ājyasthālī together with the sruva and the veda bunch, removes with the veda bunch the burning coals from the southern puroḍāśa with 'Here do I remove the mouth from the attacking army' and then removes them also from the northern puroḍāśa. He invokes the puroḍāśa with 'O Sun, O Light, shine forth for great vigour.' He spreads a little clarified butter in the puroḍāśapātrī for each of the two cakes with 'I make a happy seat for you, I arrange for a seat full of pleasure with a stream of butter' (Tai. Br. III. 7. 5) and drops clarified butter over (i. e. performs abhighāraṇa) the southern puroḍāśa which is intended for Agni with 'May Agni whose source is ghee increase (or be pleased), may he accept the offerings, anoint the holes, anoint the skin; I sprinkle thee that art good looking, that art dear to Agni and that securest wealth with the lustre of cattle (i. e. ghee) for Agni' (Tai. Br. III. 7. 5) and drops butter silently on the northern puroḍāśa. If the second offering be sānnāyya (instead of a puroḍāśa) he drops clarified butter over the boiled milk with a mantra 'May that self of yours that has entered cattle...go to the gods and secure heaven for me who am a sacrificer' (Tai. Br. III. 7. 5). He removes the puroḍāśa into the pātrī (vessel) from the potsherds without allowing it to break up into pieces and without making it roll about with 'this baked (puroḍāśa) that is moist and has broad prominences, that is the protector of the world, that is the generator of thoughts (or prayers) comes out for a bath' (Tai. Br. III. 7. 5). He brushes away the ashes (sticking on the back of the puroḍāśa) with the veda bunch and lays it down in the puroḍāśapātrī on the butter that has already been sprinkled over it with 'Sit on that, be firmly placed in nectar, O offering, that art the essence of rice grains,[2350] with a favourable mind' (Tai. Br. III. 7. 5). He sprinkles clarified butter over it a second time and keeps it aside with 'mayst thou be strong.'

He sprinkles clarified butter over each of the potsherds (on which the puroḍāśa was baked), counts them and keeps them aside with 'may not prosperity in the form of food and the flavour of earth pass away' (Tai. Br. III. 7. 5). He anoints

2350. Āp. II. 11. 2 says that if the puroḍāśa is made of barley flour he does not repeat the mantra as the word 'rice' occurs therein.

both the puroḍāśas with butter with 'may god Savitṛ anoint thee with honey' (the mantra is repeated twice), the upper part being anointed by the sruva ladle with plenty of ghee in such a way that there are no mere drops of ghee on it as there are specks on the back of the tortoise (but the ghee is well spread over the whole surface) and that the lower skin of the puroḍāśa is anointed with ghee by the right hand. He lays down the two puroḍāśas to the west of the *srucs*, that for Agni being to the south and the other being to the north with 'may you occupy this loved seat by your lovable lustre.' If sānnāyya is to be offered, he brings together (makes them touch each other) in the middle of the vedi the two jars of it and then keeps them separate, the one containing the boiled milk on the southern corner of the west side of the vedi and that containing curds on the northern corner thereof. When the sānnāyya is being thus placed the *yajamāna* repeats a verse 'yasta ātmā' &c.' (Tai. Br. III. 7. 5) and repeats a mantra (from Tai. Br. III. 7. 6) invoking the puroḍāśa for Agni, that for Agnīṣoma (or Indra and Agni), the hot milk, the curds (the sānnāyya in cases where it is offered).

The adhvaryu lays down the veda bunch in front of the dhruvā ladle with 'this veda sought the earth that was concealed &c.' (Tai. Br. III. 7. 6), strews darbhas round the corners of the vedi,[2351] and prepares the seat for the hotṛ which is to the north of the northern 'śroṇi' of the vedi and the darbhas spread on the seat have their points turned eastwards or northwards. The adhvaryu invites the hotṛ in the words 'O Hotṛ! come'. The hotṛ priest sits down to the north-east of the āhavanīya with face to the east, performs *ācamana* with the sacred cord in the upavīta form, enters the sacrificial ground (vihāra) by the way called *tīrtha* (vide p. 984 above). He enters with his right foot first, plants his heel alongside of the northern śroṇi and steps upon the *barhis* (spread on the vedi) with his toes, spreads out the fingers of both hands which he joins together and holds them on a level with his heart, looks straight at the horizon (and neither upwards nor downwards) and stands facing the east. This is always the position of the limbs of the body in the case of the hotṛ unless there be any express direction to the contrary. The adhvaryu takes a *samidh* from the idhma and issues a direction to the hotṛ 'recite

2351. On वेद्यन्ताम्परिस्तीर्य the com. on Āp. II. 11. 10 says 'वेदिं परिस्तीर्येति यावानर्थस्तावानेव वेद्यन्ताम्परिस्तीर्येति'.

for Agni that is being kindled'. The hotṛ recites 'salutation to the expounder, salutation to the supervisor, salutation to him who reports, who will repeat (or respond to) this? He will repeat this. May the six broad (or great) ones, viz. heaven and earth, day and night, waters and plants save me from sin. Speech has stood firm (and so has) yajña. I shall deal with (i. e. recite) the metres well. I resort to myself so and so (here the hotṛ utters his name in the objective case). In the past and in future, as to things born and to be born I have recourse to (Agni) who is apāvya (?). Bring me the non-cessation of speech'. So saying he contracts his fingers towards himself and then extends them as before by saying 'O fire! make the cattle take delight in me'. (Then he should proceed) 'Heaven and earth are my armour. Fire is my armour, the Sun is my armour and may the intermediate quarters be my armour! O gods! I shall to-day reflect over that highest part of speech, whereby we may vanquish the asuras; O five people, who deserve sacrifices and food accept my offering.[2352] Having finished this *japa*, the hotṛ sets about repeating the Sāmidhenī verses.[2353] The yajamāna repeats the *daśa-hotṛ* mantras before the sāmidhenīs (vide note 2247 for daśahotṛs). First he utters the syllable '*him*' thrice (or once) and the mystic words 'bhūr bhuvaḥ svarom' are muttered inaudibly by him.[2354] Then come the sāmidhenī verses. The sāmidhenī verses are (vide Āśv. I. 2. 7) eleven viz. Ṛg. III. 27. 1, VI. 16. 10–12, III. 27. 13–15, I. 12. 1, III. 27. 4, V. 28. 5–6. But fifteen sāmidhenī verses are to be repeated in Darśa-pūrṇamāsa and the number fifteen of the verses is obtained by repeating each of the first (pra vo vājā, Ṛg. III. 27. 1) and the last verse (ā juhota

2352. The passages नमः प्रवक्त्रे नम उपद्रष्ट्रे ..... जुषध्वम् constitute the entire *japa* which the hotṛ mutters, the last clause being Ṛg. X. 53. 4. This last is explained in Nirukta III. 8. The words नमः प्रवक्त्रे &c., are a *sautra* passage (Āśv. I. 2. 1) and have a parallel in Śān. I. 4 'नमोऽस्तु उपद्रष्ट्रे नमो वायव उपश्रोत्रे नम आदित्यायानुख्याते &c.'

2353. The verses are called Sāmidhenī because they are repeated when Agni is being kindled or fed with fuel. अग्नेः समिन्धनार्था ऋचः सामिधेन्यः—com. on Āśv. I. 2. 3. Vide Śat. Br. I. 3. 5. 1 इन्धे ह वा एतद्यज्वर्ङरिध्मेनाग्निं तस्मादिध्मो नाम, समिन्धे सामिधेनीभिर्होता तस्मात्सामिधेन्यो नाम ॥. सामिधेनी means समिधामाधानी and is derived from सम्+इध्.

2354. According to Āśv. I. 2. 3–4 the repetition of '*him*' thrice and of 'bhūrbhuvaḥsvarom' are technically called अभिहिङ्कार. Vide Tai. S. II. 5. 7–8, Tai. Br. III. 5.: 2, Śat. Br. I. 3. 5–I. 4. 1. Śat. Br. I. 4. 1. 3 states that the word '*him*' is uttered inaudibly.

Rg. V. 28. 6) thrice. They are all to be repeated in the same pitch[2355] (not minding udātta, anudātta or svarita accents) i. e. *ekaśruti*. Jaimini IX. 1. 33 states that whatever ṛk is the first or last (whether 'pra vo vājā' &c. or any other) is to be repeated thrice (i. e. repetition three times is an attribute due to the place of a verse and it is not an attribute of any particular verse). The syllable 'om' is to be added at the end of each verse and the adhvaryu sitting down near the āhavanīya throws into the āhavanīya fire a *samidh* the moment 'om' is uttered by the hotṛ at the end of a verse. The sacrificer then utters at each samidh 'agnaya idam na mama'. In this way when eleven samidhs have been offered, all the remaining samidhs (except one kept aside for the *anuyājas*) are offered into the fire the moment the last verse but one (viz. samiddho agna, Rg. V. 28. 5) or the last verse (ā juhotā, Rg. V. 28. 6) is recited. Āśv. (I. 2. 8-22) gives detailed rules about how these sāmidhenī verses are to be recited. The note below would illustrate the method of their recital.[2356] The hotṛ repeats the *nigada* 'O fire, you are great, you are brāhmaṇa (the impulse to prayers), you are Bhārata (the sustainer)' in such a way as to join it with the last 'om' repeated after the last sāmidhenī verse and then makes a stop. Then the

---

2355. Āśv. I. 2. 9 defines 'उदात्तानुदात्तस्वरितानां परः संनिकर्ष ऐकश्रुत्यम्' and the com. explains 'उदात्ता ..... रितानामभिव्यञ्जका ये प्रयत्ना आयामविस्रम्भाक्षेपास्तेषामन्यतमस्यैकस्यैवात्यन्तसंनिकर्षेणासजातीयप्रयत्नाव्यवधानेन यदुच्चारणं तदैकश्रुत्यमित्यर्थः.'

2356. The verses are repeated as follows: म्र वो वाजा ..... गातु सुम्नयो3 म्र वो वाजा ..... सुम्नयो3 म्र वो वाजा ..... सुम्नयो3मग्न आयाहि वीतये ..... सत्सि बर्हिषो3म्तं त्वा ..... यविष्ठो3 स नः ..... सुवीर्यो3मीळेन्यो ..... समग्निरिध्यते वृषो3 वृषोग्निः ..... ईळतो3 वृषणं त्वा ..... बृहो3मग्निं दूतं ..... सुक्रतो3 समिध्यमानो ... ... मीमहो3 समिद्धो ..... बाळसो3मा जुहोता ..... हव्यवाहनो3माजुहोता ..... वाहनो3माजुहोता ..... वाहनो3मग्ने महानसि &c. 'Om' being added at the end of सुम्नयुः it is to be recited as सुम्नयो3म् and then it is to be continuously joined on to the next verse viz. the same verse repeated twice again, the 3rd सुम्नयो3म् being joined to the verse अग्न आयाहि वीतये Rg. VI. 16. 10. As तं त्वा follows बर्हिषो3म् it is to be pronounced like बर्हिषो3न् तं त्वा and वृषो3म् followed by वृषोग्निः makes that म् be pronounced like a nasal ँ. The hotṛ is not to stop (avasāna) or take breath at the end of verses but at the end of the half verses. At the end of the last 'om' of the last verse the nigada अग्ने महाँ असि ब्राह्मण भारत is to be joined on to it and then the hotṛ stops at the word 'Bhārata'. The Tai. Br. III. 5. 3 has अग्ने महाँ असि ब्राह्मण भारत । असौ असौ । देवेद्धो मन्विद्धः &c.

hotṛ invokes the names of the pravara sages[2357] of the sacrificer as many as he may have (1, 2, 3 or 5), the most remote one being first uttered, then the more remote and so on. In the case of a kṣatriya or a vaiśya sacrificer, the invocation is made of the pravara sages of the purohita of the sacrificer or of the names 'Mānava, Aila, Paurūravasa' or of 'Mānava' for all in case of doubt (Āśv. I. 3. 3-5). He then proceeds '(Agni) that was kindled by the Gods and by Manu, that was sung by the sages, whom wise men gladdened, that was praised by the sages, that was aroused by prayers, that is offered ghee, the bringer (or leader) of sacrifices, the charioteer of sacrifices, the unobstructed hotṛ, the swift carrier of offerings'. He takes breath here and proceeds 'thou art the mouth and the vessel of the gods, the juhū of the gods, a *camasa* (cup) with which the gods drink; O fire! as the spokes are centered in the felly, so thou encompassest the gods, bring the gods to this sacrificer'.[2358] Then he calls upon Agni to bring the several deities, viz. Agni, Soma, Agni, Prajāpati, Agni-ṣomau, the ghee-drinking gods and adds 'bring Agni for the *hotra* (the function or office of hotṛ), bring thy own greatness, O Jātavedas (fire), bring and sacrifice with a

---

2357. Vide notes 1139-1140 about reciting the names of the pravara sages. For example, if the gotra of the sacrificer is Śāṇḍilya the hotṛ repeats Śāṇḍila, Asita, Devala; if it be Vatsa, he repeats Bhārgava, Cyāvana, Āpnavāna, Aurva, Jāmadagnya. Agni is here invoked to help the sacrificer as the summoner of the gods on this occasion, as he did help the illustrious ancestors of the sacrificer. Vide Haug's tr. of Ait. Br. pp. 479-480 (note) and S. B. E. vol. 12 p. 115 (note) for pravara. It should be remembered that this pravara repetition is part of the *nigada*. He takes breath at the end of the pravara words. Then follow the words देवेद्धो ... तूर्णिर्हव्यवाट् (Āśv. I. 3. 6). Here he again takes breath. Then come fourteen words आस्पात्र ... परिभूरसि. Then the words आवह देवान् ... यज form the आवाहनानिगद.

2358. The Āśv. śr. I. 3. 6 contains the whole formula 'देवेद्धो मन्विद्ध ऋषिष्टुतो विप्राद्धमवितः कविशस्तो ब्रह्मसंशितो धृताहवनः प्रणीर्यज्ञानां रथीरध्वराणामसूर्तो होता तूर्णिर्हव्यवाडित्यवसायास्पात्रं जुहूर्देवानां चमसो देवपानोऽसौ स्रुवाग्ने नेमिर्द्यावापृथिवी परिभूरस्यावह देवान् यजमानायेति प्रतिपद्य देवता द्वितीयया विभक्त्यादेशमादेशमावहेत्यावाहयेत्यादि स्रावयन्'. This passage from देवेद्धो to यजमानाय and the one in the next note occur in Śāṅ. I. 4-5. The words आस्पात्र ... ... यजमानाय are called प्रतिपत्ति and constitute the words of a *nivid*. Vide Śat. Br. I. 4. 2. 5-16 for the words देवेद्धो ... ... यजमानाय and their brief explanations.

good offering'. This part of the formula is given below.[2359] These are the deities in this invocation in pūrṇamāsa but in the darśeṣṭi, Indrāgnī are to be substituted in place of Agnīṣoma for him who does not offer sānnāyya and Indra or Mahendra for him who offers sānnāyya and Prajāpati is omitted.

Having thus invoked the deities (i. e. the whole of the invocation up to this is done standing), the hotṛ sits down with knees raised up, removes the kuśa (on the vedi) to its north and measures the space of a span on the vedi with ' Aditi is his mother, do not cut him off from the air,.....with yajña, with vaṣaṭkāra as the thunderbolt I kill him who hates us and whom we hate '(Āśv. I. 3. 22). The yajamāna repeats a verse ' fire in whom offerings have been thrown is kindled &c. ' (Kāṭhaka Saṁ. IV. 14), when the fire flames up with the fuel-sticks that are offered and another mantra 'Gods and pitṛs, whatever I may be I sacrifice &c.' (Tai. Br. III. 7. 5) is repeated. He fans after the deities are summoned as above the āhavanīya fire thrice with the veda bunch. He while sitting takes clarified butter from the dhruvā ladle with the sruva, holds it on the veda, passing the sruva over the north-west corner (of the āhavanīya) where the two paridhis meet he pours,[2360] while revolving in his mind the mantra 'to Prajāpati Manu, svāhā', a continuous, long and straight stream

---

2359. अग्निमग्न आ३वह सोममा३वह अग्निमा३वह प्रजापतिमा३वह अग्नीषोमावा३वह देवाँ आज्यपाँ आ३वह अग्निं होत्रायावह स्वं महिमानमा३वह आवह जातवेदः सुयजा यज. Vide Āśv. I. 3. 6–14 and 22 (and com. on I. 3. 6) and Śat. Br. I. 4. 2. 16–19. The आ in आवह is to be drawn to three moras (i. e. it is प्लुत) and this is indicated by the figure 3. Vide ' ब्रूहिप्रेष्यश्रौषड्वौषडावहानामादेः ' पा. VIII. 2. 91. The god Prajāpati is mentioned inaudibly. The Ājyapas are the *devatās* of prayājas and anuyājas. Vide Śat. Br. I. 4. 2. 17. The words अग्निं ..... महिमानावह are for calling Sviṣṭakṛt. In the Tai. S. II. 5. 9. 4. and Tai. Br. III. 5. 3 the last part of the formula is slightly different ' आ चाग्ने देवान्वह सुयजा च यज जातवेदः '

2360. This pouring of Ājya is called *āghāra*. There are two *āghāras*, the one described here being the first. In the first Prajāpati is the devatā, in the 2nd Indra. In the first Ājya is poured from north-west to south-east and in the 2nd from the south-west to north-east. Both are done by the adhvaryu. Jaimini I. 4. 4 establishes that the word ' āghāra ' is the name of a rite (karmanāmadheya) and not a guṇavidhi. Vide also Jaimini II. 2. 13–16 on the passages आघारमाघारयति, सततमाघारयति, ऋजुमाघारयति &c. In XI. 1. 54–67 Jai. establishes after a lengthy discussion that the āghāras are performed only once in the darśapūrṇamāsa and are not repeated at each of the principal offerings.

of clarified butter on the fire bursting into flames in the āhavanīya place towards the south-east and makes all the fuel-sticks (already thrown over the fire) come in contact with (the butter so poured). The yajamāna says 'this is for Prajāpati' and invokes the butter poured as āghāra with 'thou art the mind of Prajāpati, enter into me with mind.' Taking ājya from the ājyasthālī in the sruva he strengthens (or increases or adds to) the dhruvā with 'let the dhruvā be strengthened with ghee &c.' (Tai. S. I. 6. 5. 1). He then issues a direction to the āgnīdhra 'O Āgnīdhra, clean thrice each of the *paridhis* and the fire.' The āgnīdhra holds the tying cords of the idhma on the sphya and silently cleans (or wipes) the paridhis with them in the order in which they were placed (round the fire) from their roots to the tips i. e. he cleans the middle one first, moving with his right towards the paridhi from the north with his face towards the east; then he cleans the southern one by going to the south in front of the āhavanīya; then he cleans the northern paridhi by going from behind (the west of) the āhavanīya towards the north; then he returns by the way he went to his usual place and wipes the fire thrice, once with the mantra, 'O fire, that securest strength (or food)! I wipe thee.....that eatest food for the sake of food' (Tai. Br. III. 7. 6) and twice silently. When about to make the āghāra he folds his hands in adoration to the gods with his fingers to the east in front (i. e. to the east of) the juhū and upabhṛt with[2361] O fire! thou art the world, spread in all directions; O sacrificer (Agni), adoration to thee' (Tai. S. I. 1. 12. 1). He folds his hands towards the south in adoration with 'to the pitṛs, svadhā.' He then touches water and takes up the juhū in the right hand with 'O juhū! come, Agni summons thee for the worship of the gods' and takes the upabhṛt in the left hand with 'O upabhṛt! come, god Savitṛ calls thee for the worship of gods' (Tai. S. I. 1. 12. 1). He places the upabhṛt on juhū with 'O well-controlling ones, may you two abound in ghee to-day for me, may you be well covered and well surrounded' (compare Vāj. S. II. 7). He takes the juhū from under the upabhṛt to the east completely and holds it on the upabhṛt in such a way that their bowls are placed on each other and when he is about to throw the ājya into fire he merely holds the upabhṛt in his left and holding the juhū in his right

2361. Though the mantra is addressed to Agni alone, as Agni comprehends in himself all gods, it may be said to be meant for all gods.

makes the offering with it.[2362] He crosses over to the south of the āhavanīya with the right foot but without treading upon the prastara and after repeating the mantra 'O Agni and Viṣṇu! May I not step down on you! May you become apart from me! May you not cause trouble (or heat) to me; may you, who are the makers of worlds, make a place (or world) for me' (Tai. S. I. 1. 12 and Tai. Br. III. 3. 7). He stands to the south of the āhavanīya with 'thou art the seat of Viṣṇu; from here Indra performed his exploits' (Tai. S. I. 1. 12). He places his right foot inside the vedi and makes the toes of the left foot touch the heel of the right. Then inserting the juhū by the point where the southern paridhi joins the middle one (i. e. from the south-west) he, while standing, pours from it towards the north-east (as in the first) a continuous stream of ājya with 'having well begun, the sacrifice of the sacrificer, which is to rise (i. e. to bring prosperity), which is uninjured and which is offered to Indra, touches heaven; svāhā' (Tai. S. I. 1. 12) and makes the ghee come in contact with all the fuel-sticks (idhma) thrown into the fire. The yajamāna says 'this is for Indra.' The adhvaryu, after making this offering (the 2nd āghāra), lets out his breath which he had held up at the time of making the offering. After pouring ājya over the fire he raises up the juhū over the āhavanīya with '(fire) is kindled pre-eminently.' He crosses over to the north separating the juhū and upabhṛt with 'save me, O fire, from evil (or sin) and establish me in good deeds' (Tai. S. I. 1. 12). With the ājya in the juhū he smears the dhruvā thrice, once with 'ghee is anointed by fire, sacrificial offering is anointed by sacrificial offering, the aerial regions are anointed by fire-flame' and twice silently. He takes ājya from the dhruvā ladle with the sruva and sprinkles it over[2363] the (ājya in the) juhū with 'suvīrāya svāhā' and sprinkles ājya from the juhū over that in the dhruvā with 'sacrifice is spread continuously by sacrifice'.

2362. Āp. (II. 13. 5-6) and Sat. (II. 1. pp. 181-182) say that this is the mode of holding the two ladles in all āhutis (he also holds the two on a level with his navel).

2363. Anointing (*samañjana*) is done by sprinkling a drop, but pratyabhighāraṇa requires that ājya should be poured in a stream however slight. 'समञ्जनं बिन्दुमात्रप्रक्षेपेण प्रत्यभिघारणं किंचिद्धाराकरणेनेति भेदेनोपादानं धारयोः' com. on Sat. II. 1. p. 185.

After keeping the two ladles (juhū and dhruvā) in their proper places, he (the adhvaryu) sets about choosing (invoking) the *pravara*. The adhvaryu brings in contact with (twines round) the sphya the tying cords of the idhma and one blade from the the kuśas strewn on the vedi and stands to the north of the vedi (or near the utkara) for reciting the pravara mantra. He faces the south (the east according to com. on Kāt. III. 2. 3). The āgnīdhra stands to the west of the adhvaryu facing the south near the utkara. The adhvaryu then inaudibly utters a formula 'who will become the adhvaryu here? He will become the adhvaryu here. Yajña (will be adhvaryu) of yajña, I stand in the abode of Viṣṇu. May speech perform the function of a priest, may mind do so, I resort to speech. Bhūḥ bhuvaḥ suvaḥ!' (Āp. II. 15. 1 and Sat. II. 1. p. 186). The āgnīdhra after touching the binding cords of idhma, the sphya and the kuśa blade also inaudibly repeats a similar mantra 'who will become the āgnīdhra here &c.' (Āp. II. 15. 2). The adhvaryu addresses the brahmā priest 'O brahman! shall I call on (the āgnīdhra) to listen to the pravara?' The brahmā priest first repeats inaudibly 'O lord of speech! make (him) listen to this speech, make the sacrifice be heard among gods, and me among men (Āp. III. 19. 3); sustain these deities in heaven &c.' and then loudly says 'yes, do make him listen (om3āśrā3vaya). The adhvaryu says[2364] 'ā3 śrāvaya' (make to listen) and the āgnīdhra holding the sphya covered with the binding cord responds with 'astu śrau3ṣaṭ' (lit. yes, let him hear). The adhvaryu then utters 'May Agni, the divine hotṛ, the wise one, the discriminating one, sacrifice for the gods, like Manu, like Bharata, like that one, like that one. Let him bring (the gods) to the accompaniment of holy prayer. The brāhmaṇas are the protectors of this sacrifice.

2364. The call of the adhvaryu in the form 'O śrāvaya' (for ā śrāvaya) is technically called 'āśrāvaṇa' or 'āśruta', while the response of the āgnīdhra in the form 'astu śrau3ṣaṭ' is called 'pratyāśrāvaṇa' or 'pratyāśruta'. Vide Śat. Br. I. 5. 2. 6-7 where, to explain these two words, a legend is narrated of the sacrifice fleeing from the gods. The formula uttered by the adhvaryu is either आ3श्रा3वय or ओ3श्रा3वय according to Sat. II. 1. p. 186 and according to Āp. II. 15. 3 it is also simply श्रा3वय or ओ3श्रा3वय. Vide Pāṇ. VIII. 2. 91-92 for the *pluta*. The आग्नीध्र responds with अस्तु श्रौ3षट्.

This (so and so by name) is the human hotṛ'.[2365] While the adhvaryu is engaged in the āśrāvaṇa call the hotṛ should follow him with an invocation 'make the sacrifice heard among gods, and make me heard among men for fame, glory and spiritual eminence' (Āśv. I. 3. 23). When the adhvaryu chooses the hotṛ (in the words 'so and so is the human hotṛ') the hotṛ should repeat 'God Savitṛ! they here choose thee that art fire for the office of hotṛ together with thy father Vaiśvānara. May Heaven and Earth protect me. Agni is the (divine) hotṛ. I am the human hotṛ' (Āśv, I. 3. 23). He gets up with a mantra 'udāyuṣā &c.' (Tai. S. I. 2. 8. 1) and on getting up recites 'O adhvaryu! sixty plus ninety chains are spread near (or inside) Agni, the hotṛ. They bind the ignorant, (but) the wise one goes beyond (overcomes) them' (Āśv. I. 3. 24). Having approached the adhvaryu with 'I, a hotṛ priest, follow the path of ṛta' (Āśv. I. 3. 25) the hotṛ should touch the adhvaryu on the latter's shoulder with his right hand that hangs by his side and the āgnīdhra also with his left with 'we touch Indra as the purohita in this rite of choosing the hotṛ, whereby the gods reached the highest Heaven and the Aṅgirases also did so' (Āśv. I. 3. 27). He should wipe (purify) his face thrice with the blades used in binding the idhma, once with 'thou art a

2365. The adhvaryu mutters the name of the hotṛ but the word 'mānuṣaḥ' is loudly uttered and the first vowel in it is made *pluta*. The Śat. Br. I. 5. 1. 5–13 sets out the pravara-mantra and explains it: अग्निर्देवो दैव्यो होता देवान्यक्षद्विद्वाँश्चिकित्वान्मनुष्वद्भरतवत् । ... ... अथार्षेयं प्रवृणीते । ऋषिभ्यश्चैवैनं तद्देवेभ्यश्च निवेदयत्ययं महावीर्यो यो यज्ञं प्रापदिति । तस्मादार्षेयं प्रवृणीते । परस्तादर्वाक् प्रवृणीते । ..... स आर्षेयमुक्त्वाह । ब्रह्मण्वदा च वक्षद् ब्राह्मणा अस्य यज्ञस्य प्रावितारः । असौ मानुषः । सत्याषाढ (II. 1. p. 187) says 'अग्निर्देवो ... ... भरतवद्-मुवदमुवदिति यजमानस्यार्षेयं सह परेण त्रीनमन्तरान्'. Āp. II. 16. 5 is almost the same. After भरतवत् the names of the pravara sages are taken; for example, if the yajamāna is of Kauśika gotra then he utters कुशिकवत् अघमर्षणवत् विश्वामित्रवत्. Vide notes 1139 and 1140 above for the two modes of taking the pravara names, one with affix वत् (where the first sage mentioned is the most remote, the next comes after him in time) and the other mode by taddhita formation where the latest among the pravara sages is mentioned first as in वैश्वामैत्राघमर्षणकौशिकेति. Jai. (VI. 1. 43) asserts that one who has not three pravara sages is not eligible for performing darśapūrṇamāsa. Āp. II. 16. 12 and XXIV. 10. 18 and Śat. II. 1. p. 188 give rules about the pravara names of royal sacrificers and of those who have two gotras and state that some held that 'Manuvat' is the pravara for all. Vide notes 1152–53. For the प्रवरमन्त्र 'अग्निर्देवो ... ... प्रावितारः' vide Āp. II. 16. 5 and 11, Sat. II. 1. pp. 187–188.

cleaner (or purifier), purify me together with my progeny and cattle,' and twice silently. After touching water he should, standing to the west of the seat and with face to the east, address the seat of hotṛ (Āśv. I. 3. 30) with 'away, O daidhiṣavya &c.' (vide above p. 1021). He should take a blade of kuśa from the hotṛ's seat with the thumb and the finger next to the smallest and cast it away to the south-west with 'the demon that keeps off wealth is cast aside.' With (Āśv. I. 3. 31) 'here do I like a horse sit down in the seat of vasu' (wealth) he should sit down, the right leg being placed on the left one. He sits down with 'God *barhis*, may I sit down on thee that occupiest a good seat' (Āśv. I. 4. 7). With the cap of his knee he touches the barhis (spread on his seat) with 'O Hotṛ! May you pre-eminently occupy the barhis' (Āśv. 1. 4. 8). Then he mutters (performs japa of) certain texts viz: 'bhūpataye namaḥ ..... chandāṁsi prapadye' (Āśv. I. 4. 9), Ṛg. X. 158. 1, I. 27. 13, X. 52. 1, X. 53. 2 and 4. When the *japa* is finished and the fuel-sticks (*idhma*) thrown on to the fire are blazing he should make the adhvaryu hand over to him the two srucs with this prose formula (*nigada*) 'may Agni, the hotṛ, know (undertake) the duty of hotṛ, that gives protection. O sacrificer! The deity is well disposed to you in that you have chosen Agni as the hotṛ'. He should finish the nigada (Āśv. I. 4. 11) 'Hold the adhvaryu's sruc that abounds in ghee, that is devoted to the gods and is possessed of all boons; let us praise the gods that deserve praise, let us bow to them that deserve adoration and offer sacrifice to the gods that deserve it' (Āśv. I. 4. 11).

The adhvaryu, when the hotṛ sits down, throws down on the vedi the blade of grass (that was brought in contact with the sphya).[2366] The yajamāna says 'O gods and piṭṛs, O piṭṛs and gods &c.'. The yajamāna should repeat the Caturhotṛ mantras before the prayājas are offered (vide note 2248).

The adhvaryu takes the juhū and upabhṛt, crosses from behind the paridhis to the south of the vedi with the right foot first and facing the north-east offers the five prayāja oblations of clarified butter beginning to the west of the place where the two streams of the āghāras meet and ending in the east (Āp. II. 17. 1) or he offers the five offerings in the four principal quarters from the east to the north respectively and the last in the middle of the āhavanīya (Sat. II. 2. p. 199). The procedure

2366. Vide Āp. II. 16. 6 and 11, Sat. II. 1. pp. 187-188.

of prayājas is as follows:—[2367] First he says 'ā3śrā3vaya', the āgnīdhra standing near the utkara facing the south and holding the sphya makes the response 'astu śrau3ṣaṭ'. Then the adhvaryu gives a direction to the hotṛ with reference to the first prayāja 'Samidho yaja' (recite the yājyā verse for the deity Samidhaḥ). The hotṛ recites "Whoever we are, we sacrifice to the deity samidhaḥ; may the samidhs, O fire, partake of the ājya. Vau3ṣaṭ". When the sound vaṣaṭ is heard the adhvaryu offers ājya from the juhū towards the eastern and the most blazing part of the āhavanīya fire. He may either occupy the same position or proceed eastwards as he offers each offering. Jai. III. 1. 19–20 deals with this question viz. that he may offer the prayājas[2368] by proceeding eastwards. After each

2367. तै. ब्रा. III. 5. 4 has अग्निर्होता वेरग्निर्होत्रं वेतु प्रावित्रम् । स्मो वयम् । साधु ते यजमान देवता । घृतवतीमध्वर्यो क्रुचमास्यस्व देवायुवं विश्ववाराम् । ईडामहे देवाँ ईडेन्यान् । नमस्याम नमस्यान् । यजाम यज्ञियान् । Vide also Śat. Br. I. 5. 2. 1–3. आश्व. I. 4. 10 has अग्निर्होता वेरग्नेर्होत्रं वेतु प्रावित्रं साधु ते यजमान देवता यो अग्निमित्यवसाय होतारमवृथा इति जपेत्. This mantra is called क्रुगादापन. The hotṛ recites the words अग्निर्होता ..... यो अग्निम् loudly, then stops to take breath and recites inaudibly होतारमवृथाः. From अग्निर्होता to यज्ञियान् is one निगद्. The शतपथ explains 'मनुष्या वै ईडेन्याः पितरो नमस्या देवा यज्ञियाः' I. 5. 2. 3.

2368. The *prayājas* (fore-offerings) are five in Darśapūrṇamāsa and are oblations of ājya introductory to the principal offerings and *anuyājas* (that are only three in Darśapūrṇamāsa) are offered subsequent to the principal offerings. The prayāja offerings are addressed to five viz., समिधः, तनूनपात् (or नराशंस), इडः (or इळः), बर्हिः, स्वाहाकारः (or स्वाहाकृतयः). Jai. (V. 1. 4–7) enjoins that prayājas must be offered in the order of the text viz. first to Samidhaḥ and so on, and II. 2. 2 declares that with each repetition of the word 'yajati (used five times) there is a separate unseen result (adṛṣṭa or apūrva). The three deities of the anuyājas are बर्हिः, नराशंस, अग्नि स्विष्टकृत्. The word is written either as अनुयाज (Ṛg. X. 51. 8–9) or अनूयाज (Āp. II. 9. 8 and elsewhere). According to Ait. Br. 7. 3 स्वाहाकृतयः means विश्वेदेवाः. In the Nirukta VIII. 22 there is a discussion as to the devatās of prayājas and anuyājas and after mentioning several views Yāska states his own opinion that they are 'āgneya' i. e. they are the different forms (*Tanū*) of Agni. Jaimini (IX. 2. 59–60) holds that the words 'Samidhaḥ', 'Tanūnapāt' &c. are really the names of a rite, that they do not convey that Samidhs, Tanūnapāt and others are deities and that the mantras repeated by the hotṛ convey the devatā, which is Agni. The com. on Sat. II. 1. p. 198 has a long note on this and accepts Jaimini's position. In Tai. S. II. 6. 1 five prayājas of darśapūrṇamāsa are mentioned and they are brought in relation to the five seasons. The five constituent formulas connected with each of the five prayājas are well brought out in Tai. S. I. 6. 11 'आज्यावयेति चतुरक्षरमस्तु श्रौषडिति चतुरक्षरं यजेति द्व्यक्षरं ये यजामह इति पञ्चाक्षरं द्व्यक्षरो वषट्कार एव वै सप्तदशः प्रजापतिर्यज्ञमन्वायत्तो य एवं वेद्द प्रति यज्ञेन तिष्ठति न यज्ञाद्भ्रंशते ।'.

vaṣaṭkāra the hotṛ repeats 'speech is energy. He (vaṣaṭkāra) is indeed energy. May prāṇa and apāna be in me' (Āśv. I. 5. 17). The yajamāna says when the first prayāja is offered 'this is for the Samidhs. I gratify Vasanta among the seasons, May he (Vasanta) being gratified gratify me'. The same procedure is followed as to the remaining four prayājas viz. there is first āśrāvaṇa, then pratyāśrāvaṇa by the āgnīdhra, praiṣa to hotṛ, recital of the *yājyā* by the hotṛ with vaṣaṭkāra at end, offering of ājya into fire by the adhvaryu, the tyāga by the yajamāna and connecting the five prayājas with the five *ṛtus* (seasons) in order from *Vasanta* (hemanta and śiśira being taken as one). The second prayāja offering is meant for Tanūnapāt, but those who belong to the Vasiṣṭha, Śunaka, Atri. Vadhryaśva and Rājanya (Viśvāmitra?) gotras substitute Narāśaṃsa for Tanūnapāt (Śāṅ. I. 7. 3 is slightly different). The whole procedure is briefly indicated in Sanskrit in the note below.[2369] The first three prayāja offerings are made with the ājya in the juhū, but as to the 4th (to Barhis) he pours half of the ājya contained in the upabhṛt into the juhū and then makes the offering. Wherever there are more prayājas than 5 (e. g. in Varuṇa-praghāsa there are nine, in Paśubandha ten) the 4th, 7th and 10th are offered in this way (vide Sat. II. 2. p. 199 and Kāt. III. 2. 22–23). Vide Jai. IV. 1. 40 and 41–45. These mantras (in the note) occur in Tai. Br. III. 5. 5 where 'viyantu' is substituted for 'vyantu' (as is usual with the Taittirīyas). The words 'ye3 yajāmahe' used at the beginning of each yājyā are called 'āgūḥ'; but there are no such words in the anuyājas (Āśv. I. 5. 4). Vaṣaṭkāra is uttered at the end of all yājyās and in anuyājas also. The yājyā is pronounced very loudly and with great distinctness as to the 'ye' of 'ye yajāmahe' and the last syllable of the yājyā is made *pluta*. In Āśv. I. 5. 9. 9–14 there are other rules not set out here. The pronouncing of vaṣaṭ was a very solemn and

2369. The hotṛ says 'ये3यजामहे समिधः समिधो अग्न आज्यस्य व्यन्तू3वौ3षट्। (आश्व. श्रौ. 1. 5. 15)। इति प्रथमः। होता। वागोजः सह ओजो मयि प्राणापानौ इति वषट्कारमुक्त्वाद्यमन्त्रयते। यजमानः। समिधूम्य इदं वसन्तमृतूनां प्रीणामि स मा प्रीतः प्रीणातु। होता। ये3यजामहे तनूनपात तनूनपादग्न आज्यस्य वेतू3 वौ3षट्। इति द्वितीयः। अन्यत्र वसिष्ठशुनकात्रिविश्वरराजन्येभ्यः। नराशंसो अग्न आज्यस्य वेत्विति तेषाम् (आश्व. श्रौ. 1. 5. 21–22)। यजमानः। अग्नय इदं ग्रीष्ममृतूनां०। होता। ये3यजामहे इळ इळो अग्न आज्यस्य व्यन्तू3 वौ3षट्। इति तृतीयः। In the case of the 5th prayāja, the hotṛ says 'ये3यजामहे स्वाहाग्निं स्वाहा सोमं स्वाहाग्निं स्वाहा प्रजापतिं स्वाहा अग्नीषोमौ स्वाहा देवा आज्यपा जुषाणा अग्न आज्यस्य व्यन्तू3वौ3षट्' (आश्व. 1. 5. 24); here प्रजापतिं is uttered inaudibly.

mystic matter and even in modern times the word is uttered very loudly and forcibly. The Ait. Br. XI. 6 says that 'the vaṣaṭkāra is a thunderbolt; when a man utters vaṣaṭkāra he should think of his enemy; thereby he plants the thunderbolt on him.' Āśv. I. 5. 18 states that vaṣaṭkāra was to be uttered only by day and not by night. There are three tones (mandra, madhyama and uttama). Up to the prayājas and after śaṁyuvāka the mandra tone is employed. After prayājas up to sviṣṭakṛt the tone is to be *madhyama*. Thereafter up to śaṁyuvāka it is to be high. Vide Āśv. I. 5. 25-28 and Āśv. I. 5. 4-8 for these and several other rules. Āśv. II. 15. 12 states that the āgūḥ (the words ye3 yajāmahe), the om (at the end of an anuvākyā) and the vaṣaṭkāra are pronounced in a high tone everywhere.

The adhvaryu after the five prayāja offerings comes back and pours some ājya[2370] (left in the juhū after the prayāja offerings) over the several offerings (*haviṁṣi*), first over the dhruvā, then over the puroḍāśas, the boiled milk, the curds in the order in which they are sacrificed later on. Lastly he pours a little ājya over the upabhṛt. He lays down the ladles (sruc). He holds them in his hands from the time when he offers the ājyabhāgas up till the offering to Agni Sviṣṭakṛt. He puts into the juhū four ladlings of ājya with the sruva with 'may the dhruvā be strengthened with ghee in each sacrifice for those who serve the gods &c.' (Tai. S. I. 6. 5. 1) and anoints the blades of the prastara with a drop of ājya.

Now follow Ājyabhāgas.[2371] The adhvaryu issues a direction to the hotṛ 'recite the anuvākyā (invitatory) verse for Agni.' The hotṛ repeats Ṛg. VI. 16. 34 (Agnir-vṛtrāṇi.....āhutaḥ) with om added at the end. Then there is āśrāvaṇa by adhvaryu and pratyāśrāvaṇa by āgnīdhra, then the praiṣa of adhvaryu to the hotṛ to repeat the yājyā for Agni. The hotṛ repeats the yājyā "may Agni who is favourable (or pleased), partake of the ājya" preceded by 'ye3 yajāmahe' and followed by 'vau3 ṣaṭ.'

2370. The com. on Sat. II. 2. p. 200 says that this action is the प्रतिपत्तिकर्म (in the language of mīmāṁsakas) of the आज्यशेष and is not meant as अभिधारण, but the com. on Kāt. III. 3. 9. says that this is हविःसंस्कार and not प्रतिपत्तिकर्म.

2371. Ājyabhāgas are two and they are the names of two actions (karmanāmadheya). आज्यभागाविति द्वयोः कर्मणोर्नामधेयम्। आज्यं भागो भागधेयं ययोस्तौ। com. on Sat. II. 2. p. 201. Tai. S. II. 6. 2. 1 and Sat. Br. I. 6. 3. 38 say 'चक्षुषी वा एते यज्ञस्य यदाज्यभागौ'. The praiṣa is अग्नयेऽनु3वि'. Vide note 483 above.

On hearing 'vauṣaṭ' the adhvaryu offers ājya in the northern and most blazing part of the āhavanīya. The yajamāna recites 'Agni has his eye (everywhere). May I become possessed of sight by worship offered to him.' The same procedure is followed as to the second ājyabhāga to Soma which is offered in the southern and most blazing part of the āhavanīya fire. In pūrṇamāsa the two ājyabhāgas are called Vārtraghna and in the darśeṣṭi they are called 'Vṛdhanvantau' (Āśv. I. 5. 32 and 35). Vide Jai. III. 1. 23. The adhvaryu is on the north side of the vedi when he takes up portions of ājya in the juhū and issues the direction to recite the *anuvākyā* from there. Then he crosses to the south of the āhavanīya, performs āśrāvaṇa and issues the praiṣa for the recital of the yājyā after the āgnīdhra responds with 'astu śrau3ṣaṭ.' The whole procedure is briefly set out in the note below.[2372]

Puronuvākyā and Yājyā are required in ājyabhāgas, in āvāpa, in Sviṣṭakṛt and in Patnīsaṁyājas, but in prayājas and anuyājas there are only yājyās (vide Sat. II. 2. p. 189). The puronuvākyā is recited by the priest while sitting, while the yājyā is recited standing and the recitation of these is only a saṁskāra and not a principal act (vide Jai. X. 4. 39–41). Four ladlings with sruva are made in the juhū for all sacrificers in ājyabhāgas and other homas, but in the case of sacrificers whose gotra is Jāmadagnya five (pañcāvatta) ladlings are made in the juhū (Āp. II. 18. 2, Sat. II. 2 pp. 190–191) and one whose gotra is not Jāmadagnya may have five ladlings after taking the permission of a Jāmadagnya. The puronuvākyās for the ājyabhāgas in darśeṣṭi are Ṛg. VIII 44. 12 (for Agni) and Ṛg. I. 91. 11 (for Soma).

2372. होता। अग्निर्मूर्धाणि जङ्घ्नत् ..... आहुतो3म् (इति अग्नेः पुरोनुवाक्या)। अध्वर्युः आभाव्य आग्नीध्रेण प्रत्याभावितेऽग्निं यजेति संप्रेष्यति। होता। ये3यजामहेग्निं जुषाणो अग्निराज्यस्य वेतू3 षौ3षट् (इत्यग्नेर्याज्या)। वषट्कृते ज्योतिष्मति (आहवनीये) उत्तरार्धे अध्वर्युर्जुहोति। होता अनुमन्त्रयते। वागोजः ..... प्राणापानौ। इति (आश्व. श्रौ. 1. 5. 17)। यजमानः अग्निश्चक्षुष्मांस्तस्याहं देवयज्यया चक्षुष्मान् भूयासम्। अध्वर्युः प्रत्याक्रम्य पूर्ववज्जानुदघ्नीं गृहीत्वा सोमायानुब्रू3हि इति संप्रेष्यति। होता। त्वं सोमासि ..... ऋतो3म्। (ऋ. 1. 91. 5, सोमस्य पुरोनुवाक्या)। अध्वर्युः आभाव्य ..... सोमं यजेति संप्रेष्यति। होता। ये3यजामहे सोमं जुषाणः सोम आज्यस्य हविषो वेतू3 षौ3षट्। (सोमस्य याज्या)। वषट्कृते अध्वर्युर्ज्योतिष्मति आहवनीये दक्षिणार्धे जुहोति। &c. Vide Āśv. I. 5. 29 'अग्निर्मूर्धाणि जङ्घ्नदिति पूर्वस्याज्यभागस्यानुवाक्या &c.,' and Tai. Br. III. 5. 6 for these अनुवाक्याs and याज्याs. अनुवाक्या is also called पुरोनुवाक्या 'पुरः पूर्वं यागादेवतामनुकूलयितुं या ऋगुच्यते इति व्युत्पत्त्या' औ. प. नि. आप. II. 18. 3 uses the word पुरोनुवाक्या 'अथ यजमुग्मा अनुब्रूहीति पुरोनुवाक्यां संप्रेष्यति'.

The adhvaryu having gone across (towards the puroḍāśas that are made ready) sprinkles clarified butter on the sruc (juhū) with 'āpyāyatām dhruvā &c.' (vide p. 1059 above), touches the several sacrificial offerings with 'do not be afraid, do not tremble, may I not injure thee; may not thy lustre leave thee; carry across this sacrificer who brings offerings, rain on the earth, in order I shall offer the cut portions; I make an adoration to you, do not injure me' (Tai. Br. III. 7. 5).[2373] With his thumb and two fingers (viz. the middle and anāmikā, but using only the fleshy parts and not the nails) he cuts off a portion from the middle of the puroḍāśa (cake) meant for Agni and from its front half. Sat. II. 2. p. 191 and Āp. II. 18. 9 say that the avadāna (portion cut or severed) is as much as the front joint of the thumb (as a general rule) but that the sviṣṭakṛt offering is larger than the ordinary offering for other deities[2374] &c. For the Jāmadagnyas a third portion is cut off from the hind part of the puroḍāśa. Portions from ājya and sānnāyya are taken out with the sruva and of cooked food (caru) with the mekṣaṇa. The portion cut from the middle is placed in the eastern part of the bowl of the sruc and the second portion in the western part of the bowl. He sprinkles clarified butter with the sruva (in which ājya is taken from the ājyasthālī) on the cut portions and on the puroḍāśa from which they were cut[2375] with 'when cutting portions from thee I acted against thee, I anoint that again with ājya, may that grow again in thee' (Tai. Br. III. 7. 5). Everytime he offers a fourfold (*caturavatta*) portion he smears a drop of ājya on the blades of the prastara.

Then follows the principal sacrifice. The adhvaryu issues a direction to the hotṛ 'recite an anuvākyā for Agni'. Hotṛ recites (as anuvākyā) Ṛg. VIII. 44. 16 followed by 'om' (as

---

2373. मा मे मां संविक्था ... मा हिंसीः। तै. ब्रा. III. 7. 5, quoted in Āp. II. 18. 9, Sat. II. 2. p. 194 and Baud. I. 16.

2374. अङ्गुष्टपर्वमात्राणि दैवतान्यवदानानि भवन्ति। उत्तराण्युत्तराणि स्थवीयांसि। दैवतेभ्यः सौविष्टकृतानि सौविष्टकृतेभ्यः ऐडानि तथा चातुर्धाकरणिकानि। सत्याषाढ II. 2. p. 191.

2375. The sprinkling of butter on the sruc (upastaraṇa), the placing in the sruc of the two portions cut off from the puroḍāśa and the sprinkling of butter over the cut portions (abhighāraṇa) constitute four items and so are called 'caturavatta.' When three portions are cut off from the puroḍāśa or other offering for Jāmadagnyas then there are (with upastaraṇa and abhighāraṇa) five items (pañcāvatta). Vide Śat. Br. I. 6. 1. 21 for the four with their technical names.

agnirmūrdhā...jinvato3m). Then there is āśrāvaṇa and pratyāśrāvaṇa. Then the adhvaryu issues his direction to the hotṛ to recite the yājyā which is Ṛg. X. 8. 6 (ye3 yajāmahesgnim bhuvo.....havyavāho3m vau3ṣaṭ). Then the adhvaryu throws the oblation (āhuti) of puroḍāśa portions on to the fire. The method of this is[2376] that he drops a part of the ājya from the sruc first (that was sprinkled in it at upastaraṇa and abhighāraṇa), then the two puroḍāśa portions are thrown and lastly he allows the remaining ājya from the bill-like mouth of the sruc to flow over the puroḍāśa offerings as if covering them but without disturbing them. The principal *āhutis* are introduced at the point of the confluence of the two āghāras and each one is offered in the āhavanīya to the east (or north-east) of the preceding one but in contact with the latter. The yajamāna makes the *tyāga* 'this is for Agni' with 'may I have food to eat on account of this worship of Agni.' After this offering of puroḍāśa to Agni, there is an upāṁśuyāja (a silent sacrifice) with clarified butter offered to Prajāpati or to Agnīṣomau or Viṣṇu. When offered to Prajāpati the anuvākyā and yājyā are Ṛg. X. 121. 10 and Tai. Br. II. 8. 1[2377] (taveme lokā &c.) and when offered to Agnīṣomau they are Ṛg. I. 93. 2 and 6. According to Āp. I. 19. 12 and Jai. X. 8. 51–61 it is offered only on Paurṇamāsī. In this, the reference to the deity is always inaudible, but even here the āśruta, the pratyāśruta, and two directions for reciting anuvākyā and yājyā and the vaṣaṭkāra are uttered loudly. The sacrificer says in this upāṁśuyāja 'thou art a destroyer; may I be uninjured and may I subdue evil.' The offering is made of the ājya in the dhruvā (Jai. X. 8. 47–48) and the devatā is either Prajāpati or Agni or Viṣṇu (Jai. X. 8. 49–50) and the offering is caturavatta (Jai. X. 8. 33–34). The second puroḍāśa is offered to Agni and Soma on pūrṇamāsa in the same way, the anuvākyā and yājyā being respectively Ṛg. I. 93. 9 and 5 and to Indrāgnī in darśeṣṭi, the anuvākyā and yājyā being Ṛg. VII. 94. 7 and VII. 93. 4. This is the case when the sacrificer

---

2376. अपिदधद्विद्यामक्षण्वन्पुरोडाशाहुतिं जुहोत्याज्यं हुत्वाऽवदानं जुहोत्याज्येनान्तर्तोऽन्वक्षावद्यति । पूर्वी पूर्वी संहितामापद्याहुतिं जुहोति । अक्ष्यभागमधुजुहोति । सत्याषाढ II. 2. p. 195. Vide Āp. II. 19. 7-9.

2377. In प्रजापतयेऽनुब्रूहि, प्रजापते न त्वदे ... एतीणाम् । (अनुवाक्या-मं. X. 12. 1. 10 with ओम् it will be एतीणोऽम्), प्रजापतिं यज, येऽयजामहे प्रजापतिं तवेमे लोका... इव्योऽम् (तै. ब्रा. II. 8. 1) the name Prajāpati is everywhere uttered inaudibly. Vide Sat. II. 2 pp. 202–203.

does not offer sānnāyya to Indra or Mahendra. When the sacrificer offers sānnāyya to Indra the anuvākyā and yājyā are respectively Ṛg. I. 8. 1 and X. 180. 1 and when it is offered to Mahendra they are respectively Ṛg. VIII. 6. 1 and X. 50. 4.[2378] In the case of sānnāyya he takes two portions of the boiled milk and two of curds (or three of curds for pañcāvattins) and there is upastaraṇa in the sruc only once and abhighāraṇa also once.

After the principal offerings comes the offering to Agni Sviṣṭakṛt.[2379] He sprinkles a little ājya in the sruc, cuts off one portion from each of the several remnants of the havis from their northern halves in the order in which the several sacrificial ingredients are offered to the deities (twice in the case of pañcāvāttins), sprinkles over these cut portions clarified butter twice, but does not sprinkle ājya on the remnants of havis and offers them in a spot in the north-east of the fire but not so as to come in contact with the other āhutis already offered (viz. ājyabhāgas and puroḍāśa). In this also there is the direction to repeat anuvākyā, recital of anuvākyā, āśrāvaṇa, pratyāśrāvaṇa, direction for yājyā, the yājyā itself and vaṣaṭkāra. The anuvākyā for Sviṣṭakṛt offering is Ṛg. X. 2. 1 and the yājyā is long and is set out below.[2380] The whole of it is to be recited without taking breath or he may take breath after reciting half of Ṛg, VI. 15. 14. The yajamāna says 'this is for Agni Sviṣṭakṛt and not mine. May I attain to stability and long life by the worship offered to Agni Sviṣṭakṛt. May Agni protect

---

2378. Vide Āśv. I. 6. 1 for the anuvākyās and yājyās of the principal offerings. Śāṅ. I. 8 states them somewhat differently.

2379. According to Baud. I. 17 he cuts off (for Sviṣṭakṛt) portions as follows: सकृद् दक्षिणस्य पुरोडाशस्योत्तरार्धावद्यति सकृद् ध्रुवाज्यात्सकृदुत्तरस्य पुरोडाशस्य सकृच्छृतस्य सकृदवदानः. Vide Jai. IV. 1. 28–32.

2380. Āśv. (I. 6. 3–5) gives the rules about the yājyā for Agni Sviṣṭakṛt (vide also Śāṅ. I. 9.) : येऽ यजामहेऽग्निं स्विष्टकृतमयाडग्निरग्नेः प्रिया धामान्ययाद् सोमस्य प्रिया धामान्ययाडग्नेः प्रिया धामान्ययाद् प्रजापतेः प्रिया धामान्ययाडग्नीषोमयोः प्रिया धामान्ययाद् देवानामाज्यपानां प्रिया धामानि यक्षद्वनेर्होतुः प्रिया धामानि यक्षत्त्वं महिमानमायजता मेज्या इषः कृणोतु सो अध्वरा जातवेदा जुषतां हविरग्ने यद्यध... ते अथाऽ वौऽवट्. Vide तै. ब्रा. III. 5. 7 for this. याज्या. ळ is pronounced for ड in the above. प्रजापतेः is repeated inaudibly. Vide Āśv. I. 3. 13–16. अग्ने यद्यध... अथ is Ṛg. VI. 15. 14. If the उपांशुयाज is offered to Agnīṣomau or Viṣṇu then अग्नीषोमयोः or विष्णोः is uttered in place of प्रजापतेः. When the 2nd puroḍāśa is offered to Indrāgnī on Amāvāsyā then substitute इन्द्राग्न्योः for अग्नीषोमयोः and if sānnāyya is offered then इन्द्रस्य or महेन्द्रस्य.

me from bad sacrifice (or a curse); may Savitṛ save me from him who speaks evil of me. May I vanquish him who, whether far or near, is my enemy!' (Tai. S. 1. 6. 2. 4). Jai. VI. 4. 3 lays down that if after portions are cut for Sviṣṭakṛt as directed they are destroyed accidentally, there is no fresh cutting for Sviṣṭakṛt again.

The adhvaryu comes back to the north of the vedi from the spot where he offered to Sviṣṭakṛt, fills the juhū with water and pours it round the paridhis (or their places) beginning from the middle one and proceeding from left to right with 'I offer this offering into Vaiśvānara, it is a spring with a hundred or a thousand streams. May he support in this that is being filled, my father, grandfather and great-grandfather' (Tai. Ā. VI. 6) and then touches water. The sacrificer makes the tyāga with 'this is for (my) father &c.' and then touches water. The adhvaryu lays down the two srucs in their proper places. Then he tears the surface (or top) of the puroḍāśa meant for Agni from west to east, inserts his thumb and the anāmikā (ring-finger) and takes out from inside the cake a portion which is as much as a barley grain or the pippala[2381] berry with 'let this be cut off, somewhat bigger than a barley grain or than the wound made by an arrow. May we not injure this holy and well-offered *havis* of the sacrifice' (Tai. Br. III. 7. 5). He takes off a portion from the other puroḍāśa also in the same way but without piercing the top. These portions are called prāśitra. The brahmā priest looks at the prāśitra when it is being taken out with 'I look at thee with the eye of Mitra' (Āśv. I. 13. 1). The adhvaryu sprinkles clarified butter on the vessel called prāśitraharaṇa (that in which prāśitra is carried), keeps the prāśitra in it and sprinkles ājya over it (does *abhighāraṇa*), takes it to the east of the āhavanīya by the space between the brahmā and yajamāna on one hand and the āhavanīya on the other and then lays it down to the west

---

2381. यवमात्रं पिप्पलमात्रं वा प्राशित्रमवद्यति। सत्याषाढ II. 3. p. 205. The com. explains 'pippala' as the berry of aśvattha, while the com. on Āp. III. 1. 2 explains 'पिप्पलमात्रं व्रीहिप्रमाणमित्यर्थः'. According to some a portion is taken only from the Āgneya puroḍāśa (vide Sat. II. 3, p. 206). प्राशित्रः ब्रह्मणः हृदं प्राशित्रं ह्रियतेऽनेनेति हरणं पात्रम्। com. on Sat. II. 3. p. 206. Vide note 2339. Kāt. (I. 3. 40–41) says that it is like a mirror in shape (that is like an elongated circle) or like a *camasa* (i. e. rectangular in shape). In modern times only the rod is very small, otherwise प्राशित्रहरण is just like स्रुच् in shape.

of the āhavanīya (to the west of the praṇītā waters, according to Baud. I. 17). The adhvaryu then sprinkles ājya in the *iḍāpātra*, he cuts off the first portion of iḍā from the southern half of the puroḍāśa meant for Agni with 'from the southern half I cut off (iḍā) seen by Manu, from whose foot ghee oozes, that is moved by Mitra and Varuṇa, that has a face in one direction only (in the south), without mixing it with others'[2382] (Tai. Br. III. 7. 5). From the eastern half of the same puroḍāśa he cuts off a thin but long slice which is the portion of the yajamāna (according to Baud. I. 18 it is three or four aṅgulas long) and which is anointed (or smeared) with ājya and placed near the dhruvā (or to the east of the dhruvā) in some vessel on the barhis. Then he cuts off a part from the portion of the cake that is between its southern and eastern parts. In the same way (i. e. repeating the verse 'seen by Manu' &c.) he cuts off a portion as iḍā from the northern puroḍāśa and other things offered (such as the boiled milk and curds). He then sprinkles ājya over the cut portions and removes them towards the east on the vedi. He crosses to the south in front of the hotṛ, sits behind the hotṛ with his face to the east and anoints the front two joints of the fore-finger of the hotṛ with ājya from the sruva, first the front joint and then the one next to it. The hotṛ wipes with the palm of the hand turned towards his chest the uppermost joint of the finger on the upper lip and the next joint on his lower lip with 'I partake of thee that art sacrificed by the lord of speech for food, for prāṇa' and 'I partake of thee that are offered by the lord of the mind for strength, for apāna' respectively (Āśv. I. 7. 1-2; compare Śat. Br. I. 8. 1. 14-15). He touches water. The adhvaryu turns from right to left, comes back to the place whence he went, sits down to the east of the hotṛ with his face

2382. The word 'iḍā' is the appellation of a devatā and secondarily applies to sacrificial materials and also to a rite. 'इडा देवता तदर्थमवदानमपीडा।' com. on Sat. II. 3, p. 207. Āp. III. 1. 1 employs iḍā and prāśitra in the sense of rites. The iḍāpātra is made of aśvattha wood, has a bowl four aṅgulas wide and is as long as the foot of the sacrificer and has a rod four aṅgulas long. According to Āp. III. 1. 7 and Baud. I. 18, the first portion of iḍā is cut off from the puroḍāśa to the south meant for Agni. Āp. III. 1. 6 says 'इडापात्र उपस्तीर्य सर्वेभ्यो हविर्भ्य इडां समवद्यति चतुरवत्तां पञ्चावत्तां वा.' The five avattas are effected by sprinkling ājya twice over the portions cut (vide com. on Āp. III. 2. 1). The story of the deluge, of Manu and of Iḍā as his daughter occurs in Śat. Br. I. 8. 1. In Śat. I. 8. 1. 7 and 8 we read 'तस्यै ह स्म घृतं पदे संतिष्ठते तया निम्नादक्षणो संजग्माते। तां होचतुः कासीति। मनोर्दुहितेति।'

turned westwards, offers the iḍā to the hotṛ and the sacrificer recites a long mantra (Tai. S. I. 6. 3. 1-2, 'Surūpa-varṣa-varṇa ehimān...devān-apyetu ') and looks at the iḍā when it is being taken to the hotṛ. The hotṛ accepts the iḍā (i. e. the vessel of iḍā) in his joined hands, places the iḍā in his left hand, keeps his right hand near the iḍā to its west with the fingers turned northwards and makes the adhvaryu cut off from the iḍā itself a portion called *avāntareḍā* into the right hand in the following manner. The adhvaryu spreads drops of ājya on the right hand of the hotṛ with the sruva in which are poured the remnants of the ājya in the iḍāpātra, then the adhvaryu takes a portion from the iḍāpātra and drops it on to the right hand and the hotṛ himself cuts a second portion from the middle of the iḍā with the space between his thumb and the fore-finger; then the adhvaryu sprinkles over the iḍā in the right hand of the hotṛ ājya as above.[2383] The hotṛ grasps the two portions with the thumb of his right hand, draws in the fingers of the right hand, but (keeping the thumb outside) does not close them into a fist, takes into his right hand the iḍā placed in his left. He (the hotṛ) raises the iḍā on a level with his mouth or nose and invokes it.

The iḍopahvānam or iḷopa—(invocation of the iḍā) is described at length by Āśv. I. 7. 7.[2384] By this invocation it is supposed that the deity Iḍā becomes favourable to the sacrificer. It is a *nigada*, but a large part of it is said inaudibly (up to 'vṛṣṭir hvayatām ') and the rest loudly. The sentences run in pairs e. g. ' Iḍā has been invoked with the Heaven, with the great Āditya; may iḍā together with Heaven and the great Āditya call us near'. In the portion that is loudly uttered, there are three pauses, viz. after 'iḍopahūtā,' after 'manuṣyāḥ' and after ' devī devaputre'. The adhvaryu, the āgnīdhra and the sacrificer touch the iḍāpātra with their hands[2385] and remain so till the

2383. दक्षिणे होतुः पाणाविडाया अवान्तरेडामवद्यति। लेपादुपस्तृणाति। स्वयं होता मवद्यतो द्विरादत्तेऽध्वर्युर्वाग्यतरत्। लेपेनाभिधारयति। सत्याषाढ II. 3. p. 209; com. ततो होता इडापात्रात्स्वयमेव द्विरादत्तेऽथवा अध्वर्युरेकमवदायापरं होतादत्ते विपरीतं वा। इडापात्रमवद्यात्. Compare Āśv. I. 7. 3-5. Both portions may be cut by the hotṛ or only one. The two portions in the right hand of the hotṛ are called avāntareḍā

2384. Vide Appendix for the text. This invocation differs considerably from the one contained in Sat. Br. I. 8. 1. 19ff, Tai. Br. III. 5. 8.

2385. Aoooording to com. on Sat. II. 3. p. 210 the brahmā priest does not join in touching the iḍāpātra. This is also the practice in modern times of those who follow Sat. Aoooording to Baud. I. 18 and Kāt. III. 4. 12 the brahmā does join.

end of the invocation. When the invocation goes on inaudibly the yajamāna mutters (japati) 'O Iḍā! come ..... (Āp. IV. 10. 4)' and when it is loudly uttered he mutters 'thou art *cit* &c.' (Āp. IV. 10. 4, where they are called Manuṣyagavī mantras) and utters loudly 'May you breathe into all beings, may all beings breathe on account of you &c.' and several other mantras (Āp. IV. 10. 4 and 7). He looks at the hotṛ and thinks of Vāyu in his mind 'O Vāyu! Iḍā is thy mother' (Āp. IV. 10. 5); when the words 'this yajamāna has been called' are uttered, he mutters 'May I, so invited, be endowed with cattle'. When the invocation of iḍā is finished, he repeats 'may Indra put in us vigour &c.'. When the words 'the divine adhvaryus' are uttered, the adhvaryu mutters 'May I be endowed with cattle.'

When the invocation of Iḍā is finished the adhvaryu passes round the āhavanīya towards its east and takes the prāśitra to the brahmā priest and hands it over to him. Āśv. I. 13. 2 describes in detail what thereon the brahmā does. He looks at the prāśitra when it is being brought with 'I look at thee with the eye of Mitra.' He receives the prāśitra in his joined hands with 'I accept thee at the impulse of god Savitṛ.....with the hands of Pūṣan.' He lays down the vessel containing prāśitra to the west of the āhavanīya inside the vedi on kuśa grass, with its rod to the east, 'I place thee in the navel of the earth, in the lap of Aditi.' He takes the prāśitra with the thumb and the ring-finger and eats without masticating it with the teeth with 'I eat thee with the mouth of Agni, with the mouth of Bṛhaspati.' Then he performs *ācamana* and again drinks water with 'I sprinkle truth over thee; may the deities that dwell inside waters avert (the evil in) this. Do not injure my eye, my ear, my life.' He should touch his navel with 'I hold thee in the belly of Indra.' Then he washes the vessel in which prāśitra was contained, fills it with water, pours water thrice from it holding the vessel and the palm of the hand towards one's chest.

The hotṛ eats the avāntareḍā[2386] after the brahmā eats the prāśitra with a mantra 'O Iḍā! favour this our portion &c.' All the four priests together with the sacrificer as the fifth then

---

2386. 'उपहूयावान्तरेडां प्राश्नीयादिडे भागं जुषस्व नः पिन्वस्व जिन्वार्वतो राधस्पोषस्येहीडे तस्य नो रास्व तस्य नो दास्तस्यास्ते भागमशीमहि। सर्वात्मानः सर्वतनवः सर्ववीराः सर्वपुरुषाः सर्वपूरुषा इति वा।' आश्व. I. 7. 8; compare Āp. III. 2. 10–11, and Tai. Br. III. 7. 5.

partake of the iḍā with a mantra 'thou art iḍā, thou art agreeable, thou art the bringer of happiness, place us in abundance of wealth and good progeny. I eat thee for the lustre of the face, for the fragrance of the mouth.' After eating iḍā they observe silence till they perform *mārjana*. They perform mārjana[2387] inside the vedi near the *prastara* bunch with 'May mind resort to light. May all gods regale themselves here' (Tai. S. I. 5. 3. 2).

The adhvaryu divides the puroḍāśa baked for Agni into four parts (and no other puroḍāśa nor sānnāyya) by piercing its surface and keeps it on the *barhis* (kuśas strewn on the vedi), the last part being made the biggest of all four. Vide Jai. III.1.26–27. The yajamāna recites a mantra 'bradhna pinvasva &c.' (Tai. Br. III. 7.5) and directs the four parts of that puroḍāśa separately as portions of the priests by saying 'this is for brahmā, this for hotṛ, this for adhvaryu, this for āgnīdhra' beginning in order from the south-east. The adhvaryu points out the portion of the yajamāna (vide p. 1065 above). When that is done, the adhvaryu makes the biggest of the four parts which is meant for the āgnīdhra 'ṣaḍavatta' (cut sixfold).[2388] The āgnīdhra eats his portion with 'thou art the portion of heaven, thou art the āgnīdhra of fire, thou art the śāmitra of fire, I eat thee with the mouth of fire, salutation to thee! Do not injure me.' The adhvaryu brings the portions of brahmā and yajamāna where they are sitting in separate vessels with the veda bunch. The portions of the hotṛ and adhvaryu are brought by the adhvaryu in other vessels. The adhvaryu, hotṛ and brahmā eat their portions respectively with 'thou art the portion of the aerial region,' 'thou art.....of the earth,' 'thou.....of heaven.'[2389]

2387. Mārjana means 'sprinkling water on the head after a mantra is recited' (मार्जनं मन्त्रान्ते शिरसि मोक्षणमद्भिः ; com. on Sat II. 3, p. 210). See however note 755 above and Āśv. I. 8. 2.

2388. According to Āp. III. 3.6–7 'ṣaḍavatta' is effected in either of two ways; first upastaraṇa in some vessel (on the hand of the āgnīdhra, according to com.), then placing on it one part out of two in which the largest portion meant for āgnīdhra is cut, then abhighāraṇa, then again upastaraṇa, placing the second part and the abhighāraṇa; or first upastaraṇa twice, then the two parts of the largest portion and then two abhighāraṇas. Sat. II. 3, p. 211 mentions only the first method.

2389. It will have been noticed from the preceding that the four priests have each a share in the cake for Agni and that they also share with the yajamāna the iḍā. The hotṛ has further the avāntaraiḍā and the brahmā partakes of the prāśitra besides.

The conclusion of Jaimini (III. 4. 48–50) is that these portions are not meant as the fee paid to the priests (parikraya), but the four parts are meant to be eaten by them.

Plenty of rice is cooked on the dakṣiṇa fire. This is called *anvāhārya*. The adhvaryu sprinkles ājya over[2390] it (i. e. performs abhighāraṇa) and takes it from the dakṣiṇa fire to the north of it. He issues a direction to the yajamāna 'offer (the boiled rice) to the priests that sit to the south' and when the sacrificer says 'come to the south' the priests do as requested (i. e. come to the south). The yajamāna issues a direction to the four priests 'this boiled rice is yours, take it according to your shares'. The rice is divided into four parts and the priests accept their respective portions with 'I accept thee at the impulse of God Savitṛ ..... with the hands of Pūṣan; may king Varuṇa take you. Who gave to whom? Desire (Kāma) has given to Kāma ..... O Kāma, this is thy fee. May Āṅgirasa with upturned palm accept it' (the whole formula occurs in Āp. XIV. 11. 2).[2391] The priests come back to the north (and then brahmā comes to his usual seat). The adhvaryu keeps aside the remnants of the several offerings (such as the agniṣomīya cake or sānnāyya) and of the boiled rice outside the vedi to its north.

He throws into the āhavanīya the two blades that are now kindled at the fire and had been kept aside (vide p. 1040 above). The adhvaryu says to the brahmā priest 'O brahman! we shall start or commence' (Tai. S. II. 6. 9. 1). The brahmā priest first mutters 'Bṛhaspati is Brahmā, he sat in the seat of Brahmā; O Bṛhaspati! you protected the sacrifice; protect the sacrifice and me' (Āśv. I. 13. 6) and loudly gives permission 'yes, do start' (Om pratiṣṭha). The adhvaryu directs the āgnīdhra 'O agnīt, take the *samidh* (that is left) and wipe the paridhis and fire, each once'. The āgnīdhra takes the samidh and offers it into fire with the mantra 'O fire, this is

2390. महानपरिमितोऽन्वाहार्यो दक्षिणाग्नावोदनः पक्वस्तमभिघार्यानभिघार्य वाऽन्तर्वेद्यासादयति। सत्याषाढ II 3. p. 212. Vide Āp. III. 3. 12–14. The dakṣiṇa fire is called अन्वाहार्यपचन.

2391. क इदं कस्मा अदात् &c. This is called कामस्तुति and occurs in many connections (such as marriage, adoption of a son). Vide Atharvaveda III. 29. 7, Tai. Br. II. 2. 5 (where it is explained), Tai. Ār. III. 10.

thy samidh;[2392] may you increase and be strengthened by it. May the lord of the sacrifice (the yajamāna) increase and be strengthened; svāhā' (Śat. II. 4. p. 212). The yajamāna says as usual 'agnaya idam' and repeats 'O fire, this is thy samidh &c.' (Āp. III. 4. 6) and implores Agni to vanquish and destroy his enemies (the lengthy formula is in Āp. IV. 11. 5). He (the āgnīdhra) without moving about wipes the paridhis as before with the tying cords of idhma (but without holding the sphya), the middle one from south to north and the other two from west to east, and wipes the fire also from west to east with 'O fire, that securest food &c.' (Āp. III. 4. 7 gives the whole). He sprinkles water over the tying cords (with which wiping was done) and throws them into the āhavanīya with 'do not injure our cattle, (you) who are Rudra, the lord of beings &c.' (Sat. II. 3. p. 213). The yajamāna makes the tyāga 'this is for Rudra, the lord of beings, who moves among rows (of Maruts)'.

The yajamāna touches water and mutters a mantra (which is in Āp. IV. 11. 6 'vedirbarhiḥ &c.). The yajamāna also performs japa of the *Saptahotṛ*[2393] formulas before the anuyājas are offered. The adhvaryu takes into the juhū the ājya from the upabhṛt (leaving some in the latter), crosses over to the south with the juhū and sets about offering the three anuyājas. First there is the āśravaṇa (O3śrā3vaya), then pratyāśravaṇa (astu śrau3ṣaṭ) by āgnīdhra who always holds the sphya when saying this. Then the adhvaryu issues a direction to the hotṛ 'recite the yājyā for the devas.' When the hotṛ recites the yājyā and utters vau3ṣaṭ the adhvaryu standing in one place offers the first ājya offering on the samidh (offered for anuyājas as stated on 1069 above) to its east, the 2nd and 3rd to the west on the samidh itself (but all three are offered to

---

2392. It is interesting to see that according to Kāt. III. 5. 2–3 the mantra 'this is thy samidh' (Vāj. S. II. 14) is recited by the hotṛ and if he be ignorant then by the yajamāna. This shows that even then priests ignorant of the work expected of them or at least ignorant of the formulas they had to recite for a yajamāna had sometimes to be engaged. The Śat. Br. I. 8. 2. 4 also refers to this स यदि मन्येत न होता वेदेत्यपि स्वयमेव यजमानोऽनुमन्त्रयते.

2393. The saptahotṛ formulas are: महाहविर्होता। सत्यहविरध्वर्युः। अच्युतपाजा अग्नीत्। अच्युतमना उपवक्ता। अनाधृष्यश्चामतिषूदश्च यज्ञस्याभिगरौ। अयास्य उद्गाता। तै. आ. III. 5. The four priests, the āgnīdhra, prastotṛ and pratihartṛ are often called the seven hotṛs.

the east of the meeting point of the two āghāras). The third and last offering of ājya is begun on the west but carried east in a continuous stream so as to become mixed up *with the first two.* In each case the yajamāna repeats the formula of tyāga. The yājyās and tyāga are given below in the note.[2394] The adhvaryu then comes back to the north, lays the two ladles (sruc) in their proper places and he and the yajamāna mutter the two formulas (Tai. S. I. 6. 4. 2 called vājavatī). The adhvaryu takes up in his right hand with palm upwards the juhū and prastara (prastara being placed over the palm and juhū over the prastara) with 'vājasya.....grabhīt' (Tai. S. I. 6. 4. 2) and holds down (so as to bring it in contact with bārhis) with palm turned downwards in the left hand the upabhṛt ladle (which is under the palm) with 'athāsapatnān.....akaḥ' (*ibid*). He again takes up the juhū with 'udgrābham ca' (*ibid*) and presses down the upabhṛt with 'nigrābham ca.' At this time the juhū held in the right hand is far apart from the upabhṛt held in the left. Then he moves with the right hand having palm turned upward towards the east on the vedi itself the juhū with 'brahma devā avīvṛdhan' (the gods increased holy prayer) and with the left hand having palm downwards he leaves outside the vedi the upabhṛt with 'athāsapatnān...vyasyatām' (*ibid.* 'Indra and Agni hurled away my enemies' &c.). Then he touches water, sprinkles water over the upabhṛt, takes it up and anoints with the butter remaining in the juhū the three paridhis, the middle one with 'to thee for Vasus,' the southern one with 'to thee for Rudras' and the northern one with 'to thee for Ādityas.' The yajamāna recites in each case 'this is for Vasus,' 'this is for Rudras,' 'this is for Ādityas' followed in

2394. There are three anuyājas. The first praiṣa is देवान् यज and the two others are simply यज. The three yājyās are. देवं बर्हिर्वसुवने वसुधेयस्य वेतू3 षौ3षट् । देवो नराशंसो वसुवने वसुधेयस्य वेतू3 षौ3षट् । देवोऽग्निः स्विष्टकृत्सुब्रह्मण्या मन्द्रः कविः सत्यमन्मायजी होता होतृहोतुरायजीयानग्ने यान्देवानयाड्भ्यानपिप्रेयं ते होत्रे अमत्सत तां ससन्तुर्वी होत्रां देवंगमां दिवि देवेषु यज्ञमेरयेमं स्विष्टकृज्जाग्ने होताऽभूर्वसुवने वसुधेयस्य नमोवाके बीहि3 षौ3ष्वट् । आश्व. I. 8. 7. Vide तै. ब्रा. III. 5. 9 for these. The यजमान says 'ओं3 इदं देवाय बर्हिषे, ओं3इदं देवाय नराशंसाय, ओं3 इदं देवाग्नये स्विष्टकृते and adds with each formula of tyāga respectively 'बर्हिषोऽहं देवयज्यया प्रजावान्भूयासम्,' 'नराशंसस्याहं देवयज्यया पशुमान् भूयासम्,' 'स्विष्टकृतोहं देवयज्ययायुष्मान्यज्ञेन प्रतिष्ठां गमेयम्' । तै. सं. I. 6. 4. 1. Vide Āp, IV. 12. 1.

each case with a prayer noted below.[2395] After keeping the juhū in some spot on the vedi other than where the prastara is, the adhvaryu, having mixed the prastara with the two vidhṛtis (vide above p. 1045) with 'may heaven and earth be of the same mind; may Mitra and Varuṇa help you with rain' he leaves the vidhṛtis on the barhis and smears the prastara (with the remnants of ājya) in the three ladles (*sruc*), the points in juhū with 'licking the one that is smeared' (Tai. S. I. 1. 13. 1), middle portions in upabhṛt with 'viyantu vayaḥ' (*ibid*) and the roots in dhruvā with 'prajām yonim'[2396] (*ibid*). He does the anointing a second time (with the same mantras). He anoints a third time in the reverse order viz. the roots first in dhruvā, the middle portions in upabhṛt and the tops last in juhū (the mantras being the same for each ladle). The yajamāna repeats, while the prastara is being anointed, a mantra 'may kuśa be anointed with ghee' (Āp. IV. 12. 3). Taking out a blade from the prastara so anointed with 'to thee for long life', he places it in a known place (for use later on). When the blade is taken away from the prastara the yajamāna recites a mantra (apipred yajño...yajamānam viśantu).

The adhvaryu takes the prastara (and also the *śākhā* i. e. twig used at the time of milking cows when sānnāyya is to be offered), introduces the prastara (together with the twig) at the corner in the north where the middle and northern paridhis meet and says 'ā3śrāvaya.' When the āgnīdhra responds with 'astu śrau3ṣaṭ,' he issues a direction to the hotṛ 'the divine hotṛs are desired (or requested); you being human and directed to utter the words of success recite hymns for the god called sūktavāka.' The hotṛ begins the recitation of sūktavāka[2397]

2395. यजमानः—बहुस्यामिदं न मम । बहून्देवान् यज्ञेनापिप्रेषम् । ..... तस्मान्देवान्यज्ञेनापिप्रेषम् । ..... आदित्यान्देवान्यज्ञेनापिप्रेषम् । आप. IV. 12. 3.

2396. Ap. III. 6. 1. states the mantras somewhat differently.

2397. The word sūktavāka has two meanings viz. the deity Agni and also the formula repeated by the hotṛ. Vide Āp. III. 6. 5–6 for the two meanings 'सूक्तवाकाय सूक्तां ब्रू3हि' in sūtra 5 and अनूच्यमाने सूक्तवाके in 6. Āśv. I. 9. contains sūktavāka and rules about its recitation. 'सूक्तवाको नामेडदेवताकोर्तनार्थं इदं वाचापृथिवी इत्यनुवाकः' com. on Āp. III. 6. 6. Vide Tai. S. II. 6. 9. 5ff, तै. ब्रा. III. 5. 10 for इदं वाचापृथिवी &c. and Śat. Br. I. 8. 3. 1–19 and I. 9. 1. 1–23 for a disquisition on sūktavāka.

which is given below.[2398] The contents of the sūktavāka may be briefly indicated. He begins 'O heaven and earth, this blissful event has taken place; we have so flourished as to pronounce the good words (viz. 'fire has accepted this *havis* &c.') and our adoration (to the gods); O fire, you should declare good words, so that we may feel elevated; thou art the declarer of good words.' Then numerous words follow that state the various attributes of heaven and earth. Then it is declared that Agni and other deities (named) have accepted the offering and made it flourish. Then the sacrificer is named and it is said that he hopes for various blessings such as long life, worthy sons. The whole is concluded with 'we men belong to Agni. May we have (the fruits of) sacrifice and wealth. May both heaven and earth save us from sin (or evil). May the most desirable thing come here. Here is adoration to the gods.' After the sūktavāka the adhvaryu throws upon the āhavanīya the prastara (and the śākhā, in case of sānnāyya) with 'may waters and plants be strengthened; you are the

2398. इदं द्यावापृथिवी भद्रमभूद्दार्ष्टं सूक्तवाकमुत नमोवाकमुद्यास्म सूक्तोक्त्यमग्ने त्वं सूक्तवागसि । उपश्रुतौ द्विवस्पृथिव्योरोमन्वती तेऽस्मिन्यज्ञे यजमान द्यावापृथिवी स्ताम्। शङ्क्यौ जीरदानू अस्रस्तू अप्रवेदे उरुगव्यूती अभयङ्कृतौ। दृष्टिद्यावा रीत्यापा शंभुवौ मयोभुवा ऊर्जस्वती पयस्वती सुपचरणा च स्वधिचरणा च तयोराविदं । अग्निरिदं हविरजुषतावीवृधत महो ज्यायोऽकृत। सोम इदं हवि ..... कृत । अग्निरिदं हवि ..... कृत । प्रजापतिः इदं हविरजुषतावावृधत महो ज्यायोऽकृत । अग्नीषोमाविदं हविरजुषेतामवीवृधेतां महो ज्यायोऽकृताम् । देवा आज्यपा आज्यमजुषन्तावीवृधन्त महो ज्यायोऽकृत । अग्निर्होत्रेणेदं हविर ..... कृत । अस्यामुधद्धोत्रायां देवङ्गमायामाशास्तेऽयं यजमानोऽसावसौ। आयुराशास्ते सुप्रजास्त्वमाशास्ते रायस्पोषमाशास्ते सजातवन्त्यामा० उत्तरां देवयज्यामा० धूपो हविष्करणमा० दिव्यं धामा० विश्वं प्रियमा० यद्वनेन हविषाशास्ते तदश्यात् तद्धुध्यात् तदस्मै देवा रासन्तां तदग्निर्दैवो देवेभ्यो वनते वयमग्नेर्मानुषाः । इष्टं च वित्तं चोभे च नो द्यावापृथिवी अहसस्यातामेह गतिर्वामस्येदं नमो देवेभ्यः । आश्व. I.9. Compare तै. ब्रा. III. 5.10 and Sān. I. 14 for almost the same words and Tai. S. II. 6 9. 5–7 for explanation. The words underlined are uttered inaudibly; vide Āśv. I.3.14. The deities mentioned in note 2381 may be substituted for Prajāpati; and Indra or Mahendra also may be added (where sānnāyya is offered). When the cake is offered to Indrāgnī, one may add an invocation as to them. Two names (viz. the ordinary name and the secret name derived from the nakṣatra of birth) were to be declared after यजमानः. If the यजमान happened to be the teacher of the hotṛ, the names should be uttered inaudibly. The hotṛ paused and took breath at असि, स्ताम्, अभयङ्कृतौ, विदि, अकृत (wherever it occurs), अकाताम्, अकृत, मानुषाः. Vide Jai. III. 2. 11–15 for the proposition that sūktavāka is really a mantra accompanying the throwing of prastara; and Jai. (III. 2. 16–19) establishes that the sūktavāka on pūrṇamāsa is slightly different from the one on darśa.

drops of Maruts; go to heaven and send thence rain to us' (Tai. S. I. 1. 13. 1).[2399] Jaimini makes it clear (VI. 4. 43-47) that śākhā is not a subordinate complement of the prastara but the real meaning of the text 'he throws the prastara with the śākhā' is to indicate the time when the śākhā is to be thrown into fire. Jaimini (IV. 2. 10-13) states that the throwing of the śākhā into fire is pratipattikarma (i. e. that is the final disposal of the *śākhā*). When throwing the prastara he does not bend his hand but holds it rather straight and hanging downwards and the tips of the prastara are not put beyond the fire nor are they turned upwards, nor are the tips allowed to be first scorched. He raises it up, brings it slowly down and rolls it on the hearth of the āhavanīya (making the upper portion come down and *vice versa*). The adhvaryu, when the hotṛ says 'this sacrificer seeks (hopes for) blessings' directs the āgnīdhra to consign the prastara to fire. The āgnīdhra thrice raises with his joined hands the prastara into the āhavanīya fire. The sacrificer makes the *tyāga* to the several deities mentioned in the sūktavāka (agnaya idam, somāyedam &c.) and adds (Tai. S. I. 6. 4. 1) 'may I win victory following the victory of Agni' (then of Soma and so on for the other deities).[2400] When the hotṛ mentions the name of the sacrificer the latter recites 'these blessings have come here' (Tai. S. I. 6. 4. 2 and Āp. IV. 12. 5). The adhvaryu directs the āgnīdhra to throw into fire on the prastara the blade of kuśa taken from the prastara and kept aside (as described above p. 1072) and the āgnīdhra[2401] does so with 'Good speed to the tanūs, svāhā'. The yajamāna mutters 'this for the Tanūs' and proceeds 'This pillar spread down from heaven and was raised over the earth. With it that has a thousand shoots we worry our enemy etc.' (Tai. Br. III. 7. 6 and Āp. IV. 12. 8). The adhvaryu points out thrice with his forefinger the blade thrown into fire with 'this, this' and touches his nose and eyes with 'Agni! thou art the protector of life, protect my life, thou art the protector of eyes' (Tai. S. I. 1. 13. 2). Then the adhvaryu touches the earth inside the vedi with 'thou art stable' (*ibid*).

2399. According to Āp. III. 6. 7 when this mantra is repeated there is no svāhā uttered after it. But others differ.

2400. अग्नेरहमुज्झितमनूज्झितमिति यथालिङ्गं सूक्तवाकदेवताः । आप. IV. 12. 4. Vide जै. IX. 1. 4-5.

2401. According to com. on Āp. III. 7. 4-5 it is the adhvaryu who puts into fire the blade of the prastara.

The āgnīdhra then addresses the adhvaryu 'talk with me'. The adhvaryu asks 'has (the prastara) been consigned to flames'? The āgnīdhra replies 'it has gone to the fire'. Then after āśrāvaṇa and pratyāśrāvaṇa the adhvaryu touching the middle enclosing stick (paridhi) issues a direction to the hotṛ 'Good speed to the divine hotṛs (here the paridhis) and bliss to human hotṛs. Recite for *śaṁ-yoḥ*'.[2402] Then the hotṛ recites the verse 'we long for that *śaṁ-yoḥ*, for (the) path to sacrifice and to the lord of sacrifice. May divine bliss be ours! May there be bliss for human beings. May the means (of bliss) ascend upwards! All health to the two-footed and the four-footed that are ours' (i. e. to men and cattle).[2403] When the Śaṁyuvāka is repeated the yajamāna mutters 'may I attain stability by yajña, śaṁyoḥ (health and wealth) by the worship of Viṣṇu' (Tai. S. I. 6. 4. 3). The adhvaryu then throws into the fire the middle paridhi with 'O God Agni, that paridhi which you laid down ..... svāhā' (Tai. S. I. 1. 13. 2).

The adhvaryu then pushes on to the burning coals of the āhavanīya the other two paridhis together (the southern and northern ones) with 'the food of sacrifice has come together.' He thrusts the tip of the northern paridhi underneath the middle one in the burning coals and keeps the tip of the southern over the middle one. When the paridhis are being thrown on the fire the yajamāna mutters 'I loosen thy girdle &c.' (Tai. S. I. 6. 4. 3). After the paridhis are thrown the adhvaryu invokes them 'may you spread (i. e. prolong the life of) the sacrificer'.

The adhvaryu then lays on the bowl of the juhū the upabhṛt and lets flow from the two ladles the remnants of butter into fire with 'O Viśve Devas! You have for your share the remnants (saṁsrāva) of ājya,...svāhā' (Tai. S. I. 1. 13. 2).[2404]

2402. The words are अग3न्नग्नीदित्यध्वर्युराह । अगन्नित्याग्नीध्रः । मध्यमपरिधिमन्वारब्धं स्वगा देव्या होतृभ्यः स्वस्तिमानुषेभ्यः शंयोर्मू3हीति संप्रेष्यति । सत्याषाढ II. 4 p. 218.

2403. For the formula 'तच्छंयोरावृणीमहे' (Tai. S. II. 6. 10. 2) vide note 1684 above. As the most prominent words in it are शंयोः this formula is called शंयुवाक (lit. utterance of śaṁyu). It occurs in Tai. Br. III. 5.11. These words gave rise to the name of a sage शंयु बार्हस्पत्य whose legend is narrated in the Sat. Br. I. 9. 24–25, Tai. S. II 6. 10. Vide S. B. E. vol. 12 p. 254 n. 1.

2404. Vide Śat. Br. I. 8. 3. 23–27 for the offering of the remnants of ājya to the Viśve Devas. This homa of remnants is an aṅga of the paridhihoma. Vide com. on Āp. III. 7. 14.

The yajamāna makes the tyāga with 'this is for Vasus, Rudras Ādityas who are sharers in the saṁsrāva (remnants of ājya),' then utters a benedictory formula invoking blessings (vide Āp. IV. 12. 10 and Tai. S. I. 6. 4. 4) and touches the veda bunch lying inside the vedi.

The priests partake of the remnants of ājya and wash the ājya sticking to the ladles.[2405]

The adhvaryu takes up the juhū and upabhṛt, the hotṛ takes the veda bunch and the āgnīdhra takes the pot of ājya (ājyasthālī) together with the sruva. Being about to perform the patnīsaṁyājas[2406] the adhvaryu passes to the south of the gārhapatya fire (from its east side) and the other two priests (hotṛ and āgnīdhra) pass to its north. The adhvaryu places the two ladles on the sphya with 'I place you in the abode of Agni whose house is indestructible; may you who are happy place me in happiness for the sake of happiness; may you who are the foremost (or leaders) protect me when I am in front' (Tai. S. I. 1. 13. 2-3). They sit to the west of the gārhapatya and set about the offerings of Patnīsaṁyājas with the two ladles in the dhvāna tone. They three sit to the west of the gārhapatya with knees raised up, the adhvaryu being seated to the south, the āgnīdhra to the north and the hotṛ between the two. The hotṛ hands over the veda bunch to the adhvaryu who takes it with 'I have stood up following the immortals with long life &c.' (Tai. S. I. 2. 8. 1), stands up and sits down to the west of the gārhapatya. When the wife (of the sacrificer) holds the veda bunch and touches the adhvaryu with a blade of darbha, the adhvaryu takes into the juhū four ladlings of ājya with sruva (from the pot of ājya). Then the procedure for each of the four offerings resembles the prayāja offerings, viz.

2405. The ladles are the sruva, the juhū and upabhṛt and not the dhruvā (com. on Sat. II. 4. p. 220).

2406. Patnīsaṁyāja literally means offering made to the wives (of the gods) along with (some other deities). 'पत्नीभिः समभिजयन्ते ते पत्नीसंयाजाः' com. on Sat. II. 5 p. 223. These are four offerings of ājya made in succession to Soma, Tvaṣṭṛ, Devapatnīs (wives of gods) and Agni Gṛhapati. Vide Sat. Br. I. 9. 2 for a treatment of patnīsaṁyājas. Kāt. (III. 1. 2-4) shows that there were several views as to the path by which the adhvaryu went to the south. यथान is explained as अत्र स्वरूपलक्षणयोः पृथगुपलब्धिः स यथानिर्वचनः । मुखप्रयत्नवाचनभिन्नपक्षशब्दप्रयोगः उपांशुः । com. on Āp. III. 8. 8. All formulas must be uttered here in these tones except some words to be specified later on.

the adhvaryu issues a direction to the hotṛ to recite an anuvākyā (invitatory prayer) for Soma (then for Tvaṣṭṛ and so on), then the hotṛ recites the anuvākyā, then there is āśruta and pratyāśruta, followed by adhvaryu directing the hotṛ to recite the yājyā for Soma (or Tvaṣṭṛ or others as the case may be), and when the hotṛ utters 'vai 3ṣaṭ' the adhvaryu pours the ājyā oblation from the juhū into the gārhapatya (in this rite). The offering to Soma is made in the northern part of the gārhapatya, that to Tvaṣṭṛ in the southern part and for the rest between these two. The offering to the wives of the gods may be made in an enclosed space (i. e. by placing a screen to the east of the gārhapatya) so as to shut the gārhapatya from view on the eastern side.[2407] Additional offerings were allowed to be made to Rākā, Sinīvālī and Kuhū by those who desired sons, cattle or prosperity respectively either before or after the offering to the wives of the gods. The procedure is briefly indicated in the note below.[2408]

The yajamāna makes a *tyāga* (of the offering) with 'this for Soma' (or for Tvaṣṭṛ and so on) and adds a separate formula in each case invoking separate blessings of vigour, cattle, progeny and stability (vide Āp. IV. 13. 1 and Tai. S. I. 6. 4. 3-4). The adhvaryu offers in the gārhapatya with the sruva an

---

2407. आहवनीयतः परिश्रिते देवपत्नीरपरिश्रिते वा। Āp. III. 9. 3 and the com. says 'यथाहवनीयो न दृश्यते तथा परिश्रिते प्रच्छादिते गार्हपत्य इत्यर्थः.' In modern times a wooden frame is placed to the east of the gārhapatya as a screen. The reason why the gārhapatya is screened from view is stated in the Śat. Br. I. 9. 2. 12 to be "for, up to the time of the Samiṣṭayajus the deities continue waiting, thinking 'this he must offer to us'; he thereby conceals this offering from them; and accordingly Yājñavalkya says 'whenever females (human) eat here they do so apart from men'."

2408. अध्वर्युः सोमायानुब्रूहि इति प्रेष्यति। होता। आप्यायस्व ... सङ्गथो3म्। (इति पुरोऽनुवाक्या, ऋ. I. 91. 16)। आश्राव्य प्रत्याश्राविते अध्वर्युः सोमं यजेति संप्रेष्यति। होता। ये3यजामहे सोमं सं ते पयांसि ...धित्वा3 वौ3षट् (याज्या, ऋ. I. 91. 18)। The अनुवाक्या and याज्या for त्वष्ट are इह त्वष्टारमाग्रियं ... ... केवलः (ऋ. I. 13. 10) and तत्सवितुरिषमह ..... । वकामा (ऋ. III. 4 9), for देवपत्नीः are देवानां पत्नी ... ... शर्म यच्छत and उत ग्नाश्यन्तु देवपत्नी ... ... जनीनाम् (ऋ. V. 46. 7-8), for अग्नि गृहपति are अग्निर्होता गृहपति ... सुताया (ऋ. VI. 15 13) and इध्मवाळग्नि .....अवांसि (ऋ. V. 4. 2). Vide आश्व. I. 10. 5. The पुरोऽनुवाक्या and याज्या in the case of राका, सिनीवाली are respectively ऋ. II. 32. 4-5, II. 32. 6-7 and those for कुहू are stated in आश्व. I. 10 8 (the entire verses are given in this case). They occur in Tai. S. III. 3. 11. 5 and Atharvaveda VII. 47. 1 and 2 (with slight variations).

oblation of ājya with[2409] 'may the wife unite with her husband... svāhā' (Tai. Br. III. 7. 5 quoted on p. 556 n. 1291). The sacrificer's wife touches the adhvaryu (with a blade of darbha) when he makes the last offering. The yajamāna makes the tyāga 'this is for the undecaying Great Soul, the light in Heaven.'

The adhvaryu then smears the two front joints of the hotṛ's finger as before, first the hind joint and then the front joint. He breathes over it and touches water. The adhvaryu drops into the palm of the right hand of the hotṛ four drops of ājya as iḍā[2410] and six in that of the āgnīdhra. The hotṛ inaudibly invokes both (viz. his own iḍā and āgnīdhra's, the hand of the latter being held underneath the former's) in the same words as before (vide Appendix under note 2384). When the words 'this yajamāna has been summoned' are uttered, the wife mutters 'being summoned may I surpass in the possession[2411] of cattle,' and the adhvaryu also performs japa as above. When the iḍā is being invoked the adhvaryu, the āgnīdhra and the wife (with a darbha blade) touch the hotṛ. The yajamāna invokes ājya iḍā with 'may iḍā cover us with ghṛta &c.' (Āp. IV. 13. 4). At the end of the invocation of iḍā the hotṛ eats the iḍā (drops of ājya) and the āgnīdhra eats his with 'father Heaven has been invoked, may the fire summon me from āgnīdhra for my life, lustre &c.' (Tai. Br. III. 7. 6). He silently performs mārjana after partaking of iḍā. The patnīsaṁyājas end with the invocation of iḍā or they may be finished after reciting Śaṁyuvāka (Sat. II. 5, p. 225; Āśv. I. 10. 9; Kāt. III. 7. 13).

The adhvaryu sitting to the west of the dakṣiṇa fire places on it the chips cut from the idhma (idhma-pravraścana, vide above p. 1014) and offers two oblations called phalīkaraṇa and piṣṭalepa.[2412] Having thrown into the ājya ladled into

2409. This homa made with a verse beginning with 'sam patnī' is called संपत्नीय in Sat. II. 5. p. 223 and Āp. III. 9. 10.

2410. This is the 2nd iḍā and consists only of ājya.

2411. According to Sat. II. 5. p. 224 in the iḍopahvāna there is a modification viz. उपहूतेयं यजमाना for उपहूतोयं यजमानः and so in the 2nd iḍā the wife performs japa; while (as the com. of Sat. notes) the followers of Ṛg. retained उपहूतोयं यजमानः in the 2nd iḍā also and so the yajamāna engages in the japa.

2412. पिष्टलेपसंज्ञको होमः पिष्टलेपहोमः तथा फलीकरणहोमः । com. on Āp. III. 9. 12.

the juhū four times with the sruva the smallest grains (that were produced when rice grains were husked and pounded for making puroḍāśas), the adhvaryu offers them into the dakṣiṇa fire with 'O fire, that hast unhurt life and not cool body, guard me against the sky (lightning)... make our food free from poison ... svāhā' (Tai. S. I. 1. 13. 3). When this homa is made the yajamāna rubs (wipes) his mouth with 'svāhā to thee, that art Sarasvatī Yaśobhaginī' (who loves laudation) and makes the tyāga with 'this is for Agni who has long life and not cool body' and wipes his face with 'svāhā to thee, that art Sarasvatī Veśabhaginī' [2413] (who loves residing together, Āp. III. 10. 2). The adhvaryu takes again four ladlings of ājya with the sruva into the juhū and pours therein the remnants of ground grains which still stick to the several utensils and offers them into the dakṣiṇa fire with 'whatever stuck to the mortar, pestle and the winnowing basket...! Svāhā' (Tai. Br. III. 7. 6 and Āp. III. 10. 1). The yajamāna says 'this is for the All-Gods'.

The hotṛ hands over the veda bunch to the sacrificer's wife and makes her repeat aloud 'thou art veda...may I secure progeny. To thee for Kāma' (Āśv. I. 11. 1) and the sacrificer recites, when the veda bunch is being given to the wife 'thou art Veda ..... may I secure gifts' (Tai. S. I. 6. 6. 4) and when the veda is placed on her lap by the wife [2414] she repeats 'may *veda* give &c.' (Tai. S. I. 6. 6. 4). The wife thrusts it with 'drive out the enemy, the hater' (Āp. III. 10. 4). The wife touches her navel with the top of the veda bunch if she desires progeny.

The hotṛ unties the yoktra (the girdle) of the wife with 'I release thee from the fetter of Varuṇa &c.' (Rg. X. 85. 24).[2415] The wife lays aside the yoktra and the adhvaryu makes her recite 'here do I unloosen the fetters of Varuṇa &c.' (Tai. S. I. 1. 10. 2). The hotṛ winds round the yoktra twofold, places it to the west of the gārhapatya fire with its loop and end to the east, keeps over it the blades of the veda with their points to the north

---

2413. The meaning of Yaśobhaginī and Veśabhaginī in Sat. II. 5. p. 230 is obscure. In Vāj. S. II. 20 यशोभगिन्यै is explained by महीधर as जीवतः पुरुषस्य प्रशंसा यशः तस्य यशसो भगिनी यावया. In काठकसं. V. 4 सरस्वती is called वेशभगिनी.

2414. According to Āp. (III. 10. 3-4) the hotṛ throws the veda thrice on the lap of the wife who returns it back three times.

2415. तत् प्रत्यग्गार्हपत्यात् द्विगुणं प्राक्पाशं निधायोपरिष्टादस्योदग्गाणि वेदतृणानि करोति । आश्व. I. 11. 4; the com. says योक्त्रस्य मूलप्रदेशः पाशः । पाशशब्दोत्र मूलाग्रयोः प्रदर्शनार्थः ।

and lays down a pūrṇapātra[2416] (a vessel filled with water) to the east of the blades but touching them. The hotṛ touches that vessel and makes the wife who touches it repeat a mantra 'thou art full &c.' (Tai. S. I. 6. 5. 1). The hotṛ sprinkles water from the pūrṇapātra in all directions and makes the wife, who also sprinkles water from it in all directions, repeat 'Let the gods and the priests purify (or wipe) in the eastern direction &c.' (Tai. S. I. 6. 5. 1-2, quoted in Āśv. I. 11. 7). The hotṛ places into the joined hands of the sacrificer's wife with the palm upwards the yoktra, and places his left hand with palm turned upwards on the wife's folded hands (but in modern practice the hotṛ does not hold his hand over the wife's) and pours down the water from the pūrṇapātra on the hands (his and the wife's) and makes her repeat 'May I not throw away progeny &c.' (Āśv. I. 11. 8). The hotṛ holds by his right hand the tops of the blades of the veda bunch (the binding cord of which has already been unloosened), proceeds from the gārhapatya to the āhavanīya, repeats Ṛg. X. 53. 6 (tantum tanvan &c.) and without shaking them, strews continuously some of them from the gārhapatya to the āhavanīya. The rest of the blades the hotṛ lays down and, standing to the north-east of the āhavanīya, takes ājya from the pot of ājya (ājyasthālī) in the sruva and offers with svāhā at the end of the mantras oblations of ājya, which are called 'sarvaprāyaścitta' (expiation for all lapses). The mantras are given below.[2417] Having made the oblations the hotṛ pays homage with the 'saṃsthājapa (lit. the prayer muttered on completion)[2418] and goes out of the sacrificial ground by the way called tīrtha (vide above p. 984).

The adhvaryu pours from a vessel full of water (*pūrṇapātra*) water into the joined hands of the wife in which the yoktra is

---

2416. पूर्णपात्र is explained by com. on Sat. II. 5 p. 229 as उदकेन पूर्णं पात्रम्। The mantra is 'पूर्णमसि पूर्णं मे भूयाः सुपूर्णमसि सुपूर्णं मे भूयाः सदासि सन्मे भूयाः सर्वमसि सर्वं मे भूया अक्षितिरसि मा मे क्षेढाः।' तै सं. I. 6. 5. 1. quoted in आश्व. I. 11. 6.

2417. The mantras are 'अयाश्चाग्नेऽस्यनभिशस्तीश्च ..... धेहि भेषजं स्वाहा' (आश्व I. 11. 13 and सत्या. II. 6. p. 232). अतो देवा ..... धामभिः स्वाहा (ऋ. I. 22. 16), इदं विष्णु ..... पांसुरे स्वाहा (ऋ. I. 22. 17), भूः स्वाहा, भुवः स्वाहा, स्वः स्वाहा, भूर्भुवः स्वः स्वाहा. The oblations are in all seven. The mantras of सर्वप्रायश्चित्त differ a great deal in the different sūtras. अयाश्चाग्ने ..... भेषजं स्वाहा is काठकसं. V. 4.

2418. ओं च मे स्वश्च मे यज्ञेन च ते नमश्च। यत्ते न्यूनं तस्मै त उप यत्तेऽतिरिक्तं तस्मै ते नम इति संस्थाजपः। आश्व. I. 11. 15. This is called संस्थाजप because it is the last of the acts the hotṛ does in this rite.

held. When the wife lets down the water on the ground she mutters 'May I be united with long life, progeny &c.' (Tai. S. I. 1. 10. 2). After pouring the water she wipes her face with her wet right hand and goes out as she desires.[2419] When the hotṛ strews the blades of the veda, the sacrificer repeats 'through you they knew the vedi &c.' (Tai. Br. III. 7. 4).

The adhvaryu comes back by the way he went, repeats 'may the dhruvā be strengthened &c.' (Tai. S. I. 6. 5. 1) and offers two āhutis of ājya to Sarasvatī with the juhū into the āhavanīya with 'to thee, who are Sarasvatī, called Yaśobhaginā, svāhā' and with 'to thee Sarasvatī called Veśabhaginā, svānā.' The yajamāna makes the *tyāga* in similar words. The adhvaryu again takes ājya in the juhū and offers an āhuti to Indra with 'Indropānasya kehamanaso veśān kuru sumanasaḥ sajātān' (Sat. II. 5. p. 230, Āp. III. 10. 2)[2420] and the yajamāna says 'this is for Indra &c.' The adhvaryu offers an oblation of ājya with sruva on the pūrṇamāsa iṣṭi with 'we offer worship to pūrṇamāsa the foremost &c. svāhā' (Tai. Br. III. 7. 5 quoted by Sat. II. 5 p. 230) and a similar oblation on darśeṣṭi with 'Amāvāsyā is fortunate and full of happiness &c. svāhā.' The yajamāna makes tyāga. These are called *pārvaṇahoma* and according to some they are optionally performed before the offering to Sviṣṭakṛt. Jaimini (IX. 2. 51–56) establishes that these two homas are not performed in other iṣṭis that are the modifications (vikṛti) of darśapūrṇamāsa and in IX. 2. 57–58 establishes that both are not performed on pūrṇamāseṣṭi and darśeṣṭi, but the first homa (in which there is an oblation to pūrṇamāsa) is alone performed on pūrṇamāseṣṭi and the other on darśeṣṭi. The adhvaryu takes ājya six times with the mantra 'āpyāyatām dhruvā &c.' (Tai. S. I. 6. 5. 1) and offers six homas called Nāriṣṭha homas with six mantras[2421] (with svāhā at the

---

2419. Āp. III. 10. 9 says that the wife goes out saying 'May I be endowed with prosperity, cattle, progeny, domestic happiness'. The com. on Sat. II. 5. p. 229 explains the words यथार्थं गच्छति as ब्राह्मणे योर्थो वाक्यस्य उक्तस्तं प्राप्नोतीत्यर्थः and quotes Āp. III. 10. 9.

2420. The meaning of the first part of this mantra is obscure and the text appears to be corrupt. It occurs also in Vārāha Śr. I. 3. 7. 13.

2421. The six Nāriṣṭha mantras occur in Sat. II. 5. p. 231, Āp. II. 20. 6 and II. 21. 1. The first four are from Tai. Br. III. 7. 5, the 5th from Tai. Br. III. 7. 11 and the first portion of the 6th from Tai. S. I. 3. 10. 1. According to com. on Āp. II. 21. 1, these homas are offered with the juhū.

end of each) and the yajamāna repeats the tyāga six times 'to Nāriṣṭhas Agni and Vāyu,' 'to Nāriṣṭhas Indra and Vāyu (twice),' 'to Nāriṣṭhas Soma and Maruts,' 'to Nāriṣṭha Brahman,' 'to Nāriṣṭha Paramātman.'

The adhvaryu recites 'apyāyatām dhruvā' (Tai. S. I. 6. 5. 1), takes ājya thirty-eight times and offers with the juhū oblations called sarvaprāyaścittas to thirty-eight deities in the āhavanīya with a mantra for each,[2422] and there is an appropriate *tyāga* in each case.

The adhvaryu repeats the mantra 'āpyāyatām &c.' (Tai. S. I. 6. 5. 1), increases the dhruvā (with ājya), stands erect inside the vedi and offers with the dhruvā three homas called *Samiṣṭayajus*[2423] in the āhavanīya with 'ye path-finding gods ! after finding the path, return by it. O Lord of the mind ! place this our sacrifice among the gods, in speech, in the wind' (Tai. S. I. 1. 13. 3). When the word svāhā is repeated the second time he throws the barhis into the fire. The yajamāna says 'this is for the path-finding gods, for Yajña—for Paramātman' and utters the invocation 'agne adabdhāyo' (Tai. S. I. 1. 13. 3,) and after the barhis is thrown the verse 'divaḥ khīlo' (Tai. Br. III. 7. 6). The yajamāna then eats his own share of the sacrificial food with 'let the lord of sacrifice be united with prayer &c.' (Tai. S. I. 3. 8. 1).

But if it is the sānnāyya, he takes in the boiled milk with 'May this *havis*, a giver of progeny, be for my welfare &c.' (Tai. Br. II. 6. 3) and curds with 'dadhikrāvṇo' (Ṛg. IV. 39. 6). Āp. IV. 14. 2 notes that a yajamāna who is not a brāhmaṇa should not eat sānnāyya. The adhvaryu strews the vedi with

---

2422. These 38 mantras (some of them of single words like iṣṭebhyaḥ svāhā, bhūḥ svāhā) are set out in Sat. II. 6 pp. 232–234. Āp. (III. 11–12) contains most of them, but in a different order.

2423. 'Samiṣṭayajus' would literally mean 'a Yajus formula indicative of the completion of the sacrifice or of sacrificing together for many deities'. It now means 'an oblation'. The mantra is देवा गातुविदो गातुं वित्वा गातुमित मनसस्पत इमं नो देव देवेषु यज्ञꣳ स्वाहा वाचि स्वाहा वाते धाः। Tai. S. I. 1. 13. 3. There is a difference of view about the Samiṣṭayajus. According to Āp. III. 13. 2 (and com.), Baud. I. 21, Kāt. III. 8. 4 the oblation is only one (made at the end of the whole mantra), though the word svāhā occurs thrice (twice in the mantra itself and once repeated at the end of the mantra). According to Sat. II. 6 pp. 234–235 the oblations are three. Vide Vāj. S. II. 21 for the mantra (slightly different) and Śat. Br. I. 9. 2. 26–28 for its explanation.

the darbhas spread on the seat of the hotṛ with 'strew over the vedi &c.' (Tai. Br. III. 7. 5). He carries the praṇītā waters from the eastern side with 'to you for prosperity' and pours them down inside the vedi with 'may he who joined you together separate you'. The adhvaryu pours on those praṇītā waters a continuous stream of water for the yajamāna who holds it in his joined hands and mutters 'thou art true, be true to me ..... do not perish for me' (sadasi ..... kṣeṣṭhāḥ' Tai. S. I. 6. 5. 1), throws up water in different directions with 'may gods and priests cleanse with water in the east &c.' (Āśv. I. 11. 6–7), pours the rest inside the vedi with 'I discharge you to the ocean, that is your origin' (Āp. IV. 14. 4) and wipes his face with his wet right hand with 'O Sarasvatī! that honey which you have in waters &c.' (Tai. Br. II. 5. 8 quoted in Āp. IV. 14. 4).

The adhvaryu then takes up the *upaveṣa* and conceals it inside the dust of the utkara (vide Āp. III. 13. 6) and if it is desired to practise magic against one's enemy, then he throws the upaveṣa on the utkara after taking the enemy's name (Āp. III. 14. 1, Sat. II. 6. p. 237). Vide Tai. Br. III. 3. 11 for the upaveṣa and the mantras. The adhvaryu takes leave of the Yajña with 'Let him who yokes you discharge you' (Tai. S. I. 5. 10. 3 quoted in Sat. II. 6. p. 237) and passes his eye over the whole sacrificial ground.[2424] Then he discharges the kapālas with 'the kapālas that were in the cauldron' (Tai. S. I. 5. 10. 3–4 quoted in Sat. II. 6. p. 237), counts them and keeps them aside. Then the adhvaryu goes out. The brahmā also places a fuel-stick on fire with 'the fire has been worshipped &c.' (Āp. III. 13. 1 and Sat. II. 8. p. 261) and then leaves by the way he came.

The yajamāna gets up from his seat and takes what are called 'the strides of Viṣṇu' (viṣṇukrama).[2425] These are four taken from the south corner (śroṇi) on the south side of the vedi. He starts towards the east putting the right foot always first, never allows the left foot to come in front, does not go beyond the āhavanīya place and each succeeding step covers

---

2424. According to com. on Sat. casting the eye over the vihāra constitutes the discharge (*vimoka*) of the yajña.

2425. This act is called Viṣṇu-krama because the four mantras repeated in it all begin with 'viṣṇoḥ kramosi' and because the yajamāna actually takes four steps in it. विष्णुक्रमा नाम सन्निकृष्टमन्त्रविधिष्टाः पदविक्षेपाः तान्दक्षिणे वेदिसीम्नि क्रामति । com on आप. IV. 14. 6.

more ground than each preceding one. He first recites four mantras 'thou art the stride of Viṣṇu &c.' (Tai. S. I. 6. 5. 2) when taking the strides. Then he mutters a long prayer to the Sun 'O Light of Mitra rising to-day &c.' (Tai. Br. III. 7. 6 and Tai. S. I. 6. 6. 1, quoted in Āp. IV. 15. 1 and I. 16. 1). He contemplates the destruction of his enemy with the words 'Here do I exclude from a share my enemy the evil-doer &c.' He revolves round himself from left to right with 'I turn the turning of Indra' (Tai. S. I. 6. 6. 2) and goes round the āhavanīya with 'Let me have auspicious riches and may evil riches remain away from me' (Āp. IV. 15. 4). He bends over the āhavanīya with 'thou art light' (Tai. S. I. 1. 10. 3), pays homage to it with 'May I be united with my children and may my children be united with me &c.' (Tai. S. I. 6. 6. 2, Āp. IV. 15. 4). He puts the fire into flames 'O fire, being kindled, shine for me &c.' (Tai. S. I. 6. 6. 2, Āp. IV. 16. 5). He prays to the āhavanīya with 'The sacrifice is endowed with riches, may I be endowed with riches &c.' (Tai. S. I. 6. 6. 2, Āp. IV. 15. 5.). He prays to the dakṣiṇa fire 'O fire, cook food pleasantly eaten for our progeny' (Āp. IV. 16. 5). He prays to the gārhapatya fire with the two verses to Agni Pavamāna (Ṛg. IX. 66. 19–20, Tai. S. I. 6. 6. 2), and with 'O Agni Gṛhapati! I am a good house-holder &c.' (Tai. S. I. 6. 6. 3). If he has no son he prays[2426] 'I pray for that blessing full of spiritual lustre for my son (to be)' and if he has a son he prays 'I pray for my son so and so that blessing &c.' (Tai. S. I. 6. 6. 3). He sits between the two fires inside the vedi with 'to thee (unborn or born son as the case may be) who art light &c.' (Āp. IV. 16. 6). He places on his lap the blades of the veda (that had been unloosened) and sitting inside the vedi mutters the Atimokṣa mantras 'May Agni guard me against those gods that strike the sacrifice &c.' (Tai. S. III. 5. 4. 1–2 indicated in Āp. IV. 14. 10).

He then comes to his seat, looks at the whole sacrifice with 'who yokes thee? Let him free thee' (Tai. S. I. 6. 6. 3). He then discharges himself from vrata with 'O fire, lord of vratas, I observed vrata &c.' (Tai. S. I. 6. 6. 3, Tai. Ā. IV. 41,

2426. तामाशिषमाशास्ते तत्तवे ज्योतिष्मतीमित्यजातपुत्रः । तामाशिषमाशास्ते देवदत्ताय ज्योतिष्मतीमिति जातपुत्रः । तामाशिषमाशास्ते रुद्राय सूर्याय विष्णवे ज्योतिष्मतीमिति (बहुपुत्रः)। vide com. on Āp. IV. 16. 3. Here रुद्र, सूर्य and विष्णु are the names of the sons. Vide Tai. S. I. 6. 6. 3 'तामाशिषमाशास्ते तत्तवे ज्योतिष्मतीं तामाशिषमाशास्ेऽमुष्मै ज्योतिष्मतीम्.'

Vāj. S. II. 28). He then mutters the mantra which speaks of the re-performance of yajña 'Yajña hath become, it has come into being ..... let him make us overlords, may we be lords of wealth' (Tai. S. I. 6. 6. 4). He then gets up and mutters a text after going out with his face to the east 'O fire, the sacrifice is endowed with cows ..... May this sacrifice be rich in food in halls' (Tai. S. I. 6. 6. 4) and a further prayer (given in Āp. IV. 16. 15).[2427] Then after saying 'thou art rain ..... a bow to you' he touches water. Then the sacrificer issues a direction 'the brāhmaṇas have to be satiated' (with dinner &c.).

Lastly the yajamāna offers final prayers by repeating Ṛg. I. 189. 1, VII. 4. 1, VII. 10. 3, I. 189. 3, I. 189. 2, III. 6. 1 and winds up with 'salutation to thee once, twice, thrice, four times, five times, ten times, a hundred times. May there be salutation to thee up to a thousand times. Do not injure, may we be free from debts in this world, in the next world, in the third world; may we, free from debts, dwell in all the paths, those that are Devayāna (lead to the gods) and those that lead to the pitṛs.' According to Tai. S. II. 5. 3. 1 and Āp. III. 15. 1–5 there is an additional puroḍāśa offered to Indra Vaimṛdha. Jai. (IV. 3. 32–35) declares that this puroḍāśa is offered only on the Full Moon day sacrifice and not in the New Moon sacrifice. Vide Jai. X. 8. 17–19 for seventeen sāmidhenī verses in the Vaimṛdha iṣṭi.

There are differences in the procedure of darśeṣṭi as compared with that of the pūrṇamāseṣṭi which have been noted in the above at the respective places. There are several modifications of the darśapūrṇamāsa such as the Dākṣāyaṇa yajña, the Vaimṛdha, Sākamprasthīya, which are omitted here for want of space. Jaimini (II. 3. 5–11) establishes that the Dākṣāyaṇa, Sākamprasthīya and Saṁkrama yajñas are modifications of darśapūrṇamāsa.

Piṇḍapitṛyajña

It is so called because balls of rice are offered to the pitṛs[2428] in this rite. According to Jaimini IV. 4. 19–21 Piṇḍapitṛyajña

2427. यज्ञ शं च म उप च म आयुश्च मे बलं च ..... यज्ञारिष्टो मे सन्तिष्ठस्वेति दर्शपूर्णमासाभ्यां सोमेन पशुना वेष्ट्वा जपति । बृहिरसि बृश्च मे पाप्मानमृतात्सत्यमुपागामित्यद्भिरुप उपस्पृशति । तदिदं सर्वयज्ञेनोपस्पर्शनं भवति । आप. IV. 16. 15–16. Vide तै. ब्रा. III. 10. 9 for बृहिरसि &c.

2428. अमावास्यायां यदहश्चन्द्रमसं न पश्यन्ति तदहः पिण्डपितृयज्ञं कुरुते । आप. I. 7. 1–2. सुदत्त explains 'पिण्डैः पितृणां यज्ञः'; महादेव on सत्याषाढ says 'पिण्डैः पिण्डदानेन सहितः पितृभ्यो देवेभ्यो यज्ञो होमः स पिण्डपितृयज्ञः'—II. 7. p. 245.

is an independent rite and not a mere subordinate part of the darśa sacrifice. On the other hand several writers held that it was a subordinate part (aṅga) of darśa e. g. Kāt. IV. 1. 30 appears to be of that opinion and the paddhati on it notes that all bhāṣyakāras like Karka stick to that opinion.[2429] The piṇḍapitṛyajña is briefly described below. For details, vide Śat. Br. II. 4. 2, Tai. Br. I. 3. 10, II. 6. 16, Āśv. II. 6-7, Āp. I. 7-10, Kāt. IV. 1. 1-30, Sat. II. 7, Baud. III. 10-11. It is performed on amāvāsyā day when the moon cannot be seen and its distance from the sun is the least, in the last third part of the day or when only the rays of the sun are visible on the tops of trees.[2430] The *caru* (boiled rice) is cooked on the dakṣiṇāgni and the oblation is offered in the same. In this and other ways a contrast is brought out between rites for gods and for Manes. He kindles a blade on the dakṣiṇa fire and carries it to the south-east of that fire with the mantra 'ye rūpāṇi &c.' (Vāj. S. II. 30).[2431] All actions are to be done facing the south-east unless otherwise specified. The darbha grass (to be employed in this rite) is severed at one stroke and is brought with or without its roots (Āp. I. 7. 3-4). Strewing round the dakṣiṇāgni darbha grass (*paristaraṇa*) with their ends turned to the south in the case of those that are placed to the north or south he spreads darbhas to the north. He places to the north-east or to the north-west of the dakṣiṇāgni singly the yajñapātras required in this rite on darbha grass viz. carusthālī, śūrpa, sphya, mortar and pestle, sruva, dhruvā, antelope-skin, fuel-sticks cut off at one stroke, mekṣaṇa, kamaṇḍalu, and whatever else may be necessary. The adhvaryu going to the south of the śakaṭa (the wooden frame on which the paddy is stored and which is to the west of the fire) fills the carusthālī (vessel for cooking rice) that is placed on the śūrpa with paddy to the brim and removes the grains (that rise above the brim) on to the śūrpa (which overflowing grains are returned to the śakaṭa). The mortar is then placed on the black antelope-skin and the wife with her face to the south-east beats with the pestle the paddy grains

---

2429. पितृयज्ञः स्वकालत्वाद्नङ्गं स्यात्। जै. IV. 4. 19; अङ्गं वा समभिव्याहारात्। कात्या. IV. 1. 30 (पद्धति 'पिण्डपितृयज्ञो दर्शाङ्गमिति कर्कादयः सर्वे भाष्यकाराः, नेति संप्रदायः'). Vide त्रिकाण्डमण्डन I. 5–6 on the varying views.

2430. पूर्वाह्णो वै देवानां मनुष्यान्प्रति मनुष्याणामपराह्णः पितॄणाम्। शतपथ II. 4. 2. 8, अपराह्णे पिण्डपितृयज्ञश्चन्द्रादर्शनेऽमावास्यायाम्। कात्या. IV. 1. 1; अपराह्णेऽधिश्रयणं वा पिण्डपितृयज्ञेन चरन्ति। आप. I. 7. 2, Sat. II. 7. p. 248.

2431. Āśv. II. 6. 3, Āp. I. 8. 7 set out the whole verse ये रूपाणि.

taken out in the carusthālī and removes the husks by means of the winnowing basket. Without trying to separate the husked grains from the unhusked ones the grains are washed once and cooked on the dakṣiṇa fire (in such a way that the grains of rice are not entirely soft). He should draw with the sphya a line between the gārhapatya and dakṣiṇa fires or to the south-east of the latter with the words 'the asuras and evil-spirits that occupy the vedi are scattered away' (Vāj. S. II. 29 quoted in Sat. II. 7. p. 249 and Āp. I. 7. 13). He should then sprinkle that line (as the vedi for this rite) with water, spread round it the darbha grass (cut off with one stroke), take clarified butter in the dhruvā spoon, place it to the south of the dakṣiṇāgni, sprinkle on the mess of cooked rice clarified butter from the dhruvā. He places to the south of the dakṣiṇāgni, collyrium, unguents, a mat and a pillow. Wearing the sacred thread in the prācīnāvīta form (according to Āp. I. 8. 3 and Sat. II. 7. p. 248 *the adhvaryu wears* it in the upavīta form) he offers on the fire the idhma (i. e. fifteen fuel-sticks), takes a portion of the boiled rice with the *mekṣaṇa*, pours clarified butter over it, cuts off two portions of the rice on it, again sprinkles clarified butter over[2432] the portions and the rice from which they are taken, offers into the dakṣiṇa fire one *āhuti* (oblation) with the words 'Somāya pitṛmate svadhā namaḥ', then again sprinkles clarified butter on the portion cut off and offers it with the words 'Agnaye kavyavāhanāya svadhā namaḥ'. He[2433] then throws the mekṣaṇa on to the fire. Then on the line made with the sphya he sprinkles water thrice[2434] with the mantras 'Śundhantām pitaraḥ, śundhantām pitāmahāḥ, śundhantām prapitāmahāḥ' (may the fathers, grand-fathers and great-grand-fathers wash themselves pure). He offers three balls of rice on that line one after another with the hand turned sideways (i. e. the piṇḍa is let off on the line from the part of the palm between the thumb

2432. In the case of this offering there is उपस्तरण, then द्विरवदान, अभिघारण (and प्रत्यभिघारण) as in the case of oblations to gods.

2433. Āp. I. 8. 3–4 and Sat. II. 7. p. 248 (following Tai. Br. I. 3. 10) speak of three āhutis 'सोमाय पितृपीताय स्वधा नमः', 'यमायाङ्गिरस्वते पितृमते स्वधा नमः', अग्नये कव्यवाहनाय स्वधा नमः'. Sat. adds स्विष्टकृते after कव्यवाहनाय and states that the third āhuti consists of the boiled grains of rice sticking to the mekṣaṇa. For the first and third vide Vāj. S. II. 29.

2434. Āp I. 8. 9 notes that all actions from this onwards are done by the house-holder himself who wears his sacred thread in the prācīnāvīta form.

and the index finger) with appropriate mantras, the first to the father with the words 'this is for you father,[2435] N. N. and those who come after you', to the grand-father with the words 'this is for you grand-father &c.', to the great-grandfather with similar words. The piṇḍa (ball of rice) for the great-grandfather is the biggest of the three, that for the grand-father being larger than that for the father. There was a difference of view among the teachers as to the procedure when any of the three ancestors was living, Gāṇagāri holding that piṇḍas were offered only to the deceased ancestors and he who was living was only honoured, while Taulvali said that piṇḍas were to be offered to three ancestors whether living or dead and Gautama stating that if any ancestor out of the first three above the sacrificer was alive, three piṇḍas were to be offered and an ancestor beyond the great-grand-father may then be included. Āśv. (II. 6. 20–23) refutes all these views by saying that no piṇḍa can be offered to any ancestor beyond the great-grand-father and none to those who are alive nor to any ancestor between whom and a preceding ancestor a living ancestor intervenes, but that the piṇḍas meant for ancestors that are alive may be thrown into fire (with svāhā at the end and not *svadhā*). According to Āp. I. 9. 8 and Sat. p. 252 if the householder's father be living he should not offer piṇḍas but should stop after he performs the homa. If he has[2436] two fathers or grand-fathers or great-grand-fathers (owing to adoption or *niyoga*) he should take two names with reference to the piṇḍa offered to that ancestor. When the piṇḍas are placed on the line referred to above he invokes the piṇḍas with a formula 'Here you may regale yourselves, O pitṛs and may you partake according to your shares' (Vāj.S.II.31).[2437] Then he turns round and faces the north, sits down holding his breath till he feels exhausted, then again turns round and faces the piṇḍas and utters the invocation

---

2435. The words would be एतत्ते तत अमुकशर्मन् ये च त्वामनु एतत्ते पितामह अमुकशर्मन् &c. Some added अमुकसगोत्र after अमुकशर्मन्, but the com. on Sat. II. 7. p. 251 says that it is wrong.

2436. यदि द्विपिता स्यादेकैकस्मिन्पिण्डे द्वौ द्वावुपलक्षयेत् । आप. I. 9. 7 and Sat. II. 7. p. 251. Then the formula will be एतद्वां ततो (पितामहौ प्रपितामहौ वा) अमुकनामानौ ये च युवामनु.

2437. In the तै. सं. I. 8. 5. 1–2 the words here and elsewhere are slightly different viz. एतत्ते तत ये च त्वामनु एतत्ते पितामह प्रपितामह ये च त्वामन्यत्र पितरो यथाभागं मन्दध्वम् । ..... अक्षन् पितरोऽमीमदन्त पितरोऽतीतृपन्त पितरोऽमीमृजन्त पितरः । The शतपथ II. 4. 2. 20 explains आमदायध्वम् as 'अश्नीत'.

'the pitṛs have regaled themselves and have partaken according to their shares' (Vāj. S. II. 31). He smells the boiled rice. Then he again offers water (*ninayana*) with the words 'Śundhantām &c.', (vide above p. 1087) on the line made with the sphya, he puts on the three piṇḍas one after another the unguents and collyrium respectively with the words 'asau abhyaṅkṣva' (you by name so and so father &c. apply the unguents) and 'asau aṅkṣva' (you so and so father, &c. put the collyrium in the eye). He should then place as garment on each of the piṇḍas the hem of a garment (daśā) or woolen tuft or a hair from his own body (the part above navel) if he is beyond fifty years of age with the words 'O pitṛs, this is the garment for you, may you not come in contact with any other (garment) than this' (Āśv. II. 7. 6). Then he should wait upon the pitṛs with salutation and mutter the mantra 'salutation to you, Pitṛs, for (securing) food, salutation to you, Pitṛs, for strength' &c.[2438] and also the three verses 'manonvāhuvāmahe' (Ṛg. X. 57. 3–5).[2439] He should then make the pitṛs start forward on a stream of water (i. e. by pouring water on the piṇḍas) with the mantra 'O well-disposed pitṛs! May you depart away by the ancient and awe-inspiring paths, after bestowing on us wealth and welfare. May you send down to us prosperity including all manly sons' (vide Tai. S. I. 8. 5. 2 for first half). He should walk a little towards the dakṣiṇāgni with the verse Ṛg. IV. 10. 1 and then towards the gārhapatya with the mantra 'May the gārhapatya fire deliver me from whatever sin I may have committed against Heaven and Earth, or parents and may the same fire make me sinless' (Tai. S. I. 8. 5. 3). He should take hold of the middle piṇḍa with the words 'O pitṛs! bestow on me a valiant (son)' and should make his wife eat that ball of rice with the mantra[2440]

2438. अथैनान्नुपतिष्ठेत नमो वः पितर इषे नमो वः पितर ऊर्जे नमो वः पितरः शुष्माय नमो वः पितरोऽघोराय नमो वः पितरो जीवाय नमो वः पितरो रसाय। स्वधा वः पितरो नमो वः पितरो मन्यता युष्माकं पितर इमा अस्माकं जीवा यो जीवन्त इह सन्तः स्याम। आश्व. II. 7. 7; compare आप. I. 10. 2 and कात्या. IV. 1. 15 for the same rule. वाज. सं. II. 32 contains the mantra with some variations.

2439. Each of the three verses (Ṛg. X. 57. 3–5) and Tai. S. I. 8. 5. 2–3 contains the word '*manas*' and hence they are called 'manasvatī' verses. Vide Āp. I. 10. 5.

2440. पत्नीं प्राशयेदाधत्त पितरो गर्भं कुमारं पुष्करस्रजम्। यथायमरपा असत्॥ आश्व. II. 7. 13. The Vāj. S. II. 33 reads यथेह पुरुषो असत् (which is also read by Āp. I. 10. 11). The mantra आधत्त पितरो is recited by the wife, according to Nārāyaṇa on Āśv. II. 7. 13. If there are many wives they may divide the piṇḍa (com. on Kāt. IV. 1. 22).

'O pitṛs! may you deposit an embryo that will be a young boy wearing a lotus wreath, so that he may be unhurt' (compare Vāj. S. II. 33). The other two piṇḍas may be thrown into water or fire or a person who has recently lost all appetite for food may eat the two or one who is harassed by some incurable disease (such as leprosy or tuberculosis) may eat them, the result being that he is either cured or dies. Kāt. IV. 1. 20 adds that the adhvaryu collects the piṇḍas in a pot and the house-holder bends down and takes the smell thereof.[2441] Then the darbha blades taken out with one stroke are thrown into the fire, the utensils are sprinkled with water and then taken up in twos and laid aside.

A householder who had not consecrated the three vedic fires also had to perform the piṇḍa-pitṛ-yajña on amāvāsyā, but he offered it in the gṛhya fire. Vide Āśv. Śr. II. 7. 18, Saṁ. K. p. 838 ff, Saṁ. Pr. 908 ff. Gaut. V. 5 prescribes that a householder should at least daily offer water to the pitṛs and do more (i. e. offering food &c.) according to his ability and inclination. Manu II. 176 prescribes daily pitṛ-tarpaṇa (satiating the pitṛs with water), for which see pp. 668–69.

2441. अथाचक्ष्मिति मत्यवधाय पिण्डान्स्स यजमानभागः। शतपथब्रा. II. 4. 2. 24.

CHAPTER XXXI

CĀTURMĀSYAS (seasonal sacrifices) [2442]

According to Āśv. II. 14. 1 the term Iṣṭyayana comprehends the Cāturmāsyas, Turāyaṇa, Dākṣāyaṇa and other iṣṭis. The cāturmāsyas are three (or four according to some), viz. Vaiśvadeva, Varuṇapraghāsa, Sākamedha (and Śunāsīrīya). Each of these is called a *parvan* (part or joint) of the cāturmāsyas. They are called cāturmāsyas because each of them takes place after four months. [2443] They are performed respectively on the Full Moon days of Phālguna (or Caitra), of Āṣāḍha, Kārtika and on the 5th full moon from the day on which the Sākamedha is performed (i. e. on Phālgunī) or two or three days before it (com. on Āśv. II. 20. 2). They indicate the advent of three seasons viz. vasanta (spring), varṣā (rains) and hemanta [2444] (autumn). If the Vaiśvadevaparva is performed on Caitra Full Moon, then the Varuṇapraghāsas and Sākamedhas will be performed on Śrāvaṇa and Mārgaśīrṣa Full Moon days respectively. The Tai. Br. I. 6. 8 states the reward secured by the performance of the cāturmāsyas. [2445]

According to Āśv. on the day previous to the Full Moon of Phālguna when beginning the cāturmāsyas he performs an iṣṭi for (Agni) Vaiśvānara and Parjanya. According to Kāt. V. 1. 2 there is an option viz. he may perform this iṣṭi or the Anvārambhanīyā iṣṭi. Then on the Full Moon day he performs the Vaiśvadeva iṣṭi in the morning and then performs the

---

2442. Vide Tai. S. I. 8. 2–7, Tai. Br. I. 4. 9–10 and I. 5. 5–6, Sat. Br. II. 5. 1–3 and XI. 5. 2, Āp. VIII, Kāt. V, Āśv. II. 15–20, Baud. V.

2443. वैश्वदेवहविर्भिर्यक्ष्यमाणो भवति फाल्गुन्यां वा चैत्र्यां वा पौर्णमास्याम्। कौ. V. 1; चातुर्मास्यप्रयोगः फाल्गुन्याम्। कात्या. V. 1. 1; com. 'चतुर्षु चतुर्षु मासेषु भवति इति व्युत्पत्त्या। तत्र भवाधिकारे चतुर्मासाथज्ञे ञ्यो वक्तव्य इति वार्तिकम्'.

2444. वसन्ते वैश्वदेवेन यजेत वर्षासु वरुणप्रघासैर्यजेत हेमन्ते साकमेधैर्यजेत। quoted by Śabara on Jaimini XI. 2. 13; वसन्ते वैश्वदेवेन यजेत प्रावृषि वरुणप्रघासैः शरदि साकमेधैरिति विज्ञायते। आप. VIII. 4. 13. There is no fixed time for Śunāsīrīya. It may be performed at one's will immediately after Sākamedha, or two, three, or four days after it or one month or four months after it. Vide Kāt. V. 11. 1–2 and com. thereon.

2445. यद्वैश्वदेवेन यजते प्रजा एव तद्यजमानः सृजते। ता वरुणप्रघासैर्वरुणपाशान्मुञ्चति। साकमेधैः प्रतिष्ठापयति। ऽयम्बके वृद्धं निरवदयते। पितृयज्ञेन सुवर्गं लोकं गमयति। तै. ब्रा. I. 6. 8.

pūrṇamāsa iṣṭi. According to the com. on Kāt.V.1. the Vaiśvadeva iṣṭi is performed in the morning of the first day after Full Moon and then follows the pūrṇamāsa iṣṭi of Phālguna. The sacrificer has to keep certain observances on all the *parvans* of the cāturmāsyas viz. he has to shave[2446] his head and face, to sleep on the ground (not on a cot), to avoid honey, meat, salt, sexual intercourse and decorations of the body. There is an option as to shaving the moustaches and beard viz. he should shave only on the first and last *parvans* or may do so on all four. There are five offerings common to all cāturmāsyas, viz., a puroḍāśa (cake) on eight potsherds for Agni, boiled rice (caru) for Soma, a puroḍāśa on 12 or 8 potsherds (12 according to Tai. S. I. 8. 2) for Savitṛ (upāṁśu, inaudibly), a *caru* for Sarasvatī, a caru of finely ground rice for Pūṣan. The reward secured by the performance of the cāturmāsyas[2447] is heaven. The cāturmāsyas may be performed throughout life or for one year only.

In the introductory iṣṭi to Vaiśvānara and Parjanya, there is a cake prepared on twelve potsherds for Vaiśvānara and caru for Parjanya. The anuvākyā verses (according to Āśv.) for the two are 'vaiśvānaro ajījanad-agnir &c.' (Āśv. II. 15. 2 sets out the whole) and 'parjanyāya pragāyata' (Ṛg. VII. 102. 1) respectively and the yājyā verses respectively are 'pṛṣṭo divi' (Ṛg. I. 98. 2) and 'pra vātā vānti' (Ṛg. V. 83. 4). In the Vaiśvadeva-parvan itself there are (besides the five offerings common to all cāturmāsyas) three more offerings viz. a cake (puroḍāśa) on seven potsherds for Marut Svatavas (self-strong) or for the Maruts, a payasyā (or āmikṣā, according to Baud. V. I)[2448] to

---

2446. पौर्णमासेनेष्ट्वा चातुर्मास्यव्रतान्युपेयात्। केशश्मश्रुणि वापयीत अधः शयीत। मधुमांसलवणस्त्रयवलेखनानि वर्जयेत्। ऋतौ भार्यामुपेयात्। वापनं सर्वेषु पर्वसु। आद्योत्तमयोर्वा। आश्व. II. 16.22-27; केशश्मश्रुसाधनादीनि स्वैरिकर्माणि अवलेखनशब्देनोच्यन्ते। नारायण on आश्व.

2447. चातुर्मास्यैः स्वर्गकामो यजेत। quoted by Śabara on Jai. XI. 2.12.

2448. When milk is drawn in the morning and beated and then the sour milk of the preceding evening is added on to it, the mixture divides itself into two portions, the solid one being called आमिक्षा and the liquid above it is called वाजिन. Note तसे पयसि दृश्यानयति सा वैश्वदेव्यामिक्षा वाजिभ्यो वाजिनम्। quoted by शबर on जै. II. 2. 23 and IV. 1. 22. शबर further remarks 'आमिक्षायां दधिपयसी विद्येते न वाजिने। तत्र हि दधिपयसोः संसृष्टो रस उपलभ्यते। ... ... वाजिने तिक्तकटुको रसः।'. याज्ञिकदेव on कात्या. IV. 3. 10 remarks आमिक्षा पयस्येति चानर्थान्तरम्। The first cāturmāsya is called Vaiśvadeva because the most characteristic offering in it is the āmikṣā to All Gods 'आमिक्षादेवतात्वेन विश्वदेवसंबन्धात् तैरिडत्वेन पुराकल्पश्रवणाच्च प्रथमस्य पर्वणः समाख्या वैश्वदेवमिति। com. on. Āp. VIII. 1. 2.

the All-Gods (Viśve Devāḥ) and a cake on a single potsherd to Dyāvāpṛthivī (Heaven and Earth).

Kāt. (V. 1. 21–24) requires that this Vaiśvadeva-parvan should be performed in a spot which inclines towards the east,[2449] that the sacrificer and his wife each put on two fresh and unworn garments (one lower and the other upper) which they have to wear again at the Varuṇapraghāsaparvan. Kāt. (V. 1. 25–26) following Śat. Br. (II. 5. 1) says that barhis (sacred grass to be strewn on sacrificial ground) is tied up in three bunches separately with a rope of grass and then all three bunches are tied together with a bigger rope and therein (i. e. inside this last rope) is thrust a bunch of flowering kuśa grass, which is to be used as *prastara*. After putting the yajñapātras[2450] on the sacrificial ground, fire is produced by churning from the *araṇis*. Being directed by the adhvaryu the hotṛ priest repeats at the time of churning fire the verses Ṛg. I. 24. 3, I. 22. 13, VI. 16. 13–15 (except the last pāda of VI. 16. 15) and stops till he receives another direction (saṁpraiṣa) from the adhvaryu. If fire is not produced at once the hotṛ should go on repeating the hymn, Ṛg. X. 118, till fire is struck from the *araṇis*.[2451] On hearing from the adhvaryu that fire is produced and that he should repeat a formula for that event, the hotṛ repeats the last pāda of Ṛg. VI. 16. 15 at which he had stopped (after the syllable om added at the end of that verse of Ṛg. X. 118 at which he hears about the production of fire). Then he should repeat Ṛg. I. 74. 3 and stop after repeating half of Ṛg. VI. 16. 40, then recite Ṛg. VI. 16. 41–42, I. 12. 6, VIII. 43. 14, the verse 'tamarjayanta sukratum' and then repeat Ṛg. X. 90. 16 as the paridhānīyā (the finishing verse).[2452] There are nine prayājas and nine anuyājas in the Vaiśvadeva-parvan, while in the Darśapūrṇamāsa there are only

2449. प्राचीनप्रवणे वैश्वदेवेन यजेत । quoted by शबर on जै. I. 3 22 and XI. 2. 1.

2450. The yajñapātras required here are stated at length in the paddhati on Kāt. V. 1.

2451. According to Kāt. V. 2. 1–5 the adhvaryu directs the hotṛ to repeat, while the churning proceeds, the formulæ (Vāj. S. V. 2) गायत्रेण त्वा छन्दसा मथ्नामि त्रैष्टुभेन त्वा ..... मथ्नामि जागतेन ..... मथ्नामि and the adhvaryu churns from left to right thrice for each of the three formulæ, that when fire is produced it is put in the place of the āhavanīya with Vāj. S. V. 3.

2452. सर्वत्रोत्तमां परिधानीयेति विद्यात् । आश्व. II. 16. 8.

five prayājas and three anuyājas. The number nine of the prayājas[2453] is made up by adding before the 5th prayāja of the Darśapūrṇamāsa four as stated in the note below. Rg. V. 82. 7 and VI. 71. 6 are the anuvākyā and yājyā for the offering to Savitṛ, Rg. VI. 54. 9 and VI. 58. 1 for that to Pūṣan and VII. 59. 11 and VI. 66. 9 for that to Maruts.[2454] The nine anuyājas are made up by adding after the first anuyāja of the darśapūrṇamāsa six more. After the anuyājas, or after the sūktavāka or śaṃyuvāka, an offering of vājina is made to the deities called Vājins. The remainder of the vājina is brought in a vessel and is dealt with in the same way as *iḍā* (i. e. it is placed in the folded hands of the hotṛ by the adhvaryu, the hotṛ then holds it in his left hand and then on the right hand some ghee is sprinkled by the adhvaryu and then two portions of the vājina are put thereon and then again some ājya is sprinkled over it), the vessel is then raised as high as the mouth or nose, the hotṛ should request the other priests in order (as done in the note) to repeat an invocation (*upahava*) with a mantra and then the hotṛ, adhvaryu, brahmā and āgnīdhra partake of the vājina by merely smelling[2455] it. The sacrificer partakes of the vājina actually. Kāt. (V. 2. 9 and 12) adds that the adhvaryu offers three offerings called samiṣṭa-yajus respectively to Vāta, Yajña and Yajñapati with three mantras (viz. Vāj. VIII. 21, 22 first half and 22 latter half) or only one samiṣṭa-yajus may be offered (with Vāj. S. VIII. 21) in Vaiśvadeva and Śunāsīrīya parvans. According to the Śat. Br. (II. 5. 1. 21) the dakṣiṇā in this rite is the first born calf of the season. Kāt. (V. 2. 13) further says that the sacrificer may on finishing each of the three cāturmāsyas (except Śunāsīrīya) shave himself.

2453. नव प्रयाजाः प्रागुत्तमाच्चतुर आवपेत दुरो अग्न आज्यस्य व्यन्तु, उषासानक्ताग्न आज्यस्य वीताम्, दैव्या होताराग्न आज्यस्य वीताम्, तिस्रो देवीरग्न आज्यस्य व्यन्त्विति । आश्व. II. 16. 9; vide notes 2368 and 2369 as to the procedure of prayājas; नवानूयाजाः षड्ढ्वं प्रथमादू देवी द्वारो वसुवने वसुधेयस्य व्यन्तु । देवी उषासानक्ता वसु ..... धेयस्य वीताम् । देवी जोष्ट्री वसु ..... वीताम् । देवी ऊर्जाहुती ..... वीताम् । देवा दैव्या होतारा ..... वीताम् । देवीस्तिस्रस्तिस्रो देवीर्व ..... व्यन्त्विति । आश्व. II. 16. 12; vide also com. on Kāt. V. 2. 7.

2454. Tai. S. IV. 1. 11 states in one place the anuvākyas and yājyas for all the oblations made in the Vaiśvadeva rite.

2455. अध्वर्यु उपह्वयस्व ब्रह्माणमुपह्वयस्वाग्नीदुपह्वयस्वेति । यन्मे रेतः प्रसिच्यते यद्वा मे अपिगच्छति यद्वा आपते पुनः । तेन मा शिवमाविश तेन मा वाजिनं कुरु । तस्य ते वाजिनीतस्योपहूतस्योपहूतो भक्षयामीति प्राणमेवैनं भक्षयेत् । आश्व. II. 16. 18–19; vide also Baud. V. 4. for the mantra.

Jai. (IV. 1. 22–24) concludes that āmikṣā is the principal purpose of mixing curds in boiled milk and not *vājina* and in VIII. 2. 1–9 that in offering vājina the procedure of iṣṭi is to be followed and not of Somayāga though *śruti* in one passage states 'somo vai vājinam'. Vide also Jai. II. 2. 23.

Varuṇapraghāsa.[2456]

The word Varuṇapraghāsa is masculine and is always employed in the plural. The Śat. Br. (II. 5. 2. 1) gives a fanciful etymology viz. that yavas (barley grains) belong to Varuṇa and as these are eaten (from *ghas* to eat) in this rite it is so called. This rite is performed in the rainy season four months after Vaiśvadeva on the Full Moon day of Āṣāḍha or of Śrāvaṇa. The sacrificer should go out of his house to a spot where plenty of shrubs grow. Two altars (vedi) have to be prepared to the east of the āhavanīya inclined towards the east, one south of the other. The northern vedi is in charge of the adhvaryu and the southern one in charge of his assistant, the pratiprasthātṛ (Āp. VIII. 5. 5.). The latter follows the adhvaryu in doing the same actions on the southern vedi that are done by the adhvaryu on the northern vedi except carrying the water forward, girding the wife, producing fires and a few others specified in Kāt. V. 4. 33; all the orders (saṃpraiṣas, like 'agnaye samidhyamānāya anubrūhi') are to be uttered once and everything that concerns the uttering of words is to be done by the adhvaryu only (Āp. VIII. 5. 17)[2457]. But Jai. XII. 1. 18 says that the mantras for taking ājya, for prokṣaṇa and the like are to be recited by the two separately. The procedure is like that of Vaiśvadevaparvan except where special directions are given. The two vedis are separated from each other by a space (at the corners) two, three or four aṅgulas or a span or even wider (Āp. VIII. 5. 10). There is a single utkara. The pratiprasthātṛ moves between the two vedis. On the previous day he makes ready pots full of *karambha* i. e. husked grains of barley slightly fried on the dakṣiṇa fire, ground and mixed

2456. Vide Tai. S. I. 8. 3, Vāj. S. III. 44–47, Tai. Br. I. 6 4, Śat. Br. II. 5. 2, Āśv. II. 17, Baud V. 5–9, Kāt. V. 3–5, Āp. VIII. 5–9.

2457. Jaimini XI. 2. 35–43 deals with the question that pratiprasthātṛ does on the southern vedi whatever adhvaryu does on the nothern. Jai. further (XI. 2. 44–48) states that though there are two vedis and the pratiprasthātṛ follows the adhvaryu in doing all that he does, there is not a double set of priests.

with curds (Kāt. V. 3. 2). According to Āp. (VIII. 6. 3) it is the wife that makes these *karambhapātras*. These pātras exceed by one the number of the children (sons, unmarried daughters, grandsons and unmarried grand-daughters) of the house-holder (Kāt. V. 3. 3–5, Āp. VIII. 5. 41, who includes daughters-in-law) or they are at least three (if the house-holder is childless or has only a son or two). The figures of a ram and ewe are also made of the remaining part of the ground and fried barley used for the *karambhapātras*, the male being made by the adhvaryu and the female by the pratiprasthātṛ and each figure having the characteristic signs of sex. The figures of the ram and ewe are covered by the adhvaryu and pratiprasthātṛ respectively with a bunch of the wool of some animal other than the eḍakā (wild goat) or with the ground tips of kuśa (in the absence of wool). Besides the five offerings common to all cāturmāsyas (these being offered in the Varuṇapraghāsas with all attributes and subsidiaries as in Vaiśvadeva, according to Jai. VII. 1. 17–21), in this rite offerings are made to four more, viz. Indra and Agni, the Maruts, Varuṇa and Ka i. e. Prajāpati (Āśv. II. 17. 14) and the offerings are a cake on twelve potsherds (for Indrāgnī), payasyā or āmikṣā (for Maruts and Varuṇa) and a cake on one potsherd for Ka silently. All offerings are made from *yava* or only the karambhapātras are so made and the figures of the ram and the ewe also are made from *yava* and the rest from rice grains (Āp. VIII. 5. 36–37). The anuvākyā and yājyā verses of each of these four special offerings to Indrāgnī, Maruts, Varuṇa and Ka are respectively[2458] Ṛg. VII. 94. 18, VI. 60. 1; I. 86. 1, V. 58. 5; I. 25. 19, I. 24. 11; IV. 31. 1, X. 121. 1 (Āśv. II. 17. 15). Straight to the east of the āhavanīya about three prakramas from it the northern vedi is prepared and several rules are laid down in Kāt. (V. 3. 13 ff) and its com. about its extent. The northern vedi is six or seven aratnis in length from west to east, its western side is four *aratnis* and its eastern side is three aratnis or the vedi may be even much larger than this. On this vedi a fire-place is constructed with the earth dug up from the sacrificial pit called cātvāla which is measured with a yoke-pin 32 aṅgulas in length and made to the east of the *utkara* and after leaving a space between it and the utkara for

2458. Vide Tai. S. IV. 2. 11 for mostly other anuvākyās and yājyās of the four special offerings and other offerings, though all of them occur in the Ṛgveda.

the priests to move about. The pit is knee-deep, is outside the uttaravedi to its east and is measured from the northern corner of the uttaravedi at a distance equal to the yoke-pin and is square, the east side being 32 aṅgulas in extent or ½ of the vedi or of the extent of a yoke or of ten steps of the yajamāna (on all sides). In the midst of the northern vedi a hole (*nābhi*) is made, a span in length on four sides and having four corners or it may be as large as the hoof of a bull or a horse. On the uttaravedi water is sprinkled with a mantra and gravel is also spread with 'a lioness art thou' (Vāj. S. V. 10). That night the uttaravedi is covered with darbhas. In the morning the adhvaryu and pratiprasthātṛ carry forward fire on to the two *vedis* from the gārhapatya (according to Āp. VIII. 5. 22) or from the āhavanīya (according to Kāt. V. 4. 2–3) by means of kindled fuel-sticks (idhma) held in earthen pots or by dividing the āhavanīya in two parts. Jai. (VII. 3. 23–25) declares that the carrying forward of the fire is done only in the Varuṇapraghāsas and Sākamedhas. The pratiprasthātṛ draws with the sphya a line from the āhavanīya to the northern hind corner of the southern vedi or of the uttaravedi (according to Kāt. V. 4. 9–10) or he connects the two vedis (Āp. VIII. 5. 20) by drawing a line from the north hind corner of the southern vedi to the south front corner of the uttaravedi. He surrounds the hole (nābhi) with three sticks (paridhis), one span long, of devadāru tree on the west, south and north (with Vāj. S. V. 13) and puts down thereon guggulu (bdellium) and perfumed substances and the hair on the head or between the horns of a ram and places the fires on these materials (sambhāras). The pratiprasthātṛ places dakṣiṇa fire on a square mound of one *aratni* in length after drawing lines and sprinkling water. The figure of the ram is put in the payasyā meant for Maruts and that of the ewe in the payasyā meant for Varuṇa. The liquid called *vājina* (of both payasyās) is collected in separate pots and in the payasyā are put the fruit of karīra and leaves of śamī. All the offerings except the payasyā for Maruts and the pots of karambha are placed by the adhvaryu on the *uttaravedi*; while the pratiprasthātṛ places the payasyā for Maruts together with the pot for ājya and also the karambha pot (if the yava grains for them had not been taken out by the adhvaryu) on the southern vedi and the vājina is placed near the utkara by both. When the adhvaryu issues a direction to the āgnīdhra 'please sweep clean the paridhis of the two fires' (the two āhavanīyas on the two vedis) with the ropes binding the idhma, the pratiprasthātṛ goes to the

sacrificer's wife sitting near the gārhapatya and asks her to declare what lover or lovers (jāra)[2459] she has. She either declares the names of her lovers or lifts up (if she feels shame in the declaration) as many blades from the bunch of darbhas lying on the ground as the number of lovers she has had. If she names any, he (the pratiprasthātṛ) declares that Varuṇa will seize him or them. If she conceals the truth, the result would be that her dear relatives would suffer. If she has none she says so. In that case or when she has declared or intimated her lover or lovers, the pratiprasthātṛ makes her repeat the verse 'praghāsino havāmahe' (Vāj. III. 44). The pots are placed in a śūrpa made of iṣīka (reed) in which a little ājya is sprinkled, then there is further sprinkling of ājya thereon twice (abhighāraṇa), the śūrpa is placed on the head of the wife who is led by the pratiprasthātṛ between the fires and the seats of the brahmā priest and the sacrificer to the east of both āhavanīyas and then to the northern vedi; and she standing to the east of the dakṣiṇa fire with her face to the west takes down from her head the śūrpa into her right hand and offers the contents (using the śūrpa[2460] as a juhū ladle) into the dakṣiṇa fire with 'mo ṣu ṇa indrātra' (Ṛg. I. 173. 12, Vāj. S. III. 46 or Tai. S. I. 8. 3. 1) muttered by the sacrificer and with the verse 'yad grāme' (Vāj. S. III. 45, Tai. S. I. 8. 3. 1) uttered by the wife as offering prayer (yājyā). Āp. (VIII. 6. 26) says that the adhvaryu or pratiprasthātṛ may offer the oblation of karambha pots and the sacrificer and his wife may only touch his hand from behind. When the pratiprasthātṛ leads back the wife to her seat near the gārhapatya fire (by the same way that she came) he makes her repeat the verse 'akran karma' (Vāj. S. III. 47, Tai. S. I. 8. 3. 1). Then the adhvaryu offers the five offerings common to all cāturmāsyas (stated above) and the cake to Indra and Agni

---

2459. This is based on the Tai. Br. I. 6. 5 'पञ्चारं सप्तं ..... निर्विंशेत् निर्विंशयैवैनं वरुणपाशेन ग्राहयति'. This is quoted by Āp. VIII. 6. 22 and Āp. states (VIII. 6. 19) that she is made to repeat 'praghāsyan havāmahe' Tai. S. I. 8. 3. Vide note 1342 for the first part of the quotation. The Śat. Br. II. 5. 2. 20 has also a similar passage.

2460. Āp. VIII. 6. 23 says that both husband and wife offer the contents of the śūrpa, while Kāt. V. 5. 11 gives an option. Āp. (VIII. 6. 24) says that the verse 'mo ṣu' is repeated by the yajamāna as the invitatory prayer (puronuvākya) and 'yad grāme' (which refers to the commission of sins and the expiation thereof) as the yājyā by both.

on twelve potsherds and then sits silent. Then the pratiprasthātṛ cuts off a portion of the āmikṣā for Maruts together with the whole of the figure of the ewe (this is the first avadāna) and offers it into fire. He mixes the second portion of the payasyā for Maruts with the leaves of śamī and fruits of karīra and offers it. Then the adhvaryu offers two portions from the āmikṣā meant for Varuṇa mixing the figure of the ram in the first or second avadāna for Varuṇa. According to Āp. (VIII. 6. 31) the adhvaryu offers the first portion of the payasyā along with the figure of the ram and the second portion of payasyā having in it the fruit of karīra and the leaves of śamī. Then the adhvaryu offers the cake to Ka silently. Then both adhvaryu and pratiprasthātṛ make an offering to Agni Sviṣṭakṛt. The fee (dakṣiṇā) is either a cow with its calf or a horse or six or twelve bulls.[2461]

The rite is concluded by the priests and the sacrificer and his wife going for a bath (avabhṛtha) in a river[2462] or the like taking with them the remainder of payasyā for Varuṇa and the scrapings from the pan that are treated like the refuse (ṛjīṣa of Soma). The remainder of payasyā serves as *havis* (sacrificial offering) at the avabhṛtha, a portion of which is offered to Varuṇa and the whole of what remains is offered to Agni and Varuṇa instead of to Agni Sviṣṭakṛt. The sacrificer and his wife silently come to the water, throw into the water the scrapings (niṣkāsa) that are placed in a vessel (sthālī) with a mantra (Vāj. S. III. 48, according to Kāt. V. 5. 30 and 'samudre te' Tai. S. I. 4. 45. 2, according to Āp. VIII. 8. 12). They do not plunge their heads into water but only splash water over their heads and rub each other's backs with water. They then put on new clothes and make a gift of the clothes so far worn (that they had already worn at the Vaiśvadeva-parvan) to one of the (five) priests or to another (worthy) person at their pleasure. After returning to the house the sacrificer puts a fuel-stick on the āhavanīya (with Vāj. S. VIII. 27). Jai. (VII. 3. 12–15) states that this avabhṛtha has the same characteristics as the avabhṛtha in

---

2461. According to Āp. (VIII. 7. 5–7) a full grown bull is the fee or the sacrificer may give more at his pleasure and he says that some teachers prescribe a cow as the fee.

2462. According to Āp. VIII. 8. 15 the sacrificer invokes the water with 'devīr-āpaḥ' (Tai. S. I. 4. 45. 3) and repeats 'sumitriyā na āpa' (Tai. S. I. 4. 45. 2) when going into the water,

Somayāga and that the material offered therein is the scrapings from the pan and not the puroḍāśa (VII. 3. 16).

Sākamedha[2463]

This third parvan of the cāturmāsyas is described at great length in Baud., Āp. and Kāt. Only a few salient features are brought out below. 'Sākamedha' is used in the plural, since there are many rites therein and many and various offerings (com. on Kāt. V. 6. 1). It literally means 'kindling along with or at the same time as' (sākam edha). The name is probably given because the first offering in it is a cake on eight potsherds offered to Agni Anīkavat with the rising sun.[2464] It is performed four months after the Varuṇapraghāsas on the Full Moon day of Kārtika or Mārgaśīrṣa (according as the Vaiśvadeva-parvan was performed on the full moon of Phālguna or Caitra). The whole of this parvan requires two days. On the day previous to the full moon there are three iṣṭis offered at the three savanas (morning, midday and evening) to the three deities respectively, viz. to Agni Anīkavat a cake on eight potsherds in the morning, to Sāntapana Maruts *caru* (oblation of cooked rice) at midday, to Gṛhamedhin Maruts in the evening a *caru* boiled in the milk of all the cows belonging to the sacrificer (Āp. VIII. 9. 8). As regards this last caru it is stated (Āp. VIII. 10. 8 and VIII. 11. 8-10, Kāt. V. 6. 29-30) that if plenty of rice is cooked the priests and the sons and grandsons of the sacrificer (who have had the upanayana performed) eat the food to satiety and go to sleep that night in the same hall without indulging in any talk about poverty or hunger. Jaimini (V. 1. 19-22) refers to the text 'agnaye anīkavate prātar-aṣṭakapālaḥ &c.' and states as the conclusion that all the three rites are performed on one day and no part of the three is to be performed the next day. On that night the milch cows are let loose to mix up among their calves (which can then drink the milk of their mothers without let or hindrance). He, however, binds down that calf which is required for milking the cow that has lost its own calf (and which is to be milked the next morning for the offerings

---

2463. Vide Tai. S. I. 8. 4-6, Tai. Br. I. 6. 10, Śat. Br. II. 5. 3-II. 6. 1-2, Āśv. II. 18-19, Āp. VIII. 9-19, Kāt. V. 6-10, Baud. V. 10-17.

2464. अथ पौर्णमास्या उपवसथेऽग्नयेऽनीकवते पुरोडाशमष्टाकपालं निर्वपति साकं सूर्येणोद्यता । चो. V. 9; Āp. VIII. 9. 2 and तै. सं. I. 8. 4. 6 have the words अग्नये ... ... उद्यता.

to the Manes). That night and in the next morning agnihotra is performed with rice gruel (and not with milk). On the next day (the principal day of Sākamedha) the sacrificer either before or after the daily agnihotra performs a homa with a *darvi* taking a portion of the boiled rice sticking to the bottom of the sthālī (pot) that had been cooked for the offering to Gṛhamedhin Maruts the previous evening. He fills the darvi[2465] (ladle) with a mantra (Vāj. S. III. 49, Tai. S. I. 8. 4. 1). Then the adhvaryu directs the yajamāna to fetch a bull and make it bellow. When the bull bellows, he offers the rice in the darvi into fire with a mantra (Vāj. S. III. 50, Tai. S. I. 8. 4. 1). If the bull does not bellow, then the oblation is offered after the brahmā priest directs 'offer'. Āśv. (II. 18. 11-12) states that the homa may be offered (if the bull does not bellow) at the thunder of a cloud or some make the āgnīdhra roar calling him 'brahmaputra' ('the son of the brahmā priest', whose assistant he is). The bull is given as fee to the adhvaryu. Then an iṣṭi is offered to Kriḍin Maruts with a cake cooked on seven potsherds and a *caru* to Aditi. This is followed by a *mahāhavis* (a great offering), which consists of eight offerings to eight deities. They are five offerings common to all cāturmāsyas, the 6th offering is a cake on twelve potsherds to Indra and Agni, the 7th is *caru* to Mahendra (or according to Āśv. II. 18. 18 to Indra, or Vṛtrahan Indra or Mahendra), the 8th is a cake on one potsherd to Viśvakarman[2466] (inaudibly). According to Āp. he offers the 8th offering of a cake after taking the names of the four months Sahas, Sahasya, Tapas and Tapasya (i. e. Mārgaśīrṣa to Phālguna). A bull is the fee of this *Mahāhavis* (or a cow according to Āp.).

After the mahāhavis comes the pitṛyajña which is called mahāpitṛyajña. To the south of the dakṣiṇa fire a new vedi having four corners in the four principal directions[2467] is prepared and has the same length and breadth as the height

---

2465. According to the com. on Kāt. V. 6. 40 this darvi-homa is offered in the āhavanīya, while according to Āp. VIII. 11. 19 it is offered in Gārhapatya. The oblation is meant for Indra.

2466. According to Āśv. II. 18. 18, Ṛg. IV. 32. 1 and VI. 25. 8 are the anuvākyā and yājyā respectively for Indra or Mahendra and Ṛg. X. 81. 6 and X. 81. 5 respectively for Viśvakarman.

2467. According to Kāt. V. 8. 21 the four corners face the intermediate quarters and he relies on Śat. Br. II. 6. I. 10. Vide S. B. E. vol. 12 p. 422 n. 3. for this special vedi.

of the sacrificer (Āp. VIII. 13. 2). He brings fire from the dakṣiṇa fire and lays it on the new vedi in the centre and all offerings that are to be offered in the āhavanīya are offered in this fire. In this mahāpitṛyajña the wife does nothing. In this yajña a cake on six kapālas is offered to Somavat Pitṛs or to Pitṛmat Soma, *dhānās* (fried barley) to Barhiṣad Pitṛs, *mantha*[2468] to Agniṣvātta Pitṛs. Āśv. II. 19. 21 adds another deity viz. Yama and according to some (vide Āp. VIII. 13. 16) the devatās and offerings are ājya to Pitṛmat Soma, a cake on six potsherds to Barhiṣad Pitṛs, fried barley to Agniṣvātta Pitṛs and mantha to Yama or Agni Kavyavāhana or Yama Aṅgirasvat Pitṛmat. The beating of grains (with a pestle) and grinding is done by the adhvaryu or āgnīdhra to the east of the gārhapatya fire with his face to the south. The cake is cooked on burning coals taken with a shovel from the gārhapatya to its south and the *dhānā* is fried on the dakṣiṇāgni. There are only four prayājas (omitting *barhis* out of the five at the darśapūrṇamāsa) and so also anuyājas. Instead of the usual direction (called āśruta) of the adhvaryu to the āgnīdhra 'O śrāvaya', in this rite he utters 'Om svadhā'; similarly the āgnīdhra responds (pratyāśruta) with 'astu svadhā' instead of the usual 'astu srauṣaṭ' and instead of the syllable 'vauṣaṭ' uttered at the end the words 'svadhā namaḥ' are employed. Instead of the concluding offering usually made to Agni Sviṣṭakṛt, in this rite it is made to Agni Kavyavāhana. In this rite two anuvākyās and one yājyā are repeated at each offering i. e. Ṛg. X. 15. 1, IX. 96. 11 are the two anuvākyās and Ṛg. X. 15. 5 the yājyā for Somavat Pitṛs, Ṛg. I. 91. 1 and I. 91. 20 are the anuvākyās and VIII. 48. 13 the yājyā for Pitṛmat Soma, Ṛg. X. 15. 4 and X. 15. 3 the anuvākyās and Ṛg. X. 15. 2 the yājyā for Barhiṣad Pitṛs, Ṛg. X. 15. 11 and 13 the anuvākyās and X. 15. 14 the yājyā for Agniṣvātta Pitṛs, Ṛg. X. 14. 4-5 the anuvākyās and X. 14. 1 the yājyā for Yama, Ṛg. X. 15. 9 and IV. 11. 3 the anuvākyās and I. 96. 1 the yājyā for Agni Kavyavāhana (vide Āśv. II. 19. 22, 24). The adhvaryu or sacrificer sprinkles water from a water vessel thrice

2468. The cow that has no calf of its own but yields milk on having the calf of another is called विघायसी. Its milk is put in a vessel in which half ground barley grains are laid and then stirred once or thrice, according to Āp. VIII. 14. 14, with a piece of sugar-cane to which is tied a string. He does not directly touch the piece of sugar-cane when stirring, but stirs it by moving the string and the stirring is done from right to left. This preparation so stirred is called *mantha*.

round the vedi from right to left. He offers water for washing the feet to the three ancestors (of the sacrificer) in the north-west, south-west and south-east corners of the vedi respectively. He mixes portions of the cake, the fried barley and the *mantha* and prepares three balls therefrom and offers them facing the south on the three corners referred to above for the three ancestors with the appropriate mantras (etat te tata[2469] ye ca tvāmanu, etat te pitāmaha &c.). According to Āp. (VIII. 16. 7) he prepares three more piṇḍas for the three ancestors beyond the paternal great-grand-father and invokes them on the piṇḍas in the reverse order i. e. the sixth ancestor on the first (out of these other three piṇḍas), the fifth on the 2nd piṇḍa and the fourth on the 3rd. He then wipes off the remnants of the piṇḍas (piṇḍalepa) sticking to the hand on the north-eastern corner of the vedi with 'atra pitaro' (Vāj. S. II. 31 first half). The priests and the sacrificer with faces to the north leave that place, wear the sacred thread in the upavīta form and wait upon the āhavanīya with Vāj. S. III. 51–52 (= Tai. S. I. 8. 5. 1–2), and on the gārhapatya with Vāj. S. III. 53–55 (=Tai. S. I. 8. 5. 2–3). Then entering the vedi the sacrificer, wearing the sacred thread in the prācīnāvīta form, mutters the mantra 'amīmadanta' (Vāj. S. II. 31 latter half). They sprinkle the vedi from left to right and do all the rest as in piṇḍapitṛyajña. The sacrificer then folds his hands with 'namo vaḥ' (Vāj. S. II. 32) or makes six namaskāras (salutations) and invokes the blessing 'give us house' (Vāj. S. II. 32). This rite ends with Śaṁyu (Āśv. II. 19. 2, Kāt. V. 9, 32) i. e. 'tacchaṁyorā ..... śam catuṣpade' (Tai. Br. III. 5. 11) and there is no patnīsaṁyāja homa in dakṣiṇa fire and so on. The remaining portion of the material for offerings is thrown into the fire or into water or may be eaten by the priests.

The last rite in the Sākamedhas is the Traiyambaka homa. Vide Tai. S. I. 8. 6, Śat Br. II. 6. 2. 1–17, Āśv. II. 19. 37–40, Āp. VIII. 17–19, Baud. V. 16–17, Kāt. V. 10. This homa is offered to Rudra. Some of its peculiarities may be noted. In this the adhvaryu takes out material to prepare cakes cooked on one potsherd exceeding by one the children (the sons and grandsons together with their wives and unmarried daughters) of the sacrificer or at least four (if he is childless or has no more than a few children). Every thing is done facing the

2469. Vide Tai. S. I. 8. 5 for 'etat te &c.'.

north and all places where offerings are to be made must be to the north. He cooks the cakes on the northern side of the gārhapatya and may anoint the cake with clarified butter,[2470] he carries a single smoking firebrand kindled at the dakṣiṇa fire with the mantra 'eka eva rudro' (Tai. S. I. 8. 6). All (priests and relatives) go to a spot near by in the north-east and lay down one cake on earth dug out by rats from a hole with the words 'O Rudra! the rat is thy beast' (Tai. S. I. 8. 6. 1.) or if one has an enemy and one hates him one may think of him and offer that cake with the words 'that is thy beast'. He places the single firebrand in a spot where four roads meet and which has the usual five purifying rites performed on it and offers thereon with the middle leaflet of a palāśa leaf (used as the *juhū* ladle) portions cut off once each from all the cakes prepared for Rudra with the mantra 'O Rudra! this is your portion, may you partake of it together with Ambikā, your sister, svāhā' (Tai. S. I. 8. 6 = Vāj. S. III. 57). The remainder he places on the earth heap dug up by rats and covers it with earth. After coming back from the heap, the sacrificer and the priests mutter a mantra (Vāj. S. III. 58) or only the yajamāna mutters the same mantra (Tai. S. I. 8. 6). The yajamāna, his children and his wife and other ladies go round the fire thrice from right to left (as in pitṛyajña) with the famous mantra 'Tryambakam yajāmahe' (Tai S. I. 8. 6 and Vāj. S. III. 60) striking their left thigh with their right hand and again thrice striking their right thigh with their right hand. The unmarried daughter of the yajamāna desirous of a husband should go round the fire from right to left and again from left to right (thrice in each mode), with the above mantra altered to suit her case (Vāj. S. III. 60).[2471] The portions of the cakes that remain are thrown up in the air by the yajamāna so high that a cow (or bull) with upturned mouth cannot reach them and he catches them in his hand one after another.[2472] If he

2470. This anointing with ājya is called 'prāṇadāna' (bestowal of life or soul). Kāt. V. 10. 10–13 and Āp. VIII. 17. 9–12 differ in the order of offerings to Rudra and on the rubbish dug out by rats.

2471. Āp. VIII. 18. 2 says (against Kāt. V. 10. 15) that they go round from left to right. Her mantra becomes 'त्र्यम्बकं यजामहे सुगन्धिं पतिवेदनम्। उर्वारुकमिव बन्धनादितो मुक्षीय मामुतः॥ (वाज. सं.) or मुक्षीय मा पतेः (as quoted in आप. VIII. 18. 3.)

2472. According to Āp. VIII. 18. 4 the portions of cakes are thrown up by the several persons and seized by them and then placed in the joined hands of the yajamāna and this is done thrice.

cannot catch them he touches them when they fall on the ground. They are then placed in two woven baskets (half and half), which are then hung from the two ends of a bamboo pole or the beam of a scale or a pole made of a sacrificial tree and he fastens them on two sides on a tree trunk, or a tree or a bamboo or ant-hill, in such a way that a cow or bull cannot reach them, with the mantra (Vāj. S. III. 61 first part, Tai. S. I. 8. 6 'eṣa te rudra bhāgaḥ). They mutter the mantra 'avatatadhanvā &c.' (Vāj. S. III. 61 latter half and Tai. S. I. 8. 6) repeatedly without taking breath and do so thrice (according to Āp. VIII. 18. 9). They (priests and yajamāna) return to the place where the other rites were performed and touch water. According to Āp. (VIII. 19. 1–3) a white horse is the dakṣiṇā or a white bull or a bull that has a white spot of hair.

Śunāsīrīya[2473]

Besides the five offerings common to all cāturmāsyas, the special offerings in this iṣṭi are a cake on twelve potsherds to Śunāsīrau (Vāyu and Āditya, according to com. on Kāt. V. 11. 5 and to Indra Śunāsīra, according to Āp. VIII. 20. 5 and com.), an oblation of fresh warm milk (not heated) direct from the cow to Vāyu, a cake on one potsherd to Sūrya. There is no uttaravedi in this rite, and no fire is produced by attrition. There are five prayājas, three anuyājas and one samiṣṭayajus, but according to Āp. VIII. 20. 6 there are nine prayājas and anuyājas. The dakṣiṇā for the rite is a plough with six bulls or two big bulls and for the cake to Sūrya a white horse or a white bull (Kāt. V. 11. 12–14), while according to Tai. S. I. 8. 7 it is a plough to which twelve oxen are yoked and according to Āp. (VIII. 20. 9–10) a plough with twelve or six oxen.

'Śunâsīrau' occurs in the Ṛgveda IV. 57. 5 and 8. In Ṛg. IV. 57. 4 and 8 the word 'śunam' occurs several times. The meaning is doubtful. According to Yāska's Nirukta IX. 40 Śuna and Śīra mean Vāyu and Āditya respectively ; while the Śat. Br. II. 6. 3. 2 appears to hold that *śuna* means prosperity and *śīra* means 'essence or sap' (sāra) and this iṣṭi is so called because the sacrificer thereby secures both prosperity and sap.

2473. Vide Tai. S. I. 8. 7, Tai. Br. I. 7. 1, Śat. Br. II. 6. 3, Āśv. II. 20, Āp. VIII. 20, Kāt. V. 11, Baud. V. 18.

European scholars see in this name a reference to the plough and ploughshare.[2474] Vide Vedic Index vol. II. p. 386.

Āgrayaṇa (offering of first fruits)[2475]

This is an iṣṭi, without performing which an *āhitāgni* was not to make use of freshly harvested rice, barley and millet. It was either performed on a New Moon day or Full Moon day, but the procedure was the same as that of the iṣṭi on New Moon. The time of the āgrayaṇa iṣṭi with rice is *śarad* (autumn) when one had ample rains.[2476] As barley crops became ready in vasanta (spring), the āgrayaṇa for yavas was to be performed in spring. Āśv. allowed an option that when the iṣṭi was once performed in the autumn one may not perform it in spring for the barley crop. The iṣṭi for millet crop (śyāmāka) was performed in the rainy season and therein a *caru* was offered to Soma. The iṣṭi was so called because therein the first fruits (agra) were first employed or eaten (ayana).[2477] According to Āp. (VI. 29. 6) there are 17 kindling verses (sāmidhenī), which number is obtained by inserting two additional verses called dhāyyā after the 8th or 9th sāmidhenī of the darśa-pūrṇa-māsa iṣṭi. The deities and offerings are a cake on twelve potsherds for Indra and Agni (or according to Āp. VI. 29. 10 and Āśv. II. 9. 13, it is either Aindrāgna or Āgnendra), a caru cooked in milk or water for All Gods (Viśve Devāḥ) silently, a cake on one potsherd to Heaven and Earth and caru to Soma (if the first fruits are millets). Kāt. IV. 6. 7 allows an option that the *caru* for All Gods may be of old rice. For him who performs only daily agnihotra or who does not

---

2474. According to Āśv. II. 20. 3 the devatās of the 6th, 7th, and 8th offerings are Vāyu Niyutvat or Vāyu (simply), Śunāsīrau or Indra Śunāsīra or Indra Śuna and Sūrya. The anuvākyā and Yājyā verses of these are respectively Ṛg. VII. 92. 1 and 3 (Vāyu Niyutvat), VIII. 26. 25 and VII. 90. 2 (for Vāyu simply), IV. 57. 5 and 8 (for Śunāsīrau), Indra vayaṁ Śunāsīram-asmin pakṣe havāmahe sa vājeṣu pra no viśat and X. 160. 5 (for Indra Śunāsīra), III. 30. 22 and X. 160. 5 (for Indra Suna), I. 50. 4 and I. 115. 1 (for Sūrya).

2475. Vide Śat. Br. II. 4. 3, Āp. VI. 29. 2 ff, Āśv. II. 9, Kāt. IV. 6, Baud. III. 12.

2476. यदा वर्षस्य तृप्तः स्यादृषाग्रयणेन यजेत। ..... अपि वा क्रियां यजेत्। आश्व. II. 9. 3 and 5.

2477. अग्रे अयनं भक्षणं येन कर्मणा तदाग्रयणम्। प्रथमद्वितीयपोर्ह्रस्वदीर्घत्वव्यत्ययः। com. on आश्व. II. 9. 1.

perform any iṣṭi except darśapūrṇamāsa Kāt. IV. 6. 11 and Āśv. II. 9. 4 prescribe that he may make his agnihotra cow eat the first fruits, viz., rice or barley bundles or food and with the milk of that cow perform on the āgrayaṇa day the homa. But this alternative was not open to the king who had to perform this iṣṭi (Āśv. II. 9. 6). According to Kāt. (IV. 6. 16–17) the caru of millets for Soma is performed only for the forest-dweller and a caru of bamboo seed is prescribed for Soma in summer. About the dakṣiṇā there are various opinions. According to Kāt. (IV. 6. 18) it is either a repaired waggon or silken cloth, madhuparka (i. e. honey, curds and ghee) or the cloth worn by the sacrificer in the rains. According to Āp. (VI. 30. 7) the first among the calves born before the Full Moon of Māgha is the fee, and cloth for iṣṭi with millets. Jai. has several sūtras about silk cloth and a calf being the dakṣiṇā in this rite and that rice cooked on dakṣiṇa fire is not the fee (vide X. 3. 34–38). Vide also Jai. XII. 2. 34–37 (about the characteristics of the *barhis*).

The āgrayaṇa sacrifice in the gṛhya fire has been already described (pp. 827–829) and it will have been noticed that it was a replica of the śrauta sacrifice meant for those who had consecrated the three Vedic fires.

Kāmyeṣṭi

In the Śrauta sūtras there are rules for the performance of several iṣṭis on the occurrence of certain events or for the purpose of securing some desired object. Āśv. II. 10–14, Āp. XIX. 18–27 and others mention several such iṣṭis, viz., the āyuṣkāmeṣṭi (for one desirous of long life), the svastyayanī (for safe journey), the putrakāmeṣṭi[2478] (for one desirous of a son or one adopting a son, Āśv. II. 10. 8–9), *Lokeṣṭi*, *Mahāvairājī* (Āśv. II. 11. 1–4) or *Mitravindā* (Kāt. V. 12, for one who is desirous of prosperity, territory, friends and long life, addressed to ten deities), *Saṁjñānī* (for the reconciliation of those who have fallen out), *Kārīrīṣṭi*[2479] (for one who desires rain, Āśv. II. 13. 1–13, Āp. XIX. 25. 16 ff), *Turāyaṇa* (Āśv. II. 14. 4–6),

2478. The Kālikāpurāṇa quoted in the Vyavahāramayūkha (p. 114 text) prescribes that on adopting a son who is about five years old (or more) the adopter should perform the putreṣṭi.

2479. In the Kārīrīṣṭi the sacrificer had to wear a dark garment having dark hem. Tai. S. (II. 4. 7–10) deals with this iṣṭi.

Dākṣāyaṇa[2480] (Āśv. II. 14. 7–10). These and other iṣṭis though very interesting from several points of view have to be passed over for want of space.

2480. For the Mitravindā vide Śat. Br. XI. 4. 3; for the Dākṣāyaṇa vide Śat. Br. II. 4. 4 and Śat. Br. XI. I. 2. 13 (S. B. E. vol. 44 p. 5), which says that the Dākṣāyaṇa need be performed only for 15 years, since therein two new moon and two full moon offerings are performed every month.

CHAPTER XXXII

PAŚUBANDHA OR NIRŪḌHAPAŚUBANDHA[2481]

(immolation of an animal in sacrifice).

The animal sacrifice is an independent sacrifice and it is also performed in soma sacrifices as a constituent part (*aṅga*). The independent animal sacrifice is called nirūḍhapaśubandha (offering of an eviscerated animal) and the subordinate ones are called saumika (Āśv. III. 8. 3–4). The nirūḍhapaśu is really a modification of an animal sacrifice in somayāga (called agnīṣomīya paśu) as Jai. VIII. 1. 13 declares, but in many sūtras the full procedure of both is set out in the nirūḍhapaśu section (vide Kāt. VI. 10. 32 and com. on Kāt. VI. 1. 31). The nirūḍhapaśubandha itself becomes the prakṛti (archetype or model) of all other animal sacrifices, except savanīya paśu and anūbandhyapaśu. The independent animal sacrifice is to be performed every six months or every year by the *āhitāgni* throughout his life.[2482] If done once a year it was to be performed in the rainy season (i. e. in Śrāvaṇa or Bhādrapada) on New moon or Full moon day or if done six monthly then at the beginning of the southward and northward passages of the Sun (dakṣiṇāyana and uttarāyaṇa). Then it may have to be performed on any day and not necessarily on amāvāsyā or paurṇamāsī. According to Āśv. (III. 1. 2–6) optionally an iṣṭi before and after the independent paśubandha rite may be performed and if performed it is offered either to Agni or to Agni-Viṣṇu or to Agni and Agni-Viṣṇu. In this sacrifice there is a sixth priest called Maitrāvaruṇa (or Praśāstṛ) in addition to the five required in the cāturmāsyas. An udumbara staff is given to the sacrificer when he is initiated for a sacrifice like Agniṣṭoma. In the paśubandha when the Maitrāvaruṇa enters the sacrificial ground after the priests are chosen the adhvaryu

---

2481. Vide Śat. Br. III. 6. 4 ff, XI. 7. 1 ff, Tai. S. I. 3. 5–11, VI. 3–4; Kāt. VI, Āp. VII, Āśv. III. 1–8, Baud. IV.

2482. Manu IV. 26 also recommends an animal sacrifice at the beginning of the *ayanas*. Āp. VII. 8. 2–3 and Baud. IV. 1 set out the yajñapātras and other materials required in *paśubandha*.

(or yajamāna in some śākhās)[2483] hands over that staff (which in length would reach the mouth of the sacrificer) to the maitrāvaruṇa with a mantra and the maitrāvaruṇa accepts it with a corresponding mantra. The maitrāvaruṇa stands slightly bent to the south of the seat of the hotṛ resting his staff on the vedi and utters directions to the hotṛ to repeat yājyās. Till he utters the first praiṣa he is not to touch himself or any one else with the staff. The maitrāvaruṇa is to utter in a standing posture while holding the staff the praiṣas and the anuvākyās wherever a praiṣa is employed and do a few other acts standing; but the rest of his duties in soma sacrifices he does sitting. Jaimini (IV. 2. 16–18) has a discussion (arising out of Tai. S. VI. 1. 4. 2 'kṛte some maitrāvaruṇāya daṇḍam prayacchati') on the question whether the handing over of the staff to maitrāvaruṇa is a *pratipattikarma* or an *arthakarma* (the conclusion is that it is the latter). The adhvaryu makes an offering of clarified butter in the āhavanīya, which is called yūpāhuti, with the *sruva* or with a *sruc* in which four ladlings of ājya have been poured, with the mantra 'uru viṣṇo' (Vāj. S. V. 41, Tai. S. I. 3. 4. 1). The adhvaryu, taking the rest of the ājya and the sruva, goes to a place where trees grow, accompanied by a carpenter (takṣan) holding an axe (Āp. VII. 1. 13 and Kāt. VI. 1. 5). The sacrificial post (*yūpa*)[2484] is to be made of the palāśa, khadira, bilva or rauhitaka tree according as one desires various rewards (Āp. VII. 1. 16), but in Soma sacrifices the yūpa must be of khadira, if possible. Jai. (VI. 3. 28–30) states that, if by accident the sacrificial post made of one kind of tree is destroyed during the continuance of the rite, another yūpa of the same tree or of a tree very similar to it is to be substituted. The tree to be cut must be full of leaves, must not have its top dried up, must be straight and growing on a level spot, and its branches must be turned upwards and it should be bent in some direction other than the south. Adhvaryu, brahmā, the sacrificer and carpenter touch the tree after selecting it with the mantra 'atyanyān' (Vāj. S. V. 42, Tai. S. I. 3. 5). The adhvaryu touches the trunk of the tree all round (where it is to be cut) with the sruva anointed with ājya with the mantra

---

2483. प्रशास्तारं पौर्णेन प्रयाय दण्डमस्मै प्रयच्छेद् दक्षिणोत्तराग्रां पालिग्रां मित्रावरुणयोरस्या बाहुग्यां प्रशाखोः प्रक्षिपा प्रयच्छामीति। आश्व. III. 1. 16; compare Kāt. VI. 4. 4, Āp. VII. 14. 5.

2484. Vide Sat. Br. III. 6. 4 to III 7. 1 for an extensive treatment of everything regarding the yūpa, and also Ait. Br. 6. 1–3.

'May god Savitṛ anoint thee with *madhu*' (Tai. S. I. 3. 5) or with 'Viṣṇave tvā' (Vāj. S. V. 42). He keeps obliquely a darbha blade on the trunk with the words 'oṣadhe trāyasvainam' (Tai. S. I. 3. 5 or Vāj. S. V. 42) and strikes the tree with the axe with the mantra 'O axe! do not injure it' (svadhite mainaṁ hiṁsīḥ,' Vāj. S. V. 42 and Tai. S. I. 3. 5). The first chip of the tree that is cut off, he keeps in a well-known place and the tree is cut at such a low height from the ground that the stump left in the ground would not strike against the axle of a cart going that way. The tree should be so cut that it should not fall to the south; it should fall to the east or north or north-east (Āp. VII. 2. 7); when it is falling he repeats the mantra 'do not scratch the heaven with your top &c.' (Vāj. S. V. 43 or Tai. S. I. 3. 5). He offers ājya with the juhū on the stump of the tree with the mantra 'O tree, grow again with a hundred shoots' (Vāj. S. V. 43, Tai. S. I. 3. 5) and having touched one's body with 'may we grow into a thousand branches' (*ibid.*) he cuts off from the bottom upwards the twigs and knots of the felled tree. There were several views about the length of the yūpa (Āp. VII. 2. 11–17, Kāt. VI. 1. 24–26). According to some the yūpa may be of any length from one *aratni* to 33 aratnis, but Kāt. gives the usual length at 3 or 4 aratnis and Āp. (VII. 2. 17) also quotes the Śat. Br. (XI. 7. 4. 1) that the yūpa in nirūḍha-paśubandha is three or four aratnis in length, while in Soma sacrifices the other measures may apply. Kāt. (VI. 1. 31) states that in somayāga the yūpa may be from five to fifteen aratnis in length except 7, 10 or 14 aratnis and in the Vājapeya sacrifice the yūpa is 17 aratnis in length and in the Aśvamedha it is 21 aratnis. According to Āp. it must be in length at least as much as the height of the yajamāna or as much as the yajamāna with hands upraised. The girth of the yūpa is not fixed. That part of the yūpa which is to be planted in the pit is called *upara*, which is not to be chiselled and which is about a 5th of the whole log but the rest of it is to be chiselled from the bottom towards the top so as to make the yūpa have eight angles and it should be somewhat tapering towards the top. One corner or angle (out of the eight) should be more prominent than the rest and should face the fire. Out of the top portion of the[2485] tree that remains after making the yūpa the carpenter prepares a wooden head-piece, eight-cornered and of the length of the hand from the wrist to the tips of the fingers and contracted in

2485. अग्राद्यवाले पृथमाश्रमदात्रि मध्यसंगृहीतम्। कात्या. VI. 1. 28.

the middle like a mortar. This piece is called *caṣāla* and is made hollow so as to fit in exactly on to the top of the yūpa like a turban and the peg-like top of the yūpa on which the caṣāla is fixed should protrude two or three *aṅgulas* beyond the *caṣāla* (Kāt. VI. 1. 30).

The nirūḍhapaśubandha occupies two days, though it may be performed in one day. On the first of the two days called upavasatha[2486] preliminary matters such as preparing the vedi, bringing the yūpa are performed.

The vedi (a single one) in the nirūḍhapaśubandha is prepared like the one in Varuṇa-praghāsas to the east of the usual āhavanīya fire-place (and not to the west as in darśa-pūrṇamāsa). The dimensions of the vedi are variously given. According to Āp. VII. 3. 7–9 the vedi is three or four aratnis on its western side, six aratnis in length from west to east and three aratnis on the eastern side and it is less in breadth towards the east or it is as wide as the axle on the west, of the length of the shafts of a cart and to the east as wide as that portion of a yoke which is between the outer holes thereof. On this vedi an uttaravedi (a high altar) is measured with the śamyā[2487] (yoke-pin) on the eastern one-third of the vedi. From the northern corner of the eastern side (the shoulder) of the vedi, a pit called *cātvāla* is measured one śamyā square about one prakrama to its north; it is dug with a spade taken with the mantra ' devasya tvā ..... ādade ' (Vāj. S. VI. 1) and it is silently dug as deep as the knee or three *vitastis* (36 aṅgulas). The Tai. Br. I. 5. 10 gives the latter measure. The cātvāla is in front of the utkara and a passage is left between the utkara and the cātvāla which is contiguous to the north side of the mahāvedi (vide Śat. Br. III. 5. 1. 24–30). The earth dug up is heaped on the uttaravedi thrice[2488] with the mantra

---

2486. Vide Āp. VII. 6. 3 and com. इष्वहकालस्यापि विधिरनुमितेः । चौधापनस्याह । इष्टिपशुबन्धाः सोपवसथाः सयोयज्ञा चेति ।

2487. The yoke-pin (śamyā) is of khadira wood and 32 aṅgulas long, having at the end eight knobs each of one aṅgula. Its length is variously given. According to the com. on Āp. I. 15. 13 it is one arm in length or 32 aṅgulas, while com. on Kāt. I. 3. 36 says it is one span in length. Its thicker part is called kumba.

2488. Āp. VII. 4. 5 and VII. 5. 1–2 give the several mantras which accompany the various operations of preparing the uttaravedi and the nābhi.

'a lioness art thou' (Tai. S. I. 2. 12. 2) and a fourth time silently and then is spread over the uttaravedi with 'uru prathasva ..... prathatām' (Tai. S. I. 2. 12. 2); he breaks up the clods with the śamyā, invokes the earth dug up, sprinkles it, spreads gravel on the earth so dug up and spread, pours down the remainder of the water contained in the prokṣaṇī vessel to the north of the uttaravedi by means of a channel made with one stroke of the sphya and cements together the borders of the uttaravedi (with water and earth). On the uttaravedi he makes a square hole (called *uttaranābhi*) a span in measure or measuring as much as a bull's or horse's hoof, invokes it and sprinkles it with water and the rest of the water is drained off to the south (as water was drained off to the north above). Then he covers the uttaravedi with twigs of udumbara or plakṣa tree and waits, if the paśubandha is so performed as to extend over two days. In the morning next day he pours clarified butter in a stream on the uttaravedi from the south-east corner to the north-west corner and from the south-west to the north-east carrying a golden piece in such a way that the butter will fall on the gold. Then he places three (pine) paridhis (enclosing sticks) which are of kāśmarya wood (according to Āp. VII. 7. 7) round the *nābhi* in the west, south and north and puts down on the uttaravedi certain materials viz. bdellium, fragrant and appetising grass, bunch of white wool from between the horns of a ram (*petva*). Having kindled idhma (a bunch of samidhs) at the āhavanīya fire, he carries forward the kindled sticks (in a vessel)[2489] which is supported on a vessel containing gravel (to prevent the scorching of the hands) to the uttaravedi and places them down on the nābhi over the bdellium and other things. This becomes the āhavanīya for all actions in the paśubandha and the original āhavanīya becomes the gārhapatya.[2490]

He takes a spade with a mantra (e. g. Vāj. S. VI. 1), draws to the east of the new āhavanīya an outline of the hole to be dug for inserting the yūpa. He digs a pit so deep that when the yūpa is erected therein its *upara* (the lower unchiselled portion) will not be exposed to view and he throws out to the east of the pit the earth dug out. The pit is so

2489. The baked clay vessel which is held beneath the vessel in which fire is carried is called upayamanī. The vessel in which fire is carried is called अग्न्युद्धरणपात्री.

2490. एष पशुबन्धस्याहवनीयो यतः प्रणयति स गार्हपत्यः। आप. VII. 8. 3.

dug that it is partly within the vedi (prepared for paśubandha) and partly outside[2491] (i. e. it is on the border). The yūpa is laid down in front of the pit, with its top to the east, is washed with water and sprinkled over with water in which barley grains have been mixed, a separate mantra (pṛthivyai tvā &c. as in Vāj. S. V. 26) being recited when sprinkling the bottom, middle and top of the yūpa. He places a handful of kuśas and the first chip (that was cut off with the axe from the tree) on the yūpa which are both subsequently thrown into the hole, the ends of the kuśas being towards the north and east; and then places to the north of the top of the yūpa the caṣāla. The rest of the water taken for sprinkling is poured into the hole for the yūpa with 'Śundhantām lokāḥ pitṛṣadanāḥ' (Vāj. S. VI. 1, Tai. S. I. 3. 1. 1) in which there is a reference to the world of the pitṛs. He silently makes an offering of clarified butter in the hole with the sruva ladle. Then the adhvaryu or yajamāna sits to the south of the yūpa and anoints it with ordinary ājya (over which no saṁskāra has been performed) by means of a chip from its top to its bottom including all its angles (but excluding the upara). While the adhvaryu is doing this he issues a direction to the hotṛ priest to repeat a verse for the yūpa that is being anointed[2492] and the hotṛ repeats 'añjanti tvām' (Ṛg. III. 8. 1) and stops when he has repeated half of it (Āśv. III. 1. 8). Then the caṣāla is anointed both inside and outside and placed on top of the yūpa with a mantra (Vāj. S. VI. 2, Tai. S. I. 2. 2. 3). Then that angular part of the yūpa which is to face the fire together with the corresponding part of the upara is anointed in a continuous stream and the adhvaryu touches all round and holds with his hand that part of the yūpa over which a girdle would be placed later on. At the direction of the adhvaryu the hotṛ priest repeats the verses Ṛg. III. 8. 2–3, I. 36. 13–14 and III. 8. 5 (half), while the yūpa is being raised up. It is laid in the hole with a mantra (Vāj. S. VI. 3, Tai. S. I. 3. 6. 1 'yā te dhāmāni) in such a way that its top will slant towards the āhavanīya and its corner (which is more prominent than

---

2491. अर्धमन्तर्वेदि निनोत्यर्धं बहिर्वेदि। अनवक्लृप्तो भवति न निर्वृहतीति। . This passage is discussed by Jai. in III. 7. 13–14 and his conclusion is that it indicates only the spot where the yūpa is to be erected. The com. on Kāt. VI. 2. 8 says 'आहवनीयात्पूर्वस्यां दिशि तत्रावटं खनति यत्र खातः सन्नर्धमन्तर्वेदि अर्धं बहिर्वेदि स्यात्।'.

2492. यूपावोच्छ्रीयमाणायाहुम्3हीति संप्रेष्यत्युच्छ्रीयमाणायाहुम्3हीति वा। आप. VII. 10. 6. Āp. prescribes Tai. S. I. 3. 1. 2 'ud-divam' as the verse to be repeated. Kāt. VI. 3. 7. prescribes Vāj. S. VI. 2.

the rest) will face the āhavanīya fire. If there are eleven yūpas in an animal sacrifice, then those prominent corners of all eleven yūpas should face the āhavanīya. He fills from left to right the hole for the yūpa with earth with 'brahmavanim tvā' (Vāj. VI. 3, Tai. S. I. 3. 6. 2). The adhvaryu then strokes the earth thrice with the staff of the maitrāvaruṇa so as to make the ground round about the yūpa level with the rest of the ground with 'brahma dṛṁha kṣatram dṛṁha' (ibid) and sprinkles it with (ordinary) water all round. Two girdles of darbha are prepared one with two strands and two vyāmas[2493] in length (for the victim) and the other with three strands and three vyāmas in length (for the yūpa). The yajamāna touches the yūpa and the adhvaryu makes him recite 'observe the exploits of Viṣṇu' (Ṛg. I. 22. 19, Vāj. S. VI. 4, Tai. S. I. 3. 6. 2) and look at the head-piece with 'that is the highest step of Viṣṇu' (Ṛg. I. 22. 20, Vāj. S. VI. 5). Āp. (VII. 11. 3) says that he takes in his hand the girdle for the yūpa with 'devasya tvā savituḥ' and rubs up the yūpa with the hand having the girdle therein with Ṛg. I. 22. 19. Then he begins to encircle the yūpa with the middle of the girdle at a spot which is of the same height as the navel of the sacrificer or in the middle of the yūpa. He calls upon the hotṛ to repeat Ṛg. III. 8. 4 (yuvā suvāsāḥ) when the yūpa is being encircled with the girdle. The girdle is passed round the yūpa in three coils from left to right. When he has finished doing it he repeats 'parivīr – asi' (Vāj. S. VI. 6, Tai. S. I. 3. 6. 2). The two ends of the girdle are intertwined into one another and he inserts the tip of the girdle inside the loop at the other end. Āp. (VII. 11. 6–10) says that the girdle may be pushed down or higher up from the place indicated above or the ends may be dealt with differently according as the yajamāna desires rain or not or according as female or male progeny is desired for the yajamāna. To the north of the corner of the yūpa facing the āhavanīya he inserts in the middle or last coil of the girdle or in all coils of the girdle the *svaru*.[2494] Jai. (XI. 3. 5–7) concludes that the saṁskāras of prokṣaṇa (sprinkling), anointing (añjana), raising up (ucchrayaṇa)

2493. A vyāma or vyāyāma is equal to four *aratnis*.

2494. The *svaru* is the first piece that is severed when the yūpa was being hewn out of the tree trunk that was felled. Śabara on Jai. XI. 3. 9 remarks यद्यप्येकस्यापि यूपस्य बहवः स्वरवः संभवन्ति ..... यः प्रथमः कालः परापतेत् स्वरुः कार्य इति चोदनात्। Jai. (in XI. 3. 8–12) establishes that the svaru is only one like the yūpa, even if there are many animals to be sacrificed in the same yajña.

and surrounding with a girdle (parivyāṇa or parivyayaṇa) are performed on the yūpa only once and are not repeated at each time an animal is sacrificed. The girdle is an aṅga of the yūpa and not of the paśu, as otherwise as many girdles will be required for the yūpa as the number of victims to be sacrificed in a yāga (vide Jai. IV. 4. 22–24). The svaru is connected as an aṅga with the victim (for anointing the victim with it) and not with the yūpa (Jai. IV. 4. 25–28). Vide Jai. IV. 2. 1–6 also.

The animal to be sacrificed is bathed with scented water, is led between the *cātvāla* and *utkara* and brought in front of the yūpa to the east with the animal's face to the west. The animal is a he-goat (chāga) which must not have a broken horn and must not be devoid of an ear or eye or tooth or tail, must not be lame nor have only seven hoofs (instead of eight, as each of the feet has two hoofs). If the animal is defective in any one of these ways an expiatory offering of ājya has to be made to Viṣṇu or Agni-Viṣṇu or Sarasvatī or Bṛhaspati (Ap. VII. 12. 3). Then follows *Paśūpākaraṇa*[2495] which may be done in two days. He takes a darbha blade other than from those spread on the vedi with ' upāvīr-asi ' (Vāj. S. VI. 7) and touches the animal (that stands facing the west) therewith with the verse 'near the gods' (upa devān, Vāj. S. VI. 7). Another way (according to Āp. VII. 12. 5–8) is: he takes two blades of kuśa reciting ' iṣe tvā ' (Tai. S. I. 1. 1. 1) and takes a branch of plakṣa tree that has many leaves and twigs, that is not dry at the end and is not hollow and touches the victim with the blades and the branch and repeats the two mantras ' upo devān-daivīr-viśaḥ and ' prajāpater-jāyamānā ' (Tai. S. I. 3. 7. 1 and III. 1. 1. 4) and the words 'I assign thee, who are dear to Indra and Agni.'[2496] Then he produces fire by churning from the *araṇis* and offers homa in accordance with the procedure of the Vaiśvadeva-parva (vide above pp. 1093–94). Āp. (VII. 12. 11) says that upākaraṇa may be done after the production of fire. He makes a loop of the

2495. तृणेन पशोरुपस्पर्शनं यत्प्रागुक्तं तदुपाकरणम् । com. on Kāt. VI. 3. 26 ; देवतार्थत्वेन संकल्पनमुपाकरणम् । com. on Āp. VII. 12. 8.

2496. According to Āp. VII. 12. 9 the words ' इन्द्राग्निभ्यां त्वा जुष्टं ' occur in five acts with the appropriate verb viz. उपाकरण, नियोजन (tying to the post), मोक्षण, वपोद्धरण (taking away the omentum) and हृदयाभिघारण (pouring clarified butter over the heart of the animal when about to be thrown as an offering). For example, he would say ' ' इन्द्राग्निभ्यां त्वा जुष्टं नियुनज्मि or इन्द्राग्नि...जुष्टं मोक्षामि '

girdle which has two strands and which is two vyāmas in length; he twines the loop round the right fore-leg of the animal and then fastens tightly the girdle on the right horn with the mantra 'ṛtasya tvā' (Vāj. S. VI. 8, Tai. S. I. 3. 8); and ties the raśanā (girdle) round the yūpa towards its north with 'devasya tvā' (Vāj. S. VI. 9 or Tai. S. I. 3. 8. 1). He sprinkles water over it with 'adbhyas-tvauṣadhībhyo' (Vāj. S. VI. 9). Then he makes the victim drink water (by holding below its mouth the agnihotra-havaṇī filled with water) for the last time with 'apām perurasi' (Vāj S. VI. 10, Tai. S. I. 3. 8. 1). Then he sprinkles water over the upper limbs and lower limbs (such as its heart and belly) and over the whole of its body. Then he performs all the procedure of the darśa-pūrṇamāsa beginning from the direction to the hotṛ to repeat a verse when the fire is being kindled up to the *prayājas* (i. e. the sāmidhenīs, pravara-varaṇa by the hotṛ, devatāhvāna, āghāras and pravaravaraṇa by the adhvaryu).

The paśu is meant either for Indra-Agni or Sūrya or Prajāpati and one has to dedicate the victim throughout one's life in every paśubandha to that deity which one chooses at the first animal sacrifice (Kāt. VI. 3. 29–30). He anoints the victim with ājya from the juhū ladle on its forehead, its shoulders and its hind parts after the last āghāra is offered (as in darśa-pūrṇamāsa) and before dhruvā-samañjana (ladling ājya in the dhruvā ladle with the juhū thrice, once with a mantra and twice silently). While the animal stands[2497] he offers the prayājas, that are eleven in the paśubandha (while in darśapūrṇamāsa they are only five and in cāturmāsyas they are nine). The method of offering these in paśubandha is as follows: the adhvaryu directs the maitrāvaruṇa to request the hotṛ to repeat the yājyā verses from the Āprī hymns of the prayāja offerings in succession. The praiṣas (directions to the hotṛ) that the maitrāvaruṇa utters are rather lengthy and hence the text of only one is given below.[2498] There are ten Āprī hymns in the

2497. If the animal has sat down it is made to stand up.

2498. अध्वर्युणा समिद्भ्यः प्रेष्येति प्रेषितः सम्मैत्रावरुण आह। होता यक्षदग्निं समिधा सुषमिधा समिद्धं नाभा पृथिव्याः सदने वामस्य वर्ष्मन्विष इळस्पदे वेत्वाज्यस्य होतर्यज। This is the praiṣa for *samidhaḥ*. In the other praiṣas the names of deities are also put in the objective case (e. g. होता यक्षत्सुनपातम् or नराशंसम्). Vide Vāj. S. 21. 29–40 for the praiṣas of all the prayāja deities uttered by Maitrāvaruṇa with reference to the Āprīs.

Ṛgveda ascribed to ten different sages. They are: I. 13 (of Medhātithi Kāṇva), I. 142 (of Dīrghatamas Auchathya, an Āṅgirasa), I. 188 (of Agastya), II. 3 (of Gṛtsamada, a Śaunaka), III. 4 (of Viśvāmitra), V. 4 (of Atri), VII. 2 (of Vasiṣṭha), IX. 5 (of Kāśyapa), X. 70 (of Vadhryaśva), X. 110 (of Jamadagni). Out of these in Ṛg. I. 13 and I. 142 there are verses for both Tanūnapāt (2nd prayāja deity) and Narāśaṁsa; while Ṛg. I. 188, III. 4, IX. 5 and X. 110 have only Tanūnapāt (and no Narāśaṁsa) and the rest have only Narāśaṁsa (and no Tanūnapāt). According to Āśv. III. 2. 5–7, persons of Śunaka and Vasiṣṭha gotras should repeat their own Āprī hymn (viz. II. 3 and VII. 2 respectively), persons of gotras other than these two should employ the Āprī hymn beginning with 'Samiddho adya' (according to the com. Ṛg. X. 110 and not I. 188) or persons of any one of the ten gotras may employ an Āprī hymn[2499]

2499. The word 'āprī' appears to be used in two senses. One sense is 'a deity or deities' invoked by the verses of the hymn. Yāska (in the Nirukta VIII. 4–22) holds a lengthy discussion on the Āprīs, where he appears to regard the Āprīs as deities; अथात आप्रियः। आप्रियः कस्मात्। आप्नोतेः प्रीणातेर्वा। आप्रीभिरा प्रीणातीति च ब्राह्मणम्। तासामिध्मः प्रथमागामी भवति। (Nir. VIII. 4). The 2nd meaning of Āprī is 'a verse (yājyā) that gratifies a deity'. In this sense the word is used in the Ait. Br. VI. 4 'आप्रीभिराप्रीणाति। समिधो यजति। ... तनूनपातं यजति। नराशंसं यजति। इळो यजति' बर्हिर्यजति। द्वारो यजति। उषासानक्ता यजति। दैव्या होतारा यजति। तिस्रो देवीर्यजति। त्वष्टारं यजति। वनस्पतिं यजति। स्वाहाकृतीर्यजति। ताभिर्यथऋचि आप्रीणीयाद् यथऋचि आप्रीणाति यजमानमेव तद्बन्धुताया नोत्सृजति।'. In this passage the explanations of समिधो यजति and others have been omitted. The word Āprī is here derived from the root 'prī' to please, while Yāska also suggests an alternative derivation from 'āp' to obtain but cites no Brāhmaṇa text in support of that derivation. The Sat. Br. III. 8. 1. 2 derives 'Āprī' from 'pī' to fill. According to Yāska the first Āprī deity is 'Idhma', while according to the Ait. Br. it is 'Samidhaḥ'. It is to be noted that he explains all the verses of Ṛg. X. 110, as the Āprī hymn but as that hymn does not contain a verse about Narāśaṁsa he quotes one from another Āprī hymn a verse for him viz. Ṛg. VII. 2. 2 (in Nir. VIII. 7). Hence it is probable that he held the view that the Āprī verses for all persons should be taken from Ṛg. X. 110, while the Ait. Br. prefers the view that one should repeat that Āprī hymn that is ascribed to the founder of one's gotra. Yāska (Nir. VIII. 22) divides the Āprī hymns into three classes, those containing verses addressed to both Tanūnapāt and Narāśaṁsa, those addressed to Narāśaṁsa only and

(*Continued on next page*)

ascribed to the founder of his gotra if he is from among these ten sages. The words of Āśv. I. 5. 21–22 create some difficulty. Āśv. there prescribes that when uttering the yājyā at the time of offering the 2nd prayāja, the formula should contain an address to Tanūnapāt for all except for persons of Vasiṣṭha, Śunaka, Atri, Vadhryaśva and Rājanya gotras. These latter should utter a formula addressed to Narāśaṁsa. Here if 'rājanya' refers to Viśvāmitra, then the difficulty is that in the Āprī hymn (III. 4) ascribed to him, the 2nd deity is Tanūnapāt and not Narāśaṁsa; but it is possible that the word 'rājanya' stands for a kṣatriya sacrificer in general and does not refer to Viśvāmitra gotra at all. After ten prayājas are offered, the adhvaryu says to the slaughterer of the victim 'bring your two-edged knife.' The adhvaryu takes the *svaru* (chip of wood) and anoints the svaru and one edge of the knife with the clarified butter from the bill-like (or spout-like) part of the *juhū* ladle (according to Āp. VII. 14. 10 the svaru is anointed thrice) and holding the svaru below the knife touches with both the head of the victim (forehead, according to Kāt. VI. 5. 12) with a mantra (Vāj. S. VI. 11, Tai. S. I. 3. 8. 1). After placing back the svaru whence it was taken the adhvaryu gives the knife back to the slaughterer (śamitṛ) with the words 'let this edge be marked by you' (Śat. Br. III. 8. 1. 5). The animal when killed is cut up by the slaughterer with the un-anointed edge and the flesh when roasted is cut up with the edge that is anointed. The adhvaryu directs the maitrāvaruṇa to recite a mantra for indicating that fire (a fire-brand) is being carried round the victim and the maitrāvaruṇa recites 'agnirhotā no' (Ṛg. IV. 15. 1) or the verses Ṛg. IV. 15. 1–3 (according to Āśv. III. 2. 9). To the north of the cātvāla pit, he digs up a spot for establishing the

---

(*Continued from last page*)

those addressed to Tanūnapāt only. He mentions an 11th Āprī hymn occurring in the praiṣa (i. e. probably the praiṣādhyāya Āprī hymn). There are Āprī hymns in the other vedas also. For example, vide Vāj. S. 21. 12–22 (only Tanūnapāt), 29. 25–36 (containing addresses to both Tanūnapāt and Narāśaṁsa and being the same as Ṛg. X. 110 except the verse to Narāśaṁsa which is taken from Ṛg. VII. 3. 2), Atharvaveda V. 12 (same as Ṛg. X. 110), V. 27. The Tai. Br. III. 6. 3 contains all the Āprī verses of Ṛg. X. 110 and the verse Ṛg. VII. 3. 2. There is considerable literature on the Āprīs, both ancient and modern. Vide Tai. S. IV. 1. 8, Tai. Br. II. 6. 12 and 18 and Ait. Br. (Haug's tr. pp. 81–82), Max Muller's H. A. S. L. pp. 463–467.

Śāmitra fire.[2500] The āgnīdhra, lighting a fire-brand at the āhavanīya, carries it thrice round the victim, the yūpa, the āhavanīya fire, the place where the śāmitra fire is to be kindled, the cātvāla pit and the clarified[2501] butter, from left to right with the mantra 'pari vājapatiḥ kaviḥ' (Ṛg. IV. 15. 3, Tai. S. IV. 1. 2. 5). In modern times the priest perambulates all these together and not separately. The āgnīdhra throws the firebrand on to the āhavanīya fire and again goes round the above objects thrice from right to left. According to Āp. VII. 15. 4–6, the adhvaryu makes one, two, three or four offerings of ājya, with mantras called *apāvya*, when fire is carried round the victim, when it is set free from the yūpa and led on (Tai. S. III. 1. 4. 1–2). The āgnīdhra, again taking up the same fire-brand, starts to go with his face to the north and the victim is led after the āgnīdhra by the śamitṛ (who takes away the cord of girdle from the victim's head and ties it round its neck). The pratiprasthātṛ (an assistant of adhvaryu) touches the animal (that is being led northward) from behind with two utensils (spits) made of kāśmarya wood (used for roasting vapā, omentum), the adhvaryu touches the pratiprasthātṛ and the sacrificer touches the adhvaryu.[2502] A pit is got dug (by a servant) for covering in it the undigested food and the fœces of the victim when killed. They (the priests and yajamāna) should not pass beyond the place for the śāmitra fire. The adhvaryu takes two kuśa blades from those with which the vedi is strewn and says to āgnīdhra 'O3śrā3vaya'

2500. The fire on which the flesh of the victim is roasted is called Śāmitra. The burning fire-brand, after it is carried round the victim, is placed by the adhvaryu (who takes it from the āgnīdhra's hand) on a spot to the north of the cātvāla and that becomes the śāmitra fire. अभिपर्यग्निकृते देश उल्मुकं निदधाति । स शामित्रः । आप. VII. 16. 2–3. According to some the śāmitra fire is specially produced by attrition (vide Kāt. VI. 5. 14).

2501. There are several views here. Some hold that the fire-brand is to be carried round the victim alone, others hold that it is to be carried round the first five objects and others add *ājya*; others that the fire-brand is carried round the victim, the place of śāmitra and ājya. Vide Kāt. VI. 5. 2–3, Āp. VII. 15. 2 and com. thereon. This operation of carrying fire round the victim is called paryagnikaraṇa. According to the Tai. Br. III. 8. 17 the mantras 'meṣas-tvā pacatair-avatu' are apāvya and that the Prāṇas are apāvya (the mantras are Tai. S. VII. 4. 12. 1).

2502. The idea of this touching seems to be that some spiritual influence passes from the consecrated victim to the sacrificer.

and the latter replies 'astu śrau3ṣaṭ' and then the adhvaryu issues an upapraiṣa (a supplementary direction) to the maitrāvaruṇa to prompt (the hotṛ) to recite for the offerings to Gods.[2503] The hotṛ then recites the famous (but long) adhrigupraiṣa,[2504] which is an invocation to divine and human slaugh-

---

2503. The maitrāvaruṇa is an assistant of the hotṛ and the praiṣa he utters is अजैदग्निरसनद्गजं नि देवो देवेभ्यो हव्यवाड् याळोभिर्हिन्वानो धेनाभिः कल्पमानो यज्ञस्यायुः प्रतिरन्नुपप्रेप्य होतर्हव्या देवेभ्यः ।. Vide आश्व. III. 2. 10, ऐ. ब्रा. VI. 5, तै. ब्रा. III. 6. 5.

2504. The adhrigu-praiṣa is: दैव्याः शमितार आरभध्वमुत मनुष्या उपनयत मेध्या वुर आशासाना मेधपतिभ्यां मेधम् । प्रास्मा अग्निं भरत स्तृणीत बर्हिरनवेनं माता मन्यतामनु पितानु भ्राता सगर्भ्योऽनु सखा सयूथ्यः । उदीचीना अस्य पदो निधत्तात् सूर्ये चक्षुर्गमयताद्वातं प्राणमन्ववसृजतादन्तरिक्षमसुं दिशः श्रोत्रं पृथिवीं शरीरम् । एकधास्य त्वचमाच्छ्यतादुरा नाभ्या अपि शसो वपामुत्खिदतावन्तरेवोष्माणं वारयध्वात् । इयेनमस्य वक्षः कृणुतात् प्रशसा बाहू शला दोषणी कश्यपेवांसावच्छिद्रे श्रोणी कवषोरू अनेकपर्णाष्ठीवन्ता । बभ्रुविंशतिरस्य वङ्क्रयस्ता अनुष्ठ्यो क्यावयतावद्वात्रं गात्रमस्यानूनं कृणुतात् ऊवध्यगोहं पार्श्वे खनतात् । अस्ना रक्षः संसृजतात् । वनिष्ठुमस्य मा राविष्टोरूकं मन्यमाना नेद्वस्तोके तनये रविता रवच्छमितारः । अग्निगो शमीष्वं सुशमि शमीष्वं शमीष्वमग्निगा3उ अपाप । आश्व. III. 3. 1, शां. श्रौ. V. 17. This occurs in Tai. Br. III. 6. 6 and Ait. Br. VI. 6-7, where some expressions are also explained. Āśv. (III. 2. 11–30) explains how changes (ūha) are to be effected in this formula in different rites according to the limbs concerned, the deities and the number of victims. Āśv. (III. 3. 2 and 4) provides that the words शमितारः, अपाप and अस्ना रक्षः संसृजतात् are recited inaudibly and the passage 'अग्निगो ..... अपाप' is repeated thrice. This whole formula is called adhrigu and adhrigu was also supposed to be a deity presiding over the slaughtering of a victim in sacrifice. Vide com. on Āśv. III. 2. 11. There were as remarked by Śāṅ. Sr. nine pauses to take breath at the end of each of the first nine sentences. The Nirukta (V. 11) explains 'adhrigu' as meaning a mantra and also states that the word is applied to Agni in Ṛg. III. 21. 4 and to Indra in Ṛg. I. 61. 1. The Nirukta quotes the words 'अग्निगो शमीष्वं ..... अग्निगो.' Jaimini considers questions arising from some of the words used in this formula; in IX. 3. 27–28 (when there are many victims in a sacrifice, the singular 'oakṣur' is still to be used), IX. 3. 29–31 (the word 'ekadhā' is explained), IX. 3. 32–40 (some śākhās read 'medhapataye' and some 'medhapatibhyām' and the word means 'devatā'), IX. 4. 1–16 (about '26 ribs' when there are two or more victims), IX. 4. 22 ('urūka' means 'vapā'), IX. 4. 23–24 ('praśasā' means 'praśastau'), IX. 4. 25–27 (the words 'śyena, śalā, kaśyapa, kavaṣa and srekaparṇa only mean that the limbs are to be taken out entire and when so taken out they resemble the hawk and other objects mentioned. Jai. (IX. 1. 45–49) says that in the Atirātra sacrifice of the ewe to Sarasvatī the adhrigupraiṣa does not occur. Different views were entertained as to who the śamitṛ was, the usual opinion being that he was a

(*Continued on next page*)

terers calling upon them to bring the animal to the holy doors of the sacrificial place, wishing that the parents, relatives and friends of the victim will consent to its death and expressing the hope that its several organs and limbs, such as the eyes and ears, will be merged in divinities like the sun and giving directions as to how its parts are to be cut and disposed of. On reciting this solemn formula the hotṛ, while still occupying his seat, turns to the right (i. e. he comes to face the west) and has the sacrificial place behind his back and the maitrāvaruṇa does the same. The adhvaryu throws one of the two blades taken up by him to the west of the śāmitra fire, the victim is held over that blade with its head to the west (or to the east, according to Kāt. VI. 5. 17) and feet to the north. Then its mouth is firmly held so as to stop its breathing and choke it to death or it is strangled to death without allowing it to give out a cry, by using a halter round its throat. The adhvaryu says 'kill it without[2505] allowing it to utter a cry' and then he along with the pratiprasthātṛ, āgnīdhra and the sacrificer come back to the āhavanīya which they face, turn from left to right and remain with their backs to the animal that is being killed (i. e. they do not see the actual slaying of the animal). According to Āp. VII. 16. 7 the sacrificer repeats at this time several verses such as Tai. S. III. 3. 1. 2, Tai. Br. III. 7. 7, the purport of which is that the victim may go to heaven, the sacrificer himself also may go to heaven after securing welfare in this world. When the śamitṛ declares that the victim is killed the adhvaryu says 'let it lie down for a moment.' If the paśu bleats while being strangled the adhvaryu then offers

---

(*Continued from last page*)

person other than the *ṛtviks* (though a few opined that one of the ṛtviks who choked or strangled the animal was called śamitṛ). Vide Kāt. VI. 7. 1–4 and the com. thereon. According to Jai. III. 7. 28–29, śamitṛ is the adhvaryu himself. Āśv. XII. 9. 12–13 shows that the śamitṛ may be a brāhmaṇa or a non-brāhmaṇa. The Ait. Br. VI. 7 and Āśv. III. 3. 4 state that the hotṛ is to utter inaudibly 'O (divine) slaughterers! whatever merit exists in this make that belong to us, whatever is sinful, make it go elsewhere'. The words शमितारः, अग्निगा3ऊ, अपाप are called अवसानs (stops or pauses). The last is pronounced as अपापा.

2505. According to Kāt. VI. 5. 21 the adhvaryu only says 'kill it (the paśu), it has gone following (the gods)'; संज्ञपयाध्वगमित्येव ब्रूयात्. The com. on Āp. VII. 16. 5. explains 'अक्षतस्य मारणं संज्ञपनम्' (it is killing without wounding or drawing blood). Śat. Br. III. 8. 1. 15 has the words संज्ञपया ..... गच्छति.

ājya in fire (as an expiation). The sacrificer and adhvaryu with vapāśrapaṇis (spits) approach the dead victim with the words 'O slaughterers, may you approach' (Tai. S. III. 1. 4. 3). He then removes the cord (by which the victim was tied) with 'may Aditi remove this cord' (Tai. S. III. 1, 4. 2). He winds round the raśanā (girdle of the victim) into a loop, keeps it on the arteries of the victim leading to the ears, attaches it to a peg and throws it into the cātvāla pit (Āp. VII. 17. 4–6). According to Kāt. VI. 5. 26 he throws the tying cord into the *cātvāla* by means of the two vapāśrapaṇis. Then the adhvaryu directs the pratiprasthātṛ to lead forward the sacrificer's wife from her seat to the vedi. When leading her who has a jar of water in her hands for washing the feet and other limbs of the paśu, the priest[2506] makes her recite a verse in honour of the sun 'namaste ātāna' (Vāj. S. VI. 12, Tai. S. I. 3. 8. 2). Āp. adds that the wife, priests and the sacrificer touch water on the cātvāla pit (VII. 18. 4) with a mantra (Tai. S. I. 3, 8. 2 'āpo devīḥ). The wife sitting down near the dead paśu washes with water the several parts of the victim's body viz. its mouth, nose, eyes, navel, penis, anus, feet (all together) with appropriate formulae in each case (viz. 'vācam te śundhāmi' &c. Vāj. S. VI. 14). With the water remaining in the jar the adhvaryu and sacrificer sprinkle the other parts, such as the head, with Vāj. VI. 15 (Tai. S. I. 3. 9. 1). The adhvaryu turns the animal on its back and places on the victim's body a blade of kuśa with its end to the east about four fingers[2507] below the navel of the animal with 'oṣadhe trāyasva' (Vāj. S. VI. 15), places the marked edge of the knife on that blade, makes a slit on the kuśa blade and the belly obliquely, takes in his left hand the portion of the blade cut off and anoints the ends of the other portion of the blade with blood (that spirts out from the slit) with 'thou art the portion of evil spirits' (Vāj. VI. 16), touches water and throws that blood-stained blade on the utkara.[2508] The

---

2506. Kāt. (VI. 5. 28) says that where an animal is sacrificed in a Soma sacrifice (as the agniṣomīya paśu or savanīya paśu in Agniṣṭoma) it is the neṣṭṛ who leads forward the wife. If the sacrificer has several wives they all are led and all repeat the formula (Vāj. VI. 12), but only one carries the water jar.

2507. The vapā (omentum) of the paśu is about four fingers below the navel.

2508. In Kāt. the mantras about paśu-bandha are taken from Vāj. S. VI. 1–22 and they are not mentioned here in many cases.

sacrificer treads[2509] upon the blood-stained blade with the left foot (and then touches water with his hand). The adhvaryu then pulls out from the belly of the victim the omentum, envelopes the two spits[2510] (vapāśrapaṇīs) with it, pierces the thin end of the vapā with one spit, severs it from the belly on all sides and sprinkles it with water holding the spits over the cātvāla pit. Then the pratiprasthātṛ heats the omentum on the śāmitra fire. The adhvaryu, pratiprasthātṛ and āgnīdhra come from the cātvāla to the āhavanīya. The āgnīdhra throws the śāmitra fire (viz. the firebrand and not the fire produced by attrition) into the āhavanīya and the adhvaryu also throws into it the portion of the blade held in his left hand (as stated at p. 1123 above). Āp. (VII. 19. 3) adds that the śamitṛ holds tigbtly by the closed fingers of his hands the two portions of the skin of the victim's belly till the omentum is offered into fire. The pratiprasthātṛ, standing to the north of the āhavanīya fire, heats the omentum on that fire, then carries it by the space between the yūpa and āhavanīya, goes round to the south side, and roasts the omentum on the āhavanīya. The adhvaryu takes clarified butter in the sruva ladle and pours ājya on the omentum that is being held for roasting on the āhavanīya by the pratiprasthātṛ with a mantra. When drops (stokas) of fat begin to drip from the omentum, the adhvaryu directs the maitrāvaruṇa to recite for the drops. The maitrāvaruṇa recites Ṛg. I. 75. 1 and Ṛg. III. 21. 1-5.[2511] When the omentum is well roasted, the pratiprasthātṛ says to the adhvaryu 'it is roasted, proceed.' The omentum is placed on the south corner of the western side (śroṇi) of the vedi on a branch of plakṣa tree stretched on the barhis (kuśa grass on the vedi). Then the hotṛ recites the mantra for srugādāpana (making the adhvaryu take up the juhū and upabhṛt ladles) and the adhvaryu issues a direction[2512] to the maitrāvaruṇa

2509. Āp. VIII. 18. 14 has the characteristic words which the sacrificer utters when treading अधैनत्सव्येन पद्वाभितिष्ठतीदमहं रक्षोवधाय इदमहं रक्षोऽधमं तमो नयामीति । . This formula occurs in Vāj. S. VI. 16.

2510. The vapāśrapaṇīs are made of sticks of kārśmarya wood, one being straight and pointed while the other has two forks at the top.

2511. वपायां अप्यमाणायां तापवशाद्वपाया ये बिन्दवः पतन्ति ते स्तोकाः । com. on Kāt. VI. 6. 18. In each of the five verses of Ṛg. III. 21 the word 'stoka' occurs. Vide Āśv. III. 4. 1 for the verses that are to be repeated.

2512. The adhvaryu directs the maitrāvaruṇa in the words स्वाहाग्नि-भ्यः मेदस्य and the latter says होता यक्षद्वाग्निं स्वाहाज्यस्य स्वाहा मेदसः &c. (Āśv. III. 4. 3) and the hotṛ then repeats the last Āprī verse (whatever hymn is used) as the yājyā for the 11th प्रयाज.

priest to ask the hotṛ to recite the last Āprī verse as the yājyā for the 11th prayāja (which had remained to be recited). Having offered ājya (the 11th prayāja) into fire and having offered the two ājyabhāgas (according to Jai. X. 8. 5 and some others the ājyabhāgas are not offered in independent animal sacrifices nor in the animal sacrifice in soma-yāga, Āp. VII. 20. 8) he puts ājya in the juhū ladle, places a piece of gold thereon, then the whole omentum on that piece (taking it from the spits), places another golden piece on the omentum, on which he pours ājya.[2513] The adhvaryu then offers into the āhavanīya the omentum so treated to Indra and Agni (or Sūrya or Prajāpati as stated above on p. 1117). The anuvākyā and yājyā of the vapā are respectively Ṛg. I. 93. 1 and 5. According to Āśv. III. 4. 4. the *pradānas* (*yāgas*) in all paśu-bandhas are three, viz. vapā, puroḍāśa and havis. After offering vapā, the adhvaryu throws, while standing to the north, into the āhavanīya the vapāśrapaṇī spits, the one with two forks having the forks in the east and the other having its point turned to the west (according to Āp. VII. 21. 3 it is the prati-prasthātṛ who does this). The adhvaryu offers on the spits the *saṁsrāva* (the drippings). Āp. (VII. 21. 5) and some other sūtras prescribe that the fee of one bull and three milch cows or three other cows is given to the priests at this stage. The priests (six), the sacrificer and his wife go out to the cātvāla and there purify themselves by *mārjana* (purifying with drops of water) with 'idamāpaḥ pravahata,'[2514] Vāj. S. VI. 17 and Ṛg. X. 9. 8 (while Āp. VII. 21. 6 prescribes five, viz. the three 'āpo hi ṣṭhā' Ṛg. X. 9. 1–3, 'idamāpaḥ' Ṛg. I. 23. 22, 'nirmā muñcāmi' Ṛg. X. 97. 16 = Vāj. S. XII. 90). When doing this the maitrāvaruṇa lays down his staff (Āśv. III. 5. 1).

Now preparations are to be made for the paśu-puroḍāśa[2515] and the necessary utensils are placed to the east of the āhavanīya (the former āhavanīya i.e. the gārhapatya in this sacrifice) on kuśa grass by the āgnīdhra. The devatā of the puroḍāśa is the same as the devatā of the victim i. e. Indra and Agni (vide

2513. In this way the offering (omentum) becomes fivefold (पञ्चावत्त) and this is done even for those who ordinarily make an offering caturavatta. Vide Āp. VII. 20. 10–11 and Jai. X. 7. 72–73.

2514. The com. on Kāt. VI. 6. 28 expressly states that the wife also repeats the mantra (Vāj. S. VI. 17). Āśv. III. 5. 2 states that mārjana is performed with Ṛg. X. 9. 8 and 'sumitriyā na āpa' Tai. S. I. 4. 45. 2–3.

2515. पञ्चधाः पुरोडाशाः पञ्चदशपुरोडाशाः । com. on Āp. VII. 22. 1.

p. 1117 above). Jai. (XII. 1. 1–6) prescribes that the procedure (viz. prayājas) performed at the time of offering vapā is not to be repeated when the paśupuroḍāśa is offered. The adhvaryu separates the various organs (such as the heart, the tongue) from the corpse without cutting into parts each organ (according to the com. on Āp. VII. 22. 5 and 7 it is the śamitṛ who cuts up the several limbs). There is some divergence as to the limbs of the victim that are cut off and are used as avadānas and since animal sacrifices became rare or were altogether stopped in medieval times, the commentators do not explain all the words used in the ancient texts in the same way (vide Āp. VII. 22. 6, Kāt. VI. 7. 6–12 and Baud. IV. 8). According to Āp. VII. 22. 6,[2516] the limbs cut off are: the heart, the tongue, chest, the liver, the kidneys (vṛkyau, vṛkkau in Kāt.), left forefoot, the two flanks (pārśve), the right haunch, a third part (i. e. the middle one) of the entrails—these are meant for the devatās and are to be offered with the juhū ladle ; the right fore-foot, the left haunch, the thinnest third of the entrails—these are for sviṣṭakṛt ; the kloman (the right lung ?)[2517], plīhan (the spleen), purītat (pericardium ?), adhyūdhnī (a tubular vessel above the udder), vaniṣṭhu (large entrails ?), medas (fat), jāghanī[2518] (the tail). Kāt. VI.

2516. According to Kāt. VI. 7. 6 it is the foremost (or upper) joint (pūrvanaḍaka) of the left forefoot (that is taken) among the first nine. Kāt. VI. 7. 6. describes the first nine as jauhavam (to be offered with the juhū) and the next three as connected with upabhṛt ladle. The three cut into upabhṛt are called *tryaṅga* and are meant for Sviṣṭakṛt. Vide Śat. Br. III. 8. 3. 18 (S. B. E. Vol. 26 p. 205). The whole of the entrails are taken off at once and divided only at the time of cutting and putting into the juhū ladle.

2517. According to com. on Kāt. kloman is गलनाडिका, while com. on Āp. says it is a fleshy gland called 'tilaka' resembling the liver. Purītat is pericardium according to com. on Kāt. and entrails (antra) according to com. on Āp. Medas according to com. on Āp. is the membrane covering the heart and the vṛkya.

2518. Vide Jaimini III. 8. 20–23 about jāghanī and patnīsaṁyāja and com. on Kāt. VI. 7. 10 for the various meanings attributed to jāghanī. Jaimini has several sūtras on paśu. In X. 7. 1–2 he establishes that the whole animal is not one offering, but that its several limbs are separate offerings. In X. 7. 3–9 he establishes that only eleven organs (heart &c.) are fit to be offered, that the shoulders, head, anūka and sakthin are altogether prohibited ; in X. 7. 10–11 he declares that the three aṅgas, viz. the front portion of the forefoot, the middle of the entrails, and the śroṇi are offered to Sviṣṭakṛt ; in X. 7. 12–17 he deals with the adhyūdhnī given to hotṛ and vaniṣṭhu to Āgnīdhra.

7. 11 adds that kloman and the next three may be cut off or not. The medas (fat on the abdomen) is, according to Kāt., thrown on the *guda* (entrails) if the victim be thin. The tail is to be employed as an offering in the Patnīsaṁyāja, according to Kāt. and the largest part of the intestines (3rd of the whole) was to be employed as offering in *upayaj homa*. The undigested grass (inside the belly of the victim) is put in a pit dug up to the west of the śāmitra fire and to the north of the utkara and on it the blood of the victim is poured with the words 'thou art the portion of evil spirits' (Vāj. S. VI. 16). The victim's heart is held pierced on a pike (śūla) made of varaṇa wood one *aratni* long and is roasted on the śāmitra fire and all other parts of the victim except the heart are cooked in an ukhā (pot for boiling or cooking). According to com. on Āp. VII. 22. 9 this cooking is done by the śamitṛ. Jai. XII. 1. 12 prescribes that the cooking is done on the śālāmukhīya fire and not on śāmitra fire. The adhvaryu performs the operation of sprinkling butter on the juhū and upabhṛt, cuts two portions from the middle and front parts of the cooked material into the juhū, pours butter over it and offers it into fire for Indra and Agni, then cuts one portion (for Sviṣṭakṛt) into the upabhṛt, makes two pourings of butter over it and makes an offering to Agni Sviṣṭakṛt.[2519] Jai. (XII. 1. 10-11) concludes that the offering of the paśupuroḍāśa is made with the ladles used in darśapūrṇamāsa and not with the soma vessels (viz. the cups and camasas). Then a portion is cut off out of the remainder of the material from which puroḍāśa was offered and placed in a vessel called prāśitraharaṇa (which portion of the sacrificial food is eaten by the brahmā priest) and some portion is cut off as the iḍā, which is invoked with mantras and eaten by all the priests. He then thrice asks the śamitṛ whether the *havis* (the heart roasted on a pike) is ready cooked and the latter simply replies 'it is cooked'. Kāt. VI. 8. 1 prescribes that the śamitṛ should in his reply utter only the word 'śṛtam' and should not add any word like 'revered sir' (bhagavaḥ) or '*hi*'. The śamitṛ then

2519. According to Āśv. III. 5. 9 होता यक्षद्वर्हिः पुरोडाशस्य जुषतां हविर्हविरजैः is the direction of the maitrāvaruṇa to the hotṛ and Ṛg. III. 1. 23 and III. 54. 22 are the puronuvākyā and yājyā of the offering of puroḍāśa to Agni Sviṣṭakṛt (in all animal sacrifices).

takes off the heart from the pike (śūla) on which it was roasted, and keeps it in a pot (kumbhī) and pours over it pṛṣadājya (clarified butter in which sour milk is mixed) with 'sam te' (Vāj. S. VI. 18, Tai. S. I. 3. 10. 1) and ājya over the other portions of the paśu. The śamitṛ gives the hṛdaya-śūla (the pike on which the heart was roasted) to the adhvaryu who does not keep it on the bare ground nor throw it in water, nor does he touch with it himself or others (but holds it tied by a cord). He takes these (viz. the roasted heart and the cooked organs) between the yūpa and the āhavanīya fire and places them on the southern part of the altar (viz. its southern corner of the western side) over which kuśa grass is already spread. Then ājya is sprinkled over four utensils viz. juhū, upabhṛt, *vasā-homahavaṇī* (a *sruc* ladle with which the offering of *vasā* i. e. of the gravy is to be made) and the vessel in which iḍā is to be cut. Then a golden piece is placed in the juhū and the upabhṛt, which are then kept on twigs of plakṣa tree and then in the juhū and upabhṛt are cut by the pratiprasthātṛ (with the anointed edge of the knife) portions of the heart, then of the tongue and then of the chest (this order is stated in the Tai. S. VI. 3. 10) and then of the other limbs in any order (the whole of the entrails being at this stage cut in three parts). Two portions of the size of the fore-part of the thumb are cut both in the juhū (of the daivata limbs) and upabhṛt (of the limbs meant for Sviṣṭakṛt). While this is being done the adhvaryu directs the maitrāvaruṇa to repeat texts for the *havis* that is to be offered to Manotā and the maitrāvaruṇa repeats the whole hymn Ṛg. VI. 1 (in the first of which only the word Manotā occurs as an epithet of Agni, probably meaning 'thinker'). He takes the gravy in the *vasāhomahavaṇī*[2520] with 'reḍ-asi' (Vāj. S. VI. 18), pours ājya over it twice and mixes the two together with the knife. The rest of the vasā he pours in the iḍāpātra to which are

2520. Vide Sat. Br. III. 8. 3. 14 (S. B. E. vol. 26 p. 203 where Manotā is of the feminine gender) and Ait. Br. VI. 10; the latter refers to Ṛg. VI. 1. 1–13 and says Vāk, Go and Agni are the three Manotās. The hymn also is called Manotā (vide Āśv. III. 4. 6 and com.). The manotā-mantra is the same, though the animal may be offered in some sacrifices to other deities. Vide Jai. X. 4. 42.

added the chest and other boneless parts.[2521] When the yājyā for Indra-Agni is half repeated, a part of the vasā is offered by the pratiprasthātṛ sitting to the north into fire with 'ghṛtam ghṛtapāvānaḥ' (Vāj. S. VI. 19, Tai. S. I. 3. 10. 2) and with the remainder of the vasā he makes offerings in each direction with 'diśaḥ pradiśaḥ' (Vāj. S. VI. 19, Tai. S. I. 3. 10. 2). No vasā is kept for being partaken of by the priests (com. on Kāt. VI. 8. 22). Then the adhvaryu takes in the juhū a part of pṛṣadājya (mottled butter) from the pot of pṛṣadājya and offers to Vanaspati and after taking the contents of the upabhṛt into the *juhū* makes the offering to Sviṣṭakṛt (Āp. VII. 25. 14 and Kāt. VI. 8. 18–22 state that the order of these last offerings may be different). Then he touches the remaining organs and limbs of the paśu and keeps the juhū and upabhṛt in their places. Then the iḍā (to be eaten by the priests) is brought between the yūpa and the āhavanīya fire. After the iḍā is invoked the six priests and the sacrificer partake of it, but there are special portions assigned to each viz. the vaniṣṭhu is given to the āgnīdhra, the adhyūdhnī to the hotṛ and the chest to brahmā. Then they all purify themselves by mārjana. The adhvaryu then directs the āgnīdhra 'bring burning coals for *upayaj* offerings', directs the pratiprasthātṛ (called upayaṣṭṛ[2522] here) to attend to the coals; to the brahmā

2521. The whole animal is the sacrificial material (just as rice-grains are the material from which caru is prepared for offering) and *havis* is constituted by the heart and other organs of the animal. Vide com. on Kāt. VI. 8. 6 and Jai. X. 7. 1–2. The several organs and parts are taken out of the ukhā and spread over a large bamboo vessel (vaṁśa-pātrī), the last part being placed in the north. The adhvaryu performs on each of the eleven limbs (called jauhava) *prāṇadāna* (vivification) while no prāṇadāna is done for the portions to be offered to Sviṣṭakṛt. According to Āp. VII. 24. 5 only one portion is cut from the limbs meant for Sviṣṭakṛt. Several rules are laid down in Āp. VII. 24. 6–12 about the cutting of some parts. Out of the three parts of the entrails, one of medium thickness is cut in two and placed among the daivata portions, the thinnest part being for sviṣṭakṛt; the medas is cut in three parts, two being put in the two sruos and the third in the iḍāpātra. The medas is mixed in the broth of the victim's limbs. The iḍā is made from the first six out of the limbs (heart &c.) and the vaniṣṭhu is the 7th. The iḍā is increased by the addition of the limbs that have no bones viz. kloman, spleen and purītat.

2522. According to com. on Āp. VII. 26. 8 the hotṛ is the upayaṣṭṛ. According to Jai XII. 4. 8 this offering of the entrails is a saṁskāra (pratipattikarma) and when many victims are sacrificed in one rite, the entrails of all animals are offered as upayāja offerings.

priest he says 'shall I start' and also directs the āgnīdhra to place a *samidh* on the fire. The āgnīdhra brings red-hot coals from the śāmitra fire, and puts them down on the northern corner of the west side of the altar after removing the kuśas strewn thereon (in soma the coals may be optionally brought from the āgnīdhrīya fire-place and placed on hotṛ dhiṣṇya). The third and thickest part of the entrails (that has been kept aside) is cut obliquely into eleven parts, which are offered into the red-hot coals placed as above by the pratiprasthātṛ with his right hand, each with a mantra (for eleven mantras vide Vāj. S. VI. 21, Tai. S. I. 3. 11. 1), when the cry vauṣaṭ is uttered for each of the eleven anuyājas[2523] that are offered with pṛṣadājya here (Āp. VII. 26. 12). These eleven offerings of the entrails are called upayājas (additional offerings), vide Jai. XII. 4. 8. At the end of the 11th offering, the pratiprasthātṛ touches his mouth and the portion sticking to his hand is wiped on the *barhis* with the words 'adbhyastvauṣadhībhyaḥ' (Tai. S. I. 3. 11). At the end of the anuyājas, the svaru is placed in the juhū ladle and offered into fire with 'may thy smoke reach the sky, may thy flame reach heaven, fill the earth with thy ashes, svāhā!' (Vāj. S. VI. 21, Āp. VII. 27. 4). Āp. (VII. 27. 6-7) and others say the direction (praiṣa) for repeating the sūktavāka is uttered by the maitrāvaruṇa[2524] (and not by the adhvaryu). The hotṛ repeats it and the maitrāvaruṇa throws his staff into the āhavanīya fire (Āśv. III. 6. 21) and Āp. (VII. 27. 8) says that the three paridhis also are thrown into fire by means of the sruos except the dhruvā. The patnīsaṁyāja is performed with the tail of the animal, which is taken to the south of the sacrificial ground. There was a difference of opinion whether portions of the tail were offered to all the four deities of patnīsaṁyāja[2525] or to some only (vide Kāt. VI. 9. 14-20). According to Āp. (VII. 27. 10) and Kāt. (VI. 9. 15-19) only ājya offerings are made to Soma and Tvaṣṭṛ, the inside part of the tail (on which no hair grow) is cut up for the wives of the gods and the hairy part is cut up for Agni Gṛhapati. Whether

2523. The first मन्त्र is समुद्रं गच्छ स्वाहा, the remaining ten all have the words गच्छ स्वाहा with ten names of deities in the objective case, viz. अन्तरिक्षं, देवं सवितारं, मित्रावरुणौ, अहोरात्रे, छन्दांसि, द्यावापृथिवी, यज्ञं, सोमं, विष्णुं नमः, अग्निं वैश्वानरम्.

2524. The प्रैष of मैत्रावरुण is 'अग्निमद्य होतारमवृणीतायं यजमानः ..... होतरसि भद्रवाच्याय प्रेषितो मानुषः सूक्तवाकाय सूक्तां.शु3हि.'

2525. For the patnīsaṁyājas, vide above p. 1076.

the sacrificer is *caturavattin* or *pañcāvattin*, all four or five portions are cut off from the tail and there is no under layer (upastaraṇa) and upper layer (abhighāraṇa) of ājya in this case. According to Kāt. VI. 9. 20 portions of the tail are offered to all devatās of patnīsaṁyāja. Vide Jai. XII. 4. 10-16 and III. 3. 20-23 on this. Iḍā is cut from the hairless portion of the tail for hotṛ and from the hairy portion for the āgnīdhra and the rest of the tail is handed over to the sacrificer's wife who passes it on to the adhvaryu or some brāhmaṇa. The śamitṛ had so far partaken of nothing, but he is now given the shoulder of the victim, but if he be not a brāhmaṇa he gives it to a brāhmaṇa. They offer three samiṣṭayajus,[2526] throw the barhis into fire, approach a pond (or reservoir of water) taking with them the spit (śūla) on which the heart was roasted. Āp. VII. 27. 15 says that they carry[2527] the śūla in such a way as not to touch it. The adhvaryu enters in the midst of the water and conceals the spit into the bottom underneath with its tip downwards with the mantra 'thou art sorrow; give him sorrow who hateth us and whom we hate' (Tai. S. I. 3. 11. 1-2 and also with Vāj. S. VI. 22 according to Kāt. VI. 10. 3), at the same time thinking of his enemy (without taking his name). If he does not enter water, then he may pour some water to the east of the yūpa and should conceal the spit at the place where the dry space and wet space meet. Āśv. (III. 6. 25-26) prescribes that all the priests, the sacrificer and the wife do not touch the śūla after it is thrust into the earth, do not look at it, and return, each taking one after another three fuel-sticks with a mantra for each and put them on fire with a mantra for each stick one after another, after doing homage to the āhavanīya with Ṛg. I. 23. 23. Then they all perform mārjana near the concealed śūla or the cātvāla with 'sumitriyā na āpa oṣadhayaḥ' (Tai. S. I. 4. 45. 2) or according to Kāt. VI. 10. 5 they touch water with 'dhāmno ..... sumitriyā na āpaḥ' (Vāj. S. VI. 22). Then they pray Varuṇa to free them from sin in the words 'dhāmno dhāmno rājan' (Tai. S. I. 3. 11. 2), and 'ud-uttamam' (Tai. S. I. 5. 11. 3). They lay *samidhs* on the āhavanīya as in Varuṇapraghāsa. The animal sacrifice ends with the saṁsthājapa as in darśapūrṇamāsa.

Kāmyāḥ Paśavaḥ:—Just as several kāmya iṣṭis were prescribed for securing various desired objects so various animal

---

2526. For samiṣṭayajus, vide p. 1082.

2527. The priests, the sacrificer and his wife go to a pond.

sacrifices are found in the texts prescribed for the attainment of such objects as prosperity, villages, eloquence &c. Tai. S. (II. 1. 1-10) refers to several such sacrifices. For example, Tai. S. II. 1. 1. 1 says 'one who is desirous of prosperity should offer a white paśu to Vāyu; one who is desirous of a village should sacrifice an animal to Vāyu Niyutvat; one who having command over speech or words is not able to speak eloquently should offer an ewe to Sarasvatī' (II. 1. 2. 6). The Tai. Br. (II. 8. 1-9) contains the anuvākyās and yājyās of the vapā, puroḍāśa and havis offerings of many animal sacrifices. Āp. (XIX. 16-17) deals with kāmya animal sacrifices. Āśv. III. 7 gives the anuvākyās and yājyās of a group sacrifice (Aikādaśina) of eleven animals[2528] to Agni, Sarasvatī, Soma, Pūṣan, Bṛhaspati, Viśve Devas, Indra, Maruts, Indra-Agni, Savitṛ, and Varuṇa; while Āśv. III. 8. 1 sets out the anuvākyās and yājyās of eighteen animal sacrifices in addition.

These follow the procedure of the nirūḍhapaśubandha sacrifice and are all passed over here.

2528. The Aikādaśina animal sacrifice is a special form of the animal sacrifice, for which Āp. XIV. 5-7 may be consulted. It follows the procedure of savanīya paśu (Jai. VIII. 1. 14). In this there may be thirteen yūpas for eleven paśus or only one yūpa for all paśus. Eleven yūpas are the ordinary ones, the 12th is called upaśaya, the whole of which is chiselled, but is not implanted in a pit like the others; it lies near the yūpa to the south; the 13th is called pātnīvata and it is not higher than the navel when imbedded in the ground. The yūpas are so arranged as to rise on the south side i. e. the southern-most is the tallest of all. The paśu tied to the pātnīvata is meant for Tvaṣṭṛ, but it is let off and ājya is offered. Jai. (II. 3. 19) concludes that when the Vedic text says 'after carrying fire round the pātnīvata victim, it is let off', only a special matter is laid down concerning the pātnīvata victim. He further says (in IX. 4. 56-60) that the ājya offered is not a substitute for the victim, but is a separate rite in which the deity is the same. Vide Kāt. VIII. 8. 27 ff. If there be more yūpas than one, then the saṁskāras from añjana to parivyāṇa (surrounding with a girdle) are all to be done on one, then on another and so on. Vide Jai. V. 2. 7-9.

CHAPTER XXXIII

AGNIṢṬOMA[2529]

Sacrifices are often divided for convenience into iṣṭi, paśu and soma. According to Gaut. VIII. 21 and Lāṭ. Śr. V. 4. 24 there are seven forms of soma sacrifices, viz. Agniṣṭoma, Atyagniṣṭoma, Ukthya, Ṣoḍaśin, Vājapeya, Atirātra and Aptoryāma. The Agniṣṭoma is the model (prakṛti) of all soma sacrifices. The Agniṣṭoma is a one day (aikāhika or ekāha) sacrifice and it is an integral part of the Jyotiṣṭoma so much so that the two are often identified. Soma sacrifices are classified into those that are finished in one day (and so called ekāha), those that are celebrated for more than one day up to twelve (and so called ahīna), those that extend over more than twelve days (and are called Sattra). The dvādaśāha is both a sattra and an ahīna.[2530] The Jyotiṣṭoma occupies generally five days and the chief rites performed on these days are: (1) choosing of priests, madhuparka, dīkṣaṇīyeṣṭi, consecration of the sacrificer (dīkṣā); (2nd day) Prāyaṇīyā iṣṭi (i. e. opening iṣṭi), purchase of soma, ātitheyeṣṭi (iṣṭi offering hospitality to soma), Pravargya,[2531] Upasad (homage twice a day in the morning and evening); (3rd day) Pravargya and Upasad twice again; (4th day) Pravargya and Upasad, Agniprāṇayana, Agnīṣomapraṇayana, havirdhāna-praṇayana, animal sacrifice; (5th day called *sutya* or *savanīya*) pressing of soma, offering it and drinking it in the morning, mid-day and evening, the udayanīyā (concluding iṣṭi), avabhṛtha (final purificatory bath). In the following pages only a skeleton outline of

2531. एका दीक्षा तिस्र उपसदः पञ्चमी प्रकृतिः । तिस्रो वा दीक्षास्तिस्र उपसदः सप्तमी प्रकृतिः । चतस्रो वा दीक्षास्तिस्र उपसदोऽष्टमी प्रकृतिः । आप. X. 15. 1; also आश्व. IV. 2. 17 एका तिस्रो वा दीक्षास्तिस्र उपसदः सुत्यनहश्चतस्रः । Vide Jai. VI. 5. 28–29 where Śabara and Kumārila seem to disagree.

Agniṣṭoma is presented, derived from the principal Śrauta sūtras. Jai. in VI. 2. 31 declares that the performance of Jyotiṣṭoma is obligatory on all members of the three higher varṇas, just as upanayana is, since the word brāhmaṇa in Tai. S. VI. 3. 10. 5 (a brāhmaṇa when born comes charged with three debts) is only illustrative. Agniṣṭoma is so called because in it Agni is praised or because the last chant (*stotra*) is addressed to Agni.[2532] It is to be performed in *vasanta* (spring) every year and on the New Moon or Full Moon day (Āp. X. 2. 2, 5 and 8, Kāt. VII. 1. 4 and Sat. VII. 1 p. 562). The general view expressed in Jai. IV. 3. 37 was that one should perform a soma sacrifice after having performed darśapūrṇamāsa, cāturmāsyas and paśu sacrifice, but some held that it could be performed even before darśa-pūrṇamāsa, but after agnyādhāna (Āśv. IV. 1. 1-2 and Sat. VII. 1. p. 556). Jai. (V. 4. 5-9) also states this as the view of some. Jaimini, however, declares that all modifications of the Agniṣṭoma must be performed after one has begun to perform darśapūrṇamāsa (V. 4. 26). The intending sacrificer sends a person called *somapravāka* (inviter to officiate at a soma sacrifice) to invite brāhmaṇas who are thorough masters of the Veda, neither too young nor too old, with clear and loud voices and not deficient in any limb (Tāṇḍya Br. I. 1. 1, Drāhyāyaṇa Śr. I. 1. 10, Āp. X. 1. 1). He invites the principal four or all the 16 (or 17, including 'sadasya') priests (*ṛtvij*), who make inquiries whether some other person has refused the office and whether the fee will be excellent. Those portions of the choosing mantras are uttered inaudibly wherein the priests are invoked as if they were divinities and the portion *asau mānuṣaḥ* or *tvam mānuṣaḥ* is uttered loudly.[2533] When the priests come *madhuparka* is offered to them. The sacrificer goes to the king (of the country) to ask for a sacrificial ground (*devayajana*), even if he has one already, with the formula 'god Varuṇa, give me devayajana'.[2534] This is a mere

2532. स वा एषोऽग्निष्टोमस्तं यदस्तुवंस्तस्मादग्निस्तोमस्तमग्निस्तोमं सन्तमग्निष्टोम इत्याचक्षते परोक्षमिवा इव हि देवाः। ऐ. ब्रा. 14. 5; अग्निष्टोमः प्रथमयज्ञः। आप. form, but even the king has to make a similar request (in his case) to the hotṛ and other priests. The requirements of a proper devayajana have already been given above (p. 988n). In the western portion of the devayajana from which all roots are uprooted, a pavilion[2535] (*vimita*, a four-cornered maṇḍapa) is erected, the central ridge and the covering bamboos of which run from west to east, which has doors (two cubits wide) in all directions and which slightly inclines towards the east, or a rectangular house (śālā) may be built, twenty *aratnis* long and ten aratnis wide (Kāt. VII. 1. 19-25, Āp. X. 5. 1-5, Baud. VI. 1). A shed for cooking the *vrata* food is erected to the south of the pavilion and another to the west for the patnī (wife of the sacrificer). The sacrificer while in his house implants his gārhapatya and āhavanīya fires on the araṇis with a mantra 'ayam te yoniḥ' (Vāj. S. III. 14., Tai. S. I. 5. 2), comes to the devayajana, enters (along with the priests and his wife) the maṇḍapa by the eastern door with the araṇis in his hand, and touches the central post of the pavilion. The things that are required (sambhārāḥ)[2536] are also brought to the pavilion. In the pavilion a vedi is prepared and fires are established after being produced by attrition. Offerings of ājya with the sambhārayajus formulas (Tai. Ā. III. 8), with the *sapta-hotṛ* formulas (Tai. Ā. III. 5) are made and also a yūpāhuti is offered. Outside the pavilion to its north the sacrificer gets the hair on the head, arm-pits and on the face cut by a barber in a tent covered with mats, pares the nails of his hands first (of the right hand first from the small finger) and then of the feet. Jai. (III. 8. 3-11) establishes that it is the sacrificer (and not the adhvaryu) who pares his nails, cuts his hair, brushes his teeth, subsists on milk. Sat. VII. 1. p. 587 states that the nails of the left hand are pared first and then of the right hand. He brushes his teeth with an udumbara twig, then he bathes in a reservoir of water or in a kuṇḍa after putting a golden piece in it with mantras, performs ācamana and drinks water as a consecration.

2535. The pavilion is called prāgvaṁśa or prācīnavaṁśa and according to some it is 16 prakramas long (from west to east) and 12 prakramas wide (from south to north). It may have four or five (one in the north-east) doors and apertures in the four quarters. Vide Āp. X. 5. 5.

2536. Baud. VI. 1 enumerates thirteen requisites (sambhāras) that the yajamāna brings with him and thirteen more which are placed round about the wife.

All these from paring nails (called apsu-dīkṣā)[2537] except the cutting of hair are also undergone by the wife at the instance of the pratiprasthātṛ priest (but without mantras). The adhvaryu hands over a fine silken fresh garment to the sacrificer which the latter wears. In the afternoon in the prāgvaṁśa he partakes of food (rice)[2538] mixed with ghee and sprinkled over with curds and honey or whatever is liked by him. The wife also does the same. He takes up butter (navanīta) with two bunches of darbha grass and smears himself thrice with them beginning from the face. He applies collyrium with a darbha blade twice to the right eye and once to the left or thrice to both. The adhvaryu performs the purification (*pavana*) of the sacrificer outside the prāgvaṁśa to its north by three bunches of seven darbhas each rubbed twice over his body above the navel and once below the navel with mantras and the sacrificer also mutters mantras. The wife also does all this (smearing the body with butter, applying añjana and purification) without mantras at the instance of the pratiprasthātṛ. The sacrificer enters the pavilion by the eastern door and the wife by the western and occupy their respective seats. Then follows dīkṣaṇīyā iṣṭi[2539] which is so called because it effects a saṁskāra in the man intending to sacrifice and because after it is performed he is entitled to be called 'dīkṣita'. The conclusion in Jai. V. 3. 29-31 is that a man becomes a dīkṣita at the end of the dīkṣaṇīyā iṣṭi and has thenceforward to observe the rules laid down for a dīkṣita and that one does not become a dīkṣita by being given the staff or the girdle &c. At first six āhutis called dīkṣāhutis are offered, four with ājya taken from the dhruvā into the sruva, 5th with the sruc and the sixth is called pūrṇāhuti and is offered with sruc (in which twelve ladlings with sruva have been made). These six āhutis are called 'audgrahaṇa' (Āp. X. 8. 7 and com. on Sat. VII. 1. p. 591) or 'audgrabhaṇa' (Kāt. VII. 3. 16). In the dīkṣaṇīyā iṣṭi a cake

---

2537. For the word 'apsudīkṣā', vide Kāt. VII. 2. 7. According to Baud. the hair of the wife also is cut (VI. 3) The com. on Sat. VII. 1. p. 587 makes the interesting remark that according to the sūtrakāra the adhvaryu himself pares the sacrificer's nails, but that as in his time the priests had no instruction in such matters and as people had come to look with disfavour on such a practice, the barber pares the nails.

2538. According to some the meal takes place before the cutting of hair (vide Āp. X. 6. 10).

2539. दीक्षामपोजना इडिर्दीक्षणीया। com. on आश्व. IV. 2. 1; शबर on Jai. V. 3. 31 says 'दीक्षणीयेति वाक्यशेषो समारख्या भवति'.

prepared on eleven potsherds is offered to Agni-Viṣṇu (or boiled rice with clarified butter). Some offered another offering of boiled rice to Aditi. Several matters that occur in the model iṣṭi (such as observing a vrata, the girding up of the wife, cutting off a portion for yajamāna, phalīkaraṇahoma, cooking anvāhārya rice as fee for the priests, samiṣṭayajus) are omitted in this iṣṭi (Baud. VI. 3 mentions ten matters that are omitted, Āp. X. 4. 12, Sat. VII. 1. p. 575). According to Jai. VIII. 1. 3–10 the several actions done in the model iṣṭi are not to be extended to somayāga unless the vedic texts expressly say so, and Jai. X. 1. 4 establishes that there is no ārambhaṇīyā iṣṭi in dīkṣaṇīyā and other iṣṭis of somayāga. The dīkṣaṇīyā ends with the patnīsaṁyājas and the eating of the 2nd iḍā (Sat. VII. 1. p. 578). Certain rules are laid down about the pitch of the voice in the several rites. According to Āp. X. 4. 9 everything is said inaudibly till the agnīṣomīya rite. According to Kāt. (VII. 2. 31–32) the voice reaches the highest pitch in the dīkṣaṇīyā iṣṭi, the mantras in the prāyaṇīyā and ātithyā iṣṭis are in a lower tone than in the dīkṣaṇīyā and the upasad mantras are repeated inaudibly. The dīkṣā (consecration) of the sacrificer and his wife proceeds as follows.[2540] To the south of the āhavanīya two black antelope hides (or one if two are not available) with the neck portion to the east are spread on the altar with the hairy part outside. He (the priest) sits to the west of the antelope skin bending his right knee; the sacrificer touches the white and black spots (or the line that joins them, Kāt. VII. 3. 23), then creeps upon the hide with his right knee bent and sits down on the western side of the hide. The sacrificer ties round his waist above the garment worn by him a girdle of three strands made of hemp and muñja grass, covers his right shoulder with a fresh garment and folds round his head a piece of cloth, he is given the horn of a black antelope about a span in length with three or five folds (from left to right), which he ties to the hem of his garment (or in the corner of his upper garment). He touches his forehead above the right brow with the horn, draws a line with it from west to east outside the vedi, and if he wants at any time to scratch

2540. All these several actions in the dīkṣā are done to the accompaniment of mantras as in Vāj. IV. 9 ff. and Tai. S., but they are not referred to for reasons of space. Elsewhere also mantras have been often omitted.

his body he does so with that horn. Jai. (XI. 4. 48–49) declares that the mantra is to be repeated only once even if the yajamāna feels the desire to scratch several parts of his body at the same time. The adhvaryu gives a staff of udumbara (or of some other sacrificial tree) which is as high as the sacrificer's mouth (or chin), which he raises up and keeps on his right shoulder. While the adhvaryu is doing these things for the yajamāna, the pratiprasthātṛ does the same things for the wife (without mantras) except that she has the yoktra girt round her upper garment, that her head is covered by a jāla (a net or fillet) of wool and she has a piece of some sacrificial tree one span long for scratching her body. The sacrificer and adhvaryu repeat long passages wherein the word dīkṣā occurs frequently (Āp. X. 10. 6 and X. 11. 1), and the adhvaryu makes him repeat the sambhāra-yajus mantras (Tai. Ā. III. 8). The sacrificer then contracts the fingers of both hands one after another with mantras (first the small fingers of both hands, then the ring-fingers of both hands and so on) and ultimately he clinches his fists. He observes silence. Some priest (like the pratiprasthātṛ) other than the adhvaryu inaudibly declares (to the gods) thrice and loudly proclaims to the world thrice 'this brāhmaṇa has undergone the consecration, son of so and so, grandson of so and so, great-grandson of so and so, the son of such and such a woman, grandson of such and such a woman and great-grandson of such and such a woman'. Even when the sacrificer was a kṣatriya or vaiśya, the announcement was still to be 'this brāhmaṇa[2541] &c.,' since after dīkṣā a person was supposed to be reborn and to be a child of holy prayer and to have become pure enough for receiving spiritual influences. The Śat. Br. III. 3. 3. 12 states 'he who is consecrated becomes an embryo'. Dīkṣā takes place in the afternoon (Āp. X. 12. 1) and the sacrificer observes silence till the appearance of stars in the evening. The adhvaryu directs the milking of two cows to supply milk for

---

2541. अथैनं त्रिरुपांशावेदयति त्रिरुच्चैरदीक्षिष्टायं ब्राह्मणोऽसावस्य पुत्रोऽमुष्य पौत्रोऽमुष्य नप्तामुष्याः पुत्रोऽमुष्याः पौत्रोऽमुष्या नप्तेति। ब्राह्मणो वा एष जायते यो दीक्षते। तस्माद्राजन्यवैश्यावपि ब्राह्मण इत्यावेदयति। आप. X. 11. 5–6; compare कात्या. VII. 4. 11–12, Baud. VI. 5, Sat. VII. 1. p. 597. The reference by name will be like the following 'अदीक्षिष्टायं ब्राह्मणो गोपीनाथशर्मा वासिष्ठो गणेशशर्मणः पुत्रः केशवशर्मणः पौत्रः कृष्णशर्मणो नप्ता यमुनादायाः पुत्रो लक्ष्मीदायाः पौत्रो रुक्मिणीदाया नप्तेति।' com. on Sat. or one may say 'यमुनादेव्याः पुत्रः' &c.

the sacrificer and his wife who are to subsist on the milk of the two cows during the period of the sacrifice. This vrata (observance) of subsisting on milk is declared by Jai. (IV. 3. 8–9) to be *kratvartha* (an obligatory rule) and not puruṣārtha (recommendatory). Vide also Jai. VI. 8. 28. Some allowed rice or barley to be cooked in that milk. The two cows were milked in two separate vessels, one of which (meant for the sacrificer) was heated on the gārhapatya and the other (for the wife) was heated on the dakṣiṇa fire. A kṣatriya or vaiśya sacrificer could take gruel or āmikṣā respectively or all persons could subsist on milk or on rice cooked in milk or on fruits (if enough milk was not available) or if he had a desire for curds, he could use curds or use fried barley grains or he could take ghee. He was to take his food at midday or midnight long after ordinary men have taken their meals and he took his food from a pot which was not earthenware and the wife from a copper pot. Persons who were not dīkṣitas were not to see him when taking his milk or other vrata diet. The wife was also to take her milk or other diet in her own place. Vide Āp. X. 16 and Kāt. VII. 4. 19–34 for details. The dīkṣita and his wife (to some extent) have to observe certain rules (till the final bath) and people also had to observe some rules with reference to him. He has to keep awake on the night of the dīkṣā (Jai. XII. 1. 17), on the night when soma is purchased and on the night before the pressing day. He is not[2542] to speak with women or śūdras nor should a śūdra follow him. If he is obliged to speak to a śūdra he should do so by employing a messenger belonging to the three higher varṇas. He may speak to or bless another, but he was not to bow to another, even if the latter was his ācārya or father-in-law or a king. No one was to touch him or to address the dīkṣita by his name (but use only such terms of address as 'bhoḥ', 'dīkṣita' &c.). The sacrificer was not to keep aside the antelope horn till the fees were distributed. He could laugh covering his face with his hand and should not show his teeth. He was not ordinarily to answer calls of nature by day, but if he has to do so, he must do so in a shaded spot. He has to observe complete celibacy. While he is consecrated for the sacrifice, he does not go out by the

---

2542. Āp. X. 12–15, Baud. VI. 6 give long lists of the observances for a dīkṣita out of which a few are set out above.

western door, nor does he perform the daily agnihotra, nor vaiśvadeva nor offering of bali nor perform the darśapūrṇamāsa iṣṭi (Jai. XII. 1. 19–23), but he may employ another to do all these. He must speak the truth and address people in a pure and conciliatory style adding the word 'canasita' when addressing a brāhmaṇa and the word 'vicakṣaṇa' when addressing a kṣatriya or vaiśya (vide Ait. Br. I. 6). He must always be in the pavilion at sunrise and sunset; he sleeps on the ground to the south of the āhavanīya with his head to the east and sleeps on his right side and does not turn his back to the fire. He always sits on antelope hide and never leaves it and his staff (except when answering calls of nature). No one is to eat the food given by a dīkṣita till the agniṣomīya victim or its omentum is offered. It is recommended by all the sūtras that dīkṣā (consecration) should not be finished in one day, but it should extend over 12 days or a month or a year or till from being fat he becomes lean (vide Āp. X. 14. 8, X. 15. 4, Āśv. IV. 2. 13–15). Every day (while the dīṣkā lasts) the sacrificer observes silence from the afternoon till the appearance of stars and in the morning from before sunrise till the sun goes up. The dīkṣita is allowed to go himself or to send agents called (saṃhāra) [2543] to collect money and materials necessary for the sacrifice. He has to observe many rules on his journey (vide Āp. X. 19. 6–16).

After the day (or days of dīkṣā), the next day the first rite is the prāyaṇīyā [2544] (opening) iṣṭi. In this iṣṭi *caru* (rice) cooked in milk is offered to Aditi (Jai. IX. 4. 32–40) and four offerings of ājya to four more deities viz. Pathyā Svasti, Agni, Soma and Savitṛ in the four directions (viz. east, south, west and north) respectively. Caru is offered to Aditi in the centre. Agni Sviṣṭakṛt is the sixth deity. According to Āśv. IV. 3. 3 no ājyabhāgas are offered in this iṣṭi, but according to Kāt. VII. 5. 15 they are offered. The priests that officiate in this iṣṭi should as far as possible officiate in the Udayanīyā (concluding) iṣṭi. The rites of this iṣṭi end with the first Saṃyu, [2545] but there is no patnī-saṃyāja and no samiṣṭayajus.

2543. तस्माद्दीक्षितो द्वादशाहं भूतिं वन्वीत। यज्ञमेव तत्संभरतीति विज्ञायते। पूषा सन्येति सनीहारान् संशास्ति। आप. X. 18. 4–5, vide कात्या. VII. 5. 3–4.

2544. प्रतिपद्यन्तेऽनया यज्ञं दीक्षिता इति प्रायणीया। com. on Āp. X. 21. 1.

2545. Vide Jaimini X. 7. 38–42 for the propositions that the prāyaṇīyā ends with the first saṃyu and the ātithyā with the first iḍā.

The puronuvākyā verses in this iṣṭi become the yājyā verses in the udayanīyā iṣṭi and *vice versa* (vide Āśv. IV. 3. 2 for them). He keeps aside in a well-known place in the *prāgvaṁśa* the cooking pot (from which the leavings of rice sticking to the bottom are not removed according to some), the mekṣaṇa and the *barhis* (except the prastara) for use in the udayanīyā. Jai. (XI. 2. 66–68) refers to this use of niṣkāsa in the udayanīyā iṣṭi.

Then comes the purchase of soma (referred to in the Brāhmaṇas and Sūtras as 'rājan'). Soma is purchased from a brāhmaṇa of the Kutsa gotra or from a śūdra (Āp. X. 20. 12 allows it to be purchased from any brāhmaṇa).[2546] Jai. III. 7. 31 states that the vendor of soma is someone other than the priests. The seller of soma is asked to free it from the weeds that may be mixed up with it; the adhvaryu turns his back towards soma when this (weeding) is being done and neither the adhvaryu nor his assistants nor the sacrificer nor the latter's sons should do the weeding out nor does anyone of these see it being done (Sat. VII. 1, p. 609). The soma plant is placed on the southern part of the red hide of a bull by the pratiprasthātṛ spread on the place where uparavas (four sounding holes) will be made later on and the seller of soma sits on the northern part of the hide. A water jar is placed in front of soma. The doors of the sacrificial hall are shut, the adhvaryu pours into the juhū four times ājya from the dhruvā ladle used in the prāyaṇīyā (or five times for those who are *pañcāvattins*), ties a piece of gold by a blade out of the darbhas spread on the altar, puts down into the juhū the blade with the gold and makes an offering into the āhavanīya of that ājya (this offering is called hiraṇyavatī āhuti); he takes out the piece of gold, casts the blade (with which it was tied) on the vedi and ties the gold piece with a thread. The doors of the hall are opened and the adhvaryu and yajamāna come out. To the south of the eastern door of the sacrificial hall stands a heifer (called *somakrayaṇī*), that is one, two or three

---

2546. राजानं क्रीणन्ति। आश्व. IV.4.1; कौत्साद्राजानं क्रीणीयादन्यस्माद्वा ब्राह्मणादित्युक्त्वाह्याप्यब्राह्मणादिति। आप. X. 20. 12; सोमविक्रयिणं प्रपादयति कौत्सं शूद्रं वा। सत्याषाढ VII. 1. p. 606, where the com. remarks 'स च ब्राह्मणः कौत्सः कुत्सगोत्रः कुत्सितकर्मा वा। ... शूद्रः सच्छूद्रो गोपो नापितो वा। ... शाखान्तरे क्षत्रियसोमविक्रयिणौ कुलालावित्याम्नानात्कुलालोपि पक्षे। निषादस्थकारवच्चावर्ध्यमध्ययनमेतेषाम्। अयं च शूद्रो विभाभावे द्रष्टव्यः।'

years[2547] old, is tawny, has yellowish brown eyes or is red (but has no red eyes), has not given birth to a calf, has no deficiency and is not tied (vide Āp. VI. 20. 2-5 and Sat. VII. 2, p. 623 for further details). The cow is not held by her ear or her foot is not tied by a rope (she may be held by the neck, if necessary). She is invoked by the adhvaryu (who is sitting) with a mantra 'cidasi' (Vāj. S. IV. 19, Tai. S. I. 2. 4. 1). The cow is led towards the north, the adhvaryu and yajamāna follow her. After she goes six steps, at her 7th step, the brahmā and yajamāna sit down to the cow's right, behind her sits the adhvaryu and the neṣṭṛ priest to her north. They keep the golden piece on the spot where the 7th step is put by her (which is first covered with his folded hands by the adhvaryu) and make an offering of it to Aditi (adityai idam na mama). Taking the sphya the adhvaryu draws lines round the 7th foot-print (once with a mantra, twice silently) from right to left (Āp. X. 23. 3 adds that lines are drawn also with the antelope horn of the sacrificer); the dust on the lines is gathered with the hand and put into a pot (sthālī) and handed over to the yajamāna who passes it on to his wife who invokes the cow with a mantra. He washes his hand (that has the piece of gold in it) on the 7th foot-print (of the cow), pours some water on the dust collected in a pot, divides the dust into three parts, one of which is placed on the cold ashes of the gārhapatya, the 2nd on the cold ashes of the āhavanīya and the third is given to the wife who places it in the house. The adhvaryu ties the piece of gold to his small finger (on which it must be at the time of āpyāyana and pressing of soma and at the time of taking the aṁśu and adābhya cups). The adhvaryu directs the sacrificer's servant to bring a piece of cloth for tying soma, another for covering it all round and a turban; the first is carried by the adhvaryu or yajamāna and the rest by the pratiprasthātṛ. They go with their faces to the east towards the soma which is in a four-wheeled cart

---

2547. अरुणयैकहायन्या पिङ्गाक्ष्या गवा सोमं क्रीणाति। quoted by Śabara on Jaimini III. 1. 12, who engages in a lengthy discussion about the purport of this passage. Vide तै. सं. VI 1. 6. 7 'एकहायन्या क्रीणाति। ... अरुणया पिङ्गाक्ष्या क्रीणात्येतद्वै सोमस्य रूपं स्वयैवैनं देवतया क्रीणाति।' where other requirements are set out. The idea was that the cow (the price of Soma) was to resemble the soma beverage in colour as much as possible. Vide also Jai. IV. 1. 25. The cow was called somakrayaṇī as soma was purchased with it; सोमः क्रीयते यया गवा सा सोमक्रयणी says com. on Sat. VII. 2 p. 623.

covered all round and above with mats &c. Detailed rules follow how soma stalks (*aṁśu*) are selected and taken with the hand, tied in the cloth and covered with the turban (Āp. X. 24. 7–14, Kāt. VII. 7. 12–21). The yajamāna pays homage to soma and waits upon Aditi (Āp. X. 25. 1). The adhvaryu hands over the soma (so tied and turbaned) to the vendor of soma[2548] and there ensues a dialogue (which is a mock drama) between the vendor and the adhvaryu wherein they higgle for the price of the soma (five times, beginning with a kalā or $\frac{1}{16}$th or the thigh of the cow and ending with the whole cow). Gold piece is also offered to the vendor of soma, who says 'soma is sold to you but offer me some other animals' and the adhvaryu replies 'yours are the gold piece, clothes, goats, another cow, a cow and bull and three other cows.' Adhvaryu comes with the soma in his right hand and pushes aside the garment from the sacrificer's right thigh and places the soma tied in a piece of cloth on the thigh of the sacrificer, who mutters the text 'śvāna bhrājāṅghāre[2549] &c.' (Vāj. VI. 27, Tai. S. I. 2. 7. 1). Ultimately the gold piece and somakrayaṇī cow are brought back, another is offered in exchange and the former is sent to the cowpen belonging to the sacrificer. Āp. (X. 27. 8) and Sat. (VII. 2. p. 644) say that according to some the vendor is always struck with sticks and clods of earth (i. e. there is a show of seizing the soma from him and driving him away with sticks, vide Kāt. VII. 8. 27 also). The sacrificer's staff is handed over to the maitrāvaruṇa priest (vide Jai. IV. 2. 16–18) and the sacrificer holds in both his hands the bundle of soma placed on his thigh, gets up, places his hand on his head and thereon the bundle of soma, approaches a cart (śakaṭa) kept to the south (of the place

---

2548. The Śat. Br. III. 3. 3 (S. B. E. vol. 26. pp. 69–70) contains the higgling at length. Vide also Āp. X. 25. 1–16, Kāt. VII. 8. 1–21. Sat. (VII. 2. pp. 636–643) sets out what things are offered in exchange of soma and the dialogue between the adhvaryu and the vendor of soma. There were several options as to the things offered in exchange for soma. They were ten viz. seven cows, a gold piece, clothes, a she-goat; some said they were 13 (ten cows plus the other three) or only four (one cow and the other three).

2549. Śvāna, Bhrāja and others are supposed to be Gandharvas, guardians of the cow and other things offered as the price of soma. Vide Śat. Br. III. 3. 3. 11 (S. B. E. vol. 26 p. 72). Jaimini (XII. 4. 5–7) states that ten things are offered as the price of soma and that soma is not purchased by offering these separately, but by offering them in one lot (*samuccaya*). Baud. VI. 14 enumerates them in one place.

where soma was bought) that is washed, is covered with a mat or the like and has all its parts complete. The adhvaryu spreads on the box of the cart a black antelope-skin with the neck portion to the east and hairy side upwards, places the soma thereon, covers it with another piece of cloth, ties a skin to a staff as a flag. Two oxen are yoked to the cart, the Subrahmaṇya priest (an assistant to the udgātṛ) standing on the ground between the two shafts of the cart drives the oxen holding two palāśa branches in his hand (as whips). The adhvaryu touches the cart and directs the hotṛ to repeat a verse for soma that is bought (or being taken round) and directs the subrahmaṇya priest to pronounce the Subrahmaṇyā invocation. The hotṛ stands three steps behind the cart between the two wheel-tracks, and while keeping his heels firm and unmoved throws up to the south with a verse (tvam viprah, Āśv. IV. 4. 2) clods (or dust) thrice with the forepart of his foot, then utters standing 'him bhūrbhuvaḥ svarom ' and a verse 'bhadrād abhi śreyaḥ prehi' (Āśv. IV. 4. 2). While following the moving cart between wheel-tracks he recites Ṛg. I. 91. 9–11, X. 71. 10, IV. 53. 7 (half) and stops. When the cart stops the hotṛ approaches the soma from the south side of the cart, and stands facing it. He touches the soma or the cloth covering it with two verses (called paridhānīyā viz. Ṛg. I. 91. 19 and VIII. 42. 3). Then the sacrificer touches the soma and comes to the sacrificial hall (śālā) along with all the priests. The subrahmaṇya priest recites the famous subrahmaṇyā litany[2550] (which is an

2550. The formula is : 'सुब्रह्मण्यो3म्। सुब्रह्मण्यो3म्। सुब्रह्मण्यो3म्। इन्द्रागच्छ हरिव आगच्छ मेधातिथेर्मेष वृषणश्वस्य मेने गौरावस्कन्दिन्नहल्यायै जार कौशिक ब्राह्मण गौतम-ब्रुवाण एतावद्वदे सुत्यां यावद्वदे स्यात् । देवा ब्रह्माण आगच्छतागच्छतागच्छत ।' लाट्यायन I. 3. 1 ff. and द्राह्यायण I. 3. 3–5. Vide Śat. Br. III. 4. 17–20 for the formula and explanation, Ait. Br. 26. 3 (explains why this nigada is called subrahmaṇyā in the feminine gender), Tai. Br. I. 12. 3–4. This litany is required on the 2nd and following days of the Agniṣṭoma and almost on all days of other Soma sacrifices. On the 2nd day, after the word गौतमब्रुवाण, the subrahmaṇya says 'स्यहे सुत्याम्', on the 3rd day ह्यहे सुत्याम्, on the 4th day श्वः सुत्याम् and on the last day (soma-pressing day) अद्य सुत्याम्. Vide Jai. XI. 4. 27–29 about the indication of the day of soma in the Subrahmaṇyā in Dvādaśāha. As to the last sentence 'devā brahmāṇa ' there were divergent views. Some employed only आगच्छ मघवन्, others employed the word 'आगच्छ' before देवा ब्रह्माण. Śabara on Jaimini XI. 4. 27 shows that he accepted 'सुत्यामागच्छ मघवन् ' as the text of the call. Vide Drāhyāyaṇa I. 3. 10–12 for the views. Pāṇini (I. 2. 37–38)

(Continued on next page)

invitation to Indra). According to Lāṭ. I. 3. 1 this litany is recited after the performance of ātithyā iṣṭi, but according to Āp. and Kāt. it is recited before Ātithyā. At the time of each upasad the subrahmaṇyā litany is recited (Sat. VII. 4. p. 676). According to Lāṭ. the subrahmaṇya stands inside the spot where the altar would be prepared and recites the litany and the yajamāna touches him and the wife touches the yajamāna. The formula is 'O Subrahmaṇya (Indra who protects excellent prayers), come, O Indra! O Lord of *hari* (bay) steeds! Ram of Medhātithi! Menā (wife or daughter?) of Vṛṣaṇaśva! Attacking buffalo! Lover of Ahalyā! O Kauśika! O brāhmaṇa! Thou who callest thyself Gautama!'. Then he should state 'in so

---

(*Continued from last page*)

gives rules about the accents of the Subrahmaṇyā. According to Lāṭ. and Drāhyāyaṇa I. 3. 17 the subrahmaṇyā litanies after the upasads are finished are recited near the utkara outside the altar. The priest takes breath at each of the first two words (सुब्रह्मण्यो3म्), then again after मेने and after ब्रवाण. This invocation is repeated thrice (Āp. X. 28. 6, Lāṭ. I. 3. 10). On the Agnīṣomīya day (day before pressing) before the reference to sutyā, the words 'asau yajate' (this, so and so, offers sacrifice) occur and the names (nākṣatra, gotra and vyāvahārika names) of the sacrificer are mentioned with the names of his ancestors (son of so and so, grandson of so and so, great-grandson of so and so) and then the names of his living descendants according to seniority by birth, both males and females, in the words 'father of such and such a son &c.'. Manu IX. 126 refers to this last. In Ṛg. I. 51. 1 and I. 52. 1 Indra has the appellation 'meṣa' and there is a legend that Indra became a ram and drank the soma of Medhātithi Kāṇva. In Ṛg. VIII. 2. 40 it is said that Indra in the form of a ram carried off Medhyātithi Kāṇva. In Ṛg. I. 51. 13 Indra is spoken of as born of the Menā of Vṛṣaṇaśva (menābhavo vṛṣaṇaśvasya) and Sāyaṇa quotes the Tāṇḍya that Menā was the daughter of Vṛṣaṇaśva. Indra is addressed as Kauśika in Ṛg. I. 10. 11. The legend of Indra's love for Ahalyā, the wife of Gautama, is well-known. Vide Rāmāyaṇa I. 48 and Viṣṇupurāṇa I. 9. 21. Jaimini (in IX. 1. 42–44) states that when the Subrahmaṇyā litany is uttered in Agniṣṭut and other rites and when for Indra the word Agni is substituted, there is no substitution of other adjectives in place of Harivat and others. Śabara, however, notes that yājñikas do substitute other words viz. they says 'अग्न आगच्छ रोहिताश्च बृहद्भानो धूमकेतो जातवेदो विचर्षण इति।'. Kumārilabhaṭṭa in his Tantravārtika (p. 208 on Jai. I 3. 7) explains, like a modern comparative mythologist, that Indra in this legend means the Sun and Ahalyā means the night एवं समस्ततेजाः परमैश्वर्यनिमित्तेन्द्रशब्दवाच्यः सवितैवाहनि लीयमानतया रात्रेरहल्याशब्दवाच्यायाः क्षयात्मकजरणहेतुत्वाज्जीर्यत्यस्मादनेनेति व्युत्पत्तेरित्यादित्य एवाहल्याजार उच्यते। Vide Haug's tr. of Ait. Br. pp. 383–84, S. B. E. vol. 26, p. 81–82.

many days, to the soma feast.' Then he adds 'Ye Gods and brāhmaṇas! come hither!' While the Subrahmaṇyā is being recited the sacrificer mutters certain prayers (Āp. X. 28. 5). Near the eastern door of the prāgvaṁśa the pratiprasthātṛ stands holding by the ear a goat (as a present to king Soma) that has white and dark spots of hair or red and dark ones, that is hornless, fat and bearded. The cart is stopped to the east of the prāgvaṁśa with its shafts to the east or north, the yoke-pins are taken out, the oxen are released from the yoke (or only one ox, the northern one, is released). While this is being done preparations are made for ātithyeṣṭi to receive hospitably as a guest king Soma. The adhvaryu and three other priests make ready a stool or couch (āsandī) of udumbara wood, having feet as high as the navel, with a board one *aratni* square plaited with cords of muñja grass, on which a black antelope skin is spread. On this the soma is placed after being taken out of the cart. Soma thus seated on the couch is brought inside the śālā by the eastern door, is taken to the west of the āhavanīya and established to the south of the āhavanīya to the east of the seat of the brahmā priest. Then follows the work of ātithyeṣṭi. The wife quickly takes out the materials for a cake on nine potsherds for Viṣṇu (who is the principal deity in this iṣṭi). In all iṣṭis (in Agniṣṭoma) after the dīkṣaṇīyā up to udayanīyā (the concluding iṣṭi) there is no agnyanvādhāna, no taking up of vrata, no subsisting on fast food, no gifts and no choosing of brahmā. There are only five prayāja offerings and no anuyājas.[2551] Fire is produced by attrition, and the iṣṭi comes to an end after the first iḍā. For details see Āp. X. 30 and Kāt. VIII. 1. After the iḍā is eaten there is tānūnaptra, a solemn convenant made by the sacrificer and the priests pledging themselves in the name of Tanūnapāt (the mighty blowing wind, that is the witness of all living beings) not to injure each other. They make this[2552] covenant by touching simultaneously clarified butter taken in a vessel of kāṁsya or in a camasa from the ājya in the dhruvā ladle used in the ātithyā and placed on the southern hip (south corner of west side) of the altar. That clarified butter used for this covenant is shaken by the adhvaryu and is kept by him in a vessel (which is not earthen-ware) in a well-known spot

2551. Vide Jaimini X. 7. 38–39 and 40 for the proposition that there are no anuyāja offerings in ātithyeṣṭi and that it ends with iḍā.

2552. अनाधृष्टमसीति यजमानसदृशा ऋत्विजस्तानूनप्त्रं समवदधति । आप. XI. 1. 2. Vide also Sat. VII. 3. p. 660.

and is given mixed with the fast milk (vrata-dugdha) to the sacrificer in the afternoon (for eating). Then follows the avāntara-dīkṣā (intermediate consecration) of the sacrificer, in which he offers a fuel-stick in the āhavanīya fire (with 'agne vratapās' Vāj. S. V. 6), the wife also silently offers a fuel-stick in gārhapatya; he touches water heated in a vessel called madantī, clenches his fists more closely, tightens his girdle and drinks only hot milk. All priests also touch the madantī water and together with the sacrificer strengthen[2552] the soma stalks with their hands holding golden pieces with the mantra 'aṁśur-aṁśu' (Vāj. S. V. 7, Tai. S. I. 2. 11. 1). Then they place their right hands one after another on the prastara which is on the southern end of the vedi with the palms turned upwards and cover the palms with their left palms turned downwards (this action being called nihnava, according to Āp. XI. 1. 12 and Kāt. VIII. 2. 9). Nihnava[2554] is a kind of salutation to Heaven and Earth.

Then follows Pravargya and after that Upasad or the Upasad may precede Pravargya (Āp. XI. 2. 5, Sat. VII. 4. p. 662). Both are done twice, in the morning and then in the afternoon, for at least three days (2nd, 3rd and 4th) if soma is to be pressed on the 5th, but if soma is to be pressed on the 7th or any later day (from the beginning) then there will be more Pravargyas and Upasads.[2555] The same barhis, prastara and paridhis employed in the ātithyā are used in the upasads and in the rite of Agnīṣomīya paśu.

Pravargya is separately dealt with in most sūtras, as in Āp. XV. 5-12, Kāt. XXVI, Baud. IX. 6 ff. It was supposed to provide the sacrificer with a new celestial body[2556]. It was an

---

2553. This is called 'āpyāyana' (strengthening or increasing), which according to com. on Āp. XI. 1. 11 and Sat. VII. 3. 661 means 'touching with a mantra' or according to others 'sprinkling with water'. Vāj. S. V. 7. and Tai. S. I. 2. 11. 1 read अंशुरंशुष्टे देव सोमाप्यायतामिन्द्रायैकधनविदे, in which the word 'āpyāyatām' occurs.

2554. निह्नवो नाम नमस्कारः द्यावापृथिवीभ्यामेव तन्नमस्कुर्यादिति दर्शनात्। तेन पाणिनिधानं नमस्काराञ्जलिरूपेण कर्तव्यम्। com. on आश्व. IV. 5. 7.

independent rite by itself (apūrva) and was not the modification of any other rite (vide com. on Kāt. XXVI. 2. 5). It appears from Āp. XIII. 4. 3-5 that the Pravargya rite was not necessarily performed in every Agniṣṭoma. The gharma is styled Samrāṭ in Vāj. S. 39. 5, is identified with the sun, is said to be the head of Yajña and the hot milk was divine life and light. Vide Ait. Br. IV. 1, Śat. Br. XIV. 1-4, Tai. Ār. IV. 1-42, V. 1-12; and Haug's translation of Ait. Br. pp. 41-43 (note), S. B. E vol. 44, Intro. XLVI—L. An earthernware vessel, one span in height, is made, the middle of which is contracted (like a mortar), which has a rim or belt (mekhalā) about three fingers lower down from the top which is a large and deep bowl and has at the end a hole or spout for pouring in liquid. This is called mahāvīra and it resembles three pots placed on one another. There are two other earthenware vessels (which are called mahāvīra). There are also two milking bowls (pinvana) and two round plates called rauhiṇa for baking two cakes. All the three are heated with the fire of horse dung kindled at the gārhapatya (or dakṣiṇa according to some) fire, baked in a square pit like ordinary pans and then taken out. The two puroḍāśas baked on the round rauhiṇas are offered into fire in the morning and evening to Day and Night respectively. The vessel called mahāvīra is placed on a raised clay platform and fire is kindled round it, and when it is hot ghee is poured into it. The principal mahāvīra is the first vessel and the other two are not to have the different processes performed on them (they are *apracaraṇīya*, Āp. XV. 6. 11). These other two are kept covered with cloth on the big āsandī to the north of the stool on which soma is placed and to the south of the āhavanīya (Kāt. XXVI. 2. 17). To the boiling ghee in the principal vessel are added the milk of a cow and of a she-goat having a male young one. The hot milk thus mixed and contained in the mahāvīra is called '*gharma*', of which offerings are made to Aśvins, Vāyu, Indra (with Vasus and Rudras and Ādityas), to Savitṛ, Bṛhaspati, Yama. The sacrificer drinks (the priests only smell) the remainder by the upayamanī. The hotṛ repeats several mantras at various stages from the time the mahāvīra is placed on the raised platform up to the time when the hot milk is offered and the priest called prastotṛ chants sāmans. The whole of this ceremony is called Pravargya. A few interesting matters out of the numerous details of this rite are indicated here. All the doors of the sacrificial hall are screened with cloth, the wife's shed also is so screened and she is to sit in her

shed (and not to see the mahāvīra,[2557] but at a later stage she looks at it and repeats a mantra, Kāt. XXVI. 4. 13). Whatever wooden pātras are required in this rite they are[2558] made of udumbara and the cords are made of muñja grass. The paridhis were thirteen and of vikaṅkata and the fuel-sticks for boiling the gharma were to be of the same wood or of khadira, palāśa, udumbara and a few other trees. There were three black antelope skins to be used as fans and two rukmas (plates or bars) of gold and silver, two *vedas* (bunches of kuśa), one of which has its ends cut off. Special rules are laid down about the clay out of which the mahāvīra vessel is to be made (vide Āp. XV. 1. 9 ff.) viz.[2559] it was to be dug from a pit to the east of the āhavanīya fire; with that earth was to be mixed the dust dug by a wild boar and the clay from an ant-hill, pūtīka (a plant), the hair of a goat and of a black antelope skin; on it an ajā (she-goat) was to be milked. The clay so mixed is to be carried only by men of the higher castes and hot water is to be poured on the clay only from madantī vessels[2560] in order to mix the various ingredients. No śūdra nor woman is to look at all this. Two vessels for milking the cow and the she-goat are made of this very clay. The Mahāvīra is to be lifted up only with two wooden pieces like tongs (called pariśāsa or śapha) and never otherwise. The āsandī (stool or chair) on which the mahāvīra is to be placed is bigger than the one for king Soma (thereby bringing out its super-eminence as saṁrāṭ) and it is placed north of the seat for Soma. Two kharas (mounds covered with

2557. The pravargya was an awful and mystic or recondite affair and so the wife was not to see it. 'उग्रो ह्यय प्रवर्ग्यः' com. on Āp. XV. 5. 4.

2558. For the pātras and things required vide Kāt. XXVI. 1. 2 and 2. 10 and Āp. XV. 5. 7-20. Vide also Śat. Br. XIV. 1. 2 and com. on Kāt. XXVI. 1. 1.

2559. The Śat. Br. XIV. 1. 1. 10-11 explains by a legend the names gharma, pravargya, mahāvīra and saṁrāṭ. तद् (विष्णोः शिरः) घृक्किंति पपात। तत्पतित्वासावादित्योऽभवद्यतेरः प्राङेव प्रावृज्यत तथद् घृक्कित्यपतत्तस्माद्घर्मोऽथ यत्प्रावृज्यत तस्मात्प्रवर्ग्यः। ते देवा अब्रुवन्। महान्वत नो वीरोऽपादीति तस्मान्महावीरस्तस्य यो रसो व्यक्षरत्तं पाणिभिः संमृजुस्तस्मात् सम्राट्। śatapatha XIV. 1. 1. 10-11. The Śat. Br. further on (XIV. 1. 1. 18ff) says that Dadhyaṅ Ātharvaṇa knew the doctrine of Pravargya (called Madhu) and imparted it to Aśvins and refers to Ṛg. I. 116. 12.

2560. In the Pravargya wherever water is to be used it is hot water and taken from the madantī vessel. According to Kāt. VIII. 1. 11 wherever after the avāntaradīkṣā water is required it is to be taken from the madantī (and it is to be hot) till the time when the sacrificer loosens his clenched fists.

sand) are made to the north of the gārhapatya and of the āhavanīya and a third mound (called ucchiṣṭa khara) is made in the north-east of the prāgvaṁśa, having a channel outside (the śālā) for wiping off the leavings. A silver blade or plate of one hundred *raktikās* (berries for weighing) in weight is inserted in the loose sand of the western mound, sheaths of reed grass kindled at the gārhapatya are thrown on the mound and the mahāvīra vessel is placed thereon. Then pieces of vikaṅkata wood (paridhis) are laid round the Mahāvīra by the adhvaryu and pratiprasthātṛ, in all 13, the last being placed by the adhvaryu. Then a gold bar or plate (representing the Sun) is placed on the Mahāvīra pot. The adhvaryu fans the fire thrice by means of the three fans made of black antelope skin from right to left and then thrice from left to right. When a blaze is produced the gold plate is taken away. According to the Ait. Br. IV. 2 and Āśv. IV. 6. 3 the hotṛ recites several verses (21 in number) when the empty Mahāvīra is being heated (they constitute the *pūrva paṭala*) and several operations such as anointing it are being performed. The Ait. Br. IV. 5 further prescribes 21 verses for recitation by the hotṛ when the cow is being milked (they are called *uttara paṭala*). Vide Āśv. IV. 7. 4 also.

According to Śat. Br. XIV. 2. 2. 44-46 and Jai. III. 3. 32-33 the Pravargya was not to be performed at a sacrificer's first soma sacrifice and it was not to be performed for anyone and everyone, but only for him who was well-known or was a complete master of the veda. On the day previous to the soma pressing day, the two performances of pravargya and upasad are combined and gone through in the morning and on that day takes place the 'udvāsana' (setting out or orderly discharge) of the pravargya either by laying out the pravargya apparatus in the form of a human body or by throwing them in the midst of water or in a river island &c. They (the priests and yajamāna) set out as a general rule (Āp. XV. 16. 6) all the implements on the uttaravedi, the principal mahāvīra vessel as the head is placed close to the front side of the navel of the uttaravedi, the two other mahāvīras are placed to its east, the bunch of kuśa grass (called veda) is placed on top of the mahāvīra to represent śikhā (top-knot of hair), the two lifting sticks (śaphas) are placed on two sides as arms and so on. Vide Śat. Br. XIV. 3. 1. 16, Āp. XV. 15, Kāt. 26.7.14 ff. According to Āp. XV. 11. 10-13 the yajamāna and some of the priests viz. hotṛ, adhvaryu, brahmā, pratiprasthātṛ and āgnīdhra drink the remainder of the milk (gharma) from the upayamanī (a large wooden spoon).

When a person performs pravargya he should not for a year partake of meat, should not approach a śūdra woman for sexual intercourse, should not drink water from an earthen pot and should not allow a śūdra to eat the leavings of his food (Āp. XV. 12. 13). According to Śat. Br. XIV. 3. 1. 32 ff the gold plate goes to the brahmā, the gharma to adhvaryu, while according to Āp. XV. 13. 1 the sacrificer gives the gold and silver plates to adhvaryu, the cow to hotṛ, the she-goat to āgnīdhra and a pregnant cow to brahmā.

Upasad[2561] is an iṣṭi. The several processes such as agnyanvādhāna found in the darśa-pūrṇamāsa are not performed in this iṣṭi, but a start is made from the carrying forward of the praṇītā water. Offerings of clarified butter are made in this iṣṭi to Agni and Soma with the juhū ladle and to Viṣṇu with the juhū after pouring therein the ājya taken in the upabhṛt ladle; that is, the principal deities are Agni, Soma and Viṣṇu and that besides the āhutis of ājya to these there are the upasad āhutis with the mantra 'yā te' &c. Vide the com. on Kāt. VIII. 2. 35 for all details. All actions done after the ātithyā iṣṭi such as the strengthening of soma, the ninhava, the recital of the subrahmaṇyā litany take place in each upasad (performed in the morning and afternoon for three or more days). There are no ājyabhāgas, no prayājas nor anuyājas and no offering to Agni Sviṣṭakṛt (Āśv. IV. 8. 8.). The three verses, Ṛg. VII.15.1–3, are repeated thrice each, so as to make nine kindling verses (sāmidhenīs) in the morning and Ṛg. II. 6. 1–3 (repeated thrice) are sāmidhenīs in the evening, Upasad offering is made by the sruva ladle with the mantra 'yā te agne ayaḥśayā tanūr'[2562] (Vāj. S. V. 8) on the first day, on the 2nd day with the same verse but reciting 'rajaḥśayā' for 'ayaḥśayā' and on the 3rd day with 'hariśayā' for 'ayaḥśayā'.

2561. According to the com. on Sat. VII. 4. p. 665 the word is derived from 'sad' (to shatter) with 'upa' and means 'that by which the allied cities became shattered'; 'उप उपगतानि संगतानि एतादृशानि पुराणि विशीर्णानि भवन्ति यया सोपसत्। उप उपगताः स्वेन सह सङ्गता अपि भ्रातृव्या विशीर्णा भवन्ति यजमानस्य यया सा। ..... तेषामसुराणां तिस्रः पुर आसन्नित्यत्रोपसदूविधयिष्याख्यायिका प्रसिद्धा।'. Vide Kauṣ. Br. VIII. 8 for the legend.

2562. या ते अग्ने अयःशया तनूर्वर्षिष्ठा गह्वरेष्ठा। उग्रं वचोऽपावधीस्वेषं वचोऽपावधीत्स्वाहा। वाज. सं. V. 8. The Tai. S. I. 2. 11. 2 reads 'या ते अग्नेऽयाशया रजाशया हराशया. Vide Jai. II. 1. 48 for the proposition that the very words तनूर्वर्षिष्ठा &c. are to be connected with the words रजाशया and हराशया (and no other ordinary words are to be coined for completing the sentence). Vide Jai. V. 3. 3 for another detail.

The upasad mantras show that they have reference to the sieges of iron, silver and gold castles. How these mantras came to be inserted here it is difficult to say. Vide Śat. Br. III. 4. 4. 3-4 (for the cities and their siege). Āp. XI. 4. 8 adds that if a hostile king gives battle or attacks the capital of a kṣatriya performing a soma sacrifice, on the first upasad a piece of iron should be placed in the sruva ladle and offered along with the clarified butter, on the 2nd upasad a piece of silver and on the 3rd a piece of gold should be so placed. The yājyās of the morning upasad become the anuvākyās in the afternoon and *vice versa*. Jaimini (X. 7. 43-46) establishes that Upasads are special iṣṭis (apūrva) and only those parts that are expressly stated in the texts are to be performed in them and not others that occur in the model iṣṭi. The procedure of upasad is like upāṁśuyāja (Śat. VII. 4. p. 666).

On the 2nd day of the upasads after the morning pravargya and upasad rites are performed the great vedi for the soma sacrifice is measured and made (Kāt. VIII. 3. 6, Sat. VII. 4. pp. 679-685 and Āp. XI. 4. 11). In front of the āhavanīya to the east a peg (śaṅku) is driven in the ground at a distance of 6 prakramas (Baud. VI. 22) or according to Kāt. VIII. 3. 7 at the distance of 3 prakramas to the east from the eastern post (i. e. the middle of the door) of the ordinary agni-śālā a peg is driven which is called *antaḥpātya* (intermediate) or *śālāmukhīya* (according to Baud.); 36 prakramas to the east from this peg another peg is driven, which is called *yūpāvaṭīya* (i. e. connected with the hole for yūpa). A cord is stretched between these two pegs and is called pṛṣṭhyā (spine). On both the south and north sides of the first peg (i. e. of antaḥpātya) pegs are driven at the distance of 15 prakramas and on the south and north sides of the 2nd peg two pegs are driven at a distance of 12 prakramas each. In this way the west side called śroṇi (hips) of the mahāvedi is 30 prakramas[2563] and the

2563. For prakrama vide p. 989 n. 2239 above. Instead of prakramas, the measurement may be only with the padas (footsteps of the sacrificer). Vide com. on Āp. XI. 4. 13. According to com. on Kāt. VIII. 3. 14 a pada is equal to two prakramas. Kāt. VIII. 3. 10 optionally allows 16½ prakramas on the north and south of the first peg i. e. the śroṇi (west side of the mahāvedi) will then be 33 prakramas (instead of 30). Even so early as the Tai. S. these measurements of the mahāvedi are given: 'त्रिंशत्पदानि पश्चात्तिरश्ची भवति षट्त्रिंशत्पाची चतुर्विंशतिः पुरस्तात्तिरश्ची' तै. सं. (VI. 2. 4. 5).

east side called *aṁsa* (shoulders) is 24 prakramas and the length of the mahāvedi is 36 prakramas. A rope is passed all round the mahāvedi. Almost all the saṁskāras that are performed for the vedi in darśapūrṇamāsa are performed for the great vedi in somayāga (Sat. VII. 4. p. 685). An uttaravedi (a quadrangular platform raised high) is measured on the mahāvedi in its eastern part. This uttaravedi is on its west side (śroṇi) ten padas (i. e. five on the south and five on the north of the pṛṣṭhyā) and on its east side (aṁsa) eight padas (some hold that the uttaravedi is 10 padas on all sides i. e. a perfect square). The cātvāla pit (i. e. its southern shoulder or the middle point of the southern side) is 1½ padas (or one prakrama, according to Sat. p. 687) to the north from the northern shoulder of the mahāvedi towards the west, while the utkara near which the āgnīdhra sits is 12 prakramas to the west of the cātvāla[2564] (i. e. its western side or its middle) and one prakrama to the north of the line of the vedi. The utkara is about two padas in extent (com. on Sat. VII. 4. p. 687). The way to and from the vedi is between the utkara and the cātvāla pit. The vedi is prepared (i. e. its earth is loosened, clods are broken, roots taken out) with the sphya, a rib (of some holy animal) or an axe. For the nābhi vide at p. 1113 above. That day the vedi remains covered with the branches of udumbara or plakṣa tree.

On the next day both the pravargyas and upasads of the morning and afternoon are gone through in the morning. After the *udvāsana* of the pravargya, the bringing forward of the fire (agnipraṇayana) from the āhavanīya to the uttaravedi takes place. The fire placed on the nābhi becomes the āhavanīya for all actions in the soma sacrifice and the original āhavanīya becomes the gārhapatya (Āp. XI. 5. 9–10). Kuśa grass, the fuel and vedi are thrice sprinkled with water and the vedi is covered with that grass with the points of the blades to the east. Two carts, washed with water, with their yokes tightly bound but with no yoke-pins, are brought round from the agniśālā and placed in the mahāvedi, one about one cubit (aratni) to the south of the pṛṣṭhyā line and the other to the north about one cubit. The cart to the south (called dakṣiṇa-havirdhāna) is larger than the one to the north and the shafts of both are towards the east. These carts are called havirdhāna because

2564. For the cātvāla vide p. 984 above.

the soma plant (which is the *havis* in somayāga) is to be placed thereon.[2565] The south and north carts are respectively in charge of the adhvaryu and pratiprasthātṛ. They are then covered with grass mats or thatch made of split bamboos. A maṇḍapa (called havirdhāna-maṇḍapa) is erected by having six posts in front of the two carts and six behind them and having two bamboos on the posts from south to north. He suspends from the front part of the maṇḍapa a garland-like sheaf of twisted grass (rarāṭī). Various saṁskāras are performed on the axles of the carts by the wife and pratiprasthātṛ respectively. Detailed rules about covering the carts and similar matters are passed over (Āp. XI. 7-8, Kāt. VIII. 4). The havirdhāna maṇḍapa is higher in the east than in the west and has two doors one to the east and the other to the west (Sat. VII. 4. p. 701). No one is to take his meals or even to eat iḍā inside the havirdhāna maṇḍapa. The adhvaryu digs four round holes (in two rows, two in each row) below the fore part of the shafts of the southern cart (but not far from the axle), each hole being about one span in diameter, being at a distance of one span from each and all being connected by cross-way subterranean passages. They are one arm deep. They are dug in such an order that the hole to the north-east is the last (i. e. first south-east one is dug, then north-west one is dug, then south-west and then north-east or first north-west one, then south-east, then south-west and lastly north-east). On these holes are spread kuśa blades over which two wooden boards (adhiṣavaṇa-phalaka) are placed over which is spread the red skin of a bull (adhiṣavaṇa-carma), on which soma juice is extracted by means of four stones. These holes add to the noise of the stones by the sound reverberating through them and they are therefore called *uparava*.[2566] Jai. (XI. 4. 52-53) states that the mantra 'rakṣo-haṇo' is to be repeated at each time when a hole is dug and not only once for all holes. The adhvaryu and the sacrificer

2565. हविः सोमो धार्यतेऽनयोरिति हविर्धाने अनसी। com. on कात्या. VIII.3.21.

2566. उपरवा नाम कूपकाः। तेषां खोपर्यधिषवणफलके निधीयेते तयोरुपर्यधिषवणचर्म तत्र सोमोभिषूयते। तस्मिन्नाहवनिर्हन्यमाने वादित्रोद्भवस्तुविरास्ते कूपा गम्भीरत्वपरवन्तीति उपरवा इत्यभिधीयन्ते। com. on Kāt. VIII. 4. 28; उप उपरिष्टात् ग्राव्णां एवः शब्दो येषु ते। com. on Sat. VII. 6 p. 703. Vide Kāt. VIII. 4. 28–VIII. 5. 24 and Āp. XI. 11. 1–XI. 12. 6 for detailed rules about the sounding holes (uparavas).

insert their right hands in the holes (the adhvaryu inserting his hand in the south-east hole and the sacrificer in the north-west and then a second time the adhvaryu inserts his hand in the south-west hole and the sacrificer in the north-east) and touch each other's hands and adhvaryu asks 'sacrificer! what is there?;' the sacrificer replies 'welfare (or happiness)' and the adhvaryu in a low voice says 'may that belong to us both.' This is done twice (Kāt. VIII. 5. 14-21). At the second time the yajamāna asks 'adhvaryu! what is there?', the adhvaryu replies 'welfare' and the yajamāna says 'let it be mine.' The uparavas are sprinkled with water beginning from the south-east one and ending with the north-east one with a mantra ('rakṣohaṇo &c.' Vāj. S. V. 25, Tai. S. I. 3. 2). Then the rest of the prokṣaṇī water is poured into them, kuśas are spread over their bottoms as in the hole of the yūpa (described above), a golden piece is placed thereon and offering of ājya is made. To the east of the uparavas or of the adhiṣavaṇa-carma or of the upastambhana[2567] a four-cornered mound (khara) is made for keeping the soma vessels on with the earth (dug up from the uparavas) that is sprinkled with water and mixed with sand. In front of this mound sufficient space is left to move about in the havirdhāna maṇḍapa. To the west of the utkara at a distance of six prakramas (which comes to about the middle of the north side of the great altar) is prepared the shed for āgnīdhra, which is half inside and half outside the great vedi, which has four posts and the beams of which run from west to east, which has a door to the south and is covered on all sides with mats. This shed is so made that its west side would be a continuation of the end of the western side of the havirdhāna maṇḍapa and this shed is a square having sides of five aratnis each (com. on Kāt. VIII. 6. 13). The *sadas* is measured at a distance of three prakramas from the western side of the great vedi to its east and has its length from south to north. The width of the *sadas* is nine aratnis (or half of its length) and its length (from south to north) 27 aratnis or as much as would be necessary for allowing room to all the priests, their dhiṣṇyas (seats) and the prasarpakas (assistants and spectators). In the midst of the sadas a post of udumbara is fixed which is of the height of the sacrificer above its pit and which is placed at a distance of one prakrama to the south of the pṛṣṭhyā. All saṁskāras that

2567. Upastambhana is a prop made of two upright staffs held together by a rope on which the front portion of a cart might rest.

are made on the yūpa and its pit are made in the case of this post except those referring to *śakala* (vide p. 1115 above). The udumbara post has an ear-like protuberance towards the east when it is fixed in the pit. On that protuberance a gold piece is offered with the juhū and ājya is poured on in such a way that some of it will trickle to the ground. This audumbarī is thicker than any post of the sadas. The posts on the borders of the sadas are as high as the navel of the yajamāna towards its sides, but in the middle they are as high as the audumbarī post. On the posts of the sadas beams are placed running from south to north and west to east. The middle of one third of this is covered with three mats that have their ends to the north, and then to the south and north of the middle portion three mats (on each side) are placed in such a way that their ends are turned towards the audumbarī post. The sadas is covered with nine mats in all that are well sewn together. The sadas is surrounded by screens and it has two doors to the east and west (just as the havirdhāna pavilion has). Some prepare the sadas first and then the uparavas or *vice versa* (Āp. XI. 10. 19). The doors of the prāgvaṁśa, the sadas and havirdhāna are so arranged (opposite each other) that a person sitting in one of these can see into all. Then eight dhiṣṇyas (seats) are to be prepared. The first is made in the āgnīdhra shed in its middle in such a manner that between it and the north side of the great vedi some space will be left for moving about. Six more dhiṣṇyas are to be made in the *sadas*. The earth for all these dhiṣṇyas is taken from the cātvāla pit. The six seats are made in the eastern portion of the sadas leaving between them and the eastern side of the sadas sufficient space to move about. The earth is spread on the seats by the adhvaryu who faces the north when preparing all the seats (except two) and who is touched by the sacrificer with the sphya. Over the earth sand or gravel is spread on all the seats. Out of the six seats the adhvaryu facing the west makes the seat for the hotṛ to the north of the pṛṣṭhyā line but touching it about one prakrama from the eastern door of the sadas (or on the pṛṣṭhyā line itself, according to Āp. XI. 14. 4). Then four more seats are made to the north of the seat of the hotṛ in order for brāhmaṇāccha̱ṁsin, potṛ, neṣṭṛ and acchāvāka respectively, each of which is at the same distance from the next and the seat of the acchāvāka is (four aṅgulas) larger than those of the rest. The seats are either square or round (according to Sat VII. 7. p. 723) and of 18 aṅgulas in diameter

or on each side, and at the distance of one cubit or 18 aṅgulas from each other (com. on Kāt. VIII. 6. 22). To the south of the hotṛ's dhiṣṇya, the adhvaryu with his face to the north prepares at a distance of $4\frac{1}{2}$ aratnis from the hotṛ seat the seat for maitrāvaruṇa (or praśāstṛ), which seat is also to the south-east of the audumbarī post. The seat of maitrāvaruṇa is prepared immediately after hotṛ's seat. These seven priests viz. āgnīdhra to maitrāvaruṇa are called the 'seven hotṛs' in soma-yāga according to Tai. Br. II. 3. 6 and Sāyaṇa thereon, but Āśv. I. 2. 26 seems to be opposed to this. Outside the sadas just opposite the āgnīdhra shed to the south is prepared the mārjālīya [2568] shed which is half inside the great vedi and half outside to the south and in the midst there is the mārjālīya seat made by the adhvaryu facing the south. The mārjālīya shed has a door facing the north. When all these several sheds and seats are got ready the adhvaryu and spectators have to enter and leave the great vedi by a route between the cātvāla pit and the utkara or between the cātvāla and the āgnīdhra shed and according to some on the day on which soma is pressed spectators may move about anywhere (Āp. XI. 13. 10-11).

On the uparavas slender kuśas with tips to the east or north are spread and over them are kept two boards (of udumbara or palāśa or kāṛśmarya wood) called adhiṣavaṇa-phalaka [2568a] between which there is a space of two aṅgulas (towards the west) which are one aratni long, are washed with water, their

---

2568. The mārjālīya is so called because the sacrificial vessels are cleansed there. मृज्यन्ते शुद्धानि क्रियन्ते पात्राणि यत्र तन्मार्जालीयम्। com. on सत्या. VII. 7. p. 726; शुल्बसूरसीति मार्जालीयं बहिःसदसं दक्षिणार्धे वेदेः सममाग्नीध्रीयेण यथा दक्षिणेनान्तर्वेदि संचरो भवति।

2568a. According to com. on Kāt. VIII. 5. 25 the boards are of Varaṇa wood. They are so called because 'अधि उपरि अभिषूयते सोमो ययोस्ते अधिषवणफलके' com. on Kāt. VIII. 5. 25. The hide according to com. on Kāt. VIII. 5. 26 is of a bull and it relies on Ṛg. X. 94. 9 'अंशुं दुहन्तो अध्यासते गवि' for support. According to Āp. XII. 2. 14 the stones are four, according to Kāt. VIII. 5. 28 they are five. The fifth stone, according to Āp. XII. 2. 15, is called upara, it is very broad and on it soma stalks are to be crushed and round it the four stones (called grāvan) are placed, the grāvans being one span long and big and so tapering as to allow easy beating of soma stalks.

eastern face being curved like the board of a wheel and the western face being straight. In modern practice the boards are not curved on the east, but are straight. The wood is dry and well planed. In sacrifices in which soma is pressed on more days than one the boards are grooved and made to fit in each other and pierced with a nail. The boards are made firm by driving two pegs through them in front, two behind and one each to the north and south (so that they will not recede). Vide Baud. VI. 28. The space of two fingers between the two is filled with the dust dug out from the uparavas. One board is placed on the two southern uparavas and the other on the two northern ones. On the two boards is placed a hide (called adhiṣavaṇa-carma), which is red and cut up all round to fit in with the boards, with the neck portion to the east and the hairy portion up. On the hide are placed four stones (grāvan) for pressing soma juice. The adhvaryu then issues directions to spread barhis over the great vedi (except the uttaravedi, the khara, uparavas and dhiṣṇyas, Sat. VII. 7. p. 727) and for making the sacrificer take only one-fourth of the fast milk on which he is to subsist (according to Kāt. VIII. 6. 30, half of the milk). Then begins the procedure of the sacrifice of an animal to Agni and Soma (jointly). This is on the same lines as the nirūḍha-paśubandha which has already been described. The various actions such as paristaraṇa, placing the sacrificial pātras, prokṣaṇa are gone through. One more ladle called pracaraṇī made of vikaṇṭaka wood and resembling a juhū is used in addition (Āp. XI. 16. 6). The pratiprasthātṛ (or neṣṭṛ according to Sat. VII. 8, p. 736) brings the wife from her usual place (the patnīśālā). The sacrificer's near relatives who always share the same roof are called. The yajamāna touches the adhvaryu, the wife touches the sacrificer, the sons and brothers of the sacrificer touch the wife. They are all covered with a fresh piece of cloth and the adhvaryu offers with the pracaraṇī offerings of ājya called Vaisarjina[2569] to Soma (Kāt. VIII. 7. 1, Āp. XI. 16. 15). Then comes the carrying forward (praṇayana) of Agni and Soma. Fire is kindled on the āhavanīya and is carried to the uttaravedi. Numerous utensils and vessels are taken to the great vedi beyond the sadas for use in the animal sacrifice and in the pressing of soma next

---

2569. According to the Sat. Br. III. 6. 3. 2 the Vaisarjina offerings are so called because by them he sets free all (from the root 'sṛj' with 'vi').

day and kept in proper places.[2570] Fire is established in the āgnīdhra dhiṣṇya. The soma stalks are taken to the havirdhāna maṇḍapa and placed in the southern cart (havirdhāna) on a black antelope skin. The sacrificer consigns the soma to the care of gods with a mantra 'God Savitṛ! here is thy soma' (Vāj. S. V. 39, Tai. S. I. 3. 4. 2). Then the yajamāna gives up the intermediate dīkṣā after offering into the āhavanīya a samidh with the mantra 'Agne vratapate' (Tai. S. I. 2. 11. 1, Vāj. S. V. 40) i. e. he loosens his girdle and his fists (that so far had been clenched), gives up the vow of silence (to be observed at both sandhyās) and his fast food and he hands over his staff to maitrāvaruṇa (Āp. XI. 18. 6). He may on the next day (soma pressing day) partake of soma and the leavings of sacrificial food. Hereafter he may be addressed by name and food prepared in his house may be taken by others (Kāt. VIII. 7. 22). Then the sacrifice of the animal to Agni and Soma takes place (of the omentum, the paśupuroḍāśa and havis). Jai. after a lengthy discussion (VI. 8. 30–43) holds that this paśu must be a chāga (a goat). Jai. (VIII. 1. 12) states that the procedure of darśa-pūrṇamāsa is followed in this animal sacrifice and not of soma sacrifice. Vide also Jai. VIII. 2. 10–14. Animal sacrifice has already been described above (pp. 1109–1131); but there are a few points of difference between the nirūḍha-paśubandha and the agnīṣomīya paśu offered the day previous to the soma-pressing day; viz. the svaru is not offered into fire in the latter nor is the heart-spit discharged. According to Jai. III. 7. 43-45 the maitrāvaruṇa is the priest where praiṣa and anuvākyā are to be uttered (ordinarily the praiṣa is given by adhvaryu and the anuvākyā is uttered by hotṛ.). When the omentum is offered a direction is issued to the subrahmaṇya priest to chant the subrahmaṇyā[2571] litany for inviting Indra in which the sacrificer is described as the son, grandson and great-grandson of so and so and as the father and grandfather of so and so

---

2570. Vide Kāt. VIII. 7. 5–8 and com. thereon and Āp. XI. 17. 1–5 for the utensils and vessels.

2571. हुतायां वपायां मार्जयित्वा सुब्रह्मण्य पितापुत्रीयां सुब्रह्मण्यामाह्वयेति संप्रेष्यति पितापुत्रीयैषात ऊर्ध्वं सुब्रह्मण्या भवति । आप. XI. 20. 3–4; vide also Kāt. VIII. 9. 12. The com. on Āp. says 'पितरश्च पुत्राश्च यस्यां कीर्त्यन्ते सा पितापुत्रीया.' Lāṭ. I. 3. 18–19 states 'मातरद्वयाकोपक्रमवेलायामसौ यजत इति प्रत्येकं गृह्णीयाद्यजमाननामधेयान्यमुष्य पुत्रः पौत्रो नप्तेति पूर्वेषाम् । अथावरेषां यथाज्येष्ठं क्रीडुंतां ये जीवेदुः ।'

(vide note 2550 above). Hereafter wherever the subrahmaṇyā is to be recited it is in this form. The agniṣomīya rite ends with the Patnīsaṁyāja (Sat. VII. 8. p. 757). When the subrahmaṇyā call has been made, standing with his face to the west he brings in a jar the water from a flowing river that starts from a mountain,[2572] but he should not pass over a river that is near his place, even if it does not start from a mountain. He takes this water before the sun sets and from a spot in the river where the shadow of a cloud and sunshine meet or (if that is not possible) in the shadow of one's own body or of a tree or of the river bank. He should fill the jar with water against the stream with 'haviṣmatīr' (Vāj. S. VI. 23, Tai. S. I. 3. 12. 1). Śat. Br. III. 9. 2. 8–9, Kāt. VIII. 9. 8–10 and Āp. XI. 20. 10–12 suggest other alternative sources for the water. He enters with the jar of vasatīvarī water[2573] by the path between the utkara and cātvāla, takes it by the north of the āgnīdhra shed, enters the śālā by the eastern door and places the jar to the west of the śālāmukhīya[2574] fire. In the second watch of the night the adhvaryu carries the jar of vasatīvarī waters on his shoulder and takes it round the altar and fires in several ways (minutely described in Āp. XI. 21. 3–5, Sat. VII. 8. p. 759 and Kāt. VIII. 9. 18–23). At that time only the sacrificer and his wife are allowed to stay inside and all others have to go out. Ultimately the vasatīvarī jar is placed in the āgnīdhra shed (Āp. XI. 21. 5, Kāt. VIII. 9. 23) and the soma plant also is placed in the same hut but on the āsandī (a large stool or couch). The sacrificer[2574a] keeps awake or is kept awake that night in the āgnīdhra shed or in the havirdhāna shed and guards the soma stalks, while the wife keeps awake in the prāgvaṁśa (the

---

2572. There was a difference of opinion as to whether the Vasatīvarī waters were brought before or after the subrahmaṇyā call. Vide com. on Kāt. VIII. 9. 12.

2573. Water which was to be employed next day in extracting soma juice is called वसतीवरी. The word probably means 'desirable for abode or dwellers' (as the Sat. Br. III. 9. 2. 16 seems to suggest). Those waters are carried round for protection and for repelling evil spirits.

2574. The शालामुखीय is the ordinary आहवनीय according to Sat. VII. 8. p. 736.

2574a. आग्नीध्रे हविर्धाने वा यजमानं जागरयन्ति । प्राग्वंशे पत्नीम् । आप. XI. 21. 12.

usual sacrificial hall). All the priests stay that night in the āgnīdhra shed and no one is to stay in the sadas. That night the pratiprasthātṛ draws milk in the evening for the payasyā (āmikṣā) to be offered to Mitra and Varuṇa the next day and the adhvaryu issues orders to milk the cows that yielded the fast milk for the sacrificer and his wife for making respectively from their milk *āśir* (i. e. soma mixed with milk) and for the graha (cup) of curds (dadhi) and to milk the cow that yielded the milk in the pravargya rite for dadhigharma [2575] (a warm beverage made with inspissated milk) and for the milk that will be heated but not mixed with butter milk (to be offered) to Mitra and Varuṇa and boiled milk mixed with butter milk and brought to the state of curds for the Āditya graha (cup). The priests deck themselves with ornaments and fine clothes and stay for the night in the āgnīdhra shed.

The last day (generally the 5th day) is called 'sutyā' (on which soma is pressed). The priests are awakened sometime after midnight long before dawn in order to be able to finish all actions up to *upāṁśu* (i.e. the extracting of Soma with upāṁśu stone before sunrise, com. on Āp. XII. 1. 1). Then the adhvaryu sips water and invokes the āgnīdhra shed, the havirdhāna shed, the sadas shed, the sruc ladles and vessels called vāyavya (that are contracted in the middle like a mortar, are one span in length and have a bowl on the upper part, Āp. XII. 1. 4). The adhvaryu makes 33 offerings of ājya called yajñatanū in the āgnīdhrīya fire with mantras (from Tai. S. IV. 4. 9. 1). The various [2576] pātras are placed on the khara (mound), the upāṁ-

---

2575. वृत्रा साध्यो धर्मो धर्मनामकर्मविशेषो वृधिधर्मस्तद्वृधम् । com. on Sat. VII. 8. p. 760.

2576. Among the several pātras the following deserve notice: द्रोणकलश (a vessel like a droṇa or trough in shape) with the दशापवित्र, kept below the southern havirdhāna cart to the west of the axle, the ādhavanīya trough (for cleansing soma) of clay placed on the box of the northern havirdhāna cart, the pūtabhṛt (that has a wide mouth) trough of clay at the mouth of the yoke of the same cart, three (or more) ekadhana jars (that hold water to be poured over soma in extracting the juice). The droṇakalaśa is square or round and the other two are earthen and like kumbhas. The daśapavitra is a strainer made of the wool of a living ram, which wool must be white. It is to be about an aratni in length (vide com. on Kāt. IX. 2. 16). Vide Haug's tr. of Ait. Br. note on pp. 488–490 for the vessels and the method of extracting soma juice.

śupātra on the south corner of the eastern side of the great vedi and the antaryāmapātra on the north corner and between the two the grāvan (stone) called upāṁśusavana (employed in extracting soma). Āp. (XII. 1. 6–XII. 2. 13), Śat. (VIII. 1, pp. 770–777), and Kāt. IX. 2 describe at great length how and where the numerous pātras required on this day are placed. According to Kāt. IX. 2. 1 the unnetṛ priest arranges the pātras. Then preparations are made for the savanīya paśu (the animal to be killed and offered on the day of the pressing of soma) on the lines of the agniṣomīya paśu offered the previous day. Then so early before dawn that birds have not begun to chirp or men to speak the adhvaryu issues directions, to the hotṛ to recite the prātaranuvāka (morning prayer) in honour of the gods that come early in the morning (viz. Agni, Uṣas and the Aśvins), to the brahmā priest to observe silence, to the pratiprasthātṛ to take out the materials (nirvāpa) for the savanīya cake and to the subrahmaṇya to recite the subrahmaṇyā litany (he will use the words 'adya sutyām' in the formula) and promises the hotṛ that he (the adhvaryu) will follow the hotṛ mentally in the latter's recitation. The hotṛ sits down between the yokes of the two havirdhāna carts and recites the prātaranuvāka in three parts (called *kratu*), the first for Agni, the second for Uṣas, and the third for the Aśvins.[2577] In each part he has to repeat at least one hymn in each of the seven metres viz. Gāyatrī, Anuṣṭubh, Triṣṭubh, Bṛhatī, Uṣṇih, Jagatī and Paṅktī. Āśv. (IV. 13. 6—IV. 15. 3) states the hymns to be recited, the minimum being at least one hundred ṛks. If all the hymns and verses specified by Āśv. are recited the total of the Āgneya section will be over 1324 (out of which verses in Gāyatrī are 320, in Triṣṭubh 591 and only one hymn, Ṛg. V. 6 of 10 verses, is in Paṅkti metre).

2577. In Ṛg. V. 77. 1 the Aśvins are called 'prātar-yāvāṇā' (early coming). Vide Ait. Br. VII. 5 'एते वाव देवाः प्रातर्यावाणो यदग्निश्चा अश्विनौ त एते सप्तभिः सप्तभिश्छन्दोभिरागच्छन्ति'. Certain verses are omitted from the hymns because they are addressed to some other deity or because they are in another metre than the one required. For example, in Ṛg. VIII. 11 the last verse is in Triṣṭubh and so it is omitted in the Gāyatrī group; similarly in Ṛg. X. 8 the last three Triṣṭubh verses are omitted as they are addressed to Indra.

About 250 verses[2578] are set out by Āśv. for being recited in the Uṣas kratu and about 407 in the Āśvina kratu of the prātaranuvāka (in all about 2000 verses i. e. nearly one-fifth of the whole of the Ṛgveda). The prātaranuvāka is to be recited in the low or base (mandra) scale (Āśv. IV. 13. 6). Āśv. further directs that even when the minimum of 100 verses or any number short of the one prescribed by him are recited, the order of the hymns set out by him is to be followed and that the three hymns Ṛg. VII. 12 (to Agni in Triṣṭubh), VII. 73 (to Aśvins in Triṣṭubh) and I. 112 (to Aśvins in Jagatī) are called maṅgala (auspicious) and that if the darkness of night is still there when he is about to finish the prātaranuvāka he should go on repeating Ṛg. I. 112 till sunlight appears (Āśv. IV. 15. 7 and 9).

While the Prātaranuvāka is being recited by the hotṛ, the āgnīdhra (according to Kāt. IX. 1. 15, the pratiprasthātṛ according to Āp. XII. 4. 4) priest takes out materials (nirvāpa) for five offerings which are a cake on eleven potsherds for Indra, dhānā (fried barley) for two Haris (bay horses of Indra), Karambha (barley flour with curds) for Pūṣan, curds for Sarasvatī, payasyā for Mitra and Varuṇa. There is an option that all five are meant for Indra, but the last four are in that case to Indra associated with the other deities in order as shown below.[2579] The adhvaryu asks the hotṛ to think of water and issues directions to the attendant of maitrāvaruṇa holding a maitrāvaruṇa camasa (a flat wooden dish or cup with a handle) that he should come with the adhvaryu, to the neṣṭṛ to fetch the wife or wives of the sacrificer, asks the other ṛtviks to hold the ekadhana pitchers and the āgnīdhra to wait near the cātvāla pit with vasatīvarī waters. The adhvaryu goes to a pond or

---

2578. Vide Prof. Eggeling's note in S. B. E. vol. 26 p. 230 for the variation in tone when repeating the hymns and detached verses. The word kratu occurs in the Ait. Br. VII. 8 'तद्धार्तुर्यज्ञान् क्रतूनन्वाहाग्नेयमष्टाकपालमैन्द्राग्नमैन्द्राविनम्'.

2579. Payasyā is the same as āmikṣā. Vide com. on Āp. XII. 4. 11 and above n. 2448. इन्द्राय हरिवते धानाः, इन्द्राय पूषण्वते करम्भः, इन्द्राय सरस्वतिवते दधि, इन्द्राय मित्रावरुणवते पयस्या। com. on Kāt. IX. 1. 20. आप. differs in some details. He says that karambha is mantha (parched barley meal) mixed with water or ājya (com. on Āp. XII. 4. 13) and parivāpa (lājas of rice) are offered to Sarasvatī (Āp. XII. 4. 6 and 13). Vide Sat. VIII. 1. p. 783 which is 'इन्द्राय हरिवते ..... करम्भं सरस्वत्यै भारत्यै परिवापलाजानिन्द्राय पुरोडाशमष्टाकपालम्।'

lake, makes offerings of ājya with the camasa of maitrāvaruṇa, fills it with water, the ekadhana pitchers also are filled and the wife fills a vessel called pannejana or pānnejana[2580] (a small vessel with water for washing the feet or thighs). While the ekadhana pitchers are being filled the hotṛ recites Ṛg. X. 30. 1-9 and 11 which are called 'aponaptrīyā verses' as the deity of those verses is 'apāmnapāt' (vide Ait. Br. VIII. 2, Aśv. V. 1. 8 and S. B. E. vol. 26. p. 232 *n.* 2).[2581] Then the water in the maitrāvaruṇa camasa and the vasatīvarī waters are mixed up together. And placing the vasatīvarī water in the hotṛcamasa the adhvaryu hands the camasa to the sacrificer, which water is thence-forward called nigrābhya (Āp. XII. 9. 1). Then the adhvaryu makes an offering of curds from a cup (called dadhigraha, Āp. XII. 7. 5-7). He also takes a few soma stalks from the heap of soma, places them on the *upara* (vide note 2582) and pours some vasatīvarī water over them, beats the stalks with the stone, extracts soma juice, fills a cup with it and offers it (this is called somagraha, Āp. XII. 7. 10-12). Āp. XII. 9 and Kāt. IX. 4 describe how soma is extracted to fill the Upāṁśugraha by using the Nigrābhya water, a portion of it is offered in the southern part of fire (the tyāga is 'idam sūryāya') and a portion is kept in the Āgrayaṇasthālī and a large coil of soma stalks is placed in the Upāṁsūgraha for use in the evening pressing. Vide Haug's tr. of Ait. Br. p. 489 and S. B. E. vol. 26 pp. 244-245 n. 2 for the method of the pressing of soma for upāṁśu-graha (they slightly differ). Then comes the mahābhiṣava (the great or principal pressing of soma). The adhvaryu goes near the ādhavanīya trough and pours into it all the water that is in the maitrāvaruṇa camasa and a third part of the vasatīvarī water also is poured in that trough and also of the ekadhanā water. The rest of both kinds of waters is kept in the place of the ekadhanā water (viz. to the west of the axle of the northern havirdhāna and below it). The adhvaryu sits to the north of the adhiṣavaṇa-carma towards the east and behind him sits the sacrificer, to the south of the adhiṣavaṇa-carma sits the pratiprasthātṛ, to the west neṣṭṛ and to the north the unnetṛ (Āp. XII. 12. 2

2580. पत्न्या ऊरुप्रक्षालनार्था आपः पाजेजन्यः तासामाहरणार्था स्थाली पाजेजनी पजेजनं च पत्नीसंस्कारः । com. on आप. XII. 5. 3.

2581. There are two kinds of waters used in extracting soma, viz. वसतीवरी that are brought the preceding night and ekadhanā brought that very day (com. on Āśv. V. 1. 9.)

and Sat. VIII. 3. p. 825). A very large portion of the soma stalks is to be taken for the morning pressing and a small one for the midday one (Āp. XII. 9. 7). The adhvaryu takes hold of the stone called *upara*,[2582] places it on the adhiṣavaṇa hide, brings soma stalks thereon, nigrābhya water is poured on them, the stalks are beaten by the priests with the other stones held in their right hands, which have a golden ring or the like. This is called the first turn or round (*paryāga*). Then there is a second turn, when the stalks of soma scattered about in the first beating are collected and are again pounded. Then there is a third turn. The texts even prescribe how many times the stalks are to be beaten in each turn (vide Āp. XII. 10. 4-8, 9 and XII. 12. 8-9). The wet and pounded stalks are collected by the adhvaryu into a vessel called sambharaṇī,[2583] are put in the *ādhavanīya* trough which already contains water, the ādhavanīya contents are thoroughly stirred, the stalks are washed, pressed, then taken out and placed on the adhiṣavaṇa-carma. The four stones are again placed facing the *upara* (the central big stone), the sediment or dregs (ṛjīṣa)[2584] of the soma stalks are put over the face of the stones. The droṇakalaśa (a big trough) is carried from its place and kept over all the stones by the udgātṛ priests, who spread over it a woollen strainer or sieve held on a wooden frame or stool with its hem to the north and its centre (nābhi) made of the bunch of wool that was handed over to the sacrificer when soma was purchased (Āp. X. 26. 11 and XII. 13. 1). The unnetṛ priest takes in a vessel (camasa) the soma liquid from the ādhavanīya trough, pours it into the hotṛcamasa containing nigrābhya water held by the sacrificer, who pours a continuous stream on to the woollen strainer (from the hotṛcamasa). From the stream of soma juice flowing down from the strainer all cups (that are wooden) up to the dhruva cup are filled, the first being the cup called antaryāma. The soma that falls in the droṇakalaśa is called śukra (Kāt. IX. 5. 15). The Upāṁśu cup is offered before sunrise, while the adhvaryu offers the antaryāma cup when the sun rises (Āp. XII. 13. 12). The cups filled

---

2582. The stone (upara or adri) is called upāṁśusavana (Kāt. IX. 4. 6). Com. ' उपांशुग्रहार्थं सोमः क्षुयते येन स उपांशुसवन इति यौगिकी संज्ञा '.

2583. संभ्रियतेऽभिद्रुतः सरसः सोमोऽस्यामिति संभरणी वारणं महत्पूर्णपात्रमिति । com. on कात्या. IX. 5. 6.

2584. ऋजीषी सोमः । यत्सोमस्य पूयमानस्यातिरिच्यते तदृजीषम् । अपाजितं भवति । तेन ऋजीषी सोमः । निरुक्त V. 12.

are Aindravāyava, Maitrāvaruṇa, Śukra, Manthin, Āgrayaṇa, Ukthya, Dhruva and they are placed on various spots of the mound (khara) described at p. 1155 above. As the cups are filled from the stream (dhārā) they are called *dhārāgrahas* (com. on Kāt. IX. 6. 26). The cups are wiped with the hems of the strainer or another strainer is employed for the purpose (Āp. XII. 14. 10–11). In the case of the maitrāvaruṇa cup the contents are mixed with boiled but cooled milk, those of the manthin with barley flour. The three grahas viz. Āgrayaṇa, Ukthya and Dhruva are filled to the brim. He then fills three cups called *atigrāhyas* for Agni, Indra and Sūrya (Āp. XII. 15. 9, only in Agniṣṭoma and not in other soma sacrifices). After the cups are filled, the droṇakalaśa trough is half filled with soma juice, then the stream of soma stops (Āp. XII. 16. 9, Kāt. IX. 6. 26), all fluid from the woollen strainer is wrung out into the droṇakalaśa and the strainer is kept aside. Then he pours from the maitrāvaruṇa camasa which is filled with ekadhanā waters into the ādhavanīya trough as much as would be necessary (for filling all soma vessels in the morning pressing); he spreads the strainer with its hem to the north on the mouth of the pūtabhṛt trough, pours thereon a portion of the soma juice that is in the ādhavanīya trough and then touches all the three troughs with distinct mantras (Āp. XII. 16. 11). Then the adhvaryu, prastotṛ, pratihartṛ, udgātṛ, the brahmā (being the last) come out of the havirdhāna shed touching each other with the right hand in the order stated (Tāṇḍya Br. VI. 7. 12, Āp. XII. 17. 1), adhvaryu being the first (some give a slightly different order). They perform (or according to Kāt. the adhvaryu alone performs) what are called 'viprud-dhomas'.[2585] When the soma is being pressed drops of it are scattered about. In order to make these drops go to the gods and also as a sort of expiation this offering of ājya is made to Soma (in all the three savanas). Then the five priests touching each other (adhvaryu being the leader, brahmā being the last and the sacrificer touching him) creep with heads bent in a stealthy manner (like hunters pursuing a deer, according to Āp. XII. 17. 3–4) towards the north for the purpose of the Bahiṣpavamāna

2585. विप्रुष् (f) means 'a drop or spray'. स्कन्नानां विप्रुषां देवत्राकरणार्थो वैप्रुषा नामैते चत्वारो होमाः। com. on Āp. XII. 16. 15; अभिषवकाले ग्रहणकाले च स्कन्नानां सोमबिन्दूनां स्कन्दनप्रत्यवायपरिहारार्थं विप्रुषामर्थं तत्र स्कन्दनमाधिक्यत्वेन होमं कुर्यादित्यर्थ इति माधवाचार्याः। विप्रुहोम इतीयमस्याहुतेः संज्ञा। com. on Kāt IX. 6. 30.

chant that is to be sung.[2586] The adhvaryu takes two blades from the grass strewn on the altar, throws one in the cātvāla pit and the other in front of the udgātṛ priests or gives a handful of kuśa grass to the prastotṛ with 'Vāyu makes the *him* sound' (Tai. S. III. 3. 2. 1). The udgātṛ priests ask the permission of the brahmā priest 'shall we chant' (and also of Maitrāvaruṇa, according to Āśv. V. 2. 11) and he replies 'yes, do chant' (after repeating in the morning pressing 'bhūr-indravantaḥ', but with 'bhuvaḥ' and 'svaḥ' in the other pressings). Vide Āśv. V. 2. 12–13. According to Āp. XIV. 9. 7, X. 10. 1 the brahmā repeats the text 'deva savitar &c.' and then one of the texts called stomabhāgas (in Tāṇḍya I. 9–10), the one employed here being the first viz. 'raśmirasi' (thou art a ray, to thee for residence, give impulse to residence) and then gives permission. All pavamāna chants are introduced in this manner (i. e. by giving a handful of kuśas to the prastotṛ &c.). In the case of stotras other than pavamāna, the adhvaryu makes the chanters start after giving them two kuśa blades with 'asarji ..... upāvartadhvam'. At the time of chanting the bahiṣpavamāna[2587] stotra, the priests and sacrificer sit inside the vedi not far from the cātvāla pit in a certain order and look at the cātvāla or they sit round the northern shoulder of the vedi. The udgātṛ sits facing the north, the prastotṛ sits facing the west and the pratihartṛ faces the south-east; in front of them with faces to the west sit adhvaryu and the pratiprasthātṛ and the sacrificer sits to the south of these.[2587a] They sit placing their right foot on the left thigh, look at the horizon and hold their mouths straight (neither hanging down nor up-lifted). This is the position of the chanters in all stotras (Lāṭ. I. 11. 18–23). Then the prastotṛ, udgātṛ and pratihartṛ chant the bahiṣpavamāna chant. The place where this chant takes place is called 'āstāva' (com. on Āśv. V. 3. 16).

2586. The purpose of this creeping is that the sacrifice is like a deer 'मृग इव हि यज्ञः' Āp. XII. 17. 4. Vide Sat. Br. I. 1. 4. 2 referred to in note 2308 above for the story of yajña having assumed the form of a black antelope.

2587. बहिः स्तूयमानं यत्पवमानं तद् बहिष्पवमानं बहिर्बहिर्भावं गतानपि पुनातीति बहिष्पवमानमिति वा। com. on Sat. VIII. 4. p. 847.

2587a. Vide Baud. VII. 7, com. on Sat. VIII. 4 p. 848, in each of which the order is different. Āśv. V. 2. 4 says that while creeping out for a pavamāna, the maitrāvaruṇa and brahmā are always behind the sāman priests.

The Bahiṣpavamāna of sacrifices lasting for more than one day is chanted in the *sadas* except on the first day (vide Drāhyāyaṇa Śr. IV. 1. 13). The sacrificer and at least four of the other priests (but not adhvaryu) act as choristers (upagātṛ, Āp. XII. 17. 11-12). According to Lāṭ. I. 11. 26 and Drāhyāyaṇa III. 4. 6 the priests sing the chorus 'ho' and the sacrificer says 'om' continuously in the *mandra* (low) tone in the intervals between the prastāva and the other elements of the chant and also during the chanting of these elements except the nidhana, according to com. on Drāhyāyaṇa III. 4. 6 and stop from doing so at the finale (*nidhana*) which is to be sung by the three sāma priests together. Jai. (III. 7. 30) states that the choristers are some of the priests (ṛtviks) themselves (except adhvaryu) and not others. At the time of the first prastāva of the bahiṣpavamāna chant, the [2588] sacrificer mutters the famous prayer (set out on p. 5 above) 'asato mā sad gamaya ..... māmṛtam gamaya' (Br. Up. I. 3. 28 and com. on Kāt. IX. 7. 4), while according to Āp. XII. 17. 14 the sacrificer mutters the daśahotṛ texts (vide p. 993 above for them). The first stotra at each pressing is called Pavamāna (Āp. XII. 17. 8-9), that at the morning savana being called Bahiṣpavamāna, those at the 2nd and 3rd pressings being respectively called Mādhyandina pavamāna and Ārbhava or Tṛtīya Pavamāna. The other stotras are called Dhurya (com. on Kāt. IX. 14. 5).

According to Lāṭ. I. 12. 1 and Drāhyāyaṇa Śr. III. 4. 16-17 the prastotṛ takes the prastara bunch from the adhvaryu, asks the permission of the brahmā and the praśāstṛ and then hands over the prastara to the udgātṛ who touches his thigh with it, and keeps it down with a yajus mantra.

2588. अथातः पवमानानामेवाभ्यारोहः स वै खलु प्रस्तोता साम प्रस्तौति स यत्र प्रस्तुयात्तदेतानि जपेदसतो मा सदमय तमसो मा ज्योतिर्गमय मृत्योर्मामृतं गमयेति। Br. Up. I. 3. 28. These three Yajus sentences are called abhyāroha and are to be recited only once with the accent that they have in the Śat. Br. According to Āp. XII. 17. 15-16 the sacrificer mutters at the beginning of the Bahiṣpavamāna stotra also 'śyenosi' and at the beginning of the first pavamāna of the other two pressings the following two mantras respectively. The Tai. S. III. 2. 1. 1 has the mantras 'यो वै पवमानानामभ्यारोहमभिवहान् यजतेऽहु पवमानानारोहति न पवमानेभ्योऽवच्छिद्यते इयेनोसि गायत्रच्छन्दा अहु स्वारभे स्वस्ति मा सं पारय, सुपर्णोसि त्रिष्टुप्छन्दा ..... पारय, सचासि जगतीच्छन्दा ..... पारय'. Vide Tāṇḍya Br. I. 3. 8 and Drāhyāyaṇa III. 4. 27 for these mantras.

The three sāman priests then commence the chanting of the Bahiṣpavamāna stotra, while looking at the cātvāla (Tāṇḍya VI. 7. 24). The verses in this stotra are nine, viz. Rg. IX. 11. 1–3, IX. 64. 28–30 and Rg. IX. 66. 10–12; they correspond to Sāmaveda II. 1. 1. 1–3 (Benfey) and S. V. vol. III. pp. 4–5, 7–8, 10–11. According to the com. on Lāṭ. VI. 10. 1 each sāman in a stotra has five parts called prastāva (preceded by 'hum' uttered by the sāman priests together), udgītha, pratihāra, upadrava and nidhana (*finale*), which are respectively chanted by the prastotṛ, udgātṛ, pratihartṛ, udgātṛ, all the three together.[2589] According to Lāṭ. I. 12. 7 the Bahiṣpavamāna is begun to be chanted after once uttering the syllable 'hum', while the udgītha in all cases begins with 'om' (Lāṭ. VI. 10. 13)[2590]. In other stotras the himkāra is made more

2589. स्तोत्रगतस्य साम्नः प्रस्तावोद्गीथप्रतिहारोपद्रवनिधनानि भक्तयस्तत्पञ्चावित्वय-मित्युक्तं तत्र प्रथमा भक्तिः प्रस्तावः। com. on लाट्यायनश्रौत VI. 10. 1; प्रस्तावोद्गीथ-प्रतिहारोपद्रवनिधनानि भक्तयस्तत्पञ्चावित्वयं स्मृतं व्याख्यास्याम ओंकारहिङ्काराभ्यां साम-विश्यम्। पञ्चविधसूत्र I. 1 (ed. by Dr. Simon). The Tāṇḍya Br. IV. 9. 9 mentions those elements except upadrava and so does Chān. Up. II. 2. 1 where हिङ्कार is said to be one of the five elements of a sāman, while in छान्दोग्य II. 10. 3 उपद्रव also is mentioned.

2590. The first verse of the Bahiṣpavamāna is उपास्मै गायता नरः पवमानायेन्दवे। अभि देवाँ इयक्षते ॥. This will be chanted as follows: हुम्। उपास्मै॑ गायता नरोम्। ॐ पा र वा र मानायेन्दावा र इ। अभि॑ देवा५ इयाँ १ २ १ २। क्षतो। सा॑ ३ ४ ५ त्॥ Here उपास्मै ... नरोम् is the प्रस्ताव, ॐ ... वा र इ is the उद्गीथ and so on. The other verses of the Bahiṣpavamāna are set out below. लाट्यायनश्रौ. (VII. 10. 18–VII. 11. 14) illustrates how this verse is to be chanted. Vide Haug's tr. of Ait. Br. p. 120 for a note on this. In many rites the nidhana was not fixed but could be varied according to the desire of the yajamāna. Vide ताण्ड्यब्रा. VII. 1. 11 'इडां पशुकामाय निधनं कुर्यात्स्वः स्वर्गकामाय यशो ब्रह्मवर्चसकामाय आयुरामयाविने हंसीत्य-भिचरते' and लाट्यायन VII. 11. 15, जै. II. 2. 28–29.

अभि॑ ते॑ मधुना॑ पयोम्। ॐ मा॑थर्वणो॑ अशिश्रा दे र युर्वे॑ देवा॑ यदो॑ १ २ १ २। हुं॑ आ र। वा॑यो। सो॑ ३ ४ ५ म्॥

सं॑ नः॑ पवस्व शं॑ गवो॑म्। ॐ शा॑ र जा र ना र यं॑ शमवा॑ तो॑ इ श५ रा॑जा॑ १ नो र षा॑ धा॑ १ २ १ २। हुं॑ आ र। भा॑यो। सु॑वा ३ ४ ५:॥

(द्वितीयस्तृचः) दे॑विधुततिया॑ रुचो॑म्। ॐ पा रि ष्टो॑ भा र ता॑या॑ रुपा र सो॑माः शुक्रा र गा॑वा॑ १ २ १ २। हुं॑ आ र। शा॑इरो। इ॑डा ३ ४ ५॥

हि॑न्वानो॑ हे॑तृभिर्हि॑तो॑म्। ॐमा वा॑जं वा॑ज्यक्रमी॑ १ २ १ २ त् सी॑ दं॑तो वा॑ १ २ १ २ नु॑षा॑ १ २ १ २। हुं॑ आ र। या॑थो। वा॑ ३ ४ ५ क्॥

(*Continued on next page*)

than once (vide com. on Drāhyāyaṇa Śr. III. 4. 22). The Lāṭ. Śr. itself illustrates (in VII. 10. 18-21) how the first verse is chanted. The nidhanas for the nine verses are (Lāṭ. VII. 13. 7) sāt, sām, suvaḥ, idā, vāk, ā (for the last four verses). The note below will, it is hoped, convey some idea (however vague) of the manner in which the sāman verses are manipulated for the purpose of chanting. It is very difficult (nay, almost impossible) to convey in print how the sāmans are sung. The difficulty is aggravated by the fact that the notations adopted in the mss. and the editions are different and hardly any two MSS. agree in all respects. Besides the present writer does not profess to have studied the intricacies of ancient Indian or modern European music and is not in a position to write a dissertation on this topic. He has, however, given below and elsewhere such general and useful hints as could be gathered from Sanskrit works. Those who are desirous of making a

This is taken from a Ms. in the possession of Svāmī Kevalānanda of Wai, Dist. Satara. The figures over the letters are shown in red ink in the Ms., the figures that come after the letters in the same line are shown in dark ink. In D.C. Ms. No.334 of 1883-84 which is on Agniṣṭoma audgātra all the nidhanas of the Bahiṣpavamāna have at the end the same figures, viz. $\frac{3}{2}$ $\frac{3}{4}$ $\frac{3}{4}$ and there are in it also a few more variations from the text printed above from the Wai Ms. A third Ms. (copied in 1755 A. D.) in the Bhau Daji collection at the Bombay Asiatic Society's Library has also been very useful in setting out the sāmans. In the Devatādhyāya Brāhmaṇa of the Sāmaveda (ed. by Burnell) it is stated that the devatās of the sāmans are determined by the nidhana. In all sāmans having a nidhana the deity is Indra except where special rules indicate other deities. 'अग्नी रुद्रः प्रजापतिः सोमो वरुणस्त्वष्टाङ्गिरसः पूषा सरस्वतीन्द्राग्नी । इडानिधनानि पञ्चनिधनानि ईकारनिधनानीत्याग्नेयानि । सर्वाणि निधनवन्त्वैन्द्राण्यन्यान्यादिदेवेभ्यः । सर्वाणि स्वाराणि प्राजापत्यानि यथा वामदेव्यम् ।..... वाङ्निधनानि वावनानि यथा यज्ञायज्ञीयम् । ' देवताध्याय I.

close study of the *sāmans* may read the following: The Pañcavidha-sūtra, edited by Dr. Richard Simon (Breslau, 1913); Sāyaṇa's introduction to his commentary on the Sāmaveda in vol. I. of the B. I. edition; Nāradīya-śikṣā published in the Benares Sanskrit series; Satyavrata Sāmaśrami's learned notes in his edition of the Sāmaveda in five volumes (in B. I. Series); Burnell's Introduction to Sāmavidhāna Brāhmaṇa (1873), Introduction to the Jaiminīya text of the Ārṣeya Brāhmaṇa (1878, where on p. XV he gives diagrams of the hand and fingers employed in indicating the chanting of the sāmans), Introduction to Ṛktantra-vyākaraṇa, particularly p. XXXVIII (1879); 'the Vedic chant studied in its texual and melodic form' by J. M. Van der Hoogt (Wageningen, Holland, 1929) which presents a special study of *stobhas*; translation (with notes and Introduction) of the Pañcaviṁśa Brāhmaṇa by Dr. Caland (in the B. I. series, 1931); the Introduction to the recent edition of the Sāmaveda brought out by Pandit Sātavaḷekar at Aundh (1939); 'the Music of Hindostan' by A. H. Fox Strangways (Oxford, 1914), particularly pp. 249–279; a booklet 'the Ancient Mode of singing sāmagāna' by Mr. Lakṣmaṇa Śaṁkarabhaṭṭa Drāviḍa of Poona. It may, however, be stated here that even on reading these books no thorough knowledge of sāmagānas can be acquired. Thorough investigation and research have yet to be made in these gānas and the first endeavour must be to collect gramophone records of the methods of chanting adopted throughout India and then compare them. A generation or two hence, it is feared, hardly any learned sāma singers will be left.

Most of the sāman chants are taken from the Ṛgveda. In reciting a verse from the Ṛgveda attention has to be paid to the accents called udātta, anudātta and svarita. When the same verse is chanted as a sāman, one has to attend besides to the notes of the melody to which the verse is being sung. The way of marking the accents of the Ṛgveda verse is not followed when it is taken in the Sāmaveda. The svarita of the Ṛgveda is represented in the Sāmaveda MSS. in several ways, but generally by the figure 2 written above the letter and anudātta preceding an udātta is represented in the Sāmaveda saṁhitā by the figure 3 and udātta following an anudātta has the figure one placed on the letter. There are further detailed rules about these accents and also other marks which are not set out here. Only one further remark is made. The letter 'ra'

preceded by 2 is placed over a svarita coming after the udātta which follows another udātta. Modern sāma singers have generally no knowledge of these ancient rules and signs but only chant as they learned from their teachers, nor do their chants always agree with the notations in the several MSS. Further there is a certain monotony and sameness in their melodies. If one hears a modern singer sing songs in several *rāgas* like the *Jogī* or *Jhinjoṭī* or *Khamāch* a person totally ignorant of the rāgas can feel, however vaguely, the difference between the two. But this is not so when a Rathantara melody or a Bṛhat melody is sung. According to the Sāmavidhāna-brāhmaṇa (I. 1. 8 and 14) these notes (also called *svaras*) are seven, viz. kruṣṭa, prathama (1st), dvitīya (2nd), tṛtīya, caturtha, pañcama (or mandra) and antya (last) or atisvārya.[2591] Sāyaṇa explains that the seven svaras named above are arranged in a descending scale, though from the words first, second and so on one is apt to suppose that they are in an ascending scale. Sāyaṇa further states that these seven svaras are also called yamas.[2592] In the Nāradīya-śikṣā (Benares Sanskrit series) the seven svaras are stated to be prathama, dvitīya, tṛtīya, caturtha, mandra, kruṣṭa and atisvāra (1. 12). The kruṣṭa is the highest note and comes before prathama in many texts. The same work (III. 5) mentions the seven classical notes, ṣaḍja, ṛṣabha, gāndhāra, madhyama, pañcama, dhaivata and niṣāda (which are indicated in modern India as *sa ri* or *re ga ma pa dha ni*). The Nāradīya-śikṣā then (V. 1–2) tries to establish a correspondence between the seven ancient names of the notes of sāma chanters and the seven notes of classical times by stating that the seven sāman notes mentioned (from prathama onwards) are respectively the same as the notes produced on the Indian *vīṇā* (lute) called madhyama, gāndhāra, ṛṣabha, ṣaḍja, dhaivata, niṣāda and pañcama. Pandit Sātavaḷekar (Introduction to the edition of the Sāmaveda p. 2) holds that the printed Nāradīya-śikṣā has

---

2591. तयोऽसौ कृष्टतम इव साम्नः स्वरस्तं देवा उपजीवन्ति योऽवरेषां प्रथमस्तं मनुष्या जीवन्ति यो द्वितीयस्तं गन्धर्वाप्सरसो यस्तृतीयस्तं पशवो यश्चतुर्थस्तं पितरो ये चाण्डेषु शेरते यः पञ्चमस्तमसुररक्षांसि योऽन्त्यस्तमोषधयो वनस्पतयो यञ्जान्यज्जगतस्तमादाहुः सामैवाजमिति साम ह्येवाद्युपजीवनं प्रायच्छत्। सामविधानब्राह्मण I. 1. 8.

2592. त्रीणि मन्द्रं मध्यमद्युत्तमं च स्थानान्याहुः सप्त यमानि वाचः। अनन्तरश्चात्र यमोऽविशेषः सप्त स्वरा ये यमास्ते पृथग्वा॥ ऋक्प्रातिशाख्य XIII. 17 (published by Sanskrit Sāhitya Pariṣad, Calcutta). The com. says ये सप्त स्वराः षड्जऋषभगान्धारादयो गान्धर्ववेदसमाम्नाता ये वा कृष्ट-प्रथम-द्वितीय-तृतीय-चतुर्थ-मन्द्रातिस्वार्चाः सामसु निगदितास्ते यमा वेदितव्याः।

wrongly transposed the places of *niṣāda* and *dhaivata.*[2593] The notations employed in the North Indian and South Indian MSS. of the Sāmaveda vary considerably and the confusion is made worse by the fact that the several śākhās (such as the Kauthumas, the Rāṇāyanīyas and Jaiminīyas) have various readings and varying notations of their own. The Nāradīya-śikṣā further points out (VI. 2-6) that the sāmans can be sung to the notes of the ordinary vīṇā and also to the accompaniment of the movements of the thumb and fingers of the hand (and so it calls the latter gātravīṇā, 'body-lute'). The reciter sitting cross-legged is to place his hands on the two knees, to touch by the tip of the thumb the middle parva (joint) of the fingers for indicating the several notes of the song (and not the root of the fingers) and to hold the hand in front of his nose like a cow's ear. The seven svaras are indicated as follows:[2594] the kruṣṭa is on the head (top) of the thumb, the prathama (i. e. madhyama of classical notes) is on the central part of the thumb; gāndhāra, ṛṣabha, ṣaḍja and dhaivata (i. e. 2nd, 3rd, 4th and mandra) are respectively indicated by (touching with the tip of the thumb the central joints of) the fore-finger, the middle finger, the ring finger and the small finger; and niṣāda is indicated at that part of the palm below the small finger which resembles a channel when the fingers are closed in a fist.

While the Bahiṣpavamāna is being chanted the unnetṛ priest pours the soma juice contained in the ādhavanīya vessel on to the pūtabhṛt trough over which the woollen strainer is stretched with its hem to the north. When the chant is finished the adhvaryu issues directions (praiṣa) to the āgnīdhra priest to kindle fires (on the dhiṣṇyas), to strew kuśa grass (on the vedi) and to deck the puroḍāśas and to the pratiprasthātṛ to come with the *savanīya* (to be sacrificed on the pressing day) paśu (animal). The āgnīdhra brings burning coals from the āgnīdhrīya fire and kindles fires on the dust (or sand) of the several dhiṣṇyas beginning with that of the hotṛ (in the order in which the seats were arranged and with the same mantras). The

2593. यः सामगानां प्रथमः स वेणोर्मध्यमः स्वरः। यो द्वितीयः स गान्धारस्तृतीयस्त्वृषभः स्मृतः॥ चतुर्थः षड्ज इत्याहुः पञ्चमो धैवतो भवेत्। षष्ठो निषादो विज्ञेयः सप्तमः पञ्चमः स्मृतः॥ नारदीयशिक्षा V. 1-2.

2594. अङ्गुष्ठस्योत्तमे कुष्ठो अङ्गुष्ठे प्रथमः स्वरः। प्रदेशिन्यां तु गान्धार ऋषभस्तदनन्तरम्॥ अनामिकायां षड्जस्तु कनिष्ठायां च धैवतः। तस्याधस्ताच्च योन्यास्तु निषादं तत्र विन्यसेत्॥ नारदीयशिक्षा VII. 3-4.

āgnīdhra spreads kuśas beginning from the gārhapatya up to the āhavanīya, along the pṛṣṭhyā line and decks the puroḍāśas. He offers soma into the āhavanīya, āgnīdhrīya and mārjālīya fires and ājya in others. The adhvaryu, whom the sacrificer touches, fills the Āśvina cup (*graha*) from the droṇakalaśa with the pariplavā (a small spoon resembling a sruc without its rod, Āp. XII. 2. 7) and the other cups that are not dhārāgrahas are also filled in the same way.

Then begin the rites for the offering of the savanīya paśu, commencing from the tying of a triple girdle round the post (yūpa). According to Kāt. IX. 8. 1 the girdle (raśanā) that was used the previous day at the time of sacrificing the Agniṣomīya animal is again used for the savanīya paśu, while according to Āp. XII. 18. 12 a new girdle is used. In the Agniṣṭoma the animal sacrificed on soma-pressing day is a goat for Agni. In the Ukthya sacrifice another goat (in addition) is sacrificed for Indra and Agni, in the Ṣoḍaśin sacrifice a third paśu (a ram according to Kāt. IX. 8. 4, a goat according to Āp. XII. 18. 13) is offered in addition and in the Atirātra a fourth one (a goat) to Sarasvatī in addition. Kāt. (IX. 8. 5–6) allows optionally a ewe. These four animals that are offered are called *stomāyana* (Kāt. IX. 8. 7) and *kratupaśus* (Āśv. V. 3. 4). Then the procedure of Nirūḍhapaśubandha described above is followed up to the offering of the vapā (omentum) and subsequent mārjana (purification with water). Then all the priests and the sacrificer enter the *sadas* and occupy places to the east of the audumbarī post and to the west of their several seats (dhiṣṇyās)[2595] and other places after looking (with mantras for each) at the several cups, the three troughs (ādhavanīya, pūtabhṛt and droṇa-kalaśa), the clarified butter and vessels and the sacrificer pays homage to all these (with mantras set out in Āp. XII. 19. 5 ff).

At this stage the pratiprasthātṛ brings the five savanīya offerings (vide p. 1163 above). The adhvaryu places them on the vedi, cuts off portions of the offerings, arranges them in one large vessel (or the juhū) in such a way that the cake for Indra is placed in the middle, the dhānā is to the east of it, karambha to the south, parivāpa to the west and āmikṣā to the

2595. This coming back to the dhiṣṇyas is called *sarpaṇa*. Vide Kāt. IX. 8. 25. Āśv. V. 3. 24 says 'पूर्वेणोदुम्बरीमपरेण धिष्ण्यान् यथान्तरमनूपविशन्ति'.

north. The portions meant for sviṣṭakṛt are placed in the Upabhṛt. The adhvaryu issues his direction to the maitrāvaruṇa to recite the anuvākyā for the puroḍāśa and other offerings to Indra in the morning pressing and to ask the hotṛ to repeat the yājyā for the same. The anuvākyās for the puroḍāśa and other offerings in the three savanas are respectively Ṛg. III. 52. 1, 5 and 6 and the anuvākyās in the three savanas for the sviṣṭakṛt offering are Ṛg. III. 28. 1. 4 and 5 respectively. The maitrāvaruṇa's praiṣa to the hotṛ and the latter's formula before the offering is made are given in the note below.[2596] The adhvaryu makes the principal offering into fire and then the sviṣṭakṛt. Portions of the remainder are cut off for the Brahmā priest, *iḍā* is cut off and placed on the seat of the hotṛ and the rest is kept securely for the sacrificer.

Then offerings of soma from the cups are made to the joint deities (*dvidevatya grahas*) viz. for Indra and Vāyu, Mitra and Varuṇa, and the two Aśvins. After this comes *camasonnayana.* The unnetṛ fills to the west of the uttaravedi nine *camasas* for the priests called camasādhvaryus, by first pouring in each some soma from the droṇakalaśa (this is upastaraṇa), then soma from the pūtabhṛt trough and then again from the droṇakalaśa (this is abhighāraṇa). The order in which the nine are filled is: first that of hotṛ, then for brahmā, udgātṛ, sacrificer, maitrāvaruṇa, brāhmaṇācchaṁsin, potṛ, neṣṭṛ, āgnīdhra (there is none for unnetṛ and acchāvāka here). The maitrāvaruṇa repeats Ṛg. I. 16, VII. 21 and IV. 35 in the three savanas respectively when the camasas are being filled (Āśv. V. 5. 14). Then follows *śukrāmanthi-pracāra.* The adhvaryu takes the soma cup called Śukra, the pratiprasthātṛ the Manthin cup and the camasādhvaryus the camasas that are placed on the uttaravedi. The camasādhvaryus are not ṛtviks chosen by the yajamāna but they are assistants chosen by the priests (the ṛtviks themselves). Vide Jai. III. 7. 27. Jai. (III. 7. 26–27) further says

---

2596. 'प्रातः प्रातःसावस्येन्द्राय पुरोडाशानामनुब्रू3हि' is the direction to the मैत्रावरुण in प्रातःसवन, माध्यन्दिनस्य सवनस्येन्द्राय &c. in माध्यन्दिनसवन and तृतीयस्य सवनस्येन्द्राय &c. in तृतीयसवन. Vide आप. XII. 20. 15, Kāt. IX. 9. 6 and 8, Sat. VIII. 6. p. 863. The मैत्र is होता यक्षद्धरिभ्यां इन्द्रो धाना अत्तु पूषण्वान् करम्भं सरस्वतीवान् भारतीवान्ते परिवाप इन्द्रस्यापूपः। मित्रावरुणयोः पयस्या प्रातःसावस्य पुरोडाशानिन्द्रः प्रस्थितान् जुषाणो वेतू3 होतर्यज। Vide आश्व. V. 4. 3. The होतृ says 'ये3यजामहे हरिभ्यां इन्द्रो ... जुषाणो वेतू3षौ3वट्' (the words हरिभ्यां ... वेतू3 are repeated from the above मैत्र of मैत्रावरुण). Vide ऐ. ब्रा. 8. 6 for हरिभ्यां इन्द्रो ... इन्द्रस्यापूपः as the words of the याज्या.

that they are generally ten. They (adhvaryu and pratiprasthātṛ) cover the cups with two pieces of wood (chiselled off when the yūpa was made) that are sprinkled with holy water, wipe the cups from their mouths downwards with two pieces (of the yūpa, but not sprinkled) saying 'wiped off is Śaṇḍa' (adhvaryu says) and 'wiped off is Marka' (says pratiprasthātṛ). They place the cups on the south and north corners of the western side of the uttaravedi, go to the south and north of the yūpa, throw away the unsprinkled chips (referring to the repulse of Śaṇḍa and Marka)[2597] outside the vedi and the sprinkled ones are placed into the āhavanīya and standing on both sides of the yūpa they two offer the cups with their faces to the west and the camasādhvaryus (who are nine here and ten in other cases, vide com. on Kāt. IX. 11. 2) do the same with faces to the east and silently. All these offerings are made to Indra (com. on Kāt. IX. 11. 2). The pratiprasthātṛ pours what remains in the manthin cup into the śukra cup and the adhvaryu pours the mixture of the soma juice remnants of the two cups into the hotṛ-camasa. The adhvaryu directs attendants to refill the cups of the maitrāvaruṇa, brāhmaṇāc-chaṁsin, potṛ, neṣṭṛ and āgnīdhra with soma from the droṇakalaśa and the contents are offered into fire respectively for Mitra and Varuṇa, Indra, Maruts, Tvaṣṭṛ, Agni. Then the hotṛ, adhvaryu and pratiprasthātṛ partake of the remnants of the contents of the cups offered to the double deities (Indra and Vāyu, Mitra and Varuṇa, the two Aśvins). Vide Āp. XII. 25. 13. A keen controversy is carried on in the sūtras whether the adhvaryu or hotṛ drinks first. Vide Āp. XII. 24. 6, Kāt. IX. 11. 12–17. The contents of the cup for Indra-vāyu are drunk twice and of the rest once. The mantra in all cases of the drinking of soma by the priests is 'vāgdevī juṣāṇā somasya tṛpyatu saha prāṇena svāhā' (Vāj. S. VIII. 37, Āp. XII. 24. 11. 12, Kāt. IX. 11. 19, Āśv. V. 6. 22). The remnants in the cups are poured into hotṛ-camasa. Then a very small part of the puroḍāśa is thrown

2597. It is rather strange that Prof. A. B. Keith says (in 'Religion and Philosophy of the Veda' part 2 p. 329) 'then are filled the goblets of the priests and offerings of the śukra and manthin cups made for the strange figures of Śaṇḍa and Marka'. As shown above the offerings of śukra and manthin were made to Indra. Baud. VII. 14 says यदद्भुते सहोभौ जुहुतः। स प्रथमः संकृतिर्विश्वकर्मा ... तस्मा इन्द्राय सुतमाजुहोमि स्वाहेति। Āp. XII. 23. 8 has the same verse. Śaṇḍa and Marka (or Amarka) are here offered only chips of wood; they are said to have been the purohitas of asuras. Vide Tai. S. VI. 4. 10, Tai. Br. I. 1. 1, Vāj. S. VII. 12–13.

into the aindra-vāyava cup by the adhvaryu, a portion of the payasyā in the maitrāvaruṇa cup and the dhāṇā in the āśvina cup. Vide Jai. III. 8. 33 (where it is said that this effects a saṁskāra of the puroḍāśa &c). The pratiprasthātṛ then keeps these cups on the northern wheel-track of the southern havirdhāna cart. The adhvaryu and other priests make an offering of Vājina (Kāt. IX. 12. 1). The several priests drink soma from their camasas (in a rather complicated manner, for which vide com. on Kāt. IX. 12. 3 and Āp. XII. 25. 16–23). The hotṛ drinks once from all camasas and twice from his own camasa, the maitrāvaruṇa and other priests drink from their own camasas twice (Āp. XII. 25. 19–21).[2598] On drinking soma the priests touch their mouth and heart with Ṛg. VIII. 48. 3–4 'we drank soma and have become immortal &c.' Vide Āśv. V. 8. 26. All the camasas are then strengthened or replenished (āpyāyana) by the priests by repeating two mantras 'āpyāyasva' &c. (Ṛg. I. 91. 16 and 18 = Vāj. S. XII. 112–113, Tai. S. III. 2. 5. 3) and by filling them with soma from the pūtabhṛt trough and then they are placed under the southern havirdhāna cart to the west of the axle and are thence-forward called Nārāśaṁsa till the taking up of the Vaiśvadeva cup (Āp. XII. 25. 24–27, Kāt. IX. 15. 5–8). The adhvaryu takes a small portion of the puroḍāśa and while giving it to the acchāvāka priest who sits outside the sadas in front of the seat (dhiṣṇya) prepared for him says 'O acchāvāka, say whatever you have to say.' The acchāvāka holding the portion on a level with his mouth recites the three verses, Ṛg. V. 25. 1–3 (acchā vo agnimavase &c.). He combines the 'om' uttered at the end of the third verse with a long prose formula[2599] (nigada) which ends with 'O brāhmaṇa! call us who are brāhmaṇas'. The adhvaryu on hearing this requests the hotṛ to summon the acchāvāka (to the soma drink). When the hotṛ calls him, the acchāvāka

2598. The com. on Kāt. IX. 11. 23 states that the contents of the द्विदेवत्यग्रहs are not actually drunk, but only smelt or only brought in contact with the lips. When vessels are filled with the sacred soma no question arises as to ucchiṣṭa 'न सोमेनोच्छिष्टा भवन्तीति स्मरणात्सेनैव चमसेन सर्वेपि भक्षयन्ति' com. on Kāt. IX. 12. 3. Vide आश्व. V. 6. 3 न सोमेनोच्छिष्टा भवन्तीत्युदाहरन्ति.

2599. The nigada is given by Āśv. V. 7. 3 'अग्न्येन प्रणवेनोपसन्तुयाद् यजमान होतरध्वर्यो ..... इन्द्राग्निभ्यां सोमं पोक्षतोपो अस्मान् ब्राह्मणान् ब्राह्मणाहवयतमिति'. The acchāvāka probably came to be so called from the first word 'acchā' of Ṛg. V. 25. 1 which he recites.

recites Ṛg. VI. 42 and a camasa is filled for him first with soma from the droṇakalaśa, then from the pūtabhṛt trough and again from the droṇakalaśa. After the acchāvāka recites Ṛg. VIII. 38.7 (as the yājyā) the adhvaryu makes an offering of soma from his camasa in the āhavanīya, the acchāvāka lays down the piece of puroḍāśa and sitting on his own seat drinks the remainder of soma himself from his camasa and also eats the portion of puroḍāśa given to him (Āśv. V. 7. 7 and 9). His camasa is then placed among the other camasas.

After the acchāvāka sits down, the brahmā, hotṛ, adhvaryu, maitrāvaruṇa and āgnīdhra partake of the iḍā of the *savanīya* cake and the other four offerings in the āgnīdhra shed (Āp. XII. 25. 8–15, Āśv. V. 7. 10, Kāt. IX. 11. 29 and IX. 12. 16). The sacrificer also partakes of it and the wife partakes of light food (rice &c.) in her shed (Kāt. IX. 12. 16–17, com. on Āp. XII. 25. 12). Āp. (XII. 25. 13) states that at this time take place several of the acts that are done in the darśapūrṇamāsa such as throwing the śākhā on fire, the offering of vājina, the two homas of piṣṭalepa and phalīkaraṇa &c.

Then comes the offering of *ṛtugrahas*. These cups are filled from the droṇakalaśa and are offered by the adhvaryu and the pratiprasthātṛ to the twelve months (Madhu, Mādhava, and so on, from Tai. S. I. 4. 14 or Vāj. S. VII. 30) or 13 months (when there is an intercalary month called Saṁsarpa in Tai. S. I. 4. 14. 1 and Aṁhasaspati in Vāj. S. VII. 30) or 14 (vide Āp. XII. 27. 1). There are 6 pairs of months, for the first of which the offering is made by the adhvaryu and for the 2nd by the pratiprasthātṛ with the mantra (Vāj S. VII. 30) 'upayāmagṛhītosi madhave tvā' (and so on). Baud. VII. 16 gives at length all the mantras for the twelve months. The praiṣas are uttered by the maitrāvaruṇa and when the adhvaryu enters the havirdhāna pavilion to make the offering the pratiprasthātṛ leaves it and *vice versa*. The vaṣaṭkāra for the first six is uttered respectively by hotṛ, potṛ, neṣṭṛ, āgnīdhra, brāhmaṇācchaṁsin and maitrāvaruṇa and the adhvaryu or pratiprasthātṛ (as the case may be) eats of the remains in the cup with that priest who utters the vaṣaṭkāra. In the next four the vaṣaṭkāra is uttered by hotṛ, potṛ, neṣṭṛ and acchāvāka and for the last two by hotṛ. After this a cup is filled from the droṇakalaśa or pūtabhṛt for Indra and Agni (Āp. XII. 27. 8, Kāt. IX. 13. 20). All the soma pātras from which soma was drunk by the priests are washed on the mārjālīya place (Āp. VII. 27. 10).

It would not be out of place to remark here that according to the Ait. Br. 35. 2-4 (referred to on p. 140 above) a kṣatriya sacrificer was not to drink soma, but if he desired he might drink the liquid obtained by pounding the young sprouts of the banyan tree and the fruits of that tree and of the udumbara and of other holy trees mixing them with curds.[2600] It is however to be noted that in classical Sanskrit literature sometimes kings are described as 'somapāḥ'. The sūtras (e. g. Sat. VIII. 7. p. 882, Āp. XII. 24. 5) say the same. Jai. (III. 5. 47-51) refers to this practice and says that the liquid so prepared and poured into a cup is called *phala-camasa* and is really an offering made on a coal taken from the āhavanīya to its north, and not a mere substitute for some eatable. Vide also Jai. III. 6. 36.

The adhvaryu with the ṛtu cup in his hand sits down near the door of the *sadas* in front of the hotṛ with his face to the east, mutters the words 'Iḍā, the summoner of gods' (Tai. S. III. 3. 2. 1). Then the hotṛ performs japa of a long passage[2601] (found in Āśv. V. 9. 1), he issues without uttering hiṁkāra a call (āhāva) to the adhvaryu loudly viz. 'Śom3sāvo3m' (let us both praise)[2602] and recites inaudibly the prayer called

---

2600. स यदि राजन्यं वैश्यं वा याजयेत्स यदि सोमं विभक्षयिषेद् न्यग्रोधस्तिमीराद्धस्य ताः संपिष्य दधन्युन्नुद्य तमस्मै भक्षं प्रयच्छेत्त सोमम्। quoted by Sabara on Jai. III. 5. 47 and III. 6. 36. Vide Ait. Br. 35. 4 for the ingredients 'अथास्यैष स्वो भक्षो न्यग्रोधस्यावरोधाश्च फलानि चौदुम्बराण्याश्वत्थानि प्लाक्षाण्यभिषुण्यास्तानि भक्षयेत्।'. Vide note 61 above.

2601. सुमत्यद्मन्दे पिता मातरिश्वाच्छिद्रा पदा धादच्छिद्रोक्था कवयः शंसन्। ..... क इदं शंसिष्यति स इदं शंसिष्यति। Āśv. V. 9. 1. This is the *japa*. The Ait. Br. X. 6 has the whole of it except the first five mystic letters, but it appears to explain those five and also the rest of the passage. Vide Haug's note on p. 151 of tr. of Ait. Br. for the whole formula.

2602. This summons is called 'āhāva' (from the root 'hve' to call) and this is the āhāva in all śastras in the morning pressing (Āśv. V. 9. 2). The most common pratigara uttered by the adhvaryu is ओथामो दैव (pronounced as दैवा) while at the first āhāva it is the one given above in the text. Vide Āśv. V. 9. 4-10, Āp. XII. 27. 11-17, Sat. VIII. 8. pp. 896-898 for various modes of the pratigara. The Tai. S. III. 2. 9. 5 puts the pratigara as 'śaṁsāmo daiveti pratyāhvayate'. प्रतिगर is explained as प्रतिगीर्यते प्रत्युच्चार्यत इति (com. on Āśv. V. 9. 4 and Sat. VIII. 8. p. 897). In the mid-day pressing the āhāva is अध्वर्यो शो3सावो3म् (Āśv. V. 14. 3) at the beginning of all śastras and in the evening pressing it is अध्वर्यो शोशो3सावो3म् (Āśv.

(*Continued on next page*)

'tūṣṇīmśaṁsa.' The adhvaryu stands up or bends his body with his face to the west at the door of the sadas and makes the response (*pratigara*) with 'śoṁsāmo daiva' (Āśv. V. 9. 5). There are several āhāvas and several pratigaras in the course of reciting all the texts connected with a śastra. The tūṣṇīmśaṁsa is of three clauses or six clauses (vide below).[2603] Then he loudly repeats twelve clauses called *nivid*, pausing at the end of each clause 'fire kindled by the gods, kindled by Manu..... the hotṛ chosen by the gods.....May the god bring the gods hither, may the god worship the gods, may he, Jātavedas, perform the rites' (Ait. Br. X. 2, Āśv. V. 9. 12).[2604] The Ait. Br. explains these clauses, says that they are to be loudly recited and calls them a *puroruc* for Jātavedas (Ait. Br. X. 7). This *nivid* is not to be combined with the Tūṣṇīmśaṁsa, but the last word of the former is to be combined with the first verse of the ājya śastra, which is the name of the hymn Rg. III. 13 (verses 1–7). The first verse of this hymn is recited

---

(*Continued from last page*)

V. 18. 4). The āhāva is required at the beginning of all śastras whether recited by the hotṛ, the maitrāvaruṇa, brāhmaṇāccha-ṁsin or acchāvāka. Vide Āśv. V. 10. 10–12; about the śastras these priests recite and how each of the śastras they recite in the morning and evening pressings contains four āhāvas and how the śastras in the mid-day pressing have five āhāvas. Āśv. (V. 10. 13–17) specifies the places where āhāva is to be uttered. Various explanations are given of the pratigara e.g. Sāyaṇa on Ait. Br. XII. 1 explains 'शोंसामो दैवोम्' as हे होतस्वं शंस तत्र आमोदैव हर्ष एवास्माकमतोऽनुज्ञा दत्ता।'. It appears that the āhāva and pratigara came to have a mystic significance and so several permutations and combinations of them arose. Vide Āp. XIII. 13. 8-10, Sat. IX. 3. p. 925 where three different forms of pratigara in the Vaiśvadeva śastra of the evening pressing are given. Vide Haug's tr. of Ait. Br. pp. 141–142 n. on आहाव and प्रतिगर.

2603. घृरग्निर्ज्योतिर्ज्योतिरग्नो3म्। इन्द्रो ज्योतिर्बुधो ज्योतिरिन्द्रो3म्। सूर्यो ज्योतिर्ज्योतिः स्वः सूर्यो3मिति त्रिपदस्तूष्णींशंसः। यद्यु वै चतुष्पदः। पूर्वैर्ज्योतिःशब्दैरग्रेऽवस्येत्। Āśv. V. 9. 11. When six clauses are required the three clauses are each divided into two parts, the first ending with the first word 'jyotir' in each clause. The Ait. Br. IX. 7 says that the first clause in the above is the tūṣṇīmśaṁsa in Ājyaśastra and Praugaśastra of the prātaḥsavana, the 2nd of the Niṣkevalya and Marutvatīya śastras of the mid-day pressing and the third of the Vaiśvadeva and Āgnimāruta śastras of the third pressing.

2604. अग्निर्देवेद्धः, अग्निर्मनुष्विद्धः, अग्निः सुधमित्, होता देवव्रतः, होता मनुष्वतः, प्रणीर्यज्ञानाम्, रथीरध्वराणाम्, अतूर्तो होता, तूर्णिर्हव्यवाट्, आ देवो देवान्यक्षत्, यक्षदग्निर्देवो देवान्, सो अध्वरा करति जातवेदाः। ऐ. ब्रा. X. 2.

thrice, each half of that verse being kept separate from the next half (Āśv. V. 9. 15, 20–21) and 'om' being added to the end of the verse. At the end of the sixth verse the hotṛ repeats the āhāva (śo3mśāvo3m) and the adhvaryu responds with the pratigara 'śo3mśāmo daiva.' And then the hotṛ recites the 7th verse of Ṛg. III. 13 (which being the last verse of the śastra is called paridhānīyā, Āśv. V. 9. 23). At the end of the śastra, the adhvaryu responds with the word 'om' (Āśv. V. 9. 10). After the recitation of the śastra the hotṛ mutters 'the recitation is concerned in speech; to thee for glory' (Tai. S. III. 2. 9. 1). The adhvaryu then takes the Aindrāgna cup of Soma and the camasādhvaryus take the camasas and after āśravaṇa and pratyāśruta the adhvaryu issues a direction to hotṛ 'O reciter of an *uktha* (i. e. śastra), repeat a yājyā verse for Soma.' Then the hotṛ recites Ṛg. III. 25. 4 as the yājyā (Āśv. V. 9. 26) and when he utters 'vau3ṣaṭ' the adhvaryu offers the soma from his cup into the āhavanīya fire and after a second vouṣaṭ is uttered (with the words 'somasyāgne vīhi3 vau3ṣaṭ') the camasādhvaryus only shake the Nārāśaṁsa cups. The adhvaryu first partakes of the remnant from the soma cup and then the other priests who have camasas eat the contents of the camasas (Āp. XII. 28. 1–3).

It will have been noticed from the preceding description that there are six or seven elements connected with the recitation of the śastras: (1) the inaudible *japa*, (2) āhāva and pratigara, (3) tūṣṇīṁśaṁsa, (4) the *nivid* or *puroruk*, (5) sūkta, (6) japa of words 'uktham vāci' (Āśv. V. 10. 22–24) with certain words added that differ at different times (this is called ukthavīrya), to which the adhvaryu responds with 'ukthaśāḥ' &c., (7) the yājyā (Āśv. V. 10. 21).[2605] Only the Tūṣṇīṁśaṁsa does not occur in the other śastras.

In the Agniṣṭoma there are twelve *stotras* and twelve *śastras*. The words śastra and stotra in their etymological sense mean 'praise or laud,' but a stotra is a laud that is sung to a melody and a śastra is a laud that is only recited (vide Śabara on Jai. VII. 2. 17). A śastra always belongs to and follows a stotra. In the prātaḥsavana the hotṛ begins his āhāva after the

2605. Vide Haug's note 3 on pp. 177–178 to his tr. of Ait. Br. about the several ways in which the words 'uktham vāci' occur in the several śastras. The Ait. Br. speaks of these elements and in X. 1 expressly says 'ब्रह्म वा आहावः क्षत्रं निविद् विड् सूक्तम्'.

udgātṛ makes *himkāra* in the stotra he chants and in the other two savanas the hotṛ does so after the *pratihāra* element of the stotra (Āśv. V. 10. 1–3) when the prastotṛ draws his attention by uttering the word 'eṣā' (this) at the time of the *prastāva* of the last verse in the stotra.[2606] The ājyaśastra is the first śastra in the Agniṣṭoma and the āgnimāruta is the last. Jai. (II. 1. 13–29) establishes that when the vedic text says 'he recites the prauga śastra' or 'he chants the ājya stotra,' what is meant is not that these stotras and śastras are merely some subordinate matters in connection with the devatā of the rite, but they are really principal matters. In X. 4. 49 Jai. states that in the Agniṣṭut sacrifices there is no *ūha* of the stotras and śastras of the Agniṣṭoma, but they are sung and recited as in Agniṣṭoma. In the morning savana (pressing of soma), five stotras are chanted viz. Bahiṣpavamāna and four Ājyastotras; in the mid-day pressing five more viz. the mādhyandina pavamāna and four Pṛṣṭhastotras (vide Haug's tr. of Ait. Br. p. 193 n. 29) and in the evening pressing two stotras viz. the Ārbhava pavamāna and the Agniṣṭoma-sāman (viz. yajñā-yajñā vo &c.). The corresponding twelve śastras are: in the morning the Ājyaśastra (by hotṛ), Praugaśastra (by hotṛ) and three ājyaśastras (by maitrāvaruṇa, brāhmaṇācchaṁsin and acchāvāka, these three priests being called hotrakas); in the mid-day pressing the marutvatīya śastra (by hotṛ), niṣkevalya śastra (by hotṛ) and three more by the three assistants of the hotṛ; in the evening pressing the two śastras are vaiśvadevaśastra and āgnimārutaśastra (both by the hotṛ). The Bahiṣpavamāna is chanted in the Trivṛtstoma, the four ājyastotras and the mādhyandinapavamāna in the Pañcadaśastoma, the four Pṛṣṭha-stotras and the Ārbhavapavamāna in the Saptadaśastoma and the yajñāyajñīya in the Ekaviṁśastoma (vide Tāṇḍya Br. XX. 1. 1). *Stoma* means a group of verses and pañcadaśastoma and similar words mean that the verses (usually three) are increased to 15, 17, 21 &c. by repetition in various patterns (which are called *viṣṭuti*). There are three viṣṭutis of the pañcadaśastoma. These patterns differ in the order and number of repetitions. The prastotṛ marks the several turns, the number of verses and the order by means of small sticks a span long (called *kuśas*) cut from the udumbara tree and placed on a piece of cloth spread in the

2606. स्तोत्रमग्रे शस्त्रात्। एषेति प्रोक्त उद्गातर्हिङ्कारे प्रातःसवन आहरीरन्। प्रतिहार उत्तरयोः सवनयोः। आश्व. V. 10. 1–3; उत्तमां प्रस्तुत्यैषेति शंसितारमीक्षेत। लाट्यायन II. 6. 11.

midst of the singers. Vide Lāṭ. II. 6. 1-4. For example, the first ājyastotra (Rg. VI. 16. 10-12 = S. V. II. 1. 1. 4, ed. by Benfey) is raised to fifteen verses in three *paryāyas* (turns) of five verses each. If the three verses are denoted by a, b, c then the 15 verses will be a a a b c (first paryāya), a b b b c (2nd paryāya) and a b c c c (third paryāya). Vide Tāṇḍya Br. II. 4. The 2nd viṣṭuti of the pañcadaśastoma is represented by a a a b c, a b c, a b b b c c c and the third viṣṭuti by a b c, a b b b c and a a a b c c c (vide Tāṇḍya Br. II. 5-6). The word stoma is to be distinguished from *stotra*. The latter is a chant of a certain number of verses set to a certain melody out of those mentioned in the gānas of the Sāmaveda. Stobhas are musical interjections and flourishes introduced in the sāman chants such as 'hāu', 'hāi', 'I', 'ū', 'hum' (vide Chān. Up. I. 13). Hāu and hāi are stobhas employed in the Rathantara and Vāmadevya sāmans respectively. Jai. IX. 2. 39 defines stobha as that which is in addition to the letters of the ṛk (that is being chanted) and has other varṇas than those of the ṛk (adhikam ca vivarṇam ca Jaiminiḥ stobha-śabdatvāt). The word *sāman* means, no doubt, a chant (gīti), but since stobhas are necessary to bring out the melody and help in musical appreciation they are included in the connotation of the word sāman [2607] (Jai. II. 1. 36, IX. 2. 34-38). Śabara states that there are a thousand (numberless) means of adding to the charm of the melody (gīti), which only conveys certain notes produced by internal effort and which is denoted by the word sāman. The chant has a fixed extent and is sung on a ṛk verse. In order to effectuate that chant resort is made to change of letter (as in '*ognāyi*' for 'agna' in 'agna āyāhi vītaye), to *stobha* and the other devices stated below [2608]. Since the ṛk verses are

---

2607. शबर on IX. 2. 35 says 'ऋक्-स्तोभस्वर-कालाभ्यासविशिष्टाया गीतेः सामशब्दो वाचकः।'. The दुपटीका demurs to this and remarks 'यद्यपि स्तोभा न सामशब्दवाच्यास्तथाप्यभिदध्यन्ते। कथम्। सामोपकारकसुगक्षराणाम्। तस्योपकुर्वतो हेतुना साहाय्यं कुर्वन्तः स्तोभा उपकुर्वन्ति।'. In another place शबर says 'सस्तोभ-स्वरकालाभ्यासविकारायां हिंकारप्रणवप्रस्तावोद्गीथप्रतिहारोपद्रवनिधनवत्यासूचि सामशब्दोऽभियुक्तैरुपचर्यते।' on जै. VII. 2. 1.

2608. सामवेदे सहस्रं गीत्युपायाः। आह। क इमे गीत्युपाया नाम। उच्यते गीतिर्नाम क्रिया। सा आभ्यन्तरप्रयत्न-जनितस्वरविशेषाणामभिव्यञ्जिका। सा सामशब्दाभिलप्या। सा नियतपरिमाणा ऋचि च गीयते। तत्संपादनार्था अगक्षरविकारो विश्लेषो विकर्षणमभ्यासो विरामः स्तोभ इत्येवमादयः सर्वे समधिगताः समाम्नायन्ते। शबर on जै. IX. 2. 29. Vide footnote of सत्यव्रत on p. 12 of the Introduction to सामवेद vol. I (B. I. series) for explanation of these words.

sung to a certain melody the ṛks are the skeleton, the notes of the melody are the flesh that clothes the bare bones, they are super-imposed over the ṛk, and the stobhas are embellishments or flourishes like the hair on one's body. This very apt and happy figure is employed by the Sāmavidhāna Brāhmaṇa to illustrate the relationship of the ṛks, the notes and the stobhas.[2609] Each sāman chant is primarily connected with certain verses, e. g. when we speak of Rathantara without more the verses meant are Ṛg. VII. 32. 22-23 abhi tvā śūra &c.= S. V. II. 1. 1. 11 (Benfey) and S. V. vol. III. pp. 83-84 (B. I. series); and when one refers to the Vāmadevya sāman without further qualification the verses intended are Ṛg. IV. 31. 1-3 (kayā naścitra ābhuvat) = S. V. II. 1. 1. 12 (Benfey) and S. V. vol. III. pp. 87-89 (B. I.). These are called the own (svakīya) verses of the respective sāmans (vide com. on Drāhyāyaṇa II. 1. 1) and that one verse occurring in the pūrvārcika part of the Sāmaveda, which is the first in the sāman as set out in the Uttarārcika portion, is called the *yoni* of the sāman (Jai. VII. 2. 17 and Śabara thereon). But the verses that are the own verses of a sāman can be sung to another melody. Tāṇḍya XV. 10. 1 says 'the kavatī verses' are the verses 'kayā naścitra &c.' which are the svakīya verses of the Vāmadevya. When some texts say 'he chants the Rathantara on the Kavatī verses' what is meant is that, not minding the Vāmadevya melody to which the verses 'kayā naścitra &c.' primarily attach themselves, they are to be sung to the Rathantara melody in that particular rite. So the word sāman as applied to Rathantara, Bṛhat, Raivata and others means simply a melody and not one or more ṛk verses that are sung[2610] (vide Jai. IX. 2. 1-2).

Jaimini deals in about 60 adhikaraṇas with matters arising out of the relation of the Sāmaveda to sacrifices in V. 3, IX. 1, IX. 2, X. 5-6 and elsewhere. Some of the conclusions are very interesting and may be briefly indicated; viz. the ūhagrantha is of human authorship (IX. 2. 1-2), the ṛk is principal and the melody is an attribute of it (IX. 2. 3-13), the whole

2609. तस्य ह वा एतस्य साम्न ऋगेवास्थानि स्वरो मांसानि स्तोभा लोमानि । सामविधानब्राह्मण I. 1. 10. The Calcutta edition of the Sāmaveda (vol. II pp. 519-542) contains a pariśiṣṭa on *stobhas*. Similarly the छान्दोग्य I. 6. 1 says द्वयमेवर्गग्निः साम तद्वेतदेतस्यामृच्यर्चूर्ं साम तस्माद्वच्यर्चूर्ं साम गीयते ॥

2610. स्वरादिविशेषाद्यपूर्वीमात्रस्वरूपमृगक्षरव्यतिरिक्तं यद् गानं तदेव स्वसंज्ञार्थो । सायण's Introduction to सामवेद vol. I. p. 10 (B. I. series).

melody is to be sung on each ṛk of the sāman (IX. 2. 14–20), the verses of a sāman should as far as possible be in the same metre (IX. 2. 21–22), the ṛk verses set out in the Uttarārcika are to be taken for singing the melody on (IX. 2. 23–24), that two verses have to be arranged as three by repetition of the 4th or last pāda in certain melodies (IX. 2. 25–27), that in the Yajñāyajñīya sāman for the words 'girā girā' in the original 'irā irā' has to be substituted in the melody (IX. 1. 50–51).

After the recitation of the śastra and the partaking of remnants of soma the adhvaryu takes the Vaiśvadeva cup, fills it from the droṇakalaśa, touches it with two kuśa blades, hands over the blades to the prastotṛ priest and urges the sāman priests to chant a stotra. This is the mode in all cases of dhurya stotras. Stotras other than the Bahiṣpavamāna are chanted near the Audumbarī post in the *sadas*; the prastotṛ sits facing the west behind the adhvaryu, the udgātṛ sits to his west facing the north, and the pratihartṛ sits facing udgātṛ, but looking towards the south-east (Tāṇḍya VI. 4. 14, Drāhyāyaṇa III. 3. 28). The stotra chanted after the Vaiśvadeva cup is taken and the three following ones are called ājyastotras[2611] (com. on Āp. XII. 28. 6). The 2nd śastra is called *prauga* (Āśv. V. 10. 6) which is recited after the taking up of the Vaiśvadeva cup and is supposed according to the Ait. Br. XI. 2 to confer food. This śastra is made up of Ṛg. I. 2 and 3 (in all 21 verses), which are divided into seven triplets addressed to seven deities in order viz. Vāyu, Indra-vāyu, Mitra and Varuṇa, Aśvins, Indra, Viśve Devas, Sarasvatī. Each of the seven triplets is preceded by a verse called *puroruk*. The first puroruk is preceded by 'hiṁ' and 'bhūr-bhuvaḥ svaro 3m.'[2612] The 2nd verse of Ṛg. I. 2 is repeated thrice (and not the first as is usual, com. on Āśv. V. 10. 6). At the end of the recitation the priest mutters

---

2611. The first ājyastotra is Ṛg. VI. 16. 10–12, S. V. II. 1. 1. 4 (Benfey), S. V. vol. III. pp. 14–15; the 2nd is Ṛg. III. 62. 16–18, S. V. II. 1. 1. 5 (Benfey) and S. V. vol. III. pp. 16–17 (B. I. series), the third is Ṛg. VIII. 17. 1–3, S. V. II. 1. 1. 6 (Benfey), S. V. vol. III. pp. 18–19 (B. I. series), and the 4th is Ṛg. III. 12. 1–3, S. V. II. 1. 1. 7 (Benfey), S. V. vol. III. pp. 19–21 (B. I. series).

2612. The first triplet with introductory words and puroruk will be हिं भूर्भुवः स्वरो3म् । शो3सावो3 वायुरग्रेगा यज्ञप्रीः साकं गन्मनसा यज्ञम् । शिवो नियुद्भिः शिवाभो3 वायवाहि &c. Vide Haug's tr. of Ait. Br. pp. 158–159 for the seven puroruk verses and how they are to be recited. Eight puroruk verses are set out at the end of the Nirṇayasāgara ed. of the Ṛgveda in *pothī* form. The puroruk वायुरग्रेगा &c. is in Tai. Br. II. 4. 7 and Vāj. S. 27. 31.

'ukthaṁ vāci ślokāya tvā' (instead of 'ghoṣāya tvā'), and Ṛg. I. 14. 10 is the yājyā of the Prauga-śastra. This cup is offered and the remnants of it and of the camasas are drunk by the priests. Then from the Ukthyasthālī containing soma a third is taken for filling three cups to Mitra and Varuṇa, Indra, and Indra-Agni. Stotras and śastras follow at each of these three cups, the śastras being repeated respectively by the maitrāvaruṇa, brāhmaṇāccha(ṁ)sin and acchāvāka. For want of space all these three śastras cannot be set out at length here. Āśv. V. 10. 26 very succintly incticates them. Each of these śastras has four parts, (1) a triplet called *stotrīya* (because those very verses have been chanted in the corresponding stotra); (2) then another triplet called *anurūpa* which should agree in metre, deity and even the sage (according to some) with the stotrīya triplet (Āśv. V. 10. 26-27); (3) the core or principal part of the śastra, hence called uktha-mukha (vide Śāṅ. VII. 11. 3); (4) a yājyā verse. For example, in the maitrāvaruṇa śastra, Ṛg. III. 62. 16-18 constitute the stotriya triplet (those three verses are chanted as the 2nd ājyastotra), Ṛg. V. 71. 1-3 form the anurūpa triplet, Ṛg. V. 68. 1-5 and Ṛg. VII. 66. 1-9 are the uktha-mukha and Ṛg. VII. 66. 19 is the yājyā of the śastra. This brings the prātaḥsavana to an end, and the adhvaryu makes an offering at the end with the words 'May Agni protect us in the morning savana'. At the bidding of the adhvaryu the maitrāvaruṇa asks all the priests to come out of the sadas and they come out by the way they went in.

Then before the mādhyandina savana begins the priests again enter the sadas, and the yajamāna enters by the eastern door. The procedure of the mid-day pressing is in main outlines the same as that of the morning one (Āp. XIII. 1. 2). There is no hurry in the first two pressings, but the third pressing is got through with speed (Āp. XII. 29. 12). There are a few points of difference. In the mid-day pressing there are no cups for the joint deities (dvidevatya grahas), no cups for the seasons (Āp. XIII. 1. 4). The great pressing is done as in the morning pressing, but in a loud voice (Āp. XIII. 1. 8). In this pressing the vasatīvarī waters are taken in the hotṛcamasa, are handed over to the yajamāna and become the nigrābhyā for pressing soma. The cloth in which soma stalks are tied is loosened and given for wearing as a turban to the priest called grāvastut and it is taken back from him after he recites the praise of the crushing stone (Āp. XIII. 1. 5 and com.). The cups taken are five, viz. śukra and manthin, āgrayaṇa, two marutvatīya and ukthya

(also taken either before both marutvatīya cups or between the two). The grāvastut (praiser of the stones used in crushing soma stalks) enters the havirdhāna pavilion by the eastern door, throws away a blade of kuśa on a spot which is to the north-east of the northern point of the axle of the southern havirdhāna cart and stands opposite the soma stalks with face to the south-east. He takes the cloth in his joined hands, folds it round his head and face from left to right thrice (so as to make it look like a turban). When the stalks of soma are placed for being crushed he should recite certain verses by the middle tone (Āśv. V. 12. 7-8), which is the tone for all vedic texts in the mid-day pressing. The texts repeated by the grāvastut are (Āśv. V. 12. 9-11): Ṛg. I. 24. 3, V. 81. 1, VIII. 81. 1, VIII. 1. 1, X. 94 (this hymn is called Arbuda), Ṛg. X. 76 and 175. Before the last verse of Ṛg. X. 94, the two hymns Ṛg. X. 76 and X. 175 are recited. Either between the latter two hymns or after them or before them he recites as many pavamāna verses as are required up till the taking up of the cups, finishes the last verse of Ṛg. X. 94 and hands back the turban to the sacrificer. Āśv. further directs that from the hymn Ṛg. X. 94 which has 14 verses the 4th is taken out and the last is the paridhānīya (the finishing verse) and the rest (12 verses) are divided into four triplets and each of the triplets is either preceded or followed by a triplet out of the following viz. Ṛg. I. 91, 16-18, IX. 8. 4, IX. 15. 8, IX. 107. 21, VIII. 72. 8, VIII. 72. 16, IX. 17. 4, IX. 67. 14-15 (which together come to twelve verses). The four triplets are respectively recited by the grāvastut at the time of sprinkling water on the soma stalks, pounding with the hands, extracting juice, and collecting the soma juice in the ādhavanīya trough (Āśv. V. 12. 15-19). In the mid-day pressing the place of the Bahiṣpavamāna is taken by the Mādhyandina-pavamāna stotra (Āp. XIII. 3. 7). This stotra consists of Ṛg. IX. 61. 10-12, X. 107. 4-5, X. 87. 1-3, that is Sāmaveda II. 1. 1. 8-10 (Benfey) and S. V. vol. III. pp. 22-23, 41-42, 78-80. The yajamāna mutters several texts before the mādhyandina pavamāna is chanted and during its chanting (Āp. XIII. 3. 1).

After the chanting of the Mādhyandina-pavamāna comes the rite called Dadhigharma, if the sacrificer has performed the Pravargya rite (Āśv. V. 13. 1). The pratiprasthātṛ brings curds in the ladle (sruc) made of udumbara; the curds are heated on the āgnīdhrīya fire. The hotṛ when asked ' is the

havis heated' repeats Ṛg. X. 179. 2 as the anuvākyā and X. 179. 3 is the yājyā and after he says 'vau3ṣaṭ' the curds are offered in the āhavanīya, and when he repeats 'agne vīhi' and also a second vauṣaṭ another offering of the heated curds is made and the remnants of curds are eaten by those who partake of the remnants in the Pravargya rite. Then the paśupuroḍāśa (of the animal killed in the morning) and the other offerings (such as puroḍāśa on eleven potsherds) are made and the remnants eaten. Then ten camasas are filled (including that of acchāvāka). Then offerings of soma from the śukra and manthin cups are made respectively by the adhvaryu and pratiprasthātṛ and the camasādhvaryus offer the soma taken in their camasas and the remnants are partaken by the priests. After this come the offerings of ājya called dakṣiṇāhuti or dākṣiṇa homa (Kāt. X. 1. 4., Śat. IX. 2. p. 910). The procedure here resembles the Vaisarjina homa described above (p. 1158). Gold is tied by the hem of the garment that covers the yajamāna and his family, it is placed in the ājya contained in the juhū, and two āhutis are offered with 'udu tyam' (Ṛg. I. 50. 1) and 'citram (Ṛg. I. 115. 1) in the gārhapatya fire, the piece of gold is taken out and the yajamāna holding that gold piece and ājya in his hand approaches the dakṣiṇās (the various articles that constitute the fee) placed to the south of the mahāvedi. Vide Śat. Br. IV. 3. 4 about dakṣiṇā (derived from 'dakṣay' to invigorate) where it is stated that no priest should officiate at a soma sacrifice for a fee less than one hundred cows. Āp. (XIII. 5. 1—XIII. 7. 15) gives numerous rules about the dakṣiṇā to be distributed among the sixteen priests. The dakṣiṇā may consist of 7, 21, 60, 100, 112, or 1000 cattle or an unlimited number or a man may give all his wealth except the share of the eldest son[2613] and when he gives a thousand cattle or all his wealth he has to give one mule in addition (Āp. XIII. 5. 1-3). He may also give goats, sheep, horses, slaves, an elephant, clothes, chariots, corn of various kinds, asses. A man may give his own daughter in marriage (in the daiva form) as fee (Āśv. V. 13. 7). With regard to the cows meant as fee Āp. states that the yajamāna drives them with the black antelope skin so as to form them into four groups. One group (i. e. $\frac{1}{4}$ of the whole number) is given to the adhvaryu and his assistants

2613. Prof. Keith in 'Religion and Philosophy of the Veda' part 2 p. 330 says 'after which the fees should be given consisting of 7, 21.....cattle or all the sacrificer's goods save his eldest son'. He obviously means 'save his eldest son's share'.

in such a way that the pratiprasthātṛ, neṣṭṛ and unnetṛ receive respectively half, one-third and one-fourth of what the adhvaryu gets; that is, as stated by Kāt. X. 2. 25 and the com. on Āp. XIII. 2. 12, twelve cows are given to each of the four principal priests, 6, 4 and 3 respectively to each of their assistants in the order stated above in note 2228 (supposing one hundred cows are to be distributed). Jai. (as indicated below) and Manu VIII. 210 refer to this rule of distribution. The āgnīdhra is the first recipient of gifts, receiving a piece of gold, pūrṇapātra and a pillow woven with threads of all colours. The pratihartṛ is the last recipient (Āp. XIII. 6. 2, Kāt. X. 2. 39). Gifts are made to the priests while they sit inside the *sadas* and to the adhvaryu and his assistants in the havirdhāna pavilion. To a brāhmaṇa of the Atri gotra (who is not a ṛtvik) a gold piece is given before everybody else or after the āgnīdhra (Āp. XIII. 6. 12, Kāt. X. 2. 21). After the āgnīdhra come brahmā, udgātṛ and hotṛ (Kāt. X. 2. 26). Apart from the gifts meant for the ṛtviks something is given according to ability and inclination to the camasādhvaryus, the sadasya and to sight-seers in the sadas (they are called prasarpakas), except to those who belong to the Kaṇva or Kaśyapa gotra or those who ask for a gift (Āp. XIII. 7. 1-5, Kāt. X. 2. 35). Āp. (XIII. 7. 6-7) says that generally no gift is to be given to one who is not a brāhmaṇa, but a gift may be given to a non-brāhmaṇa who knows the Vedic lore, while no gift is to be made to a brāhmaṇa who is not learned. Kāt. X. 2. 38 states that the wife also joins in making gifts. After the anuvākya is repeated by the maitrāvaruṇa for the marutvatīya cup to be described below no gifts are made (Āp. XIII. 7, 14, Kāt. X. 3. 2). On making the gifts the sacrificer does obeisance (namaskāra) to the priests and utters an invocation as to animals donated in the words 'who gave to whom?'[2614] Drāhyāyaṇa (V. 3. 14-19) states that before accepting a gift every priest murmurs the famous mantra 'I take thee at the impulse of god Savitṛ.... &c' (Tāṇḍya I. 8. 1) and after receiving the gift each donee murmurs 'who gave to whom' (Tāṇḍya I. 8. 17). The gifts are taken away by the path between the āgnīdhrīya shed and the sadas and then by the tīrtha (Drāhyāyaṇa V. 3. 13). Jai. (X. 2. 22-28) declares that the making of gifts to the priests is not merely a formal act as part of the sacrificial rites, but is intended to induce the priests to give

2614. क इदं कस्मा... कामेतत्ते। दृष्टिरसि यौस्त्वा ददातु पृथिवी प्रतिगृह्णात्विथत्यतीतारस्वजुमन्त्रयते। Āśv. V. 13. 15. For क इदं &c. vide note 2391.

their services in return for the gifts. In Jai. X. 3. 39–49 it is concluded that in the words 'the dakṣiṇā is 112' the vedic text refers only to cows and not to the various kinds of corns, in X. 3. 50–52 that the division of the gifts is to be made by the sacrificer and not left to be done by the priests and that all the priests do not share equally, but according to the Vedic texts some get half (they are ardhinaḥ), others one-third (they are called tṛtīyinaḥ) and still others one-fourth (X. 3. 53–55). Jai. XII. 1. 32 states that as valuable gifts are given in Somayāga, there is no rice cooked (called anvāhārya) for the priests in the iṣṭis of Somayāga as there is in darśapūrṇamāsa (note 2390).

When the gifts are taken away by the priests the sacrificer casts away the antelope horn in the cātvāla pit with two mantras (Āp. XIII. 7. 16). Jai. (IV. 2. 16–19) says that this casting away is the final disposal of the horn (it is a pratipattikarma) and (in XI. 3. 13–14) that this casting takes place on the last day in sacrifices like the Dvādaśāha. The adhvaryu offers five offerings of ājya called Vaiśvakarmaṇa (i. e. for Viśvakarman) in the āgnīdhra fire with five mantras from Tai. S. III. 2. 8. 1–3 (Āp. XIII. 7. 17 and Sat. IX. 2. p. 911). The adhvaryu and the pratiprasthātṛ take two cups for (Indra) Marutvat and offer them. The remnants of the cup in pratiprasthātṛ's hand are poured in the adhvaryu's cup; from this mixture a portion is poured in the cup of the pratiprasthātṛ. The priests partake of the remnants. Then a third Marutvatīya cup is taken to the accompaniment of the śastra called marutvatīya[2615]

2615. The parts of the मरुत्वतीयशस्त्र may be briefly indicated here from Āśv. V. 14. 3ff. हिं भूर्भुवः स्वरो3म् । अध्वर्यो शों3सावो3म् (आहावः) । शों3सामो वैवो3म् (प्रतिगरः) according to Ait. Br. or शों3सामो वैव according to Tai. S. (vide note 2602 above). Then Ṛg. VIII. 68. 1–3 (triplet called pratipad), Ṛg. VIII. 2. 1–3 (a triplet called anucara), Ṛg. VIII. 53. 5–6 (called Indranihnava pragātha); Ṛg. I. 40. 5–6 (called Brāhmaṇaspatya pragātha); Ṛg. III. 20. 4, I. 91. 2, I. 64. 6 (three verses called Dhāyyā); VIII. 89. 3–4 (Marutvatīya pragātha), Ṛg. X. 73. 1–6 ; a *nivid* 'Indro Marutvān' (Āśv. V. 14. 20, Śāṅ. VIII. 16. 1 gives the whole in 20 short clauses); Ṛg X 73. 7–11 ; japa in the words 'ukthaṁ vacīndrāya śṛṇvate tvā' (Āśv. V. 14. 26); and lastly Ṛg. III. 47. 4 as the yājyā. This śastra follows after and is connected with the Mādhyandina pavamāna stotra (com. on Kāt. X. 3. 7). According to Kāt. X. 3. 8 the pratigara of adhvaryu here is 'modāmo daiva.' According to Āśv. V. 14. 7–8 pratipad and anucara consist of three verses and pragāthas consist of two ṛk verses. A pragātha is called Bārhata when the two verses are in Bṛhatī and Satobṛhatī metres and it is called Kākubha when there is a combination of verses in the Kākubh and Satobṛhatī metres.

recited by the hotṛ (Āp. XIII. 8. 2) and at the end of the recitation of that śastra it is offered. Then a cup for Mahendra is taken. The stotra for Mahendra is called Pṛṣṭha,[2616] and is chanted at this time, being sung in Ratha ntara melody (Lāṭ. II. 9. 7, Āśv. V. 15. 2-3). Then follows the Niṣkevalya śastra by the hotṛ. After the Māhendra cup is offered, the pratiprasthātṛ, neṣṭṛ and unnetṛ take up three grahas (cups) called Atigrāhya respectively for Agni, Indra and Sūrya (Āp. XIII. 8. 7-9). Then three Ukthya cups are offered as in the morning pressing. Then three Pṛṣṭhastotras[2617] are chanted,

2616. The Ṛg. verses of the Rathantara sāman are (VII. 32.22-23); अभि त्वा शूर नोनुमोऽदुग्धा इव धेनवः । ईशानमस्य जगतः स्वर्दृशमीशानमिन्द्र तस्थुषः ॥ न त्वावाँ अन्यो दिव्यो न पार्थिवो न जातो न जनिष्यते । अश्वायन्तो मघवन्निन्द्र वाजिनो गव्यन्तस्त्वा हवामहे ॥. These two are respectively in the Bṛhatī and Paṅktī metres and together constitute a Bārhata Pragātha. Vide Jai. IX. 2. 25-28 and Śabara thereon. In chanting these to the Rathantara melody they are to be made into three, by repeating the 4th pāda of the first with the first half of the 2nd verse and the last of this with the latter half of Ṛg. VII. 32. 23. The Wai Ms. writes it as follows: हुम् । ओंभित्वा शूर नोनुमो वा । ओं मादुग्धो इव धेनव ईशानमन्य जगतः सुवा २ ३ ईशाम् । ओं ईशानमा २ ३ इन्द्रा ३ । सूस्थू २ ३ ४ षा ओवा ६ हाउवा ॥ अंस् ॥ ईशोवा । ओं नामिन्द्रसुस्थुषो न त्वावाँ अन्यो दिवियाः ना पा २ ३ र्थिवाः । ने जातो नो २ ३ जाँ ३ । नो यिष्या २ ३ ४ ताउ वो ६ हाउवा । अंस् ॥ ने जोवो । ओं तो न जनिष्यते अश्वायन्तो मघवन्निन्द्र वा २ ३ जिनाः । गव्यन्तस्त्वा २ ३ हा ३ । वामा २ ३ ४ हो ओ वो ६ हाँ उवा । अंस ॥ The Wai Ms inserts after जगतः, दिवियाः, मघवन् certain स्तोभs in which the letter भ occurs several times e.g. ओं वाग्भाभु भोभि भभें भ भ भी भो भ भ भ भ भ भः । (after जगतः). This is probably in accordance with लाट्यायनश्रौत VII. 11. 6-8. ताण्ड्य. VII. 6. 11 says that अंस् is the निधन of रथन्तर ; vide ताण्ड्य VII. 7. 1 and 3 for प्रस्ताव and प्रतिहार of रथन्तर. The Ms. in the Bombay Asiatic Society's Library places the letter 'ra' wherever in the other two there is a vertical stroke and it has no figure over 'him' and 'om.' There are a few other differences also (not noted here). In the B. I. edition (vol. III. p. 85) the scheme is a good deal different as the following (only the first verse is taken) will show: आभित्वा शूर नोनुमाः । अदुग्धा आयि । वो ३ धायिनो ३ वाः ईशानमस्य जगतः सुवर्दृ । शाँ २ ३ ४ मे ही । ईशाना २ ३ ४ मी । द्रंसू ३ ओंउवा २ ३ । एँ ३ । स्थुषँओं ॥

2617. The 2nd पृष्टस्तोत्र is वामदेव्य, Ṛg. IV. 31. 1-3, Sāmaveda II. 1. 1. 12 (Benfey) and S. V. vol. III. pp. 87-89 ; the 3rd is नौधस, Ṛg. VIII. 88. 1-2, Sāmaveda II. 1. 1. 13 and S. V. vol. III. pp. 91-92 ; the 4th is कालेय, Ṛg. VIII. 66. 1-2, Sāmaveda II. 1. 1. 14 (Benfey) and S. V. vol. III. pp. 101-102.

each followed respectively by the śastras recited by the maitrāvaruṇa, brāhmaṇācchaṁsin and acchāvāka. This closes the mid-day pressing of soma.

The evening pressing commences with the taking of the Āditya cup (a cup the deity of which is Aditi). In the third pressing the Vedic texts are to be uttered in the highest tone (Āśv. V. 17. 1). The procedure in this pressing resembles that of the mid-day pressing (Sat. V. 3. p. 915). The adhvaryu, the sacrificer, the pratiprasthātṛ, āgnīdhra and unnetṛ enter the havirdhāna shed by the eastern door and the wife enters by the western door (Kāt. X. 3. 2-3). The doors of the havirdhāna shed are shut when there are many persons sitting inside the vedi (Āp. XIII. 9. 2, Sat. IX. 3. p. 915). The adhvaryu takes into the Āditya cup a part of the remnants of the soma from the cups for the joint deities. In the middle or western part of the āditya cup he adds curds and then again takes the whole of the remnants of the soma from the cups for the joint deities (that has been poured in the ādityasthālī). He stirs the contents of the cup with the *upāṁśusavana* stone used in crushing the soma stalks and mixes them well together. He then takes out the stone and places it among the stones used for crushing soma stalks. The āditya cup is not placed down, but is covered with darbhas or with the right hand of the adhvaryu, who comes out after the doors of the havirdhāna are opened, takes it to the uttaravedi, stirs the contents with darbhas in such a way that a few drops fall down out of the cup. After the usual praiṣa and the other procedure the adhvaryu throws the darbhas on the āhavanīya and offers the contents of the āditya cup into fire. At the time of offering the contents and also immediately after doing so he does not look at the offering but looks elsewhere (Āśv. V. 17. 3). He does not partake of the remnants of soma in the āditya cup but keeps it with the remnants of soma therein among the several vessels. He puts on the ṛīṣa (the dregs of soma stalks) that is left after the two pressings the stalks (aṁśu) that are in the adābhya vessel and the upāṁśupātra and silently extracts soma juice therefrom. In the āgnīdhra shed the sacrificer's wife prepares by churning 'āśir' (milk mixed with soma) and enters the havirdhāna shed by the western door. The yajamāna enters by the eastern door, spreads on the mouth of the pūtabhṛt trough the strainer and pours thereon along with his wife the *āśir* with four mantras (Tai. S. III. 2. 8. 4-5). He

fills the āgrayaṇa cup from four streams (the fourth being from the remnants of soma in the ādityapātra), while in the mid-day pressing there are only three streams (Sat. IX. 3. p. 918, Āp. XIII. 10. 11). In this pressing no turban is given to the grāvastut priest. Then the Vipruḍ-ḍhoma is performed. The Ārbhava[2618] pavamāna is then chanted on the lines of the Mādhyandina pavamāna.

The *havis* prepared from the various limbs of the (savanīya) paśu sacrificed in the morning is then offered (Āp. XIII. 11. 3, Āsv. V. 17. 4). After the iḍā is partaken of by the hotṛ, the puroḍāśa (cake baked on 12 potsherds, Sat. IX. 3. p. 920) is offered to Indra and the rest of the procedure up to the laying down of the Nārāśaṁsa cups is followed. Then soma of the third pressing is offered by the adhvaryu from the hotṛcamasa and by the camasādhvaryus from their camasas and as elsewhere the priests and camasādhvaryus partake of the remnants. After the Nārāśaṁsa cups are laid down each of the priests who drink soma from camasas takes from the softest part of the puroḍāśa three small balls (or pills), places them on the ground to the south of his own camasa and they then offer them to their own father, grand-father and great-grand-father with the appropriate mantras[2619] (Āp. XIII. 12. 9, Āśv. V. 17. 5). They mutter the namaskāra mantras (vide note 2438 above) and the sacrificer utters the Ṣaḍ-ḍhotṛ mantras (Āp. XIII. 12.

2618. The third pressing is connected with the Ṛbhus as the praiṣa of the adhvaryu shows: तृतीयस्य सवनस्यर्भुमतो विभुमतः प्रभुमतो वाजवतः सचितुवतो बृहस्पतिवतो विश्वदेव्यावतस्तीर्णां आशीर्वत इन्द्राय सोमान्प्रस्थिताञ्प्रेष्य (Sat. IX. 3. p. 921, Āp. XIII. 12. 2). The Ṛbhus are three viz. Ṛbhu, Vibhvā and Vāja (Ṛg. I. 161. 6 and IV. 33. 3, IV. 34. 1) and their exploits are narrated in Ṛg. 1. 20, I. 110 and 111, I. 161, Ṛg. IV. 33-37 &c. The Ait. Br. (28. 4) narrates the myth that the Ṛbhus were mortals but were made immortal by Prajāpati and were given a share in the third pressing. It is therefore that the first stotra in the third pressing is called Ārbhava-pavamāna. This स्तोत्र is constituted by Ṛg. IX. 1. 1-3, IX. 108. 1-2, IX. 106. 1-3, IX. 101. 1-3, IX. 75. 1-3 = Sāmaveda II. I. 1. 15-19 (Benfey) or S. V. vol. III pp. 105-107, 115-116, 121-123, 131-133, 165-169.

2619. Vide note 2435 for the mantras. Āśv. and Lāṭ. II. 10. 4 say the mantra is 'अत्र पितरो मादयध्वं यथाभागमावृषायध्वमिति ।.' Kāt. X. 5. 11 notes that the procedure of Piṇḍapitṛyajña from piṇḍadāna to smelling the piṇḍas is observed but without water and (in X. 5. 12) gives it as his opinion that it is really the yajamāna's ancestors that are offered pieces of the puroḍāśa and not those of the camasādhvaryus.

10-11) which are in Tai. Ār. III. 4. Then the Sāvitra cup is offered (Āp. XIII. 13. 1, Āśv. V. 18. 1). The Vaiśvadeva cup is thereafter filled from the Pūtabhṛt trough, but there is no stotra chanted for this cup; the vaiśvadeva śastra however is recited by the hotṛ (Āśv. V. 18. 5-13). Then rice (caru) is boiled for being offered to god Soma. The adhvaryu wears the sacred thread in the prācīnāvīta form, cuts off to the south of the āhavanīya one oblation from the boiled rice with his right hand and another with the mekṣaṇa, crosses to the north of the āhavanīya, and with his face to the south offers in the southern part of the āhavanīya fire the oblations of rice, the yājyā being 'tvaṁ soma pitṛbhiḥ saṁvidānaḥ' (Ṛg. VIII. 48.13). Ājya is poured on the remnants of the *caru* in the pot, the adhvaryu sees his face in the clarified butter (Āśv. V. 19. 4), anoints his eyes with the ājya by means of his thumb and ring-finger and then hands over the pot of rice (with ājya therein) to the three udgātṛ priests, who see their reflections in the ājya and if they cannot see their reflection (which is an evil omen) then more ājya is poured and two mantras are repeated (Āśv. V. 19.5, one being 'bhadram karṇebhiḥ' Ṛg. I. 89. 8) and then again they look for their reflection in the ājya. The āgnīdhra carries lighted roots of darbhas to the several dhiṣṇyas and establishes them thereon as fires and the adhvaryu pours ājya taken afresh in a pot over them while the darbhas are glowing (Āp. XIII. 14. 5-6, Sat. IX. 4 p. 929). He keeps some ājya in the pot, takes the cup called Pātnīvata,[2620] fills it from the soma in the Āgrayaṇasthālī, mixes in it the ājya that remains after pouring over on the dhiṣṇya fire-brands and offers it into the northern part of the fire. Jai. (in III. 2. 33-37) lays down several propositions about this cup viz. that it is offered only to Agni Patnīvat and not also to Indra-Vāyu and other joint deities (though the soma in the āgrayaṇasthālī had in it the remnants of the contents of the grahas for joint deities), that, though the mantra in offering it contains the word Tvaṣṭṛ ('O! Agni Patnīvat! drink soma joined with god Tvaṣṭṛ') that cup of soma is offered only to Agni Patnīvat and not to Tvaṣṭṛ also and

2620. The Pātnīvata cup is offered to Agni Patnīvat. The yājyā verse repeated in a low voice by the āgnīdhra (according to Āśv. V. 19. 7) for it is Ṛg. III. 6. 9 ऐभिरग्ने सरथं याह्यर्वाङ् नानारथं वा विभवो ह्यश्वाः। पत्नीवतस्त्रिंशतं त्रींश्च देवाननुष्वधमा वह मादयस्व ॥). According to Āp. XIII. 14. 8, Sat. IX. 4. p. 930, the text uttered with svāhā is ; 'अग्नाउइ पत्नीवन्त्सजूर्देवेन त्वष्ट्रा सोमं पिब स्वाहा ।' (वाज. सं. VIII. 10, तै. सं. I. 4. 27. 1).

that, though Rg. III. 6. 9 (the yājyā verse) contains a prayer about the thirty-three gods, the Pātnīvata is not to be supposed to be offered to them also. The adhvaryu then issues various directions to the several priests (Āp. XIII. 14. 11, Sat. IX. 4. p. 930). The āgnīdhra sits on the lap[2621] of the neṣṭṛ and partakes of the remnants of the Pātnīvata cup (Āśv. V. 19. 8, Kāt. X. 6. 24), while so sitting. He washes that cup on the mārjālīya and keeps it on the *khara*. The camasas of the hotṛ and others are filled by the unnetṛ in such a way that no soma is left, the two jars of soma are wiped with the *daśās* and they are all kept with mouths turned downwards. The adhvaryu starts the udgātṛ priests on their chant of Yajñāyajñīya stotra (Āp. XIII. 15. 3), which is the principal stotra of the Agniṣṭoma (Sat. IX. 4. p. 931 calls it 'Agniṣṭoma Sāman'). All those priests who are to chant the stotra and the choristers cover their heads together with the ears.[2622] Those who come as sight-seers into the sadas should join in the chant as choristers (Āp. XIII. 15. 6). When the udgātṛ makes the hiṅkāra of the yajñāyajñīya stotra he looks at the sacrificer's wife who is brought by the neṣṭṛ near the udgātṛ. When the nidhana (*ānale*) of the first verse is being sung the wife removes the garment from her right thigh and with her face to the north pours the *pānnejanī* water on her thigh up till the prastāva of the third stotrīya of the first *paryāya*[2623] (so as to leave no water in the jar). The wife retires to her shed when the udgātṛ asks her to go or when he has looked at her thrice and she has poured water thrice (Kāt. X. 7. 5-6). While the chant proceeds the sacrificer repeats the *saptahotṛ* mantras (note 2393 above). The Yajñāyajñīya sāman is Rg. VI. 48. 1-2 = Sāmaveda

---

2621. Āp. XIII. 15. 1 and Sat. IX. 4. p. 931 do not apparently like this sitting on the lap of the neṣṭṛ and so give an option 'नोपस्थ आसीत यद्युपस्थ आसीत क्लीबः स्यात्।' सत्याषाढ.

2622. According to Āp. XIII. 15. 5 it is optional to cover the ears. According to Sat. IX. 4. p. 931, all persons whether priests or sightseers that are in the sadas cover their heads and ears and the yajamāna may do so or not.

2623. यज्ञायज्ञीयस्य हिङ्कारं प्रति पत्नीमुद्वातेक्षेत। निधनं प्रति पत्नी दक्षिणमूरुमभिविक्षेत्। तृतीयायां स्तोत्रीयायां प्रस्तुतायां सर्वं तदुदकं निनयेत्। लाट्यायनश्रौत II. 10. 15-17 and द्राह्यायण VI. 2. 15-17; उपरि वूरमुदेवावक्षणानामाविष्कर्तोः। अप्रीतमुखस्या जायत इति विज्ञायते। आप. XIII. 15. 11. Vide also ताण्ड्यब्रा. III. 7. 8-14 for this.

II. 1. 1. 20 (Benfey) and S. V. vol. III. p. 175-177.[2624] After this comes the recitation of the Āgnimāruta śastra (Āśv, V. 20. 6) which is to be done in the druta (quick) mode of recitation.[2625] While the hotṛ recites Rg. X. 9. 1-3 (the hymn beginning with 'āpo hi ṣṭhā'), which is part of this śastra he touches water separately at each verse, the other priests touch him, they all remove the covering from their heads,[2626] the hotṛ utters the āhāva, the adhvaryu utters the pratigara after splashing water. There are āhāvas when the four verses of Rg. VI. 47. 1-4 are being recited in the Āgnimāruta śastra. According to Sat. IX. 4. p. 932 the āhāva at the beginning of the first

---

2624. The verses of the Yajñāyajñīya sāman are: यज्ञायज्ञा वो अग्नये गिरागिरा च दक्षसे । प्रप्र वयममृतं जातवेदसं प्रियं मित्रं न शंसिषम् ॥ ऊर्जो नपातं स हिनायमस्मयुर्दाशेम हव्यदातये । भुवद्वाजेष्वविता भुवद्वृध उत त्राता तनूनाम् ॥ (ऋ. VI. 48. 1-2). The first is in the Bṛhatī metre and the 2nd in Satobṛhatī. These two verses are to be turned into three. The sāman is as follows (from Wai Ms). हुम् । यँज्ञा ५ यज्ञा ३ वो ३ मायाइ । ओ माइरा इरा वो ३ दाक्षा ३ साइ । पँप्रीं ३ वयममृतं जाता २ ३ वोहुम्माइ । दो ३ साम् । प्रायं मित्रा ५ सुशा ३ सिषाउ । वो ३ ५ ॥ प्रायाम् । ओ माइत्रा ५ सु ३ शा ५ सी ३ षामूर्जो नपा र त ५ सहिनाया २ ३ मोहुम्माइ । स्मो३यूः । दाशेम हव्यदा र तायाउ । वो ३ ५ ॥ दाशे । ओ माहाव्या ३ दाता ३ याइ । भुवद्वाजे र ष्वविता भू २ ३ वोद्धुम्मायि । वो ३ धाइ उत त्राता तनू र नाउ । वो ३ ५ ॥ The Poona Ms everywhere has वा र ३ ५ and reads मायायि in the first line, दाक्षा ३ साई, मायित्रा, वोद्धुम्माइ, तनू र नाउ. The Bombay A.Society's Ms. reads यि almost in every place where इ occurs in the other Mss. For the change of गिरागिरा च into इरा इरा च vide ताण्ड्यब्राह्मण VIII. 6. 10. In the B. I. odition the first verse is set down (vol. III. p. 177) as follows: यँज्ञाऽऽय । ज्ञा ३ वो ३ मायाइ । ओइराइरा । चो ३ दाक्षा ३ साइ । पँप्री र वयममृतम् । जाता २ ३ वो । हुम्माइ । दो ३ साम् । प्रायम्मित्र ५ सुशा २ ५ सिषाउ ॥ Rg. VI. 48. 1-2 are a आर्चिक प्रगाथ.

2625. The mode of recitation is of three sorts, viz. विलम्बित, मध्यम and द्रुत (com. on Āśv. V. 20. 2). These are mentioned in ऋक्प्रातिशाख्य XIII. 18 also.

2626. यथादाहुर्शंसन्होतापोहिष्ठीया ब्रूयात्तदैनमन्वालभेरन्पावमान्यः । लाट्यायन II. 10. 20; the com. says that the head was covered for fear of being scorched by fire when the yajñāyajñīya addressed to Agni was being chanted. It is appropriate that when the hymn to waters is reached the covering of the head is removed. Vide Āp. XIII. 15. 18.

verse has a response which is 'madā modaiva modā modaiva (or-daivom).[2627]

When the last verse (paridhānīyā) of the Āgnimāruta śastra is being recited (or at one of several other stages, according to Āp. XIII. 16. 2–5 and Sat. IX. 4. p. 933) the pratiprasthātṛ brings into the hotṛ-camasa the soma contained in the dhruva graha and the adhvaryu offers the soma contained in that camasa and the camasādhvaryus offer the soma in their cups and the priests partake of the remnants. When the upayāja homa with reference to the animal killed in the morning is performed and the paridhis are cast into the fire, he takes the Hāriyojana cup.[2628] The unnetṛ brings into it all the soma contained in the āgrayaṇa-sthālī and mixes therein plenty of fried barley grains, places the cup on his head, comes out of the havirdhāna shed, steps backwards and forwards several times. Then the contents are offered to Indra (the tyāga by the yajamāna is 'idam Indrāya harivate') and the remnants are brought to the sadas for being partaken by the priests and the sacrificer. They distribute the remnants into other vessels, drink the fluid only smacking their lips, press the fried grains between their teeth so as to extract and take in all juice out of them and spit out of the vedi the masticated fried grains and sip water. According to some (Kāt. X. 8. 5) the priests only smell the fried grains. They throw chips of the tree from which the yūpa was made into the āhavanīya each with 'thou art the expiation (means of removal) of the evil caused by gods, men pitṛs &c.' (Vāj. S. VIII. 13., Tai. S. III. 2. 5. 7 quoted in Āp. XIII. 17. 9). They partake of the thick cheese-like layer on curds with 'dadhikrāvṇo' (Ṛg. IV. 39. 6) in the āgnīdhra shed (Sat. IX. 4. p. 935, Ap. XIII. 18. 1). They cast into the jars containing remnants of Ekadhanā waters green dūrvā

2627. Āśv. V. 20. 6 has स्वादुष्किलायमिति चतस्रो मध्ये चाह्वानं मदामो देव मोदामो देवोमित्यासां प्रतिगरौ'; Āp. XIII. 15. 14 says 'स्वादुष्किलायं मधुमाँ उतायमित्यभिज्ञायोभयतोमोदं प्रतिगृणाति मदामोद इव मोदामोद इवेत्या व्याहारात्।'. This last appears to be corrupt. The footnotes in Baud. VIII. 15 show how uncertain the mss. readings are. Sat. IX. 4. p. 932 explains व्याहार as स्वादुष्किलायान्तिमाहावो व्याहारः

2628. This cup is called Hāriyojana because it suggests the yoking of the horses of Indra for his return after being present at the soma offerings throughout the day. 'हरिरसिमन्युज्यते स्वस्थानं प्रति गमनायेन्द्रस्येति हरियोजन इन्द्रस्तत्संबन्धिग्रहो हारियोजनः' com. on śat. IX. 4. p. 934; 'हरिरसिमन् युज्यते प्रतिगमनायेन्द्रस्येति हारियोजनो ग्रहः।' com on Āp. XIII. 17. 1.

grass, squeeze that grass well, impart to the water a sharp flavour (by the juice of the dūrvā), pour the water into ten camasas. Each priest smells his camasa (and those who have none smell the one nearest to them) to the west of the cātvāla or in the place (called āstāva) where the Bahiṣpavamāna was chanted (Āp. XIII. 17. 9, Kāt. X. 8. 7, Sat. IX. 4. p. 935) and pour the water down into the cātvāla pit (Sat. IX. 4 p. 935, or inside the vedi according to Āp. XIII. 18. 1). All priests wait upon the āhavanīya with the *mindā* mantra 'yanma ātmano mindābhūt' (whatever fault has been mine, Agni has mended it' &c. Tai. S. III. 2. 5. 4). The priests then discharge themselves from the vow made at the Tānūnaptra ceremony. Then the Patnīsaṁyājas are performed as in the animal sacrifice (Āp. XIII. 18. 3). The adhvaryu offers with the juhū nine samiṣṭayajus offerings in a continuous stream, standing inside the vedi. Then he performs the prāyaścittas for actions like spilling soma drops about and offers a savanāhuti (i. e. an ājya offering indicating the completion of the Agniṣṭoma). The adhvaryu issues a direction to the maitrāvaruṇa to urge the priests to come out of the sacrificial shed and the latter do so.

Then follows the Avabhṛtha (the final purificatory bath). The procedure of this is an iṣṭi. Jaimini, however, in X. 7. 47–50 lays down that the avabhṛtha is a special rite and therefore all that takes place in the darśapūrṇamāsa iṣṭi does not follow as a matter of course. A fuel-stick is laid on fire, a veda bunch is made, kuśa is strewn round the fires (that is paristaraṇa), the necessary yajñapātras are placed with mouths downwards. No *idhma* is brought and some do not even prepare the vedi. Only four ladlings of ājya are taken in all the ladles (sruc). The nirvāpa is only for a cake to Varuṇa on one potsherd (Āp. XIII. 19. 3). There are no praṇītā waters (Sat. IX. 5. p. 938), and no girding up of the wife (vide above p. 1040 for it). The ājya in the ladles and the grains taken out for puroḍāśa are placed on the shoulder (north corner on eastern side) of the uttaravedi. The sacrificer takes out from its pit the post of udumbara (audumbarī in the sadas), places it on the hide and board used in extracting soma juice and all other utensils except the four sthālīs viz. the āgrayaṇa, ukthya, āditya-sthālī and dhruvāsthālī (vide Tai. Br. I. 4. 1 for these four sthālīs of clay) that are smeared with soma in the space between the cātvāla pit and the utkara or on the northern shoulder of the vedi on the large stool (āsandī) used for soma.

The yajamāna casts away the antelope skin in the cātvāla pit (other ways of disposal are also mentioned in Āp. XIII. 19. 8-9). When starting for avabhṛtha he offers clarified butter with 'O! Fire, that givest life &c.' (Tai. S. I. 3. 14. 4), a second oblation with the mantra 'avabhṛtha, nicumpuṇa &c.' (Vāj. S. VIII. 27).[2629]

A third oblation of ājya is made to Rudra (Āp. XIII. 20. 1) with 'namo Rudrāya' (Tai. Br. III. 7. 9). When starting from the vedi or from near the cātvāla with faces to the north they recite Ṛg. I. 24. 8 (Tai. S. I. 4. 45. 1). The adhvaryu issues a direction to the prastotṛ to chant a sāman. The sāman chanted is called 'avabhṛthasāman' (Lāt. II. 12. 1). It is 'agniṣṭapati' (vide Śat. Br. IV. 4. 5. 8 and Drāhyāyaṇa śr. VI. 4. 1). When the *nidhana* of the sāman is being sung, all the priests, the yajamāna and his wife thrice repeat that *finale*. They do so a second time when they have traversed half of the distance to the reservoir of water and a third time when they reach the water (Āp. XIII. 20. 4 and Sat. IX. 5. p. 941). The same procedure is followed for the Varuṇa puroḍāśa as in Varuṇapraghāsas for niṣkāsa. The dregs of soma are thrown into water with the branch of the udumbara tree and curds are poured over it. All utensils smeared with soma are thrown into water (Āp. XIII. 21. 12, Kāt. X. 8. 24). Jai. (IV. 2. 19-22) says that this casting into water is merely the final disposal (*pratipatti*) of these utensils and the *śruti* passage 'they approach the water for the final bath with whatever is smeared with soma' does not lay down any subordinate matter about avabhṛtha. The girdle of the yajamāna and the yoktra, the jāla (net on the head of the wife) and the antelope skin of the wife are dipped in water. The yajamāna invokes the water with 'devīrāpaḥ' (Tai. S. I. 4. 45. 3) and enters. The deep silent waters of flowing rivers are to be preferred, but in the absence of such waters any water reservoir will do (Kāt. X. 8. 19). The yajamāna and the wife enter water, splash water on their heads (but do not dip them into water), rub each other's back. A handful of kuśa is thrown into the water and this handful in the water serves as the āhavanīya for all āhutis in avabhṛtha.

2629. The mantra in Vāj. S. is अवभृथ निचुम्पुण निचेरुरसि निचुम्पुणः। अव देवैर्देवकृतमेनोऽयासिषमव मर्त्यैर्मर्त्यकृतं पुरुराव्णो देव रिषस्पाहि। Āp. XIII. 19. 16 following Tai. Br. II. 6. 6 reads निचङ्कुण for निचुम्पुण. Vide Lāṭ. II. 12. 9, where this mantra is used at the time of sprinkling oneself with water after the bath.

The prayājas and anuyājas are offered as in darśapūrṇamāsa (except to God Barhis). Jai. (XI. 2. 30–34) lays down that not only is the principal offering of puroḍāśa offered into water but also all subordinate ones like āghāras. A portion of the puroḍāśa for Varuṇa is offered therein. The rest of the puroḍāśa is offered to Agni and Varuṇa, which becomes the Sviṣṭakṛt offering in this case (Kāt. X. 8. 27, Sat. IX. 5 p. 944). The unnetṛ at the direction of the adhvaryu leads all out of the water (the yajamāna or hotṛ being the first). The yajamāna and his wife put on fresh garments and come out. The cloth with which soma was enveloped is worn as a turban by the yajamāna and that in which soma stalks were tied is worn by the wife and both the pieces of cloth are donated later on in the Udavasānīyā iṣṭi to the adhvaryu (Āp. XIII. 22. 3–4). The priests, the yajamāna and the wife hold each a fuel-stick of udumbara, mutter the Mahīyā ṛk (viz. apāma somam-amṛtā abhūma, Ṛg. VIII. 48. 3), proceed following the unnetṛ towards the sacrificial ground without looking back at the water, perform *mārjana* in front of the cow-stable (of the sacrificer) and place the fuel-stick (carried by each) on the āhavanīya with 'edhosi &c.' (Tai. S. I. 4. 45. 3) and wait upon that fire with 'apo anvacāriṣam' (Āp. XIII. 22. 6 quoting Tai. S. I. 4. 45. 3). Then follows the Udayanīyā (the concluding iṣṭi). It is performed in the prāgvaṁśa (and not on the specially prepared uttaravedi). The procedure is like that for the prāyaṇīyā iṣṭi (already described on p. 1140). In the same sthālī (pot) in which the prāyaṇīyā offering was cooked and to the bottom of which some remnants stick he takes the offering for this iṣṭi. The wife again ties round her waist the yoktra. Prayājas are optional and if not offered no ājya is taken in the juhū. The yājyās and anuvākyās of the prāyaṇīyā become respectively the anuvākyās and yājyās of the Udayanīyā. The order of deities is different, viz. Agni is the first, Pathyā Svasti the last for ājya offerings (Āp. XIII. 23. 4, Sat. IX. 6. p. 950, Aśv. VI. 14. 3). When the Udayanīyā is finished the anubandhyā rite follows[2630] (Āp. XIII. 23. 6, Sat. IX. 6. p. 951). A barren cow is to be offered to Mitra and Varuṇa. The procedure is the same as that of Nirūḍha-paśu-bandha. Some sacrificed three anubandhyā cows viz. to Mitra and Varuṇa, to the Viśve Devas and to Bṛhaspati,

2630. Often the word is written as अनूबन्ध्या 'यज्ञमनुबध्यते इति अनूबन्ध्या' com on Āp. XIII. 23. 1; 'यज्ञमनु यज्ञसमाप्तिमनु बध्यते इति अनूबन्ध्या ह्रीर्घ आर्षः।' com. on Sat. IX. 5. p. 951.

but Āp. (XIII. 23. 6. 10 and 14) restricts them to Vājapeya, Rājasūya and sattras. Kāt. (X. 9. 14-15) says that instead of the cow, a bull may be offered or only *payasyā* may be offered to Mitra and Varuṇa.[2631] Āp. XIII. 24. 10 states that in place of the anubandhyā cow the followers of Ṛgveda offered āmikṣā to Mitra-Varuṇa and the offering was made by the hotṛ in front of the havirdhāna shed and all the ceremonies in the archetype iṣṭi up to Iḍā were performed in that rite. After the anubandhyā (or āmikṣā) was offered came the five offerings called Devikā viz. a cake on twelve potsherds to Dhātṛ and four oblations of rice cooked in milk in the four sthālis mentioned above (in which soma had been placed) to Anumati, Rākā, Sinīvālī and Kuhū (Aśv. VI. 14. 15, Āp. XIII. 24. 1-3). The yajamāna shaves his hair and moustache near the southern side of the vedi (Āp. XIII. 23. 16). The āhavanīya fire is taken to the north outside the mahāvedi in an earthen-ware vessel and the kuśas strewn on the vedi are burnt thereon and the smoke issuing therefrom is invoked with a mantra (Sat. IX. 6. p. 954), the adhvaryu offers on the fire (of the kuśas) ground barley from his joined hands (Āp. XIII. 24. 16-17). The fires are then deposited in the araṇis by repeating 'ayam te yoniḥ' (Ṛg. III. 29. 10, Tai. S. I. 5. 2, Vāj. S. III. 14) as stated in Āśv. III. 10. 5. Having given up the sacrificial ground he again produces fire by attrition to the north of the sacrificial ground and the udavasānīyā iṣṭi is performed.[2632] In this iṣṭi a cake baked on eight or five potsherds is offered to Agni (Āp. XIII. 25. 5, Sat. IX. 6. p. 956). In this iṣṭi (Āśv. VI. 14. 24) everything is done as in the punarādheya, but the mantras are muttered inaudibly in all cases except the last anuyāja. A bull is the fee or as much gold as will purchase a bull. Instead of this iṣṭi an offering of ājya was made by some (Āp. XIII. 25. 7-8) from the juhū in which twelve ladlings were made with sruva with 'idam viṣṇur' (Ṛg. I. 22. 17).

2631. In modern times no cow is sacrificed, but only āmikṣā is offered instead. Among the actions forbidden in the Kali age is the slaughter of anubandhyā. 'यथा नियोगधर्मो नो नाशुवध्यावधोऽपि वा । तथोद्धारविभागोपि नैव संप्रति वर्तते ॥ quoted by the Mit. on Yāj. II. 117.

2632. 'उदवसायेज्यते इत्युदवसानीया' com. on Āp. XIII. 25. 3; 'उदवसानार्था इष्टिरुदवसानीया' com. on Sat. IX. 6. p. 956. उदवसान is the counter-part of अध्यवसान. When at the beginning the sacrificer enters upon the holy ground sought from the king it is अध्यवसान. Vide 'एतमगन्म देवयजनं पृथिव्या इति देवयजनमध्यवस्यति' Āp. X. 3. 3 (com. अध्यवस्यति सहाग्निभिर्वासार्थमनुप्रयायावस्थेदित्यर्थः).

Ingenious theories have been advanced by European scholars about the origin of the soma sacrifices. Considerations of space forbid the discussion of this topic here. Those who are interested in these speculations may consult Prof. Eggeling's Introduction to S. B. E. vol. 26 pp. XI-XXIII (where several European works are cited and questions about soma are discussed), L' Agniṣṭoma (pp. 481–490), Prof. Keith's 'Religion and philosophy of the Veda &c.' pp. 331–332 and the works cited there. With the greatest respect for all these learned and industrious European *savants* it must be said that none of the theories has any great plausibility or carries conviction. The cult of the soma is at least Indo-Iranian and no sure traces are left in the ancient Indian religious books of the origin of that cult. We have simply the institution of the sacrifice before us and all else is imagination and speculation. One important question is the relation of the plant soma to the moon (also called soma as in Ṛg. X. 85. 1 and 2). The moon is generally called 'mās' or 'candramas' in the Ṛg. (Ṛg. V. 51. 15, X. 85. 19, VIII. 94. 2, X. 12. 7, X. 68. 10). In Ṛg. VIII. 82. 8 occurs the very striking simile[2633] 'Soma that is seen among the (soma) vessels as the moon in waters' and the Atharvaveda (XI. 6. 7) states that the god whom people call Candramas is soma. In several places soma is addressed as *indu* (which certainly means the moon in later literature). Vide Ṛg. IX. 86. 24, 26, 37, VIII. 48. 2, 4, 5, 12, 13. It is said that soma grew on Mūjavat (Ṛg. X. 34. 1) and in the Ārjīkīya country (Ṛg. VIII. 64. 11) on the river Suṣomā. Even in the Ṛgveda soma appears to have become mythical. In Ṛg. IX. 86.24 soma is said to have been brought from heaven by Suparṇa (eagle or bird?) and in I. 93. 6 by a Śyena (hawk). Another matter to be noted is that the soma plant had certainly become rare,[2634] if not unobtainable, in the times of the Brāhmaṇas. The Śat. Br. IV. 5. 10 mentions several substitutes for soma, among which are Phālguna plants having brown flowers,

2633. यो अप्सु चन्द्रमा इव सोमश्चमूषु दृदृशे। ऋ. VIII. 82. 8; सोमो मा देवो मुञ्चतु यमाहुश्चन्द्रमा इति। अथर्ववेद XI. 6. 7. Vide Prof. Keith's remarks on Hillebrandt's views of the identification of the plant with the moon (Intro. to Tai. S. p. CXX).

2634. Vide S.B.E. vol. 26 p. XXIV ff for the identification of Soma with certain plants. Vide S.B.E vol. 26 pp. 421–422 for the several substitutes for Soma mentioned in Sat. Br. Prof. Keith (Intro. to Tai. S. p. CXIX) holds that the question of the identification of the soma plant cannot really be finally determined.

Dūb plant and greenish kuśas. The Tāṇḍya Br. says 'If one does not secure soma, one may extract juice from pūtīkas'.[2635] Jai. (III. 6. 40 and VI. 3. 13–17) states that this passage restricts a sacrificer when no soma is available to pūtīkas and prevents the employment of other substances similar to soma and in VI. 3. 31 he declares that pūtīkas are the proper *pratinidhi* (substitute) for soma and not any other substance even if it may be more similar to soma than pūtīkas, but that if both pūtīka and soma are unavailable then another substance similar to soma may be employed. Āśv. (VI. 8. 5–6) states that if soma stalks be not available then pūtīka stalks and Phālguna plant should be used or other plants mixed with pūtīkas may be employed (and the com. adds that those others are dūrvā, kuśa and the like). In the Deccan the plant that is taken to represent soma when soma sacrifices are rarely performed is called 'rānśera' (in Marathi) which grows in the hills of the Deccan.

2635. यदि सोमं न विन्देयुः पूतीकानभिषुण्युर्यदि न पूतीकानर्जुनानि च। ताण्ड्य IX. 3. 3.

CHAPTER XXXIV

OTHER SOMA SACRIFICES

The sūtras speak of seven forms (saṁsthās) of soma sacrifices. These seven forms are Agniṣṭoma, Atyagniṣṭoma, Ukthya, Ṣoḍaśin, Vājapeya, Atirātra and Aptoryāma (according to Kāt. X. 9. 27, Āśv. VI. 11. 1, Lāṭ. V. 4. 24). The first of these has been described in some detail above. Owing to restrictions of space only a few words can be said about the other soma sacrifices. All sūtras do not state the same number of soma sacrifices. Āp. XIV. 1.1 and Sat. IX. 7. p. 958 expressly say that Ukthya, Soḍaśin, Atirātra and Aptoryāma are the modifications of Agniṣṭoma and the commentaries of both point out that there were several views on the number of the modifications of the Agniṣṭoma. In the Brāhmaṇas the Agniṣṭoma, Ukthya, Ṣoḍaśin and Atirātra are generally mentioned as forms of Jyotiṣṭoma (vide Śat. Br. IV. 6. 3. 3, Tai. Br. I. 3. 2 and 4, which last mentions Vājapeya also).

Ukthya or *Uktha.* In this there are three more stotras (called uktha stotras) and śastras (called uktha śastras) to be chanted and recited in the evening pressing, thus bringing the total of stotras and śastras to fifteen (Ait. Br. 14. 3, Āśv. VI. 1. 1-3). Āp. XIV. 1. 2 says that the Ukthya, Ṣoḍaśin, Atirātra and Aptoryāma are respectively performed by him who desires cattle, vigour, progeny and cattle, all objects. In the Ukthya an additional victim, a goat (over and above those offered in Agniṣṭoma) is sacrificed for Indra and Agni on the pressing day. Vide Ait. Br. XIV. 3, Āśv. VI. 1. 1-3, Āp. XIV. 1, Sat. IX. 7. pp. 958-959, Haug's tr. of Ait. Br. p. 251 n, S. B. E. vol. 41, pp. XIV-XVI.

Ṣoḍaśin. In this sacrifice in addition to the fifteen stotras and fifteen śastras of the Ukthya there is an additional stotra and a corresponding śastra called Ṣoḍaśin in the *tṛtīya savana* (both the śastra and the sacrifice have the same name, as the com. on Āśv. VI. 2. 1 says). There is an additional cup in the morning or at all pressings according to some (Āp. XIV. 2. 4-5). It is made of khadira wood and is quadrangular in shape (Sat. IX. 7. p. 960). The stotra for the ṣoḍaśin cup is begun to be chanted

about sunset after the adhvaryu hands over a piece of gold to the sāma singer (instead of kuśa grass, Āp. XIV. 3. 1). Soma is purchased for a cow that is of very small stature and has red-coloured ears. In this rite an additional victim viz. a ram is sacrificed for Indra. The fee is a reddish brown horse or a female mule. Vide Ait. Br. 16. 1-4, Āśv. VI. 2-3, Āp. XIV. 2. 3 ff, Sat. IX. 7. pp. 959-962, Haug's tr. of Ait. Br. p. 255-256n, S.B.E. vol. 41 pp. XVI-XVII for further details.

Atyagniṣṭoma. This form is obtained by adding the ṣoḍaśistotra, the ṣoḍaśin cup and an additional victim for Indra to what prevails in the Agniṣṭoma ; vide S. B. E. vol. 41, p. XVII.

Atirātra. This soma sacrifice is referred to even in the Ṛgveda (VII. 103. 7). As this sacrifice is not finished in one day but only after the day and night pass away it is called Atirātra. Āp. X. 2. 4 notes that according to some the Atirātra is performed even before Agniṣṭoma. The Atirātra has 29 stotras and 29 śastras. In this the additional stotras and śastras are repeated at night in four rounds (called paryāyas) of three stotras and śastras. Āśv. VI. 4. 10 points out these 12 śastras. In this sacrifice the śastra called Āśvina is recited, but before it six āhutis are offered at night. The Āśvina-śastra closely follows the procedure of prātaranuvāka, must comprise at least a thousand verses and was to be recited till sunrise (vide Haug's tr. of Ait. Br. pp. 268-269n for description of this śastra). At twilight is chanted a stotra appropriately called Sandhistotra (Haug's tr. of Ait. Br. pp. 266-267n). It is in the Rathantara melody. If the sun did not rise by that time the hotṛ was to continue reciting Ṛg. I. 112 and when the sun rose he was to recite saurya hymns (viz. Ṛg. X. 158, I. 50. 1-9, I. 115, X. 37). A fourth animal viz. an ewe (or ram according to some) is offered to Sarasvatī on the pressing day (Sat. IX. 7. p. 963). The principal camasas in the night are offered to Indra Apiśarvara (Sat. IX. 7. p. 963.). A puroḍāśa on two potsherds is offered by the pratiprasthātṛ to Aśvins (Āśv. VI. 5. 23 and Sat. IX. 7 p. 965) and a soma cup is offered to the Aśvins. Jai. X. 8. 6 notes that as a vedic passage says 'there is no ṣoḍaśin cup in Atirātra' and another says there is, the first is a prohibition and there is an option. For details vide Ait. Br. 14. 3 and 16. 5-7, Āśv. VI. 4-5, Sat. IX. 7 pp. 662-665, Āp. XIV. 3. 8—XIV. 4. 11, S. B. E. vol. 41 pp. XVII-XX.

Aptoryāma—This sacrifice is similar to Atirātra of which it appears to be an amplification. Only there are four additional stotras (i. e. 33 in all) and four additional śastras recited by the hotṛ and his assistants, and there are four camasas in relation to these last respectively for Agni, Indra, Viśve Devas and Viṣṇu (Āp. XIV. 4. 12–16, Sat. IX. 7 pp. 966–967, Śāṅ. XV. 5. 14–18 and Sat. X. 8. p. 1111). According to Āśv. (IX. 11. 1) he whose cattle do not live or who desires to secure cattle of good breed should perform the Aptoryāma. Āśv. (IX. 9. 22–23) says that in this the fee is more than a thousand (cows) up to an unlimited number and the hotṛ gets a special gift of a white chariot (plated with silver) to which female mules are yoked. This sacrifice is generally joined with others. The Tāṇḍya Br. (XX. 3. 4–5) states that the rite is so called because by its performance one secures whatever object one desires (from 'āp' to obtain).

Vājapeya—(lit. food and drink, or drink of strength or of food or of a race).[2636] Though this rite is said to be a form of Jyotiṣṭoma and though it follows the procedure of Ṣoḍaśin (Āp. XVIII. 1. 4) it has so many special features of its own that it may be said to be an independent sacrifice. One characteristic feature is that the number 17 is predominant in this sacrifice (Āp. XVIII. 1. 5, Tāṇḍya XVIII. 7. 5), viz. there are 17 stotras and 17 śastras, the 17th being the Vājapeya stotra and śastra, 17 animals sacrificed for Prajāpati, 17 objects distributed as fee, the yūpa (of bilva or khadira wood) was 17 aratnis in length, at the time of enveloping the yūpa with a girdle in this rite 17 pieces of cloth were employed for the purpose (Āp. XVIII. 1. 12), it lasted for 17 days (for 13 days dīkṣā, 3 upasad days and one pressing day) or there were 17 dīkṣās (and then the rite lasted for 21 days). Vide Āśv. IX. 9. 2–3 and Āp. XVIII. 1. 6–7. Another feature was that there were seventeen cups of surā (wine) for Prajāpati as well as 17 cups of soma. Another peculiarity was that there were seventeen chariots to which horses were yoked and a race was run, when seventeen drums that were arranged on the northern *śroṇi* of the vedi were simultaneously beaten (Āp. XVIII. 4. 4 and 7, Kāt. XIV. 3. 14) to the west of the āgnīdhra shed.

2636. Various meanings are assigned to 'Vājapeya'. The Tai. Br. I. 342 says 'वाजाप्यो वा एषः । वाजं क्षेत्रेण देवा ऐप्सन्। सोमो वै वाजपेयः । ... ... अन्नं वै वाजपेयः ।; शाङ्खायनश्रौत (XV. 1. 4–6) states 'पानं वै पेयाः । अन्नं वाजः । पानं वै पूर्वमधावजम् । तयोरुभयोराप्त्यै ।'.

This complicated rite was undertaken by one who desired overlordship (ādhipatya, as Āśv. IX. 9. 1 says) or prosperity (Āp. XVIII. 1. 1) or svārājya (the position of Indra or uncontrolled dominion). It was performed in the autumn.[2637] Only a brāhmaṇa or a kṣatriya could perform it, but not a vaiśya[2638] (Kāt. XIV. 1. 1 and Āp. XVIII. 1. 1). In the case of a brāhmaṇa the reward aimed at must have been the attainment of the position of a super-eminently learned or prosperous man. All the priests, the sacrificer and his wife wear chains of gold, and Āśv. IX. 9. 5 adds that the chain worn by the hotṛ has a hundred lotus-like pendants studded with precious stones. The golden chain worn by each priest becomes part of his fee. Besides the three viz. for Agni, Indra and Agni and for Indra (a ram), a barren cow for Maruts and ewe for Sarasvatī and 17 hornless, young and virile goats of one colour (or all of dark colour) for Prajāpati are offered in this rite (Āp. XVIII. 2. 12–13, Kāt. XIV. 2. 11–13). For the 17 cups of wine (called parisrut, prepared from several herbs) the pratiprasthātṛ prepares a separate mound (*khara*) to the west of the axle of the southern havirdhāna cart on which the wine cups made of clay are to be kept. The soma cups are to the east of the axle of the cart and wine cups to the west and they are to be kept separate. According to Kāt. (XIV. 1. 17 and 26) it is the neṣṭṛ priest that gets ready the mound and the wine cups. In the midst of the wine cups a golden cup of honey is placed (Tai. Br. I. 3. 3, Kāt. XIV. 2. 9). The wine is purchased ready-made in exchange for lead from a long-haired man at the time when soma stalks are purchased, or the material for making wine is bought, and is entered into the sacrificial enclosure by the southern door and is boiled on the dakṣiṇa fire (Kāt. XIV. 1. 14–17). The yūpa has four angles (and not eight as elsewhere) and has no top protruding beyond the caṣāla, but its top is even and is slightly depressed in the middle. The caṣāla of the yūpa (which is 17 aratnis high) is made of wheat flour (Tai. Br. I. 3. 7, Āp. XVIII. 1. 8, Kāt. XIV. 1. *22*). A race is run in connection with the mid-day pressing in the

---

2637. शरदि वाजपेयेन स्वाराज्यकामो यजेत। quoted by शबर on जै. X. 2. 64 and X. 7. 51. The Tai. Br. I. 3. 2 has य एवं विद्वान् वाजपेयेन यजते गच्छति स्वाराज्यम्। अग्रं समानानां पर्येति। तिष्ठन्तेऽस्मै ज्यैष्ठ्याय।; वाजपेययाजी वाव प्रजापतिमामोति। ताण्ड्यब्राह्मण 18. 6. 4.

2638. स वा एष ब्राह्मणस्य चैव राजन्यस्य च यज्ञः। तै. ब्रा. I. 3. 2; यं ब्राह्मणा राजानञ्च पुरस्कुर्वीरन् स वाजपेयेन यजेत। लाट्यायन VIII. 11. 1.

following way (Āp. XVIII. 3. 3 and 12–13). The Tai. Br. I. 3. 2 refers to the race won by Bṛhaspati and connects the Vājapeya with that race. Seventeen chariots are got ready to the east of the āhavanīya with their yokes to the north or east. One of them is the sacrificer's chariot to which three horses are yoked with mantras and a fourth runs along the third but is not yoked. These horses are made to smell the *caru* of wild rice (nīvāra) which is meant for Bṛhaspati. To the sixteen other chariots four horses each are yoked outside the vedi but without mantras (com. on Kāt. XIV. 3. 11). A kṣatriya (rājaputra according to Āp.) shoots an arrow from the space between the cātvāla and utkara and notes the spot where it falls, from which he shoots an arrow a second time. This is done seventeen times. On the spot where the arrow falls at the 17th shooting, he plants a post of udumbara wood as the goal for the chariot race (Āp. XVIII. 3. 12 and Kāt. XIV. 3. 1–11 and 16–17). When the race starts, the brahmā priest fixes an udumbara chariot-wheel (having seventeen spokes according to Kāt. V. 12. 11) on an axle (or udumbara post navel-high) implanted on a spot between the cātvāla and the utkara (or near the utkara) and ascends on that wheel with 'at the impulse of God Savitṛ may I win vāja (vigour, food or race) with the help of Bṛhaspati, the winner of vāja' (Āp. XVIII. 4. 8, Kāt. XIV. 3. 12 which mentions Vāj. S. IX. 10). When the wheel is revolved from left to right (it is revolved thrice) the brahmā chants the Vāji-sāman [2639] (Āp. XVIII. 4. 11, Āśv. IX. 9. 8. Lāṭ. V. 12. 14). According to Lāṭ. (V. 12. 13) the brahmā only rests his arms on the wheel. The yajamāna occupies the chariot on which mantras were recited and the adhvaryu (or his pupil) also gets into it to instruct the yajamāna to repeat the Vedic formulae he has to utter. Other persons (called vājasṛt) join in the race and sit in the other sixteen chariots and a kṣatriya or vaiśya sits in one of them and the race starts with speed. All the seventeen drums are beaten on the northern śroṇi of the vedi to urge on the horses. All the horses are made to smell the *caru* of wild rice (nīvāra) cooked in 17 pots for Bṛhaspati. The chariot of the sacrificer is in front and the others follow his, but do not overtake it. The adhvaryu makes the yajamāna

2639. The verse to be chanted by brahmā is आविर्मर्या आ वाजं वाजिनो अग्मन्देवस्य सवितुः सवे । स्वर्गा* अर्वन्तो जयत ॥ This is one of the few verses of the Sāmaveda that are not found in the Ṛgveda. If the brahmā cannot chant it, he is to mutter it thrice (Āśv. IX. 9. 3).

recite the formulae of victory such as ' agnirekākṣareṇa ' (Vāj. S. VIII. 31–34, Tai. S. I. 1. 11). When the chariot reaches the goal, the chariot is taken to its north and then turned round to the south. All the chariots return to the sacrificial ground and the horses are again made to smell the caru of nīvāras and a homa is offered for discharging the drums (dundubhi-vimocanīya-homa). A berry (kṛṣṇala, gold of that weight) is given to each of those that rode the chariots, but that gold is taken back from them and is donated to the brahmā who also receives the golden jar of honey (Kāt. XIV. 4. 17, Āp. XVIII. 5. 5) after it is presented to and taken back from the kṣatriya or vaiśya. The cups of soma are taken up by the priests (the adhvaryu taking the hotṛ-camasa), and the camasādhvaryus take up their cups ; while the pratiprasthātṛ takes up the principal wine cup and the other sixteen are taken up by those who joined in the race. The adhvaryu starts towards the east with the soma cups with ' sam pṛcaḥ ' (Tai. Br. I. 3. 3), the pratiprasthātṛ to the west with the wine cups and stands near the mārjālīya shed. After the adhvaryu offers the soma cups, the wine cups are shaken and given to the sixteen persons who took part in the race and they quaff them on the southern śroṇi of the vedi. According to Kāt. (XIV. 3. 20 and XIV. 4. 16) the kṣatriya or vaiśya who sat in one of the chariots receives all the wine cups. When preparations are made to chant the Mahendra stotra, the neṣṭṛ requests the wife to put on a short undergarment of darbha and the yajamāna wears a silken garment (tārpyam)[2640] inside the garment which he wears as a dīkṣita. A ladder is raised against the yūpa to its north or south (Kāt. XIV. 5. 5) and when the sacrificer climbs to the top of the yūpa a dialogue ensues between the sacrificer and his wife (Kāt. XIV. 5. 6–11, Āp. XVIII. 5. 9–11). The sacrificer addresses ' wife, come, let us ascend to heaven '. The wife responds ' let us ascend '. They engage in this dialogue thrice. According to Kāt. XIV. 5. 8 both husband and wife climb to the top of the yūpa, while according to Āp. (XVIII. 4. 12) only the husband does so who finally says 'out of us both I shall ascend to heaven'. On reaching the top he touches the caṣāla of wheat flour and mutters ' we reached the heaven, the gods ' (Tai. S. I. 7. 9. 2, Vāj. S. IX. 21). Thence he looks at his house with ' May I live long with my children '

2640. Vide S. B. E. vol. 41 p. 85 n for various explanations of ' tārpya '.

(Tai. S. I. 7. 9. 2) or in the several directions with Vāj. S. IX. 22 (Kāt. XIV. 5. 11). Vaiśyas (explained as his children by the com. on Kāt. XIV. 5. 12) throw up to him 17 bags of salt or saltish earth enveloped in leaves of aśvattha or (according to Āp. XVIII. 5. 16-18) the adhvaryu, brahmā, hotṛ and udgātṛ raise up the bags to his face on long poles respectively from the east, south, west and north with mantras (referring to food, *vāja* and winning of vāja) He receives them and descends. He plants his right foot on a piece of gold placed over a goat-skin spread in front of the yūpa on the ground with its neck to the east and hairy side outside and his left foot on the skin itself and from thence he sits down on a couch placed on the west side of the uttaravedi. The offerings of the omentum and other limbs of the animal for Sarasvatī and of other animals are made, the wild rice caru for Bṛhaspati is offered and the priests partake of the remnants as usual. The animals for Prajāpati are offered at the time of the mid-day pressing. Before the offering to Sviṣṭakṛt of the wild rice caru is made water and milk are poured in a vessel of udumbara and food of seventeen kinds of grains or of as many as the sacrificer remembers except one is also put therein and seven offerings are made of all this with the sruva and the yajamāna is sprinkled with the rest (Kāt. XIV. 5. 20-24). He does not eat throughout his life-time the food of the one kind of grain that was omitted. The adhvaryu declares thrice after taking the name of the sacrificer 'he, so and so, is samrāṭ' (overlord). Ap. XVIII. 7. 18 says that on performing vājapeya a man is entitled to use the white parasol. After the performance of Vājapeya the sacrificer had to observe certain rules of conduct (vide Lāṭ. VIII. 12. 1-4, Āp. XVIII. 7. 16-17). He should act like a kṣatriya (i. e. he may study and make gifts, but should not teach or accept gifts), he should not rise to receive or do abhivādana or carry[2641] errands for or sit on the same couch with a person who had not performed that sacrifice. The adhvaryu receives the horses and the chariot in which the sacrificer sat (Āp. XVIII. 3. 10) and receives also all the 17 clothes with which the yūpa was enveloped. As to other fees there is some divergence among Āp. XVIII. 3. 4-5, Āśv. IX. 9, 14-17, Kāt. XIV. 2. 29-33 and Lāṭ. VIII. 11. 16-22. Āśv. says that 1700 cows, 17 chariots to which horses are yoked, seventeen

2641. तस्माद्वाजपेययाज्यप्रत्यवरोहीति। अस्यां हि सोध्यभिषिच्यते। ताण्ड्यब्राह्मण 18. 6. 12-13.

horses, seventeen animals which men ride, seventeen draught oxen, seventeen carts, 17 slave-girls decked with golden *niṣkas* round their necks, 17 elephants with golden girths-these constitute the fee in Vājapeya and Āśv. suggests other alternatives. Āp. XVIII. 3. 4 is almost the same but adds seventeen goats and ewes. Lāṭ (VIII. 11. 16-18) is also practically the same as Āśv. but adds several alternatives about cows. In the Kuruvājapeya (variously explained in the com.) cows donated are only 17, in other Vājapeyas 1700 or 17000 cows may be given. Lāṭ. further says that the gifts may be equally divided among all the priests, that the chariot occupied by the sacrificer over which *yajus* mantras were recited and the couch with its coverlet are given to the udgātṛ, the goat-skin with the golden piece is taken by the hotṛ.

It will have been noticed that this sacrifice has several picturesque elements in it. In the race and the drinking bout of seventeen cups there is a popular element. In the climbing to the top of the yūpa by the sacrificer and in the boiled wild rice for Bṛhaspati there is a symbolism of holiness and eminence.

Āśv. IX. 9. 19 says that after performing Vājapeya a king should perform Rājasūya and a brāhmaṇa should perform Bṛhaspatisava,[2642] while Āp. XVIII. 7. 15 recommends the Sautrāmaṇī after it. Kāt. (XIV. 1. 2-8) states various views.

Jaimini in several *adhikaraṇas* deals with the śruti texts about Vājapeya. They may be briefly indicated here. In I. 4. 6-8 he shows that in the sentence 'one desiring to secure overlordship should sacrifice with Vājapeya' the word Vājapeya is the name of a rite (karmanāmadheya) and that that sentence does not lay down some subordinate matter (such as what material is to be used) in the model sacrifice and that the word vājapeya does not mean gruel or similar substance. In Jai. III. 1. 18 it is said that the text 'of the Vājapeya the yūpa is 17 aratnis'

2642. According to Jai. IV. 3. 29-31 the Bṛhaspatisava is an aṅga of Vājapeya and the sentence वाजपेयेनेष्ट्वा बृहस्पतिसवेन यजेत does not lay down a time for the performance of that rite. Vide Tai. Br. II. 7. 1 and Āp. XXII. 7. 5 ff, Āśv. IX. 5. 3 ff for बृहस्पतिसव which is a kind of Ekāha soma sacrifice and which is to be performed by one who desires overlordship (ādhipatya) or spiritual eminence (brahmavarcasa) according to Āśv. IX. 5. 3 or by one who desires to be the purohita of a king (Tai. Br. II. 7. 1).

means that the yūpa required for the sacrifice of animals in the Vājapeya is to be 17 aratnis high and not that any other thing like the Ṣoḍaśipātra was to be 17 aratnis. When the Tai. Br. (I. 3. 4) says that seventeen animals are to be killed for Prajāpati, they are 17 separate yāgas and not one rite (*karma*). When it is said that caru is prepared in milk in seventeen śarāvas (pots), the method of taking out handfuls of grains (as in darśapūrṇamāsa) is not applicable. Jai. says (in XI. 4. 30) that the vessel (kumbhī), the śūla and the spit for roasting the omentum are the same for all the victims, that the omentum of the victim for Prajāpati is not sprinkled with the ājya remaining after the prayāja offerings are made (IV. 1. 33-39) and that the chariot which was occupied by the sacrificer is to be specially given to adhvaryu and not any one of the seventeen chariots i. e. there is a restrictive rule about the share in chariots for the adhvaryu, while there is none as to the other priests (X. 3. 74-75).[2643]

The Agniṣṭoma and the other forms of soma sacrifices so far described are ekāha (one day) soma sacrifices i. e. in them soma is offered in cups on one day thrice (in the morning, midday and evening). The sūtras (e. g. Aśv. IX. 5-11, Baud. XVIII. 1-10, Kāt. XXII), however, mention and describe several other one day soma sacrifices, such as Bṛhaspatisava, Gosava, Śyena, Udbhid, Viśvajit, Vrātyastoma (already described above on pp. 345-347) which are left out for want of space.[2644]

2643. For details about Vājapeya, vide Tai. S. I. 7. 7-12, Tai. Br. I. 3. 2-9, Tāṇḍya XVIII. 6-7, Sat. Br. V. 1-2, Āśv. IX. 9, Āp. XVIII, Kāt. XIV. 1-5, Lāṭ. V. 12. 8-25, VIII. 11-12, Sat. XIII. 1-2, Vārāha Śr. III. 1 and Hillebrandt's Rit. Lit. pp. 141-143, Prof. Keith's Rel. and Phil. part 2 pp. 339-340, Introduction to Tai. S. tr. pp. CVIII-CXI, Weber's 'Über den Vājapeya' (1892), S.:B. E. vol. XLI pp. XXIII-XXV.

2644. The Viśvajit from among the ekāhas is a very striking sacrifice. In this the sacrificer either gives a thousand cows or all wealth after separating the share of the eldest son (and excepting land and śūdras who serve him as a duty). Jai. sets out several propositions about this sacrifice in IV. 3. 10-16, VI. 7. 1-20, VII. 3. 6-11, X. 6. 13. After this rite, the sacrificer stays three days at the root of an udumbara tree subsisting on fruits and roots, for three days in a settlement of niṣādas (where he may subsist on nīvāras i. e. on rice, śyāmāka and the flesh of deer), for three days among vaiśyas (*jana*, also explained as 'persons of another gotra':) and three days with kṣatriyas (samānajana,

(*Continued on next page*)

The ahīna sacrifices[2645] are those the duration of which is two to twelve days of soma pressing, which always end with an atirātra and which together with the dīkṣā and upasad days should not extend beyond a month. They should be begun on a Full Moon day. Among them there are groups of sacrifices that last for two days, three days (e. g. Gargatrirātra), four days, five days (called pañcarātras of which Pañcaśāradīya is one), ṣaḍahas and so on. Among the numerous rites called ahīnas, the Aśvamedha and Dvādaśāha deserve notice. The Aśvamedha will be described later on. The Dvādaśāha is both an ahīna and a sattra (Āśv. X. 5. 2). There are several varieties of Dvādaśāha, one being called Bharata-dvādaśāha (Āśv. X. 5. 8., Ap. XXI. 14. 5). The twelve days of the Dvādaśāha as a sattra are constituted by the Prāyaṇīya (the commencing rite, an Atirātra), Pṛṣṭhya Ṣaḍaha[2646] (6 days), Chandomas which are Ukthyas (3 days) and a tenth day which is

---

(*Continued from last page*)

also expalined as sagotras). For a year he should not refuse what is offered but should not beg. Vide Kāt. XXII. 1. 9-33, Lāt. VIII. 2. 1-13. The Gosava is a very strange rite. Tho Tai. Br. II. 7. 6 briefly describes it. One who desires svārājya may perform it and Āp. (XXII. 12. 12-20 and XXII. 13. 1-3) states that for a year thereafter he should be paśuvrata (act like cattle) i. e. should drink water like them and eat grass (with his teeth) and approach his mother &c. (probably only as a make-believe). तनेष्टा संवत्सरं पशुव्रतो भवति । उपावहार्योदकं पिबेत्तृणानि चाच्छिन्द्यात् । उप मातरमियादुप स्वसारमुप सगोत्राम् । आप. XXII. 13. 1-3. Another very striking okāha sacrifice is the सर्वस्वार. This is performed by ono who desires to die on performing it and to obtain heaven. Whon the Ārbhava pavamāna stotra is bogun to be chanted in the third pressing, the sacrificer directs the priests to finish the sacrifice and enters fire. This sacrifice is called शुनःकर्णाग्निष्टोमः. Vide ताण्ड्यब्राह्मण XVII. 12. 5, Jaimini X. 2. 57-61 where Sabara appears to quoto some vedic texts very similar to Āp. XXII. 7. 21-25 'मरणकामो यजेत यः कामयेतानामयता स्वर्गं लोकमियामिति । ..... आर्भवे स्तुयमाने औदुम्बरीं पत्तोदशेनाहतेन वाससा दक्षिणाशिराः प्रावृतः संविशञ्जाह ब्राह्मणाः समापयत मे यज्ञमिति । तदेव संतिष्ठते ।'

2645. Vide Śat. Br. IV. 5. 4, Āśv. X. 1. 11—X, 5. 13, Āp. XXII. 14ff, Kāt. XXIII, Śāṅ. XVI. 19-30, Lāṭ. IX. 5-12.

2646. According to Kāt. XII. 3. 1 a pṛṣṭhya ṣaḍaha is so constituted that the first day is an Agniṣṭoma, the fourth is a Ṣoḍaśin and the rest are Ukthyas, while an Abhiplava ṣaḍaha is so constituted that the first and last are Agniṣṭomas and the rest are Ukthyas. There is also a difference between the two as regards the stomas. Vide S.B.E. vol. 26 pp. 402-403 n. 4. For the Chandomas, vide Haug's tr. of. Ait. Br. p. 347 *n.*

an Atyagniṣṭoma (called Avivākya, on which no speaking or dispute about errors is allowed) and the Udayanīya (concluding rite, which again is an Atirātra). The principal differences between the Dvādaśāha as an ahīna and a sattra are: (1) a sattra can be performed only by brāhmaṇas, while a dvādaśāha may be performed by any one of the first three varṇas; (2) the sattra may extend over even long periods (such as a year or more), while a dvādaśāha cannot so extend; (3) in the sattra the distinction of yajamāna and priests does not exist but all are yajamānas and all work as priests, while in dvādaśāha that distinction exists; (4) (as a consequence of the above) in a sattra there are no dakṣiṇās. Kāt. XII. 1. 4 states that wherever in the vedic texts the words 'upayanti' and 'āsate' occur it is a sign of a 'sattra' (and so in that case the rules about sattras will apply) but where the word 'yajate' or 'yājayet' is used it is a sign of an ahīna. In an ahīna only the last day is an Atirātra, but in a sattra both the first and last days are Atirātras (Kāt. XII. 1. 6).

It is now necessary to say something about a few other striking sacrifices.

Rājasūya.—This is strictly not a purely soma sacrifice, but it is a most complex ceremony extending over a very long period (more than two years) and comprising a number of separate iṣṭis (like the one to Anumati), Soma sacrifices (like Pavitra) and animal sacrifices (Kāt. XV. 1. 3). Even the briefest statement of the several rites will occupy many pages. An attempt will be made to indicate only a few salient features.

This ceremony could be performed only [2647] by a kṣatriya. There was a difference of view, some holding that it could be performed only by him who had not celebrated the Vājapeya (Kāt. XV. 1. 2), while others held that it should be celebrated after Vājapeya (Aśv. IX. 9. 19). In the Śat. Br. IX. 3. 4. 8 it is said 'by performing the Rājasūya one becomes a king (*rājan*)

2647. राजा राजसूयेन यजेत । लाट्यायनश्रौत IX. 1. 1, सत्याषाढ (XIII. 3) adds स्वर्गकामो before यजेत. Vide Āp. XVIII. 8. 1, Kāt. XV. 1. 1; राजसूयेन स्वाराज्यकामो यजेत quoted by Śabara on Jai. XI. 2. 12; Sāṅ. XV. 13. 1 after narrating that Varuṇa secured super-eminence, complete dominion and overlordship by performing it states तथो एवैतद्यजमानो यद्राजसूयेन यजते सर्वेषां राज्यानां ऐकध्यं स्वाराज्यमाधिपत्यं पर्येति । The word राजसूय is derived by Śabara as 'राजा तत्र सूयते तस्माद्राजसूयः । राज्ञो वा यज्ञो राजसूयः' (on Jai. IV. 4.1). Soma is called rājan.

and by the Vājapeya an emperor (*samrāṭ*) and the position of the king is (obtained) first and thereafter of emperor.' On the first day of the bright half of Phālguna the sacrificer undergoes dīkṣā for a soma sacrifice called Pavitra, which follows the procedure of Agniṣṭoma (Lāṭ. IX. 1. 2, Aśv. IX. 3. 2, Kāt. XV. 1. 6). There was difference of opinion as to the number of dīkṣā days (Lāṭ. IX. 1. 8, Kāt. XV. 1. 4). The Abhiṣecanīya ceremony which is the principal among the rites of Rājasūya took place exactly a year after the Pavitra sacrifice was commenced (Lāṭ. IX. 1. 4). At the end of the Abhiṣecanīya the sacrificer did not actually enter into water for the final bath (avabhṛtha), but wearing shoes made of boar-skin he repaired from the sacrificial ground (devayajana) to the water, put into the water black antelope horn or the foot portion of a black antelope skin and returned wearing shoes of black antelope skin (Lāṭ. IX. 1. 23–24).

There are five offerings commencing the next day after the Pavitra sacrifice, one each on one day. Then on the Full Moon of Phālguna there is an iṣṭi to Anumati (a puroḍāśa being offered). Vide Kāt. XV. 1. 9 and Āp. XVIII. 8. 10. There is an offering to Nirṛti prepared from the particles of grains that fall to the west of the śamyā from the mill-stone when the grains for the puroḍāśa to Anumati are being ground. The particles are taken in the sruva and a firebrand being lighted from the dakṣiṇa fire, the offering is made to the south of the vihāra on that fire-brand or on some saltish land. On the full moon day of Phālguna are begun the cāturmāsyas (i. e. first the Vaiśvadeva, then after four months Varuṇapraghāsas and so on). This goes on for one year. Between the *parvans* of the cāturmāsyas, the monthly full moon and new moon sacrifices are performed. The cāturmāsyas come to an end with the Śunāsīrīya parva on the first of the bright half of Phālguna. After that several rites follow such as the Pañcavātīya in five fires in the four directions and in the middle (Āp. XVIII. 9. 10–11, Kāt. XV. 1. 20–21), the Apāmārga-homa (Āp. XVIII. 9. 15–20, Kāt. XV. 2. 1 ff.). Then there are twelve offerings called 'ratnināṃ[2648] havīṃṣi' performed on twelve days one

2648. The 'ratnins' are enumerated somewhat differently in different texts, though some are common to all. Vide Tai. S. I. 8. 9. 1–2, Tai. Br. I. 7. 3, Sat. Br. V. 3. 1. 'रत्निनामेतानि हवींषि भवन्ति । एते वै राष्ट्रस्य प्रदातारः ।' तै. ब्रा. I. 7. 3.

after another in the houses of the 'ratnas' (jewels) viz. of the sacrificer himself, his queens and state functionaries (Kāt. XV. 3 and Āp. XVIII. 10). The deity to whom an offering is made is appropriate to the person in whose house the offering is made and the offerings and fees also differ. The twelve persons (according to Kāt.) are the sacrificer, the commander of the army, the purohita, the crowned queen, the sūta (minstrel ?), grāmaṇī (village headman), the kṣattṛ (chamberlain), saṃgrahītṛ (treasurer or charioteer ?), akṣāvāpa (superintendent of gambling), govikarta (hunter ?), dūta or pālāgala (courier), parivṛkti (the discarded queen) and the deities respectively are Indra, Agni Anīkavat, Bṛhaspati, Aditi, Varuṇa, Maruts, Savitṛ, Aśvins, Rudra (for both akṣāvāpa and govikarta), Agni, Nirṛti (the offering in this case is a caru of black rice husked with the nails). The dakṣiṇās also vary (vide Āp. XVIII. 10. 15–30, Kāt. XV. 3. 16–34). Then follow several offerings. Then comes the Abhiṣecanīya rite which is the central ceremony in Rājasūya and which lasts for five days (one day dīkṣā, three days *upasads* and one sutyā day of soma pressings). The dīkṣā of Abhiṣecanīya (anointing rite) is performed on the first of Caitra. It is performed on the southern part of the sacrificial ground while the Daśapeya is performed on the northern portion. In the Abhiṣecanīya and Daśapeya the hotṛ must be of the Bhṛgugotra (Tāṇḍya Br. XVIII. 9. 2, Kāt. XV. 4. 1, Śāṅ. XV. 13. 2). The Abhiṣecanīya follows the procedure of the Ukthya. Soma is bought for both Abhiṣecanīya and Daśapeya at the same time, but half of it (for Daśapeya) is deposited, after being carried in a cart, in the house of the brahmā priest. Then there are eight offerings of caru called Devasū-havīṃṣi viz. to Savitṛ, Agni Gṛhapati, Soma Vanaspati, Bṛhaspati, Indra, Rudra, Mitra, Varuṇa. According to Āp. XVIII. 12. 7–8 after these eight offerings the brahmā priest announces to the 'ratnins' that the sacrificer is their king and refers to the tribes or people occupying the country.[2649] Vide Kāt. XV. 4. 15–17 also. At the end of *iḍā* in the case of these caru offerings the priest brings waters of seventeen kinds in seventeen vessels of udumbara wood, viz. of the Sarasvatī river, flowing water of a river, water from ripples produced by the entrance of a man or animal, water

2649. अथैनं रत्निभ्य आवेदयत्येष वो भरता राजेति । एष वः कुरवो राजेति कौरव्यम् । एष वः पञ्चाला राजेति पाञ्चालम् । एष वः कुरुपञ्चाला राजेति वा कुरुपञ्चालान् । एष वो जनता राजेत्यन्यान् राज्ञः । सोमोऽस्माकं ब्राह्मणानां राजेति ब्रह्मा जपति । आप XVIII. 12. 7–9.

from a river drawn against the current, water of the sea, of ocean waves, of whirl-pools, of deep steady reservoirs always exposed to the sun, rain water in sunshine before it falls on the ground, of a lake, of a well, of frost &c. (Kāt. XV. 4. 21-42, Āp. XVIII 13. 1-18). All the waters are poured into a vat of udumbara which is placed near the seat of Maitrāvaruṇa. After the Marutvatīya cup is offered in the Ukthya rite, he spreads to the east of the vessel of water a tiger skin on the western end of which lead is placed. Six homas called Pārtha[2650] are offered (Āp. XVIII. 15. 8, Kāt. XV. 5. 34) and then with a gold piece tied in two kuśa blades the water in the big vessel is cleansed (that is utpavana is performed) and is distributed in four vessels made of palāśa, udumbara, nyagrodha and aśvattha. The sacrificer wears a silken garment (tārpya, explained by Kāt. XV. 5. 7-11), a white turban (one end of which hangs from the shoulder) and a mantle. The sacrificer recites the Āvid formulae[2651] (Āp. XVIII. 14. 10, Kāt. XV. 5. 21, which refers to Vāj. S. X. 9). The adhvaryu gives a strung bow and three arrows to the sacrificer, who puts a copper piece in the mouth of a long haired man (eunuch) for averting evil (from spirits and snakes?); vide Vāj. S. X. 10. The sacrificer treads upon the piece of lead and brushes it away with his foot and stands on the tiger-skin with a gold piece under his foot and has a fillet of gold on his head. The sacrificer holds up his arms. He strides in the quarters. The sacrificer stands facing the east and the adhvaryu, standing in front of him, first sprinkles him with the holy water contained in the vessel of palāśa, the other priests follow viz. the brahmā sprinkles him from the right with water in udumbara vessel and so on. Besides, the king's brother (Kāt. XV. 5. 30) or another kṣatriya (Āp. XVIII. 16. 3) sprinkles him with water from the udumbara vessel, a friendly kṣatriya from the third vessel and a vaiśya from the fourth (Āp. XVIII. 16. 3-5 says a kṣatriya sprinkles water from udumbara vessel, a vaiśya sprinkles from behind the king with water from aśvattha vessel and a friend from the common people sprinkles from the north side with water in the nyagrodha

2650. The Śat. Br. V. 3. 5. 4. connects these offerings with Pṛthu Vainya (the first consecrated king of men). The mantras are in Vāj. S. X. 5.

2651. In the Tai. S. 1. 8. 12. 2 the *āvid* formulae are interesting and they are: आविजोर्मिर्बृहपतिरोविक्ष इन्द्रो ... आविजे धावापृथिवी धृतव्रते आविजा देव्यदितिर्विश्वरूप्याविजोषमसावादुव्यायणोस्यां विश्यस्मिन्राष्ट्रे महते क्षत्राय महत आधिपत्याय महते जानराज्यायैष वो भरता राजा सोमोस्माकं ब्राह्मणानां राजा।

vessel). These actions are probably symbolic of the consent of all people to the anointing. The sacrificer rubs with the antelope horn over the whole of his body the holy water sprinkled over him (Kāt. XV. 6. 8). According to Kāt. XV. 6. 1-2 at this stage or after the dice play (to be described later) the hotṛ priest sitting on a cushion inlaid with gold recites the story of Śunaḥśepa[2652] for the sacrificer's benefit. Āp. XVIII. 19. 10 places this recital after the dice-play. Āśv. IX. 3. 9 says that the story of Śunaḥśepa is recited to the anointed king after the marutvatiya śastra in the Abhiṣecaniya rite (and before the Niṣkevalya śastra), the king being seated on a golden cushion and surrounded by his son and ministers. The adhvaryu also sits on a cushion inlaid with gold and utters the responses (pratigara) uttering 'om' (as the pratigara) at the end of each ṛk and 'tathā' at the end of each *gāthā*.[2653] At the end of the recitation the sacrificer donates a hundred or a thousand cows to the hotṛ and to the adhvaryu and donates also their respective cushions. The king takes three strides called Viṣṇukrama on the tiger-hide. All the remnants of the anointing waters are poured in the palāśa vessel and are handed over by the anointed king to his son with the words 'May my son continue this my work and this my prowess.' Then two homas are offered (called nāmavyatiṣañjaniya) in which at first the son is declared to be the father of his father and then secondly the relationship is rightly put.[2654] Vide Āp. XVIII. 16. 14-15, Kāt. XV. 6. 11. Then there is a symbolic march for the plunder of cows. As in Vājapeya a chariot is made ready, four horses are yoked to it, the sacrificer ascends it, takes the chariot in the midst of a group of hundred or more cows belonging to his kinsmen collected to the north of the āhavaniya,

---

2652. Vide Ait. Br. 33 for the story. Śāṅ. (XV. 17. 27) contains (with a very few additions and slight variations) the whole of the Ait. Br. passage on the story of Sunaḥśepa.

2653. ओमित्यृचः प्रतिगरं एवं तथेति गाथायाः। Āśv. IX. 3. 11, Kāt. XV. 6. 3, Āp. XVIII. 19. 13. For example, he responds with 'tathā' at the end of each of the ten gāthās from यं त्विमं in the Ait. Br. But some of the verses like कस्य नूनं (Ṛg. I. 24. 1 quoted in Ait. Br. 33. 4) are ṛks. There is no pratigara except at the end of ṛk verses and gāthās, when the Sunaḥśepa story is narrated.

2654. As an example may be given this. अयमभिमन्युरर्जुनस्य पितेत्येवं पितृशब्दो पुत्रे कृतो भवति यथायथं पश्चादिति अर्जुनोऽभिमन्योः पितेत्येवम् । com. on Kāt. Vāj. S. X. 20 refers to this प्रजापते न त्वदेतान्यन्यो ... ... तन्नोस्त्वयमस्मच्च पितासावस्य पिता वयं स्याम पतयो रयीणां स्वाहा।

touches one of them with the string of his bow and says 'I seize these.' Then he restores to the owner as many cows as are collected or more and returns to the sacrificial ground and makes four offerings called Rathavimocanīya. Vide Kāt. XV. 6. 13-23. Lāṭ. (IX. 1. 14-22) gives a more graphic account that at the time of giving gifts, the king's kinsmen are collected with their wealth, arrows are discharged at them by the sacrificer, they themselves bring back the arrows and declare 'O king, may you be victorious.' One-third of their wealth is distributed among the priests, one-third is given at the time of the Daśapeya to the worthy brāhmaṇas brought in that rite, one-third is returned to the kinsmen, villages are bestowed on them and they become rājanyas (king's nobles) but not worthy of coronation. Before getting down from the chariot he puts on boar-skin shoes, bows to the earth with 'O mother earth! do not injure me nor may I injure thee' (Vāj. S. X. 23, Tai. S. I. 8. 15. 1). The king then sits on a chair or throne made of khadira that is placed in front of the āgnīdhrīya shed (Āp. XVIII. 18. 5-8, Kāt. XV. 7. 1-4). The priests and the 'ratnins' take seats round him; the brahmā priest (the purohita or adhvaryu according to Kāt. XV. 7. 11) hands over the sphya to the king, from whom it passes on to several persons viz. the king's brother, sūta, sthapati, village headman, kinsman (Āp. XVIII. 18. 14-16). According to Kāt. (XV. 7. 13) the kinsmen and the pratiprasthātṛ mark out a place for dice play with the sphya (according to Āp. XVIII. 18. 16 the superintendent of gambling does so). On the ground so marked a quadrangular hut or shed is erected. Five dice are handed over to the king who is lightly struck by the priests with sticks of sacrificial trees. The king calls as umpires (upadraṣṭṛ) the saṁgrahītṛ, the bhāgadugha (collector of taxes) and the kṣattṛ (Āp. XVIII. 19. 6-8). The play is so arranged that the best throw (of the dice) comes to the king and the worst to his kinsman.[2655] It appears that the dice play required golden pieces also beyond a hundred or a thousand in number (Āp. XVIII. 19. 1). According to Kāt. (XV. 7. 25-26) the king actually undergoes the avabhṛtha bath, while Lāṭyāyana as stated above differs. After the offering of anubandhyā cow and the performance of the udavasānīyā iṣṭi, a cake prepared from a mixture of rice

2655. कृतादि वा निधयाद्राजप्रभृतिभ्यः । सजाताय कलिम् । Kāt. XV. 7. 18-19. कृत and कलि are throws of dice. It is difficult to find out how exactly dice-play took place. Vide Eggeling's note in S.B.E. vol. 41 pp. 106-107.

and barley and baked on twelve potsherds is offered to Indra and Viṣṇu. For ten days after the Abhiṣecanīya he offers successively on each day offerings called 'saṁsṛpām havīṁṣi' respectively to Savitṛ, Sarasvatī, Tvaṣṭṛ, Pūṣan, Indra, Bṛhaspati, Varuṇa, Agni, Soma, Viṣṇu (Kāt. XV. 8. 1-4, Āp. XVIII. 20. 7 which says they are ten or seven and they begin with Agni; Āśv. IX. 4. 6 speaks of only seven). Each of these is offered in fire set up in a devayajana to the east of the preceding one and the last of the ten is offered in the shed prepared for the Daśapeya rite (Āp. XVIII. 20. 8-10, Kāt. XV. 8. 2-3). On each of the ten (or seven) iṣṭis (of saṁsṛpām havīṁṣi) he offers to the priests ordinary or golden lotus flowers and on the tenth day he wears a garland made of those flowers. That becomes his consecration (dīkṣā) for the next rite, viz. Daśapeya. Jaimini declares (in XI. 2. 57-62) that though soma is purchased for both Abhiṣecanīya and Daśapeya at the same time (vide p. 1216 above), yet in the two ekāhas the whole procedure of soma sacrifices is repeated. A different proposition is stated in Kāt. XV. 8. 10-13 (except as to dīkṣā and avabhṛtha which are repeated in both rites). On the tenth day after the Abhiṣecanīya is finished the Daśapeya is performed (Lāṭ. IX. 2. 1, Kāt. XV. 8. 14 says on the 7th day i. e. on 7th of the bright half of Caitra). This rite is so called because in it each of the ten camasas (cups) of soma are partaken of by ten brāhmaṇas (Āśv. IX. 3. 18, Āp. XVIII. 21. 3). The brāhmaṇas are the ten ṛtviks who ordinarily partake of the soma in camasas plus 90 more (called *anuprasarpakas*) who possess special qualifications, viz. whose ten ancestors on the father's and mother's sides were masters of Vedic lore, had rigorously performed their duties and were engaged in holy actions and who had no sexual or marital alliances with non-brāhmaṇas[2656] (vide Āśv. IX. 3. 19-21, Śāṅ.

2656. Vide note 574 for the passage of Āśv. According to Āp. XVIII. 21. 3-4 and Kāt. XV. 8. 16 the ten ancestors on the father's side only should have been drinkers of Soma. Vide Lāṭ. IX. 2. 5-7. The पाराहशौत III. 3. 4. 18 says येषां दशसु न मीमांसेरंस्त ऋत्विजो यसर्पिणश्च (प्रसर्पिणश्च?) पिबा (पि .वा?) किं ब्राह्मणस्येत्युक्त्वा प्रसर्पति (प्रसर्पन्ति?). The editor, Dr. Raghu Vira, was puzzled by this sūtra. It means (when corrected as shown) that the priests and others who came to drink soma and could not trace ten generations of soma-drinkers entered after reciting a verse out of the verses that begin with the words 'pibā somam' (like Ṛg. VI. 17. 1 or VII. 22. 1) and the verse 'why do you ask the brāhmaṇa about his father or mother' (Kāṭhaka Saṁ. 30. 1 or Maitrāyaṇī S. IV. 8. 1). The verse is: किं ब्राह्मणस्य पितरं किमु पृच्छसि मातरम् । श्रुतं चेद्ब्राह्मिण्येषं स पिता स पितामहः ॥

XV. 14. 8–11). Kāt. XV. 8. 17 gives an option that one need not investigate whether the ten ancestors of each were soma-drinkers, but the one hundred brāhmaṇas should enter the *sadas* after reciting Vāj. S. X. 30.

Fees are prescribed at many of the constituent rites in Rājasūya, but special fees are mentioned in connection with the Abhiṣecanīya and Daśapeya (Āśv. IX. 4. 2 ff). At the Abhiṣecanīya Āśv. recommends 32000 cows to each of the four principal priests, 16000 to each of the first assistants of the four, 8000 to each of the next four, 4000 to each of the last group of four (Āśv. IX. 4. 3–5). These come to the huge figure of 240000 cows. Vide Śāṅ. XV. 16. 16–19 also for such large figures. At the Daśapeya 1000 cows are the fee and then there are special rewards for the 16 priests (Āśv. IX. 4. 7–20, Āp. XVIII. 21. 6–7, Kāt. XV. 8. 23–27, Lāṭ. IX. 2. 9–15) viz. a golden chain, a horse, a milch cow (with calf), a goat, two golden ear-rings, two silver ear-rings, twelve five year old pregnant cows, a barren cow, a round golden ornament (rukma), a hull, cotton cloth, a thick hempen piece of cloth, a cart full of barley drawn by an ox, an ox, a heifer, a young three year old hull respectively to udgātṛ, his three assistants, adhvaryu, pratiprasthātṛ, brahmā, maitrāvaruṇa, hotṛ, brāhmaṇācchaṁsin, potṛ, neṣṭṛ, acchāvāka, āgnīdhra, unnetṛ and grāvastut.

For one year after the avabhṛtha bath in Daśapeya, the king has to keep certain observances (called devavratas in Lāṭ. IX. 2. 17 ff) viz. he should not plunge in water for daily bath but should only rub his body with water, should always brush his teeth, pare his nails, should not cut his hair (but may shave the mustache or beard), should sleep in the sacrificial fire-shed on a tiger-skin with its hair upwards, should daily offer fuel-sticks ; his subjects (except brāhmaṇas) should not cut their hair for a year, nor should horses' hair be cut for a year. For a year he should never walk on the ground unless he wears shoes (Kāt. XV. 8. 29).

There are several minor offerings, such as those called pañcabila in four quarters and in the midst (Kāt. XV. 9. 1–3), twelve *prayuj* offerings at the interval of a month or on two days (Kāt. XV. 9. 11–14, Āp. XVIII. 22. 5–7).

At the end of a year from the Daśapeya took place the rite called Keśavapanīya[2657] which followed the procedure of the

2657. केशवपनीय इति संज्ञा संवत्सरभृतानां केशानां तस्मिन् वपनं क्रियते । com. on लाट्यायनश्रौत IX. 3. 1.

Atirātra sacrifice (Āśv. IX. 3. 24) and in which hair grown for a year were cut off. About the exact time of the rite there were different views. The com. on Āśv. says it was performed on some day in the bright half of Vaiśākha, while the com. on Kāt. XV. 9. 20 says that the pressing day of Keśavapanīya fell on the Full moon day of Jyeṣṭha. Vide also Lāṭ. IX. 3. 1-3. Then follow two rites called Vyuṣṭi-dvirātra (dvirātra for prosperity), which were respectively (first) an Agniṣṭoma and (the 2nd) an Atirātra performed at the interval of one month (Kāt. XV. 9. 21-23, Āśv. IX. 3. 25-26). There were several views about the time of their performance (Lāṭ. IX. 3. 5-9, Āp. XVIII. 22. 14-16). Then one month after the 2nd Vyuṣṭidvirātra (i. e. on Śrāvaṇa Full Moon day) was performed the rite called Kṣatradhṛti (lit. stability of martial power) which followed the procedure of Agniṣṭoma (Āśv. IX. 3. 27, Lāṭ. IX. 3. 13). Śāṅ. (XV. 16. 10-11) refers to the legend that Kurus lost in each battle because they did not offer the Kṣatra-dhṛti rite.[2658] According to Śat. Br. V. 5. 5. 6-9 in place of the Udavasānīyā there was the Traidhatavī iṣṭi in which a cake prepared of barley and rice mixed together was offered. This finished the Rājasūya, but one month after it in the bright half the Sautrāmaṇī iṣṭi was performed. This last is dealt with separately below.

It will have been seen that this complex rite is full of symbolic elements and also popular elements like dice-play.

In the sabhāparva of the Mahābhārata (chap. 33-35) there is a description of the Rājasūya performed by Yudhiṣṭhira, but it is of the vaguest sort and does not go into any details. Vide Jai. IV. 4. 1-4 (the dice-play has no independent fruit and that it, though held for the cow referred to in Āp. XVIII. 19. 2, is not an aṅga of the abhiṣecanīya only, but really of the whole Rājasūya), V. 2. 13-15 (in the offerings called Devasūhavirmṣi, which are prepared from several kinds of corn, the mortar is one for pounding all the corns one after another), XI. 4. 1-3, XI. 4. 4-7 (the priests chosen at the beginning should continue to work till the end), XI. 4. 8-10 (about the offerings in the houses of the 'ratnins'), XI. 4. 43 (the mantra

2658. अथैतेन क्षत्रस्य धृतिना यजते । अनुष्टोमेन रथन्तरपृष्ठेनाग्निष्टोमेन । तेनो ह त्रिशोकेन वृद्धद्युम्न अभिमतारिण ईजे । तमु ह ब्राह्मणोऽनुव्याजहार । न क्षत्रस्य धृतिनाप्नुहि इममेव प्रतिसमरं कुरुक्षेत्राण्युज्यन्त इति । तदु किल तथैवास्त यथैवैनं मोवाच । आश्वलायन-श्रौत XV. 16. 8-11.

recited at the time of beating corn in the mortar has to be repeated in the Devasūhavirṃṣi); II. 3. 3 (holds that the iṣṭi in which puroḍāśas are offered to Agni and others and in which the fees are various such as gold and which is called Aveṣṭi is a separate iṣṭi and that though in the Rājasūya it is performed only by a king, it can be performed independently of Rājasūya by a brāhmaṇa in a somewhat different order of offerings).[2659]

2659. For details about Rājasūya, vide Tai. S. I. 8. 1–17, Tai. Br. I. 4. 9-10, Śat. Br. V. 2. 3–5, Ait. Br. VII. 13 and VIII., Tāṇḍya Br. XVIII. 8–11, Āp. XVIII. 8–22, Kāt. XV. 1–9, Āśv. IX. 3–4, Lāṭ. IX. 1–3, Śāṅ. XV. 12 ff, Baud. XII ; S. B. E. vol. 41 pp. XXIV ff, vol. 44 pp. XV ff, Prof. Keith's 'Rel. and Phil. of the Veda' part 2, p. 340, and Intro. to Tai. S. pp. CXI–CXIII, Weber's 'Die Königsweihe den Rājasūya' (Berlin, 1893), which last contains an exhaustive treatment (pp. 1–158) of the Rājasūya.

CHAPTER XXXV

SAUTRĀMAṆĪ[2660] AND OTHER SACRIFICES

This rite is included among the seven forms of haviryajñas (Gaut. VIII. 20, Lāṭ. V. 4. 23). It is not a soma sacrifice but is a combination of an iṣṭi with animal sacrifice (Śat. Br. XII. 7. 2. 10). The chief characteristic of it is the offering of *surā* (wine) in it. In modern times milk is offered in place of surā in the Sautrāmaṇī. According to Lāṭ. V. 4. 20 and Āp. XIX. 5. 1 there are two kinds of this rite, viz. Kaukilī and Caraka-sautrāmaṇī (or the ordinary one). Kaukilī is an independent rite, while the ordinary Sautrāmaṇī is performed at the end of the Rājasūya (one month after it) and also at the end of the piling of the fire-altar (agnicayana). Lāṭ. V. 4. 21 states that there is chanting of *sāmans* only in the Kaukilī and not in the other variety and according to Kāt. XIX. 5. 1 (com.) it is the brahmā that chants the Sāman to Indra in the Bṛhatī tune (viz. Vāj. S. XX. 30) Āp. XIX. 1. 2. states that in the ordinary sautrāmaṇī the procedure is that of the nirūḍhapaśubandha and that (XIX. 5. 2) in Kaukilī also the same procedure applies. There are two fires as in Varuṇapraghāsa, but the southern one is not established on a *vedi* (Kāt. XIX. 2. 1 and V. 4. 12). Some held (as is done by Śat. Br. XII. 7. 3. 7) there were two vedis behind which two mounds were raised, one for cups of milk and the other for cups of surā. The rite takes four days, during the first three out of which wine is prepared from various ingredients, while on the last day three cups of milk and three of surā are offered to Aśvins, Sarasvatī and Indra and animals are slaughtered for the same three.

In this rite the victims are a reddish-white goat for the Aśvins, an ewe for Sarasvatī, and a bull for Indra Sutrāman (Śāṅ. XV. 15. 1-4, Āśv. III. 9. 2). A brief description of the method in which wine was prepared in the Sautrāmaṇī is given below from the Śat. Br. V. 5. 4, XII. 7. 2, Kāt. XV. 9. 28-30,

---

2660. The word Sautrāmaṇī is derived from sutrāman (a good protector), an epithet of Indra (vide Ṛg. X. 131. 6-7). Sat. Br. V. 5. 4. 12 derives it as 'one who was well saved (by the Aśvins)'.

XIX. 1-2 (and com. thereon). Rice-grains[2661] (or malted rice grains and malted barley or śyāmāka) germinated and ungerminated covered in linen cloth are purchased from an eunuch in exchange for lead, wool and fried grain for thread. This purchase takes place on the southern one of the vedis specially prepared for this rite near the peg called antaḥpātya on a hide. The rice grains are cooked in plenty of water and the malted barley grains are powdered and boiled. The water and scum are strained through woollen cloth. The hair of the lion, the wolf and the tiger are thrown into the mixture (this is symbolic of the characteristics of prowess, impetuosity and fury found in those wild beasts). Certain vegetable substances such as myrobalans, ginger, nutmeg (which serve as yeast and are mentioned in the note below), are powdered and boiled in plenty of water. The hot watery scum from the two pots of boiled rice and powdered barley is taken into two vessels and the extract of vegetables is poured in both of them, the mixture being called *māsara*. The boiled rice and barley are also mixed with the extract of powdered vegetables, put in a kumbhī (a big jar) along with contents of the māsara vessels and the jar is placed in a pit dug to the south-west of the sacrificial hall and kept there for three nights. On the first day the milk of one cow meant for Aśvins is poured into the kumbhī placed in the pit and powder of śaṣpa is added. The next day the milk of two cows meant for Sarasvatī is poured into the kumbhī and powder of tokma is added. On the third milk of three cows meant for Indra is added and also the powder of fried rice grains (lāja). To the west of the mound prepared on the southern vedi a pit is dug (outside the vedi according to com. on Kāt. XIX. 2. 7.) on which is spread bull's hide over which a sieve of bamboo is held and the liquid from the large jar is poured over the sieve (called kārotara).[2662] The wine thus purified is collected in a

2661. Kat. (XIX. 1. 18 ff) uses the words शष्प (malted rice or grass), तोक्म (malted barley), नग्नहु (vegetable substances). The com. on Kāt. XIX. 1. 20 quotes verses specifying these latter: संजत्वक् त्रिफला चैव शुण्ठी चैव पुनर्नवा। चतुर्जातकसंयुक्ता पिप्पला गजपिप्पली। वंशोऽवका बृहच्छत्रा चित्रकं चेन्द्रवारुणी। अश्वगन्धां समुत्पाट्य मूलान्येतानि निर्दिशेत्॥ धान्यकं च पचानीं च जीरकं कृष्णजीरकम्। द्वे हरिद्रे पचा चैव विल्वा व्रीहयो पचाः।' Ap. XIX. 5. 4 defines नग्नहु differently.

2662. Ap. XIX.5–6 and Baud. XVII.31–32 state methods of preparing surā which differ in several details, though the principle is the same. It is prepared by fermentation from rice, barley and other corn. So this surā would be 'paiṣṭī' out of the three varieties mentioned in Manu XI. 94.

sata (a vessel of palāśa wood) and it is further purified by means of the hair of the tail of a cow and a horse. Of this purified wine the pratiprasthātṛ fills the cups for being offered to the three deities, viz. the Aśvins, Sarasvatī and Indra. Either one or three cups are filled for each of the three deities (Kāt. XV. 10. 13). This is done after the offering of the omentum and after mārjana. According to Āp. XIX. 2. 9–11 and Kāt. XV. 10. 12 powders of kuvala, karkandhū and badara fruits are added to the wine in the cups and they are offered in the dakṣiṇa fire (Kāt. XV. 10. 17). There was only one puronuvākyā, one praiṣa and one yājyā for all cups.[2663] On the dakṣiṇa fire a vessel having a hundred holes covered with a hair strainer and gold and containing the remnants of the wine cups was hung by means of a *śikya* and the trickling drops of wine were offered to pitṛs called Somavat, Barhiṣad and Agniṣvātta with Vāj. S. XIX. 52–60. It is to be noted that the remnants of the wine were not drunk by the priests, but were either drunk by a brāhmaṇa hired for the purpose (Āp. XIX. 3. 3) or they were poured over an ant-hill. Āśv. (III. 9. 5–6) says that the priests muttered a verse (which is Vāj. S. XIX. 35) and only smelt the remnants of the wine offered (this is called prāṇabhakṣa). Śāṅ. notes that some teachers recited the puronuvākyā, yājyā and praiṣa in an entirely changed form (probably as directly mentioning only surā and not in the phraseology of soma) but it should not be so done, since that is a method fit only for asuras. From this one may plausibly argue that the Sautrāmaṇī was practised among Asuras (non-Aryan people or schismatics) and was adopted by the Vedic Aryans, with appropriate changes. But it is clear that the drinking of surā by priests was condemned even then.[2664] Eggel-

---

2663. Vide Āśv. III. 9. 3. The puronuvākyā is Ṛg. X. 131. 4, the yājyā is Ṛg. X. 131. 5 and the praiṣa to the hotṛ to repeat the yājyā is : 'होता यक्षद्बृहिना सरस्वतीमिन्द्रं सुत्रामाणं सोमानां सुराम्णां जुषन्तां व्यन्तु पिबन्तु मदन्तु सोमान् सुराम्णो होतर्यज।' (Āśv. III. 9. 3.). It will be noticed that surā is referred to in terms of soma. Śāṅ. says 'सर्वानेके विकृतानामनन्ति। तद् तथा न कुर्यादासुरं तत्'. According to Śāṅ. the adhvaryu recited Vāj. S. XIX. 34 (= Tai. Br. II. 6. 3) and the pratiprasthātṛ and udgātṛ recite Vāj. S. XIX. 35 as the mantra for smelling surā. Vide Lāṭ. V. 4.15 also for भक्षमन्त्र.

2664. ब्राह्मणं परिक्रीणीयाद्गुच्छेषणस्य पातारम्। आप. XIX.3.3. This is quoted by Sabara on Jai. III 5. 15. सत्या. (XIII. 8. 28–31]) has 'ब्राह्मणं परिक्रीणीते ग्रहोच्छेषणस्य पातारम्। ... वल्मीकवपायामवनयेत्। स्वयं वा पिबेत्। सर्वहुतं वा जुहुयात्।'. Vide note 1892 for a quotation from Tai. Br. to the same effect.

ing (in S. B. E. vol. 44 p. 246 n) does not appear to be right so far at least as the sūtra literature goes when he says that the priests drank the remnants of the wine cups (though the Śat. Br. uses the somewhat doubtful word 'bhakṣayanti' which in the sūtras also means 'smelling').

All three animals in the sautrāmaṇī may be goats. A fourth animal was offered to Bṛhaspati under certain circumstances (Āp. XIX. 2. 1-2). Though the omentum of the victims was offered to Aśvins, Sarasvatī and Indra, the paśupuroḍāśas were offered to Indra, Savitṛ and Varuṇa (Āśv. III. 9. 2). This rite was performed at the end of Rājasūya or for one who performs *cayana* or for one who suffers from purging due to excessive drinking of soma beverage or who vomits soma or from the openings of whose body (except the mouth) soma flows out. The independent (kaukilī) sautrāmaṇī was performed for a brāhmaṇa who desired prosperity, or for a king who was driven from his kingdom or for one who had no cattle (Kāt. XIX. 1. 2-4). In the beginning and at the end there was a *caru* to Vditi.

The northern vedi is in extent only one-third of the vedi for a soma sacrifice. When the uttaravedi is being prepared the pratiprasthātṛ takes earth from the cātvāla pit, makes a mound to the south of the uttaravedi, a second mound for keeping wine cups in front of the dakṣiṇa fire, brings fire from the dakṣiṇa fire and establishes it on the mound which is to the south of the uttaravedi. According to Kāt. XIX. 2. 11 (which is part of the description of the independent sautrāmaṇī) the adhvaryu purifies on the northern vedi milk contained in a vessel made of reeds (vetasa) and fills cups of milk, the one for Aśvins being made of aśvattha wood, and those for Sarasvatī and Indra being made of udumbara and nyagrodha. The three cups of milk are offered together by the adhvaryu. After the offering to Vanaspati in the animal sacrifice a couch of muñja cords is placed between the two vedis and the sacrificer sits on the couch which is covered with a black antelope skin with a silver piece under his left foot and a golden one under his right foot. The adhvaryu offers thirty-two cups of *vasā* (fat) from vessels made of the hoofs of bulls with Vāj. S. XIX. 80-95. The remnants of fat are contained in a sata (vessel) of reeds. The adhvaryu sprinkles over the yajamāna whose body has been rendered fragrant with unguents the liquid from that vessel till it trickles down up to his mouth. The adhvaryu touches the sacrificer who summons his men

and servants calling them by auspicious names (such as suśloka). The men lift him gradually first up to the knee, then up to the navel &c. The sacrificer alights on a black antelope skin when a 33rd cup of fat is taken, a sāman in the Bṛhat tune for Indra (Vāj S. XX. 30) is chanted by the brahmā priest and the nidhana (finale) of it differs according to the varṇa of the sacrificer[2664a] and is sung in chorus by all and then the 33rd cup is offered. There is the final purificatory bath as in Somayāga. Finally, after the caru to Aditi āmikṣā is offered to Mitra and Varuṇa and then an animal to Indra Vayodhas. Jaimini lays down certain propositions about the Sautrāmaṇī. In III. 5. 14-15 he states that all the contents of the grahas of milk are offered in the fire on the northern vedi and of the wine cups into the southern fire and nothing is left out of them for being offered as Sviṣṭakṛt offering or for the purpose of iḍā. In IV. 3. 29-31 it is established that when the Vedic text says 'after piling the fire altar one should perform Sautrāmaṇī' there is no injunction about the time of performing Sautrāmaṇī but what is declared is that the Sautrāmaṇī is an aṅga (a subordinate constituent) of the principal rite viz. agnicayana and in IX. 3. 40-41 it is stated with reference to the same text that the sautrāmaṇī is not necessarily performed immediately after agnicayana but on the Full Moon day or New Moon day thereafter. In VIII. 2. 1-9 Jaimini declares that though the surā offered in Sautrāmaṇī is spoken of as soma and though several actions such as purchase of surā, tying in cloth are common to surā and soma, the general procedure to be followed in Sautrāmaṇī is that of darśapūrṇamāsa and not of soma sacrifice and that surā is spoken of as soma by way of lauding the offering of wine cups.[2665]

Aśvamedha (Horse-sacrifice).

This is one of the most ancient sacrifices. Ṛg. I. 162 and 163 show that the horse-sacrifice was in vogue long before the composition of those two hymns. It was believed, as said above

---

2664 a संश्रवसे विश्रवसे सत्यश्रवसे श्रवस इति सर्वे निधनमुपयन्ति । संजित्यै विजित्यै सत्यजित्यै जित्या इति क्षत्रियस्य । संपुष्टचै विपुष्टचै सत्यपुष्टचै पुष्ट्या इति वैश्यस्य । कात्यायन XIX. 5. 3-5; vide Lāṭ. V. 4. 19 for a similar rule.

2665. Vide for details Tai. S. I. 8. 2, Vāj. S. XIX and XX, Tai. Br. I. 4. 2, I. 8. 5-6, II. 6-7, Śat. Br. V. 5. 4-5, XII. 7-8, Āśv. III. 9, Śāṅ. XV. 15, Lāṭ. V. 4. 11 ff, Kāt. XV. 9-10, XIX, Āp. XIX. 1-10, Prof. Kieth's Intro. to Tai.S.pp.CXXII-CXXIII and 'Religion and Philosophy of Veda', part 2, pp. 352-354.

(on p. 982), by the composer of those hymns that the horse when sacrificed went to heaven. A goat was led in front of the horse (Ṛg. I. 162. 2–3 and I. 163. 12). The horse was decked with ornaments, it was anointed with the svaru (I. 162. 9) and it perambulated fire thrice or fire was carried round it thrice (I. 162. 4); cloth and a piece of gold are provided for the dead body of the horse to lie down upon (I. 162. 16). Horse's flesh was cooked in a pot called ukhā (I. 162. 13) and offered in fire (I. 162. 19); 34 ribs are mentioned in Ṛg. I. 162. 18, while 26 ribs are mentioned in other texts with reference to the goat. It appears that āgūḥ, yājyā and vaṣaṭkāra were uttered in making offerings of the horse's flesh (Ṛg. I. 162. 15). The horse is identified with Āditya, Trita and Yama (Ṛg. I. 163. 3).

This rite is described in the Śat. Br. XIII. 1–5, Tai. Br. III. 8–9, in which several ancient monarchs are enumerated who performed the Aśvamedha. The Tai. Br. III. 8. 9 identifies the Aśvamedha with the kingdom[2666] and states 'he, who being weak, offers an Aśvamedha, is indeed thrown away (lit. spilt away). If the enemies (of the king) were to secure the horse, the sacrifice would be destroyed'. The sūtras closely follow the Brāhmaṇas. The Aśvamedha is deemed in the sūtras to be an *ahīna* of three pressing days (Āśv. X. 8. 1, com. on Kāt. XX. 1. 1., Śāṅ. XVI. 1. 2). A paramount sovereign (sārvabhauma) or a crowned king who is not a sārvabhauma may perform this sacrifice (Āp. XX. 1. 1, Lāṭ. IX. 10. 17). Āśv. X. 6. 1 states (probably following the Ait. Br. about the Mahābhiṣeka in Rājasūya) that one who desires to secure all objects, to win all victories (including one over his own senses) and to attain all prosperity may perform Aśvamedha.[2667] A beginning is made on the 8th or 9th of the bright half of Phālguna or on the same days of Jyeṣṭha or

---

2666. राड्र वा अश्वमेधः। ..... परा वा एष सिच्यते योऽबलोऽश्वमेधेन यजते। यद्मित्रा अश्वं विन्देरन् हन्येतास्य यज्ञः। तै. ब्रा. III. 8. 9. The Ait Br. does not describe the Aśvamedha, but the Mahābhiṣeka (called Aindra) of the Rājasūya.

2667. सर्वान् कामानाप्स्यन् सर्वा विजितीर्विजिगीषमाणः सर्वो व्युष्टीर्व्यश्नियश्चाश्वमेधेन यजेत। आश्व. X. 6. 1; स य इच्छेदेवंवित् क्षत्रियमयं सर्वा जितीर्जयेतायं सर्वाँल्लोकान्विन्देतायं सर्वेषां राज्ञां श्रैष्ठ्यमतिष्ठां परमतां गच्छेत साम्राज्यं भौज्यं स्वाराज्यं पारमेष्ठ्यं राज्यं माहाराज्यमाधिपत्यमयं समन्तपर्यायी स्यात्सार्वभौमः सार्वायुष आन्तादा परार्धात् पृथिव्यै समुद्रपर्यन्तायाः एकराळिति तमेतेनैन्द्रेण महाभिषेकेण क्षत्रियं शापयित्वाभिषिञ्चेत्। ऐ. ब्रा. 39. 1. The words from साम्राज्यं to एकराळिति are quite familiar to all brāhmaṇas even in modern times.

Aṣāḍha according to some (Kāt. XX. 1. 2-3, Lāṭ. IX. 9. 6-7). Āp. holds that it should be begun on the Full Moon of Caitra (XX. 1. 4). Rice from four vessels, four *añjalis* and four handfuls is cooked (it is called *brahmaudana*); it is smeared with ghee and given to the four principal priests who are also given one thousand cows each and gold weighing one hundred berries (Kāt. XX. 1. 4-6, Lāṭ. IX. 9. 8). Two iṣṭis are performed, the first for Agni Mūrdhanvan and the 2nd for Pūṣan (Āśv. X. 6. 2-5, Kāt. XX. 1. 25). The yajamāna cuts off his hair, pares his nails, brushes the teeth, bathes, puts on new garments, wears a golden ornament (niṣka), observes silence. Vide Tai. Br. III. 8. 1 and Āp. XX. 4. 9-14 for these. His four queens well-decked and wearing niṣkas come near the king, the crowned queen accompanied by princesses, the 2nd queen (vāvāta, the favourite one) accompanied by daughters of kṣatriyas, the third (parivṛkti, the discarded one) accompanied by daughters of sūtas and village headmen and the fourth (pālāgalī, of low origin) accompanied by daughters of kṣattṛs (chamberlains) and saṁgrahītṛs.[2668] The yajamāna enters the fire-hall and sits to the west of the gārhapatya facing the north.

Various rules are stated about the horse's colour and other qualities (Śat. Br. XIII. 4. 2. 4, Kāt. XX. 1. 29-35, Lāṭ. IX. 9. 4). The horse must be all white with dark circular spots and of great speed, or the front part of its body may be dark and the rest of the body white, or it may have a tuft of dark blue hair. The horse is sprinkled with holy water by the four principal priests standing in the four directions (from the east), each surrounded respectively by a hundred princes, a hundred ugras who are not kings, by sūtas and village headmen, and by chamberlains and saṁgrahītṛs (Āp. XX. 4, Sat. XIV. 1. 31). A dog with four eyes (i. e. having two natural eyes and two depressions in the skin above the eyes) is killed by a man of the āyogava caste or by a voluptuary with the pestle of sidhraka wood. The horse is made to enter water and the corpse of the dog is with a loop of reeds made to float under the horse (Āp. XX. 3. 6-13, Kāt. XX. 1. 38 ff., Sat. XIV. 1. 30-34). The horse is brought near the fire and offerings are made in the fire till the water ceases to drip down from the horse's body (Kāt. XX. 2. 3-5). A girdle made of muñja grass or of

---

2668. या पत्नीनां प्रियतमा यजमानस्य सा वावाता राजदुही। अनपचिता परिवृक्ती। लाट्यायनश्रौ. IX. 10. 1-2.

darbhas 12 or 13 aratnis long and smeared with the ājya that remains after being poured over the *brahmaudana* is invoked with the mantra 'imām—agṛbhṇan raśanām ṛtasya' (Tai. S. IV. I. 2. 1, Vāj. S. 22. 2) and the horse is bound with it after taking the permission of the brahmā priest. The horse, having water sprinkled over it with mantras and after the sacrificer repeats into its right ear the several appellations for a horse (Āp. XX. 5. 1–9), is let off to roam over the country accompanied by four hundred guards with the mantra 'O gods, the guardians of quarters, protect this horse &c.' (Vāj. S. XXII. 19, Tai. S. VII. 1. 12. 1). The guards include one hundred princes deserving to be seated on couches in the presence of the king, wearing armour and the other guards are armed with swords, arrows and thick clubs according to their rank (Tai. Br. III. 8. 9, Āp. XX. 5. 10–14, Kāt. XX. 2. 11). The horse is allowed to roam for a year where it likes and is not made to turn back, but it is prevented from associating with mares or plunging into water for a bath (Kāt. XX. 2. 12–13). While doing their duty of guarding the horse, the guards are to subsist by demanding food from brāhmaṇas who do not know the procedure of Aśvamedha (or depriving them of it) or on cooked food taken from all brāhmaṇas; they may stay in the houses of chariot-makers (Āp. XX. 5. 15–18, Kāt. XX. 2. 15–16). Every day during the year that the horse is absent, three iṣṭis are offered to Savitṛ in the morning, mid-day and evening, when Savitṛ is respectively addressed as Satyaprasava, Prasavitṛ and Āsavitṛ; (Āśv. X. 6. 8, Lāṭ. IX. 9. 10, Kāt. XX. 2. 6). When the prayāja offerings are made a brāhmaṇa (other than the priests) with a vīṇā chants three laudatory *gāthās* in honour of the king composed by himself stating 'you donated this, you performed such and such a sacrifice, you cooked food for distribution' (Āp. XX. 6. 5, Kāt. XX. 2. 7). This singing took place thrice a day after the iṣṭi to Savitṛ (Śat. Br. XIII. 4. 2. 8–14, Tai. Br. III. 9. 14). A kṣatriya lute player also sang three laudatory songs (Śat. Br. XIII. 1. 5. 6, Āp. XX. 6. 14) referring to the battles fought and victories won by the sacrificer. Every day for a year after the iṣṭi to Savitṛ is finished the hotṛ sitting on a golden cushion to the south of the āhavanīya fire recites to the crowned king surrounded by his sons and ministers the narratives called 'Pāriplava' (revolving or recurring legends). When about to commence the Pāriplava the hotṛ makes the summons 'adhvaryo3' and the adhvaryu seated on a golden seat (with four legs) responds with 'ho

hotar' (Āśv. X. 6. 10–13).[2669] The other priests also sit down on cushions or boards and bands of singers holding lutes sit down to the south and sing of the good deeds of the king along with those of his ancestors (Āp. XX. 6. 13). As the king is thus engaged in sacrifices and in listening to the Pāriplava[2670] and to the songs, Āp. (XX. 3. 1–2) notes that, till the Aśvamedha is performed, the adhvaryu becomes the king, as the sacrificer (the crowned king) declares 'O brāhmaṇas and nobles! this adhvaryu is your king. Whatever honour you (usually pay to me) should be paid to him. May whatever he does be regarded as done by you.' Āśv. (X. 7. 1–10) sets out what the Pāriplava is. Śat. Br. XIII. 4. 3 and Śāṅ. XVI. 2 also deal at length with the Pāriplava and they agree with Aśv. in most places. For ten days one after another different texts are recited and this goes on for a year in narrative cycles of ten days. On the first day the hotṛ says 'Manu was the son of Vivasvat, men are his subjects' and points at the house-holders sitting down in the sacrificial hall with 'they (men as subjects of Manu) are here sitting down' and then recites some one hymn of the Ṛgveda saying 'to-day the Veda is that of ṛks.' On the second day he says 'Yama is the son of Vivasvat, the pitṛs are his subjects' and points to the old men assembled and recites one anuvāka from the Yajurveda. On the 3rd day Varuṇa and the gandharvas (as his subjects identified with fine looking young men) are mentioned and some hymn from the Atharva-veda dealing with diseases and their cure was narrated. On the 4th day the narration relates to Soma, son of Viṣṇu and Apsarases (identified with beautiful young women), and some

---

2669. Various methods of response (प्रतिगर) are mentioned by Āp. and others. 'उपविष्टेष्वध्वर्यो3इत्यध्वर्युं होता मन्त्रयते। हो3यि होतरित्यध्वर्युः प्रतिगृणाति। ओं होतरिति वा।' आप. XX. 6. 11–12; 'हवै होतरिति प्रतिगृणाति।' कात्या. XX. 3. 2; होयि होतरिति सर्वत्र प्रतिगृणोति। शाङ्खायन 16. 1. 27. Āp. (XX.6.7) says that Pāriplava and Bhauvanyava are recited every day for a year.

2670. The following quotations will illustrate the Pāriplava recital. प्रथमेऽहनि मनुर्वैवस्वतस्तस्य मनुष्या विशस्त इम आसत इति गृहमेधिन उपसमानीताः स्युस्तानुपदिशत्यृचो वेदः सोऽयमिति सूक्तं निगदेत्। द्वितीयेऽहनि यमो वैवस्वतस्तस्य पितरो विशस्त इम आसत इति स्थविरा उपसमानीताः स्युस्तानुपदिशति यजुर्वेदो वेदः सोयमित्यनुवाकं निगदेत्। आश्व. X. 7. 1–2. In the Vedāntasūtra (III. 4. 23–24) the conclusion is stated that the ākhyānas (such as that of Pratardana and Indra in Kauṣītaki Up. III. 1, of Jānaśruti in Chān. Up. IV. 1. 1 and of Yājñavalkya and his wives in Bṛ. Up. IV 5. 1) in the Upaniṣads are not meant to be recited in the Pāriplava, since only certain legends alone are specified in the texts for that purpose.

hymn containing magic spells from the Āṅgirasa Veda; on the 5th the narration relates to Arbuda Kādraveya and serpents (identified with visitors who know serpent lore and poison lore); on the 6th day to Kubera Vaiśravaṇa, his subjects the Rakṣases (identified with evil doing *selagas* and the lore of Piśāca Veda (?). On the 7th the narration relates to Asita Dhānvana, his subjects the Asuras and usurers and some illusion (a trick) from Asura lore, on the 8th day to Matsya Sāmada, his subjects aquatic animals, Puñjiṣṭhas (fishermen) from Matsya country and some Purāṇa passage from the Purāṇa-veda, on the 9th to Tārkṣya, son of Vipaścit, his subjects the birds and brahmacārins and some narrative (itihāsa) from the itihāsaveda; on the 10th day Dharma Indra, his subjects the gods and the young śrotriyas who accept no gifts, and some sāman from the Sāmaveda. Every day for a year in the evening four oblations called Dhṛti were made in the āhavanīya (Kāt. XX. 3. 4). On the first day 49 homas called Prakramas were made in the dakṣiṇa fire with Vāj. S. XXII. 7–8 (beginning with 'himkārāya svāhā'). Vide Śat. Br. XIII. 1. 3. 5, Tai. S. VII. 1. 19. In this way the Sāvitrī iṣṭis, singing, listening to Pāriplava and Dhṛti offerings went on for a year. For a year the sacrificer kept observances as in the Rājasūya (Lāṭ. IX. 9. 14). Large fees were given to the hotṛ and adhvaryu (Lāṭ. IX. 9. 12–13 and 16) and to the singers (Kāt. XX. 3. 7).

Several expiatory ceremonies are prescribed (Āp. XXII. 7. 9–20, Kāt. XX. 3. 13–21) if the horse died or suffered from disease. If the horse was carried away by an enemy the sacrifice was destroyed. At the end of the year the horse was brought to a stable and the sacrificer underwent dīkṣā (initiation). There were 12 dīkṣās, 12 upasads and three sutyā days (days on which soma was pressed). Vide Śat. Br. XIII. 4. 4. 1, Āśv. X. 8. 1, Lāṭ. IX. 9. 17. After the dīkṣā the sacrificer is sung as on a par with the gods and on the pressing days, at the time of avabhṛtha, the udayanīyā iṣṭi, the anubandhyā and the udavasānīyā he is spoken of as on a par with Prajāpati.[2671] There are 21 yūpas (stakes) all being 21 aratnis high. The central one is of Rājjudāla (śleṣmātaka) tree. On its two sides are two pine yūpas and on both sides thereafter there are three yūpas

2671. विसृष्टवाचि यजमाने संप्रेष्यति वीणागणकिनो दैवैरिमं यजमानं संगायतेति। एवं सद्दौपवसथात्। प्रजापतिना सुत्यास्वभृथोदवसानीयासूक्ष्म्योदवसानीयास्विति। आप. XX. 7. 14–16.

each of bilva, khadira and palāśa (Tai. Br. III. 8. 9, Śat. Br. XIII. 4. 4. 5, Āp. XX. 9. 6–8, Kāt. XX. 4. 16–20). Large numbers of animals are tied at all these stakes and slaughtered. Even wild animals like boars and birds are bound and held between the intervals of the yūpas (Āp. XX, 14. 2 ff.). Vide Vāj. S. XXIV for a list of hundreds of animals out of which those from Kapiñjala onwards (Vāj. S. XXIV. 20 ff.) are let off after fire is carried round them (Kāt. XX. 6. 9, Āp. XX. 17. 5). The 2nd among the three pressing days is the most important and is full of several very striking matters (such as the ribald dialogue, the brahmodya &c.). The horse to be sacrificed is yoked to a chariot along with three horses, the adhvaryu and sacrificer occupy the chariot and take it to a lake or reservoir of water, make the horses enter it (Kāt. XX. 5. 11–14). On the horse's return to the sacrificial ground it is anointed with clarified butter by the crowned queen, the favourite queen and the discarded queen in the front, the middle and hind parts of its body respectively. They also respectively tie 101 golden beads on the head, mane and tail of the horse with bhūḥ, bhuvaḥ and svaḥ. They give the remnants of the previous night's offering to the horse with Vāj. S. XXIII. 8. If it does not eat it the remnants are cast into water. Near the yūpa a dialogue takes place between the hotṛ who asks 'who wanders alone' (Vāj. S. XXIII. 9) and 'who was the first to be thought of' (Vāj. S. XXIII. 11) and the brahmā replies with Vāj. S. XXIII. 10 and 12 respectively. The horse is praised by repeating Ṛg. I. 163 (Āśv. X. 8. 5). A piece of cloth is spread over grass, thereon a mantle is spread and a gold piece is placed thereon and the horse is killed thereon. Before the words 'adhrigo śamidhvam' in the adhrigu praiṣa Ṛg. I. 162 and Ṛg. I. 163. 12–13 are to be recited. When the horse is killed, the wives of the king go round it thrice from left to right with 'gaṇānām tvā', thrice from right to left with 'priyāṇām tvā' and again thrice from left with 'nidhīnām tvā' (all in Vāj. S. XXIII. 19). They fan the dead horse with their garments while braiding their hair on the right side upwards loosening the hair on the left side and strike their left thighs with their right hands (Āp. XXII. 17. 13, Āśv. X. 8. 8). The crowned queen lies down by the side of the dead horse and both are covered by the adhvaryu with the mantle on which the horse lies and she unites with it (Āp. XXII. 18. 3–4, Kāt. XX. 6. 15–16). Then according to Āśv. X. 8. 10–13 outside the vedi the hotṛ abuses the crowned queen in obscene language and

she returns the abuse along with her one hundred attendant princesses and the brahmā priest and the favourite wife enter into a similar obscene abuse. According to Kāt. XX. 6. 18 the four principal priests and the chamberlain enter into an obscene abusive dialogue (given in Vāj. S. XXIII. 22-31) with the queens along with their young female attendants. Vide Śat. Br. XIII. 2. 9 and Lāṭ. IX. 10. 3-6. The attendant princesses raise the crowned queen from near the horse with 'dadhikrāvṇo' (Ṛg. IV. 39. 6 = Vāj. S. XXIII. 32). The horse is cut up with golden, silver and iron (*lauhī* may mean copper) needles by the crowned queen, the favourite queen and the discarded one with Vāj. S. XXIII. 33-38. They take out the fat of the dead horse in place of the omentum taken from the goat in other sacrifices (Āp. XXII. 18. 10-11, Kāt. XX. 7. 7). The blood of the horse is cooked and offered at the end of the other offerings to sviṣṭakṛt (Āp. XXII. 19. 10 and Kāt. XX. 8. 8.). Before the omentum of the animals meant for Prajāpati is offered there is *brahmodya* (a theological dialogue, where questions and riddles are propounded and answers given) between the priests in the *sadas*. According to Āśv. X. 9. 2-3 at first the hotṛ asks the adhvaryu 'who roams alone &c.' (Vāj. S. 23. 45) and the adhvaryu replies 'the sun roams alone &c.' (Vāj. S. 23. 46). Then the hotṛ again asks 'what light is like the sun's &c.' (Vāj. S. 23. 47) and the adhvaryu replies 'truth is light equal to the sun &c.' (Vāj. S. 23. 48, which however reads 'brahma sūryasamam'). Then the brahmā priest asks udgātṛ and he replies (Vāj. S. 23. 49-50), then the udgātṛ asks a question and the brahmā replies (Vāj. S. 23. 51-52). Then the four priests come out and each asks the sacrificer who sits facing the east the question 'I ask you the furthest limit of the earth &c.' (Ṛg. I. 164. 34) and the sacrificer replies 'this vedi is the furthest limit' (Ṛg. I. 164. 35). Vide Lāṭ. IX. 10. 9-14 for almost the same questions and answers.[2672] Kāt. (XX. 7. 10-15) mentions Vāj. S. XXIII. 49-62 as the dialogue that takes place at this stage in the Aśvamedha and states that Ṛg. I. 164. 34 (= Vāj. S, XXIII. 61) is the question propounded by the sacrificer (and not by the priests as Āśv. says). Two grahas called Mahiman are offered, one before the omentum is

2672. In several sacrifices such riddles were mooted; vide Āśv. VIII. 13. 14 for one in Daśarātra which is taken from Ait. Br. 24. 6, and Śat. Br. IV. 6. 9. 20; vide Tai. S. VII. 4. 18, Tai. Br. III. 9. 5 for brahmodya and Ṛg. X. 88. 18 and VIII. 58. 1-2 for questions and answers.

offered and the other after it (Śat. Br. XIII. 5. 2. 23 referring to Vāj. S. XXIII. 2, Āśv. X. 9. 4, Kāt. XX. 7. 16–17 and 27). Offerings of the vapā of all animals are made to the several deities of whom Prajāpati is the last. Then the king sits on a lion's or tiger's skin, a piece of gold is placed on his head with Rg. I. 90. 1, a bull-hide is held over his head, he is sprinkled with the remnants (saṁsrāva) of the offerings called *mahiman* and offerings are made to the twelve months, Madhu, Mādhava &c. and seasons Vasanta &c. After the several offerings, on the third pressing day, the sacrificer performs the final purificatory bath. At the end of the avabhṛtha iṣṭi, on the head of a bald man,[2673] whose eye-balls are yellowish-brown, who has prominent teeth, who is suffering from white leprosy and who dips into water, an offering is made (three according to Āp. XX. 22. 6) with the words 'to Jumbaka, svāhā' (Vāj. S. XXV. 9). Vide Kāt. XX. 8. 16, Śāṅ. XVI. 18. 18 and Sat. XIV. 5. 4. The latter add two important details, viz. that the man should be of the Atri gotra and that he should enter such deep water that it should flood his mouth. The Tai. Br. III. 9. 15 says that the āhuti 'to Jumbaka, svāhā' is the last in Aśvamedha and that Jumbaka means Varuṇa. A hundred cows and a cart to which bulls are yoked are given to him. When the sacrificer comes out of the water after avabhṛtha persons guilty of such grave sins as brāhmaṇa murder plunge into that-water and become purified without having performed the penances prescribed for such sins (Kāt. XX. 8. 17–18).[2674]

Apart from the gifts provided for many of the subordinate rites performed in the Aśvamedha, Lāṭ. (IX. 10. 15—IX. 11. 4) prescribes that on the first and last of the three soma pressing days he should donate a thousand cows and on the second day he should donate all the wealth that belongs to the non-brāhmaṇa residents in one district (janapada) out of his realm,

---

2673. खलतेर्विक्लिधस्य शुक्लस्य पिङ्गाक्षस्य मूर्धन्नु जुहोति । एतद्वै वरुणस्य रूपम् । तै. ब्रा. III. 9. 15.

2674. Vide note 333 above where Tai. S. (V. 3. 12. 1-2) is cited viz. तरति ब्रह्महत्यां योऽश्वमेधेन यजते; Śat. Br. XIII. 3. 1. 1 has the same words. According to Gaut. 22.9, Āp. Dh. S. I. 9. 24. 22 and Manu IX. 82–83 if the murderer of a brāhmaṇa, after declaring his crime, bathed in water in which the king took his final avabhṛtha bath, he would be free from that sin. Prof. Eggeling (S.B.E. vol. 44 p. XL. note 1) does not advert to the fact that expiation for brāhmaṇa murder was thus prescribed by the dharmasūtras.

or he should donate to the hotṛ the wealth in the eastern part of the country conquered by him and the wealth in the southern, western and northern parts respectively to the brahmā, adhvaryu and udgātṛ and their assistants or he should at least donate 48,000 cows to each of the four principal priests, 24000, 12000, 6000 to each of the four groups of three assistants of the principal priests in order. Āśv. X. 10. 10 also says that he should donate the wealth of non-brāhmaṇas in the four conquered quarters except land and human beings. Kāt. (XX. 4. 27-28) contains similar rules.

Even in ancient times this sacrifice must have been rare. The Tai. S. V. 4. 12. 3 and Śat. Br. XIII. 3. 3. 6 both state that the Aśvamedha was a sacrifice which was *utsanna* (gone out of vogue). The Atharvaveda (XI. 7. 7-8) also appears to regard the Rājasūya, Vājapeya, Aśvamedha, the sattras and several other sacrifices as *utsanna*. The origin of the rite is obscure. In it several popular, religious and symbolical elements are inextricably blended and some rites like the queen lying down near the dead horse must be regarded as unaccountable survivals from the hoary past. Various theories have been advanced to account for the origin, but there is, as is to be expected, no agreement among scholars. Vide S. B. E. vol. 44. pp. XVIII-XXXIII, Prof. Keith's Introduction to Tai. S. pp. CXXXII ff. and 'Religion and Philosophy of the Veda' part 2 pp. 345-347 for the several theories of European scholars.

In the Āśvamedhika parva of the Mahābhārata Aśvamedha is described at some length. It is probable that in the epic only the popular elements and a few of the religious rites were emphasized. In chap. 71. 16 Vyāsa tells Yudhiṣṭhira that the Aśvamedha purifies a person of all sins.[2675] The dikṣā took place on the full moon of Caitra (72. 4). The sphya, kūrcas and utensils were made of or inlaid with gold (72. 9-10). The greatest warrior of the day, Arjuna, was appointed to guard the horse during its rambles for a year, and he was asked to avoid battle and carnage as far as possible (72. 23-24). The horse was kṛṣṇasāra (marked with dark spots, 73. 8). Arjuna was accompanied by a pupil of Yājñavalkya and many learned brāhmaṇas (73. 18) for the performance of propitiatory rites (śānti). No indication is given as to the number of soldiers

2675. अश्वमेधो हि राजेन्द्र पावनः सर्वपाप्मनाम्। तेनेड्डा त्वं विपाप्मा वै भविता नात्र संशयः॥ आश्वमेधिक 71. 16.

that accompanied Arjuna. The horse is said to have wandered over the whole of India from east to south, then west to north. After many fights with opponents Arjuna meets death at the hands of his son Babhruvāhana, king of Maṇipura, whom he upbraided for meek submission, but is brought back to life by his wife Ulūpī, the Nāga princess (chap. 80). Arjuna spares the lives of the opponents whom he vanquishes and invites them to the sacrifice. The description of the sacrifice follows the general outline given above. But there is hardly any detailed or graphic description of the special features of Aśvamedha and one rather carries the impression that the author does not depict what he has seen but only what he has heard or read. The pravargya (88. 21) and the pressing of soma are mentioned (88. 22). There were six yūpas of bilva, 6 of khadira, two of devadāru and one of śleṣmātaka (88. 27–28). Bull's heads and aquatic animals were built into the fire altar (88. 34). Draupadī was made to lie by the dead horse (89. 2–3). There are several points of difference. The altar is shaped like a Garuḍa (88. 32), the bricks were of gold, and 300 animals were sacrificed. It is said that the vapā of the horse was offered (89. 3), while Āp. (XX. 18. 11) emphatically states that there is no vapā in the case of the horse. Great emphasis is laid on the huge masses of food distributed to all, on the drinking bouts and singing parties and the feeding of the poor and helpless (88. 23, 89. 39–43). Crores of niṣkas were donated to brāhmaṇas and the whole earth to Vyāsa (89. 8–10) who returned it to Yudhiṣṭhira for gold to be given to him and to brāhmaṇas. The Bālakāṇḍa of Rāmāyaṇa (chap. 13–14) contains a more graphic description of the Aśvamedha performed by Daśaratha for securing sons. It expressly refers to the Kalpasūtra (tryahoऽśvamedhaḥ saṁkhyātaḥ kalpasūtreṇa brāhmaṇaiḥ).

In I. A. vol. VIII. p. 273 (at p. 278) we find that a general, called Udayacandra, of Nandivarma Pallavamalla (about the 9th century A. D.) defeated Pṛthivīvyāghra, king of Niṣadha, who had accompanied the horse in his horse sacrifice. In E. C. vol. X. Kolar No. 63 it is stated in an inscription of 757 A. D. that the Cālukya emperor Pulakeśi was purified by his bath at an Aśvamedha. In the very ancient Nanaghat Inscription (A. S. W. I. vol. V. pp. 60–61) an Andhra king[2676] is described as

2676. In the Bhāgavata-purāṇa XII. 1. 20 the founder of the Andhras is said to have been a vṛṣala and the Matsya (144. 43) says that śūdra kings will perform Aśvamedha in the Kali age.

having performed the Rājasūya, two Aśvamedhas, Gargatrirātra, Gavāmayana and Aṅgirasām-ayana.[2677] In the first half of the 18th century Savai Jayasing, king of Amber, performed an Aśvamedha (vide Īśvaravilāsakāvya of Kṛṣṇa-kavi, D. C. Ms No. 273 of 1884-86 and 'Poona Orientalist,' vol. II. pp. 166-180).

Sattra

It was shown above (pp. 1213-1214) that the Dvādaśāha sacrifice partook of the characteristics of both ahīna and a sattra and a few points of difference between the two were also set out there. Sattras are sacrificial sessions, the duration of which varies from 12 days to a year or more. Their archetype (prakṛti) is the Dvādaśāha (Āśv. XI. 1. 7). Sattras again may for convenience be divided into those called Rātrisattras and those called Sāṁvatsarika (carried on for a year or more). Āśv. (XI. 1. 8-XI. 6. 16) and Kāt. (XXIV. 1-3) speak of numerous Rātrisattras called Trayodaśarātra and so on up to Śatarātra, state the principles on which these sattras are evolved from the Dvādaśāha, the model, and set out the schemes of all of them. If only one day has to be added then it is the Mahāvrata that is added before the last day called Udayanīya. If two or more days are required to be added then they are added before the Daśarātra (that forms the central part of the Dvādaśāha and comes after the Prāyaṇīya day). In the case of Rātrisattras of many days' duration ṣaḍahas are added (Kāt. XXIV. 1. 5-7, Āśv. XI. 1. 8-14); the Daśarātra is never repeated but is only one in the same sattra (Kāt. XXIV. 3. 34). For want of space all the Rātrisattras will be passed over. The Gavām-ayana[2678] (lit. the course or way of the cows i. e. the sun's rays or days) is the model of all Sāṁvatsarika sattras (Āśv. XI. 7. 1 and com., Jai. VIII, 1. 8, Kāt. XXIV. 4. 2). Several sattras of the duration of one year or more are mentioned in the sūtra texts such as Ādityānām-ayana (Āśv. XII. 1. 1), Aṅgirasām-ayana

---

2677. For further information on Aśvamedha vide Tai. S. IV. 6. 6-9, IV. 7. 15, V. 1-6, VII. 1-5; Tai. Br. III. 8-9, Sat. Br. XIII. 1-5, Āp. XX. 1-23, Sat. XIV, Āśv. X. 6-10, Kāt. XX, Lāṭ. IX. 9-11, Baud. XV; S. B. E. vol. 44 Intro. pp. XXIV-XXXIII, Prof. Keith's tr. of Tai. S. CXXXII-CXXXVII.

2678. Vide Tilak's 'Arctic Home in the Vedas' (1903) pp. 200-202 where he quotes a passage from the Ait. Br. (IV. 3) to the effect that "cows' means 'Ādityas' (months, or days and nights). Vide pp. 193-212 for the significance of Gavām-ayana and its purpose.

Kuṇḍapāyinām-ayana (Āśv. XII. 4. 1), Sarpāṇām-ayana, Traivārṣika (one for three years), Dvādaśavārṣika, Ṣaṭ-triṁśadvārṣika, Śatasaṁvatsara for sādhyas (Āśv. XII. 5. 18) and Sahasrasaṁvatsara, Sārasvata (performed on the holy Sarasvatī river). A few words will be said only about the Gavām-ayana.

Gavām-ayana which is a Sāṁvatsarika sattra (extending over 12 months of 30 days each) consists of the following parts (Tāṇḍya XXIV. 20. 1, Āśv. XI. 1. 2-6 and 7. 2-12, Sat. XVI. 5. 18-40, Āp. XXI. 15 ff.):

A. Prāyaṇīya Atirātra (opening day)
Caturviṁśa day, an Ukthya
Five months, each consisting of four Abhiplava ṣaḍahas and one Pṛṣṭhya ṣaḍaha (i.e. each month of 30 days).

Three Abhiplavas and one Pṛṣṭhya
Abhijit day (Agniṣṭoma)
Three Svarasāman days. } 28 days.

All these together come to six months of 30 days each.

B. The Viṣuvat[2679] or central day (which is Ekaviṁśastoma) on which an Atigrāhya Soma cup is offered to the sun and also a victim.

C. Three Svarasāman days (on which *sāmans* called Svara are chanted, Tāṇḍya IV. 5)
Viśvajit day (Agniṣṭoma)
One Pṛṣṭhya and three Abhiplava ṣaḍahas } 28 days.

Four months, each consisting of one Pṛṣṭhya in the beginning and four Abhiplava ṣaḍahas

Three Abhiplava ṣaḍahas
One Goṣṭoma (Agniṣṭoma)
One Āyuṣṭoma (Ukthya)
One Daśarātra (ten days) } 30 days.
Mahāvrata day (Agniṣṭoma)
Udayanīya (Atirātra).

All these in C come to six months.

2679. The Viṣuvat day is like the central ridge of a shed from which on two sides two thatches spread slantingly downwards. In order to imitate the Sun's passage to the north and south, the arrangement shown in A is reversed in C. अथ विषुवानेकविंशः । न पूर्वस्य पक्षसो नोत्तरस्य । आप. XI. 7. 7-8. For a description of Chandomas vide Haug's tr. of Ait. Br. p. 347 n.

The Gavām-ayana was performed for various rewards viz. progeny, prosperity, plenty (or greatness), high position, heaven (Āp. XXI. 15. 1, Sat. XVI. 5. 14). About the day on which dīkṣā (initiation) for it took place there were several views. The Ait. Br. (19. 4) prescribes that it should be done either in Māgha or Phālguna. Some (Sat. XVI. 5. 16–17, Āp. XXI. 15. 5–6) said that dīkṣā took place four days before the Full Moon of Māgha or Caitra. Vide Lāṭ. X. 5. 18–19, Kāt. XIII. 1. 2–10 for the several days. Jai. VI. 5. 30–37 and Kāt. XIII. 1. 8 favour the view that the dīkṣā should be undertaken four days before the Full Moon day of Māgha (i. e. on ekādaśī day) since the Vedic texts prescribe the Ekāṣṭakā day of Māgha (i. e. 8th of dark half) for the purpose of soma (after 12 days of dīkṣā). In the Gavām-ayana the procedure of the Dvādaśāha as a sattra is to be followed (Āp. XXI. 15. 2–3, Jai. VIII. 1. 17), but some held that in Gavām-ayana there were to be 17 dīkṣās (instead of 12). There are certain general rules about sattras which may be stated here. They are to be performed by many as sacrificers and only brāhmaṇas can perform them (Jai. VI. 6. 16–23, Kāt. I. 6. 14). There are no separate priests (ṛtvij), but the yajamānas themselves are the priests (Jai. X. 6. 45–50 and 51–59, Sat. XVI. 1. 21). A text quoted by Śabara on Jai. VI. 2. 1 says that the persons who engage together in a sattra must be at least 17 and not more than 24 and each of the performers secures the same unseen (or spiritual) reward for which the sattra is performed (Jai. VI. 2. 1–2). There is therefore no *varaṇa* (choosing) of priests and there is no question of remunerating them for their services by several gifts as in Jyotiṣṭoma (Jai. X. 2. 34–38). At the time when gifts are made in other rites, in sattras the sacrificers perform the Dākṣiṇa homas and waving their dark antelope skins they go out with their faces turned northwards by the path by which dakṣiṇas are taken away in other rites (Sat. XVI. 2. 19, Kāt. XII. 2. 18). As no dakṣiṇas are to be donated in sattras agents (called saṃhāras) are not to be sent for collecting subscriptions (Sat. XVI. 1. 40). The sacrificial utensils (yajñapātras like juhū) to be used in the sattra are specially got prepared for the common use of all, while each keeps his own utensils separate with which he is cremated if he dies in the midst of the performance (Jai. VI. 6. 33–35). Though the general rule is that there is no *pratinidhi* (substitute) for the performer of rites like agnihotra, the sattra is an exception, since if any one of the many performers dies in the midst of a

sattra another person may be substituted by the others in his place (Jai. VI. 3. 22), but he is only an agent secured by payment and the spiritual unseen reward of the sacrifice goes to the performer that is dead (Jai. VI. 3. 23-25). The Tāṇḍya Br. IX. 8. 1 states that if one of the performers of a sattra dies after dīkṣā, he should be cremated, his bones should be tied in his antelope-skin and placed beyond the mārjālīya shed and his son or other very near relative should be given dīkṣā and be associated in the sattra. Only those who have consecrated the three Vedic fires can engage in sattras except in the Sārasvata sattra (Jai. VI. 6. 27-32). According to Jai. (VI. 6. 1-11) only those who follow the same procedure can join in the sattra, otherwise difficulty is caused in the case of the Prayājas and the Āprī verses. The second prayāja deity in the case of Vasiṣṭhas and Śunakas is Narāśaṁsa, while Tanūnapāt is the second prayāja deity in the case of other gotras. After stating the view of Gāṇagāri that only those who have the same gotra can join in a sattra, Āśv. (XII. 10. 2-3) states the view of Śaunaka (and it is his view also) that even persons of different gotras may join in a sattra, that where in a particular matter there is a difference of procedure in accordance with the difference of gotra, the procedure should be regulated by the gotra of one (called gṛhapati) of those who join in the sattra. Jai. (VI.6.24-26) states the somewhat striking rule that even among brāhmaṇas those who belong to the Bhṛgu, Vasiṣṭha and Śunaka gotras cannot join in a sattra but only those who belong to the Viśvāmitra gotra or who have a similar procedure (about prayājas &c.), since śruti requires that the function of hotṛ in a sattra must be performed by one belonging to Viśvāmitra gotra. If after making a resolve to join in a sattra or if after just beginning a sattra a man gives up the idea, he had to perform by way of penance the Viśvajit rite (Jai. VI. 4. 32 and VI. 5. 25-27).

Though in a sattra all are yajamānas yet one of them becomes the gṛhapati; those actions which only one can perform and which are done in other sacrifices by the yajamāna (except what are saṁskāras like *vapana*) are here done by the gṛhapati alone and others only touch him (e. g. in tying the veda or placing a fuel-stick on fire, Kāt. XII. 1. 9-15). In performing dīkṣā a peculiar procedure is followed (Kāt. XII. 2. 15, Sat. XVI. 1. 36, Āp. XXI. 2. 16-XXI. 3. 1). The adhvaryu first gives dīkṣā to the gṛhapati and to brahmā, hotṛ and udgātṛ; the pratiprasthātṛ gives dīkṣā to adhvaryu, then to maitrāvaruṇa,

brāhmaṇācchaṁsin and prastotṛ; the neṣṭṛ gives dīkṣā to the pratiprasthātṛ and the acchāvāka, āgnīdhra and pratihartṛ; the unnetṛ gives dīkṣā to neṣṭṛ, the grāvastut, and subrahmaṇya and lastly the pratiprasthātṛ or another brāhmaṇa (who is himself a dīkṣita) or a Veda student or snātaka gives dīkṣā to unnetṛ. Each of the wives of all these is given dīkṣā along with her husband (Kāt. XII. 2. 16). Every day one of those who join in a sattra guards soma silently and others are allowed to study their Veda and to fetch fuel-sticks (Śat. Br. IV. 6. 9. 7, Kāt. XII. 4. 1 and 3). On the tenth day there is brahmodya[2680] as in Aśvamedha or they engage in the abuse of Prajāpati for having created such pests as bees and wasps and thieves (Āp. XXI. 12. 1-3, Sat. XVI. 4. 33-35, Kāt. XII. 4. 21-23).

While engaged in the sattra the performers have to observe certain rules (Āśv. XII. 8, Drāhyāyaṇa Śr. VII. 3-9 ff). From the day the dīkṣaṇīyā iṣṭi is performed in the sattra, the usual duties to pitṛs (such as piṇḍapitṛ-yajña), to gods (such as Agnihotra) are stopped till the end of the sattra. They have to give up sexual intercourse and must not run, they should laugh covering their teeth (so as not to show them), should not jest with women, should not speak to those who are not āryas, should not plunge in deep water, should give up falsehood and anger, should not climb up trees or enter a boat or chariot. Rules are laid down as to whom to bow to. A *sattrin* should eschew singing, dancing and instrumental music. While dīkṣās are going on he should subsist on milk. On pressing days he should partake of the remnants of *havis* only or of fruits and roots and other food fit for *vrata*.

One of the most interesting day is the Mahāvrata, which is the last day but one in a sattra. Several strange and bizarre rites are performed on this day. This day is so called because it is specially meant for Prajāpati who is 'mahān' and mahāvrata means 'anna' (Tāṇḍya IV. 10. 2, Śat. Br. IV. 6. 4. 2). In this a mahāvratīya cup of soma is offered in addition to the

---

2680. The Tāṇḍya Brāhmaṇa (IV. 9. 12 and 14) speaks of both brahmodya and the parivadana of Prajāpati 'ब्रह्मोद्यं वदन्ति ब्रह्मवर्चस एव प्रतितिष्ठन्ति। प्रजापतिं परिवदन्त्याप्त्यैवैनं तद् व्याचक्षते वावद्।पामैनमिति।'. The com. gives several explanations of both. ब्राह्यायणश्रौत (IX. 4. 16-18) says 'प्रजापतिं परिवदन्ति। पापैः कर्मभिरित्येके। अपि वाश्वर्युबहुवृचानां किंचित् स्यात्।.'

usual ones and a victim is slaughtered for Prajāpati. In connection with this cup a mahāvrata sāman is chanted followed by the recitation of the Mahad-uktha (great laudation) of the hotṛ. Vide Haug's tr. of Ait. Br. p. 283 n, S. B. E. vol. 43 pp. 282–283 note 5. The chanting of the Pṛṣṭhastotras is started by a brāhmaṇa who plays on a harp (vāṇa) with a hundred strings of muñja grass (Sat. XVI. 7. 7–9, Tāṇḍya V. 6. 12–13). During the chanting the udgātṛ priest sits on a chair of udumbara, the hotṛ on a swing, the adhvaryu on a board and the other priests on seats of grass (Tāṇḍya V. 5. 1–12). A brāhmaṇa in the front part of the sadas and a śūdra at the back alternately belaud and abuse those engaged in the sattra, the former saying they have done well and the latter saying they have not done well (Tāṇḍya V. 5. 13). An ārya and a śūdra engage to the west of the āgnīdhra shed in a contest for a white circular skin that symbolizes the sun (for whom the Gods and Asuras fought laying claim to the Sun as their own), the fight being so arranged that it culminates in favour of the ārya (Tāṇḍya V. 5. 14–17, Sat. XVI. 7. 28–32). A harlot and a brahmacārin abuse each other on the northern hip of the altar.

Sexual intercourse between a man and a woman (that are strangers to the sacrifice) takes place in a screened shed to the south of the mārjālīya shed (according to Kāt. XIII. 3. 9). This probably is a symbol for indicating creation of the world by Prajāpati to whom the mahāvrata specially appertains. A chariot is made ready to the east of the southern corner of the vedi. A noble or a kṣatriya in full armour occupies it, armed with a bow and three arrows. He goes round the vedi thrice and discharges three arrows at a hide but not so as to pierce it through and through (Śāṅ. XVII. 15).

They beat drums placed on all corners of the vedi and strike a bull-hide spread over a hole dug to the west of the āgnīdhrīya shed, half inside the vedi and half outside (this is called 'bhūmi-dundubhi'). When the priests chant, the wives of the performers act as choristers[2681] to the singing priests (Jai. X. 4. 8, Sat. XVI. 6. 21, Āp. XXI. 17. 15–16) and play on several instruments. Eight servants and maids or slaves and

2681. पत्न्योऽपघाटिलाभिरुपगायन्त्यार्त्विज्यमेव तत्पत्न्यः कुर्वन्ति सह स्वर्गं लोकमयामेति। ताण्ड्य V 6. 8. The com. explains that अपघाटिला is a lute made to yield sound by the breath from one's mouth. 'उपगायन्ति पत्न्योऽपाघाटलिकास्तालुकवीणाः काण्डवीणाः पिच्छोला अलाबुकपिङ्गीर्ण्यः।' सत्याषाढ XVI. 6. 21.

slave girls, placing water jars on their heads dance thrice round the mārjālīya seat, striking the ground with their right feet and singing popular songs (gāthās) in which cows are lauded as mothers of ghee and which contain words like 'this is sweet' (Sat. XVI. 6. 39-41, Āp. XXI. 19. 17-20 and XXI. 20). These features of the mahāvrata show that it was some folk festival in the hoary past and was welded on to the solemn vedic sacrifices as a relaxation after the weary days and months of sacrifices. The Ait. Ār. (I and V) gives an esoteric turn to the mahāvrata. In one place it summarizes all the popular features of the Mahāvrata.[2682]

On the Udayanīya day three anubandhyā cows are offered to Mitrāvaruṇa, the Viśve Devas and Bṛhaspati (Kāt. XIII. 4. 4).

In the Indian Antiquary, vol. 41, Dr. Sham Sastry contributed a series of articles on the Vedic calendar in which he adduced weighty arguments for holding that the Gavāmayana was a symbolic representation of the efforts made to square up the Vedic lunar year with the solar year by adding intercalary days. It is somewhat remarkable and also indicative of the bias of most western scholars that while Prof. Keith in his work on the 'Religion and philosophy of the Veda' refers *ad nauseam* to all sorts of lucubrations by European scholars on the origins of the Vedic sacrifices, about rain spells and fertility rites and similar lore he does not condescend to notice the views of Dr. Sham Sastry or Mr. Tilak, which have far more probability than many of the learned hypotheses advanced by European scholars who appear to be obsessed by the notion that Vedic usages must be similar to practices found in the 19th century among the backward races of Africa, America and Oceania.

Though the sūtras speak of sattras for a hundred or a thousand years, there were writers even in ancient India who thought that such sattras did not exist in fact, at least in historical times. Patañjali states in his Mahābhāṣya that the sattras of a hundred or a thousand years were never attempted in times near to his day and that Yājñikas prescribe

2682. शब्दानशर्यवः कारयन्ति । एतस्मिन्नहनि प्रभूतमन्नं दद्यात् । राजपुत्रेण चर्म व्याधपत्न्याग्नन्ति भूमिदुन्दुभिं पत्न्यश्च काण्डवीणा भूतानां च मैथुनं ब्रह्मचारिपुंश्चल्योः संप्रवादोनेकेन सान्त्वा निष्केवल्याय स्तुवते राजनस्तोत्रियेण प्रतिपद्यते । ऐ. आ. V. 1. 5

rules for them following the tradition of sages.[2683] Jaimini also boldly asserts that when the texts[2684] speak of Viśvasṛjāmayana for a thousand saṁvatsaras the word saṁvatsara means only a day (Jai. VI. 7. 31–40).

Among the other sattras the Sārasvata sattras are most instructive, since in them many places on the most sacred Sarasvatī and other rivers were approached by the sacrificers during the course of the sacrifice.[2685] Vide Āśv. XII. 6., Lāṭ. X. 15 ff, Kāt. XXIV. 6. 14 ff.

Agnicayana (piling of the fire-altar)

The construction of the fire-altar is a special rite and is the most complicated and most recondite of all Śrauta sacrifices. The Śatapatha Brāhmaṇa devotes five out of its fourteen sections (about one-third of the whole work) to *cayana* and is the leading work on that subject. Prof. Eggeling in his very learned Introduction (pp. XIV ff) to vol. 43 of the S. B. E. deals with the fundamental conceptions underlying this śrauta ritual. According to him *cayana* was originally an independent rite and was later on incorporated in the system of Soma sacrifices. At the bottom of this rite are certain cosmogonic theories. Even in the Ṛgveda we meet with the conceptions that Hiraṇyagarbha or Prajāpati (Ṛg. X. 121) is the creator of the universe, that creation, destruction and re-construction of the universe are eternal, ever-recurring processes going on from all time and will go on for all time (Ṛg. X. 190. 3, ' dhātā yathāpūrvam-akalpayat '), that Puruṣa himself became the sacrificial material (*havis*) and the year and seasons aided in the process of the reconstruction of the sacrificed and dismembered Puruṣa. Man himself who is a child of this process must also do his part in the reconstruction of the world. This he can do best by identifying Fire with Prajāpati (as in Śat. Br. X. 4. 1. 12) and regarding Fire as the Highest Divinity and

2685. For details about sattras, vide Tai. S. III. 3. 6, III. 5. 10, VII. 5. 5–7, Tai. Br. I. 2. 2–5, Sat. Br. IV. 6. 2, Tāṇḍya IV–V, Āit. Br. 17–18, Āp. XXI, Kāt. XIII, Āśv. XI. 7, Sat. XVI, Baud. XVI. 13-23, Śāṇ. XIII. 19 ; and S. B. E. vol. 41 pp. XXI. ff, Haug's tr. of Āit. Br. pp. 279 ff, Prof. Keith's 'Rel. and Phil.' part 2, pp. 350–352.

the source of all life and activity and the periodic performance of sacrifice in fire as his contribution, however small it may be, to the process of re-creation and re-construction. The re-constuction of the world by Prajāpati a man can imitate by himself constructing an elaborate structure with bricks. The Śat. Br. in several places brings out these ideas, though in a somewhat esoteric way[2686] (e. g. VI. 2. 2. 21). The tenth kāṇḍa (section) of the Śat. Br. is the *rahasya* (the esoteric doctrine) of cayana. Most of the acts done in the piling up of the altar are a symbolic representation of the process of re-creation and re-construction as will be seen later on. In the Śat Br. the principal authority on this doctrine of cayana is not Yājñavalkya (who is the dominating figure in the first five sections of that Brāhmaṇa) but Śāṇḍilya who traces that doctrine through a succession of teachers to Tura Kāvaṣeya who received it from Prajāpati himself (Śat. Br. IX. 5. 2. 15-16, X. 4. 1. 11, X. 6. 5. 9 &c.).

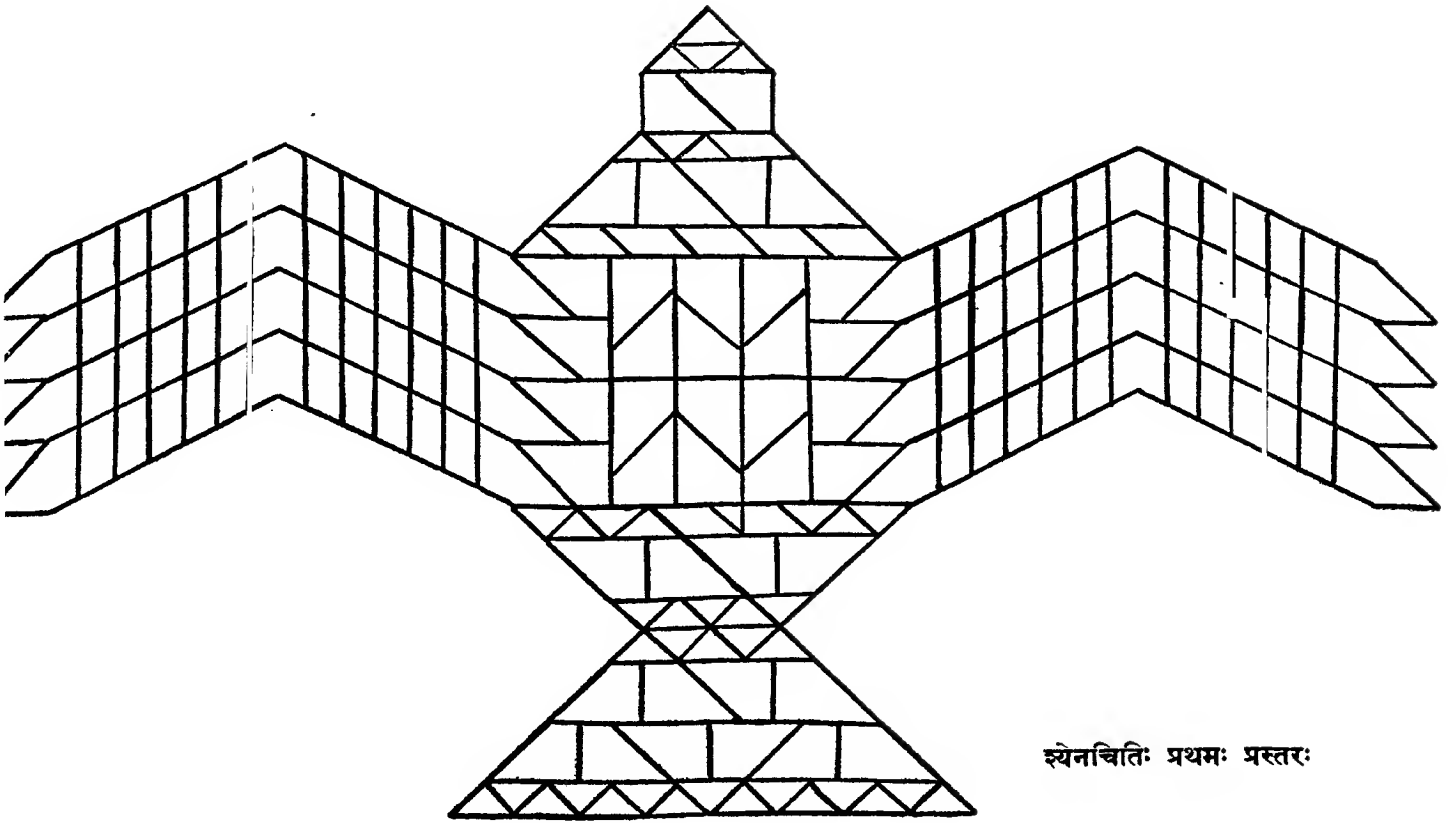
A very brief description of the *cayana* based principally on Kāt., Sat., and Āp. is given below.

The construction of the fire-altar in five layers is an aṅga of Somayāga. But *cayana* is not obligatory in every soma sacrifice. It must however be performed in the Somayāga called Mahāvrata (which as stated above is the last but one day in Gavām-ayana). When a man desires to pile the fire altar, he first offers after the Full Moon iṣṭi of Phālguna (i. e. on the first of the dark half) or on Māgha new moon five animals (viz. a man, a horse, a bull, a ram and a he-goat were offered, the man in a screened place).[2687] The heads of the beasts were built up into the altar and their trunks were thrown in water, which was then used for making bricks from clay. Kāt. (XVI. 1. 32) allows an option that instead of killing animals golden or clay heads of these may be used. In modern times when rarely cayana is performed only golden images of the above five are taken. Then on the 8th of the dark half of Phālguna a horse, an ass and a he-goat are taken in procession

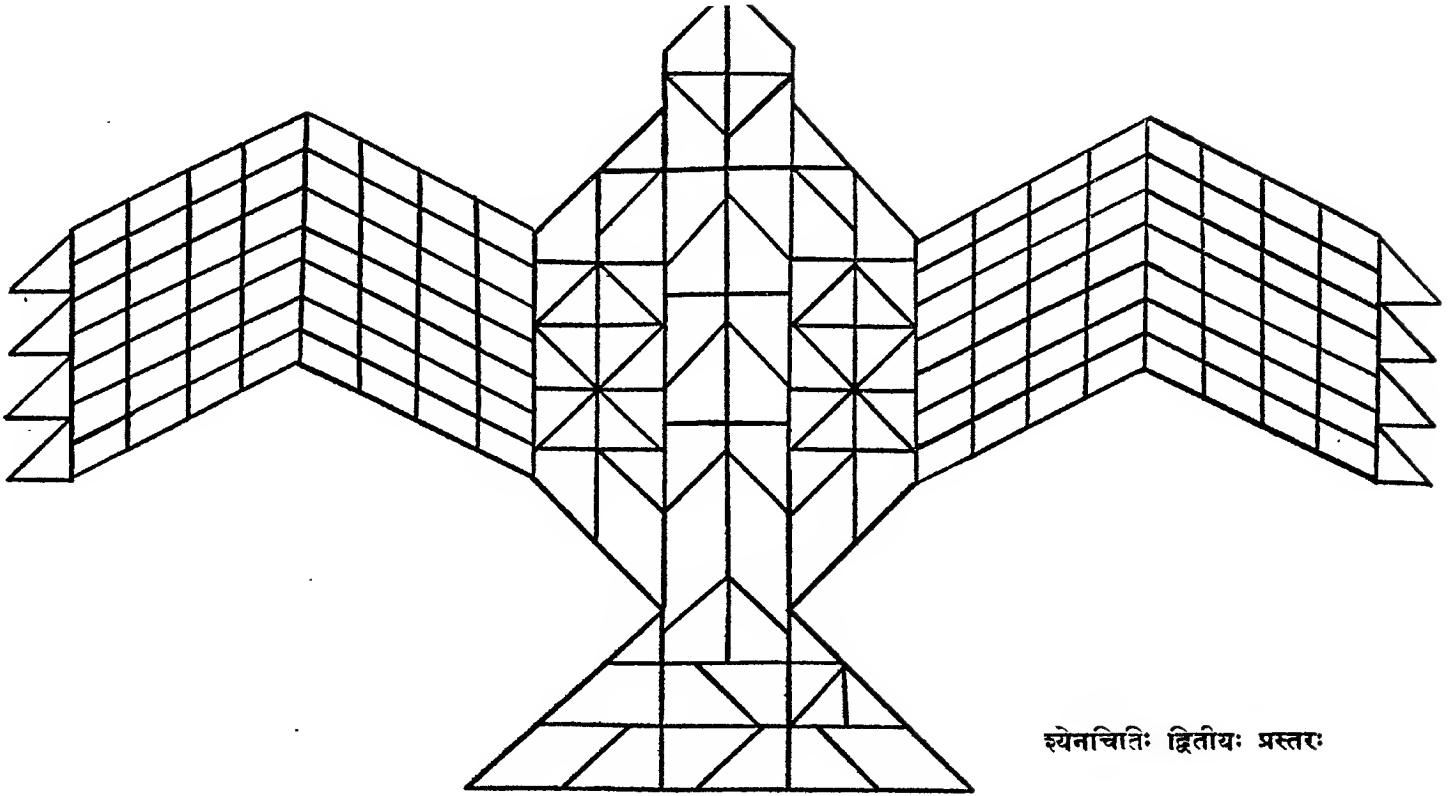
2686. प्राजापत्यं वा एतत्कर्म प्रजापतिं ह्येतेन कर्मणारभतेऽनिरुक्तो वै प्रजापतिः। शतपथ VI. 2. 2. 21.

2687. It appears that the man was not actually killed, but was let off. He was to be a vaiśya or kṣatriya (Kāt. XVI. 1. 17). According to Baud. X. 9 the heads of a vaiśya and of a horse killed in battle are taken 'संग्रामे हतयोरश्वस्य च वैश्यस्य च शिरसी। दीप्यन्त ऋषभं पचन्ते। वृद्धिं च वस्तं चाहरन्ति। एतत्सर्वशिरः।'. Vide Kāt. XVI. 1.32 also.

to the south of the āhavanīya fire (the horse leading) with their mouths to the east and the place from where clay is to be taken is reached by the horse. To the east of the āhavanīya a square pit is dug and a ball of clay is put therein which brings the pit on a level with the surrounding ground. At the middle of the distance between the clay lump and the āhavanīya clay taken from an ant-hill is heaped. A spade one cubit long made of some sacrificial tree is kept to the north of the āhavanīya. The ant-hill clay is placed on the lump of earth in the pit with that spade. The horse is made to plant its foot on the clay in the pit. He (the priest) draws three lines with the spade on that lump of clay, spreads black antelope skin to the north of the lump and thereon keeps a lotus leaf on which the lump of clay from the pit is placed and the corners of the skin are tied with a girdle of muñja. He takes up the hide with the clay therein, raises his arms towards the east, holds the bundle over the animals that come back in the reverse order (the goat leading). According to Āp. XVI. 3. 10 the bundle is placed on the back of the ass and brought near a tent. The lump is placed to the north of the āhavanīya in a tent screened on all sides; then he takes the hair of the he-goat and mixes the hair in that lump of clay with water in which palāśa bark is boiled and mixes therewith gravel, iron rust and small stones. From the clay thus mixed the wife of the sacrificer (or the first wife if there are several) prepares the first brick called Aṣāḍhā, which is in measure as much as the foot of the sacrificer, is rectangular and has three lines scratched on it. The sacrificer prepares an *ukhā* (fire-pan) from the mixture of clay, which is one span in diameter. According to some three pans are made. He also makes three bricks called Viśvajyotis, each having three lines and so marked as to show which is first, second and third. The remaining clay is called upaśaya and is kept aside (as it will be required later). The ukhā is fumigated with the smoke from seven horse-dung cakes kindled on the dakṣiṇa fire. A square hole is dug with the spade referred to above, therein fuel is put and the bricks and the ukhā (with the mouth downwards) are put for being baked and more fuel is added. He removes the coals and ashes and takes out during the day the bricks (four) and the ukhā, on which the milk of a she-goat is sprinkled. Thereafter other bricks are made which have three lines on each, which are generally as long as the sacrificer's foot and are baked till they are red.



श्येनचितिः प्रथमः प्रस्तरः



श्येनचितिः द्वितीयः प्रस्तरः

The dīkṣā (initiation) for the rite takes place on the amāvāsyā of Phālguna. The dīkṣaṇīyā iṣṭi and other usual rites are performed. Either the yajamāna or the adhvaryu places the ukhā on the āhavanīya and puts thereon 13 samidhs one span in length. The sacrificer wears a golden ornament with 21 pendants reaching up to his navel. The ukhā is taken from the āhavanīya to the east of the āhavanīya and is placed in a śikya and fire is put into it. He carries for a year or a shorter period (12, 6 or 3 days according to Āp. XVI. 9. 1) this fire placed in the ukhā. On alternate days in the year he adores the fire with the Vātsapra mantras (Vāj. S. XII. 18-28 = Ṛg. X. 45. 1-11), takes the Viṣṇu strides (Viṣṇukramas); he also removes the ashes, puts fuel-sticks on the fire in the ukhā.

Then follows the building of the altar. The altar has five layers, the first, third and fifth being arranged in the same pattern and the 2nd and 4th being of a different pattern from the 1st, 3rd and 5th. The altar may have several forms such as that of a droṇa (trough), a chariot-wheel, a śyena (hawk), kaṅka (heron), suparṇa (eagle)[2688] &c. Vide Tai. S. V. 4. 11, Kāt. XVI. 5. 9. The altar requires bricks of several shapes; some are triangular, some are oblong, some are perfectly square, some are oblong plus a triangle (in one). They are not to be placed one over the other as one chooses but are arranged in peculiar ways, some in front, some on the sides and so on. A sound knowledge of geometry and mason craft is required in constructing the altar. Every brick is to be placed after repeating a mantra. The bricks have various names to distinguish them. For example, the bricks called Yajuṣmatī are to be used in building the body (of the birdlike pattern, which is the most usual one), but not in building the sides or tail of the layer. The usual mantras in laying down and invoking a brick are two viz., 'tayā devatayā-... sīda (Vāj. S. XII. 53, Tai. S. IV. 2. 4. 4) and 'tā asya sūda-dohasaḥ' (Vāj. S. XII. 55, Tai. S. IV. 2. 4. 4). Sat. XI. 8. 18 says that 'tayā devatayā... ...dhruvā sīda' is repeated after each brick is deposited. But special mantras are prescribed in several cases e. g. as to the ten *lokampṛṇā* bricks the mantra is 'lokam pṛṇa' (Vāj. XII. 54, Tai. S. IV. 2. 4. 4). Some kinds of bricks bear

2688. श्येनचितं चिन्वीत सुवर्गकामः। ..... कङ्कचितं चिन्वीत यः कामयेत श्रीर्-ग्यात्सर्विमिहेयेयमिति। ... ... अलजचितं चिन्वीत चतुःसीतं प्रतिष्ठाकामः। तै. सं. V. 4. 11 where several other patterns such as प्रउगचित, उभयतःप्रउग, रथ-चक्र, द्रोण, समूह, श्मशानचित are mentioned.

the names of sages (e. g. Vālakhilya bricks). Probably they were first used by those sages. There are three bricks which are called svayam-ātṛṇṇāḥ (i. e. they are long and thin stones and have natural holes) and which are placed in the centre of the 1st, 3rd and 5th layers and are deemed to represent earth, air and heaven.[2689] Jai. (V. 3. 17-20) deals with the respective positions of certain bricks called citriṇī and lokampṛṇā.

On the day of the last dīkṣā the measuring of the plot to be used as vedi takes place. Measurements are made with a rope which is in length twice the height of the sacrificer. A fifth part of the sacrificer's height is called aratni, tenth part is called pada, each pada is divided into twelve aṅgulas and three padas make a prakrama (Kāt. XVI. 8. 21). The ground for the uttaravedi on which the altar is to be constructed is ploughed with an udumbara plough and the ropes are made of muñja. Six, twelve or twenty-four oxen are yoked to the plough. He sows on the furrows made by the plough various kinds[2690] of corns (Āp. XVI. 19. 11-13 says fourteen kinds, seven being *grāmya* and seven wild). He omits one kind of corn which he has to abstain from partaking throughout life thereafter (Kāt. XVII. 3. 6-7). If so many kinds of corn cannot be had then in those furrows barley corn mixed with honey is sown. Then clods of earth are put thereon and the ground is made level. Several things are got ready and placed one after another on this ground (Āp. XVI. 13. 10 where they are said to be bricks but not of clay). Vide Sat. XI. 5. 21 also. The placing of bricks is begun after the first upasad (Sat. XI. 7. 2). A lotus leaf is first laid down on the spot where the horse planted its hoof (Āp. XVI. 22. 3) and on that leaf the golden ornament worn by the yajamāna at the time of the Viṣṇu strides is placed with the mantra 'brahma jajñānam' (Vāj. S. XIII. 3, Tai. S. IV. 2. 8. 2). To the south of that ornament is laid down the golden image of a man with head to the east and face turned to the sky in such a way that the image does not cover the hole pierced in the golden ornament (disc) by passing a string with which it was tied round

---

2689. 'स्वयमातृण्णा भवति प्राणानामुत्सृष्ट्या अधो सुवर्णस्य लोकस्याभृत्या' । तै. सं. V. 2. 8. 1. सायण on तै. सं. IV. 2. 9. 1 explains शर्कराक्यानां शुभ्रपाषाणानां मध्ये पुरुषप्रयत्नमन्तरेण या स्वत एव छिद्रयुक्ता सेयं शर्करा स्वयमातृण्णा ।

2690. या जाता ओषधय इति चतुर्दशभिरोषधीर्वपति । ..... तिलमाषा व्रीहियवाः मिश्रकरणको गोधूमा वेणुयवाश्यामाकनीवारा जतिलाश्च मर्कटिका आरण्यजा मर्कटका चिह्नोपाः । आप. XVI. 19. 11-13.

the neck (the mantra repeated being very significant 'in the beginning Hiraṇyagarbha arose' Ṛg. X. 121. 1 = Vāj. S. XIII. 4). The sacrificer performs the adoration (upasthāna) to the golden man with the three verses 'bow to the serpents' (Vāj. S. XIII. 6-8, Tai. S. IV. 2. 8. 3). One should thereafter never go to the north of the image from the south by passing in front of it (i. e. to the east of it). By the side of the two arms of the golden man he places two srucs (one of kārśmarya wood filled with ghee near the right hand and the other of udumbara filled with curds near the left) with their tops to the east. A brick called svayamātṛṇṇā on which *ājya* is offered and over which the yajamāna breaths is handed over to a brāhmaṇa who places it in the centre with the help of the adhvaryu, the brāhmaṇa being looked upon as fire (Tai. S. V. 2. 8. 2). On that brick a dūrvā creeper is placed in such a way that its roots are on the brick and its tops hang on to the ground towards the east. Then the brick called *dviyajus* is laid to the east of the dūrvā, two retaḥsic bricks to the east of the preceding, then two ṛtavya bricks and then the Aṣāḍhā brick is placed to the east of the preceding. On all ṛtavya bricks *avakās* (mosslike plants) are deposited. About one aratni to the south of the Aṣāḍhā brick and to the east of the Svayamātṛṇṇā brick he places a living tortoise with its face to the east on the avakā plants (Āp. XVI. 25. 1, Kāt. XVII. 4. 27-28). The tortoise is anointed with a mixture of ghee, honey and curds, is enveloped in moss covered with a net and made motionless by means[2691] of pegs (Āp. XVII. 25. 2, Sat. XI. 7. 42). When depositing the tortoise it is invoked with three verses (Vāj. S. XIII. 30-32) which express the wish that the tortoise may go to the deep waters, that the sun and fire may not torment it by heat, that it may reach heavenly worlds and that divine rain may follow. Even in modern times a tortoise is so built up into the altar. A mortar[2692] and pestle of udumbara wood, each one span in length (the mortar being contracted in the middle and the pestle being rounded) are placed about one aratni to the north

---

2691. The tortoise was probably built up into the altar to imitate the action of Prajāpati. Prajāpati is said to have created the world after assuming the form of a tortoise. Vide note 1716 and p. 718 above. Or this may be a relic of the widespread usage of slaying an animal and burying its body under the foundation of a building, a bridge &c.

2692. The mortar represents the *yoni* or womb, the ukhā represents the belly, and the pestle represents '*śiśna*' (vide Śat. Br. VII. 5. 1. 38).

of the svayamātṛṇṇā brick. A śūrpa also is placed near the above two (Āp. XVI. 26. 5). The ukhā filled with sand, ghee and honey is placed on the mortar and offerings of ājya are made on it with the sruva ladle. The fire in the ukhā is transferred to a hearth with eight bricks in the centre of the fifth layer, on which a second layer of eight bricks (called punaściti) is laid. This fire becomes the gārhapatya for the Fire-altar (Śat. Br. VIII. 6. 3. 7-11, Kāt. XVII. 12. 18-21). Seven pieces of gold are placed on the golden image, the first on the mouth, then two each on the two nostrils, the two eyes and two ears. In the forepart of the ukhā, the heads of the five animals (on which curds and honey are poured and on which 7 gold pieces are thrust) are placed in a certain order. The human head is in the middle, to the north the heads of the horse and ram and to the south the heads of the bull and goat (Kāt. XVII. 5. 13-18, Āp. XVI. 27. 5-19). According to Āp. and Sat. the head of a serpent also may be placed (Āp. XVI. 27. 22, Sat. XI. 7. 63) or only the mantras 'namo astu sarpebhyaḥ' (Vāj. S. XIII. 6-8, Tai. S. IV. 2. 8. 3) may be recited. The various kinds of bricks are heaped in various directions on thick mud spread on the above stated things so as to form the first layer. According to Sat. (XI. 5. 22) each layer consists of only 200 bricks (1000 for all five), when the sacrificer performs the cayana for the first time; he employs 2000 for all layers when he performs it a second time and this number goes on increasing each time he repeats agnicayana.[2693] According to the Śat. Br. (S.B.E. vol. 43 p. 22 n. 1), Kāt. XVII. 7. 21-23 the bricks required for all the five layers are 10800. The time required for piling also varies. Some held that the piling took one year (8 months for the first four layers and 4 months for the last) or all the layers may be laid in a few days. Sat (XII. 1. 1 ff) and Āp. (XVII. 1. 1-11, XVII. 2. 8, XVII. 3. 1) state that the five layers are laid on five successive days. On each layer thick mud (*purīṣa*) prepared from the earth (mixed with water) dug out of the cātvāla pit after touching a dark or bay horse that stands to the north is spread with 'pṛṣṭo divi' (Vāj. S. XVIII. 73, Tai. S. I. 5. 11. 1 quoted by Āp. XVI. 34. 6-7, Sat. XI. 5.). Each layer and the spreading of mud are carried out each day between the two upasads (morning one and afternoon one). When all the layers are

2693. यावद्भूमिमानमालभ्य यथार्थं लोकंपृणा आदृढ्नं साहस्रं चिन्वीत। नाभिदघ्नं द्विपाहस्रं द्वितीयम्। ..... उत्तरमुत्तरं न्यायांसम्। सत्या. XI. 5. 22.

completed the āhavanīya fire is established on the altar so built. Eight dhiṣṇyas, square or round, have to be constructed with bricks, viz. the āgnīdhrīya and 7 others as in somayāga (but the number of bricks for each differs). A small round and variegated stone (aśman) is placed to the south of the āgnīdhra's place on the northern part of the fire-altar. A fuel-stick is kindled on the new gārhapatya hearth, taken over the svayamātṛṇṇā brick of the 5th layer and an offering of the milk of a dark cow whose calf is white is made on that fire. Śatarudrīya homa is offered to Rudra. On the western corner of the northern side of the Fire-altar which is enclosed by a line of stones on all sides there are three stones, as high as the knee, naval and mouth on which (serving as āhavanīya) 425 oblations are offered to Rudra and his fearful aspects by means of the leaf of the Arka plant (serving as juhū) of wild sesame mixed with gavedhukā. A twig of *arka* plant is used to clear the leaf of the offerings. The priest faces the north and makes the oblations standing, the mantras being taken from the Śatarudrīya section (bginning with 'namaste rudra manyave,' Vāj. S. XVI. 1-66, Tai. S. IV. 5. 1-10). The arka leaf and twig are thrown into fire. The altar is cooled by the āgnīdhra with the water from a jar which is held over the stone referred to above. The stone is thrown to the south of the altar with 'May sorrow go to him whom we hate' (Vāj. S. XVII. 1) and if it is not broken the adhvaryu breaks it into pieces. On a long bamboo, a frog, avakā plants and reed (vetasa) twigs are tied and drawn over the altar from the south hip to the south shoulder[2694] and then they are thrown on the utkara. The Gāyatra, Rathantara and other sāmans are sung (Śat. Br. IX. I. 2. 35 ff, Kāt. XVIII. 3. 1 ff). Then follow numerous offerings, viz. one puroḍāśa to Vaiśvānara and 7 puroḍāśas to the Maruts,[2695] Vasordhārā[2696] (stream of wealth) offerings of ājya from an udumbara sruc, which is finally thrown into the fire, 6 Pārtha oblations as in Rājasūya followed later by six

2694. This is symbolical cooling. All three are suggestive of water.

2695. The 7th puroḍāśa to the Maruts is called 'araṇye anūoya' because the mantra for it 'ugraśca bhīmaśca' (Vāj. S. XXXIX. 7) is to be repeated in a forest.

2696. Vasordhārā is the name of the whole rite in which several hundred offerings are made to Agni with mantras (Vāj. S. XVIII. 1-29, Tai. S. IV. 7. 1-11, Kāt. XVIII. 5. 1, Āp. XVII. 17. 8) to secure all powers of the Firegod to the sacrificer.

more after the abhiṣeka of the sacrificer, the Vājaprasavīya[2697] offerings of the mixture of milk and water with the gruel of 14 *grāmya* and wild corns with an udumbara sruva that is four-cornered like a camasa (the sruva being thrown into the fire at the end). With the remnants of Vājaprasavīya offerings collected in a pot he sprinkles the sacrificer who sits on a dark antelope skin spread on an udumbara couch to the north of the tail of the fire altar. A royal sacrificer sits on a tiger skin and a vaiśya on a goat-skin. After this six Pārtha offerings are made followed by twelve Rāṣṭrabhṛt (supporting the kingdom) homas of ājya with mantras, that contain the words 'vāṭ' and 'svāhā' (Vāj. S. XVIII. 38-43, Tai. S. III. 4. 7).[2698] Then three Vāta (wind) homas are offered catching with his joined hands wind outside the vedi to the east and the three winds thus caught are represented as yoked to the chariot like horses, the mantra being Vāj. S. XVIII. 45, Tai. S. IV. 7. 12. 3 (Kāt. XVIII. 6. 1-3, Āp. XVII. 20. 11).

Then the procedure of Somayāga is followed. One or two special characteristics may be noted. Before the Prātaranuvāka the Fire is represented as yoked after touching the paridhis and repeating three mantras 'I yoke the fire &c.' (Vāj. S. XVIII. 51-53, Tai. S. IV. 7. 13. 1) and then Agni is released from the yoke before the Āgnimāruta stotra (i. e. Yajñāyajñīya) in the evening with a mantra (Vāj. S. XVIII. 54, Tai. S. IV. 3. 4. 2). After the anubandhyā paśu-puroḍāśa, messes of boiled rice are offered to Anumati, Rākā, Sinīvālī and Kuhū and a cake on twelve potsherds to Dhātṛ. At the end of the Udavasānīyā payasyā is offered to Mitra and Varuṇa or he may perform sautrāmaṇī (Āp. XVII. 24. 1, Sat. XII. 7. 14).

2697. The वाजप्रसवीय is one rite in which there are two groups of seven offerings, the first seven with the mantras beginning 'vājasyemam prasavaḥ' (Vāj. S. IX. 23-29, Tai. S. I. 7. 10) and seven others with the mantras 'vājasya nu prasave' (Vāj. S. XVIII. 30-36 and Tai. S. I. 7. 7). Vide Śat. Br. IX. 3. 4, Sat. XII. 6. 5, Kāt. XVIII. 5. 4-5, Āp. XVII. 19. 1-3. The mantra means 'for the promotion of vigour' (or food) &c.

2698. The first mantra is ऋताषाडृतधामाग्निर्गन्धर्वस्तस्यौषधयोऽप्सरसो हेडो नाम। स न इदं ब्रह्म क्षत्रं पातु तस्मै स्वाहा वाट् ताभ्यः स्वाहा. The latter half is repeated in all six verses. One āhuti is made after वाट् and another after स्वाहा. Vide Kāt. XVIII. 5. 16, Sat. XII. 6. 15 ff. The first is made to a male deity, and the 2nd to Apsarases variously named.

One who has performed the piling of the fire-altar has to observe certain vratas for a year viz. he should not bow to any one, he should not run in the rains, he should not partake of the flesh of any bird, he should not approach a śūdra woman. After he performs agnicayana a second time, he should approach no woman except his own wife of the same caste, when he has performed cayana thrice he should not approach[2699] even his own wife (vide Āp. XVII. 24. 1-5, Kāt. XVIII. 6. 25-31, Sat. XII. 7. 15-17). Jai. (II. 3. 21-23) declares that the piling of the fire-altar is a saṁskāra of fire and not an independent yāga by itself.

If a man does not prosper in the year after he performs agnicayana he may perform punaściti (just as punarādheya is performed). According to Āp. XVII. 24. 11 a punaściti can be performed for three objects, viz. for prosperity, for Vedic lore or for progeny.[2700]

In performing the innumerable and wearisome details of sacrifices many mistakes must have been committed and therefore the Brāhmaṇas and Sūtras prescribe numberless expiations, some simple and others complicated. But this subject will be dealt with in the next volume under *prāyaścittas*.

In the next volume a few remarks will be offered on the philosophical side of sacrifices and on the causes whereby they gradually faded into the background and gave place to other religious observances.

2699. The idea appears to have been that the sacrificer was not to disperse the spiritual power acquired by fire-worship, but to conserve it in himself.

PAGE 490 NOTE 1144—The 49 pravara groups among which the hundreds of gotras enumerated in the Baud. Śr. (pravaraprasna 1–54) are assigned are given below, being arranged alphabetically from the first name in the group. The sections of the pravaraprasna (in Dr. Caland's edition) have been indicated in each case. Brief foot-notes are added showing only the important divergences in the texts of Āśv. Śr. (XII. 6. 10-15), Āp. Śr. (24. 5–10) and Satyāṣāḍha-śrauta (21. 3). It should not be forgotten that the Mss and printed editions present various forms of the same name.

	प्रवर	गोत्र
1	आगस्त्य–दार्ढच्युत–याज्ञवाहेति	यज्ञवाह (अगस्ति)–बौ. 51.
2	आगस्त्य–दार्ढच्युत–सौमवाहेति	सोमवाह (अगस्ति)–बौ. 50.
3	आगस्त्य–दार्ढच्युतैध्मवाहेति	अगस्ति–बौ. 49.
4	आङ्गिरस–गौतम–कारेणुपालेति	कारेणुपालि गौतम (आङ्गिरस)–बौ. 15.
5	आङ्गिरस–गौतम–वामदेवेति	वामदेव (आङ्गिरस) बौ. 16.
6	आङ्गिरस–गौतम–शारद्वतेति	शारद्वत गौतम (आङ्गिरस)–बौ. 11.
7	आङ्गिरस–गौतमौशनसेति	औशनस गौतम (आङ्गिरस)–बौ. 14.
8	आङ्गिरस–पौरुकुत्स–त्रासदस्यवेति	विष्णुवृद्ध–बौ. 20.
9	आङ्गिरस–बार्हस्पत्य–भारद्वाजेति	भरद्वाज (आङ्गिरस)–बौ. 17.
10	आङ्गिरस–बार्हस्पत्य–भारद्वाज–वान्दन–मातवचसेति	रौक्षायण (भरद्वाज)–बौ. 18.

– 2 and 3. Āśv. says that Agastis have optionally these two प्रवरs, while Āp. and Sat. state that they have only one प्रवर viz. Āgastya or three, viz. No. 3.

8. Āśv. and Āp. agree but Āśv. reads पौष्कुत्स्य.

9. Āp. (24. 6) and Sat. agree. According to Āśv. this is the प्रवर of भरद्वाजs and अग्निवेश्यs.

10. Āśv., Āp. and Sat. say that this is the प्रवर of ऋक्षs, but Āp. and Sat. add that optionally they are त्रिप्रवर viz आङ्गिरसवान्दनमातवचसेति.

	प्रवर	गोत्र
11	आङ्गिरस–बार्हस्पत्य–भारद्वाज–शैन्य–गार्ग्येति / आङ्गिरस–शैन्य–गार्ग्येति	गर्ग (भरद्वाज)–बौ. 19.
12	आङ्गिरस–भार्म्यश्व–मौद्गल्येति	मुद्गल–बौ. 25.
13	आङ्गिरस–वैरूप–राथीतरेति	रथीतर–बौ. 24.
14	आङ्गिरस–साङ्कृत्य–गौरिवीतेति	संकृति–बौ. 23.
15	आङ्गिरसाजमीढ–काण्वेति	कण्व–बौ. 21.
16	आङ्गिरसामहीय्यवौरुक्षयेति	कपि–बौ. 26.
17	आङ्गिरसाम्बरीष–यौवनाश्वेति	हरित–बौ. 22.
18	आङ्गिरसायास्य–गौतमेति	आयास्य गौतम (आङ्गिरस)–बौ. 10.
19	आङ्गिरसौचथ्य–काक्षीवत–गौतम–कौमण्डेति	कौमण्ड गौतम (आङ्गिरस)–बौ. 12.
20	आङ्गिरसौचथ्य–काक्षीवत–गौतम–दीर्घतमसेति	दीर्घतमस् गौतम (आङ्गिरस)–बौ. 13.
21	आत्रेयार्चनानस–गाविष्ठिरेति	गविष्ठिर (अत्रि)–बौ. 29.
22	आत्रेयार्चनानस–पौर्वातिथेति	मुद्गल (अत्रि)–बौ. 30.

---

11. Āśv. agrees but has the order भारद्वाजगार्ग्यशैन्येति and allows optionally three pravaras viz. आङ्गिरसशैन्यगार्ग्येति, while Āp. gives the प्रवर as आङ्गिरसगार्ग्यशैन्येति and also, according to some, भरद्वाजगार्ग्यशैन्येति.

12. Āśv. and Āp. agree, but give another optional प्रवर according to some, viz तार्क्ष्यभार्म्याश्वमौद्गल्येति.

14. According to बौ. this is the प्रवर of संकृति and 16 others, while Āśv. reads it as आङ्गिरसगौरिवीतसाङ्कृत्येति, states that optionally the प्रवर is शाक्त्यगौरिवीतसाङ्कृत्येति and mentions only सङ्कृति and four others as having this प्रवर.

15. Āśv. agrees, but states that according to some the प्रवर is 'आङ्गिरसबौरकाण्वेति'; Āp. states this as the प्रवर of अजमीढाः कण्वाः.

16. Āp. reads 'आङ्गिरसामहीयौरुक्षयेति,' आश्व० 'आङ्गिरसामहीयवौरुक्षयसेति,' सत्याषाढ 'आङ्गिरसमाहय्यवौरुक्षय्येति'

17. Āśv. agrees, but according to बौ. the Haritas have 19 subdivisions, while आश्व. mentions only हरित, कुत्स, पिङ्ग, शङ्ख, वर्भ, भौमगव as having this प्रवर group and adds that according to some the प्रवर is मान्धात्राम्बरीषयौवनाश्वेति. Āp. accepts this option of प्रवर.

18. This is the प्रवर of गौतमस according to Āśv. and of आयास्य गौतमस (a subdivision of आङ्गिरसगण) according to Āp. and Sat.

20. According to Āśv. the प्रवर of दीर्घतमस् is आङ्गिरसौचथ्यदैर्घतमसेति.

21. Āp. and Sat. agree, but Āśv. reads 'आत्रेय-गाविष्ठिरपौर्वातिथेति.'

34	भार्गव–वैतहव्य–सावेतसेति	यस्क (भृगु)–बौ. 6.

---

24. Āśv., Āp., Sat. agree.

25. Āśv. agrees, but आप. and Sat. give this as the प्रवर of काश्यप (without qualification).

26. Sat., Āp. and Āśv. agree, but Sat. reads ०रैभ्येति.

27. According to Āśv. काश्यपावत्सारासितेति is the प्रवर of काश्यप in general and the प्रवर of शाण्डिल is either शाण्डिलासितदैवलेति or काश्यपासित-दैवलेति. Āp. and Sat. state that Śaṇḍilas have either two pravara sages viz. दैवलासितेति or three viz. काश्यपदैवलासितेति.

29. According to Āśv. the Śunakas have either one pravara viz. Gṛtsamada or three pravaras भार्गव-शौनहोत्रगार्त्समदेति. Āp. and Sat. state that the Gārtsamada Śunakas have only one pravara 'Gārtsamada' (and there is no option).

30. Āśv., Āp. and Sat. say that this is the प्रवर of जामदग्न्यवत्स (under भृगुगण); Āśv. states that अजामदग्न्यवत्सs are त्रिप्रवर viz. भार्गवच्यावनाप्रवानेति and Āp. Sat. also give an optional प्रवर of three sages according to some, viz. भार्गवौर्वजामदग्न्येति.

31. Āśv. reads वैद् and विद्.

32. Āśv., Āp., Sat. agree, but Āp. and Sat. state that according to some आर्ष्टिषेणs are त्रिप्रवर, viz. भार्गवार्ष्टिषेणानूपेति.

34. Āp., Sat. say this is the प्रवर of वैतहव्यs that have यास्क, वाधूल, मौन, मौक as subdivisions according to Āp. and read सावेतस. Āśv. states this is the प्रवर of यस्क-वाधूल-मौन-मौक-शार्कराक्षि-सार्ङ्गि-सावर्णि-शालङ्कायन-जैमिनि-दैवन्ययानां &c.

---

35. According to Āśv. this is the प्रवर of Śaitas (शैतानां) and of वैन्य पार्थस (no subdivisions named) according to Āp. and Sat.

36-38. Āśv., Āp. and Sat. agree, but they say that the Parāśaras (among Vasiṣṭhas) have the प्रवर stated in 38, while Āp. and Sat. further state that according to some Vāsiṣṭhas have three प्रवरs viz. वासिष्ठैन्द्र-प्रमदाभरद्वसु (No. 39). Āśv. and Āp. state that Kuṇḍinas have the same प्रवर as No. 37. Āśv. says that the प्रवर of उपमन्यु is वासिष्ठभरद्वरिक्षेन्द्रप्रमद्.

39. Sat. agrees but reads प्रमदाभरद्वसो इति

40. Āśv., Āp., Sat. agree, but Sat. reads •कात्याक्षिलेति.

41. Āśv., Āp., Sat. agree.

42. Āś.v, Āp. agree.

43. Āp. and Sat. agree, but Āśv. states that their प्रवर is वैश्वामित्रदेवरात-पौरणेति.

44. Āśv., Āp., Sat. agree, but Āp. remarks that the Mādhuchchhandasas are Dhānañjayas.

45. Āśv., Āp. agree,, but both read • माधुच्छन्दसाज्येति.

47. Āśv., Āp., Sat. agree.

PAGE 862 NOTE 2025—

1. बहुभिर्वसुधा दत्ता राजभिः सगरादिभिः।
यस्य यस्य यदा भूमिस्तस्य तस्य तदा फलम्॥

---

1. This occurs in भविष्यपुराण IV. 164. 22 (भुक्ता for दत्ता), in पद्मपुराण VI. 33. 26–27. This is read as राजभिर्बहुभिर्दत्ता दीयते च पुनः पुनः। यस्य etc. in E. I. vol. 20 p. 159 (in G. S. 159 i. e. 478–9 A. D.). In E. I. vol.15. p. 133 (G. S. 129) 2nd pāda is बहुभिश्चानुपालिता. This verse is बृहस्पति 26 and बृद्धगौतम p. 541; it is ascribed to Vyāsa in I. A. VI. p. 363 (śake 500) and p. 9 Gupta Inscriptions (G. S. 199), to Manu in E. I. vol. VI. p. 18; vide for other early citations E. I. vol.I. p. 88, vol. II. p. 20, VIII. p. 162, I. A. vol. 19 pp. 16–18, Gupta Inscriptions No. 21 p. 93 (156 G. S.), No. 23 p. 108 (G. S. 191).

2. षष्टिं वर्षसहस्राणि स्वर्गे मोदति भूमिदः ।
आच्छेत्ता चानुमन्ता च तान्येव नरके वसेत् ॥

3. स्वदत्तां परदत्तां वा यो हरेत वसुन्धराम् ।
गवां शतसहस्रस्य हन्तुः प्राप्नोति किल्बिषम् ॥

4. स्वदत्तां परदत्तां वा यो हरेत वसुन्धराम् ।
स्वविष्ठायां कृमिर्भूत्वा पितृभिः सह मज्जति ॥

5. अग्नेरपत्यं प्रथमं सुवर्णं भूर्वैष्णवी सूर्यसुताश्च गावः ।
दत्तास्त्रयस्तेन भवन्ति लोका यः काञ्चनं गां च महीं च दद्यात् ॥

6. स्वदत्तां परदत्तां वा यत्नाद्रक्ष युधिष्ठिर ।
महीं महिमतां श्रेष्ठ दानाच्छ्रेयोनुपालनम् ॥

7. स्वं दातुं सुमहच्छक्यं दुःखमन्यार्थपालनम् ।
दानं वा पालनं वेति दानाच्छ्रेयोनुपालनम् ॥

---

2. Quotod by विश्वरूप on या. I. 316, by अपरार्क from विष्णुधर्मोत्तर on p. 369. I. A. VI. p. 9, E. I. XI. p. 221 (490 A. D.), E. I. X. p. 53 (456 A. D.), J. B. B. R. A. S. X. p. 365 (dated 532 śake) ascribe to Vyāsa. For other early references vide E. I. vol. XIX. p. 16, vol. X. p. 51 and 53, E. I. vol. 21 pp. 16, 18. The latter half is बृहस्पति v. 29. In E. I. vol. 12 p. 135 verses 1, 2, 6, 25 are ascribed to both Vyāsa and Manu. गृह. र. p. 517 quotes whole as बृहस्पति's.

3. Quoted as बृहस्पति's in Gr. R. Vidy I. A. VI. p. 9. (Valabhi saṁvat 269), E. I. vol. 8 p. 146 (4th pāda is हन्तुः पिबति दुष्कृतम्), vol. 8. p. 162, E. I. XI. p. 111.

4. This is बृहस्पति 28, and Aparārka p. 370 from आदित्यपुराण (in both स्वविष्ठायां and बृहस्पति reads पच्यते). Vido Gupta inscriptions No. 23 (G. S. 191) and No. 26 p. 119 (स्वविष्ठायां) in G. S. 174, I. A. VI. p. 363 (śako 500), E. I. VI. p. 45 (G. S. 300), E. I. XIII. 270 and 333. Pargiter in J. R. A. S. 1912 p. 250 points out that verses 1, 2 and 4 occur in Padmapurāṇa VI. 33. 26–30.

5. पद्मपुराण VI. 33. 32 (तेषामनन्तं फलमश्नुवीत) This is वसिष्ठ 28. 16 (except 3rd *pāda*), बृहस्पति 30, वनपर्व 200. 128, संवर्त 77. This occurs in Gupta Ins. No. 81 p. 296, E. I. VI. p. 285 at p. 293 (śake 789), E. I. VII at p. 105, E. I. IX. p. 37 (śake 836). The Śat. Br. (S. B. E. vol. 26 p. 63) says 'Gold is sprung from Agni's seod'.

6. It occurs in भविष्यपुराण IV. 164. 38. Last pāda is quoted by मिता. on या. I. 320. In some inscriptions it is read as पूर्ववत्तां द्विजातिभ्यो यत्नाद्रक्ष &c. It occurs in E. I. 17 p. 345 at p. 348 (G. S. 113), E. I. vol 15 p. 133 (G. S. 129), E. I. XI at p. 221, E. I. V. p. 37 (Cedi Saṁvat 392), E. I. 20 p. 59 (G. S. 199), E. I. VI. p. 285 (śake 789), E. I. VIII. p. 287 (G. S. 199), I. A. vol. VI. 363 (śake 500); Gupta Ins. No. 26 at p. 119 (G. S. 174).

7. E. I. vol. 15. p. 335, E. I. VI. p. 18, E. I. IX. p. 101 (660. A. D.)

8. विन्ध्याटवीष्वतोयासु शुष्ककोटरवासिनः ।
कृष्णसर्पाभिजायन्ते ब्रह्मदेयापहारकाः ॥

9. यानीह दत्तानि पुरा नरेन्द्रैर्दानानि धर्मार्थयशस्कराणि ।
निर्माल्यवान्तप्रतिमानि तानि को नाम साधुः पुनरादद्दीत ॥

10. सर्वानेतान्भाविनो भूमिपालान् भूयो भूयो याचते रामचन्द्रः ।
सामान्योयं धर्मसेतुर्नृपाणां कालेकाले पालनीयो भवद्भिः ॥

11. न विषं विषमित्याहुर्ब्रह्मस्वं विषमुच्यते ।
विषमेकाकिनं हन्ति ब्रह्मस्वं पुत्रपौत्रकम् ॥

12. आस्फोटयन्ति पितरः प्रवल्गन्ति पितामहाः ।
भूमिदोऽस्मत्कुले जातः स नस्त्राता भविष्यति ॥

13. प्रायेण हि नरेन्द्राणां विद्यते नाशुभा गतिः ।
पूयन्ते ते तु सततं प्रयच्छन्तो वसुन्धराम् ॥

8. Quoted as बृहस्पति's in गृह. र. p. 518. It occurs in E. I. vol. 20 p. 59 (G. S. 159), E. I. vol. II. pp. 20–21, E. I. vol. V. 37, E. I. VI. p. 211 (śake 692), and p. 298 (609–10 A. D.), I. A. vol. VI. p. 73 (śake 534), E. I. X. p. 74, E. I. XI. pp. 113–14, E. I. XII. p. 205. In some ins. the reading is ब्रह्मदेयस्यहारिणः and also देवद्रार्थं हरन्ति ये. भविष्यपुराण IV. 164. 39 is तोयहीनेष्वरण्येषु शुष्क०

9. This occurs in E. I. vol. II. pp. 20–21 (Cedi saṁ. 346), II. p. 220 (śake 922), II. 360 (saṁ. 1162), E. I. V. 37 (Cedi saṁ 392), E. I. VI. at p. 298 (609–10 A. D.), I. A. VI. 73 (śake 534), E. I. VIII. 190 (G. S. 320), E. I. XI. 16, 18 (574 A. D.), E. I. XII. p. 35 (609 A. D.).

10. In some inscriptions the order of the halves is reversed. This occurs in E. I. IX. p. 37 (śake 836), E. I. X. at p. 67 (śake 815), E. I. II. 125 and 220 (śake 922), E. I. IV. p. 153, E. I. VI. p. 97 (śake 1114:), E. I. XI. pp. 20, 24 (saṁ. 1186) and p. 141 (1047 A. D.).

11. This is वसिष्ठ 17. 86, बृहस्पति 46, पद्मपुराण VI. 33. 45, बौ. ध. सू. I. 5. 102 (first half). Some ins. read देवस्वं विषमुच्यते. This occurs in E. I. X. p. 67 (śake 815), E. I. XV. p. 252, E. I. XI. at pp. 312–13 (saṁ. 1176), E. I. XIII. p. 173 (śake 977), E. I. IX. at p. 305 (saṁ. 1148), E. I. XIII. at p. 22.

12. This is बृहस्पति 17 (with slight variations) and is quoted by अपरार्क p. 370 as from विष्णुधर्मोत्तर. It is also पद्मपुराण VI. 33. 17. It occurs in Gupta Ins. No. 26 p. 117 (G. S. 174) and in Naihati plate of Ballāla-sena, E. I. XIV p. 156 at p. 161.

13. This occurs in Gupta Ins. No 26 p. 117 (G. S. 174).

14. सुवर्णमेकं गामेकां भूमेरप्येकमङ्गुलम् ।
हरन्नरकमाप्नोति यावदाभूतसंप्लवम् ॥

15. भूमिं यः प्रतिगृह्णाति यश्च भूमिं प्रयच्छति ।
उभौ तौ पुण्यकर्माणौ नियतं स्वर्गगामिनौ ॥

16. फालरुष्टां महीं दद्यात्सबीजां सस्यमालिनीम् ।
यावत्सूर्यरुता लोकास्तावत्स्वर्गे महीयते ॥

17. भूमिप्रदानान्न परं प्रदानं दानाद्विशिष्टं परिपालनं तु ।
सर्वैतिसृष्टां परिपाल्य भूमिं नृपा नृगाद्या दिवं प्रपन्नाः ॥

18. भूमिदानसमं दानमिह लोके न विद्यते ।
यः प्रयच्छति भूमिं हि सर्वकामान्ददाति सः ॥

19. योऽर्चितं प्रतिगृह्णाति ददात्यर्चितमेव वा ।
तावुभौ गच्छतः स्वर्गं नरकं तु विपर्यये ॥

20. अपि गङ्गादितीर्थेषु हन्तुर्गामथवा द्विजम् ।
निष्कृतिः स्यान्न देवस्वब्रह्मस्वहरणे नृणाम् ॥

21. मद्वंशजा परमहीपतिवंशजा वा पापादपेतमनसो भुवि भाविभूपाः ।
ये पालयन्ति मम धर्ममिमं समस्तं तेभ्यो मया विरचितोऽञ्जलिरेष मूर्ध्नि ॥

14. This is बृहस्पति 39 (with slight variations) and is quoted as यम's in गृह. र. p. 514 (भूमेरप्यर्धमङ्गुलम्). विश्वरूप on या. III. 252 quotes this verse but the 2nd half is अपहृत्य द्विजाग्र्येभ्यो नचिराद् वध्यते ध्रुवम् ॥. This occurs in E. I. IX. at p. 305 (sam. 1148), E. I. vol. II. p. 363 (sam. 1196), E. I. XI. at p. 145 (1047 A. D.).

15. This is बृहस्पति 32, पद्मपुराण VI. 33. 35-36, and वृद्धहारीत VII. 164; it is quoted in the Mit. on Yāj. II. 114. It occurs in E. I. II. p. 360 (sam. 1162), VII. 93 (1077 A. D.), E. I. IX. at p. 305 (sam. 1148), XI. p. 20 at p. 24 (sam. 1186) and p. 145 (1047 A. D.).

16. This is बृहस्पति 6, भविष्यपुराण (उत्तरपर्व chap. 164. 16), पद्मपुराण VI. 33. 6. It occurs in the Chiplun plates of Satyāśraya Pulakeśi II (between 609–642 A. D.), in E. I. III. at p. 52, in E. I. XII. p. 205 (1073 A. D.).

17. This is in E. I. VIII. pp. 287 (G. S. 199), Gupta Ins. No. 25 p. 115 (G. S. 209),

18. This occurs in the Pikira plates of Pallava Simhavarman (E. I. vol. VIII. p. 162).

19. This is Manu IV. 235 and occurs in E. I. vol. II. p. 360 (sam. 1162).

20. This occurs in E. I. XIII at p. 22 (Belgaum Ins. of 1204 A. D.).

21. E. I. vol. XII at p. 155.

22. अद्भिर्दत्तं त्रिभिर्भुक्तं सद्भिश्च परिपालितम् ।
एतानि न निवर्तन्ते पूर्वराजकृतानि च ॥

23. शङ्खो भद्रासनं छत्रं वराश्वा वरवारणाः ।
भूमिदानस्य चिह्नानि फलमेतत्पुरन्दर ॥

24. न तथा सफला विद्या न तथा सफलं धनम् ।
यथा तु मुनयः प्राहुर्दानमेकं कलौ युगे ॥

25. भूमिदानात्परं दानं न भूतं न भविष्यति ।
तस्यैव हरणात्पापं न भूतं न भविष्यति ॥

26. पूर्वैः पूर्वतरैश्चैव दत्तां भूमिं हरेत्तु यः ॥
स नित्यव्यसने मग्नो नरके च वसेत्पुनः ॥

27. गण्यन्ते पांसवो भूमेर्गण्यन्ते वृष्टिबिन्दवः ।
न गण्यते विधात्रापि धर्मसंरक्षणे फलम् ॥

28. परदत्तां तु यो भूमिमुपहिंसेत्कदाचन ।
स बद्धो वारुणैः पाशैः क्षिप्यते पूयशोणिते ॥

29. इति कमलदलाम्बुबिन्दुलोलां श्रियमनुचिन्त्य मनुष्यजीवितं च ।
इति विमलमनोभिरात्मनीनैर्न हि पुरुषैः परकीर्तयो विलोप्याः ॥

30. वाताभ्रविभ्रममिदं वसुधाधिपत्यमापातमात्रमधुरा विषयोपभोगाः ।
प्राणास्तृणाग्रजलबिन्दुसमा नराणां धर्मः सखा परमहो परलोकयाने ॥

---

22. E. I. VI p. 18. (plates of Kadamba Kṛṣṇavarman ascribe it to Manu).

23. This is बृहस्पति 15 (with variations), पद्मपुराण VI. 33. 15 and occurs in E. I. VII. at p. 93 (1077 A. D.), I. H. Q. for 1932 vol. VIII. p. 305 (saṁ. 1079), E. I. X p. 89 (śake 697), E. I. XIV p. 156 at p. 162. हेमाद्रि (दानखण्ड) p. 501 quotes it.

24. This occurs in E. I. vol. II. p. 219, where it and verses 7, 12, 40, 41 are quoted after the remark 'इति पराशरवत्सकुत्साङ्गिरसगौतममहुपाञ्चवल्क्यशङ्खलिखितनामन्यवधार्य.'

25. The first half is quoted from विष्णुधर्मोत्तर by अपरार्क p. 368. This and the next occur in E. I. VIII. p. 235, in the Chendlur plates of Pallava Kumāra-Viṣṇu and in E. I. XII. p. 135.

26. E. I. VIII. p. 235.

27-28. Both occur in E. I. VI. p. 97 (Gadag Ins. of Hoysala Vīraballāla, *śake* 1114). बृहस्पति 36 has हरते हारयेद्यस्तु मन्दबुद्धिस्तमोवृतः । स ..... पाशैस्तिर्यग्योनिषु जायते ॥. No. 28 is quoted (with slight variations) in दानक्रियाकौमुदी p. 41. It occurs in भविष्यपुराण IV. 164. 33.

29. E. I. VI. p. 285 at p. 294 (*śake* 789), E. I. VII. 93 (1077 A. D.), E. I. X. p. 89, I. H. Q. for 1932 vol. VIII. p. 305 (saṁ. 1079),

30. E. I. XI. p. 20 at p. 25 (saṁ. 1186), E. I. XII. p. 205.

31. अस्मत्कुलं परमुदारमुदाहरद्भिरन्यैश्च दानमिदमत्र नु मोदनीयम् ।
लक्ष्म्यास्तडित्सलिलबुद्बुदचञ्चलाया दानं फलं परयशःपरिपालनं च ॥

32 अस्मिन्वंशे द्विजाग्र्योपि यश्चान्यो नृपतिर्भवेत् ।
तस्यापि करलग्नोहं शासनं न व्यतिक्रमेत् ॥

33. यावन्ति सस्यमूलानि गोरोमाणि च संख्यया ।
नरस्तावन्ति वर्षाणि स्वर्गे तिष्ठति भूमिदः ॥

34. न्यायेनोपार्जिता भूमिरन्यायेनापहारिता ।
हरन्तो हारयन्तोपि आक्रान्त्यासप्तमं कुलम् ॥

GENERAL INDEX

(N. B.—Full references to works and authors like the Mahābhārata, Manu, Yājñavalkya that are quoted dozens of times have not beon given. After the first dozen references the attempt has been given up in such cases. The only exceptions mado are about 'Inscriptions', 'Jaimini', and 'Śabara'.

Abbe Dubois 20.

Abdapūrti, a saṁskāra 196, 258–260.

Abhijit, 28th nakṣatra, added between Śravaṇa and Uttarāṣāḍhā 247.

Ābhīras, a caste 72–73, 252; are distinct from śūdras according to Mahābhāṣya 72; history and origin of 72–73; modern Ahirs 73; speech of ābhīras was called Apabhraṁśa 72.

Abhiṣecanīya, principal among the rites in Rājasūya, 1215; procedure of 1216–1218.

Abhiṣikta, a caste 71.

Abhivādana (bowing to a person) of three kinds 336; rules about 335–338; various modes, according as the person honoured knows pratyabhivāda 337–8.

Abhyātāna, mantras 253n.

Abliṅga, verses 317n, 955.

Ācamana (sipping water): before and after *bhojana* 316; occasions for 316; procedure of, is of four kinds 653; rules about 315–316 652; three times in Saṁdhyā with three names of Viṣṇu 315; twice, necessary in some oases 316; to be done with the brāhma tīrtha 316; water for, in devapūjā 731.

Ācāradinakara, a Jaina work 321, 725.

Āchāramayūkha 647, 648n, 648,675.

Ācāraratna 657 n, 672 n, 675, 716n, 729 n, 1000n.

Ācārya: compared with father and mother 323; dorivation of 323; for veda teaching must ordinarily be a brāhmaṇa 325; greatness of 323; highest among all *gurus* 323; qualifications of 324–325.

Adhrigupraiṣa 1121n; Jaimini explains many words in, 1121–22n; meaning of adhrigu 1121; some expressions in, are recited inaudibly 1121n.

Ādiparva 7, 41, 74, 88, 154n, 155n, 215, 322, 427m, 431n, 460, 501 &c.

Ādipurāṇa 95, 99, 784, 926.

Ādityadarśana, same as niṣkramaṇa 196;

Ādityadarśana, a com. of Kāṭhakagṛhya 228, 532.

Ādityapurāṇa 18, 78, 209n, 451.

Āditya-vrata, for brahmacārin 371.

Adopted: diotum of Manu that a. son does not take gotra and wealth of genitive father is restrioted to inheritance and śrāddha and does not extend to marriage 493.

Adultery: abandonment of wife for, allowed by sages in four oases ... 571; is upapātaka according to Manu 572n; nothing so harmful to life as, 567; punishment for, in case of śūdra male 160; punishment for, in case of brāhmaṇa male 160; punishment of wife for 570–71; rules as to husband's rights in case of wife's a. 572–73.

Āgama, works on 713.

Agastya, gotra, divisions of 490; Lopāmudrā, wife of 586.

Aghamarṣaṇa 317, 661, 686, 955; a. hymn purifies a man 686.
Āghāras 207; two, to Prajāpati and Indra ... 1051n.
Aghāsika, a caste 102.
Āgneya-snāna 668.
Agni (see also under fire, haviṣya), addressed under various names in different ceremonies 212, 818; ardhādhāna and sarvādhāna methods of maintaining Śrauta a. 919n; all three śrauta fires to be permanently maintained by those called 'gataśrī' according to some 999; brahmacārin had to offer fuel-stick twice every day in 307; called purohita 40; called gṛhapati in the Ṛgveda 418; gṛhya, worship of, from day of marriage 307; positions of the vedic fires 989; śrauta, could be kindled only by one who had attained a certain age 676; sviṣṭakṛt, offering to, at end of a rite 208, 211; two views about the necessity of kindling śrauta fires 676-677;
Agnicayana, meaning of 1246; procedure of 1247-1255; bricks of various sizes and names, how prepared 1248-49; altar in, how arranged 1249-53; observances for a year after performance of 1255.
Agnihotra: cow identified with 1001; daily offered twice 998; daily homa is performed with cow's milk or *ājya* or cooked rice &c. 1001; deities to whom offered 681, 1003-1004; highly thought of in vedic times, but not obligatory on every body 677; is the second of seven haviryajñas 998; kṣatriyas and a. 1006-7; lasts as long as life lasts 425, 676; lasts throughout life according to vedic passages 998; oblations in, of what corn 681; one who has lost his wife may perform 685, 1000; procedure of śrauta a. 1000-1006; śrauta a. 998-1008; somewhat rare even in ancient times 979; time of 979; time of morning and evening śrauta a. 999-1000; underlying idea of, was that oblations thrown into fire reach the sun, that sends rain, which produces crops, the sustenance of all beings 680; *upasthāna* of fire in 1006; whether *gṛhya homa* should precede or follow śrauta homa 1000; who is to milk the cow in a. 1001;
Agnihotra-havaṇī, a *sruc* with which agnihotra is offered 1002n; was licked by the agnihotrin in ancient times 1005.
Agnihotrasthālī, vessel in which cow's milk for agnihotra is held 1002;

Āhiṇḍika, a caste, 73.

Āhituṇḍika, a caste, 102.

Āhitāgni (one who has kindled vedic fires) is cremated with his sacrificial utensils 985n.

Āhnika (daily duties and rites) 643 ff.; most important items of, are six, 646; principal matters falling under 646.

Āhnika-prakāśa, 52n, 318, 647, 648n, 654n, 667n, 668n, 687n, 695, 700 &c.

Āhnika-tattva, 643, 647n, 648n.

Āhutis, procedure applying to all a. of ājya, 997n.

Aikādaśina sacrifice, eleven animals are offered to eleven deities in 1132; thirteen *yūpas* are made or one yūpa may suffice 1132n.

Airiṇī-dāna, a rite subsequent to marriage, 537–538.

Aitareya Āraṇyaka, 372n, 394, 406, 428n, 750, 758, 1245.

Aitareya Brāhmaṇa, 13n, 15n, 29, 32n, 33, 34n, 35, 36, 37, 39n, 40, 46, 71, 213, 419 &c.

Aitaśa, story of, in Ait. Br., 480.

Aitaśāyanas, lowest among Bhṛgus, 480; most sinful among Aurvas, 480.

Aiyer, Sir Sivaswamy, 4n.

Ajātaśatru, king of Kāśī, 38; expounded philosophy to Bālāki, 106.

Ājya, is the material of *homa* when none expressly specified, 681, 986; ordinarily of cow to be used, but she-buffalo's ghee or sesame oil may be substituted, 1041n.

Ajyabhāgas, 207n; in pūrṇamāsa are called Vārtraghna and in darśeṣṭi Vṛdhanvantau, 1060; two, 1059–1060; they are the eyes of yajña, 1059n; procedure of, 1060n.
Ājyadoha, mantras, 372n.
Akṣayanīvi (permanent endowment), 860n.
Alberuni, work of, on India, 172, 363.
Altekar, Dr. A. S., 321n, 537.
Alwars, 177.
Amarakaṇṭaka, throwing oneself from peaks of, eulogised in Matsyapurāṇa, 925;
Amarakośa, 73, 78, 79, 80, 82, 84, 98.
Ambaṣṭha, 53, 71–72; *anuloma* caste, 53, 71; avocations of, 71–72.
Āmbaṣṭhya, a king, performed aśvamedha 71.
Ambikā, described as sister of Rudra, 213n, 1104; mother of Gaṇeśa in Yāj. 214.
Āmikṣā (same as payasyā), 1092n.
Anadhyāyas (days of cessation from Veda study), 393–402; ākālika, 399; a. and brahma-yajña, 394, 401; for brahmacārin for a lesser number of days, 400; a. lasting for one whole day, 398; lasting only for a portion of the day, 397–398; lasting for three days, 398, 399; lasting for twelve days or more, 400; nitya a. 402; occasions of, stated in Śat. Br. and Tai. Ār., 394; of three kinds, 400–401; on death of king, upādhyāya, fellow-student, 398–399; revolving in mind of Veda allowed even on a. days, 401; rules about a. apply only to learning veda and not to its use in religious rites, 401; tātkālika, 396; *tithis* of, 395; vedāṅgas and śāstras could be studied on a. days, 401–402.
Ānandagiri, 944.
Anantadeva, author of Saṁskāra-kaustubha, 201n.
Anavalobhana, 196, 220–221; a part of puṁsavana rite, 220; same as garbharakṣaṇa.
Andhra, caste, origin and avocation of, 69.
Andhras, associated with *Pulindas* in Rock Edict of Aśoka, 69; Viśvāmitra's sons became, 47.
Andhras, founder of dynasty of, is said to have been a śūdra, 1238.
Aṅgiras, smṛti of, 70n, 89, 134, 153, 168, 171, 174n, 194, 310, 358n, 438 &c.
Āṅgirasa, mantra called, is Ṛg. IV. 40.5., 378n.
Āṅgirasa, story of, who addressed his ancestors as 'boys' when he taught them, 345.
Aṅgirogaṇa, divisions and sub-divisions of, 490.
Anglican church, hierarchy of Archbishops, bishops &c. 118; Thirty-nine Articles of, 117n.
Aṅguttara-nikāya, a Pāli work, 831.
Animals, not proper for being sacrificed, 773; sacrificial, are horse, ox, goat and ram, 773.
Annaprāśana, a saṁskāra, 196, 256–258.
Anniversary, of birth of a child, every month or year, 258; of the day of marriage, 259.
Antelope (vide under *yajña*), country of black, associated with spiritual eminence, 14; skin has been a symbol of vedic culture and holiness, 1026n.
Antya, applies to all lowest castes, 69–70.
Antyaja, applied to all lowest castes like caṇḍālas, 70; is one who eats cow's flesh according to Veda-Vyāsa, 71; most a. castes are no longer untouchable, 173; seven kinds of, enumerated in some smṛtis, 70; soldiers referred to in Mahābhārata, 70; touch of many castes of, did not require a bath for purification, 171; two groups

of, distinguished by Mitākṣarā 70; twelve kinds of, mentioned by Veda-Vyāsa, 71.
Antyāvasāyin, 70, 71; lowest group of antyajas according to the Mitākṣarā, 70; Manu distinguished between antya and antyāvasāyin, 71; is modern Ḍom, 71; origin of, 71; stays in a cemetery, 71.
Antyeṣṭi, a saṁskāra, 197.

Government Oriental Series Class B, No. 6

HISTORY OF DHARMAŚĀSTRA

(ANCIENT AND MEDIÆVAL RELIGIOUS AND CIVIL LAW)

By
the late Dr. PANDURANG VAMAN KANE
National Professor of Indology

Vol. III

Second Edition

Bhandarkar Oriental Research Institute, Poona
1973

PREFACE TO FIRST EDITION

The second volume of the History of Dharmaśāstra was published in the third quarter of 1941. In the Preface to that volume I held forth hopes that the next volume dealing with the remaining subjects comprised in Dharmaśāstra might be placed before scholars in about three years thereafter. The Great War was then being fought in Europe and it was generally believed that India would remain free from the fear of actual invasion. But such fond hopes were shattered by the sudden attack on Pearl Harbour by Japanese bombers on 7th December 1941. Japan gained rapid and phenomenal victories and within about three months from the attack on Pearl Harbour vast territories from the Philippines to Burma fell into the hands of the victors. Calcutta and Trincomalee were bombed. Serious fears were entertained about an invasion of the mainland of India by land, sea and air. There was great panic in such coastal cities as Madras, Bombay and Karachi. The matters uppermost in the minds of Government officials and the members of the public were A. R. P. measures, the recruiting of men for the army, navy and air force and the removal of families and valuables to places of safety in the interior. Important and rare books from the libraries of the Bombay Asiatic Society and of the University of Bombay were taken to distant places for reasons of security. During almost the whole of 1942 it was very difficult for me to work on the preparation of the third volume in the midst of a general atmosphere of panic caused by the fear of invasion and the removal of valuable reference books from Bombay Owing to the war there has been great scarcity of paper and printing also has become very costly. I decided upon writing only on a few of the several subjects that remained to be dealt with and chose Rājadharma, Vyavahāra and Sadācāra, the treatment of which is now placed before the public. Scarcity of paper and labour is responsible for the fact that this third volume has been in the press for nearly three years. The present volume increased in bulk beyond expectation The fourth and last volume will deal with the following subjects: Pātaka, karmavipāka and prāyaścitta; antyesti, aśauca and srāddha; tīrtha; vrata; kāla and muhūrta; śānti; Paurāna dharma; the influence of the Pūrvamīmāmsā and other śāstras on dharmaśāstra; the religious and philosophical background of dharmaśāstra; the essentials of our culture, its future, the coming

social and other trends and their impact on the dogmas and ideals of Dharmaśāstra. I am personally anxious to finish all the remaining work as early as possible But looking to my age (I am nearly 67 now), to my ailments and to the number of subjects that remain to be dealt with, it is impossible for me to say when the next and last volume may be published. This volume also is full of quotations, refers to many inscriptions, judicial decisions and legislative enactments. The reasons for this have been stated at length in the Preface to the second volume and I do not desire to repeat them here In the general index to the second volume full references to works like the Manusmrti were not given, because such works were quoted on almost every page But some critics found fault with this, therefore in the index to this volume full references to all works are inserted.

All that now remains is the pleasant duty of acknowledging my obligations to others. Bloomfield's Vedic Concordance, the Vedic Index of Professors Macdonell and Keith and several volumes of the Sacred Books of the East have been very useful in preparing this volume as in the case of the preceding one. I wish to mention specially the debt I owe to the late Mahāmahopādhyāya Kamalakrsna Smrtitīrtha for his editorial work on twelve volumes on the different branches of dharmasāstra, which have been of great use to me in writing all the volumes of my History viz. Hāralatā, Vivādaratnākara, Grhastharatnākara, Krtyaratnākara, Tīrthacintāmani, Varsakriyākaumudī, Dānakriyākaumudī, Śrāddhakriyākaumudī, Suddhikaumudī, Dandaviveka, Rājadharmakaustubha and Agastyasamhitā. I am highly obliged to Paramahamsa Svāmi Kevalānanda Sarasvatī of Wai for frequent help and guidance in solving some intricate problems of Dharmaśāstra, to Prof N. A Gore, M. A. of Poona for help in the careful correction of proofs, to Tarkatīrtha Raghunāthaśāstri Kokje of Lonavla and Mr. N. G Chapekar, B A., LL.B (retired F. C Sub-judge), of Badlapur for reading through the whole volume and suggesting some additions and corrections.

Assistance in various ways during the progress of the work for the last four years was very kindly rendered by a host of friends and acquaintances, among whom I should like to make special mention of Prof H. D. Velankar, Dr R N Dandekar, Dr. S. K. Belvalkar, Rao Bahadur Prof. Rangaswami Aiyangar, Dr. A. S Altekar, Mr. P. K. Gode, Dr. Raghavan, Mr. S N Joshi of Bhārata-itihāsa-samśodhaka-mandala at Poona, Mr. Bhabatosh

Bhattacharya (son of M M Kamalakrsna Smrtitirtha), Mr S L Katre of Ujjain, Prof. A. M. Paramaśivanandan of Pacchaiappa College at Madras, the late Pandit Rangacarya Raddi. Thanks are due to all these and many others for help and interest in this volume. It need not be expressly stated that I alone am responsible for the views and mistakes contained in this volume I sincerely thank the Manager of the Aryabhushan Press, Poona, for carrying out the work of printing with care and promptitude in spite of difficulties caused by war conditions and paper and labour shortage

In a work bristling with thousands of quotations and references it is likely that many slips have escaped attention The indulgence of the reader is sought for forgiveness in the matter of several misprints in the footnotes caused by loss or displacement of the parts of letters in the process of printing

BOMBAY,
1st October, 1946.

P. V. KANE

TABLE OF CONTENTS

List of abbreviations ... ... xi–xvi

Chronological Table ... ... xvii–xx

Brief Synopsis ... ... xxi–xxiii

List of works consulted ... ... xxv–xxxvi

Table of cases cited ... ...xxxvii–xlii

Additions and Corrections ... ... xliii–xlv

History of Dharmaśāstra 1–973

Appendix containing long extracts in Sanskrit and List of names of officials .. 975–1014

General Index 1015–1082

Index of technical or important words ... 1083–1088

LIST OF ABBREVIATIONS EMPLOYED

A. I. R. = All India Reporter of Nagpur

Ait Br. = Aitareya Brāhmana

All. = Indian Law Reports, Allahabad Series

A L. J. = Allahabad Law Journal

Āp. = Āpastamba (generally the author of the Dharmasūtra is meant)

Āp. Dh S. = Āpastamba-dharmasūtra

Āp. M P. = Āpastamba-mantra-pātha

A. S. W. I. = Archaelogical survey of Western India

Āsv. Gı. = Āsvalāyana-grhyasūtra

Baud. Dh. S. = Baudhāyana-dharmasūtra

B I. = Bibliotheca Indica series, Calcutta

Bom. = I. L. Reports, Bombay Series

Bom. G. = Bombay Gazetteer volumes

Bom. H. C. R. = Bombay High Court Reports (vol I-XII)

Bom. L. R. = Bombay Law Reporter (edited by Ratanlal and Dhirajlal)

B. O R. I.
B. O. R Institute } = Bhandarkar Oriental Research Institute, Poona

Br = Smrti of Brhaspati

Br. Up. = Brhadāranyaka Upanisad

B R W. W. = Beal's Buddhist Records of the Western world

Cal = Indian Law Reports, Calcutta Series

Catur. = Caturvimśatimata

Chān. Up. = Chāndogya Upanisad

C. I. I. or
Corpus I. I } = Corpus Inscriptionum Indicarum (vol. I relating to Inscriptions of the times of Asoka, vol. II relating to Kusana Inscriptions and vol. III relating to Gupta Inscriptions)

C. L. J. = Calcutta Law Journal

Com. = Commentary or Commentator (according to context)

Cr. ed. = Critical edition (of the Mahābhārata, Poona)

C. W. N. = Calcutta Weekly Notes (Law Reports)

D. B. = The Dāyabhāga of Jīmūtavāhana

D. C. = Dattaka-candrikā

D C = Deccan College Collection (when mss. are concerned)
Dh S. = Dharmasūtra
D K. S. = Dāyakramasangraha of Śrīkrsna
D. N. = Dattakamīmāmsā of Nandapandita
E C = Epigraphia Carnatica
E I = Epigraphia Indica
F B. = Full Bench (decision)
Fick } = The Social organization in North-east India in Buddha's time (translated from German by Dr Shishukumar Mitra, 1920)
Gaut. = Gautama-dharmasūtra
Gr. R. = Grhastharatnākara of Candesvara
H D } = History of Dharmaśāstra
H Dh }
Hir gr = Hiranyakesi-grhya-sūtra
I. A = Indian Antiquary
I A. } = Indian Appeals (Law Reports) The context will always indicate whether I. A stands for the volumes of the Indian Antiquary or for the Law Reports, Indian Appeals
I. H Q. = Indian Historical Quarterly
I. L R = Indian Law Reports
Ins = Inscription or Inscriptions
I. P. C = Indian Penal Code
Jai = Jaimini's Pūrvamīmāmsāsūtra
J. A O. S = Journal of the American Oriental Society
J. A S B = Journal of the Asiatic Society of Bengal
J B. O. R S. = Journal of the Bihar and Orissa Research Society
J R. A S = Journal of the Royal Asiatic Society (London)
Kām. = Kāmandakīya-nīti-sāra
Kāt. = Smrti of Kātyāyana reconstructed by P V Kane
Kaut. = Kautilya's Arthaśāstra
K V N. = Kalivarjyavinirnaya (ms)
L R I A. = Law Reports, Indian Appeals (Privy Council)
Mad. = Indian Law Reports, Madras Series
Mārk. = Mārkandeyapurāna
Medh. = Medhātithi, the oldest commentator of Manusmrti

Mit = Mitāksarā on the Yājñavalkya-smrti
M. L. J. = Madras Law Journal
Moo I. A. = Moore's Indian Appeals (Reports
N. or n. = footnote
Nār. = Nārada-smrti
Nir. S = Nirnayasindhu
Nītisāra = Kāmandakīya-nīti-sāra
N. I. A. = New Indian Antiquary, Poona
Pān. = Pānini's Astādhyāyī
Pār. Gr. = Pāraskara-grhya-sūtra
Par. M. = Parāśāra-Mādhavīya
Patna = Indian Law Reports, Patna Series
P. C. = Privy Council
P. J. = Printed Judgments of the Bombay High Court
Q. or q = Quoted
Raghu. = Raghuvamsa
R. D. K. } = Rājadharmakānda of Kalpataru (on p. 43
Rāja Dh. K. } = R. D. K. by mistake stands for Rājadharma-kaustubha)
Rājadharma-K. = Rājadharmakaustubha of Anantadeva
Rāja N. P. } = Rājanītiprakāśa (a part of the Vīramitrodaya
R. N. P. } = of Mitramiśra)
Rājat. = Rājatarangini
Rg. = Rgveda
Sam. K. = Samskāra-kaustubha
Sam Pr. = Samskāraprakāśa (a part of the Vīramitrodaya of Mitramiśra)
Śān. Gr. = Śānkhāyana-grhya-sūtra
Śat Br. = Śatapatha-brāhmana
S. B. E. = Sacred Books of the East (series edited by Max Müller)
S. I. I. = South Indian Inscriptions
Sm. C. = Smrticandrikā
Sm. Kau. = Smrti-kaustubha
Sm. M. = Smrtimuktāphala
Śr. = Śrautasūtra
S. V. = Sarasvatīvilāsa

Śukra = Śukranītisāra
Tai Ār. = Taittirīya Āranyaka
Tai Br. = Taittirīya Brāhmana
Tai. S = Taittirīya Samhitā
Tai. Up = Taittirīya Upanisad
T. L L = Tagore Law Lectures
Tr = Translation or translated
Vāj S = Vājasaneyi-samhitā
Vas = Vasistha-dharma-sūtra
V C = Vivāda-cintāmani
V M / V Mātrkā = Vyavahāra-mātrkā of Jīmūtavāhana (except on p 709)
V. Mayūkha = Vyavahāramayūkha (In a very few places such as on p 709 through oversight V M stands for V Mayūkha)
V Nir / V Nirnaya = Vyavahāranirnaya of Varadarāja
V P = Vyavahāraprakāsa (a part of the Vīramitrodaya of Mitramiśra)
V R = Vivādaratnākara of Candesvara
Visnu / Visnu Dh S. = Visnudharmasūtra
V. T. = Vivādatāndava of Kamalākara
Vy Nir / Vy Nirnaya = Vyavahāranirnaya of Varadarāja
Yāj. = Yājñavalkyasmrti
अथर्व = अथर्ववेद
अर्थशास्त्र = कौटिलीय अर्थशास्त्र
आप ध सू = आपस्तम्बधर्मसूत्र
आप म पा. = आपस्तम्बमन्त्रपाठ
ऋ. = ऋग्वेद
ऐ ब्रा = ऐतरेयब्राह्मण
कलिवर्ज्यवि = कलिवर्ज्यविनिर्णय (ms)
कात्या. = कात्यायनस्मृतिसारोद्धार
कात्या. श्रौ. = कात्यायनश्रौतसूत्र
काम / कामन्दक = कामन्दकीयनीतिसार
कृत्यर. = कृत्यरत्नाकर

कौ. / कौटिलीय } = कौटिलीय अर्थशास्त्र

गृह. र. = गृहस्थरत्नाकर

गौ. = गौतमधर्मसूत्र

चतुर्वि. = चतुर्विंशतिमत

छा. उ. = छान्दोग्योपनिषद्

जै. = जैमिनीयपूर्वमीमांसासूत्र

जै. न्या. मा. = जैमिनीयन्यायमालाविस्तार

तै. आ. = तैत्तिरीयारण्यक

तै. ब्रा. = तैत्तिरीयब्राह्मण

तै. सं. = तैत्तिरीयसंहिता

दत्त. च. = दत्तकचन्द्रिका

दत्त. मी. = दत्तकमीमांसा

नारद. = नारदस्मृति

नीतिवा. / नीतिवाक्या. } = नीतिवाक्यामृत

नीतिसार = कामन्दकीयनीतिसार

पा. = पाणिनि's अष्टाध्यायी

बुध. / बुधभू. } = बुधभूषण

बृह. = बृहस्पतिस्मृति (as quoted in digests)

बृह. उप. = बृहदारण्यकोपनिषद्

बृहत्सं. = बृहत्संहिता

बौ. ध. / बौ. ध. सू. } = बौधायनधर्मसूत्र

बौ. श्रौ. = बौधायनश्रौतसूत्र

मद. पा. = मदनपारिजात

मनु. = मनुस्मृति

मिता. = मिताक्षराटीका of विज्ञानेश्वर

मीमांसाकौ. / मी. कौ. } = मीमांसाकौस्तुभ of खण्डदेव

मेधा. = मेधातिथि's भाष्य on मनुस्मृति

या. or याज्ञ. = याज्ञवल्क्यस्मृति

रा. ध. कौ. or राजध कौ. or राजधर्मका. = राजधर्मकौस्तुभ

रा. नी. प्र. or राजनी. प्र. or राजनीतिप्र. = राजनीतिप्रकाश of मित्रमिश्र

राज. र. or राजनीतिर. = राजनीतिरत्नाकर of चण्डेश्वर

वाज. सं = वाजसनेयसंहिता
वि चि = विवादचिन्तामणि
वि. ता = विवादताण्डव of कमलाकर
वि र = विवादरत्नाकर
व्यव. त = व्यवहारतत्त्व of रघुनन्दन
व्य. नि or व्यव. नि = व्यवहारनिर्णय
व्य प्र = व्यवहारप्रकाश of मित्रमिश्र
व्य. म or व्य. मयूख = व्यवहारमयूख
व्य मा = व्यवहारमातृका
व्यव सा. = व्यवहारसार
शुक्र, शुक्रनी, शुक्रनीति. } = शुक्रनीतिसार
स कौ = संस्कारकौस्तुभ
सत्या. श्रौ. = सत्याषाढश्रौतसूत्र
स वि. = सरस्वतीविलास
स्मृतिच. = स्मृतिचन्द्रिका
स्मृतिमु = स्मृतिमुक्ताफल

CHRONOLOGICAL TABLE

(of some important works and authors referred to in this volume)

N. B —Some dates, particularly of ancient works, are more or less conjectural

4000 B. C. — 1000 B. C - The period of the Vedic Samhitas, Brāhmanas and Upanisads. Some hymns of the Rgveda, the Taittirīya Samhitā and Brāhmana and the Atharvaveda may possibly go back to a period earlier than even 4000 B. C. and some of the Upanisads (even from among those that are regarded as the earliest ones) may be later than 1000 B. C

800 B C — 500 B. C. — The Nirukta.

800 B C. — 400 B. C — The principal srauta sutras (of Apastamba, Āśvalāyana, Baudhayana, Kātyāyana, Satyāsādha and others) and some of the Grhyasūtras (such as those of Āpastamba and Āśvalāyana)

600 B. C. — 300 B C. — The dharmasūtras of Gautama, Āpastamba, Baudhāyana, Vasistha and the Grhyasūtras of Pāraskara and a few others.

600 B. C. — 300 B. C. — Pānini

500 B. C. — 200 B C — Jaimini's Pūrvamimāmsasūtra

300 B. C — Vararuci Kātyāyana, author of Vārtikas on Pānini.

300 B C. — 100 A D — Arthasāstra of Kautilya.

150 B. C. — The Mahābhāsya of Patañjali.

200 B. C. — 100 A. D — Manusmrti

100 A. D. — 300 A. D — Yājñavalkyasmrti

100 A. D. — 300 A. D — Visnudharmasutra

100 A. D. — 400 A D. — Nāradasmrti

200 A D. — 500 A. D. — Śabara, com of Jaimini

300 A. D. — 500 A. D. — Brhaspatismrti on Vyavahāra (not yet found. Extracts translated in S. B. E. vol. 33).

300 A. D — 600 A. D — Some of the extant Purānas, such as Vāyu, Visnu, Mārkandeya, Matsya, Kūrma

400 A D — 600 A D. — Kātyāyanasmṛti on Vyavahāra (not yet found Extracts collected by me and translated in English)

400 A D — 600 A D. — Kāmandakīyanītisāra

505 A D — 587 A D. — Varāhamihira, author of Bṛhatsamhitā, Bṛhajjātaka, Pañcasiddhāntika and other works

600 A D — 650 A D. — Bāna, author of the Kādambarī and the Harsacarita

650 A D. — 750 A D. — Kumārilabhatta, author of Ślokavārtika, Tantravārtika and Tup-tīkā

600 A D. — 900 A. D — Most of the smṛtis and some of the Purāṇas

788 A. D — 820 A. D — Śaṅkarācarya, the great Advaita philosopher

800 A D. — 850 A D — Viśvarūpa, com. of Yājñavalkyasmṛti

900 A. D. — Medhātithi, com. of Manusmṛti

900 A. D. — 1100 A. D —Pārthasārathimiśra, author of Śāstradīpikā, Tantraratna, Nyāyaratnākara

966 A D — Utpala, com of Bṛhat-samhitā and Bṛhajjātaka

1000 A. D — 1055 A. D — Dhāresvara (Bhoja)

1070 A D — 1100 A. D — Vijñāneśvara, the author of the Mitāksarā com on Yājñavalkya

1080 — 1140 A D —Govindarāja, author of a com on Manusmṛti

1100 — 1150 A D — Laksmīdhara, author of a large digest called Krtya-kalpataru or simply Kalpataru

1100 — 1150 A D — Jīmūtavāhana, author of Dāyabhāga, Kālaviveka and Vyavahāramātrkā

1114 — 1183 A D — Bhāskarācārya, author of Siddhāntasiromani, of which Līlāvatī is a part

1125 A D — Aparārka, author of a com on the Yājñavalkyasmṛti

1127 — 1138 A. D — Mānasollāsa or Abhilasitārthacintāmani of Somesvaradeva

1150 — 1160 A D — Rājataranginī of Kalhana

1150 — 1200 A D. — Smṛtyarthasāra of Śrīdhara.

1200 — 1225 A. D — Smṛticandrikā of Devaṇṇabhaṭṭa

1150 — 1300 A D — Haradatta, com on Gautamadharmasūtra and Āpastambadharmasūtra

1150 — 1300 A. D. — Kullūka, com. of Manusmṛti.

1200 — 1300 A D — Vyavahāranirnaya of Varadarāja

1260 — 1270 A. D. — Caturvargacintāmani of Hemādri

1290 — 1370 A D. — Candeśvara, author of Rājanītiratnākara, Vivādaratnākara, Grhastharatnākara and other works

1300 — 1380 A D — Mādhavācārya, author of Parāśaramādhavīya.

1360 — 1390 A D. — Madanapārijāta compiled under king Madanapāla

1375 — 1460 A D. — Śūlapāni, author of Dīpakalikā, com on Yājñavalkya.

1400 — 1500 A D. — Nyāyasudhā of Someśvara, com on Tantravārtika.

1400 — 1450 A D — Vivādacandra of Misarumisra

1425 — 1450 A D — Madanaratna of Madanasimha.

1490 — 1512 — The Vyavahārasāra of Dalapati, a part of the Nrsimhaprasāda

1500 — 1525 A. D —. The Sarasvativilāsa compiled under king Pratāparudradeva

1500 — 1550 A D. — Vardhamāna, author of Dandaviveka.

1500 — 1550 — Vācaspatimisra, author of Vivādacintāmani and several other works

1520 — 1575 A D — Raghunandana, author of Dāyatattva, Divyatattva, Vyavahāratattva and other Tattvas

1560 — 1620 A D — Śankarabhatta, author of Dvaitanirnaya or Dharmadvaitanirnaya

1590 — 1630 A. D — Nandapandita, author of the Dattakamīmāmsā and Vaijayantī, com on Visnudharmasūtra.

1610—1640 A. D —Kamalākarabhaṭṭa, author of Nirnayasindhu, Vivādatāndava, Śūdrakamalākara and other works.

1615 — 1645 A D — Nīlakanthabhatta, author of Nītimayūkha, Vyavahāramayūkha and other Mayūkhas

1615 — 1645 A. D — Mitramisra, author of Vīramitrodaya, divided into Rājanītiprakāśa, Vyavhāraprakāsa and other prakāśas

1650 — 1680 A D — Anantadeva, author of Rājadharmakaustubha

1750 — 1820 A. D — Bālambhatta, author of the Bālambhattī, com on the Mitāksarā

1790 A D — Dharmasindhu of Kaśīnātha

(GOVERNMENT AND STATECRAFT)

CHAPTER I

Rājadharma has been a subject of discussion in works on dharmaśāstra from very ancient times. The Āp. Dh. S. II 9 25.1 says 'The general and special *dharmas* of all varnas have been explained; but now we shall declare the dharmas of a king in particular'. Āp then states that the king should cause to be built a capital and a palace, the gates of which both should face the south; that the palace should be in the heart of the capital; that in front of the capital there was to be a hall called 'āmantrana' (hall of invitation); that to the south of the town there was to be an assembly house with doors on the north and south. Āp requires that in the king's realm no brāhmana should suffer hunger, sickness, cold or heat; Āp gives regulations about the assembly house and about persons who were to be allowed to engage in gambling; he prescribes that (the exercise in) arms, dancing, singing and music should not go on anywhere except in the houses of the king's servants, that the king was to see that there was no danger from thieves in villages and forests, that the king should donate fields and money to brāhmanas according to their worth without detriment to his servants, that the king who meets death in recovering the property of brāhmanas and other warlike persons who meet death in fighting for a similar worthy cause reap the merit of a sacrifice (i. e reach heaven as reward); that the king should appoint in towns and villages officers and their subordinates, who are pure and truthful, for the protection of the subjects against thieves and who are to be made to make good what is stolen; that they are to collect lawful taxes for the king from the people except from learned brāhmanas, women of all castes, minors, students staying with teachers and ascetics fulfilling the rules of their order, śūdras who do menial work for the higher castes (such as washing their feet), persons that are blind, deaf or dumb Āp. then lays down punishments for adultery and rape, for slander and defamation, for manslaughter, for theft and appropriation of another's land, for breach of contract to cultivate the field of another, for a herdsman leaving his herd or negligently allowing

it to perish He states that if the king does not punish the guilty he incurs sin, that in disputes judges should be men of learning, clever and fulfilling their duties, that witnesses were to tell the truth and were to be punished if they be untruthful It will be noticed how Āp briefly covers the whole field of rājadharma In the Śāntiparva of the Mahābhārata rājadharma is dealt with at great length in chapters 56–130 and to some extent in 131–172 The Manusmṛti also states at the beginning of chap VII (1) that it will expound rājadharmas That great literary activity on the science and art of government went on for many centuries before the Christian era follows from several considerations The Anuśāsanaparva (chap 39 8) speaks of the śāstras composed by Brhaspati and Usanas The Śāntiparva (58 1–3) names as expounders of *rājaśāstra* Brhaspati, Bharadvāja, Gaurasiras, Kāvya, Mahendra, Manu Prācetasa and Viśālākṣa Śāntiparva (102 31–32) opposes the view of Śambara to that of ācāryas[1] The Arthasāstra of Kautilya mentions five schools (viz those of the Mānavas, the Bārhaspatyas, the Auśanasas, the Pārāśaras and the Āmbhīyas), seven individual teachers (V. 5, and I. 8) only once (viz Bāhudantīputra, Dirgha Cārāyana, Ghotamukha, Kaninka Bhāradvāja, Kātyāyana, Kiñjalka, Pisunaputra,) and several times mentions the views of Bhāradvāja, Kaunapadanta, Parāśara, Pisuna, Vātavyādhi, Viśālākṣa. Kautilya also cites at least 53 times the views of ācāryas, almost in every case for dissent Śānti 103 44 refers to a Bhāsya on rājasāstra Is it possible to see in this a reference to one out of the bhāsyakāras indicated in the verse appended at the end of the Kautilīya or to the Kautilīya itself? Another fact indicative of the systematization of the science of government is that in the Mahābhārata, the Rāmāyana, Manu and Kautilya ideas expressed by numbers had already been stereotyped long before those works were written viz such as saptānga rājya (State with seven constituent elements), sādgunya (the six ways of policy viz alliance, declaration of war &c), three *śaktis*, the four upāyas (sāma, dāna, bheda, danda), astavarga, and pañcavarga (Manu VII. 155), the 18 and 15 tīrthas (Sabhāparva 5 38)[2] For detailed information

about the Rājaśāstras of Bṛhaspati, Uśanas, Bhāradvāja culled from the Mahābhārata and other ancient works *vide* my paper on them in the Journal of the University of Bombay, vol. XI part 2 pp. 73–83, 1942.

The fulfilment of their duties and responsibilities by rulers was of paramount importance to the stability and orderly development of society and to the happiness of individuals in the State and therefore one often finds that rājadharma is said to be the root of or the quintessence of all *dharmas*. Śāntiparva (63.25) states 'know that all dharmas are merged in rājadharma; that rājadharmas are at the head of all dharmas' and (141 9–10) 'the welfare, good rains, sickness, calamities and death among people owe their origin to the king[3]'. It was the king's duty to see that the people in his kingdom acted according to the rules laid down in the smṛtis for the several varnas and āśramas, to administer justice and to interfere when his help was sought for by a *pariṣad* (assembly of learned men) in enforcing the *prāyaścitta* (penance) prescribed for various lapses. Vide Gautama X. 7–8, XI. 9–11, Āp. Dh. S II. 5 10. 13–16[4], Vasiṣṭha 19 1–2, Viṣṇu III. 2–3, Nārada (prakīrnaka, 5–7 and 33–34), Śāntiparva 77 33 and 57 15, Matsyapurāna 215.63, Mārkandeyapurāna 27 28 and 28 36 and H. Dh. vol. II. p. 965. Therefore it may be said with truth (as done by the Mahābhārata) that *rājadharma* was the highest goal of all the world, that it comprehended within itself all rules of *ācāra*, *vyavahāra* (administration of justice) and *prāyaścitta* (penance). It is on account of this all-pervading influence of government or royal power that the Mahābhārata frequently emphasizes that the king is the maker of his age, that it is he who can usher a golden age or an age of strife and misery for the country[5]. The Śukranītisāra (I.

3. एवं धर्मान् राजधर्मेषु सर्वान्सर्वावस्थं संप्रलीनान्विबोध । ... सर्वा विद्या राजधर्मेषु युक्ताः सर्वे लोका राजधर्मे प्रविष्टाः । सर्वे धर्मा राजधर्मप्रधानाः । शान्तिपर्व 63 25, 26, 29; राजमूला महाभाग योगक्षेमसमुद्भवः । प्रजासु व्याधयश्चैव मरणं च भयानि च ॥ कृतं त्रेता द्वापरं च कलिश्च भरतर्षभ । राजमूला हीति मतिर्मम नास्त्यत्र संशयः ॥ शान्ति 141. 9–10; सर्वस्य जगतोऽस्य राजधर्मः परायणम् । शान्ति 56. 3.

59–60) remarks that one should learn from śāstra what are good and evil actions, give up evil deeds and perform good ones and that the king is hence declared to be the cause of (good or evil) times according as he does good or evil acts Śukra IV. 1, 60 states that the king is the prompter of his age

Though rājadharma was thus an integral part of dharmaśāstra and was one of the most important subjects therein, yet apart from the works on dharmaśāstra separate treatises dealing with rājadharma alone came into existence in very early times Śāntiparva (chap 59) states that originally in the Krta age there was no king nor punishment, that then *moha* (delusion), greed and lust entered men, that in order to provide against the complete destruction of dharma, Brahmā composed a work in one hundred thousand chapters on dharma, artha, kāma and mokṣa (verses 30 and 79), that part of this work on Nīti (science of government) was abridged by Śaṅkara Viśālākṣa (verse 80, and so it was called Vaiśālākṣa) into 10000 chapters, that Indra studied it and reduced it to 5000 chapters (and the work was called Bāhudantaka, verse 83), that it was compressed into 3000 chapters by Bṛhaspati (and so was called Bārhaspatya) and that Kāvya (Uśanas) reduced the work to 1000 chapters. The Kāmasūtra (I 5–8) contains a somewhat similar story that Prajāpati composed a work in one hundred thousand chapters, that Manu abridged it as regards dharma, Bṛhaspati as regards *artha* and Nandī abridged in 1000 chapters the science of erotics. The Śāntiparva (69) gives (verses 33–74) a summary of the contents of the work of Brahmā on rājadharma which remarkably agrees with the principal topics of the Kautilīya

The Nītiprakāsikā (I 21–22) states that Brahmā, Maheśvara, Skanda, Indra, Prācetasa Manu, Bṛhaspati, Śukra, Bhāradvāja, Veda-Vyāsa, Gauraśiras were the expounders of Rājaśāstra, that Brahmā composed a work on rājasāstra in 100000 chapters, which was gradually reduced in size by each of the above-mentioned founders until Gauraśiras reduced it to 500 chapters and Vyāsa to 300 The Śukranītisāra (I 2–4) states that Brahmā composed nītiśāstra in 100000 verses, which was subsequently abridged by Vasistha and others (including Śukra)

It is interesting to note the names given to the science of government The most appropriate word is 'rājaśāstra' and it is employed by the Mahābhārata, which speaks of Bṛhaspati, Bharadvāja and others as 'rājaśāstra-pranetāraḥ' (vide p 2 above) The Nītiprakāśikā (I, 21–22) also dubs the divine and human

writers on government 'rājaśāstrānām pranetārah.' The same word is employed by such ancient classical writers as Aśvaghosa in his Buddhacarita (I. 46).[6] The first verse in Prof Edgerton's reconstructed Pañcatantra performs obeisance to Manu, Brhaspati, Sukra, Parāśara and his son and Cānakya as the authors of nrpasāstra (science of kingship) Another name is *Dandanīti*. The Sāntiparva (59. 78) explains why Dandanīti is so called viz 'this world is led (on to the right path) by danda (the power of punishment, sanction) or this science carries (or sets forth) the rod of punishment; hence it is called dandanīti and it (faces) pervades the three worlds' In Śāntiparva 69. 76 it is stated that 'Dandanīti controls the four varnas so as to lead them on to the performance of their duties and when it is employed by the ruler properly, it makes them desist from adharma'[7] Śānti 63. 28 identifies Dandanīti with rājadharmas The Kautilīya (I. 4) explains 'Danda is the means of the stability and welfare of Anvīksikī, Trayī (the three Vedas) and Vārtā; the rules that treat of danda are called dandanīti, which is a means of acquiring what has not been acquired, which safeguards what is acquired, which increases what is guarded and distributes (increased wealth) among the deserving.[8] The Mahābhārata says (Śānti 69. 102) that a wise ksatriya, putting dandanīti in front, should always desire to acquire what is till then unacquired and should guard what is acquired.[9] The Nītisāra (II. 15) says that *dama* (control or chastisement) is called danda, the king is called 'danda' because control is centered in him; that the nīti (rules) of danda is called dandanīti and nīti is so called because it leads (people).'[10] Śānti (69. 104) says that dandanīti is the special concern of the ksatriya (rājan). It is said in the Vanaparva 150. 32 that without Dandanīti this

whole world would break all bounds Vide also Śānti 15.29, 63.28, 69.74 ff (eulogy of Dandanīti) Dandanīti is said to be the support of the world (Śānti 121 24) and to have been produced by Devī Sarasvatī (Śānti 122 25)

Arthaśāstra has been a synonym for dandanīti When the Āp. Dh. S. II. 5 10 16 requires the king to appoint as purohita a brāhmana well-versed in dharma and artha, it is clear that Āpastamba has in view dharmaśāstra and arthaśāstra The Anuśāsanaparva says that Brhaspati and others composed arthaśāstras (39.10–11) Dronaparva 6 1 speaks of a science of artha composed by Manu (*Mānavī arthavidyā*) Vide Jayaswal in 'Manu and Yājñavalkya' (pp. 5, 7, 16, 25, 26, 41, 42, 50, 84, for Manu and Artha) Śānti (71 14) states that a king whose sole concern is with arthaśāstra does not secure dharma and kāma and that all the wealth of such a king vanishes in (the pursuit of) improper objects. Vide Śānti 302 109 which speaks of arthaśāstra as resorted to by the best among kings. The Rāmāyana (II 100. 14) states that Sudhanvā, Upādhyāya of Rāma, was an adept in arthaśāstra. The arthaśāstra of Kautilya starts with the statement that it is the quintessence of all the arthaśāstras composed by former teachers in the whole world and at the end Kautilya states that that śāstra which is a means of acquiring and guarding the earth is arthaśāstra This mentions two of the four objects of dandanīti stated in the Kautilīya itself (as shown in *n* 8 above) Only two objects are mentioned by Kauṭilya (as in Śānti 69 102) since they are the first and principal ones to be gained by the practice of the science of government. It is not meant that there was, as regards the topics to be dealt with, any distinction between Dandanīti and Arthaśāstra The four objects mentioned by Kautilya are always placed before the ksatriya by Manu (VII. 99–100), Śānti 102 57 and 140 5, Yāj. I. 317, Nītisāra I 18 (while I. 8 mentions only two purposes of rājavidyā) At the end (XV 1) Kautilya states '*artha* is the sustenance of human beings, that is, the earth peopled by men That śāstra which is a means of acquiring and guarding that earth is arthaśāstra' Men derive their sustenance from the earth and all wealth also arises from the earth. Mr Jayaswal (Hindu Polity p 5) is not right when he translates 'Artha is human population' Vide U Ghoshal's 'Hindu Political Theories' p 74 n and p 76 for the various interpretations of this passage by Jayaswal and others Authors a few centuries later than both the Mahābhārata and the Kautilīya treat the two as

identical. Dandin in his Daśakumāracarita (VIII.) expressly says that Visnugupta composed his work on dandanīti for the Maurya king in 6000 ślokas, though the Kautilīya states at the very beginning that the work is an arthaśāstra Dandin in the same context refers to 'Arthaśāstras as helping to polish the intellect' and speaks of some of the predecessors mentioned by Kauṭilya as writers on the śāstra (viz. the Arthaśāstra).[11] The Amarakośa treats the two as identical.[12] Medhātithi on Manu VII. 43 holds that the word 'Dandanīti' therein refers to the works of Cānakya and others The Mitāksarā on Yāj. I. 313 paraphrases daṇḍanīti by arthaśāstra and on Yāj. I. 311 explains daṇḍanīti as the lore useful in the acquisition and guarding of wealth (only the two objects mentioned by Kautilya in connection with arthaśāstra) According to the Śukranītisāra (IV. 3 56) 'that is said to be arthaśāstra in which instruction about the conduct of kings and the like is given without coming in conflict with Śruti and Smrti and in which the acquisition of wealth with great skill is taught'.

The words arthaśāstra and dandanīti are applied to the science of government from two different points of view. Artha is defined in the Kāmasūtra (I. 20) as 'education, lands, gold, cattle, corn, domestic utensils and friends and the augmenting of what is acquired' (vide H. Dh. Vol II part I. p. 9 note 22). Therefore when wealth and prosperity of all kinds is the spring and motive of giving a name the science treating of these is called arthaśāstra and when the government of the people and the punishment of offenders are the main ideas the same is called dandanīti. Though works like Kauṭilya's Arthaśāstra place a high value on dharma they are principally concerned with the treatment of central and local government, taxation, the employment of *sāma* and other upāyas, with alliances and wars, appointment of officers and punishment Therefore Arthaśāstra is mainly what is called *drstārtha* smrti, as stated by the Bhavisyapurāna (quoted by Aparārka p. 626, the Smrticandrikā p 24, vyavahāra and Viramitrodaya, *paribhāṣā* p. 19). Medhātithi on Manu VII. 1 explains that dharma in that verse means

11. अधीत्य तावद्दण्डनीतिम् । इयमिदानीमाचार्यविष्णुगुप्तेन मौर्यार्थे षड्भिः श्लोकसहस्रैः संक्षिप्ता । ..... येऽपि मन्त्रककणाः शास्त्रतन्त्रकाराः शुक्राङ्गिरसाविशालाक्षबाहुदन्तिपुत्रपराशरप्रभृतयः &c. । दशकुमारचरित VIII. pp. 131 and 133 (B.S. Series edition).

12. आन्वीक्षिकी दण्डनीतिस्तर्कविद्यार्थशास्त्रयोः । अमरकोश (शब्दादिवर्ग). क्षीरस्वामी derives 'दृम्पतेनेन दृमनं वा दृण्डः स नीयते दृम्यं प्रति प्राप्यते यया सा दृण्डनीतिरर्थशास्त्रम् ।

'duties' (dharmaśabdah kartavyatāvacanah), that the duties of the king are either drstārtha (i e the effects of which are worldly and visible) such as the employment of six *gunas* (sandhi, vigraha &c) or adrstārtha (that have no visible effect but have a spiritual result) such as Agnihotra; here (in chap VII–IX of Manu) the remarks relate principally to drstārtha matters since it is well-known that the word *rājadharma* is applicable to such matters (the six gunas &c) only [12] Medhātithi here declares that the rules of rājanīti are not based on the canonical books of dharmaśāstra but principally on the experience of worldly affairs

Another name for the science of government is Nītisāstra or Rājanītiśāstra Śānti[14] 59 74 says that in the nītiśāstra are set forth all those means whereby people are prevented from forsaking the right path. The Nītisāra of Kāmandaka[15] (I. 6) does obeisance to Vișnugupta who extracted the nectar of Nītiśāstra from the vast ocean of Arthaśāstra (works). The Pañcatantra p 2 holds that Arthasāstra and Nītiśāstra are synonymous The Mitāksarā on Yāj II. 21 remarks that the arthaśāstra referred to by Yāj is rājanītiśāstra that is part and parcel of dharmaśāstra The word 'rājanīti' occurs in Raghuvamśa 17 68 Vide Bhagavadgītā X. 38, Āśramavāsikaparva 6.5, Manu VII. 177, Śānti 111 73, 138,39, 43 and 196, 268 9 and Anuśāsana 163 7 for Nītiśāstra meaning Arthaśāstra or Rājanīti and Drona 152 29 and Śānti 37 9 for the word rājanīti. Another noteworthy word is 'naya' which means 'line of policy' and is employed by the Arthaśāstra (I. 2) when it says 'naya and anaya (bad policy) are treated of in Dandanīti'. It is also used in several classical works, such as the Kirātārjunīya (II. 3, 12, 54, XIII. 17).

The relation of arthaśāstra to dharmaśāstra has now to be understood. As stated above rājadharma is a very important subject of dharma-śāstra Arthaśāstra which is principally concerned with the rights, privileges and responsibilities of the ruler is therefore properly speaking a part of dharmaśāstra As shown above it is supposed to have

like dharmaśāstra a divine source But works on arthaśāstra enter into great details about the government of a country in all its aspects, while dharmaśāstra works generally deal only with a few salient features of rājaśāstra Just as the Kāmasūtra (I 2 14) states that dharma is the highest goal and kāma is the lowest of the three puruṣārthas (vide H. Dh. vol. II part 1 p 9), so Arthaśāstra also sets the highest value on dharma The Kautilya states (III. 1. at end)[16] 'In any matter where there is a conflict between dharmaśāstra and practices or between dharmaśāstra and any secular transaction, (the king) should decide that matter by relying on dharma. If śāstra comes in conflict with any rational and equitable rule then the latter shall be the deciding factor and the (strict) letter of the text will be nowhere'. But Kautilya and other writers on arthaśāstra lay the greatest emphasis on artha In the eager and relentless pursuit of worldly prosperity means may be recommended or followed which may come in conflict with the strictly ethical standpoint of the dictates of dharmaśāstra. In such cases of conflict dharmaśāstra works lay down (e. g. Āp. Dh. I.9. 24. 23, Yāj. II. 21, Nārada, vyavahāramātṛkā chap. I. 39) that dharmaśāstra rules are to be preferred to the dictates of arthaśāstra. Viśvarūpa (on Yāj. II. 21) states that according to some predecessors of his the conflict between the dictates of dharmaśāstra and arthaśāstra is illustrated as follows. Manu VIII. 351 (which is the same as Viṣnu-dharmasūtra V. 190 and Matsyapurāṇa 227. 116-117) when dealing with vyavahāra (a subject that pre-eminently belongs to arthaśāstra) provides that in killing an *ātatāyin*, no fault attaches to the killer: while Manu XI. 89 in the chapter on prāyaścittas (which is pre-eminently a topic of dharmaśāstra) states that no penance is prescribed (i. e. there is no prāyaścitta for removing the guilt) when a person of set purpose kills a brāhmaṇa. The result is that the latter rule prevails and sin is incurred by killing a brāhmaṇa even if the latter be an ātatāyin (though there may be no punishment by the king). Viśvarūpa does not accept

[16]. संस्थाया धर्मशास्त्रेण शास्त्रं वा व्यावहारिकम् । यस्मिन्नर्थे विरुध्येत धर्मेणार्थं विनिश्चयेत् ॥ शास्त्रं विप्रतिषेधे धर्मन्यायेन केनचित् । न्यायस्तत्र प्रमाणं स्यात्तत्र पाठो हि नश्यति ॥ कौटिलीय III. 1. p. 150. Prof. K V. Rangaswami Aiyangar gives two inconsistent translations of these verses at pp. 54, 170 of his 'Ancient Indian Polity' (1935). धर्ममूलत्वात्कामफलत्वाच्चार्थस्य धर्मार्थकामानुबन्धायार्थस्य सिद्धिः सा सर्वार्थसिद्धि । कौटिलीय IX. 7. p. 362

this illustration. The Mitāksarā also refers to this example, disapproves of it and gives its own example The Arthaśāstra declares that a king should endeavour to secure friends, since the acquisition of friends is superior to the acquisition of gold and land (as is laid down in Yāj I. 352) The rule of dharmaśāstra is that a king has to dispense justice, being free from anger and avarice and in accordance with dharmaśāstra Therefore when a suit comes before a king he must decide it according to law, even though he may lose the friendship of a person if his decision goes against the latter The Viramitrodaya follows the Mitāksarā Dharmasāstra went by the name of smrti (Manu II 10), while arthaśāstra was treated as an Upaveda The Visnupurāna III. 6. 28, Vāyu 61. 79 and Brahmānda 35 88-89 mention the four Upavedas[17] viz Āyurveda, Dhanurveda, Gāndharvaveda and Arthaśāstra as affiliated to the four Vedas respectively viz. Rgveda, Yajurveda, Sāmaveda and Atharvaveda Kautilya (I. 5) states that the king should listen to the recital of *itihāsa* in the latter part of the day and includes both *dharmaśāstra* and arthaśāstra under itihāsa[18] and requires the minister knowing arthasāstra to advise the king (with examples and precepts derived) from itihāsa and purāna

Though Arthaśāstra is in theory for keeping to the path of dharma, one cannot blink one's eyes to the fact that the Mahābhārata and the Kautilīya both support in several places the adoption of means entirely divorced from all rules of fair dealing and morality In Ādiparva 140 we have a discourse by Kanika said to have been a *mantrin* of Dhrtarāstra and a profound student of Rājaśāstra, which is almost on the same lines as Śāntiparva chap 140 where Bhīsma sets out what lines of policy (*nīti*) should be followed by the ruler in adversity and how he should give up all thoughts of kindliness in such straits He is supposed to give the substance of the dialogue between the sage Bhāradvāja and Śatruntapa, king of Sauvīra The whole chapter is full of Machiavellian advice. A few specimens may be set out here One should be very courteous in speech, but like a razor at heart (verse 13); one desirous of prosperity may fold one's hands, may take an oath, may use

17. आयुर्वेदो धनुर्वेदो गान्धर्वश्चेति ते त्रय । अर्थशास्त्रं चतुर्थं च विद्या अष्टादशैव ता. ॥ विष्णुपुराण III 6 28 quoted by अपरार्क p. 6

18 पश्चिमामितिहासश्रवणे । पुराणमितिवृत्तमाख्यायिकोदाहरण धर्मशास्त्रमर्थशास्त्रं चेतीतिहासः । कौटिलीय I. 5. p. 10.

sweet words, place his head on another's feet and even shed tears, one may carry on one's shoulders one's enemy till one accomplishes one's object and when a fit opportunity arises should break him like an earthen pot on a stone (17–18); the king should raise hopes promising their fulfilment at a distant day, but should put obstacles in the fulfilment of the hopes raised in others (32); when one is reduced to a wretched state one may extricate oneself from it by any act whatever whether gentle or horrible and practise dharma after one becomes able to do so (38); one should inspire confidence in one's enemy by some means which appear to be true (to the enemy), but one should strike him down at the right moment when he takes a wrong step (44); whoever causes obstacles to the purpose of the king, whether son or brother or father or friend, should be killed by the king who desires to prosper (47); without cutting the vitals of others, without committing horrible deeds and without killing indiscriminately as the fisherman in the case of fish one does not secure high prosperity (50); when about to strike one should utter sweet words and even after striking one should use honeyed words; even after severing another's head with a sword one should lament and shed tears (54); if some remainder is left in the case of a debt or fire or enemies, there is a tendency to grow and so no remainder should be left of these (58) It is to be noted that this chapter deals specially with what should be done in difficulties and cannot be supposed to be the real teaching of the Mahābhārata which is generally in line with the higher code of dharmaśāstra It embodied probably the words of earlier arthaśāstra writers like Bhāradvāja. After hearing this discourse on calculated cruelty and deceit Yudhisthira stood aghast and frankly told Bhīṣma that the course of conduct outlined by him did not differ from that of robbers and that he felt bewildered and would not exert himself in the way pointed out In chap. 142 Bhīsma replies to this by saying that he did not base his discourse merely on the sacred texts, but also on reason and the essence was distilled by wise men, that the considered rule of conduct for the king is twofold, viz. straightforward and crooked, that one should not ordinarily employ the crooked course of conduct, but should employ it as against an enemy who employs a crooked policy and effectively meet him by such policy. He further says that *rājadharma* cannot be based on a single source (v. 7) and that policies are to be pursued not merely by reliance on the sacred codes of law but on reason as well

(v 17) and that Indra himself has declared this rule which he derived from Bṛhaspati. In Śānti-parva a weak king is advised to harass a very powerful ruler's state by sword, fire and poison In chap 130 it is stated that the preservation of the state is the paramount consideration and that a king whose treasury is depleted and who is therefore in difficulties may replenish his treasury even by harassing his subjects (except *tāpasas* and learned brāhmanas) In chap 138 it is said that self-interest makes friends or foes and that *aviśvāsa* (putting trust in no one) is the grand line of policy for kings So it is clear that the Mahābhārata was prepared to give up in certain circumstances the strict rules of dharmasāstra for kings and to allow them to pursue devious modes of action that were far from moral i e it tries to effect a synthesis of dharmasāstra and arthasāstra

The Kautilīya also discloses how arthasāstra writers did not shrink from giving advice which, to say the least, was most cruel, selfish and immoral For example, in the section called 'guarding the prince' (Kauṭ I 17) the views of several teachers are set out Bhāradvāja says that princes are of the nature of crabs eating up their parent; so it is better to finish them in secret when they have no love for their father Viśālāksa abhorred this advice as cruel, as unsanctioned murder and as destructive of the seed of ksatriyas and recommended that it was better to keep them confined in a single spot. Vātavyādhi recommended that princes should be made addicted to sensual excesses Kauṭ disapproves of this as living death (for the princes), recommends proper care before conception and after birth and instruction in dharma In Kaut V. 6 Bhāradvāja is quoted as saying that when the king is on his death-bed, the minister may set up the kinsmen of the king and the principal princes against one another, that whoever attacks should be killed by inciting the people against him, or having secretly punished the kinsmen and chief princes and brought them under control, the minister should himself take possession of the kingdom. Kautilya does not approve of this But even he advises (XIV Aupanisadika) the employment of poison, herbs and incantations against those who are irreligious or wicked In I. 18 even Kaut does not shrink from advising that secret emissaries (of the reigning king) may kill an abandoned prince with weapons and poison and in V. 1 Kauṭ. remarks that, when a king cannot openly put down the principal courtiers or chiefs

who are dangerous to the kingdom, he may inflict punishment on them in secret or may induce the brother of the officer to be punished to attack the latter by promising to give him the position and wealth of the officer and then destroy that attacker with weapons or poison saying that he was guilty of fratricide In V. 2 for replenishing a depleted treasury Kautilya coolly asks the king to deprive the temples in the kingdom of their wealth through the superintendent of religious endowments

Sanskrit literature on rājadharma is very extensive. Apart from the meagre materials contained in such ancient dharmasūtras as that of Āpastamba, the following works deserve close study and have been utilized in this section; the Mahābhārata (Vanaparva 150, Sabhā 5, Udyoga 33-34, Śānti 1-130, Āśramavāsika 5-7), the Rāmāyana (Ayodhyā, chap. 15, 67, 100; Yuddha 17-18, 63), Manusmrti VII-IX, Arthaśāstra of Kautilya (which is the leading work on rājadharma), Yāj I 304-367, Vrddha-Hārītasmrti chap VII. verses 188-271, Bṛhat-Parāśara chap. X.pp. 277-285, Visnudharmasūtra III, the Nītisāra of Kāmandaka, Agnipurāna chap. 218-242, Garudapurāna 108-115, Matsya 215-243, Visnudharmottara II, Mārkandeya 24, Kālikā 87, the Nītiprakāsikā attributed to Vaiśampāyana (ed by Oppert), Śukranītisāra (ed by Jīvānanda, 1890), the Abhilasitārthacintāmani or Mānasollāsa (first four vimśatis) of Someśvara, Yukti-kalpataru of Bhoja, Nītivākyāmrta of Somadeva (959 A. D), Bārhaspatyasūtra (ed by Dr. F.W. Thomas), the Rājanītikānda of the Krtyakalpataru of Laksmīdhara (edited from a single ms by Jagadish Lal Shastri at Lahore, 1942), Rājanīti-ratnākara of Candeśvara, Rājanītiprakāśa of Mitramiśra, Nītimayūkha of Nīlakantha, Rājadharmakaustubha of Anantadeva, Budhabhūsana of Prince Sambhāji (between A. D. 1675-1680, ed by Prof. H D. Velankar), Dandanīti of Keśavapandita (edited by V.S Bendrey, Poona, 1943) In recent times there is a deluge of works mostly inspired by the publication of the Kautilīya dealing with ancient and medieval Indian polity in its various branches The most important of these and a few other works independent of Kautilya are mentioned in the note below.[19]

19. Some parts of the Śāntiparva may be later than Kāmandaka's work, since Śānti (123. 11-12) refers to the dialogue of Kāmandaka and Āngarisṭha king of Anga. But it need hardly be said that it is not absolutely necessary to hold that the extant Nītisāra of Kāmandaka is referred to by Śāntiparva.

C. Majmudar, 'Local Government in Ancient India' (1919) by Dr Radhakumud Mukerjee, 'Study in the Economic condition of Ancient India' by Dr Pran Nath, 'Positive Background of Hindu Sociology' (Allahabad, 1914) and 'The Political Institutions and Theories of the Hindus' (1922) by Prof Benoy Kumar Sarkar, 'Sovereignty in Ancient Hindu Polity' by Dr H. N Sinha (London, 1938), 'International Law in Ancient India' by Prof S. V Visvanathan I have to make general acknowledgments to these works for much useful information, particularly to those of K P. Jayaswal and N N. Law. For a list of Mss. on Polity or its sub-topics, vide N N Law's articles in Modern Review for October 1917 to January 1918 and March and June 1918 and for a list of available Mss. and printed works on '*Vārtā*' (economics) vide the same writer's 'Studies in Indian History and Culture' pp 384 ff. In my treatment of *rājadharma* I have generally restricted myself to data derived from Sanskrit works on dharmaśāstra and arthaśāstra and have rarely ventured into works in Pāli. Similarly it has to be borne in mind that the works referred to cover a period of several centuries and further that India is not one country but a continent of which northern India formed one more or less homogeneous unit, while the Deccan formed another and South India formed a third unit. The institutions of these, particularly of the last of the three, differ in many particulars from those of the other two But the authentic data furnished by South India are later by centuries than those supplied by the north and besides are comparatively meagre. Therefore in this work one has to confine oneself principally to Sanskrit works composed in North India or the Deccan.

proposed is to indicate and dilate upon only the fundamental ideas and principles of the several matters falling under rājadharma. Nor is it possible to enter here into formal and lengthy refutations of the several views propounded by Western and Indian writers about the forms and functions of Government and the state of society in ancient India. Most of the modern works referred to in note 19 above are more or less based on the same material in Sanskrit and Pāli, but the emotional or subjective element is different in each case. Some western writers have without very solid foundations indulged in a facile and sweeping generalization that the great Empires of antiquity such as those of the Assyrians, the Babylonians, the Medians and Persians and the Indians were mainly tax-gathering institutions (vide Sir Henry Maine's 'Early History of Institutions' 1875, pp. 384 and 390; and Prof. Rangaswami Aiyangar's 'Ancient Indian Polity' 1935, pp. 5—6 and pp. 66–69 (where passages from T. H. Green and others are cited); while some Indian writers vehemently assert that the Government in Ancient India was always some form of limited monarchy. Both characterisations are in my opinion misleading An endeavour will be made to present from the original texts as true a picture of the polity of ancient and medieval India as it is possible for me to do. It will do no good to label the ancient institutions of India with concepts and terms current in the West during the last one hundred and fifty years or so. Even in the West true democracies or real democratic governments did not exist and the masses in no country had elective popular assemblies or councils before the last quarter of the 18th century. Such assemblies do not exist even now in several countries of Europe Even in the ancient Greek city states the number of slaves who had no voice in the government was several times as large as the free citizens and those states were no democracies at all in the strict sense.[19a] Indian polity has a recorded history of over two thousand years from at least the 4th century B. C Its growth was gradual but its aims and ideals and its main elements have been the same throughout the centuries. India need not feel ashamed or fear

19a. Berolzheimer in 'the World's Legal Philosophies' (tr. by Jastrow, New York, 1929) p. 62 remarks 'Plato approved of slavery unreservedly, finding it a necessary condition for the maintenance of the proper status of the citizen. ... Thus in the maritime and industrial states there was a large slave class; in Corinth, 460000; Aegina, 470000, in Attica (according to the census of 309 B. C.) 400000'.

a comparison of its ideals and theories of State with the ideals and theories of western countries in ancient and medieval times. If western countries could boast of so-called republics and city states in ancient Greece and Rome, India also had several republics in ancient times. The ancient Hindus made their own contributions to political thought, though unfortunately Western scholars of the 19th century like Max Müller, Weber and Roth were concerned most with the Vedic and allied literature and either did not know or ignored the vast literature on politics contained in Sanskrit and Pāli works. Vide 'Some Aspects of ancient Hindu Polity' by Prof. D. R. Bhandarkar (1929) pp. 2–3 for views of Max Muller and others and criticism thereof, also Dr. Beni Prasad's 'Theory of Government &c.' p. 1, U. Ghoshal 'History of Hindu Political Theories' pp. 3–4.

CHAPTER II

SEVEN AṄGAS OF RĀJYA

According to almost all of our authorities a state (*rājya*) is constituted by seven elements[20] viz *svāmin* (ruler or sovereign), *amātya* (minister), *janapada* or *rāṣṭra* (the territory of the State and its people), *durga* (fortified city or capital), *kośa* (accumulated wealth in the ruler's treasury), *daṇḍa* (army), *mitra* (friends or allies). These seven are called *aṅgas* or *prakṛtis* The word prakṛti in works on politics is also used for the constituents of a circle of states (of a maṇḍala) Vide Manu VII. 156 and Kautilya (VI.2). The word also means ministers as in Śukranitisāra II. 70-73 and 'subjects' in Khāravela's Inscription (E. I vol. 20 p.79 l. 4), Nārada (prakīrnaka 5), Raghuvaṁśa VIII. 18. The order in which these are arranged and their names vary a good deal. The quotations given below will indicate how the order differs. The sequence is important for the reason that some of our authorities expressly state that when calamities befall or deterioration sets in each of the seven elements, those that befall each preceding one are more serious for the State than those of each succeeding one (Kautilya VIII. 1, Manu IX. 295). For *janapada* sometimes the word *jana* or *rāṣṭra* is used, for 'daṇḍa' the word 'bala' and the word 'pura' for 'durga'. The Āśramavāsiparva (5 8) speaks of eight aṅgas of *rājya*. According to Sumantu quoted by the Sarasvatīvilāsa (p 46) *daṇḍa* means "punishment bodily or monetary" and 'army' is included under 'kośa'. Sumantu says that th e*svāmin* has to be preserved by himself, the ministers by showing them proper respect, the people by keeping them contented, the fortified capital by abundance of wealth and grain, the kośa by proper expenditure, danda

20. स्वाम्यमात्यजनपददुर्गकोशदण्डमित्राणि प्रकृतयः। कौ. VI. 1, p 257, स्वाम्यमात्यौ जनो दुर्गं कोशो दण्डस्तथैव च। मित्राण्येताः प्रकृतयो राज्यं सप्ताङ्गमुच्यते॥ याज्ञ. I. 353; स्वाम्यमात्यौ पुरं राष्ट्रं कोशदण्डौ सुहृत्तथा। सप्त प्रकृतयो ह्येताः सप्ताङ्गं राज्यमुच्यते॥ मनु IX. 294; स्वाम्यमात्यदुर्गकोशदण्डराष्ट्रमित्राणि प्रकृतयः। विष्णुधर्मसूत्र III. 33; स्वाम्यमात्यसुहृद्दुर्गकोशदण्डजनाः। गौतमसूत्र quoted in सरस्वतीविलास p.45. Vide also शान्ति 69, 64-65, मत्स्य 225. 11 and 239, अग्निपुराण 233. 12, कामन्दक I. 16 and IV. 1-2 The application of the word प्रकृति to these is lucidly explained by Aparārka (p. 588) यतः कार्यमुत्पद्यतेऽवतिष्ठते नियमेन भवति सा प्रकृतिः। यथा हिरण्यं कुण्डलस्य। राज्यं च विना स्वाम्यादिभिर्नोत्पद्यते, उत्पन्नमपि न तैर्विना चिरकालमनुवर्तते। ततो भवन्ति स्वाम्यादयो राज्याङ्गानि।

by following one's dharma, friends by truthfulness. The authorities are agreed that the ruler is the most important or the first of the seven. Kautilya puts the matter very forcibly and realistically when he states that the briefest exposition of the elements of *rājya* is to say that the king is the State [21]. This is really not the same doctrine as that emphasized by Louis XIV of France when he said '*L'Etat c'est moi*'. Kautilya makes his position clear (in VIII. 1) by saying that it is the king who appoints ministers and servants and superintendents, who takes measures of relief against calamities befalling the other prakṛtis and measures of prosperity, that it is he who appoints other ministers when those already appointed are under calamities, that if the ruler is prosperous he transmits prosperity to his prakṛtis, that the prakṛtis bear that character which the king has and that hence the ruler occupies the position of a permanent, never-exhausted centre of power. The Śukranītisāra II.4 remarks that if the king begins to act at his sweet will, it leads to calamities, to loss of ministers and of the kingdom The Sukranītisāra (I. 61-62) compares the seven angās of rājya to the organs of the body viz, the king is the head, the ministers are the eyes, ally the ear, treasury the mouth, the army the mind, capital and rāstra are hands and feet. It is emphasized by Kām. (IV.1–2) that each of the seven elements is complementary to the others, that if the state is defective even in one out of the seven elements it does not pull well. the] Śāntiparva it is stated that it is not possible to say categorically that any one of the seven excels the others in merit, but that at different times a different element assumes importance over others, since that particular element is in the particular circumstances capable of accomplishing the purpose in hand This shows that Manu and the Mahābhārata held that there was an organic unity in the several elements of rājya All must work harmoniously towards one ideal or end Manu (IX 296–297) says this by means of a simile 'Just as among the three staves tied together (by a rope of cow's hair) used by a *sannyāsin* no particular staff is superior (to the others), so among

---

21. राजा राज्यमिति प्रकृतिसंक्षेपः । कौटिल्य VIII 2, तत्कूटस्थानीयो हि स्वामीति । कौ VIII. 1, सप्ताङ्गमुच्यते राज्यं तत्र मूर्धा नृपः स्मृतः । दृगमात्यः सुहृच्छ्रोत्रं मुखं कोशो बलं मनः । हस्तौ पादौ दुर्गराष्ट्रौ (?)—शुक्रनीति I. 61-62, सप्तांगस्यापि राज्यस्य मूलं स्वामी प्रकीर्तितः । राजनीतिप्र. p. 123, सप्ताङ्गस्यास्य राज्यस्य त्रिदण्डस्येव तिष्ठतः । अन्योन्यगुणयुक्तस्य कः केन गुणतोऽधिकः ॥ तेषु तेषु हि कालेषु तत्तदङ्गं विशिष्यते । येन यत् सिध्यते कार्यं तत्प्राधान्याय कल्पते ॥ शान्तिपर्व ; मनु IX 296-297 contain almost these very words and ideas मत्स्य 239 1 has परस्परोपकारीदं सप्ताङ्गं राज्यमुच्यते ।

the seven elements of the state no particular one can be said to excel the others, since each of them has a particular excellence of its own; a particular element is pre-eminent in some particular matter and therefore the superiority of one to the others when expressed (as e. g. in Manu IX. 295) is to be confined to that matter alone.' Manu here emphasizes the harmonious working or unity of the seven elements though they are diverse in their individual characters. The analysis of the elements and nature of the State led ancient Indian writers to hold that a mere conglomeration of people did not by itself constitute a State, but that for a State there must be people who live within certain definite geographical limits (rāstra), they must be bound by the bond to render allegiance to a ruler (svāmī), have a certain system of government (amātya), must have a regulated economic system, a force for defence and international relationships. That is, the most essential elements of a state are (1) a sovereign, (2) a system of government, (3) a definite territory and (4) a population of some size. These four were known even to the most ancient sūtras. Vide Gaut. XI. 1 (rājā), Āp. II. 6. 25. 10 (amātya), Āp. II. 10. 25. 11, II. 10. 26. 4 (visaya, nagara, grāma), Gaut XI. 5–8 (prajā).

These seven elements will now be dealt with one after another.

It should be noted that neither Kauṭilya nor Kāmandaka defines *rājya*. Etymologically it means the 'karma' or 'bhāva' (activity or state of a king)', being derived from 'rājan' with the affix 'ya' (syañ or 'yak', acc. to Pāṇini V. 1. 124 and 128). This is the etymological meaning. But 'rājya' is employed in the sense of 'kingdom' in popular parlance and also in the smṛtis and works on polity as in Manu VII. 111, Kām. XIII. 81–82. But when it is said that 'rājya' has seven elements then 'rājya' has a very wide meaning and stands for the king, the ministers, the country and its people and the economic and military resources and in such a case it is proper to translate the word as 'the State' (as including both the Government and the governed). In some cases 'rājya' should be rendered as 'government' which includes only the king and his ministers and conveys also in modern times the agency or machinery through which the will of the State is formulated, realized or carried out; vide Mānasollāsa II. 8, verses 688, 689, 691 The Nītivākyāmṛta (p. 43) says "rājya means the activity of the ruler that would be appropriate to protecting the earth".

Medhātithi on Manu VIII. 1 remarks that *rājya* means 'a prosperous people'. In XIII. 4 Kauṭilya states (*na hyajano janapado rājyam janapadam vā bhavatīti Kauṭilyah*) it as his opinion that a territory without any inhabitants cannot become a *rājya* (a kingdom) or a janapada (as one of the seven elements). Śabara on Jai. II. 3. 3 has a discourse on the derivation of rājya.

Prof. Bhandarkar in 'Some Aspects of Ancient Indian Polity' (pp. 66–89), Jayaswal in 'Hindu Polity' part II p 9, Prof. B K Sarkar in 'Positive Background of Hindu Sociology' Book II pp 34–39 and others maintain that this ancient analysis of rājya into seven elements shows that the idea of the State as an organism, that is, the organic theory of the State was known to Hindu thinkers and that this doctrine of *saptānga rājya*[21a] satisfies the definition of the State given by Bluntschli and others On the other hand Mr Anjaria in chapter IV of his 'Nature and grounds of political obligation in the Hindu state' after pointing out how there are different versions of the organic theory of the state denies vehemently that the Hindu theory can be called a proper organic theory of the State, particularly because the Hindu thinkers did not regard the State as a moral organism, because they attached a permanent stigma of inferiority to large sections of the community on the bare ground of birth and that the Hindu conceptions did not harmonize the authority of the State and the liberty of the individual. It would be far beyond the scope of the present work to enter into any discussion of this problem All that may be said is that Mr Anjaria tilts the balance to the other side too much. The faults he points out in the Hindu theory and practice beset almost all theories of the State almost in all countries. Even in the times of Plato and Aristotle huge populations of slaves had no voice in the affairs of the state Up to the 19th century true democracies never existed even in Europe

The *Ruler*—The necessity of a ruler is forcibly emphasized in several works The Ait. Br. I. 14 says that the gods thought they were worsted because they had no king, that therefore they elected one by consent This shows that military necessities

21a Korkunov in 'General Theory of Law' (tr by W G Hastings, New York, 1922) says 'Bluntschli' assimilates government to the head, as it is the head of the State, the ministry of the interior to the ears, and that of foreign affairs to the nose' (p. 274).

led to kingship. Manu VII. 3 (=Śukranītisāra I. 71) says 'the Creator created the king for the protection of all this world when everything ran through fear hither and thither, as there was then no ruler in the world'. It goes on to say that the Creator proceeded to create Daṇḍa (the power of punishment) for the sake of the king and that if the king does not sedulously employ daṇḍa for punishing those that deserve it, the strong would torment the weak as fish are fried on a pike or as in water fish devour each other (Manu VII. 14 and 20, the last also showing a variant 'jale' for 'śūle'). This idea of *mātsyanyāya* (the maxim of the larger fish devouring the smaller ones or the strong despoiling the weak) is frequently dwelt upon by Kautilya, the Mahābhārata and other works. It can be traced back to the Śatapatha-brāhmana XI. 1. 6. 24 'whenever there is drought, then the stronger seizes upon the weaker, for the waters are the law', which appears to mean that when there is no rain, the reign of law comes to an end and *mātsyanyāya* begins to operate. Kautilya says 'if daṇḍa be not employed, it gives rise to the condition of *mātsyanyāya*, since in the absence of a chastiser the strong devour the weak' and 'the people overwhelmed by the operation of mātsyanyāya made Manu Vaivasvata their king.' [22] That in the absence of a king (*arājaka*) or when there is no fear of punishment, the condition of *mātsyanyāya* follows is declared by several works such as the Rāmāyana II. chap. 67, Śāntiparva 15. 30 and 67. 16, Kāmandaka II. 40, Matsyapurāna 225. 9, Mānasollāsa II. 20 verse 1295. Numerous works contain eulogies of danda. The king is called daṇḍadhara in many works e. g. in Śāntiparva 67. 16 and Kām. I. 1. Gautama XI. 28 says that the word danda is derived by the wise from the root 'dam' (to control), that he (the king) should control by means of danda those who observe no restraint and (XI. 31) that the instructions of the teacher and the power of punishment (wielded by the king) guard those who violate the rules of varnas and āśramas. The Matsyapurāna [23]

22. (दण्डः) अप्रणीतो हि मात्स्यन्यायमुद्भावयति । बलीयानबलं हि ग्रसते दण्डधराभावे । कौटिल्य I. 4; मात्स्यन्यायाभिभूताः प्रजा मनुं वैवस्वतं राजानं चक्रिरे । कौ. 23 यस्मादृद्दान्तान्दमयत्यशिष्टान्दण्डयत्यपि । दमनाद्दण्डनाच्चैव तस्माद्दण्डं विदुर्बुधाः ॥ शान्ति 15. 3, अग्नि. 226. 16 (reads ०दमयत्यदण्डयान्दण्डयत्यपि), मत्स्य 225. 17 (reads दुर्मदान् दण्डयत्यपि).

225. 17, Agnipurāna 226. 16 and Śāntiparva 15 8 state that danda is so called because it suppresses those that are not restrained (from the root 'dam') and punishes those that are imprudent or ungentlemanlike (from the root 'dand'). Danda is raised to the position of a divinity by Manu [24] VII. 25 (= Vishudharma-sūtra III. 95 = Matsya 225 8), Yāj I. 354, Śānti 121. 15. Danda rules over all people, it protects all of them, danda is awake even when (the guardians of law) have gone to sleep, the wise regard danda as dharma (Manu VII. 18=Śānti 15. 2 = Matsya 225 14-15). The whole world is under the heel of danda, for it is difficult to find a man who is pure by nature (Manu VII. 22 = Śānti 15. 34) The conception of danda is therefore this that the State's will and coercive power keep the individual and nation within the bounds of dharma, punish for breaches and effect the good of the whole The gods, *dānavas*, gandharvas, the rākṣasas and reptiles—these also tend to bring about enjoyment for men because they are pressed down by danda (Manu VII. 23) [25] The Bhagavadgītā (X. 38) identifies danda with the divine Kṛṣṇa 'I am danda in the hands of those who control others, I am *nīti* (i. e. rājanīti) for the conquerors'. For the detailed effects and long eulogies of danda, vide Manu VII. 14-31, Matsya 225. 4-17, Kāmandaka II. 38-44. These eulogies of danda presuppose the theory that people obey law and the dictates of the śāstra through the fear of force or punishment Danda should be neither too severe nor too mild, but should be appropriate to the fault committed (Kaut I. 4, Kāmandaka II 37, Manu VII. 16, Śānti 15. 1ff, Śānti 56 21, 103 34) Śānti 57. 41 advises that one should first secure a king, then wife and then wealth, for in the absence of the ruler there would be no wife nor private property [26] This shows that the institutions of family and private property and the protection of the weak are bound up with the existence of a ruler. Kātyāyana (in Rāja N. P. p. 30) says the king is the

24. यत्र श्यामो लोहिताक्षो दण्डश्चरति पापहा। प्रजास्तत्र न मुह्यन्ति नेता चेत्साधु पश्यति ॥ मनु VII. 25 = मत्स्य 225. 8 = विष्णुधर्मसूत्र '96 'III शान्ति (121. 15-16) has नीलोत्पलदलश्यामश्चतुर्दंष्ट्रश्चतुर्भुजः। ... एतद्रूपं बिभर्त्युग्रं दण्डो नित्यं दुरासदं ॥

25. This appears to be suggested by the words of the Tai Up. II. 8 'भीषास्माद्वातः पवते भीषोदेति सूर्यः। भीषास्मादग्निश्चेन्द्रश्च मृत्युर्धावति पञ्चमः ॥'

26. राजानं प्रथमं विन्देत्ततो भार्यां ततो धनम्। राज्यन्यसति लोकस्य कुतो भार्या कुतो धनम् ॥ शान्ति 57. 41. The first half is आदिपर्व 160. 12 (Cr. ed. 148 12). This verse is said to have been uttered by Bhārgava.

protector of the helpless, the home of the homeless, the son of the sonless and the father of the fatherless

In order to magnify the importance of the kingly office, certain works state that the king has in him parts of the gods. For example, Manu says " the Creator created the king with the essential parts taken from Indra, the Wind god, Yama, the Sun, Agni, Varuna, the Moon and Kubera the lord of wealth and therefore he surpasses all beings by his majesty (VII. 4–5 and compare Manu V. 96); one should not disrespect a boy-king with the thought ' he is a human being (like others) ' for it is a great deity that stands (before people) in human form as a king " (Manu VII. 8 = Śānti 68. 40). This conception goes back to Gautama XI. 32 (' Therefore a king and a spiritual teacher must not be reviled ') and Āp. Dh. S. I. 11. 31. 5 (' he shall not speak harsh or abusive words of the gods or of the king '). Manu VII. 3–4 are the same as Śukranītisāra I. 71–72. The Matsyapurāṇa 226. 1 states that the king was created by Brahmā by taking portions of gods for wielding the power of punishment for the protection of all beings. Manu (IX. 303–311) puts forward a slightly diluted theory, viz. the king should possess the majesty of and imitate in his actions the first seven deities enumerated above with the Earth as the 8th and Manu sets out what the eight characteristic actions are. Matsya 226. 9–12 are the same as Manu IX. 303–306. The Agnipurāna (226. 17–20) states that as the king exercises the functions of nine deities viz. the Sun, the Moon, Vāyu, Yama, Varuna, Fire, Kubera, the Earth and Viṣṇu he has the form of these. Vide Śukranītisāra I. 73–79 for similar ideas. These verses do not amount to the express theory of divine origin, but assimilate by analogy the king's functions to those of certain deities. The Nārada-smṛti (prakīrnaka section, verses 20–31) contains [27] several interesting dicta. It says that in the form of the king it is really Indra himself who moves about on the earth (v. 20), that a king even when devoid of qualities deserves honour from the people, that kings exercise the functions of five deities viz. of Agni, Indra, Soma, Yama

27. राजेति सञ्जरत्येष भूमौ साक्षात्सहस्रदृक् । प्रजाना विशुणोप्येवं पूज्य एव प्रजापतिः ॥ पञ्च रूपाणि राजानो धारयन्त्यमितौजसः । अग्नेरिन्द्रस्य सोमस्य यमस्य धनदस्य च ॥ अशुचिर्वचनाद्यस्य शुचिर्भवति मानवः । शुचिश्चैवाशुचिः सम्यक् कथं राजा न दैवतम् ॥ नारदस्मृति, प्रकीर्णक 20, 22, 26, 52, इन्द्रमेव प्रब्रुवते यद्राजानमिति श्रुतिः । यथैवेन्द्रस्तथा राजा संपूज्यो मूर्तिमिच्छता ॥ शान्ति. 67. 4; कात्यायन says ' सुराध्यक्षश्च्युतः स्वर्गान्नृप-रूपेण तिष्ठति । कर्तव्यं तेन तत्रेत्यं येन तत्त्वं समाप्नुयात् ' ॥ quoted by राजधर्मकाण्ड III p. 16. तत्त्वं means सुरेशत्वम्.

and Kubera (vv. 26–31). The Mārkandeyapurāna (27. 21–26) mentions the same five deities. 'The Veda says that when a king is chosen it is Indra himself that is chosen; one desirous of prosperity should honour the king just as one worships Indra'—says Śānti 67 4 Śānti 69 states that all the gods are invisible, but the king is a deity that can be seen. The Vāyupurāna (57. 72) remarks [28] that in all past and future *manvantaras* universal emperors (*cakravartin*) are born on the earth with parts of Visnu. The Matsyapurāna (226. 1–12) mixes up the theory of the creation of the king from parts of the gods with the lesser idea of his functions being similar to those of certain deities The Bhāgavata-purāna (IV. 14. 26–27) states that Visnu, Brahmā, Śiva, Indra, Vāyu, Varuna—these and other gods—exist in the body of the king and that the king is full of (the parts of) all gods. It is to strengthen this conception that ancient ksatriya dynasties and their panegyrists tried to trace for those dynasties descent from the Sun or the Moon and in later times from Fire The practice of addressing the king as 'deva' in Sanskrit dramas is due to the same tendency of the glorification of the royal office Aśoka was styled 'devānām priya' (beloved of the gods) and Kushana emperors like Kaniska and Huviska styled themselves Devaputra (E I. vol I. pp 371 at pp 381 and 386) This phenomenon is not confined to India Alexander the Great and Julius Cæsar had their descent traced to gods and goddesses Alexander was deified during his life-time in 324 B C by the Greek world (vide Cambridge Ancient History, vol. VI p 433) and Cæsar's image was carried among those of the immortal gods Kautilya (I. 13) makes a spy say among pauras and jānapadas 'kings are (in) the place of (perform the functions of) Indra and Yama, since they visibly inflict punishment and bestow favours Even divine punishment affects those who despise them (kings). Therefore kings should not be despised' Hence it must be said that the conception of the divine nature of the kingly office was well-known in Kautilya's days and he was not above recommending the employment of this conception for safeguarding the king's position Vide Rāmāyana, III. 1. 18–19 and VII. 76 37–45 and Mārkandeyapurāna 24 23–28, Visnudharmottara II. 2. 9 for similar ideas The phrase 'nā visnuh prthivīpatih'

28. विष्णोरंशेन जायन्ते पृथिव्यां चक्रवर्तिनः॥ मन्वन्तरेषु सर्वेषु अतीतानागतेषु वै ॥ वायु 57. 72, compare कादम्बरी para 80 about prince Candrāpīḍa 'सर्वथा नमोस्मै रूपान्तरधारिणे भगवते चन्द्रापीडच्छद्मने पुण्डरीकेक्षणाय'.

is well-known and may be interpreted in two ways viz. the ruler of the earth is Visnu incarnated as man or no king is not Visnu i. e. every king is Visnu. The Pañcatantra[29] (I. 120 p. 19) states 'Manu has declared that the king is made up (of parts) of all gods'. The Rājanītiprakāśa is careful to point out that the idea of the king having in him parts of the deities applied only to the mahārāja (the sovereign ruler), while the idea of a ruler doing the functions of five deities applies to vassal kings.[30] For eulogy of the kingly office, vide Manu VII. 6-17, Śānti 63. 24-30, Śānti 68, Kām. I. 9-11, Rājanītiprakāśa pp. 17-31.

But it should not be supposed that this glorification of the king resulted in the full-fledged theory of the divine right of kings or that every king, however bad, was looked upon as a divinity or could do what he liked. In the first place, the Rājanītiratnākara[31] (p. 83) when speaking of the coronation of a prince by his abdicating royal father quotes a verse where the people (*prajā*) themselves are called Visnu. In the second place the king's authority over brāhmanas was limited (vide H. Dh. vol. II. part 1 pp. 139-140). The Gautama-dharmasūtra (XI. 1, 7 and 8) says[32] 'the king rules over all, except over brāhmanas; all, except brāhmanas, should while sitting low on the ground wait upon (worship) him (the king) who occupies a high seat; they (the brāhmanas) too should honour him'. From the time of the Ait Br. (37. 5) the harmony between the king and the brāhmanas and the king's following the advice of brāhmanas had been insisted upon. Vide Ait. Br. 40. 1, Gaut. VIII. 1, XI. 27. Further the Śukranītisāra (I. 70) states that a king who oppresses the subjects and causes loss of dharma is made up of the parts of *rākṣasas*.[33] Manu (VII. 111-112) states that

33. यो हि धर्मगरो राजा देवांशेभ्यश्च रक्षसाम् । अंशभूतो धर्मलोपी प्रजापीडाकरो भवेत् ॥ शुक्रनीति I. 70; नीचहीनो दीर्घदर्शी वृद्धसेवी सुनीतियुक् । गुणिज्ञस्तु यो राजा स ज्ञेयो देवतांशकः । विपरीतस्तु रक्षोंशः स वै नरकभाजनः । नृपांशसदृशा नित्यं तत्सहायगणाः किल ॥ शुक्रनीति. I. 86-87.

the king who harasses his subjects loses his life, family and kingdom Moreover stories of kings killed for their tyranny are found in the ancient Literature. For example, Vena, who was jealous of the gods, wanted sacrificial offerings to be made to himself (and not to the gods) and violated dharma, was killed by the brāhmanas (Śāntiparva 59 93–95, Bhāgavata-purāna IV. 14) The Anusāsanaparva [34] (61 32–33) solemnly sanctions the killing of a king in certain circumstances "The people should gird themselves up and kill a cruel king who does not protect his subjects, who extracts taxes and simply robs them of their wealth, who gives no lead Such a king is *Kali* (evil and strife) incarnate That king who after declaring 'I shall protect you' does not protect his subjects should be killed (by the people) after forming a confederacy, like a dog that is afflicted with madness". Manu (VII. 27–28) states that the great principle of *daṇḍa* if properly wielded conduces to the advancement of the three *puruṣārthas*, but if a voluptuous, mean and unjust king wields it, it recoils on his head and destroys the king together with his relations Kām 2. 38 makes it clear that danda foolishly wielded might exasperate even hermits The Śāntiparva 92 19 recommends that a king who has false and very wicked ministers and who puts down dharma should be killed by the people Even as early as the Tai S II. 3 1 it appears that kings were driven away, while the Śatapatha Brāhmana (XII. 9 3. 1 and 3) mentions a king Dustarītu Paumsāyana who had been expelled from the kingdom which had descended to him through ten ancestors The Sautrāmani *iṣṭi* is prescribed as a rite for a king to regain a kingdom from which he had been driven away (vide H Dh vol II. p 1227) Śānti 92. 6 and 9, Manu VII. 27 and 34, Yāj I. 356 appear to justify at least deposing a king, if not tyrannicide Similarly, the Śukranītisāra (II. 274–275) states [35] that a king, though of a noble pedigree, should be abandoned, if he violates dharma, if he hates good qualities (in others), lines of policy and the army and if his conduct would lead to the destruction of the kingdom and that the family priest with the consent of the principal

35 गुणनीतिबलद्वेषी कुलभूतोप्यधार्मिकः । नृपो यदि भवेत्तं तु त्यजेद्राष्ट्रविनाशकम् ॥ तत्पदे तस्य कुलजं गुणयुक्तं पुरोहित. । प्रकृत्यनुमतिं कृत्वा स्थापयेद्राज्यगह्वरे ॥ शुक्र० II. 274–275.

officers of state should place on the throne another scion of the royal family who is possessed of the requisite virtues. Nārada props up the theory of divine right by stating that the king secures dominion over (lit. purchases) his subjects by his austerities (performed in former lives) and therefore the king is their lord (prakīrnaka 25). Śukranīti I. 20 also brings in the doctrine of Karma 'the king holds the earth by the actions of his former lives and by his austerities' Compare Manu VII. 111-112, Śānti 78. 36. The Śukranītisāra (IV. 7. 332-333) says that brāhmanas may even fight and destroy an oppressive ksatriya king and would thereby incur no sin. The Yaśastilaka (III. p. 431) gives examples of kings killed by their subjects, one being a Kalinga king who made a barber his commander-in-chief. In fact in all works on polity we find comparatively little about the king's rights and special privileges, but on the other hand the greatest emphasis is laid on the king's duties and responsibilities. Some works describe the king as a servant of the people whose wages or remuneration for the protection he affords is the taxes he raises. Vide Baud. Dh. S. I. 10. 1, Śukranīti I. 188, Nārada (prakīrnaka 48), Śānti 71. 10.[36] It may be said here that the apparently inconsistent dicta about the divinity of the king and about his being liable to be deposed or even killed for evil deeds are delivered from two different standpoints and are addressed to different persons. The writers believed in maintaining the *status quo* about the duties of varnas and āśramas, in the privileges of the respective castes and in the progressive deterioration of dharma in the ages to come and wanted a strong king to preserve the social order; therefore the king was raised to divinity and absolute obedience to his orders was demanded. This was addressed to the people in general There was danger however of bad kings and ministers oppressing the people by misrule. Hence the king and his ministers were threatened with destruction and death. These dicta were principally meant for the king and his advisers.

In the Kautilīya V. 3 we meet with these words "In Rājasūya and other solemn (or elaborate) sacrifices the '*rājā*' gets three times the salary given to others who are as learned as he is" (samānavidyebhyas-trigunavetano rājā rājasūyādisu

36. अन्यप्रकाराद्धुचिताद् भूमेः षड्भागसंज्ञितात्। बलिः स तस्य विहितः प्रजापालनवेतनम् ॥ नारद् (प्रकीर्णक verse 48); बलिषड्भेन शुल्केन दण्डेनाथापराधिनाम्। शास्त्रानीतेन लिप्सेथा वेतनेन धनागमम् ॥ शान्ति 71. 10; स्वभागभृत्या दास्यत्वे प्रजाना च नृपः कृतः। ब्रह्मणा स्वामिरूपस्तु पालनार्थं हि सर्वदा ॥ शुक्रनीति I. 188.

kratusu). Jayaswal (in 'Hindu Polity' part II. p 136) seizes upon this passage to show that the king was a salaried person like the prime minister or the commander-in-chief The words 'in Rājasūya and other *kratus*' should have raised doubts in his mind about his interpretation, but he entirely missed the significance of the passage Kautilya in that passage is *not* referring to the king himself but to his representative or deputy when the king is engaged in numerous ceremonial duties during sacrifices of long duration like the Aśvamedha The Āp Śrautasūtra (XX 3. 1–2), Baudhāyana Śrauta XV 4, Satyāsādha Śr. XIV. 1 24–25 state that the *adhvaryu* priest was to deputize for the king when the latter was engaged in the Aśvamedha [37] (which was spread over a period of about two years) The salary referred to by Kautilya is to be paid to the adhvaryu when representing the king Vide H Dh vol II p 1232 for this. In X. 3 it is said by Kautilya that a virtuous king on the eve of a battle should urge on his soldiers the fact 'I am a wage-earner like yourselves, this kingdom is to be enjoyed by me along with you You have to strike down the enemy pointed out by me" [38] Here the theory of the king being a wage-earner or a servant of the State is emphasized in a striking manner.

The word 'rājan' is derived in the Nirukta (II. 3) from the root 'rāj' to shine, but the Mahābhārata (Śānti 59. 125) likes to say that the king is styled 'rājā' since he keeps all people contented, that is, it derives the word 'rājan' from the root 'rañj'. Great poets like Kālidāsa (Raghu IV. 12) follow the Mahābhārata in this, as also in deriving the word 'ksatriya' from 'ksata' and the root 'trai', meaning one who protects from wound and injury (Śānti 59 126 and Raghu-vamśa II. 53) Br. quoted in the Rāja Dh K. (I p 5) appears to derive the word both from 'rāj' and 'rañj' (balena caturangena yato rañjayati prajāh | dīpyamānah sa vapusā tena rājābhidhīyate).

There are in our authorities germs of several theories about the origin of kingship Rg X 173 (which corresponds to

37. अत्र ये क्षत्रस्याभिषेक्तारस्तेऽध्वर्युमाभिषिञ्चन्ति । स आह । ब्राह्मणाश्च राजानश्चाध्वर्युरेतौ द्वा संवत्सरौ राजा भविष्यति तस्य शुश्रूषध्वं यो द्वास्य न शुश्रूषिष्यते सर्वस्वं तं जारयन्तीति । अथाध्वर्युरेतौ द्वौ संवत्सरौ राजा भवति । यजमान इतीतरमाचक्षते । कौ. श्रौ. XV. 4

Atharvaveda VI. 87 and 88. 1–2) has been taken as an election hymn by some writers (e. g Jayaswal in 'Hindu polity' p. 7). But one is constrained to say that it is probably nothing of the kind The only words that may lend some colour to the theory of election are 'let all the people desire thee (as king)' in Rg. X. 173. 1, but those words may apply as a benediction even in the case of one who is already a king. In the Atharvaveda III. 4 2 there[39] is a reference to the election of a king by the people 'the people (viśah) chose thee to govern the kingdom, these quarters, the five goddesses (chose thee)'. In Atharvaveda III. 5, 6 and 7 also there is a faint allusion to the election of a king by nobles, king-makers, sūtas and headmen of villages, by the clever makers of chariots and the skilled workers in metals. These 'king-makers' are called 'ratnins' in other Vedic texts and the Tai. Br. I. 7.3 states in connection with the twelve offerings in the Rājasūya called 'ratninām havīmsi' that the 'ratnins' give the (rāstra) kingdom (to the king). Vide H. Dh. vol. II. p. 1215 n 2648 and p. 1216 for the 'ratnins'. So it appears that the conception was that the king got the kingdom from nobles, high functionaries and the common people. For the coronation bath (and its implications) mentioned in the Ait. Br. vide note 105 below. The Ayodhyākānda (chap. 1 and 2) describes how Daśaratha when he grew old desired to make his eldest son Rāma the Crown Prince (yuvarāja), how he called together an assembly of vassal kings, citizens and rural inhabitants and placed before the assembly his idea, how they acclaimed loudly the old emperor's proposal and readily gave their consent. This shows that though kingship became hereditary in course of time some element of popular approval was sought for. But such passages referring to the approval of the people cannot be stretched to mean that the king was chosen by a parliament the members of which were elected by the people. All that happened appears to have been only this that citizens that approved assembled spontaneously and expressed their feelings in the assembly. In the Rāmāyaṇa II. 67. 2 it is said that when Daśaratha died sages like Mārkandeya and Vāmadeva declared along with the *amātyas* in the presence of the family priest (purohita) Vasistha that as Rāma and Laksmana had gone into exile and Bharata and Śatrughna were in the Kekaya country, some scion

39. त्वां विशो वृणतां राज्याय त्वामिमाः प्रदिशः पञ्च देवीः । अथर्व III. 4. 2; ये राजानो राजकृतः सूता ग्रामण्यश्च ये । उपस्तीन् पर्ण मह्यं त्वं सर्वान्कृण्वभितो जनान् ॥ अथर्व III. 5. 7.

of the Iksvāku race should be chosen as king These sages and ministers are spoken of as king-makers ('rāja-kartārah') here and in chap. 79 1. In the Ādiparva 44. 6 it is stated that all the citizens of the capital in one voice elected Janamejaya, though a boy, as a king on the death of Parīksit and Janamejaya ruled with the help of his ministers and purohita There are historical examples of the election of kings The *ksatrapa* Rudradāman was elected king by the people of Surāstra (who at one time formed a republic, acc to Kautilya XI. 1) and he took an oath as stated in his Junagadh inscription in the year 72 (150 A D) [40] Vide E I Vol. VIII p 36 at p 40 Gopāla, the founder of the Pāla dynasty of Bengal (730–740 A D.), was elected a king (E I Vol IV. p. 243 at p 248 and Jayaswal's 'History of India,' 150–350 A. D. pp 44–45) It appears that it was the business of the chief ministers and brāhmanas to propose somebody as king and such persons were called 'rājakartārah'. In Ayodhyā 67. 8 they say 'our country is without a ruler and may therefore encounter disaster'. Arājaka does not necessarily mean in Ayodhyā 67 anarchy but a condition in which there is no king nor ruler. Though this is so, it is not possible to agree with Mr. K P. Jayaswal ('Hindu Polity', part I, pp 97–98, 134, 173) that 'arājaka' was 'an idealistic constitution, that it was an extreme democracy almost Tolstoian in ideal, that it was based on a legal and communal basis, that it was a case of extreme individualism in which government itself was regarded as an evil' Ayodhyā 67 8–31, Ādi 41 27 ff, Śānti 67 3 ff, Matsyapurāna 225. 8–9 are the principal passages on arājaka. A perusal of these will convince any one not carried away by the over-patriotic desire to find the latest European thought in our ancient books that *arājaka* was viewed as a state of chaos and the negation of any constitution; that when a country was without a ruler, no private property in anything existed or was respected and people preyed upon each other like fishes (Ayodhyā 67 31) and that no Tolstoian ideals were present before the eyes of the writers that drew such a harrowing picture of a State without a ruler The famous Chinese traveller Hiouen Thsang notices (vide Beal's Buddhist Records of the Western World, 1884, vol I pp 210–216) that when Rājyavardhana was

treacherously murdered by king Śaśānka, the great minister Bhandin (who was also a cousin of Harsa) called an assembly of ministers and made to the young Harsavardhana a proposal to assume the royal authority, which proposal was backed up by all the ministers and magistrates, that thereupon Harsa agreed to become king after consulting the oracle of Avalokiteśvara Bodhisattva. After the death of Parameśvaravarman II (of the Pallava dynasty), when the Pallava kingdom was subject to anarchy, the subjects chose a king. For the details of this election, vide the important constitutional document of the Vaikuṇṭha Perumal temple (Dr. C. Minakshi's 'Administration and Social life under the Pallavas', 1938, p. 38). The Rājataraṅginī narrates (V. 461–463) that Yaśaskara who was originally a poor man was chosen as king by the brāhmaṇas.

In some other places a theory somewhat like the theory of social contract expounded by Rousseau is adumbrated. The theory of social contract is presented in modern times under two forms. In one there is supposed to be a tacit or explicit agreement between the Government and the people. In the 2nd form it is supposed that a political society was constituted by a compact among individuals (to which the ruler was not a party). This theory puts forward the notion that government depended on the consent of the people. Kautilya (I. 13) refers to the legend that Manu Vaivasvata was made a king by the people, who agreed to assign one-sixth of the grain raised by them as the king's share in return for the protection afforded by him. But Kauṭilya is silent as to whether Manu made any promise to the people. Śāntiparva, chap. 59, states how Vainya, the first king, was called upon by the gods and sages to take an oath and how he promised them that he would protect the world, and would carry out his duties as laid down in the science of government and not act at his sweet will.[41] When this theory of an agreement between the king who took an oath and the people spread among the people, the theory of the divine right of kings, if ever seriously held, would recede more and more into the back-ground. Vide Dr Beni Prasad's 'Theory of Government in Ancient India' chap. VIII and 'Pre-Buddhist India' (1939) by Mr R N. Mehta, chap. II pp. 79 ff. and 101 for election of

41. प्रतिज्ञां चाभिरोहस्व मनसा कर्मणा गिरा। पालयिष्याम्यहं भौमं ब्रह्मेत्येवाह चासकृत् ॥ पश्चात्र धर्मो नीत्युक्तो दण्डनीतिरुपाश्रयः । तमशङ्कः करिष्यामि स्ववशो न कदाचन ॥ शान्ति 9. 106–108.

kings and for Buddhist theories of government. It is not possible to hold as Jayaswal, U. Ghosal and others do (e. g. 'Manu and Yājñavalkya' II, 'Hindu Polity' part II pp 54-57) that the theory of social contract was the earlier one and that the theory of divine right of kings was later on propounded by the Manusmṛti to support the brāhmaṇa empire of Pusyamitra. Jayaswal is wrong in saying (in 'Hindu Polity' part II p. 57) 'the theory of the Mānava was never approved or adopted by a single subsequent law-book'. It has been shown above that Nārada and others espoused the same theory. Manu himself eulogises the supreme power of danda over the king himself (Manu VII. 28). He makes use of both the theories as occasion demands

The germ of the theory of Divine Right of kings probably goes back even to the Ṛgveda. Ṛg IV. 42 is a hymn of king Trasadasyu, son of Purukutsa. Some of the ideas therein are startling enough. He says 'the gods rely on the might of Varuna, while I am the lord of the people (verse 1, *kratum sacante Varunasya devā rājānu kṛṣṭeḥ &c*); I am Indra and Varuna, I am the wide and the deep Heaven and Earth, I am the son of Aditi (verses 3 and 4)'. Here there is an explicit claim by a king to be identical with the mightiest and greatest gods of the Vedic pantheon. In the Atharvaveda VI. 87. 1-2 it is said about the king 'May all the people long for you, may not the kingdom be lost from your hands, may you stand firm in the world like Indra and may you uphold the kingdom' In the Śatapatha Brāhmaṇa V. 1 5. 14 (when describing the shooting of arrows in the Vājapeya) it is said 'the *rājanya* is most manifestly of Prajāpati, while being one he rules over many'. Here the position of the rājanya appears to be regarded as due to his being the representative of Prajāpati. In the Śat Br V. 4. 3 4 the sacrificer in the Rājasūya is identified with Indra and it is said that that position is due to two causes viz. (1) his being a member of the kṣatriya order and (2) his participating in a solemn sacrifice. But passages like the last and Śat. Br V. 1. 3 4, V. 1. 4. 2, V. 2. 2. 14 *should not* be relied upon in support of the theory of the divine right of kings (as done by U. Ghoshal in 'Hindu Political Theories', pp. 28-29), since every participator (whether a brāhmaṇa or a ksatriya) in such solemn sacrifices as the Agnistoma and Vājapeya was supposed to possess a celestial body after *dīkṣā* and Pravargya and was often spoken of as identified with Indra and other gods Viśvarūpa on Yāj. I. 350 quotes a long vedic passage (*āgama*) in which it is stated "the gods said to Prajāpati 'we shall arrange for a king in human

form by taking from the moon, the sun, Indra, Visnu, Vaiśravana (Kubera) and Yama respectively majesty, brilliance, valour, victoriousness, liberality and control" and that the king thus formed asked the gods to give to him Dharma as his friend and that then he would protect the people and then the gods made Dharma (i. e. danda) his friend.

We may examine the theories of the origin of kingship in the Mahābhārata. The Śāntiparva deals with this subject in two places, in chap. 59 and 67. In chap. 59 Yudhisthira asks the great warrior and statesman Bhīsma how the title 'king' arose and how one man, who has fundamentally the same physical and mental equipment as other men, rules over all men. These are not really two questions but only two aspects of the same question. Then Bhīsma starts by saying that there was originally a state of perfection (*Kṛtayuga*) in which there was no king, no kingdom, no punishment and no chastiser. Gradually *moha* (delusion or aberration of mind) spread among people and then greed, sexual desire and passions arose and the Vedas and dharma perished. The gods did not receive offerings and went to Brahmā, who composed a vast treatise as stated above (p. 4) that dealt with the four goals of existence for the benefit of the world and that was the cream of learning. Then the gods went to Visnu and requested him to appoint (as king) one who deserved to be the best among men. Visnu created a son from his mind called Virajas who did not want to be a king. Fifth in descent from Virajas was Vena who destroyed dharma and so the brāhmanas killed him and from his right arm they churned Prthu, handsome, well-armed and proficient in the Vedas, Vedāngas and Dandanīti. Gods and sages asked him to follow settled dharma, to control his senses and to take an oath (set out above in note 41). He was crowned by the gods and sages for the protection of the people. Visnu himself established him saying 'Oh king, no man will go contrary to your order' and then Visnu entered the king Prthu (verse 128) and it is therefore that this world since then bows to kings as to gods. In this account the oath administered to Pṛthu was so administered by the gods and sages and not by the people in the mass, nor does Prthu expressly promise anything to the people as such. Probably it was thought that the promise to the sages was impliedly a promise to the people in general. But the account, such as it is, rather appears to emphasize the divine origin of kingship.

Chap 67 contains a much shorter version of the origin of kingship, probably because a few chapters before another version has already been given or because it embodies the views of some prior work or teacher. It begins by saying that the most desirable thing for a State is to crown a king, that in a kingless country there is no dharma, no security of life nor of property, that therefore the gods appointed kings for protecting people Then it proceeds to say that the people assembled and made compacts (*samayān*) amongst themselves that whoever would commit libel or assault or adultery and break the compacts made by the people should be abandoned. All people went to Brahmā and requested him to appoint a ruler whom they would all honour and who would protect them. Brahmā appointed Manu for that purpose, but Manu did not at first like the idea, saying 'Government is a very difficult business among men who are always deceitful and I am afraid of the sinful acts of men'. The people asked him not to be afraid as the sins committed by men will affect the perpetrators (and not Manu) and that the people would give him shares of produce (one-tenth of grain, one-fifth of cattle, one-fourth of their dharma &c.) Manu then agreed, went round the world, terrorizing evil-doers and making them conform to dharma This story about Manu and the people is alluded to by Kautilya (vide p. 31 above). Even here Manu promises nothing expressly, while the people agree to pay taxes and answer for their own sins. There is no doubt that some of the details in the two chapters are different. In chap 67 there is no reference to an original state of perfection nor to a vast work nor to any oath; so also in one it is Vainya who becomes the first king and in the other it is Manu. But the conception in both is mythological and the fundamental fact in both is the same God gives a king to the people in both, when they were without a king and degeneracy had set in. Though there is no offer to give a share in chap 59 yet it is to be inferred from the *prakṛṣṭā* of Vainya that every subsequent king was deemed to do the same It may be said that in chap 67 there is a blending of the theory of Divine Right and of an original compact between king and people. In both, however, the emphasis is on the theory of the divine origin of kingship Śānti 67. 4 states 'one desirous of prosperity should honour the king as one honours Indra', while chap. 59. 139 asks 'what is the cause but the divine character (the king possesses) on account of which people remain under his control'? It must be said that in both

chapters of the Śāntiparva there is no proper theory of contract between king and people.

The Nāradasmṛti as indicated above (pp. 23, 27 and note 27) is a thorough-going advocate of the theory of divine right. It says (prakīrnaka 20–22) 'It is Indra himself who moves about on the earth as king; people can nowhere live after transgressing his orders. Since the privilege of protection is his because of his supreme power (majesty) and on account of the fact that he is benign to all creatures, the settled rule is that whatever a king does is right. Just as the husband, though weak, must be honoured by the wife, so a ruler though devoid of qualities must be honoured by his subjects'. Verse 25 inculcates the duty of obedience to the king.

According to Mr. J. N. Figgis in his book 'The divine right of kings' (1934) pp. 5–6, the theory of the Divine Right of kings in its completest form involved the following propositions: (I) monarchy is a divinely ordained institution; (II) hereditary right is indefeasible i. e. the right acquired by birth and descending by the law of primogeniture cannot be forfeited through any acts of usurpation, or by any incapacity of the heirs or by any act of deposition; (III) kings are accountable to God alone, i. e. a limited monarchy is a contradiction in terms; (IV) non-resistance and passive obedience are enjoined by God i e in any circumstances resistance to the king is a sin and leads to damnation and that when the king issues a command directly contrary to God's law, the latter is to be obeyed and also all penalties attached to the breach of the king's law are to be patiently borne. This theory was very much to the fore in the 16th and 17th centuries when in Europe theology and politics were in close union.

It is to be seen how far the ancient Hindu theory agreed with this full-fledged theory of the divine right of kings. As regards proposition I it has been shown above that the Manusmṛti, the Mahābhārata and other works held that the king was either God himself, or god's vicar or vicegerent performing functions similar to those of several gods As regards proposition II all Sanskrit works recognised hereditary right and primogeniture, but they allowed exceptions as will be shown later on. Our ancient books did not accept the third and the fourth propositions *in toto*. They say that the king cannot do as he likes, that he has to carry out the dictates of dharma, his

power to make new rules is limited and if he does not act up to the rules of dharma he may be deposed, disobeyed or killed. Vide quotations from Śukranīti and Anuśāsanaparva cited above. When Manu (VII. 111–112) says that a king who harasses his kingdom loses his life, his family and his kingdom, it is implied that people are not bound to suffer silently all the wrongs heaped upon them by a bad king but that they may turn round and either depose him or kill him. Fick (pp. 103–104) gives examples from the Buddhist Jātakas where bad kings were killed by the people and others were elected in their place There is no doubt that obedience to the king is enjoined by Nārada and others, but it is due to the king only so long as he does not swerve from the path of right and virtue. Nārada[42] (prakīrnaka verses 12 and 32) says 'on account of his majesty and sanctity a king and brāhmana are not to be abused if they do not swerve from the right path; one should not treat with contempt or scold the king, one should abide by his order, since (the penalty of) death may follow from violating it (king's order)'. Here the duty of obedience is not based on the divine origin of kingship, but on the practical wordly ground that an offended king may punish with death Nārada's doctrine does not lead to the requirement of absolute submission and non-resistance to a wicked king.

It is impossible to hold that the theory of divine right was put forward as a counterblast to the theory of social contract. The theory of divine right would arise very naturally even in the oldest days, while the theory of social contract is the produot of a more advanced stage of political thought. The theory of divine right is not more absurd than the theory of social contract and was popularly held not only in India, but in many Christian countries, relying on passages in the Bible such as Daniel 4 and Romans 13. 1–7. The theory of divine right was circumscribed in India by another theory from very ancient times The cry of the American colonists against England in the 18th century was that taxation and representation went hand in hand; that of the ancient Hindu political and dharmaśāstra writers was that taxation and protection went hand in hand (see n 45). Baud. Dh. S. I. 10. 1. says 'the king being hired for the sixth

42 अनिर्देश्यावनिन्द्यौ च राजा ब्राह्मण एव च । दीप्तिमत्त्वाच्छुचित्वाच्च यदि न स्यात्पथश्च्युतः ॥ तपःक्रीता प्रजा राज्ञा प्रभुरासा ततो नृपः । ततस्तद्भक्तिसि स्थेय वार्ता चासा तदाश्रया ॥ तस्मात् तं नावजानीयाज्जाकोशेच्च विशेषतः । आज्ञापा चास्य विहित मृत्यु· स्यात्तद्व्यतिक्रमात् ॥ नारद (प्रकीर्णक 12, 25, 32) Vide Manu VII. 12–13, Gautama XI. 32. (rājācāryāvanindyau).

part (that he takes as tax) should protect the subjects'. Yāj. I. 337 states 'The king shares half of that evil which the subjects do when not protected by the king, since he takes taxes (from the people)' and Yāj. I. 334 lays down that a king who protects according to śāstras receives the 6th part of the merit (*punya*) of the subjects. Śāntiparva (57. 44–45) states 'One should abandon six persons like a leaking boat in the ocean viz. a teacher who does not explain, a priest who does not study the Veda, a king who does not protect &c.' Śukranīti I. 121 affirms 'the gods destroy a king who does not protect, a brāhmana who does not perform austerities, a wealthy man who makes no gifts.' Vide Vasistha I. 44–46, Gaut. XI 11, Visnu Dh S. III. 28, Udyogaparva 132. 12, Śānti 67. 27 (4th part of punya), Śānti 24. 12 (4th part), Śānti 72. 20, Āśramavāsi 3.40, Anuśāsana 61.34 and 36, Kām. II. 10 for the idea that the king receives a part (generally 6th part) of the *punya* (and also sin) of the people. The king had to protect even forest hermits who paid no taxes, as he would share in their *punya*[43]. Vide Rāmāyana III. 6. 14. Kālidāsa echoes this in the Śākuntala II. 13 Ādiparva 213. 9 looks upon the king who takes the sixth part as tax and affords no protection as the arch-sinner in the world. Śānti 71. 29 says that the spiritual merit that a king gathers by protection according to the sacred code yields rewards for him in heaven for ten thousand years.

From the preceding pages it is clear that the following are put forward as the grounds on which the obligation to render obedience to the ruler is based: (1) the king has divinity in him, (2) the great utility of the ruler affording protection as regards life, liberty and property, (3) the fear of punishment (Manu VII. 22), (4) a primeval contract between the ruler and the people, (5) the interdependence of the ruler and the people as parts of one organism (viz. the State). Vide Medhātithi on Manu IX. 294 for this last.

Who should be king? There were several views on this point. One meaning of the word 'rājan' is 'ksatriya'. Manu (VII. 1) states that he will declare *rājadharmas* and in the very next verse he employs the word 'ksatriya' and remarks that a ksatriya who has undergone the upanayana *samskāra* (or *abhiseka* according to some commentators) should afford protection to all in his kingdom. Therefore a ksatriya is the most proper person

43. यत्करोति परं धर्मं मुनिर्मूलफलाशन । तत्र राज्ञश्चतुर्भागः प्रजा धर्मेण रक्षतः ॥ अरण्यकाण्ड 6. 14.

to be a king Some of the works such as the Rājadharma-kaustubha, Rājanītiprakāśa, the Nītimayūkha, and Par. M. vol I. pp. 449–451 refer to the discussion in the Pūrvamīmānsā works on the topic of the *Avesti* sacrifice On Jaimini II 3. 3 Śabara and Kumārila hold an elaborate discussion. The Vedic texts say 'rājā rājasūyena yajeta' ('the Rājasūya should be performed by a rājan'). Among the numerous constituents of that sacrifice there is an *iṣṭi* called Avesti, with reference to which a vedic passage says 'if a brāhmana performs avesti, he places the *āhuti* (offering) for Brhaspati in the middle, if a ksatriya performs it the offering to Indra is placed in the middle of the offerings &c.'. The *pūrvapaksa* (prima facie view) is that the word 'rājan' applies to any one (whether a brāhmana, a ksatriya or a vaisya) who protects the people The *siddhānta* (the established conclusion) is that in this text the word *rājan* means a ksatriya and that by the other passage about brāhmanas &c. what is meant is that brāhmanas and vaiśyas may independently perform the Avesti sacrifice, but that only a ksatriya can perform the Avesti as part of the Rājasūya rites. Śabara makes the interesting remark that in the Āndhra country the word 'rājan' is applied to a man of the ksatriya caste even though he does not pursue the occupation of protecting a country or a city; while Kumārila observes that persons of all the four varnas are seen as rulers of kingdoms.[44] In the literature on dharmaśāstra the word 'rājan' is understood in the sense of 'one who rules over or protects a country' (i e the pūrvapaksa view in the Pūrvamīmānsā) Vide Medhātithi on Manu VII. 1. Aparārka[45] (on Yāj I 366) remarks "when he who is not a ksatriya performs the work of a ksatriya (i e becomes a king) he should do all this (that a ksatriya king has to do) since the maxim is 'that by assuming the position or the work of a particular person or thing one receives what is due to that other' and the

44. अवेष्टौ यज्ञसयोगात्कर्तृमधानमुच्यते। जै. II 3. 3, नन्वु जनपदपुररक्षणवृत्तिमनुपजीवित्यपि क्षत्रिये राजशब्दमान्ध्रा प्रयुञ्जते प्रयोक्तारः। शबर (p. 580), तच्च राज्यमविशेषेण चत्वारोपि वर्णाः कुर्वाणा दृश्यन्ते। तस्मात्सर्वे राजानः। तन्त्रवार्तिक p 580

45 एतत्सर्वं क्षत्रियस्य राज्यं कुर्वतः प्रविहितम्। यदा पुनरक्षत्रियः क्षत्रियकार्यं कुर्यात्तदानेनाप्येतत्सर्वमनुष्ठेयम्। तत्कार्यापत्त्या तद्धर्मलाभ—इति न्यायात्। करादानमप्युक्तवाञ्च प्रजापालनस्य। सर्वो हि धनं प्रयच्छत्प्रजात्समवायि प्रयोजनमनुद्दिशति। न च करदानस्य स्वयुक्तेरन्यत्प्रयोजनमस्ति। तस्मात्करमादद्वानेन प्रजापालनं विधेयमिति सिद्धम्। अपरार्क on या. I. 366 This maxim is taken from the महाभाष्य on the first वार्तिक on पाणिनि I 1. 56 'लोके यो यस्य प्रसङ्गे भवति लभतेऽसौ तत्कार्याणि। तद्यथा। उपाध्यायस्य शिष्यो याज्यकुलानि गत्वाग्रासनादीनि लभते' Kielhorn's ed. vol I, p 133. Its form in grammatical works is तत्स्थानापन्ने तद्धर्मलाभः।

duty of protecting the subjects arises from the fact of taking taxes from them. For everyone when giving wealth does so with reference to a purpose related to himself and there is no purpose except one's protection that is intended in rendering taxes. Hence it is established that whoever receives taxes must secure protection of the subjects". According to Kullūka the word 'rājan' means 'any person who is crowned king and protects the country and capital' and is not used in the sense of 'a person of the ksatriya caste'. The Rājanītiratnākara (p. 2) after citing Kullūka and Kāmadhenu states that many hold that 'rājan' means 'any one who takes upon himself the task of protecting the subjects'. The Rājanītiprakāśa holds[46] a long discussion (pp. 10–15), states that the word 'rājan' may have three meanings viz. any one who protects people, a ksatriya in general or a ksatriya who is crowned and ultimately gives it as its opinion that the word 'rājan' is applied in popular usage to any one, whether crowned as king or not, who is the ruler of a country. The Vaijayantī on Viṣṇu Dh. S. III. 44 explains 'rājñām' as 'of ksatriyas' by following the Avesti maxim.

Several brāhmaṇa families founded kingdoms and empires. Puṣyamitra, founder of the Śunga empire, was a brāhmaṇa (Harivaṃśa III. 2. 35 ff, E. I. vol. 20 p. 54); the Kānvāyanas, who followed the Śungas, were brāhmaṇas and so were the Vākāṭakas, the Kadambas (vide Talagunda pillar Inscription of Kakusthavarman in E. I. vol. VIII. p. 24) and several others. Vide H. Dh. vol. II. pp. 122–123 for texts on the question as to when a brāhmaṇa should follow the profession of arms. Manu XII. 100 states that a brāhmaṇa who knows the Veda deserves to be made a king, a commander-in-chief, the wielder of the power of punishment. Kumārila's dictum that persons of all varnas are seen to be rulers has been already quoted. Gopāla the founder of the Pāla dynastry of Bengal was a śūdra. Manu IV. 61 directs a brāhmaṇa not to stay in a country where the ruler was a śūdra. Medhātithi[47] explains this by saying

46. नृपग्रहणेन जनपदैश्वर्यवतोधिकारमाह । प्रमाणान्तरमूला ह्यत्र धर्मा उच्यन्ते न सर्वे वेदमूलाः । मेधा० on मनु VII. 1; तथा विज्ञानेश्वरोपि अभिषेकाद्विगुणयुक्तस्य राज्ञः प्रजापालनं परो धर्मः।तथापि नृपग्रहणसमभिव्याहारादनभिषिक्तेपि जनपदैश्वर्यवति लोकप्रसिद्ध्या राजशब्दो वर्तते। राजनीतिप्र. p 14, अवेष्टिन्यायेन राज्ञां क्षत्रियाणां न पार्थिवानामेव-वैजयन्ती.

47. यो जनपदः शूद्रवशवर्ती तत्र न वसेत् । मन्त्रिसेनापतिदण्डकारिकाद्याः सप्त प्रकृतयो राज्यं यत्र सर्वाः शूद्रजातीयाः तत्र निवासनिषेधोयम् । मेधा. on मनु IV. 61. It is not clear who दण्डकारिक (inflicter of punishment?) is. Should we read दण्डपाशिक (as in the Valabhi plates in E. I XI pp. 83 and 94 or XV. p. 257) or दण्डनायक (as in E. I. IX. p. 289 or E I XX. p. 7)?

that the prohibition applies only to a country where all the seven high functionaries such as the chief minister, the commander-in-chief are of the sūdra caste; compare Ap. Dh. S I. 11. 32. 18. Manu's dictum related to a time when there was hardly any sūdra king. But the logic of facts was too much for Medhātithi who had to twist the plain words of Manu Medhātithi on Manu VIII 1 remarks that 'persons of other varnas who subsist by the mode prescribed for ksatriyas have power over the kingdom and have to protect the people'. Śāntiparva remarks, that whoever protects people from the hordes of dasyus and wields the power of punishment according to smrti rules must be considered as king. The Harivamsa (III 3. 6 'aksatriyāsca rājāno viprāh sūdropajīvinah') and some of the Purānas in depicting the awful degeneracy of the Kali age in a prophetic strain state that the kings in the Kali age will be mostly sūdras and that śūdra kings will celebrate Asvamedha sacrifices Vide, for example, Matsya 144 40 and 43 and Linga-purāna 40. 7 and 42. Hiouen Thsang notices that in the first half of the 7th century A. D Sind was under a sūdra king (Beal's B R W. W. vol II p 272)

It was almost a universal rule that a male alone was to be the ruler. There appear to have been stray exceptions. The Śāntiparva (33.43–46) enjoins[48] upon a conqueror the duty to place on the throne of a conquered country the brother, son or grandson of the vanquished king and if no prince be available, then to crown even the daughter of the late king The Rāja-tarangini (V 249 and VI 332) describes at great length the *regime* of the notorious queens Sugandhā (904–906 A. D) and Diddā (980–81 A D) of Kashmir In India for many centuries there has been no Salic Law expressly declaring that daughters cannot inherit land, though on account of the general position of women, the requirements of disturbed times and military necessity women did not generally assume the role of sovereigns. In a copper-plate grant from Ganjam (of about the 13th century) it is stated that when a certain king named Śubhākara died his queen ascended the throne and after her her daughter Dandi-mahādevī, who is styled 'parama-bhattārikā-mahārājādhirāja-parameśvarī' ruled the earth for a long time (E I vol VI p 133 at p. 138). Whether the grandiloquent titles were deserved by the queen or were only the exaggerated effusions of a courtier,

48 येषां पुरेषु राष्ट्राणि गत्वा राजन् सुहृद्वृत[ः]। भ्रातॄन् पुत्रांश्च पौत्रांश्च स्वे स्वे राज्येऽभिषेचय ॥ ... कुमारो नास्ति येषां च कन्यास्तत्राभिषेचय। शान्ति 33. 43 and 45

it is clear that the widow and daughter of the last male ruler succeeded to the throne. The Raghuvaṁśa (XIX. 55, 57) states that the widowed queen of king Agnivarna sat on the throne and carried on the government with the help of hereditary ministers.

Apart from conquest and election in rare cases, monarchy was hereditary and generally descended by primogeniture. The passage from the Śatapatha Brāhmana (XII. 9.3, 1 and 3) mentioning the descent of kingship for ten generations in succession has already been referred to (p 26) Though succession was hereditary it was the general rule that the eldest son ascended the throne when the reigning monarch died or abdicated. The rights of the eldest son or daughter as against the younger son or daughter were very jealously guarded in the vedic age. It has already been shown how marrying before one's elder brother or sister was condemned in the vedic age and also in the times of the smrtis (H. Dh. II. pp. 546–549). Even the Ṛgveda several times refers to *jyaisthya* (rights of seniority) of Indra (Ṛg. I 5.6, III 50 3). The Tai S. II. 2.11.5 states that the gods agreed to treat Indra as the 'jyestha' (the eldest) and Tai. S. II.[49] 5.2.7 refers to the ancient practice of giving all wealth (of the father) to the eldest son. The Ait. Br. 19.4 narrates the story that the gods did not accept Indra's position as the eldest and most exalted among them and that Indra then induced Bṛhaspati to perform the Dvādaśāha sacrifice for him, whereby he secured that position. The Nirukta II. 10 sets out the interesting story that Devāpi and Śantanu were two brothers, scions of the Kuru family, of whom Devāpi was the eldest, but Śantanu the younger one got himself crowned king and so Devāpi practised austerities. The result was that there was a drought in Śantanu's kingdom for 12 years. The brāhmanas said to him 'You are guilty of having violated dharma in that passing over the eldest brother you got yourself crowned Therefore God does not send down rain' Then Śantanu desired to give the kingdom to Devāpi, who however said that he would be his purohita and make him perform a sacrifice. The Ṛgveda hymn X 98 was then composed by Devāpi for bringing down rain. This story shows how long before Yāska the popular belief was that it was a great sin to

[49] तस्माज्ज्येष्ठं पुत्रं धनेन निरवसाययन्ति । तै सं II 5.2 7. Āp. Dh. S (II. 6. 14 12–13) cites this text and says that it is a mere *anuvāda* and not a *vidhi* and gives it as its own view that sons equally share the paternal wealth.

pass over an elder brother in marriage and other matters and doing so brought down the serious displeasure of the gods. Vide Brhad-devatā VII. 156–157 and VIII. 1–9 for the same story in a little greater detail, viz that Devāpi suffered from a skin disease, that when Devāpi said to the subjects that he did not deserve the kingdom and that Śantanu should be their king, the subjects crowned Śantanu as king When Yayāti desired to pass over his elder sons Yadu and others because they disobeyed him and wanted to make the younger Pūru his successor the brāhmanas and citizens protested 'How can the younger son secure the kingdom passing over the elder one[50]'? Arjuna upbraids Bhīmasena who got enraged against Yudhisthira 'who would act against one's eldest brother that follows the path of dharma?' (Sabhā 68 8). In the Rāmāyana[51] Daśaratha addresses Rāma (II. 3 40) 'you are born of my eldest queen, who is of the same class as myself (i e of ksatriya blood)' and Vasistha says to Rāma 'Among all Iksvākus the eldest son becomes the king; a younger brother is not crowned king when the elder exists' (II 110 36). The Ayodhyākānda in several places (8.23–24, 101.2) reiterates the idea that all the sons of a king do not succeed but only the eldest, although the other sons may be equally fit and endowed with qualities. Kautilya (I 17)[52] states that people esteem rulership going to the eldest except in the case of some calamity. Manu IX. 106 says that by the very birth of the eldest son, a man becomes free from the debt he owes to his *pitrs* and therefore the eldest deserves to get everything from the father. The Rājadharma-k. (pp. 234–235) after quoting the Kālikāpurāna and the Rāmāyana lays down the following propositions: (1) the aurasa son of a king alone succeeds in preference to the eleven kinds of secondary sons (whether he is junior or senior in age); (2) if the son of a junior queen (of the same caste) is senior by birth, he succeeds in preference to the son of the senior queen,

50 कथं ज्येष्ठानतिक्रम्य कनीयान् राज्यमर्हति ॥ ... मातापित्रोर्वचनकृद्धितः पञ्चश्च यः सुतः । स पुत्रः पुत्रवद्यश्च वर्तते पितृमातृषु ॥ आदिपर्व 85. 22 and 25 = वायु 93. 79 and 81.

51. ज्येष्ठायामपि मे पत्न्यां सदृश्यां सदृशः सुतः । उत्पन्नस्त्वं गुणज्येष्ठो मम रामात्मजः प्रियः । ... तस्मात्त्वं पुरुषयोगेन यौवराज्यमवाप्नुहि । अयोध्याकाण्ड II 3 39–41. These are quoted in राजधर्मकौ. p 234 and राजधर्मकाण्ड II p. 13 (with variations). इक्ष्वाकूणां हि सर्वेषां राजा भवति पूर्वजः । पूर्वजे नावरः पुत्रो ज्येष्ठो राजाभिषिच्यते ॥ अयोध्या 110 36

52 अन्यत्रापद् ऐश्वर्यं ज्येष्ठभागी (?) हि पूज्यते । कौटिल्य I 17 last verse but one.

who (son) is younger in age; (3) if two sons are born to two queens at the same moment, the son of the senior queen is preferred; (4) if twins are born to the senior queen, the son who is born first is to be preferred.

If the eldest son suffers from a physical or mental defect (such as blindness or lunacy) he is to be passed over and his younger brother becomes king (vide Manu IX. 201 for grounds of exclusion from inheritance). Ādiparva[53] 109. 25 states that Dhrtarāstra because he was blind did not succeed to the kingdom. Vide also Udyoga 147. 39. The Śukranītisāra (I. 343-344) states that if the eldest prince suffers from deafness, dumbness, blindness, leprosy or impotence he is unfit to rule and that in such a case his younger brother or son should succeed.[54] The Śukranītisāra further points out that by dividing a kingdom among the several princes no benefit results, but on the contrary the small parts would fall an easy prey to enemies; therefore when the eldest alone succeeds he should make his younger brothers provincial governors or superintendents over the treasury, horses &c. (I. 346-348). The Rājadharmakaustubha lays down a few additional propositions: (1) even if the eldest does not succeed owing to some mental or physical defect, his son's right will remain intact and R. D K. quotes the words of the fisherman chief to Bhīsma in Ādi 100. 92.[55] The Bālambhatti on Yāj. I. 309 and Rājanītiprakāśa p 40 say the same. Another example is that of Aṅśumān who became king when his father Asamañja was exiled from the state by Sagara for his misdeeds. (2) When a younger son is crowned king because the eldest is disqualified, then after the former's death his son succeeds and not the son of the disqualified eldest son who is born after the coronation of the younger (e g. Yudhisthira deserved the kingdom on Pāndu's death and not Duryodhana). The Nītivākyāmrta (sec. 24 p. 249) lays down the order of succession in the case of kings as follows: the son, full brother, half-brother, uncle, a male of the same family, daughter's son, a stranger (who is either elected or who takes up the kingdom[56]).

56. मृतसोदरसपत्नपितृव्यकुलद्यौहित्रागन्तुकेषु पूर्वपूर्वाभावे भवत्युत्तरस्य राज्यपदावाप्तिः । नीतिवाक्यामृत (राजरक्षासमुद्देश) p. 249.

Sometimes a king selected a younger son to succeed him. There are famous historical examples. The great Gupta Emperor Samudragupta though a younger son was nominated by his father Chandragupta I to succeed and by his brilliant and most successful career Samudragupta more than justified the choice. Vide the Allahabad Pillar Inscription verse 4 (Gupta Inscriptions p 6) Similarly Chandragupta II, though younger, was nominated by his father Samudragupta to succeed himself. Yayāti selected his youngest son Pūru because he was devoted and obedient and the eldest and other sons disobeyed him Vide Adiparva chap 75 ff and above p 42. The principle of hereditary succession was so strong that even a boy king was placed on the throne. Vide Raghu XVIII 39.

In almost all works on rājaśāstra there is a disquisition on the qualities that a good king should possess Vide Kaut VI 1, Manu VII 32–44, Yāj I. 309–311 and 334, Śankha-Likhita quoted in R. D. K III p 14 and Rājanīti-prakāsa p 116, Śānti 57 12 ff. and 70, Kām I. 21–22, IV 6–24, XV 31, Mānasollāsa II. 1 1–9 (p. 29), Śukra I 73–86, Visnudharmottara II. 3 Only one or two passages can be set out here Yāj (I. 309–311 and 334) states 'a king should have great energy, should be generous, mindful of past (good or bad) turns done by others, dependent on those who are advanced (in austerities, knowledge and experience), possessed of a disciplined mind, endowed with an even temper (in good or bad luck), born of a noble family (on both sides), truthful, pure (in body and mind), prompt in action, of strong memory, not mean-minded, not harsh (in words or acts), observant of the rules of *dharma* (as to varnas and āśramas), free from vices, talented, brave, clever in concealing secrets (or acc. to Bhāruchi and Aparārka 'clever in scenting the secrets of his enemies'), guarding the weak points of his state, well-taught as regards logic, the science of government, the science of wealth and the three vedas He should be forbearing towards brāhmanas, straightforward towards his friends, wrathful towards his enemies, and should be (kind) like a father towards his servants and subjects'. Manu VII 32 is very similar to Yāj I 334 The Mit says that the qualities specified in Yāj I. 309–311 are *antaranga* (inward or more essential). The 2nd quality 'sthūla-laksa' occurs also in the inscription of Rudradāman (E. I vol. VIII. at p 44) From I 312 Yāj. states the *bahiranga* qualities viz selection of ministers, purohita and sacrificial priests, gifts to worthy brāhmanas, protection &c.

Kautilya VI. 1 contains several lists of the king's qualities from several points of view. First, there is a list of qualities that make the king win the heart of the people (or make him approachable) viz. being of a noble family, godly, spirited, consulting the aged, virtuous, truthful, not failing in his promises, grateful, taking broad views (not pusillanimous), highly enthusiastic, not given to procrastination, powerful enough to control his feudatories, firm in mind, having a council of ministers of no mean calibre, desirous of self-discipline These are called 'ābhigāmika-gunas' which word occurs in the Palitana plates of Dharasena II (of Valabhi) in E.I vol. XI p 83 and in the Māliya plate of the same king (Gupta Ins. pp. 164, 169). The Daśakumāracarita VIII appears to make a pointed reference to this list when it makes a character say that the king (there referred to) has in him all the qualities beginning from good family (sarvaivātma-sampad-abhijanāt-prabhrti &c.) Then the intellectual qualities he should possess are: desire to learn, study, understanding of what is studied and retaining it, reflection, discussion and devotion to the principles accepted after discussion. Almost the same qualities of the intellect (*dhī*) are mentioned by Kām. IV. 22. The word 'śakyasāmanta' (in Kaut. VI. 1) occurs also in Agnipurāna 239. 4. The qualities that are the different aspects of his enthusiasm (or energy) are: valour, non-endurance (of the might of others), quickness (of action) and assiduity. The same occur in Kām. IV. 23. Then follows a long list of qualities that go to make up the personal endowment of the king (*ātma-sampat*). Gaut. (XI. 2, 4–6) requires that the king should do what is right (acc. to śāstras) and speak (or decide) rightly, should be pure (at heart and externally), should control his senses, be possessed of qualified servants and endowed with knowledge of the means of policy, should be even-handed towards all his subjects and look after their welfare. The long list of Śankha-likhita agrees more or less with those of Kautilya and Yāj. Śāntiparva 70 states that the king should possess 36 qualities, viz. he should not speak bitterly, he should be godly, not wicked, not haughty, of agreeable address &c. Kām. I. 21–22 mentions 16 qualities that lead to the well-equipped personality of the king (*ātma-sampat*), viz. study of śāstra (Daṇḍanīti), intellect, serenity, cleverness, boldness, power of comprehension, energy, eloquence, firmness, capacity to endure the worries of adversities, majesty, purity, kindness, liberality, truthfulness, gratefulness, noble family, character, self-restraint. Then Kām. in IV. 15–19 sets out the qualities called *ātma-sampat*, which

generally agree with Kauṭilya's enumeration (in VI. 1). Acc to Kām. IV 24 liberality, truthfulness and valour are the three greatest qualities in a king, who, when endowed with these, acquires all other qualities The Mānasollāsa (II. 1 2–7) first enumerates 44 qualities such as truthfulness, spiritedness (which agree more or less with Kautilya's enumeration) and then states that the five most essential qualities in a king are truthfulness, valour, forbearance, liberality and capacity to appreciate the worth of others. The Agnipurāna (239. 2–5) enumerates 21 qualities such as noble family, character &c In the Paraśurāma-pratāpa 96 qualities are enumerated in the Rājavallabhakānda (Ms 239 of Visrāmabāg collection II, folio 21b). The Sabhāparva 5 107–109 and Rāmāyana II. 100 65–67 require the king to avoid 14 faults viz. atheism, falsehood, hot temper, carelessness, procrastination, not seeing the wise, laziness, addiction to five pleasures of sense, considering state matters alone (without *mantrins*), taking counsel with those who do not know politics, not starting to do what is decided upon, not guarding secret royal policy, not practising auspicious acts, taking up undertakings on all sides at one and the same time. Vanaparva 251. 5 says that subjects do not like a king who is very timid, very weak, procrastinating, careless and immersed in pleasures on account of vices. Sabhā 5 125 states that sleep (by day), laziness, timidity, hot temper, softness and dilatoriness are six calamities in a king

The works on dharmaśāstra and arthaśāstra devote a good deal of space to the education of the king and to his moral discipline. Gaut XI. 3 requires that the king should have received instruction in Trayī (the three Vedas) and Ānvīksikī This last has been differently interpreted by different writers. Kaut I. 2 says that Ānvīksikī comprehends Sānkhya,[57] Yoga and Lokā-

57. सारुयं योगो लोकायतं चेत्यान्वीक्षिकी । .. बलाबले चैतासा हेतुभिरन्वीक्षमाणा लोकस्योपकरोति व्यसनेष्युदये च बुद्धिमवस्थापयति प्रज्ञावाक्यक्रियावैशारद्यं च करोति। प्रदीपः सर्वविद्यानामुपायः सर्वकर्मणाम्। आश्रयः सर्वधर्माणा शश्वदान्वीक्षिकी मता ॥ अर्थशास्त्र I 2 This last verse occurs in वात्स्यायनभाष्य on न्यायसूत्र I 1 1, where the 4th pāda is विद्योद्देशे प्रकीर्तिता Some read आन्वीक्षकी (Jolly's ed of अर्थशास्त्र) but आन्वीक्षिकी seems to be more grammatical and to be the reading of most classical works The Trivandrum ed reads आन्वीक्षिकी Patañjali in his Mahābhāsya has a sentence वर्णिका भागुरी लोकायतस्य (Bhāguri expounds the Lokāyata system), vol III p 325 on Pāṇini VII 3 45 Later on Lokāyata came to be identified with atheistic views that denied the existence of a soul or the next world Sankara on Vedāntasūtra II 2 1 and

(*Continued on the next page*)

yata and that it examines the relative strength of the three other *vidyās* with reasons, and thereby benefits the world, steadies the mind in calamities and prosperity and imparts excellence in intellect, speech and actions. It is always the torch of (sheds light on) all vidyās, it is the means of (inducing to go in for) all undertakings, it is the source of all dharmas. Kautilya derives the name from the root 'Iks' with 'anu' and he takes it to mean the science of ratiocination. It is somewhat strange that Lokāyata is included in Ānvīksikī, one of the subjects of study for the prince. But it appears from the remarks he makes that Kaut. uses it only in the sense of logic based on premises derived from ordinary experience (loka) though in later literature Lokāyata came to mean 'nāstika' (atheist, materialist). Acc.[58]

(*Continued from last page*)

III. 3 53 and 54 states that the Laukāyatikas held the view that consciousness is a quality of the body (and there is no soul over and above the body). The Tantravārtika runs them down as fools and apes (on Jaimini 1. 3. 3). In the Rāmāyana Rāma asks Bharata not to resort to Lokāyatika brāhmanas, who, though ehuldish, look upon themselves as learned and who relying on the knowledge acquired by Ānvīksikī speak nonsense in spite of the fact that there are principal Dharmaśāstras (that point out the sensible path). काञ्चिन्न लौकायतिकान् ब्राह्मणांस्तात सेवसे । अनर्थकुशला ह्येते बालाः पण्डितमानिनः ॥ धर्मशास्त्रेषु मुख्येषु विद्यमानेषु दुर्बुधाः । बुद्धिमान्वीक्षिकीं प्राप्य निरर्थं प्रवदन्ति ते ॥ अयोध्याकाण्ड 100 38-39. The Kāmasūtra (I 2 30) says that the Laukāyatikas hold that a kārsāpana (copper coin) which one is certain of is better than a niska (a gold coio) which is doubtful. वरं सांशयिकाच्चिष्काद्सांशयिकः कार्षापण इति लौकायतिकाः । कामसूत्र I 2. 30 Rājaśekhara in his Kāvyamīmāṁsā p 37 (Gaekwad's O. series, ed of 1934) refers to the opinion of the Laukāyatika logicians that the consciousness in human beings arises from the *bhūtas* (elements) just as the power of intoxication (in wine) is due to the mixture of several ingredients (none of which may by itself be intoxicating). The Nītivākyāmṛta p. 76 remarks "the Lokāyatika view leads to the effectuation of worldly affairs, for the king is able to uproot the thorns of the country by the help of Lokāyata". ऐहिकव्यवहारप्रसाधनपरं लोकायतिकम् । लोकायतको हि राजा राष्ट्रकण्टकानुच्छेदयति । नीतिवा p. 76. Vide J. R. A. S. for 1917 p. 175 n. 2, article on लोकायत in J A O.S. 1930 p. 132 ff., H. Dh. vol II p. 359 n.; 'Historical Notices of the Lokāyatas' in the Silver Jubilee vol. of the B. O. R. Institute, Poona pp 386-397.

58. आन्वीक्षिकी समस्तसान्दृष्टिकनिरूपणक्षमा हेतुविद्या । विश्वरूप on या. I, 306; आन्वीक्षिक्यां तर्कशास्त्रं वेदान्ताद्यं प्रतिष्ठितम् । शुक्रनीति. I. 153, आन्वीक्षिकी वेदाद्यविरुद्धा आत्मज्ञानोपयोगिनी न्यायविद्या । राजनीतिप्रकाश p. 118. The word आन्वीक्षिकी is derived as अन्वीक्षा प्रयोजनं (फलं) अस्याः इति आन्वीक्षिकी acc. to पाणिनि V. 1. 109. क्षीरस्वामी on अमरकोश explains 'प्रत्यक्षागमाभ्यामीक्षितस्य पश्चाद्दीक्षणमन्वीक्षा सा प्रयोजन यस्या'; while विश्वनाथ on न्यायसूत्रभाष्य I. 1. 1 'अवणादनु पश्चात् ईक्षा अन्वीक्षा उच्यते तत्रिर्वाहिका सेयमान्वीक्षिकी न्यायतर्कादिशब्दैरपि व्यवह्रियते ।'. Vide नीलकण्ठ on शान्ति 319, 28 for a similar derivation.

to the Amarakosa, Visvarūpa on Yāj I. 306, Haradatta on Gaut. (XI. 3), Aparārka and several others Ānvīksikī means 'Logic'. Acc. to Kām. II. 7 and 11, the Mit on Yāj I. 311, Śukranīti I. 158 it means 'Ātmavidyā' (Metaphysics), while Śukranīti I. 153 and Rājanīti-prakāsa p 118 combine the two by saying that it is logic that leads on to or is useful for acquiring knowledge of the Self. The Nītimayūkha (p. 34) includes logic and Vedānta in Ānvīksikī and Mīmānsā and smrtis under Trayī The Bārhaspatyasūtra (II. 5-6) advises the king to follow the Laukāyatika doctrines at the time of securing *artha* (wealth) and the Kāpālika-sāstra in achieving his sexual and similar desires [59]

Great divergence of views prevailed as to the vidyās that were essential for the education of the king According to the Manusmrti VII 43, Śānti 59 33, Kaut I. 2, Yāj I. 311, Kām II. 2, Śukranīti I. 152, Agni. 238 8, the subjects for the king's education are four viz, Anvīksikī, Trayī, Vārtā and Dandanīti. Kaut notes that the school of the Mānavas held the view that the *vidyās* were three and regarded Ānvīksikī as a special branch of Trayī; that the Bārhaspatya school was of opinion that they were only two, Vārtā and Dandanīti, since Trayī only acted as a screen (to obscure the intellect) of one (the king) who wants to know the ways of the world; and the Ausanasas regarded Dandanīti as the only vidyā for a king, since according to them, the efforts to learn all vidyās are tied down to it (i. e are ultimately intended to lead on to the mastery of Dandanīti) It will be seen how the Ausanasas and Bārhaspatyas had an entirely secular view in the science of government and divorced it from the study of sacred books and metaphysics in the case of the king The Dasakumāracarita VIII (that displays a deep study of Kautilya) says that the vidyās for the king are four (catasro rājavidyās-trayīvārtānvīksikīdandanītih) The Bārhaspatyasūtra I 3 (Dandanītireva vidyā) holds that Dandanīti is the only (essential) vidyā for the king Kautilya further explains that dharma and its opposite are learnt from the three Vedas, viz Sāmaveda, Rgveda and Yajurveda, that the Atharvaveda and Itihāsaveda (i e Itihāsa and Purāna) are the other Vedas and that the six Angas also (viz. phonetics, ritual, grammar, etymology, metrics and astronomy) are comprehend-

59. सर्वथा लौकायतिकमेव शास्त्रमर्थसाधनकाले । कापालिकमेव कामसाधने । बार्हस्पत्यसूत्र II, 5-6

ed in the word 'Trayī[60]'. Śukranīti I. 155 says that the 14 vidyās (enumerated in Yāj. I. 3) are comprehended in Trayī. Gaut. XI. 19 expressly says that in doing his duty of making the people observe the rules of the sacred codes the king would have to rely on the Veda, Dharmaśāstras, the Angas, Upavedas and Purāna. In the Rāmāyana, Rāma and his brothers are often spoken of as proficient in the Vedas, Vedāṅgas, in Dhanurveda, Gāndharvaveda, Rājavidyā &c. (I. 18. 24 and 26, II. 1.20, II. 2. 34-35, V. 35. 13-14). In the Vanaparva 277. 4 it is said that the princes were proficient in the Vedas with their secret doctrine and in Dhanurveda. In the Ādiparva 221. 72-74 Abhimanyu is said to have learned from Arjuna before he became 16 the Dhanurveda in four sections, the knowledge of *astras*, and the theory and practice of these. Vide also Anuśāsana 104. 146-147. Khāravela in his Hathigumphā Inscription (E. I. vol. XX. p. 79 ll. 2 and 5) states that he learnt Lekha (official correspondence), Rūpa (currency), Gananā (Accountancy) and the administration of justice, when he was the crown prince and also Gāndharvaveda (music). In the Junagadh Inscription of Rudradāman (E. I. vol. VIII at page 44) the Mahāksatrapa is said to have attained great fame by his deep study, retention, and actual practice of grammar, artha (either lexicography or politics), music, logic and other vidyās and to have been a fine rider of horses, elephants, chariots and a great adept in wielding the sword and shield and in wrestling[61]. The personal attainments of Samudragupta (in Gupta Inscriptions No. 1 pp. 12, 15-16) show how thorough the education of at least some princes was or at least what the ideal about their education was. Vide H. Dh. vol. II. p. 364 for the education of princes and Dr. Beni

60. धर्माधर्मौ त्रय्याम्। अर्थानर्थौ वार्तायाम्। नयानयौ दण्डनीत्याम्। ..... सामवेदोऽपि। अथर्ववेदेतिहासवेदौ च वेदाः। शिक्षा कल्पो व्याकरण निरुक्तं छन्दो ज्योतिषमिति चाङ्गानि। अर्थशास्त्र I. 2 and 3. In the Raghuvamśa XVIII. 50 Kālidāsa speaks of only three princely vidyās and Mallinātha quotes the very words of कौटिल्य cited here and also Kām. II त्रयी वार्ता दण्डनीतिरितिस्रो विद्या मनोर्मताः। त्रय्या एव विभागोयं येन सान्वीक्षिकी मता॥. It should be noted that the Sāmaveda is here mentioned first Probably Kauṭilya was a student of that Veda. In the Brāhmanas and Upanisads Rgveda comes first in the enumeration. Itihāsa and Purāna are called the fifth Veda in Chāndogya VII. 1. 2. Compare Agnipurāṇa 238, 9 for words similar to धर्माधर्मौ त्रय्याम् etc.

61. शब्दार्थगान्धर्वोपायानां विद्यानां महतीनां धारणधारणविज्ञानप्रयोगावदिपुल कीर्तिना तुरगगजरथचर्यासिचर्मनिबुद्धाद्य ..... (broken) बलक्षयवसौष्ठवक्रियेण &c E. I. vol. VIII p. 44 l. 13.

Prasad's 'Theory of Government in Ancient India' p. 218 for an ideal course of education for a prince quoted from the Buddhist work, Sūtrālankāra of Aśvaghosa. The Nītivākyāmṛta[62] adds a long list of the accomplishments which a prince should possess viz. all scripts, valuing of jewels, knowledge of arms &c. On reading the ideal courses prescribed for the education of the prince by ancient Indian writers one cannot help feeling that they were probably actuated by the same sentiments that are attributed to Socrates by Plato in his 'Republic' (tr. by Jowett, ed. of 1875, vol. III. p. 357) viz. 'Until philosophers are kings or the kings and princes of this world have the spirit and power of philosophy and political greatness and wisdom meet in one and these commoner natures who follow either to the exclusion of the other are compelled to stand aside, cities will never cease from ill–no, nor the human race as I believe–and then only will our State have a possibility of light and behold the light of day &c' The Agnipurāna (225. 1–4) prescribes that the prince should be taught dharmaśāstra, kāmaśāstra, arthaśāstra, science of archery (dhanurveda), the various arts and crafts by trusted teachers, that he should not be allowed to be associated with those who are angry with the king or disrespected by him or who are greedy and that if it is impossible to impart good qualities to him he should be confined, surrounded by pleasures. The princes were sometimes educated in their own capital or in a nearby college. Vide H. Dh. vol. II. p 364. Sometimes, it appears, princes went to such famous seats of learning as Taksaśilā (vide Jātakas ed. by Fausböll II. 87, 278, 319, 323, 400, III. 158, 168, 415, 463) The subjects of study there were the three vedas and 18 śilpāni or vidyās (Jātakas, vol. II. 87, III. 115). Kautilya (I. 4) explains that Vārtā is constituted by agriculture, the rearing of cattle and trade; it benefits (the State) by bringing in grain, cattle, gold, baser metals, and free labour; by means of vārtā the king secures treasury and army whereby he brings under control his own side and the enemy. In the Sabhāparva[63] 5. 79 and Ayodhyākānda 100 47 it is declared

that when the world relies on vārtā it easily prospers. The Śānti-parva (263. 3) gives the warning that this world would cease to exist if vārtā was given up, that this world is rooted in vārtā and is sustained by the three vedas (68. 35). The Vanaparva (150. 30) states that the whole world is sustained by vārtā i. e. by merchandise, mines, trade, agriculture and tending cows, she-goats and ewes. The Nītivākyāmṛta (p. 93) after defining vārtā as above emphasizes that the king secures the abundance of everything when vārtā is prosperous and that the man who has his own agriculture, milch-cattle, plot for growing vegetables and a well in his own house has indeed all the pleasures of this world. These quotations indicate what importance was attached to agriculture and the economic structure of society. The result is that in the Arthaśāstra economic matters occupy a very large space.

Kautilya (I. 5) starts by saying that the three vidyās (except daṇḍanīti) in the case of the prince depend upon daṇḍa, that daṇḍa in its turn is based upon discipline, which is of two kinds, natural and induced (or acquired). Vidyās produce discipline (of the 2nd kind) in him who possesses the qualities of intellect specified above. Then he goes on to say that the prince should learn the alphabet and arithmetic after his *caula* is performed (in the 3rd year or later) and after *upanayana* he should learn the three vedas and ānvīksikī from the *śiṣṭas* (those learned in the veda), vārtā from the heads or superintendents (of the various departments thereof) and daṇḍanīti from expounders (of the *vidyā*) and from practical politicians. Vide Manu VII. 43 (=Matsya 215. 54 and Agni 225. 21-22) for directions as to from whom the prince was to learn the four vidyās Kautilya prescribes that the prince should study these up to the 16th year, should then marry and that in order to foster the growth of the discipline of the intellect he should always associate with those who are advanced in the vidyās enumerated above (after his 16th year) and that the king should spend the first part of the day in practising the riding of elephants, horses, chariots and in the science of arms and the latter part of the day in listening to Itihāsa which comprises Purāna, history, stories, panegyrics, dharmasāstra and arthaśāstra. A king whose intellect is thus disciplined and who is devoted to disciplining his subjects also and to doing good to all will be the sole ruler of the earth. The Nītivākyāmṛta (p. 162) defines *vinaya* as 'acting with humility towards those

who excel in vratas, vidyās and are aged' Manu VII. 38-39. Kām. I 19-20 and 59-63, Śukra I. 92-93 (taken from Kām. I. 19-20) extol the value and importance of *vinaya*, and waiting upon the aged and the learned Manu (VII. 40-42) states that many kings perished with their vast paraphernalia through want of discipline while others, though residing in a forest (i.e without an army &c), gained kingdoms through vinaya, and names Vena, Nahusa, Sudās son of Pijavana and Sumukha Nimi as those who perished through lack of *vinaya* and gives Prthu and Manu as examples of those who secured kingdoms through *vinaya*. Matsya 215.53 is the same as Manu VII. 40. Ancient Indian writers harp on the education of the prince so much because their ideal of kingship was that the king should be a *rājarṣi* (a royal sage) Kālidāsa frequently speaks of this e g in Śākuntala II. 14 and Raghuvamśa (I. 58) They were aware, like Socrates, that until either philosophers became[64] kings or kings philosophers States will never succeed in remedying their short-comings (vide p. 50 above). Not only was an extensive course of intellectual training prescribed for the king, but both dharmaśāstra and arthaśāstra works strongly and frequently insist upon the necessity of moral discipline and the right direction of the emotions and will in the case of the king.

Kautilya (I. 6) emphasizes that control of the organs of sense is the cause of (proficiency in) vidyās and discipline should be attempted by giving up the six enemical tendencies viz. lust, hot temper, greed, vanity (*māna*), haughtiness or insolence (*mada*), overjoy. He says that (the whole purpose or insistence of) all sāstras is the restraint of the senses, that even a supreme ruler of the whole earth up to its four borders whose senses are not under control will at once perish and cites two examples on each of these six tendencies, viz Dāndakya Bhoja who attempted to rape a brāhmana girl through lust and perished with his kingdom and kinsmen and Karāla king of Videha; Janamejaya (perished) who attacked brāhmanas through hot temper and Tālajangha who did so against the Bhrgus, Aila who exacted through greed excessive taxes from persons of the four varnas and Ajabindu, the king of Sauvīra; Rāvana who did not restore another's wife through his conceit and Duryodhana who did not give even a part from his kingdom; Dambhodbhava who despised all beings through his insolence and

64 The word 'philosopher' used by Plato has not the narrow meaning of modern times.

Arjuna of the Haihaya dynasty ; Vātāpi through overjoy when he attacked Agastya and also the oligarchy of the Vṛsnis when they attacked Dvaipāyana[65]. These six evil tendencies are called *śatru-saḍ-varga* or *ari-saḍvarga*. Kautilya adds that by the conquest of these six evil tendencies Jāmadagnya (Paraśurāma) and Ambarīsa enjoyed the earth for a long time. Kām. (I. 55–58) and Śukra. I. 144–146 give six of the twelve examples of Kaut and Kām. I. 58 is the same as the last verse of Kautilya I. 6. Vide Mārkandeya 27. 12–13. In the Vāsavadattā of Subandhu (Hall's ed pp. 273–276) there is a long list of the kings of antiquity (Purūravas, Nahusa, Yayāti, Sudyumna, Nala and nine others) who suffered owing to some failing or other in themselves The Udyogaparva (74. 13–18) mentions by name 18 kings who by their evil career destroyed themselves, their friends and relatives (such as Mudāvarta of the Haihayas, Janamejaya of the Nīpas, Bahula of Tālajanghas, Dhautamūlaka of the Cīnas). This shows that Cīna does not probably stand for modern China in the epic. Manu VII. 44 (=Matsya 215. 55) also emphasizes the necessity for the king incessantly to curb the senses and not to fall a prey to vices arising from *kāma* and *krodha*. Manu (VII. 45–48) enumerates ten vicious tendencies due to kāma (desire for pleasures) viz. hunting, gambling, sleep by day, finding fault (with others), women, drunkenness, (excessive indulgence in) dancing, singing and instrumental music, and aimless wandering; and eight vicious tendencies due to krodha (hot temper) viz. tale-bearing, violence, treachery, envy, slander, (improper) seizure of property, reviling and assault. Manu further declares (VII. 50) that among the vices due to *kāma*, drinking wine, gambling, women and hunting are the most harmful, each preceding one being worse than each succeeding

65. Most of these stories occur in the Mahābhārata, Purāṇas, and Buddhist works Vide Jolly's ed. of the Kautiliya vol. II. p. 5 But the story of the Vṛsnis and Dvaipāyana is not known. For Janamejaya (different from the descendant of Arjuna, the Pāndava) incurring the sin of brāhmana-killing, vide Śānti 150 3. For Arjuna (called Kārtavīrya) king of Haihayas, vide Sabhāpa.va 22 24, Vanaparva 115 12, Anuśāsana 153. 3 ff, Śānti 49 35 ff. and Āśvamedhikaparva 29, Matsyapurāna 43, Vāyu 94 For Agastya and Vātāpi vide Vanaparva 96. In the Mārkandeya the instances of kings that came to grief through *kāma*, *krodha*, *lobha* &c. are different except that of Aila (chap. 27. 14–17). For Dambhodbhava vide Sabhā 22 24 and Udyoga 96 7 (cr. ed 94. 7) For the story of Danda who raped a maiden of the Bhrgu family vide Rāmāyana VII. 80–81. Dāndakya Bhoja is mentioned (along with Rāvana and Kīcaka) by the Kāmasūtra I. 2. 44–45.

one and (VII. 52) that among the vices due to hot temper, causing physical injury, reviling and deprivation of wealth are the worst. Manu (VII. 52) has a sly hit that these seven vices are more or less prevalent among kings (*sarvatrāvānusaṅganah*) and therefore the only choice is that of the lesser or least of evils Kautilya (VIII. 3) has a lengthy disquisition on the views of his predecessors about the relative harmfulness of the three vices due to hot temper and of the four due to *kāma* and states his own opinion that *arthadūsana* meaning loss of the means of livelihood by gifts, exactions (by the king), loss or abandonment of property is more harmful than reviling and dandapārusya is more harmful than arthadūsana He points out the benefits derived from hunting viz exercise, the disappearance of phlegm, bile. fat and sweat, the acquisition of skill in aiming at stationary and moving bodies, the ascertainment of the minds of beasts when they are provoked and occasional travel[66] These are echoed, almost in the same words by Kām XIV 25 and in the Śākuntala (II. 25) by Kālidāsa Vide Sabhā 68 20, Udyoga 33 92 for the seven principal vices Kām (XIV. 6 and 7) enumerates the three vices of hot temper and the four of *kāma* and holds an elaborate discussion on their respective demerits He defines arthadūsana (XIV. 17) somewhat differently (viz as the abandoning of an important object or of great wealth in order to show that what really merits blame is not so) Vide the Visnudharmottara II.65 12–15 for the two meanings of arthadūsana[67]. Kām does not agree that hunting has many good points in its favour and advises the king to prepare a separate well-guarded hunting ground of one-half *yojana* in length and breadth if he really desires to hunt (XIV. 28–42) The Mānasollāsa (vol II) in the 15th chapter of the 4th vimsati deals with hunting as a sport for kings and points out how a forest is to be preserved for royal hunting and how it is to be guarded and enumerates 31 methods of hunting. Kām warns the king who wants to retain

---

66. मृगयाया तु व्यायाम. श्लेष्मपित्तमेदस्वेदनाशश्चले स्थिरे च काये लक्षपरिचयः कोपस्थाने हि तेषु च मृगाणां चित्तज्ञानमनित्ययानं चेति। कौटिल्य VIII. 3; जितश्रमत्वं व्यायाम आममेदःकफक्षयः। चरस्थिरेषु लक्षेषु बाणसिद्धिरनुत्तमा॥ मृगयायां गुणानेतानाहुरन्ये न तत्क्षमम्। दोषाः प्राणहराः प्रायस्तस्माच्चद्व्यसनं महत्॥ काम. XIV. 25–26. The reading कोपभयस्थाने in some Mss. of the Kautiliya is preferable in view of Kālidāsa's words 'चित्तं भयक्रोधयोः.'

67. Vide the विष्णुधर्मोत्तर (II. 65 12–15) 'अर्थस्य दूषण राम द्विप्रकारं विवर्जयेत्॥ अर्थानां दूषणं चैकं तथा चार्थेन दूषणम्। प्राकाराणां सदुच्छेदो दुर्गादीनां समक्रिया॥ अर्थानां दूषणं प्रोक्त विप्रकीर्णत्वमेव च। अदेशकाले यद्दानमपात्रे दानमेव च॥ अर्थेस्तु दूषणं प्रोक्तमसत्कर्मप्रवर्तनम्।'

his kingdom against fondness for women (XIV. 57–58). He further says that a king may even indulge in fondness for women and may even drink moderately, but he must totally avoid gambling and hunting (XIV. 65). Kautilya regards gambling as the worst of the vices for a king (VIII. 3 last sentence in prose). In the Daśakumāracarita (VIII) there is an elaborate (but ironical) description of the mental and other benefits derived from the four principal vices due to *kāma*. Kām. I. 54 states that hunting, gambling and wine in the case of kings must be condemned, since calamities befell Pāṇḍu, Nala and the Vṛṣṇis (respectively) by being addicted to these. Even an ideal king like Rāma was fond of hunting. Śukra (I. 332–333) points out that hunting has much in its favour, but there is one great defect in it viz. slaughter of animals. Śukra (I. 109–119) denounces gambling, drinking and fondness for women as the worst of vices and points out that Indra, Daṇḍakya, Nahusa and Rāvaṇa came to grief through their passion for women (I. 114) and that a king who is excessively fond of dancers, singers, courtesans, wrestlers, eunuchs and men of low birth falls an easy prey to his enemies (I. 128). Kām. (I. 40–46, which are almost the same as Śukra I. 102–107) gives a poetic description of how animals like the deer, the elephant, the moth, the fish and the bee meet death or become confined by extreme attachment to one only out of the five objects of sense and emphasizes that man who can and does enjoy all the pleasures of the five senses must practise great restraint.

CHAPTER III

DUTIES AND RESPONSIBILITIES OF THE RULER.

All works are agreed that the first and foremost duty of the king is the protection of subjects Śāntiparva (68 1-4) notes that all the seven expounders of polity (rājaśāstrapranetārah) named by it extol protection as the highest *dharma* of the king Manu VII. 144 states that the protection of subjects is the highest dharma and Kālidāsa in Raghuvaṁśa 14 67 alludes to this dictum of Manu. Protection consists in punishing internal aggression (such as by thieves and robbers and by persons who invade a man's rights) and in meeting external[68] aggression Vide quotation from Brhaspati below Gautama (X. 7-8) prescribes that the special responsibility of the king is to protect all beings, to award just punishment and that he has to protect the several varnas and āśramas according to the rules of śāstra and to bring them round to the path of their proper duties when they swerve from it (XI. 9-10) Vasistha (19 1-2) states that the wise say that protection is a life-long *sattra* in which he has to give up fear and softness of heart. Vas 19 7-8 and Visnu Dh S III 2-3 are similar to Gaut XI. 9-10 The Śāntiparva (23 15) repeats a *gāthā* of Brhaspati 'As a snake swallows mice lying in holes, so the earth swallows these two viz a king who does not fight (an invader) and a brāhmana who does not go on a journey (for acquiring knowledge from famous teachers)'[68a] Manu IX 306 states that the king protecting his subjects according to the śāstra and meting out punishment to those who deserve it performs every day sacrifices in which the fees are one hundred thousand cows (i e he secures the spiritual reward of very solemn sacrifices) Yāj I.335 is to the same effect Kautilya also lays emphasis on the duty to keep the varnas and āsramas to their duties 'Therefore the

68. बृहस्पतिः । तत्प्रजापालनं प्रोक्तं त्रिविध न्यायवेदिभि । परचक्राऽऽटवीभयादूचालिनोन्यायवर्तिन ॥ परानीकस्तेनभयमुपायै. शमयेन्नृप. । चलत्परिभूतानां प्रत्यहं न्यायदर्शनै. ॥ quoted by राजनीतिप्र pp 254-255.

68a. घूमिरेतौ निगिरति सर्पो बिलशयानिव । राजान चाविरोद्धारं ब्राह्मणं चाप्रवासिनम् ॥ शान्ति 23. 15. This is attributed to Uśanas in Śānti 57 3 (but the words are द्वाविमौ ग्रसते भूमि· सर्पो &c). Vide also Sabhā 55 14 The same verse is शुक्रनीतिसार IV. 7. 303

king should not allow the people to swerve from their duties. He, who keeps dharma intact (without breach), enjoys bliss in this world and the next'. Nārada[69] (prakīrnaka 33) states 'His duty is to protect the subjects, to (honour or) listen to the aged and the wise, to look into the disputes of people and to be energetic in his functions as king'. Śukra (I. 14) says that the highest dharma of the king is to protect the subjects and to put down the wicked. According to Atri (verse 28),[70] to punish the wicked, to honour the good, to increase the treasury in the right way, to deal impartially with litigants and to protect the kingdom—these five are declared to be sacrifices in the case of kings. The Visnudharmottara (III. 323. 25-26) refers to the five sacrifices in very similar words. In Śānti 77. 33 the king's duty to restrain brāhmanas from engaging in unworthy actions is specially emphasized. These passages establish that the principal duties of the king were conceived to be to protect the subjects, to see that the rules of varnas and āśramas were carried out by them, to punish the wicked and to do justice.

The duty to protect involved fighting and probable death. Therefore the ancient works on dharma-śāstra always insist that it is the duty of the ksatriya to fight and that death on the battlefield is to be his highest ideal. Manu (VII. 87-89) enjoins upon the king, when protecting his subjects against invasion, not to run away from battle and promises heaven as the reward for kings who die fighting in battle. Yāj I 324 holds forth the same reward for all soldiers who are killed in battle. Vide Strīparva 2 16 and 18 and 11. 8-9. The Bhagavadgītā (II. 31-37) most solemnly declares that there is nothing higher for a ksatriya than a righteous war, that a ksatriya's duty requires him not to quail in battle, that if he dies in battle he goes to heaven and if he survives he rules over the world, that he should fight as a duty without caring for gain or loss, victory or defeat and if he fights with this attitude no sin attaches to him. Śāntiparva 78 31 states that just as those who join in the bath of the king at the end of the Aśvamedha are purified of all sins, so all

69. तस्य धर्मः प्रजारक्षा वृद्धप्राज्ञोपसेवनम् । दर्शनं व्यवहाराणामुत्थानं च स्वधर्मसु ॥ नारद (प्रकीर्णक 33); नृपस्य परमो धर्म प्रजाना परिपालनम् । दुष्टनिग्रहणं नित्यं न नीत्या ते विना ह्युभे ॥ शुक्र० I. 14.

70. दुष्टस्य दण्डः सुजनस्य पूजा न्यायेन कोशस्य च संप्रवृद्धि । अपक्षपातोऽर्थिषु राष्ट्ररक्षा पञ्चैव यज्ञाः कथिता नृपाणाम् ॥ अत्रि verse 28. compare दुष्टदण्डः सतां पूजा धर्मेण च धनार्जनम् । राष्ट्ररक्षा समत्वं च व्यवहारेषु पञ्चकम् ॥ भूमिपाना महायज्ञाः सर्वाकल्मषनाशनाः । विष्णुधर्मोत्तर III. 323. 25-26.

soldiers (of whatever caste and on whatever side) killed in battle become pure by the destruction of their sins Manu (VII 94-95) sets out the results for a soldier when he flees from the battlefield. Parāsara[71] III. 37 says "Two men pierce the orb of the sun (i e. reach heavenly worlds) viz an ascetic endowed with Yoga and a soldier killed while facing the enemy" and the following verses (III. 38 ff) dilate upon how the slain warrior is waited upon in heaven by divine damsels A verse of the Ṛgveda X 154 3 (= Atharva 18 2 17) appears to hold that warriors losing life in battle reap the same rewards that those who make gifts of a thousand cows in sacrifices secure [72] It is probably this passage which Kautilya has in mind when in X. 3 he refers to the Veda for inciting the soldiers to fight without regard to life Āp Dh. S. (II. 10 26 2-3) states that a king, who strives to recover the wealth of brāhmanas (stolen by thieves) and dies in the effort, is said to perform a sacrifice, in which his body is the sacrificial post and the fees are incalculable and that other valiant men losing life in fighting for a (good) cause are in a similar position To die fighting for the protection of cows and brāhmanas is specially commended (vide Śānti 21. 19 and 77. 28 and 30) The Visnudharmasūtra III. 44-46 prescribes 'there is no duty for kings equal to losing one's life in battle; those who meet death in protecting a cow, a brāhmana, a king, a friend, their own wealth and their wife enter heaven as also those who meet death in preventing confusion of varnas (caused by adultery &c.)' On the eve of battle the great warrior Bhīsma says to his officers 'it is a sinful act for a ksatriya to die in his house from some disease; the ancient code of conduct for him is that he should meet death from steel' (Bhīsmaparva 17 11) The same idea is presented in Śalyaparva 5 32, Śānti 97 23 and 25

Kāmandaka[73] (V. 82-83) makes it clear that the subjects require protection against the king's officers, thieves, enemies of the king, royal favourites (like the queen and the princes) and

---

71 द्वाविमौ पुरुषौ लोके सूर्यमण्डलभेदिनौ। परिव्राड्योगयुक्तश्च रणे चाभिमुखे हतः॥ पराशर III 37, quoted by मेधातिथि on मनु VII 89 The same is उद्योगपर्व 33. 61 which reads पुरुषव्याघ्र in the first *pāda*

72 ये युध्यन्ते प्रधनेषु शूरासो ये तनूत्यज। ये वा सहस्रदक्षिणास्तांश्चिदेवापि गच्छतात्॥ ऋ X 154 3 = अथर्व 18 2 17 This also is quoted by मेधा. on मनु VII 89 अर्थशास्त्र (X 3) has 'वेदेष्वप्यनुश्रूयते — समासहस्रदक्षिणानां यज्ञानामवभृथेषु सा ते गतिर्या शूराणामिति।'

73. आयुक्तकेभ्यश्चोरेभ्यः परेभ्यो राजवल्लभात्। पृथिवीपतिलोभाच्च प्रजानां पञ्चधा भयम्॥ पञ्चप्रकारमप्येतदुपोह्यं नृपतेर्भयम्। कामन्दक V. 82-83.

the greed of the king himself As an extension of the king's duty to protect, the works lay down that it is his duty to support students, learned brāhmaṇas, and sacrificers.[74] Vide Gaut X. 9-12, XVIII 31, Kaut. II. 1, Anuśāsana 61. 28-30, Śānti 165. 6-7, Viṣnudharmasūtra III. 79-80, Manu VII. 82 and 134, Yāj I. 315 and 323 and III 44, Matsya 215. 58, Atri 24 The Hindu kings of ancient and medieval India followed this advice with great liberality for centuries and the subject has already been treated in vol II. pp 113, 856-864. The functions of Government were not supposed to end with the maintenance of peace and order, but Government must be an instrument of the diffusion of culture. The king is also called upon to support helpless and aged people, the blind, the cripple, lunatics, widows, orphans, those suffering from diseases and calamities, pregnant women by giving them medicines, lodging, food and clothing according to their requirements[75]. Vide Vas 19. 35-36, Viṣnudharmasūtra III. 65, Matsya 215. 62, Agni 225 25, Ādiparva 49. 11, Sabhā 18. 24, Virāṭaparva 18. 24, Śānti 77. 18 The Rājanīti-prakāśa (pp. 130-131) quotes[76] the Viṣnudharmottara requiring the king to honour and protect chaste women (pativratās) and Śaṅkha-Likhita to the effect that even kṣatriyas and vaiśyas who cannot maintain themselves by the methods prescribed by the śāstras for them should approach the king who should help them with the means of livelihood and they should work for the king in the manner laid down for them and that śūdras also should apply their skill and crafts for the benefit of the king when so maintained [77] Medhātithi on Manu V. 94 states that when a king supports his subjects in a famine by distributing food from his treasury no question of his being in mourning would come in the way These provisions for the old, the blind, the widows, orphans and helpless persons and for the relief of unemployed kṣatriyas, vaiśyas and śūdras strike one as

rather modern in tone In many modern countries the State has become the means of providing services for the greater part of its subjects, not only armed forces and the police, but social services such as education, public health, medical attendance, insurance against unemployment, old age, widowhood, and orphanage, relief of poverty &c In ancient India, though there were naturally no Acts of Parliament guaranteeing the above services to the subjects, public opinion, the views of eminent writers and the practice of the best kings created an atmosphere in which it was thought that it was imperative for the king representing the State and its resources to encourage learning, to care for the blind, the decrepit, the old and the widowed and to give employment to those who were unemployed Asoka constructed hospitals for men and animals (2nd Rock Edict at Kalsi in C I I vol 1, p 28), alms-houses, rest houses, watering places, shady trees on the highways and irrigation works, visited and supported the aged (8th Girnar Rock Edict in C I I p 15). In the 2nd century B C Khāravela, emperor of Kalinga, declares in his Hāthigumphā Inscription (E I vol. XX p 71 at p 86) that in the very first year of his reign he constructed embankments round the Khibīra lake in the Kalinga capital and renovated all public gardens Rudradāman in the 2nd century A. D repaired the Sudarśana lake at great cost from his own treasury without levying fresh taxes or benevolences (*pranaya*) or forced labour The Anuśāsanaparva says that good kings should[78] construct meeting halls, *prapās*, tanks, temples and lodging places for brāhmanas The Matsyapurāna 215. 64 remarks that the king should give to those who stay in hermitages food, oil and pots Vide Āp. Dh S II. 2 4, 21 and Haradatta thereon as to provision for śūdra guests. It is quite possible that these rules of the texts were not literally followed by all kings, but it is well-known how even legislative enactments are carried out by the subordinate staff in all countries including those of the West One has only to turn to Dickens' 'Oliver Twist' for some indication of the administration of Poor Laws and work-houses in England about a hundred years ago

As regards the king's daily routine Kaut I 19, Manu VII. 145-147, 216-226, Yāj. I. 327-333, Śukranīti I. 276–285, Agnipurāna 235, Visnudharmottara II.151, Bhāgavata X 70 4–17, Nītiprakāśikā VIII. 9 ff, Rājanītiprakāśa pp 153–169 and other works lay down

78. शालाप्रपातडागानि देवतायतनानि च । ब्राह्मणावसथाश्चैव कर्तव्यं ह्युपसर्पतैः ॥ अनुशासनपर्व quoted in परा मा. I. part 1 p 466.

detailed rules, which have been already set out (H. of Dh. vol. II pp. 805–806) Every day on rising from his bed the king was advised (by Manu VII. 37) to wait upon brāhmanas learned in the three Vedas and endowed with wisdom and to abide by their directions. Vas. I. 39–41, Gaut. XI. 13–14 say the same. In giving this advice exaggerated claims were made for brāhmanas which have been already set out before Vide H. Dh. vol II pp. 135–136 and Anuśāsana 33 2–8. The king was also expected to show himself to all people every day (Ayodhyā 100 51, Sabhā 5. 90)[79].

An extremely high ideal was placed before the king by the Kautilīya, the Mahābhārata and other works In the Arthaśāstra I. 19 Kautilya[80] proclaims the magnificent ideal 'in the happiness of the subjects lies the happiness of the king, in their welfare lies his welfare; the good of the king does not consist in what is pleasing to himself, but what is pleasing to the subjects constitutes his good'. Similar words occur in the Visnudharmasūtra III. last verse[81] The Mahābhārata (Śānti 69. 72–73) purports to quote two verses of Angiras (i.e. Bṛhaspati), one of which says 'of what use is *tapas* to that king or of what use are even sacrifices to him who has well looked after his subjects? He is surely one who knows all dharmas' Kautilya compares the king to the performer of a sacrifice, in which his *vrata*[82] (in the case of the sacrificer observances about food, scratching the body &c.) consists in being ever active, the sacrifice consists in issuing orders for carrying out the business (of the State), the sacrificial fee (that the king pays) is his

79. कच्चिद्दृश्यसे नित्यं मनुष्यान्समलकृतः । सभापर्व 5 90.

80 राज्ञो हि व्रतमुत्थानं यज्ञः कार्यानुशासनम् । दक्षिणा वृत्तिसाम्यं च दीक्षितस्याभिवेचनम् ॥ प्रजासुखे सुखं राज्ञः प्रजानां च हिते हितम् । नात्मप्रियं हितं राज्ञः प्रजानां तु प्रियं हितम् ॥ अर्थशास्त्र I 19

81. प्रजासुखे सुखी राजा तद्दुःखे यश्च दुःखितः । स कीर्तिमुत्तमो लोकेस्मिन् प्रेत्य स्वर्गे महीयते ॥ विष्णुधर्मसूत्र III last verse quoted in राजधर्मकाण्ड p. 15; कृत्वा सर्वाणि कार्याणि सम्यक् संपाल्य मेदिनीम् । पालयित्वा तथा पौरान् परत्र सुखमेधते ॥ किं तस्य तपसा राज्ञ किं च तस्याध्वरैरपि । सुपालितप्रजो यः स्यात्सर्वधर्मविदेव सः ॥ शान्ति 69 72–73. These words remind one of the famous proclamation of Queen Victoria in 1857 (called an impossible charter by a notably energetic but retrograde Viceroy) which breathes the same high and noble sentiments 'in their prosperity will be our strength, in their contentment our security and in their gratitude our best reward'.

82 Vide Āp Sr X 12–15, Baud Sr VI. 6 for long lists of observances (*vratas*) some of which are set out in H Dh. vol II pp 1139–1140 and *ibid* p. 1135 for the bath of the sacrificer.

impartiality to all (lit behaving in the same way to all), and his coronation corresponds to the bath of the person who is consecrated for a sacrifice Śāntiparva [83] (56. 44 and 46) and Nītiprakāśikā VIII 2 declare that a king like a pregnant woman should not do what is pleasing to him, but what would conduce to the good of the people and the ancient dharma for a king is to keep the subjects contented. In Śānti 90 1 and 5 it is said 'the king is there for the upholding of dharma and not for acting as he likes and that all beings have to depend on dharma which in its turn depends on the king'. In Udyogaparva 118. 13–14 a king exclaims 'the wealth I possess is for the benefit of the urban and rural population and not for my own enjoyment; for, that king who at his sweet will gives away what (really is not his but) belongs to others does not become endowed with spiritual merit nor with fame'. King Marutta is warned by his grand-mother in the Mārkandeya [84] (130. 33–34) that the king's body is not meant for pleasures but for undergoing great trouble in protecting the earth and carrying out his duties Ancient writers loved to dwell upon the rule of the king as paternal. Kaut. II 1 states that the king should favour like a father those who are outside the rules for remission of taxes Yāj I. 334 requires the king to be like a father to his subjects and servants Vide Śānti 139. 104–105 for the same idea. [85] In the Rāmāyana II. 2. 28–47 and V 35. 9–14 the virtues of the prince Rāma are set out in great detail, where it is said that Rāma behaved like a father (II. 2 39), that he sympathized with the people in their sorrows and was pleased like a father when the subjects celebrated festivals The Rāmāyana [86] III 6 11 declares that it would be a great *adharma* on the part of that king who takes a

sixth part of the produce (of fields) and does not protect his subjects as if they were his children. These sentiments are echoed by classical poets like Kālidāsa in the Śākuntala V. 5 and VI. 23 and the Raghuvaṁśa (I. 24) In the Harsacarita (V) the dying king Prabhākaravardhana consoles his young and favourite son Harsa by exhorting him to reflect over the idea that kings are to be deemed to have relatives in their subjects and not merely in agnates.[86a] Asoka also in his Edicts harps on the paternal relation 'all men are my children' (the first separate Jaugadh Edict, C. I. I. vol I pp. 111 and 114).

There were, it appears, several grades of rulers from the most ancient times The word *rājan* occurs in numerous places in the Rgveda. It is applied to such gods as Mitra and Varuna (Rg. VII 64 2), Varuna (Rg I 24 12 and 13, X. 173. 5) It appears to be used in two senses, viz (1) 'king' as in Rg. I. 65 7, III. 43. 5 ('will you make me the protector of people, the king, O Indra'), IV. 4 1, IX. 7. 5, X. 174. 4) and (2) 'noble' as in Rg. IX. 10. 3, X. 78. 1, X. 97. 6 ('where the plants come together as nobles in an assembly' *rājānaḥ samitāviva*). In Rg. VIII. 21 18 it is said[87] 'Citra who gave thousands and ten thousands is the only king, others are only small chiefs along the bank of the Sarasvatī'. The word 'samrāj' is known to the Rgveda and is used as an epithet of Varuṇa (in Rg. VI. 68. 9) and of Indra (in Rg VIII. 16. 1) and the word sāmrājya also occurs in relation to Varuna in Rg I. 25 10. In Rg. VIII. 37. 3 Indra is said to be sole ruler of the world (*ekarāṭ*) It is not unlikely therefore that the idea of an emperor who had suzerainty over several kings was known, though it is possible that in Rg. VIII. 37. 3 the word is used only in a metaphorical sense. In Rg VII. 83. 7–8[87a] it is said that ten kings though they formed a confederacy could not vanquish king Sudās and that in the ten kings' battle (*dāśarājñe*) Indra and Varuna helped Sudās who was surrounded by them on all sides. A very large number of kings is mentioned by name in numerous places in the Rgveda (e. g. I. 53. 8 and 10, I. 54. 6, I. 100 17, VII. 33. 2, VIII. 3. 12, . VIII. 4. 2) Besides these it appears that there were

86a. प्रजाभिस्तु बन्धुमन्तो राजानो न ज्ञातिभिः। हर्षचरित V.

87. चित्र इद्राजा राजका इदन्यके यके सरस्वतीमनु। पर्जन्य इव ततनद्धि वृष्ट्या सहस्रमयुता ददत्॥ ऋ. VIII. 21. 18.

87a दश राजानः समिता अयज्यवः सुदासमिन्द्रावरुणा न युयुधुः।...दाशराज्ञे परियत्ताय विश्वतः सुदास इन्द्रावरुणावशिक्षतम्। ऋ. VII. 83. 7–8.

tribal chiefs or governments of such clans or tribes as the Anus, Druhyus, Turvasas, Pūrus, Yadus (Rg I 108 8, all in the plural, VII 18 6 and VIII 6 46) But sometimes these words are used in the singular, when they mean 'a king or chief of that clan'. Vide Rg VIII. 4. 7, VIII. 10 5, IV 30 17 In the Atharvaveda III 4 1 (may you shine forth as the sole ruler of men) that word (*ekarāt*) is used in its literal sense and in Atharva VI 98.1 (may[87b] Indra conquer and may he never be defeated, may he shine as the overlord among kings) the idea of an emperor (*adhirāja*) is clearly set forth In Rg. X 128 9[88] the word 'adhirāja' must be taken in the same sense The Atharvaveda speaks of an Ugra which word seems to mean a formidable king (or emperor) 'Then you chase away disease as a formidable (king) who is in the midst (of many kings presses hard each of them)' IV 9 4 In the Atharvaveda III. 4. 3 it is said 'May the *ugra* see a lot of tribute'. In Rg X 34 8 the word *ugra* has probably the same sense viz 'a formidable king' In the Tai S II. 6 2. 2 it is said that men are held (supported or restrained) by the king (tasmād rājñā manusyā vidhrtāh) In the Tai S I. 8 10 2 occur[89] the words in the *Ājñā* formula recited in the Rājasūya 'May the gods extract for men great power, great overlordship, great sovereignty over people, this, O Bharatas, is your king, while Soma is king of us brāhmanas'. The exact relation of the two words 'ādhipatya' and 'jānarājya' is not clear. Similar words occur in Vāj S IX 40 and X. 18 and in Kāthaka XV 5 In the Ait Br (39 1) it is said[90] that 'whoever desires the king to attain supremacy over all kings, to attain to the rank of emperor and desires that he be the supreme ruler, the sole emperor (ekarāt) of the whole earth bounded by the sea up to its very extremities should be consecrated and crowned with the *Aindra Mahābhiseka* after making him take an oath.' In this passage the meanings of the words 'bhaujya', 'svārājya', 'vairājya' and 'pārameṣṭhya' in

90 स य इच्छेदेवंवित्क्षत्रियमयं .. सर्वाल्लोकान्विन्देतायं सर्वेषां राज्ञां श्रैष्ठ्यमतिष्ठा परमतां गच्छेत साम्राज्य भौज्यं स्वाराज्य वैराज्यं पारमेष्ठ्य राज्यं माहाराज्यमाधिपत्यमयं समन्तपर्यायी स्यात्सार्वभौमः सार्वायुष आन्तादापरार्धात् पृथिव्यै समुद्रपर्यन्ताया एकराडिति तमेतेनैन्द्रेण महाभिषेकेण क्षत्रिय शापयित्वाभिषिञ्चेत्। ऐ ब्रा 39 1.

relation to sovereignty over people are not clear. They are probably hyperbolical and grandiloquent words to convey supreme power. Even a brāhmana, according to vedic texts, may perform the Vājapeya if he desires 'svārājya' which means supereminence. Parameshthin means 'Prajāpati' and so pārameṣṭhya simply means godlike power. Further there is no apparent reason why, after rising high from sāmrājya to 'pārameshthya' there should be a descent to mere 'rājya' and 'māhārājya'. Sāyana[91] takes 'rājya' and 'māhārājya' at the end of the passage as referring to the position of the king in the next world. This is rather far-fetched. Jayaswal (in 'Hindu Polity', part 1 pp. 89–90 and p. 133) takes these words to mean 'the Bhaujya constitution &c.' relying on the occurrence of the Bhojas in Aśoka's Rock Edicts V and XIII and in Khāravela's Inscription, on the appearance of Bhojas as rulers in Western India and the town of Bhuj in Cutch and 'vairājya' as kingless system and 'svārājya' as 'self-ruling system'; but this is all unwarranted and is a fair sample of the way in which some of Jayaswal's theories are built up. It passes one's understanding how a paramount sovereign is promised *vairājya* (in Jayaswal's sense) in the Ait. Br. In the Ṛgveda (V. 66. 6) we have the word 'svarājya' (which probably means the same thing as 'svārājya') in 'Let us strive for an all-embracing sovereignty, which will afford protection to many'[92]. In the Śatapatha Brāhmana the distinction between a king (rājan) and an emperor is very clearly expressed as follows: 'For, by offering the Rājasūya he becomes king and by the Vājapeya he becomes emperor; and the office of king is the lower and that of emperor higher' (V. 1. 1. 13). Śatapatha IX. 3 4. 8 contains the same idea again. In Śatapatha I 6. 4 21 it is said 'before the slaying of Vrtra he was Indra, it is true; but after slaying Vrtra he became Mahendra, even as a king (rājan) becomes a mahārāja after obtaining victory'. These passages are sufficient to establish that the idea of a suzerainty extending over many kingdoms was known in the times of the Ṛgveda and had been fully developed before the composition of the Aitareya and Śatapatha Brāhmanas.

---

91. सायण (on ऐ आ. 37 2 where also these words occur) explains 'साम्राज्यं धर्मेण पालनं भौज्यं भोगसमृद्धि स्वाराज्यमपराधीनत्वं वैराज्यमितरेभ्यो भूपतिभ्यो वैशिष्ट्यम्। एतदुक्तमैहिकम्। अथामुष्मिकमुच्यते। पारमेष्ठ्यं प्रजापतिलोकप्राप्तिः। तत्र राज्यमैश्वर्यं माहाराज्यं तत्रत्येभ्य इतरेभ्य आधिक्यम्।'; वायुपुराण 45. 87 says 'अयं लोकस्तु वै सम्राडन्तरीक्षो विराट्स्मृतः। स्वराडन्यः स्मृतो लोकः पुनर्वक्ष्यामि विस्तरम्।'

92. आ यद्वामीयचक्षसा मित्र वयं च सूरयः। व्यचिष्ठे बहुपाय्ये यतेमहि स्वराज्ये ॥ ऋ. V. 66. 6.

The Aitareya Brāhmana mentions by name twelve emperors of ancient India and the Śatapatha thirteen (XIII. 5 4 1-19) Pāṇini explains (V. 1. 41-42) 'sārva-bhauma' as 'the lord of the whole earth'. The Amarakośa states that the words 'rāj', 'pārthiva', 'kṣmābhṛt', 'nṛpa', 'bhūpa' and 'mahīkṣit' are synonyms and mean 'king', that a king before whom all feudatories humble themselves is styled 'adhīśvara', 'cakravartin', 'sārvabhauma' i. e these three last words are synonyms The word 'cakravartin' is derived[93] by Kṣīrasvāmin as 'one who wields lordship over a circle of kings' or 'who makes the circle (i e kingdom) abide by his orders'. The word 'cakravartin', though not so ancient as 'sārvabhauma', has been employed from very ancient times The Maitrī Upaniṣad 1 4 mentions[94] 15 cakravartins The Rājanītiprakāśa (p. 58) quotes[95] a passage from the Sāmavidhāna Brāhmana (III. 5. 2) 'the priest should perform the coronation with the Ekavṛṣa Sāman for that king whom he desires to be the sole ruler and whose circle of territory (he does not desire) to be overwhelmed (by an enemy)'. Here probably is one of the earliest references to the derivation of the word cakravartin. In the Mahāvagga (Selasutta, S B E. vol X p 102), Lord Buddha is made to say 'I am a king, an incomparable, religious king (dharmarāja); with justice (dhammena) I turn the wheel, a wheel that is irresistible'. Here the idea of the secular cakravartin is carried into the moral and spiritual sphere. In the Nānāghāt Inscription (of about 200 B C) occurs the word 'apratihatacakasa' (i. e —cakrasya) Vide A S W I, vol. V p 50 at p.60. Khāravela is styled Kalinga-cakravartin in the Mañchapuri record of his chief queen (E I. vol XX p 86n), 'supavatavijaya-caka' (supravṛttavijaya-cakra, in l. 14) and 'pavata-caka' (pravṛtta-cakra in l 17) of his Hāthigumphā Inscription (E I. vol. XX at pp. 88-89) Kautilya (IX. 1) defines the land of the cakravartin[96] as the territory on the earth spreading towards the

north from the sea to the Himālaya, which is a thousand *yojanas* in extent when measured in a straight line. The same idea occurs in the Kāvyamīmāṁsā of Rājaśekhara (p. 92). Kautilya also employs the expression 'cāturanto rājā' (a king of the earth up to its four boundaries). Śānti-parva[97] speaks of a ruler who brings the whole earth under one umbrella. On the birth of Harsa, the chief astrologer told his father Prabhākaravardhana that the boy would be the leader of the seven cakravartins (Harsacarita IV). In some works the six cakravartins are said to be Māndhātā, Dhundhumāra, Hariścandra, Purūravas, Bharata, Kārtavīrya. The Sabhāparva (15. 15-16) mentions five emperors of old viz. Yauvanāśva (Māndhātā), Bhagīratha, Kārtavīrya, Bharata and Marutta. Vide Dr. N. N. Law's 'Aspects of Ancient Indian Polity' pp. 17-21 for exhaustive lists of ancient emperors, from the Mahābhārata, the Śatapatha Brāhmana and other works. This ideal of cakravartin was set before them by all ambitious and energetic Indian rulers from ancient times. The result was that constant wars took place. We have a galaxy of historical emperors that emulated such mythical heroes and emperors as Māndhātā and Bharata and practically realized the ideal. To name only a few, Candragupta, Aśoka, Pusyamitra, Bhavanāga of the Bhāraśivas, Pravarasena Vākātaka, Samudragupta and Harsa are great names in our ancient history. Even if this ideal of universal empire had not been there, wars could not have been avoided. That was a very usual thing everywhere in the ancient world. Only about 700 years ago, Britain, which is a very small country compared to India, had three kingdoms engaged in constant warfare.

The Matsya-purāna (114 9-10) first gives the dimensions of Bharata-varsa from South to North (from Cape Comorin to the source of the Ganges) as one thousand yojanas, states that its extent is ten thousand yojanas (when measured upwards across the boundaries) and that on all borders of it there are Mlecchas and that Yavanas and Kirātas dwell to its east and west (verse 11) and that the king who conquers the whole of Bharatavarsa is styled 'samrāt' (verse 15). Vide Brahmapurāna 17. 8 ff for almost the same words. The Śukranītisāra (I. 183-187) states that a sāmanta is one whose yearly revenue is from 1 to 3 lakhs of silver karsas without oppressing the people, the revenue of a māṇḍalika is from 4 to 10 lakhs, that of a rājan is from 11 to 20

97. य इमां पृथिवीं कृत्स्नामेकच्छत्रां प्रशास्ति ह। शान्तिपर्व.

lakhs, of a mahārāja from 21 to 50 lakhs, of a svarāt from 51 lakhs to a crore, of a virāt from two crores to ten, of the sārvabhauma (who wields suzerainty over the whole earth i. e Bharatavarsa) from 11 crores to 50. Though these definitions may be regarded as scholastic and too rigid to have been practically followed they do convey a sufficiently clear idea about the power of a feudatory, a king and an emperor. The Sabhāparva[98] (15. 2) says 'there are kings in each house, who do what pleases them, but they do not reach the position of emperor, which title can be acquired with great difficulty', and 'that king under whose sole dominion the world abides secures the position of *samrāj*'. In these and other places 'world' means 'Bharatavarsa' for which see H. Dh vol. II pp 17–18. Sovereignty (sāmrājya) consisted in ancient India not necessarily or invariably in acquiring control over vassal kings in all their affairs Generally the supreme ruler did not hanker after territory so much as after having his superior prowess acknowledged. The descriptions of *digvijayas* (world conquests) in the Mahābhārata (e g. of Pāndu in Ādi 113, of Arjuna and the other Pāndava brothers in Sabhā, chap. 26–32) show that there was no aggrandizement by acquiring fresh territory but all that was desired was to make the several kings submit and pay tribute or offer presents Arjuna expressly says in Sabhā 25 3 that he would bring tribute from all kings and the conquered kings are generally represented as submitting and making presents of gems, golds, horses, cows to the conqueror. The Allahabad stone pillar[99] Inscription of Samudragupta (Gupta Ins p 8) states that the *pratyanta* (bordering) kings of Samatata and other countries and the Mālava and other tribal oligarchies fully gratified Samudragupta's commands by giving all tribute, by obeying his orders and by coming to perform obeisance Śānti 96 insists that conquests should be made according to dharma Empire did not mean imposition of the language or the government system of the conqueror on the conquered country The conqueror's duty as understood by ancient Indian works was quite different

98 गृहे गृहे हि राजान स्वस्य स्वस्य प्रियंकराः । न च साम्राज्यमाप्नोति सम्राडशब्दो हि कृच्छ्रभाक् ॥ सभा 15 2, प्रभुर्यस्तु परो राजा यस्मिन्नेकवशे जगत् । स साम्राज्य महाराज प्राप्तो भवति योगत ॥ सभा 14. 9–10.

99 समतट-डवाक-कामरूप ..... कर्तृपुरादिप्रत्यन्तनृपतिभिर्मालवार्जुनायनयौधेयमद्रकाभीरप्रार्जुनसनकानिककाकखरपरिकादिभिश्च सर्वकरदानाज्ञाकरणप्रणामागमनपरितोषित-प्रचण्डशासनस्य । Gupta Inscriptions p. 8.

as will be presently shown. Kautilya (XII. 1) declares[100] that there are three kinds of invaders, viz. *dharmavijayin* (who is satisfied with mere submission or obeisance), *lobhavijayin* (who is satisfied with gain in land and money), *asuravijayin* (who is not satisfied with land and money only but robs the defeated king of his son, wife and life). The Nitivākyāmrta (pp. 362–363, Yuddhasamuddeśa) defines the three almost in the same words. This shows that in the first two kinds of conquests the conquered state retained its own institutions, organization and government intact. Bāna gives[101] in very striking language what Harsa proclaimed when he started against the treacherous king of Gauḍa and on *digvijaya*. It appears that even the queens of vanquished chiefs had to perform the duties of maids at the time of the coronation of the emperor and empress, as queen Yaśomatī says to Harsa (in Harsacarita V). Vide Sabhā 31. 73–74 where Bibhīsana is said to have come with presents to Sahadeva. Aśoka (in Kalsi Edict No. XIII in C. I. I. I, pp. 44 and 46, ed by Hultzsch) speaks of his conquest being *dharma-vijaya*. This means that he foreswore greed and cruelty and wanted that his influence be only acknowledged. The Pallava king Śivaskandavarman (of Kāñcī) who had performed the Agnistoma, Vājapeya and Aśvamedha sacrifices calls himself *dhamma-mahārājādhirāja* (a dharma-vijayī emperor) in E. I. vol. I. p. 5. In the Dudia plate of Pravarasena II, Prthvīsena is styled dharma-vijayin (E. I. vol. III p. 258 at p. 261). Samudra-gupta's conquest of South India seems to have been only a dharmavijaya. As time went on the titles of kings grew in grandiloquence. Aśoka whose empire extended at least from Afganistan to the Bay of Bengal and included some part of the Deccan and Mysore calls himself '*rājō*'. Khāravela is styled only mahārāja and Kalingādhipati in the Hāthigumphā Inscription.

---

101. सर्वेषां राज्ञां सज्जीक्रियन्तां कराः करदानाय शस्त्रग्रहणाय वा गृह्यन्तां दिशश्चा-मराणि वा नमन्तु शिरांसि धनूंषि वा कर्णपूरीक्रियन्तामाज्ञा मौर्व्यो वा शेखरीभवन्तु पाद-रजांसि शिरस्त्राणि वा घटन्तामञ्जलयः करिघटाबन्धा वा मुच्यन्तां भूमय इषवो वा समा-लम्ब्यन्तां वेत्रयष्टयः कुन्तयष्टयो वा सृष्टिः क्रियतामात्मा मज्जरणनखेषु कृपाणदर्पणेषु वा । हर्षचरित VI.

Huviska, the Kusana emperor, is styled *Mahārāja-rājātirāja-devaputra* (E I. vol. I. pp. 371, 386). Samudragupta is simply mahārāja (Gupta Inscriptions p 8). But later emperors styled themselves paramabhattāraka-mahārājādhirāja (Gupta Inscriptions p. 70, Indore copperplate of Skandagupta of Gupta year 146 i. o. 465–66 A. D.) or sometimes 'parama-bhattāraka-mahārājādhirāja-parameśvara' (Gupta Inscriptions No. 39, p. 176 copperplate of the Valabhi king Śīlāditya in 447 of the Valabhi era i. e 766–67 A. D). Ancient works are not very particular about the epithets they employ when speaking of a king or an emperor Sānti (68 54) says that a king is praised with the epithets rājan, bhoja, virāt, samrāt, ksatriya, bhūpati and nrpa.[102] Dasaratha is styled rājā in Ayodhyā 2 2. and mahārāja in 18.15 and 57.32. The Rājanītiratnākara (pp 3–4) holds that kings are of three kinds; viz. emperor (samrāt), one who pays tribute and one who does not pay even tribute (but is not a samrāṭ), quotes several verses from a work of Nārada on politics and states that the words cakravartin, samrāt, adhīsvara and mahārāja are synonyms. Kings aspiring to be called samrāt performed the Rājasūya and Aśvamedha in ancient India. The Sabhāparva 13.30 speaks of Rājasūya as fit to be performed by a samrāt. Senāpati Pusyamitra (about 180 B C) is said to have performed two Aśvamedhas (vide E. I vol XX p 54, 57). The Ghosundi Inscription (E I. vol. 16 p. 25 and E I. vol 22 p 198) speaks of Sarvatāta, a great devotee of Visnu, as a performer of Aśvamedha. Khāravela (who was a Jain) performed Rājasūya (E. I. vol. XX at p 79) The Vākātaka king Pravarasena I had performed four Asvamedhas (E. I. vol. III p 258 and Gupta Inscriptions No 55). In the Vākātaka copperplates the Bhāraśivas are extolled as having performed ten Aśvamedhas (E. I. III 258 at p. 260) The Sālankāyana king Vijayadevavarma, whose capital was at Vengi in Āndhra, is said to have performed an Aśvamedha (E. I. IX p 56, about 350 A D) The Cālukya king Pulakeśin I had performed Asvamedha (E. I. vol. VI p 1 and IX. p 100) about 550 A D Pusyamitra is styled simply Senāpati in the Mālavikāgnimitra Act V when he sends a message to his son about attending the Rājasūya in which he had been engaged For the significance of the Abhisecanīya rite in Rājasūya vide H of Dh. vol. II pp 1216–1218. The Kadambas are said to have performed Aśvamedhas in the Nilambur plates (E. I. vol. VIII p. 148) The Visnukundin

102 राजा भोजो विराट् सम्राट् क्षत्रियो भूपतिर्नृपः । य एभिः स्तूयते शब्दैः कस्तं नार्चितुमर्हति ॥ शान्ति 68. 54.

Mahārāja Mādhavavarman performed eleven Aśvamedhas and one thousand Agnistomas (I. H. Q vol. IX p 278). Vide H. Dh. vol II pages 1238–1239 for a few more historic examples of the performers of Aśvamedha.

Kautilya (VII. 16) prescribes that the conqueror should not covet the territory, wealth, sons and wives of the slain (in battle), that he should re-instate the late king's kinsmen in their proper places (or positions), that he should instal the son of the deceased king on the throne of his father and adds that the emperor who kills or imprisons the kings that submit and covets their lands, wealth, sons or wives provokes the *maṇḍala* (the circle of States) and makes it rise against himself. Yājñavalkya (I. 342–43) prescribes that it is the duty of the conqueror to protect the conquered country in the same way as his own country and the conqueror is to respect the customs of the conquered country, its laws and the usages of the families therein

The Visnudharmasūtra[103] (III. 42 and 47–49) enjoins upon the conqueror not to uproot the usages of the conquered country, to establish in its capital some kinsman (of the slain king) and not to destroy the royal family unless it be of low birth Manu (VII. 202–203) and Agnipurāna 236·22 prescribe similar rules. The Rāmāyana (VII. 62·18–19) requires the conqueror, after uprooting the king, to establish another king there in order to ensure stable government. Vide Sānti 33·43–46 quoted above on p. 40. Kātyāyana (q in the Rājanītiprakāśa p. 411) prescribes that even when the (vanquished) king is at fault, the conqueror should not ruin the country (for the fault of the vanquished king), since he (the vanquished king) did not start (on his career of) wrong-doing with the consent of his subjects. The Rājanītiprakāśa draws from this the conclusion that the ministers with whose consent the war was started may be harassed by the conqueror. This advice was generally followed by ancient conquerors and emperors. Rudradāman (150 A. D.) is styled the establisher of kings that had lost their territories (in the Junāgadh Ins., E. I. vol. VIII at p. 44) and in the Allahabad Stone Pillar Inscription of Samudragupta it is said that his fame travelled over the whole world because of his

103. परदेशावासौ तद्देशधर्मांश्चोच्छिन्द्यात् । ... राजा परपुरावासौ तु तत्र तत्कुलीनमभिषिञ्चेत् । न राजकुलमुच्छिन्द्यात् । अन्यत्राकुलीनराजकुलात् । वि ष्णुधर्मसूत्र. III 42, 47–49; दुष्टस्यापि नरेन्द्रस्य तद्राज्यं न विनाशयेत् । न प्रजाक्षमतो यस्मादन्यायेषु प्रवर्तते ॥ कात्यायन quoted by राजनीतिप्र p 411, which adds येषामम.त्यादीनामक्षमत्वाऽन्याये मङ्गचित्तान् पीडयेदेवेति ध्येयम्.

having re-established several royal families that had lost their kingdoms (Gupta Inscriptions, p 8). The Śukranītisāra (IV. 7·397–399) requires the conqueror to support the well-behaved son and the queen of the vanquished king or to give a fourth of the conquered kingdom to him and only $\frac{1}{8}$th part of it to one who is not endowed with good qualities and the conqueror may appropriate the whole treasury of the conquered

The coronation of a king was a very solemn and important ceremony. Reasons of space forbid any lengthy treatment but something must be said about it. In the mediæval text-books, various procedures are described from different sources The Rājanītiprakāśa (pp. 42–112), the Nīti-mayūkha (pp 1–13) and the Rājadharmakaustubha (pp. 237–374), the Rāja Dh K (II. pp. 6–10) quote procedures of coronation from the Ait Br., the Gopatha Br., the Sāmavidhana Br, the Brahmapurāna, the Visnudharmottara and other works The procedure from the Purānas probably originated when persons of the śūdra caste frequently became kings. The Rājanītiprakāśa[104] (p 112) says that there being different procedures of coronation rites based on Vedic texts, some hold, following the dictum of Śabara (on Jaimini II. 4 9), that the coronation rite should comprehend all the different items mentioned in the several vedic texts (provided they do not contradict each other), while others hold that there should be no comprehensive inclusion of all items but each vedic or smrti procedure should be followed separately by itself. Mitramiśra concludes that the purohita should follow that course which is nearest to his own śākhā The Rājadharmakaustubha (p 339) says that as the rite described in the Visnudharmottara contains the largest number of details, one who is able to do so, may follow that Purāna, while for those who cannot do so there is an option or students of the Rgveda may follow the Rgvidhāna mode, of the Sāmaveda the Sāmavidhāna Br and all may follow the Purāna mode of coronation I shall first briefly indicate what procedure was followed in some vedic texts such as the Gopatha Brāhmana, the Sāmavidhāna Br. and in the Grhyasūtras, then point out what was done in the times of the

104. पूर्वोक्तानां श्रौतानामभिषेकाणामविरुद्धानामेकत्रोपसंहारेणैकोभिषेकः कार्यः सर्वशाखाप्रत्ययमेकं कर्मेति न्यायादित्येके । अन्ये तु श्रौतानां स्मार्तानां च तत्तच्छृतिस्मृतिपठितानामङ्गोपसंहारेणैकैकप्रयोगमिच्छन्ति । तदेवं यस्य पुरोहितस्य स्वशाखाविहितत्वेन यः पक्षः सन्निहितस्तेनैव तेनाभिषेकः कार्यः । राजनीतिप्रकाश p. 112 On एकं वा सयोगरूपचोदनारूयाविशेषात्, (Jai II 4 9) Śabara remarks न चैतदस्ति यद्वक्तुं शाखान्तरेषु कर्मभेद इति। सर्वशाखाप्रत्ययं सर्वब्राह्मणप्रत्ययं चैकं कर्म। अर्थसयोगस्याविशेषात्.

epics and set out the prominent items in the procedure of the purāṇas.

The Aitareya Brāhmaṇa (38) describes the Great Coronation of Indra (*Aindra mahābhiṣeka*) and in that connection mentions how the kings of the Sātvatas in the south were called 'Bhoja' after coronation, the kings of the eastern countries were called 'samrāt', the kings in the west were called 'svarāt' and the kings of the north i. e. of countries beyond the Himālaya (viz. Uttarakurus and Uttaramadras) were called 'virāt'. Then (in 39) it states that the ksatriya king is to be made to take an oath and is to be crowned in the manner of the Aindra Mahābhiseka[105]. The oath which the ksatriya is to take before the priest with faith is: 'the merit of sacrifices and good works that belongs to me from the night I was born up to the night on which I shall die, my worlds, good deeds, life, progeny,—these you may destroy if I hate (or prove false to) thee'. Vide note 41 above for the coronation oath in Śānti 59. 106 ff. It will be noticed that this passage of the Ait. Br. contains no undertaking given by the king to the people to rule according to dharma or for their welfare. So this passage cannot strictly be interpreted as postulating a contractual basis for the authority or power of the king, as done by Jayaswal ('in Hindu Polity' part II. p. 28). The Ait. Br. sets out the materials (*sambhāras*) for the coronation of a king (in chap. 39·2) viz. fruits of nyagrodha, udumbara, aśvattha and plakṣa trees, grains of small rice, large-sized rice, priyangu and barley, a couch of udumbara with span-long feet, a spoon with a four-cornered scooped basin of udumbara and an udumbara vessel, on one of which two the other materials were to be placed and curds, honey, clarified butter and rain water gathered when the sun is shining. The mantras to be recited are mentioned in 39·3–4 and the fee in 39·6. In the Rājasūya (to be performed only by a ksatriya) described in the Brāhmaṇas and sūtras, the principal rite is the Abhisecanīya in which the king is bathed with waters brought from seventeen sources in seventeen vessels of udumbara wood. Vide H. Dh. vol. II. pp. 1216–1218 for the rite. The Rājanītiprakāśa (p. 92–107) explains the procedure of coronation from the Ait. Br. In the Rājasūya, among the preliminary rites are the offerings

105. एतेनैन्द्रेण महाभिषेकेण क्षत्रियं शापयित्वा अभिषिञ्चेत् ... स ब्रूयात्तह अद्भ्या। यां च रात्रिमजायेहं यां च मेतास्मिन वद्वभयमन्तरेणेष्टापूर्तं मे लोकं सुकृतमाद्धः प्रजां वृङ्गीया यद्दिं ते द्रुह्येयमिति। ऐ. ब्रा. 39. 1.

called 'ratninām havimsi' (the offerings in the houses of the jewels, which are twelve). Vide H. Dh. vol. II pp. 1215-16. They have a symbolical value. The person to be crowned recognizes the importance of his high functionaries and is declared to be their king and they are supposed to approve of him as king. In the Abhisecanīya rite of the Rājasūya, there are two parts, a religious and a popular. First, the adhvaryu and the other priests sprinkle the king with holy water collected from various sources in vessels; then the king's brother, a friendly ksatriya and a vaiśya also sprinkle him with the holy water. This last is symbolic of the popular approval of the coronation.

The Tai Br. II. 7. 15-17 deals with coronation. It first gives the seven mantras for seven *āhutis* that are offered. A tiger skin is spread on which the king is seated and he is sprinkled with holy water in which sprouts of barley and dūrvā grass are mixed up; the king ascends a chariot to the accompaniment of mantras, then the four wheels of the chariot are touched, the purohita and charioteer are addressed with mantras; Anumati, the Earth (as mother), and Heaven (as father) are implored to approve of the coronation, the king is made to look up towards the Sun and then the king looks on the subjects; the king then undergoes shaving when seated on a chair of udumbara wood, then his arms and head are anointed with milk blended with clarified butter

The Nītimayūkha pp. 4-5, Rājanītiprakāśa pp 42-43, Rājadharmakaustubha pp. 335-336 quote a passage from the Gopatha Brāhmana[106] on the rites of coronation as follows.— We shall expound the rite of the coronation of the king Having

106. आथर्वणगोपथब्राह्मणे—अथ राज्ञोभिषेकविधिं व्याख्यास्यामः। बिल्वप्रभृतीन्सम्भारान् संभृत्य षोडशकलशान् षोडश बिल्वानि वल्मीकस्य च मृत्तिकां सर्वाणि सर्वसान् सर्वबीजानि। तत्र चत्वारः सौवर्णाश्चत्वारो राजताश्चत्वारस्ताम्राश्चत्वारो मृन्मया. कुम्भा. । तान् ह्रदे सरसि षोडशसु तो नामैनाम इक्षुदकेन पूरयित्वा वेदिपृष्ठे संस्थाप्य कुम्भेषु बिल्वमेकैक वृथात् । सर्वाश्च सर्वसान् सर्वबीजानि च प्रक्षिप्याभयैरपराजितैराप्युच्यैः स्वस्त्ययने सौवर्णेषु संपातान्, संस्राव्यैः ससिक्तीयैश्चैव राजतेषु, भैषज्यैरहोरात्रेषु, सवेशसवर्णाभ्या शन्तातीयैः प्राणसूक्तेन च मृन्मयेषु। ततस्तान् कलशान् गृहीत्वा श्रोत्रियैः पवित्रवतमै राजानमभिषिञ्चेत् । भूमिमिन्द्रं च वर्धयित्वा क्षत्रिय म इति (इमामिन्द्र वर्धय क्षत्रिय म इति?) सिंहासनमारूढमभिमन्त्रयेत् । एवमभिषिक्तस्तु रसान्प्राश्नीयाद् विमेभ्यश्च, वृषाङ्गोसहस्र सदस्येभ्यः कर्त्रे ग्रामवरम्। विपुलं यशः प्राप्नोति सुरुक्ते धरा जितशत्रुः सदा भवेदिति। राजनीतिप्र. pp. 42-43, राजध कौ. pp. 335-336, नीतिमयूख pp 4-5. There are a few variants due to the scribes and the editors not being able to read the Mss properly. The कौशिकसूत्र 17. 28 reads 'इमामिन्द्र वर्धय क्षत्रिय मे which is अथर्ववेद IV. 22. 1.

collected the materials required such as bilva fruit, viz. sixteen jars, sixteen bilva fruits, earth from an ant-hill, all kinds of husked grains, all liquids, and all kinds of grains (unhusked). There should be four jars each of gold, silver, copper and clay. Having filled them, keeping their mouths up, with water from a deep reservoir of water or a lake to the accompaniment of the mantra 'nāmainām a' (?) and having put the jars down on the surface of the altar, he (the priest) should place one bilva fruit apiece in each of the 16 jars and cast (into the jars) the husked and unhusked grains and all fluids, adding them (to the water) in the golden jars with the mantras called Abhaya (Atharvaveda 19 15), Aparājita, Āyusya (Atharvaveda I. 30) and Svastyayana [107] (Atharvaveda I. 21, VII. 85. 1, VII. 86. 1, VII 117.1), in the silver jars, with the mantras called samsrāvya (Atharvaveda 19.1) and Samsiktiya (Atharvaveda II. 26), in the copper jars with the mantras called Bhaisajya (Atharva VII. 45 'janād') and Amhomuc and in the earthen jars with Samveśa, Saṁvargya and Śantātiya mantras and with the Prāna hymn (Atharvaveda XI. 4). He should then bathe the king with (the water of) the jars held by very holy and learned brāhmaṇas (śrotriyas). He should consecrate the king seated on the throne with the mantra (Atharvaveda IV. 22.1) 'O Indra, make this my ksatriya prosper'. (The king) being thus bathed should eat the several liquids, should make gifts of a thousand cows to the brāhmaṇa priests who assist the chief priest, bestow a good village on the chief priest He (the king) thereby acquires great glory, enjoys the earth and always vanquishes his foes'.

---

107 For Svastyayana vide H. Db II. p 83 (*n*). For Āyusya vide Kauśikasūtra 52 18; for Abhaya, Kauśika 16. 8; for Aparājita hymns Kauśikasūtra 14 7 note, for Svastyayana, Kauśika 8. 2 n; the Śantātiya are Atharvaveda I. 6 1, I. 33 1, VII 68, VII 69 1 &c. The Amhomuc verses are Atharva IV 23 29 Vide Nitimayūkha p.25 for Aparājita mantras. The राजधर्मकाण्ड (p. 7) quotes from the अङ्गपुराण a long passage in which the mantras to be recited by the purohita are stated to be these 'ऋषोदश महामन्त्रान् तर्पयेज्जातवेदसि । गणं चैवाप्रतिरथं सत्यधर्मगणौ तथा । आयुष्यमभयं चैव तथा स्वस्त्ययनं परम् । वैष्णवानथ मन्त्रांश्च तथा पौरन्दरानपि । सावित्रबार्हस्पत्यांश्च वारुणानथ सर्वदा' ॥ and explains ऋताषाडिति ऋषोदश मन्त्राः । गणाः ईड्यगन्धाभृतेत्यादयः । अप्रतिरथः आशुः शिशान इति । सत्यगणः आगात्सत्यमिति । धर्मगणः यास्ते अग्ने घोरास्तनुव इति । अभयस्वस्त्ययने यत इन्द्र स्वस्तिदा इति । ऋताषाड् is the first word of वाज. सं. 18, 38, अप्रतिरथ is ऋ X 103, आगात् सत्यम् is तै. ब्रा. III. 12 3 2 and यास्ते अग्ने घोरास्तनुवः is तै. ब्रा I. 1. 7. 3, यत इन्द्र is ऋ. VIII. 61. 13 and स्वस्तिदा is ऋ. X 152 2.

The Sāmavidhāna Brāhmana[108] (III. 5) describes a shorter rite: "(The priest) should crown the king when the moon is in the Pusya or Śravana constellation. Having brought waters (separately in separate jars) from famous holy rivers (like the Ganges)[109] and from the sea and having mixed in them rice, barley, sesame and māsa (black beans) grains and curds, honey, flowers and gold, he should bathe the king seated on an auspicious throne made of udumbara wood on which is spread tiger-skin with the hair outside, from horn-pipes cut off from the horns of living cows to the accompaniment of the *rahasya* mantra 'abhrātrvyah' (you are without an enemy &c, Rg. VIII. 21 13, Sāmaveda 399 and 1489). He should bathe the king to the accompaniment of the Ekavrsa hymn (instead of Rg VIII. 21.13) whom he desires to be the sole ruler (of the earth) and whose circle of kings is desired by him not to be overwhelmed by an enemy. On the priest performing the coronation rite the king should bestow the best village, a hundred maid servants and a thousand oows and (the king) should be obedient to him (the officiating priest)".

The Baud. Grhyaśesasūtra (I. 23) contains the procedure of coronation, the whole of which is quoted by the Bālambhattī on the Mitāksarā on Yāj I 309. It is briefly as follows:—On the 5th or 13th *tithi* of the bright half when the moon is in Pusya or Śravana or in any other auspicious constellation (*naksatra*), two brāhmanas are fed (the day previous). Then a worthy *purohita* is chosen, who mutters certain texts. At sunset the purohita makes a lotus-like circle in which are collected the materials viz. waters of the ocean and of rivers mixed with rice, barley, sesame, māsas and *pañcagavya*, and a *bhadrāsana* made of udumbara, a tiger-skin, and golden jars and horns of cows In the north-east part of the palaoe, a *homa* is performed with eight thousand *āhutis* (oblations) of rice &c to the accompaniment of the *vyāhrtis*, the *Gāyatrī* and the *mantra* to Tryambaka

108. सामविधानब्राह्मणेपि—राजानमभिषेक्ष्यन् तिष्येण श्रवणेन वा । व्रीहियवैस्तिलमाषैर्दधिमधुसुमनोजातरूपैर्यशस्विनीभ्यो नदीभ्यः सङ्गम्याभ्योदकान्याहृत्यौदुम्बरे भद्रासने वैयाघ्रे चर्मण्युत्तरलोमन्यासीनं जीवन्तीनां गवा शृङ्गकोशैरभिषिञ्चेद्भ्रातृव्य इति रहस्येन। यं कामयेतैकराजः स्यादिति नास्य चक्रं प्रतिहन्येतेत्येकर्चेणाभिषिञ्चेत् । अभिषेक्ष्ये दृढग्रामवरं दासीशतं सहस्रं तदधीनश्च भवेत् । इति । सामविधानब्रा III 5 1-3 quoted by राजनीतिप्र p 58 and राजध कौ p 338, both quote the gloss of Mādhavācārya on this

109 The भारशिवs who became allied to the वाकाटकs by marriage are described as भागीरथ्यमलजलमूर्धाभिषिक्तानां दशाश्वमेधावभृथस्नातानां भारशिवानां E I vol III p. 258

(Tai. S. I. 8. 6. 2). The priest first propitiates the goddess Laksmī with the hymn[110] to Śrī and then washes the crown with cow's urine and dung, milk, curds, clarified butter and with water mixed with *kuśas* to the accompaniment of appropriate mantras, and ties an amulet (*pratisara*), and sprinkles the king and his conveyance (horse). At sunrise next day (the day of coronation) the tiger-skin is spread on the throne, the king sits thereon facing the east, the priest takes the golden jars and sprinkles the king with water falling upon him from the cone-like horns of cows with several mantras (such as those addressed to waters, Varuna &c.). After the king is made to take a bath, a fee of a thousand *nuskas* and a hundred *dāsīs* is paid to the brāhmanas. Then the crown is placed on his head and drums are beaten.

The Kauśikasūtra of the Atharvaveda (in 17.1-10) describes the abhiseka (called *laghu*) performed on the Yuvarāja, Māndalika, Sāmanta and Senāpati and (in 17.11-34) describes the mahābhiseka of the king.

In the Rāmāyana there are numerous references to coronation. In the Yuddhakānda 131 we have a lengthy description of the coronation of Rāma. Some of the salient features are: Rāma was shaved that day, had a bath and put on costly clothes. Sītā also was suitably dressed and ornamented. Rāma sat in a chariot and went through the capital, when Bharata held the reins, Śatrughna held the umbrella, Laksmana the white *chowrie*; then Rāma rode an elephant; drums were beaten and conches were blown; as auspicious signs gold, cows, maidens, brāhmanas, men with sweetmeats in their hands passed in front of Rāma; the citizens had raised banners on every house; Jāmbavān, Hanumān and two others brought four jars full of sea-water and waters of five hundred rivers were brought

110. The Visnudharmottara (II. 128. 2-6) states that the hymn to Srī is different for each veda; the hymn of 15 verses beginning with 'Hiranyavarnām harinīm' occurring in the parisista to the Rgveda is the one for Rgvedi, the hymn of four verses beginning with 'rathe aksesu vrsabhasya vāje' (Tai. Br. II 7. 7) is the Śrīsūkta for the Yajurveda, the verse 'srāyanta iva' (267, 1319) for Sāmaveda and 'śriyam dhātur mayi dehi' is the one for Atharvaveda. The Agnipurāna (237. 2-17) contains a hymn to Śrī, which is not vedic but paurānic. Similarly the Rājadharma-kaustubha (pp 367-370) contains a long paurānic hymn (said to have been repeated by Indra) to Śrī which is to be recited while the king was to be seated on the throne after coronation. It is taken from the Visnupurāna I. 9.

in jars; the aged Vasiṣṭha, the family priest, seated Rāma and Sītā on a jewelled throne; Vasistha and other sages sprinkled Rāma with the holy and scented waters, then maidens, the ministers, soldiers, the guilds of merchants also sprinkled Rāma; Vasistha placed an ancient crown on Rāma's head, there was dancing and singing; Rāma gave presents to the priests and to his friends and to such helpers as Sugrīva, Angada, Bibhīsana and others and Sītā gave a necklace to Hanumān. In the Ayodhyākānda 15 we have a description of preparations for the abhiseka of Rāma as yuvarāja. The Raghuvamsa XVII. 10 mentions the coronation of Kuśa's son with waters of holy rivers (tīrthas) from golden jars.

In the Mahābhārata also there are several references to and descriptions of coronation. Vide Sabhā 33 (where people of all castes including sūdras were invited at the Rājasūya, vv 41–42) for the coronation of Yudhiṣṭhira; Śānti 40 (in verses 9–13 the materials for coronation are described); Ādi 44, 85, 101 (only references).

The sambhāras (materials required) of coronation are stated in the Pratimānātaka (I. 1) ascribed to Bhāsa and in the Pañcatantra III (after verse 75)

In the Agnipurāna, chap 218 deals with coronation and chap 219 sets out the mantras The following are the principal items in the ceremony; bath (with water in which sesame and mustard are mixed), seating on bhadrāsana, proclamation of *abhaya* (security and non-injury to all), releasing some prisoners from jail, Aindrī Śānti, fast by king, recital of mantras, sanctifying the head and other limbs of the king with earth taken from the top of a mountain and from other places, sprinkling *pañcagavya*, sprinkling of water from four jars of gold, silver, copper and earth by amātyas of the four varnas, *abhaseka* by a Rgvedin with water mixed with honey, by Chandoga with water mixed with kusa grass, by Yajurvedin and Atharvavedin brāhmanas touching king's head and throat with yellow pigment, singing and beating of musical instruments, holding of chowrie and fan before the king, king's looking into a mirror and clarified butter, worship of Visnu and other gods, sitting on a tiger-skin below which there are four skins viz of lion, *cheeta*, cat and bull; purohita to give madhuparka, to tie patta (a fillet or tiara) round the king's head and to place the crown on his head; presentation of ministers by the *pratihāra*;

king to give presents to the priests and other brāhmaṇas; going round fire; doing obeisance to eldors; touching a bull; worshipping a cow with calf; riding a horse; honouring an elephant and riding it; procession in the capital; honouring all people and taking leave of them.

There are descriptions of the abhiṣeka of a yuvarāja (as of Bhīma in Śānti 41), of a great commander (as of Bhīṣma in Udyogaparva 155.26-32), of Droṇa in Droṇaparva 5.39-43, of Skanda in Śalyaparva 45.

The Rājanītiprakāśa (pp. 49-83), the Rājadharma-kaustubha (pp. 318-363) and Nītimayūkha pp. 1-4 quote from the Viṣnudharmottara almost the whole of chapters 21-22 of the 2nd khaṇḍa that deal with the rites and mantras of coronation. It appears that the Kaustubha appropriates all the glosses of Mitramiśra. The Viṣnudharmottara (II. 19) sets out first the Śānti (propitiatory) rite in honour of Indra (called the Paurandarī or Aindrī Śānti). It is impossible to give the details here, but a few matters may be noticed. The purāṇa (in II. 21) includes all the details from the Vedic texts (such as Svastyayana, Āyuṣya, Abhaya and Aparājita hymns) and adds other rites also. It mentions the procedure stated above from the Agnipurāṇa and employs Vedic mantras in doing so. In II. 22 the Viṣnudharmottara gives purāṇa mantras in 182 verses, in which such gods as Brahmā, Nakṣatras (from Kṛttikā to Bharaṇī), the planets, 14 Manus, 11 Rudras, Viśve-Devas, Gandharvas and Apsarases, dānavas, dākinīs, birds like Garuḍa, nāgas, sages like Veda-Vyāsa, emperors like Pṛthu, Dilīpa, Bharata, vedas and vidyās, rivers &c. are invoked to crown the king.

The Rājadharmakaustubha gives the most elaborate description of coronation. First a śānti rite is performed, then on the next (2nd) day, a sacrifice to Īśāna (Rudra); on the 3rd day worship of the planets and other deities like waters, the earth, Nārāyaṇa, Indra &c and the invocation of nakṣatras; on the 4th day a *yāga* for nakṣatras; on the 5th day at night a sacrifice to the goddess Nirṛti (a clay idol seated on an ass with dark vesture); on the sixth day Aindrī Śānti (propitiatory rite in honour of Indra); then the rites prescribed in the Viṣnudharmottara purāṇa.

The Viṣnudharmottara notes (II. 18. 2-4) that on the death of the reigning king, there is no waiting for an auspicious time.

The successor should be bathed with water in which sesame and mustard are mixed, proclamation should be issued in his name that he has succeeded as king, the purohita and astrologer should show him to the people while he occupies a seat other than that occupied by the late king ; the king should honour the people, proclaim peace and security, set free some prisoners and wait for the formal coronation. The Rājanītiprakāśa (p. 62) adds that on the death of a king his successor should be crowned one year thereafter and that when a king abdicates his successor may be crowned on any auspicious day without waiting for a year. From the fact that the Kaliṅga king Khāravela was crowned in his 25th year and the fact that the Bārhaspatya-sūtra [111] (I. 89–90) states that up to the 25th year the prince may spend his time in play and education and then in earning wealth, Jayaswal (in 'Hindu Polity' part II. p 52) concludes that a Hindu coronation could not take place before the 25th year This is proving too much. The Bārhaspatya-sūtra says not a word about the *age of coronation* Authorities like the Visnu-dharmottara require waiting for a year only after the death of the former king.

The Visnudharmottara [112] (II. 7) specifies at great length the qualities of the principal queen (*agra-mahisī*), which are quoted by the Rājanītikaustubha pp. 249–250 The chief queen should have the coronation rite performed along with the king or she should be separately crowned after the king. Manu VII. 77 advises the king to marry a lady of noble family, of the same caste, of charming appearance and possessed of good qualities. The Rājatarangiṇī (VIII. 82) notes that Jayamati, the queen of the good king Uccala of Kashmir (1101–1111 A. D.) always occupied half his throne.

The Nītimayūkha and Rājadharmakaustubha give the most detailed description of the Aindrī Śānti. For want of space it has to be passed over. The Rājanītiprakāśa (pp. 63–66) and Rājadharmakaustubha (pp 340–346) contain in one place a summary of the whole ceremony after Aindrī Śānti commencing one day previous to the actual day of coronation. One detail of the

112 एवं गुणगणोपेता नरेन्द्रेण सहानघ । अभिषेच्या भवेद्राज्ये राज्यस्थेन नृपेण वा ॥ विष्णुधर्मोत्तर II. 7. 8 on which रा. ध कौ. p 249 remarks राज्ञा सहाग्रमहिषी अभिषेक्तव्या अथवा अभिषिक्तेन राज्ञा पश्चात्स्वयमभिषेक्तव्या इत्युक्तम् ।

rites is interesting, viz. after the learned brāhmaṇas and priests sprinkle the king with holy waters from several jars to the accompaniment of mantras and a Ṛgvedin brāhmaṇa touches the king's head and throat with powder of *gorocanā* with the mantra 'gandhadvārām' (Tai. Ā. X. 1.10), principal virtuous ladies, whose sons are alive, of the four varṇas and also of mixed castes reciting auspicious songs (except the śūdra ladies who remain silent) should sprinkle the king with the waters derived from the sea and other holy places.[113] There is a graphic description of the coronation of Shivaji[113a] the founder of the Maratha Empire in 1674 A. D. in the chronicle (*bakhar*) compiled by Krishnaji Anant Sabhasad (ed. by K. N. Sane, pp. 98–104), where it is said that a costly throne was prepared, from 108 places waters were brought in 108 golden jars (95 *tīrthas* are actually named), Gāgābhatta and other brāhmaṇas officiated and sprinkled waters on the king, large gifts including the sixteen mahādānas were made. Eight ministers stood round the throne (whose names and offices are set out), the head of the ecclesiastical department called Panditrao being to the right and the prime minister (mukhya pradhāna) to the left, an umbrella (chatra) set with jewels was held over his head, new golden coins were struck and a new era was started called 'Rājyābhiṣeka' era commencing from that year. In a small work called 'Shivarāja-rājyābhiṣeka-kalpataru' (published in the quarterly Journal of the Bhārata-itihāsa-saṁśodhaka Maṇḍala at Poona, vol X part I pp. 28–40) in 236 verses it is stated that a Yogin named Niścalapurī, an adept in Tāntrika rites, got a second coronation of Shivaji performed over three months after that performed by Gāgābhatta, with Tāntrika mantras on Wednesday the 5th of the bright half of Āśvina śake 1596, one interesting fact stated being that Shivaji went through a form of marriage with vaidika mantras with his wives that had already been married to him with paurāṇic mantras.

113. ततो मुख्या ब्राह्मणक्षत्रियवैश्यशूद्राः पतिव्रताः पुत्रवत्यो नार्यो मूर्धाभिषिक्ताश्च यथासम्भवं समुद्रादिनानातीर्थाहृतैर्जलैरभिषिञ्चेयुः। शूद्राद्यास्तूष्णीम् । राजनीतिप्रकाश p. 66. Vide also राजधर्मकौस्तुभ p 346 and नीतिमयूख p. 12 for similar words.

113a. For a detailed and graphic description of the coronation of King Shivaji in 1674 A. D. vide 'Shiva-chatrapatimahārāja-caritra' by Malhar Ramrao Chitnis (ed in 1882) pp. 120–125 (in Marathi). Shivaji's upanayana was performed on the 5th of the bright half of Jyestha, for seven days various rites went on; Vināyakaśānti, Grahaśānti, Aindrī and Pauraṇdarī are said to have been performed and he was actually crowned on the 13th of the bright half of Jyestha In Sambhāji-rāje-caritra by the same author (edited by Rao Bahadur K N Sane, 3rd ed. of 1915) at p. 8 there is a description of the coronation of Sambhāji, son of Shivaji.

The symbols of royalty viz the umbrella, the chowries and the cane stick are brought in to the king by principal ministers The Visnudharmottara (II. 12) states that the *cāmara* for the king must be made from the tails of *camarī* deer and must be all white with a handle of gold or silver and that the one for a councillor or purohita should be yellowish, while the same purāna in 11. 13 describes the requisites of a royal umbrella That the umbrella and cāmaras were inseparable emblems of sovereignty is emphasized by Kālidāsa in Raghuvamsa III. 16 Vide the Bṛhatsamhitā, chap. 71 and 72, for cāmara and umbrella

It appears that sometimes a king took another name on coronation which was called *abhisekanāma* Vide Dr. R C Majumdar's 'Champā' p 157 for a list of such names from Champā and Dr. Minakshi's 'Administrative and social life under Pallavas' p. 39 for the Pallava Rājasimha having the coronation name Narasimhavarman Certain kings, when they performed Aśvamedha, assumed new titles e. g Kumāragupta I seems to have assumed the title of Mahendra, as is clear from some of his coins on which his name and title occur

The Brhatsamhitā of Varāhamihira (chap. 48) lays down that the *patta* (tiara) for the king and others should be made of pure gold, that their length should be double of the breadth in the middle of it, that there should be five aigrettes in the king's tiara, three in the queen's and yuvarāja's, one in that of the commander-in-chief and none in the one that the king may give to a person as a mark of favour Utpala in his com on the Brhatsamhitā says that patta is the same as *mukuta*, while acc to the Nītimayūkha (p 13) and other works patta is tied on the forehead and *mukuṭa* (crown) is placed on the king's head Vide Rājanītiprakāsa (pp 54–55) and Rājadharmakaustubha (p. 324) for further details The Visnudharmottara (II. 14) describes the characteristics of *bhadrāsana* (the throne) for the king; vide also Rājanītiprakāśa pp 51–52 It must be made of gold, silver or copper or a tree from which milky juice oozes when cut, it was to be one cubit and half high for a *samrāt*, 1¼ cubit for a king and one cubit high for a feudatory (sāmanta)

The Visnudharmottara (II. 162) states that on every anniversary of the first coronation when the moon is in the same naksatra as that on which the first coronation took place the king should repeat the rites of coronation. The Brahmapurāna

quoted by the R. D. K. (p. 10) also says the same.[113b] Vide Rājanītiprakāśa p. 115 and Kaustubha p. 379 also.

Manu (VII. 217–220) warns the king against poisoning 'The king should partake of food that is well examined and prepared by servants that are trust-worthy (lit. as if they were his own self), that know the proper times (for dining), that cannot be won over and over the food spells destroying poison should have been muttered. He should mix up in all that he partakes medicines that are antidotes against poison and should always wear gems that work against poison. Only women devoted to him and well examined and found safe as regards their dress and ornaments should be allowed to touch him when fanning or bathing him or applying perfumes to his body. The king should take care in this way as regards his vehicles, bed, food, bath, applying perfumes and all ornamentation'. Kām VII. 8 and Matsya 219.10 are very similar to Manu VII. 220. Kautilya (I. 17) states that the king should first secure his personal safety against his sons and wives and then the security of the kingdom against near and distant enemies. He first deals with safety from his own sons, the princes. The opinions of various authors on polity are cited (some of which have been noted above) viz. secret punishment (acc. to Bhāradvāja), keeping under guard in one place (acc. to Viśālākṣa), keeping the prince in a fort under the boundary guard (acc. to the Pārāśaras), keeping the prince away from his own kingdom in a fort belonging to a feudatory (acc. to Piśuna), sending him to his maternal relations (acc to Kaunapadanta), making the prince addicted to sensual pleasures (acc. to Vātavyādhi), proper pre-natal care and proper education after birth about dharma and restraint (acc. to Kaut.). This symposium shows how the problem of the king's safety against bad princes taxed the ingenuity of all ancient writers on Arthasāstra and how Kauṭilya advocated the only reasonable course possible. The Matsyapurāna, chap. 220, also relies on training, discipline and gradual transfer of responsibility and advises the imprisonment of a bad prince in a well-guarded place furnished with comforts suitable to his

113b अनेनैव विधानेन कुर्याद्वर्धापनं सदा। अभिषेकादि यत्नेन प्रतिसंवत्सरं नृपः॥ ब्रह्मपुराण quoted in राजधर्मकाण्ड p 10.

position [114] In I 20 Kautilya gives practical hints against the danger of fire and poisons: e g he says that poisonous snakes will not enter a building provided with Jīvantī, Śvetā and other plants; that cats, peacocks, mongoose and spotted deer when let loose eat serpents, that certain birds like parrots, *mainas*, malbar bird shriek when they suspect snake poison, the heron loses his consciousness in the vicinity of poison, the pheasant (jīvañjīvaka) feels exhausted; the young cuckoo dies, the eyes of *cakora* become redden [115]. Kām (VII 10–13) repeats the words of Kaut 1 20 and the Matsya (219 17–22) refers to the effects of poison on the same birds and a few others The Matsyapurāna in chap 219–220 closely follows Kaut and Kām and appears to be based on them (e g Matsya 219 30 latter half is the same as Kām VII 24 first half) Vide Yaśastilaka III pp 511–512 for the effects of poison on birds almost in the same words as those of Kaut and Kām Vide Śukra I 326–328 Kaut I 21, Kām VII 15–26, Matsya 219 9–32 state that part of the food for the king should first be cast into fire and offered to birds and the effects noted, they dwell at great length on the different tints of the flames of fire and of the smoke when different kinds of food are cast into fire, they point out the actions and gestures of the poisoner, they prescribe that the cook and the doctor giving medicines for mixing in food as antidotes should be made to partake of the food and then the king should himself partake of it The king has to be careful in the harem, when receiving presents or anything sent by others, when sitting in a conveyance or riding a horse or travelling in a boat or when attending festivals (Kaut I 20–21, Kām VII 28–47) Kaut I 20 and Kām (VII 44 and 50) advise the king not to trust women and even the queen and to approach even the queen after she has been examined by men 80 years old and women over 50

115. विरज्येते in कामन्दक VII, 12 is explained by the com. as रागरहिते भवतः.

years in the harem and found[115] safe. Kaut. (I. 20) and Kām. (VII. 51-54) both name seven kings that met death in their queen's chambers by the stratagems of the queens themselves or those that were incited by them; viz. Bhadrasena killed by his brother concealed in the chamber of his queen (who was in love with the king's brother), the king of Karūsa killed by his own son who had concealed himself under the bed of the queen (who was angered by the king's promise to give the kingdom to the son of a rival queen), the king of Kāśi killed by his queen who mixed fried rice with poison pretending that it was honey; the queen of the king of Sauvīra killed him with a jewel in her girdle that was smeared with poison; Vairantya was killed by his queen with her anklet smeared with poison; Jalūtha (or Jarūsa in Kām.) was killed with a mirror (with a razor-like edge) covered with poison; Vidūratha was killed by his queen who had concealed a weapon in her braided hair. The Harsacarita (VI) of Bāna mentions with additional details the cases of Bhadrasena king of Kalinga killed by his brother Vīrasena, the king of Karūsa (Dadhra by name), Kāśirāja (named Mahāsena) whose queen Suprabhā killed him to secure the kingdom to her son, Jarūtha king of Ayodhyā, Vairantya named Rantideva, Vidūratha of the Vrsnis killed by Bindumatī, the Sauvīra king Vīrasena killed by queen Hamsavatī. In the Brhatsamhitā (77 1-2) two of these, Vidūratha and Kāśirāja, are mentioned, but the latter is said to have been killed by his estranged queen with an anklet smeared with poison. Medhātithi on Manu VII 153 quotes four of these seven The Nītivākyāmrta (rājaraksāsamuddeśa 35-36, pp. 231-232) sets out six other examples of kings killed by their queens The king has also to beware of treachery from ministers and officials. Kaut. (in I. 10) describes how ancient writers devised methods of ascertaining the purity or impurity of ministers by putting before them allurements regarding dharma, wealth, sexual desires and playing on their fears and gives it as his own opinion that temptations that have direct reference to the king or queen should not be placed in the way of the ministers. In the Harsacarita VI, Skanda-

116. अन्तर्गृहगतः स्थविरस्त्रीपरिशुद्धां देवीं पश्येत्। ...आशीतिकाः पुरुषाः पञ्चाशत्काः स्त्रियो वा मातृपितृव्यस्नुषाः स्थविरवर्षवराभ्यागारिकाश्चावरोधानां शौचाशौचं विद्युः। कौटिल्य I 20; आशीतिकाश्च पुरुषाः पञ्चाशत्काश्च योषितः। वृध्येरन्नवरोधानां शौचमागारिकाश्च ये॥ न हि देवीगृहं गच्छेदात्मियात्सानिवेशनात्। अत्यर्थवल्लभोपीह विश्वासं स्त्रीषु न व्रजेत्॥ काम. VII 44 and 50. Dr. Sham Sastri's translation (p 46) of Kautilya 'eighty men and fifty women' is not correct

gupta, the commander of the elephant arm of Harsa's army, warns the Emperor against putting trust in everybody and gives 19 instances of kings that met misfortunes, death or destruction through their own carelessness and the stratagems of those about them (apart from the seven mentioned above and two more who fell victims to the wiles of their queens) Some of them are famous and deserve mention here, viz the king of Vatsa (i e Udayana) who was imprisoned by the soldiers of Mahāsena that jumped out of a faked elephant; Maurya Brhadratha killed by his Senāpati Pusyamitra (called 'anārya' by Bāna on account of his treachery to his master); Kākavarna Śaisunāri (Śaiśunāgi?), Sumitra, son of Agnimitra, whose head was cut off by Mitradeva while the king fond of dancing was in the midst of actors, the Śunga Devabhūti killed by his minister Vasudeva; Candragupta (of the Gupta dynasty) who dressed as a charming woman cut off the king of Śakas; the foolish Maukhari king Ksatravarman killed by bards Vide Kāmasūtra V 5 30 for two other examples of the Ābhira king Kottarāja and Jayatsena king of Kāśi The Nītivākyāmrta (Dūtasamuddeśa) p 171 states that Cānakya killed one of the Nandas through a *dūta* and that two other kings met death from presents of poisoned clothes and a jewelled box containing snake poison. The Yaśastilakacampū (III pp 431–432) sets out many instances of kings that met with death from the wrath or the machinations of their ministers, purohita &c

From these examples one should not draw the facile and sweeping conclusion that in India the life of no king was safe. In the vast continent of India there were always numerous kingdoms at the same time It is no wonder that in the course of several thousand years and over such vast territories, some kings met death by treachery and stratagem. This is not a phenomenon restricted to India In a small country like England we have within two hundred years instances of the murder of the boy king Edward V and his brother prince Richard, of Lady Jane Grey nominated by Edward VI as his successor and the further fact that Cromwell during the last few months of his life was afraid of being assassinated During about 150 years from 1789 out of 30 Presidents of the U S A several such as Lincoln, Garfield and McKinley met death at the hands of assassins

The truth is that in a monarchy the king was the pivot of the whole State. As the Matsyapurāna (219.34) finely puts it

'the king was the root and the subjects were the tree; in saving the king from dangers the whole kingdom was on the road to prosperity and therefore all were to make efforts to guard the king'

Hereditary monarchy was the norm of government in ancient and medieval India. Kautilya expressly states (I. 17 at end) that the practice to make the eldest son the king is honoured except in the case of a calamity. At or about the time of Buddha and a few centuries thereafter there were a few oligarchies or (as some scholars prefer to call them) republics. But our Dharmaśāstra or Arthasāstra authorities contain rather very meagre references to them. The Mahābhārata in Śānti 107 furnishes the following data about ganarājyas (government by groups): Internal dissensions are the root of the ruin of *ganas*; it is very difficult to keep lines of policy secret when there are many (when the government is that of many, i. e. an oligarchy or a republic); all members of the gana in their entirety do not deserve to hear the line of policy decided upon, but the chief persons among the ganas should meet together and arrange among themselves to secure the welfare of the whole gana; if disputes that arise among the families (or clans) are connived at by the heads of the clan, the ruin of the clan takes place which leads on to dissensions among the whole group (gana) Danger from internal dissensions must be guarded against (in the case of *ganarājya*), external dangers are not serious (in the case of ganarājya). All members of the gana are equal by birth and family, but they are not equal in energy, intelligence, bodily appearance and wealth. By their enemies ganas are broken by means of internal dissensions and bribes; therefore the greatest safety of ganas lies in union[117]. In these words the author of the Mahābhārata unerringly puts his finger on the weak spots of the rule of many viz. secrecy cannot be kept, there is corruption due to greed and jealousy, which bring about their downfall. In another place (Śānti 81) the Mahābhārata

117. भेदमूलो विनाशो हि गणानामुपलक्ष्यते। मन्त्रसंवरणं दुःखं बहूनामिति मे मतिः॥ 8 ... न गणाः कृत्स्नशो मन्त्रं श्रोतुमर्हन्ति भारत। गणमुख्यैस्तु संभूय कार्यं गणहितं मिथः। 25 ... कुलेषु कलहा जाताः कुलवृद्धैरुपेक्षिताः। गोत्रस्य नाशं कुर्वन्ति गणभेदस्य कारकम्। आभ्यन्तरभयं ह्येतन्मसारं बाह्यतो भयम्॥ ... ज्ञात्वा च सदृशा सर्वे कुलेन सदृशास्तथा। न चोद्योगेन बुद्ध्या वा रूपद्रव्येण वा पुनः। भेदाच्चैव प्रदानाच्च भिद्यन्ते रिपुभिर्गणाः। तस्मात्संघातमेवाहुर्गणानां शरणं महत्॥ शान्ति 107. 27-32. भेदाद्विनाशः सङ्घानां सङ्घमुख्योसि केशव। यथा त्वां प्राप्य नोत्सीदेदयं सङ्घस्तथा कुरु॥ नान्यत्र बुद्धिशान्तिभ्यां नान्यत्रेन्द्रियनिग्रहात्॥ नान्यत्र धनसंत्यागाद्गणः प्राज्ञेऽवतिष्ठते॥ शान्ति 81. 25-26.

refers to the *saṅgha* of the Vrsnis, of whom Krsna was the president, and the great truth that the ruin of sanghas is brought about by internal dissensions and corruption and it hits off the qualities required in the wise leader of the sangha to be four viz sagacity, forbearance, self-control and giving up the acquisitive spirit The words *sangha* and *gana* are employed as synonyms in the Mahābhārata Pāninī (III 3 86) states that *saṅgha* means gana. Patañjali in his Mahābhāsya (vol II p 356) states that *saṅgha*, *samūha* and *samudāya* mean the same thing Pāninī knows two kinds of sanghas viz *āyudhajīvin* (who practised the profession of arms) and those that were not so and further he also indicates that in the Vāhika country sanghas included [118] brāhmanas, ksatriyas and others (vide V. 3 114). He names the sanghas of Vrkas, Trigartas, Yaudheyas, Parśus (V 3 115–117) as *āyudhajīvin* Kātyāyana by his *vārtika* 'ksatriyādekarājāt sanghapratisedhārtham' on Pāninī IV 1 168 shows that sangha was differentiated from monarchy. Acc to Kautilya (p 53 above) the sangha of the Vrsnis perished when it came in conflict with Dvaipāyana In another place Kautilya says that (in some cases) the kingdom may be ruled by a clan, for the confederacy [119] of a clan is invincible, it is free from the calamity of a kingless State and therefore exists on the earth very long Kautilya devotes one section (Adhikarana XI) to the dealings of the ambitious king with sanghas. There he states that securing the sangha on one's side is far better than securing an army or allies and makes the most interesting remark [120] that the corporation of the ksatriyas and others in

118 In the Karnaparva the country of Vāhikas is severely 'condemned and it is said to be the country between the Indus and the five rivers of the Panjab (chap 44 7) पञ्चानां सिन्धुषष्ठानां नदीनां येन्तराश्रिता. । तान् धर्मबाह्यान-शुचीन्वाहीकानपि वर्जयेत् ॥ In chap 44 10 it is stated that their chief city is Śākala and in verses 11–30 and 35–38 their condemned practices are set out, and verses 31–34 say that the country of the five rivers is called Āratta and Vāhika In Karnaparva 45. 6–13 the interesting fact is mentioned that in that country only one brother in a family acts as a brāhmana should and that their sons do not inherit but their sister's sons take the inheritance Vide 'Indian Culture' vol. VI 129–136 and vol VIII p 85 ff for information on 'Vāhika'.

119 अन्यत्रापद् ऐश्वर्यं ज्येष्ठभागी तु पूज्यते । कुलस्य वा भवेद्राज्यं कुलसङ्घो हि दुर्जयः । अराजव्यसनाबाधः शश्वदावसति क्षितिम् ॥ कौटिल्य I 17.

120 सङ्घलाभो दृष्टमित्रबलाभानामुत्तमः । ... ... काम्भोजसुराष्ट्रक्षत्रियश्रेण्यादयो वार्ताशस्त्रोपजीविनः । लिच्छविकनृजिकमल्लकनन्दकक्कुर-कुरुपाञ्चालादयो राजशब्दोपजीविनः । कौटिल्य XI 1, विशेषतश्च सङ्घानां सङ्घधर्मिणां राजकुलानां ध्रुवनिमित्तो भेदः, तन्निमित्तो विनाश इति । कौटिल्य VIII. 3.

the countries of Kāmbhoja and Surāstra practise *vārtā* (husbandry and trade) and the profession of arms, while those of the Licchivikas, Vrjikas, Mallakas, Madrakas, Kukuras, Kurus and Pāñcālas live on the title of *rājan* applied to them (i.e. they are not cultivators of the soil and soldiers, but are only chiefs or nobles). What Kautilya means by 'vārtā-śastropajīvinah' appears to be that they were agriculturists ordinarily but were ready with their swords to defend their country when occasion required. Kautilya then describes in detail without any scruples how the conqueror may by various subterfuges cause dissensions among the members of the sangha and its leader or leaders (*sangha-mukhya*). In VIII. 3 Kautilya remarks that dissension becomes particularly rife owing to gambling among sanghas and noble clans that have the sangha constitution and they are destroyed. From about the 5th or 6th century A. D. the oligarchic States or Republics became rare and gradually disappeared. We get further data about these ganarājyas from Buddhist works, Greek sources (like the fragments of Megasthenes), coins and inscriptions. Rudradāman (in Junāgadh Inscription of 150 A. D.) boasts that he had uprooted the Yaudheyas who had become puffed up and unbending on account of the title of heroes (*vīra*) that was prominently applied to them among all ksatriyas[121] (E. I. vol VIII. at p. 44). Samudragupta (in the first half of the 4th century A. D.) subjugated the Yaudheyas, Mālavas, Ārjunāyanas &c. In Gupta Inscriptions No. 58 p. 251 there is mention of a *mahārāja-malāsenāpah* who was made their leader by the Yaudheya-gana. The Brhatsamhitā in several places refers to the Yaudheyas and Ārjunāyanas (e.g. 4.25; 5.40, 67, 75; 14.25 and 28; 16.21; 17.19) and speaks of Yaudheya-nrpa in 9.11. Vide Rapson's 'Indian coins' pp. 11 and 15 and Plate II, nos 13-15 and Plate III, no. 20 for the coins of the Yaudheyas and Ārjunāyanas. Arrian writes in 'Indika' (tr. by MacCrindle IX. p. 208, ed. of 1926) 'from Dionysus to Sandrakottos the Indians counted 153 kings and a period of 6042 years, but among them a republic was thrice established'. MacCrindle's 'Invasion of India' (p. 121) speaks of an aristocratic government on the

121 सर्वक्षत्राविष्कृतवीरशब्दजातोत्सेकविधेयानां यौधेयानां प्रसह्योत्सादकेन। E. I. VIII at p. 44, यौधेयगणपुरस्कृतस्य महाराजमहासेनापतेः &c. in Gupta Inscriptions pp. 251–252. Vide Quarterly Journal of the Mythic Society of India (Silver Jubilee number) p. 114 for Yaudheyas, and J. B. O. R. S. vol 23 p. 148.

Hyphasis or Beas The Greek writers describing the invasion of Alexander speak of the democracies of the Oxydrakai (Ksudrakas), Malloi (the Mālavas), the Siboi (Śibis), Sambastai (the Ambasthas) and several others (Vide K. P. Jayaswal's 'Hindu Polity' part I. chap. VIII (pp 63–79) for Hindu Republics mentioned in Greek writings Rhys Davids in 'Buddhist India' pp 19 ff. summarizes the data about Indian republics derived from Buddhist works. On p 22 he gives the names of eleven republican clans with their capitals, some of which like the Śākyas (of Kapilavastu), the Mallas (of Kusinārā and Pāvā), the Videhas (of Mithilā) and Licchavis (of Vesālī) are well-known. Rhys Davids states (p. 19) that the administrative and judicial business of the Śākyas was carried on in a mote-hall (santhāgāra) at Kapilavastu, that a single chief was chosen (but how and for what period is not known) who presided over the sessions and (when no sessions were being held) also over the State, that he bore the title of *rājā* He mentions that at one time Buddha's cousin Bhaddiya was *rājā* and that in another passage Buddha's father Śuddhodana is styled *rājā* He further points out (p. 26) that the Vajjians had eight confederate clans of which the Licchavis and the Videhas were the most important. K P. Jayaswal in 'Hindu Polity' part I pp 25–165 brings together all the data about Hindu oligarchies (or republics as he calls them) and his work deserves the serious attention of all those who are interested in the study of ancient Indian political institutions, though here and there one cannot approve of his interpretations and theories To take only one example, he holds that the procedure prescribed by Buddha for the deliberations of the *sangha* in the Mahāparinibbāna-sutta was borrowed from the procedure followed by the republics in their deliberations and therefore he describes the procedure of the Buddhist *sangha* in great detail ('Hindu Polity,' part I chap XI pp 103–117) Dr D R Bhandarkar also (in 'Some Aspects of Ancient Hindu Polity' pp 121–125) adopts this theory This to say the least is a gratuitous assumption The mere fact that Buddha told the prime minister of Ajātasatru, king of Magadha, who contemplated attacking the Vajjian confederacy, that the latter would not decline but prosper as long as they observed seven conditions and the fact that those very seven conditions were prescribed by the Buddha for the welfare of the sangha do not lead on to the further inference that the procedure followed by the monks in the deliberations of the meeting of the sangha (which is set out in such passages as the Mahāvagga IX 3, S.B E.

vol. XVII p. 264 ff, Cullavagga IV. 9, S. B. E. vol. XX pp. 24-27) was the procedure of the meetings of the oligarchies. The seven conditions (both for the welfare of the Vajjians and the Sangha) are set out in the Mahāparinibbāna-sutta, chap. I. (S. B E. vol. XI. pp. 3-8) viz holding full and frequent public assemblies, meeting together in concord and carrying out undertakings in concord, enacting nothing not already established and abrogating nothing that has been already enacted and acting in accordance with ancient institutions established in former days, honouring and reverting and supporting elders and hearkening to their words, not detaining women or girls of their clans by force or abduction, honouring and supporting Vajjian shrines in town or country and not allowing proper offerings and rites to fall into desuetude, protecting and supporting the Arahats among them. On the most important points in connection with a republic or oligarchy we have no information at all, viz. who were entitled to vote, what were the qualifications for membership of the assembly that governed the State, how voting took place, what was the period for which members of the assembly were elected, whether the president was elected for life or a shorter period or was elected at all, what were the powers and procedure of the assembly. Vide Dr. Beni Prasad in 'Hindu Political Theories' p 158 for criticisms. Rhys Davids (in 'Buddhist India' p. 41) says that according to the Jātakas there were at Vesāli (modern Basadh in the Muzaffarpur District), the capital of the Licchavis, 7707 *rājās* (or chiefs). In the Bhaddasāla-jātaka (Fausboll, vol. IV p 148) there is a reference to a tank reserved for the bath of the families of the ruling chiefs (rājās) of the gana in the city of Vesāli. In the Mahāvastu (ed by Senart vol. I. p. 271) it is stated that there were twice eighty-four thousand nobles (rājānā) among the Licchavis. This explains what Kautilya means by 'rājaśabdopajīvinah. These people called 'rājās' were probably the scions of the several branches of the Licchavis, who had in their hands the government and who were not doing manual (or agricultural) work. Vide Government Epigraphic Report for 1899 p 23 and Indian Historical Quarterly vol. IV p. 652, where it is said that in an inscription from Uttaramallur the extent of land and of Vedic learning required in a candidate for election are specified as also the method of writing on tickets the names of candidates. But such records, even in South India, are very few and refer to village sabhās and there is nothing in the works on dharmaśāstra or arthaśāstra about the methods of

election to political assemblies and the qualifications of candidates. Vide Dr D R Bhandarkar's 'Some aspects of Ancient Hindu Polity' (1929) pp. 101–121 for a concise statement of several types of republics in Ancient India.

Another important question is whether in monarchical states there were popular assemblies of elected representatives or, in modern language, Parliaments. The words 'sabhā' and 'samiti' require consideration in this connection In Rg I 91 20 Soma is said to confer a son who is' *sādanya*, *vidathya* and *sabheya*, from which it follows that sabhā is in some respects different from 'vidatha'. In Rg *II* 24 13 a vipra (a priest or composer of hymns) is said to be *sabheya* 'clever or eminent in a sabhā'. In Rg X 34 6 'sabhā' [122] appears to mean a gambling hall In Vāj S XXX 6 *sabhācara* seems to mean only 'sabhāsad', a member of a judicial tribunal, while in XXX 18 the sabhāsthānu is given up to Āskanda in the symbolic Purusamedha. In the Vāj. S XVI 24 there is an obeisance to *sabhās* and *sabhāpatis* (presidents of sabhās) In Atharvaveda VII 12 1 'sabhā' and 'samiti' are said to be the two daughters of Prajāpati, from which it may by argued that they were very similar but somewhat different. In Atharvaveda XV. 9 2 also *sabhā* and *samiti* are separately mentioned In Tai. Br III. 7 4 the word sabhāpāla occurs and sabhā is explained as 'gambling-hall' by Sāyana In Rg X 97 6 and Vāj S XII. 80 it is said 'that *vipra* is said to be a doctor (bhisak) in whom medicinal herbs come together as nobles (rājānah) in a *samiti* (meeting or battle)'. In Rg. X 191 3 the word 'samiti' seems to mean no more than a meeting or meeting place In Atharvaveda V 19 15[123] we have 'the assembly (samiti) does not suit him (or is not won over by him) who harasses a brāhmana' In the Chāndogya Up. (V 3. 1) Śvetaketu is said to have repaired to the assembly (*samiti*) of the Pañcāla country, where the king Pravāhana Jaivali asked him five questions which the former could not answer and then he approached the next morning the king who was in his *sabhā* Here it seems that both words are applied to the same assembly It is impossible to say how the *sabhā* or *samiti* was constituted in the Vedic period All that we can say is that it was an assembly of people to which the king, learned men and others went. It is extremely doubtful whether it was an elective body Probably it was an *ad hoc* assembly of such people as cared to

122. सभामेति कितवः पृच्छमानो जेष्यामीति तन्वा शूशुजानः । ऋ X 34. 6

123 न वर्षं मैत्रावरुणं ब्रह्मज्यमभिवर्षति । नास्मै समितिः कल्पते न मित्र नयते वशम् ॥ अथर्व V. 19 15

be present. K P. Jayaswal (in ' Hindu Polity ' part I p 11) holds that ' samiti ' in the vedic age was the national assembly of the whole people, that it was the king's duty to attend it (*ibid.* p. 12) and that ' sabhā ' was the standing and stationary body of selected men working under the authority of the samiti (*ibid.* p. 18)'. This is all conjectural, as Jayaswal himself admits ' the *sabhā* was certainly related to the *samiti*, but its exact relationship is not deducible from the data available ' (*ibid.* p. 18).

These frantic efforts by such scholars as Jayaswal to prove that India had elective assemblies are made to counteract the sinister propaganda of many English writers that East is East and West is West and that the democratic institutions of the West cannot be transplanted with success on the soil of India This is mischievous propaganda. There were no democracies even in Europe a few hundred years ago; even in England, France and a few other countries democracies have been introduced and have thrived within a short time There is no reason why they should not do so in India, if honest efforts are made and difficulties are not purposely created by vested interests Korkunov in ' General theory of law ' (tr. by Hastings, 1922, New York p 296) says ' According to the historical school the political organization of England is good for England alone, for it corresponds to a natural genius very peculiar.. .This doctrine of the historical school is false, since we have already seen that a change produced in the social ideal may bring about a change in the whole social development The influence of one people on the life of another is a proof of this The ideal is a force supporting the social life and this ideal may be the result not merely of our own special experience, but also of the experience of neighbouring peoples '.

Two other words require consideration, viz. *Paura* and *Jānapada*. The word ' paura ' occurs in Rg V. 74. 4 where it has three applications, viz. to the Aśvins, to the sage Paura (who was an Ātreya) and to the cloud (acc. to Sāyana). K. P Jayaswal (in ' Hindu Polity ', part II pp 60–108) devotes considerable space to ' Paura ' and ' Jānapada ' and one may at once admit that he displays great learning, industry and ingenuity in his discourse on this subject He holds that the Paura and the Jānapada were elective parliamentary bodies or what may be called the Hindu Diet and he sums up (on p. 108) their functions as follows ' we had an organism or a twin

at p. 45 or in the Rāmāyana II. 2. 51, II. 111. 19 'paurajānapadam janam'). Lastly if the paurajānapada organization had (as said by Jayaswal in the quotation cited above) the power to depose kings and pass even hostile statutes, is it not a contradiction in terms to say that, instead of the Parliament or Diet deciding to remit certain taxes, it was the king who remitted taxes and bestowed favours (or privileges) of lakhs of rupees on the supposedly all powerful Paura-Jānapada assembly? In all passages that he quotes from the Rāmāyana and other classical sanskrit works the ordinary meaning of *paura* (residents of the capital) and *jānapada* (inhabitants of the country other than the capital) is quite enough and it is impossible to hold that any elective body is meant In most passages the plural 'paura-jānapadān' is used. If 'Paura-jānapada' stands for one elective body or two bodies, no explanation is offered why the plural should generally be used and not the dual. Kautilya (I. 19) states that the king should in the 2nd part of the day (divided into eight parts) look into the causes of the paura-jānapadas. Jayaswal (in 'Hindu Polity', part II p. 95) misinterprets this passage by saying that the king had to set apart one period daily for the business of the paura-jānapada assembly. Here again the plural is used and the dictum of Kautilya is the same as that of Yāj. I. 327 who says that the king should look into the law-suits (vyavahārān) of the people. The word 'kārya' is employed by Manu VIII. 43, Nārada and other writers on vyavahāra in the sense of 'law-suit'. Yāj. II. 36 says that the king should restore to the jānapada property stolen by thieves. Jayaswal (in 'Hindu Polity', part II. p. 93) presses the singular 'jānapadāya' into his service and holds that it was the popular assembly that demanded the restoration of the things stolen. This, to say the least, is twisting the plain words of Yāj. The Mit paraphrases the word to mean 'to the person dwelling in his country from whom the property was stolen'. The corresponding passage of Manu VIII. 40 (dātavyam sarva-varnebhyo rājñā corair-hrtam dhanam) is quite clear, since it fortunately does not use the word jānapada and Medhātithi explains it as 'it should be restored to those from whom it was stolen'. Jayaswal (in 'Hindu Polity' part II p. 79) holds that a passage in the Arthaśāstra (II. 14) refers to the fact that the Paura-Jānapada assembly got gold coins minted by the royal mint-master.[124]

124. सौवर्णिकः पौरजानपदानां रूप्यसुवर्णमावेशभिभिः कारयेत् । निर्दिष्टकालकार्यं च कर्म कुर्युः । अर्थशास्त्र II. 14.

But the plain meaning is that the mint-master was to mint standard silver and gold coins for all people when they brought bullion to him to have coins struck One striking circumstance to be considered is that, though in all works on polity a *rājya* is said to have seven elements, none of them includes a political elective assembly (like the paura-jānapada postulated by Jayaswal) among them. They only enumerate the country and the capital and declare even these as of lesser importance than the king and the ministers. Another matter that makes the existence of powerful elective political assemblies in monarchies most unlikely is the total absence of any reference in works on polity to the method of election, the system of voting, the qualifications of members, the period for which the assembly was elected and allied matters When medieval writers like Aparārka on Yāj II 1 (p 600) quote from Brhaspati verses about four kinds of sabhā, they refer only to judicial tribunals of various sorts and grades (the same verses are quoted as Hārīta's in Rājanītiratnākara p 20) Vide n 368 below

If elective popular assemblies did not exist, then it may be asked whether the king was an absolute monarch or a despot or whether there were any checks that mitigated or regulated the power and doings of monarchs. The answer is that there were such checks and limitations These were of various kinds Exhortations addressed to the king himself exercised a restraining influence. For example, Kāt (10) says 'the king who gives way to wrath without proper thought would reside in a horrible hell for half a Kalpa' The importance of dharma as an all-embracing institution was impressed upon the king by our writers so frequently that it must have had its psychological effect on every king The idea that *danda* personified as a Deity might strike down the bad king himself (Manu VII. 19, 27, 28, 30, Yāj I 354–356) would tend to keep even a whimsical king within bounds. The views of ancient writers have already been cited according to which the king was not to act as he pleased, but was to regard his high office as a sacred trust and was to rule according to the dictates of the sāstras These views created public opinion which must have certainly influenced the king's acts The ideal king Rāma is depicted as having abandoned his queen Sītā (whom he knew to be pure) because the people could not accept her as pure after her long stay in Rāvana's prison Vide Rāmāyana VII. 45 Then there were the ministers whose advice the king was enjoined to seek Besides there was the purohita and there were learned brāhmanas,

who were to propound what dharma was, whose directions he was to carry out and who were supposed to have power to ruin a bad king (vide Vas I. 39–41, Gautama XI. 12–14, Manu IX. 320). Vide H. of Dh. vol. II. pp. 138–145 for the peculiar sanctity attaching to the person of a brāhmana and the superior position of brāhmanas as a class *vis-a-vis* the king. There was a deep-rooted faith that the rules of the śāstras (the Śrauta and Smārta dharma) were divinely inspired and were above the king. Observance of dharma was the great social and political ideal from very ancient times for all including the king. This is most emphatically put in the Bṛ. Up. I. 4. 11–14, where it is stated "even after creating the four varnas He (the Creator) did not think that stability had been attained. He then created the most excellent *Dharma* which is the might of the mighty (i e. more powerful than the warrior caste) There is nothing higher than dharma Even a very weak man hopes to prevail over a very strong man on the strength of dharma, just as (he prevails over a wrong-doer) with the help of the king. So what is called dharma is really truth. Therefore people say about a man who declares the truth that he is declaring dharma and about one who declares what dharma is they say that he speaks the truth These two (dharma and truth) are this" (i. e. one).[125] Kāmandaka I. 14 stated that the Yavana king ruled over the earth for a long time because he ruled according to the dictates of dharma. In his administration of justice the king was to be checked by the judge and sabhyas, who were fearlessly to render advice to the erring king (as will be shown in the section on vyavahāra). Besides corporations and guilds were powerful and had a sort of self-government. Manu (VIII. 336 and Yāj. II. 307) went so far as to prescribe a heavy fine which the king was to inflict on himself for his illegal exactions and punishments and to direct that the king should distribute among brāhmanas wealth forfeited by grave sinners (Manu IX. 243–244). Lastly there was the final sanction that the śāstras allowed the subjects to abandon a worthless king or even to kill a misguided one or tyrant, as stated above (vide Manu VII. 27–28, Arthaśāstra I. 4).[126]

---

125 स नैव व्यभवत्तच्छ्रेयो रूपमत्यसृजत धर्मं तदेतत्क्षत्रस्य क्षत्रं यद्धर्मस्तस्माद्धर्मात्परं नास्ति। अथो अबलीयान्बलीयांसमाशंसते धर्मेण यथा राज्ञा। एवं यो वै स धर्मः सत्यं वै तत् तस्मात्सत्यं वदन्तमाहुर्धर्मं वदतीति धर्मं वा वदन्तं सत्यं वदतीत्येतदुभयमेवैतदुभयं भवति। बृह उप I 4. 14

126 दुष्प्रणीतः (दण्डः) कामक्रोधाभ्यामज्ञानाद्ज्ञानपस्थपरिव्राजकानपि कोपयति किमङ्ग पुनर्गृहस्थान्। अर्थशास्त्र I 4.

Kautilya (VIII. 3) when dealing [127] with the evil results of want of discipline in a king states that kings who are hot-tempered are known to have fallen victims to popular fury (or the fury of ministers) We may say that in theory and so far as ordinary people were concerned the sovereign's power was absolute and unlimited as Manu IX. 9–12 aptly illustrate and as Brhat-Parāsara states 'the king is Brahmā, Śiva, Visnu, Indra, he is the giver, the destroyer, and the enforcer according to the karma of his subjects'. But there were (as stated above) very real checks and limitations that effectively prevented him from exercising his undoubtedly unlimited powers These checks, though real, cannot be called constitutional in the sense in which that word is used in modern times. As said by Nārada the subjects are dependent while the king is uncontrolled, but he could not go against the śāstra (vide Haradatta on Gaut XI. 2)

In modern times the activities of a sovereign person are three-fold, viz. executive, judicial and legislative The judicial activities of the ancient Indian king will be dealt with in another section on law and the administration of justice One great difference between ancient and modern societies is that the legislative action of the king was extremely limited in ancient times, while in modern times people are more and more looking to legislation for regulating all manner of things Manu (VII. 13) lays down that since the king has in him the glory of all deities, whatever rule as regards desirable matters the king establishes and whatever action he declares as undesirable among those actions that are harmful, should not be transgressed by any one In his gloss on this verse Medhātithi carefully points out what orders the king can issue and on what subjects he cannot issue orders He gives the following instances of orders of both kinds: 'To-day all should observe a festival in the capital, all should attend a marriage ceremony at the house of the minister; animals should not be killed to-day by the butchers and birds should not be caught. debtors should not be harassed by creditors on these days (to be specified), no one should associate with such and such a man (an undesirable person); no one should allow a certain (undesirable) person to enter the house'. Medhātithi adds that the king is not authorised to interfere with the *śāstric rules* governing the

127. अविनीतो हि व्यसनदोषान् न पश्यति । ताडुपदेश्यामः । कोपजास्त्रिवर्गः कामजश्चतुर्वर्गः तयो कोपो गरीयान् सर्वत्र हि कोपश्चरति । प्रायशश्च कोपवशा राजानः प्रकृतिकोपैर्हताः श्रूयन्ते । अर्थशास्त्र VIII. 3

varnas and āśramas such as the performance of agnihotra.[127a] This gloss of Medhātithi occurs word for word in the Rājanīti-prakāśa (pp. 23-24), which gives a more correct text than the printed editions of Mandlik and Gharpure. Kautilya (II. 10) devotes a chapter to the drawing up of śāsanas, particularly with reference to their linguistic elegance and diplomatic etiquette. The Śukranītisāra (I.312–313) prescribes that the king's edicts (śāsana) should be proclaimed to the subjects by beat of drum, that his edicts should be written and displayed where four roads meet, and that the king should declare that breaches of the orders would entail heavy fines. In I. 292–311 Śukra gives instances of such orders, the most important of which are: Watchmen should take rounds in the several streets every one hour and a half at night in order to prevent thieves and paramours moving about; people should not employ abuse or beating towards their slave, servant, wife, son or pupil; no one should practise deceit in respect of measures, weights, coins, resins, metals, ghee, honey, milk, fat, flour; no document should be got by force; no bribes should be taken nor should any bribes be given to persons engaged in doing the king's work; no one should offer shelter to bad characters, thieves, paramours, those who hate the king, the enemy; parents, persons worthy of honour, learned men, men of good character should not be disrespected or ridiculed; no dissensions should be sown between husband and wife, master and servant, between brothers, between teacher and pupil, between father and son; no interference or obstruction should be caused to wells, parks, boundaries, *dharmaśālās*, temples, roads or to those who are deficient in a limb; without the king's permission no one should engage in gambling, selling liquor, hunting, bearing arms, sale or purchase of cattle or elephants or horses or camels or she-buffaloes or slaves or immoveable property or silver, gold, gems, intoxicants, poisons, drugs, the profession of medicine or should pass a sale deed, deed of gift or give a decision about a debt; no one should falsely accuse another of the great sins, nor take treasure trove, nor frame new rules for clubs or convivial gatherings (*samāja*) nor should publish slander against a caste, nor should appropriate property which is without an owner or has been lost, nor divulge the (king's) lines of policy, nor babble about the vices of the king; the people should not

127a न त्वग्निहोत्रव्यवस्थायै वर्णाश्रमिणां राजा प्रभवति स्मृत्यन्तरविरोधप्रसङ्गात्, अविरोधे चास्मिन् विषये वचनस्यार्थवत्त्वात्। मेधा० on मनु VII. 13.

even think of forsaking their dharma, speaking untruth, committing adultery with another's wife, giving false evidence or fabricating documents, accepting gifts secretly, committing thefts and engaging in other desperate acts, engaging in sedition; public servants should not exact more than the tax already settled; only such weights and measures are to be used as bear the royal stamp; all subjects should strive to possess good qualities; desperadoes should be arrested and handed over to the king; bulls let loose (in memory of the dead) should be kept well controlled and fed by those who let them loose. Medhātithi on Manu VIII 399 states that a king may prohibit the export of foodstuffs from the kingdom in a famine. The several edicts of Aśoka show that his orders were framed on the same lines that are contained centuries later on in the Śukranītisāra. Most of his proclamations insist on moral virtues such as truthfulness, obedience and reverence to parents, elders and preceptors, honouring brāhmaṇas and śramaṇas, kindness to animals, tolerance of other faiths. Proclamations that may be called positive laws are very few, such as his order in Pillar Edict IV to give three days' respite to criminals condemned to death (C I I. vol. I p 125) or his regulations restricting the killing of animals contained in the 5th Pillar Edict (C I I. vol. I. p 138) or in the First Rock Edict at Girnar (p 7) 'no living being must be killed or sacrificed and no festival meeting must be held'. In the reign of Avantivarman of Kashmir the killing of living beings was prohibited for ten years (vide Rājataraṅgiṇī V 64). Law-making in the modern sense is almost entirely lacking in the smṛtis. Gaut XI 19-25 show[128] that the king was to find the law required for the decision of causes from the following, viz (1) the Veda, Dharmaśāstras, the Aṅgas (lores auxiliary to the Veda such as grammar, exegesis, metrics etc.), Upavedas, Purāṇas; (2) customs of countries, castes and families that were not opposed to the Veda; (3) the usages of husbandmen, traders, herdsmen, moneylenders and artizans; (4) ratiocination, (5) the opinions[128a] delivered

128a चत्वारो वेदधर्मज्ञा पर्षत् त्रैविद्यमेव वा । सा ब्रूते य स धर्मः स्यादेको वाध्यात्मविच्चमः ॥ या. I 9, on which विश्वरूप remarks शङ्खोप्याह । श्रुतिविरोधे त्रैविद्यसमवायेषु निर्णयः इति यथावत्प्रेप शास्त्रतस्तेऽनुयुरिति च । These two show that parisad and traividya were more or less synonymous.

by the assembly (parisad) of men deeply learned in the three Vedas. The authoritativeness of customs, usages and conventions and their relation to śāstra will be discussed later on. In the decision of causes there were four deciding factors, dharma, vyavahāra, caritra and rājaśāsana, which will also be dealt with later. So royal edicts or orders first came to be made in the administration of justice and probably served as laws or precedents in later times. Vide H. of Dh. vol. II. pp. 968–970 for the role of parisads in religious matters. Yāj I. 9 and Śankha speak of *parṣat* or assembly of learned men as final authorities on dharma.

The executive functions of the king required a large number of ministers and officers. This topic will be dealt with immediately below.

There is another way of looking at the king's functions viz. they were religious and secular. The first required him to do certain acts for propitiating gods and unseen powers and removing dangers therefrom with the help of the purohita and sacrificial priests (vide Gaut XI. 15–17, Yāj I. 308) and he had to guard dharma. His secular functions included those that led to prosperity, that helped the people in famine and similar calamities, dealing even-handed justice, guarding person and property from thieves and trespassers and against invasion.

The Mahābhārata records the tradition that many kings of former times abdicated the throne in favour of their sons and resorted to the forest as hermits Vanaparva 202.8 mentions Brhadaśva who crowned his son Kuvalāśva. Vide also Vāyu 88.32. Dhrtarāstra says to Yudhisthira that in their family it was customary for kings to transfer the sovereignty to their sons and resort to a forest towards the close of their lives (Āśramavāsi 3.38). Vyāsa says that that was the practice of all *rājarṣis* (Āśramavāsi 4.5) and the Āśramavāsiparva (20) mentions the names of several such kings. Vide also Śānti 21.15. In Ayodhyā 23.27, 94 19 this practice is referred to.[129] In the Raghuvaṁśa (I. 8, XVIII. 7, 9, 26) Kālidāsa says that in the family of Raghu kings in their old age became *munis* (hermits) and in chap. VIII. 11–23 he draws a fine contrast between the lives of Aja and his father Raghu (who had become a *yati*). There are Jain traditions of some antiquity that connect the

129. पूर्वराजर्षिवृत्त्या हि वनवासोऽभिधीयते । प्रजा निक्षिप्य पुत्रेषु पुत्रवत्परिपालने ॥ अयोध्या 23. 27, इदमेवामृतं माद्र राज्ञि राजर्षयः परे । वनवासं भवार्थाय प्रेत्य मे प्रपितामहाः ॥ अयोध्या 94. 19.

great Jain sage Bhadrabāhu, the last Śrutakevalin, with Candragupta Maurya, who is said to have abdicated in favour of his son and to have gone to Śravana Belgola Vide Indian Antiquary, vol 21 pp. 156 ff where Fleet criticizes this tradition and rejects it In the Divyāvadāna (XXIX p 431, ed. by Cowell and Neil) it is stated that Aśoka died destitute of power[130] and possessions and Fleet (in J R A S for 1913 pp. 656–658) says that there is in this probably a reminiscence of abdication by Aśoka King Lavanaprasāda of the Vāghela dynasty in Gujerat abdicated in favour of his son Vīradhavala (1233–38 A. D.). Vide Bombay Gazetteer, vol. I part 1 pp 198, 200, 206

Kautilya (VIII. 2) speaks of a novel rule called 'dvairājya'[131] (sovereignty of two) and distinguishes it from 'vairājya'. The Mss differ in their readings, but the reading given in the footnote by Dr Sham Sastri seems preferable. Kaut remarks "As between dvairājya and vairājya (foreign rule) the former perishes on account of mutual hatred and rivalry; but the latter according to the *ācāryas* is enjoyed by foreigners as it is, when it pays attention to winning over the subjects; 'No' says Kautilya 'dvairājya' (generally) exists between father and son or between two brothers, their welfare is the same and therefore by reason of the influence of *amātyas* (over the two rulers) it can last, but *vairājya* comes into existence by being seized from another king who is living and therefore the (foreign ruler) thinking 'this country is not mine' impoverishes it and carries off its wealth or treats it as a chattel (for sale) or when he finds that the country is disaffected towards him abandons it and goes away". This remarkable passage contains the mentality of foreign rulers in a nutshell. Manu IV 160 in a lucid and laconic manner states how individual and national happiness lies in freedom Kālidāsa in his Mālavikāgnimitra[132] (Act V) appears to refer to the conception

130 अशोक is made to say 'दाक्षिण्यादुक्तं हि किं कथयथ भ्रष्टाधिराज्या वयं शेष त्वामलकार्धनित्यवसित यत्र प्रभुत्व मम । ऐश्वर्यं धिगनार्यसङ्गतनदीतोयप्रवेशोपम मर्त्येन्द्रस्य समापि यत्प्रविभयं दारिद्र्यमभ्यागतम् ॥' दिव्यावदान XXIX p 431

of dvairājya when he makes Agnimitra say that the latter desires to establish a dvairājya for the brothers Yajñasena and Mādhavasena on the north and south banks of the river Varadā, who would both remain under the command of the king (Agnimitra). In the Mahābhārata a similar rule of two brothers, Vinda and Anuvinda in Avanti, appears to be referred to (vide Udyogaparva 166, cr. ed. chap 163). MacCrindle in 'Invasion of India by Alexander' p. 296 quotes Diodorus to the effect that Alexander sailing up the river came to Taula (Patala?) a city of great note with a political constitution drawn on the same lines as the Spartan, for in this community the command in war was vested in two hereditary kings of two different houses, while a council of elders ruled the whole State with paramount authority. Vide Jayaswal's 'Hindu Polity' part I pp. 96-97 and Dr. D. R. Bhandarkar's 'Ancient Indian Polity' p. 99-100 for some further details on dvairājya from Buddhist and other sources

CHAPTER IV

MINISTERS

Amātya—The second of the seven elements of *rājya* is the *amātya*, which word may be translated as 'minister.' There are three words that are interchangeable though sometimes distinguished, viz. *amātya*, *sacıva* and *mantrın*, the first being the oldest of the three. A Kārikā on Pānini (IV. 2 104) teaches the formation of the word with the affix *tyap* (tya) from *amā* meaning 'near or with' (vide Mahābhāsya, vol. II. p 292). In Rg IV. 4. 1[133] there is the germ of this word 'O Agni! Go like a king riding an elephant, accompanied by his ministers'. Yāska (in Nirukta VI. 12) explains 'amavān' as 'amātyavān,' though two more explanations of the word are offered by him. The word *amātya* itself occurs in Rg. VII. 15. 3, but there it is an adjective and means 'our own' or 'abiding in our house'. In some of the sūtras like the Baudhāyanapitr-medhasūtra (I. 4. 13, I. 12 7) the word amātya is used in the sense of 'near male relations in the house'. Vide H Dh. vol II. p. 588 n. 1375. The word 'amātya' occurs in the sense of minister in Āp Dh. S II. 10. 25 10 'The king should not live better or more luxuriously than his *gurus* (elders) and his ministers (gurūnamātyāṅśca nātiյīvet)' The word 'sacıva' occurs in the Ait Br (XII. 9) where it is said that Indra considered the Maruts as his 'sacivas' (helpers or comrades). The necessity of *amātyas* or *sacıvas* is stated in graphic language by several writers Kautilya (I 7 last verse) says 'kingship is possible only with (the aid of) assistants, a single wheel cannot work (a chariot), therefore the king should appoint ministers and listen to their opinions'. Manu (VII 55 = Sukra II. 1) says 'it is difficult for a person single-handed to accomplish even an easy task, how can government particularly, which has great good as its aim, be accomplished without helpers'? The Matsya-purāna (215. 2) prescribes 'the king, while his head is still wet with the waters of coronation, if he wants to supervise his State, should choose his helpers, as in the latter the kingdom secures stability'. Matsya 215 3 is the same as Manu VII 55 Vide

133. कृणुष्व पाज. प्रसितिं न पृथ्वीं याहि राजेवामवाँ इभेन । ऋ IV 4 1, याहि राजा इव अमात्यवान् अग्यमनवान् स्ववान् वा । निरुक्त VI 12

Visnudharmottara II. 24. 2-3 which are the same as Matsya 215. 2-3; also Śānti 106. 11 and Rājanītiprakāśa p. 174. From Arthasāstra I. 7 and 8, Manu VII. 54 and 60, Kām. IV. 25, 27, XIII. 24 and 64 it appears that they use the words saciva and amātya as synonyms Rudradāman in his Junāgadh Inscription[134] (E. I. vol. VIII. p. 36 at p. 44) states that his great enterprise to repair the Sudarsana lake was disapproved of by his advisory (mati-saciva) and executive councillors (karma-saciva) who were all endowed with the qualities required in amātyas and yet who were averse to the project and had no enthusiasm for it, since the breach to be repaired was very great Here sacivas are divided into two sorts, those who give advice and those who execute the business decided upon and the word saciva seems to be a synonym of amātya. Amara[135] states that the amātya who is a *dhīsaciva* (i e *matisaciva*) is called a mantrin, while amātyas other than the mantrin are called karmasacivas. These distinctions are often not observed. Sumantra is called amātya in Rāmāyana I. 7 3 and the best of mantrins in I. 8. 4. In Ayodhyā 112. 17 amātya and mantrin seem to be distinguished. From Kaut. I. 8 (last verse) 'Having divided the spheres of their powers and having taken into consideration the time and place and the work they have to do, all these persons should be appointed as ministers (amātyas), but not as mantrins,' it follows that mantrins were regarded by Kautilya as of a higher grade than amātyas in general. The R. N P. p. 178 says that the amātyas are also styled mantrins Kautilya states (I. 10) how amātyas are to be tested by *upadhās* i. e by means of tempting them as regards each of *dharma, artha, kāma,* and *bhaya* (fear) and to be employed if found honest after any one of the four tests, while *mantrins* were to be appointed only if their integrity and loyalty were proved by all the tests combined Upadhā[136] is defined by the Nītivākyāmrta p 111 as 'testing the mind of a person as regards dharma, artha, kāma and bhaya by various devices' (employed by secret agents) Kāt (4-5) quoted by R. N. P. p. 136 states that the minds of kings always go astray on the (slightest) cause by

reason of the fact that they possess great valour, knowledge, wealth and particularly the fact that they possess absolute power; therefore brāhmanas should always enlighten the mind of the king as to the duties of a king.

About the number of members in the council of ministers there has been a great divergence of views from ancient times Kauṭ I. 15 and Kām. XI. 67–68 state that according to the Mānava school the council (*parisad*) of ministers should be constituted of twelve amātyas, acc. to the Bārhaspatyas of 16, acc to the Auśanasas of 20, but Kautilya's own opinion was that the number is determined by the power or exigencies of the State (*yathāsāmarthyam*) The Bālakānda (7 2–3) states that Daśaratha had eight honest and devoted amātyas (who are then named) Manu VII. 54 and Mānasollāsa (II. 2. verse 57) require that the king should select seven or eight ministers who should be hereditary, versed in the śāstras, brave, born of high family and well-tested. This advice was followed by Shivaji, the founder of the Maratha empire, who had a council of eight ministers (*Pradhānas*). Vide Ranade's 'Rise of the Maratha Power' pp 125–126 where he describes the functions of the eight ministers called 'Mukhya-pradhāna' (Prime minister)', Pant Amātya (Finance minister), Pant Sachiva (General Accountant and Auditor), Senāpati (Commander-in-chief), Mantri (in charge of king's private affairs), Sumanta (Foreign Secretary), Panditrao (in charge of the Ecclesiastical Department), Nyāyādhīsha (Chief Justice). This list was probably taken by Shivaji's advisers from the Śukranītisāra II 71–72 where almost the same eight are said to be the ministers according to some. Vide also Grant Duff's History of the Marathas, vol. I. p. 193, and Rao Bahadur Wad's selections of *sanads* and letters (in Marathi) published by Messrs. Mawajee and Parasnis in 1913, where the names of the eight ministers of Shivaji are stated and their duties are described (p. 123). In the Śāntiparva (85. 7–9) it is declared that the king should have 37 sacivas, of whom 4 should be learned and bold brāhmanas, 8 valiant ksatriyas, 21 prosperous vaiśyas, 3 śūdras and one *sūta* versed in the Purānas, but verse 11 adds that the king should discuss and settle lines of policy in the midst of eight mantrins and Śānti 83 47 says that mantrins should not be less than three. In the Rāmāyana (II. 100. 71) Rāma whom Bharata came to meet in the former's exile asks him whether he held consultation with three or four mantrins and (in verse 18 = Sabhāparva 5. 30) Rāma hopes

that Bharata did not settle his policies by himself alone or in consultation with too many ministers. Kautilya also (I. 15) lays down that the king should hold consultation with three or four mantrins The Nītivākyāmrta (mantrisamuddeśa pp. 127–128) holds that they should be three, five or seven, that unanimity is difficult to secure in a group of persons of different characters and that when there are many ministers they are jealous and try to carry out their own ideas. These passages show that firstly there was to be a small cabinet of three or four ministers, secondly there was to be a council (*parisad*) of ministers who might be eight or more in number according to requirements and thirdly there was a large number of amātyās or sacivas (high functionaries concerned with various departments). The council is mentioned in the 3rd and 6th Rock Edicts of Aśoka (Corpus I. I. vol. I. p. 4 'parisā pi yute ājñāpayisati') in the words 'the council will order the officers called Yuktas'. The qualifications of ministers (amātyas) are laid down in several places e g in Kautilya I. 9, Manu VII. 54, Yāj. I. 312, Kām. IV. 25–30 (of which verses 28–30 are almost the same as the words of Kautilya), Śānti 118 2–3 (14 qualities of mantrins are mentioned), Śānti 80. 25–28, Bālakānda 7. 7–14, Ayodhyākānda 100. 15, Medhātithi on Manu VII. 54, Agnipurāṇa 239. 11–15 (= Kam. IV. 25 and 28–31), Mānasollāsa II. 2, verses 52–59, Nītivākyāmrta p. 108, Rājanītiratnākara pp 13–14 (quoting Nārada and Hārīta), Rājanītiprakāśa pp 174–178, Rājadharmakaustubha pp. 251–254, Budhabhūsana pp. 32, 57–58. Only the qualities required by Kautilya in amātya are set out here: He must be a native of the country, born of high family, influential, well-trained in arts, far-sighted, wise, of good memory, vigilant, eloquent, bold, intelligent, endowed with enthusiasm and dignity, capable of endurance, pure (in mind and actions), well-disposed, firmly devoted (to the king), endowed with character, strength, health, spiritedness, free from arrogance and fickleness, affectionate, who would not have recourse to hatred (even when offended by the king). Kautilya states that amātyas are of three kinds, the best, middling and inferior, of which the first must be endowed in full with the qualities set out by him and the other two are deficient by one quarter and a half respectively. In Śānti 83. 35–40 the faults that disqualify a person for being a mantrin are stated and verses 41–46 set out the qualifications for a mantrin, one of which deserves special notice, viz. (verse 46) he should have secured the confidence of the pauras and jānapadas. Many works prescribe that the ministers were

to be hereditary if the son was capable like his father, e g Manu VII 54, Yāj I 312, Rāmāyana II 100 26 (=Sabhāparva 5. 43), Agni. 220 16–17, Śukra II 114 The Matsya 215 83–84 and Agnipurāna (220 16–17) add the very sensible remark that such hereditary ministers should not be allowed to dispose of the cases of their *dāyādas* (agnates) The Visnudharmottara (II. 24 55–56) contains the same rule This hereditary character is borne out by many inscriptions For example, in the Allahabad stone pillar ins of Samudragupta, Harisena is himself a Mahādanda-nāyaka whose father Dhruvabhūti was also a Mahādanda-nāyaka (Gupta Inscriptions pp 10, 15) and in the Udayagiri cave Inscription of Candragupta II (ibid p 34) Vīrasena is described as 'anvayaprāptasācivya' (who hereditarily obtained the post of *saciva*) The R N P (p 176) after quoting the Matsya-purāna expressly states that the hereditary principle was to be given up, if the son or grandson of a former minister had not the requisite qualifications, but that such a descendant was to be employed only in such state work as was suited to his[137] attainments The mantrins should, according to most authorities, be chosen from among brāhmanas, ksatriyas and vaiśyas, but not from śūdras, even if the latter be endowed with qualities (vide Śukra II. 426–427, Nītivākyāmrta p 108)[137a] The consultation with the council of ministers was to be in secret Kautilya (I 15) says 'All administrative undertakings must be preceded by consultation with ministers The place for consultation should be so secluded that the conversation going on inside will not be heard outside and that even birds cannot see it, for it is narrated that secret consultations were divulged by parrots, *mainas*, dogs and other lower animals'[138] The Harsacarita VI states that Nāgasena of the Nāga dynasty met destruction in Padmāvatī because his secret policy was divulged

by a *mantrī*, Śrutavarman lost his kingdom in Srāvastī as his secret was disclosed by a parrot, and king Suvarnacūda met his death in Mrttikāvatī by babbling in a dream about his policy. Vide also Manu VII. 147-150, Yāj. I. 344, Kām. XI. 53, 65-66, Agnipurāna 225. 19, Mānasollāsa II 9, verses 700-705 p 92. Kaut. (I 15) has a verse 'no outsider should know the king's secret policy which he desires to carry out Only those who are to carry it out should know it only when it is begun or accomplished'. Vide for a similar rule Manu VII. 105 (=Śānti. 140 24 which is also the last but one verse in Kaut. I 15).[139] The king presided in the council, but if he was not present the chief minister presided (Manu VII. 141). In the Mālavikāgnimitra (V) the king's decision to make a *dravājya* is conveyed to the council of ministers and then the amātya (who here means the chief minister or President of the council) informs the king that the council agreed with the king, whereupon the king asks the council to depute the commander-in-chief Vīrasena to carry out the proposal. Kaut. further says (I. 15) that all business was to be transacted in the presence of the ministers; but if any one was absent his opinion was to be elicited by despatching a letter. In matters of emergency (or great danger) the king is to call his cabinet ministers and the council of ministers and what the majority decide or what would lead to success is to be carried out by the king. Śukra I. 365 also refers to the view of the majority. It is the duty of the ministers, according to Kām. IV. 41-49, to prevent a king from pursuing an evil course, it is the duty of the king to listen to the advice of his ministers and such ministers are not merely his friends but are really his *gurus*.[140] Śukra (II. 82-83) asks 'How can the kingdom be brought to prosperity by those ministers whom the king is not afraid to offend? They are no better than ladies who are to be decked with ornaments and fine clothes. What is the use of those ministers, whose advice does not tend to the advancement of the kingdom, the people, the army, the treasury, good government and to the destruction

of enemies? The ministers, however, must have found it difficult to please the king and also to placate the subjects A well-known subhāsita states that one who looks to the benefit of the king comes to be hated by the people and he who looks to the good of the people (only) is abandoned by the king; when there is this great conflict it is rare to find a person who can secure the aims of both the king and the people [140a] Manu (VII 56-59) prescribes the matters in which consultations are to be held with ministers and the procedure thereof, viz. peace and war, *sthāna* (i e army, treasury, capital and the country), sources of revenue, protection (of himself and of the country), the proper bestowal of the wealth obtained, the king is to ascertain the opinions of ministers separately and then jointly and then do what is beneficial; he is then to hold consultation on the most important affairs relating to the six means of policy with a wise brāhmana who is the most distinguished of all ministers and always to rely upon him, to settle all lines of policy finally on his advice and then to act Yāj I 312 also requires the king to consult his *mantrins*, then a brāhmana (purohita) and thereafter to decide himself the course of action The principal matters which mantrins have to concentrate themselves upon, acc to Kām XIII 23-24 (=Agnipurāna 241 16-18), are: *mantra*, securing the fruit of the line of policy adopted (such as conquering a country and protecting it), the carrying out of the business (of the State), predicting the good or evil effects (of an action taken), revenue and expenditure, government (i e punishing those who deserve punishment), subduing enemies, measures against calamities like famine, guarding the king and the kingdom. [141] The Nītivākyāmrta (p 185) concisely puts the same by saying that amātyas have to concern themselves with revenue, expenditure, guarding the ruler (i e his body, his dharma, wife and children), looking after the army in all its arms

Yāj I 343 says 'since the State depends upon *mantra* (i e. lines of policy arrived at after consultation with ministers), the

141 मन्त्रो मन्त्रफलावाप्तिः कार्यानुष्ठानमायतिः । आयव्ययौ दण्डनीतिरमित्रप्रतिषेधनम् ॥ व्यसनस्य प्रतीकारो राजराज्याभिरक्षणम् । इत्यमात्यस्य कर्मेदं हन्ति स व्यसनान्वित । कामन्दक XIII. 23-24 and अग्निपुराण 241 16-18, आयो व्ययः स्वामिरक्षा तन्त्रपोषणं चामात्यानामधिकारः । नीतिवाक्यामृत (अमात्यसमुद्देशः) p 185

king should keep his lines of policy secret in such a way that people should not know them till the results of his undertakings manifest themselves'. Kautilya (X. 6 last verse) emphasizes the importance of mantra in 'an arrow discharged by an archer may kill one man or none at all, but a (well-considered) scheme put into operation by a wise man may destroy even those who are only conceived' [142] Both Sabhāparva 5. 27 and Ayodhyā 100. 16 have the same verse, viz *mantra* is the root of victory.[143] Kautilya and the Nītivākyāmṛta p. 114 say that *mantra* accomplishes the following, viz. the apprehension of what is not or cannot be seen, imparting the strength of definite conclusion to what is apprehended, removal of doubt when two courses or opinions are possible, inference of an entire matter when only a part is seen.[144] In most works such as Kauṭ. I. 15, Kām. XI. 56, Agnipurāna 241. 4, Pañcatantra I. p 85, Mānasollāsa (II. 9 verse 697 ff, p 92) it is said that *mantra* has five elements which have to be considered (it is *pañcāṅga*), viz. means of carrying out actions (or works), plenty of men and materials, proper allotment of time and place, remedies against pitfalls, the (happiness of the kingdom or people) that will result from the accomplishment of the course decided upon.[145]

The high functionaries and office-holders have been different at different times. In the Vedic age, in the performance of the Rājasūya, there are certain offerings (generally twelve in number) which are called 'ratnināṃ havīṃsi'. Their order and names differ in different texts, though most are the same in all. Besides the king (the sacrificer), the eleven 'ratnas' (jewels) or 'ratnins' are (according to the Śat Br. V 3. 2). the commander-in-chief, the *purohita*, the crowned queen, *sūta grāmaṇī, ksattṛ* (chamberlain), *saṅgrahitṛ* (treasurer or charioteer?),

142. एकं हन्याच्च वा हन्याद्विद्धः क्षिप्तो धनुष्मता । प्राज्ञेन तु मतिः क्षिप्ता हन्याद्गर्भगतानपि ॥ अर्थशास्त्र X. 6 last verse, quoted in गणपतिशास्त्रि III. p. 386.

143. मन्त्रो विजयमूलं हि राज्ञां भवति राघव । अयोध्या 100 16, विजयो मन्त्रमूलो हि राज्ञां भवति भारत । सभा 5. 27.

144. अनुपलब्धस्य ज्ञानमुपलब्धस्य निश्चयबलाधानमर्थद्वैधस्य संशयोच्छेदमेकदेशदृष्टस्य शेषोपलब्धिरिति मन्त्रसाध्यमेतत् । तस्माद् बुद्धिवृद्धैः सार्धमासीत मन्त्रम् । अर्थशास्त्र I, 15 and नीतिवा. p. 114, which reads उपलब्धस्य निश्चयो निश्चितस्य बलाधानम्.

145. कर्मणामारम्भोपायः, पुरुषद्रव्यसम्पत्, देशकालविभागः, विनिपातप्रतीकारः, कार्यसिद्धिरिति पञ्चाङ्गो मन्त्रः । अर्थशास्त्र I. 15, सहायाः साधनोपाया विभागो देशकालयोः । विपत्तेश्च प्रतीकारो मन्त्रः पञ्चाङ्ग इष्यते । कामन्दक XI 56 It will be noticed that Kām. omits कार्यसिद्धिः and makes up the five by counting देशविभाग and कालविभाग separately.

akṣāvāpa (superintendent of gambling or of the records?), bhāgadugha (collector of taxes), govikartana (? hunter), dūta (courier), parivṛkti (discarded queen) Vide H Dh vol II p. 1215 n and 1216 In Tai. Br (I. 7 3) they are the same as above except that govikartana is omitted and the queen called 'vāvātā' is added These are described in the Tai Br. I. 7 3 as the bestowers of the kingdom (ete vai rāstrasya pradātāraḥ). Vide also Tai. S I. 8 9 1-2. It is clear from Śat Br V 3. 2 2 and 4 that some of these jewels like the commander-in-chief and the huntsman were of low caste or of the śūdra caste Later on certain functionaries began to be called *tīrthas*, their number being 18; vide Sabhāparva 5 38 (=Ayodhyā 100. 36) and Śānti 69 52 for a reference to the 18 tīrthas.[146] Kautilya (I 12) speaks of the 18 tīrthas and enumerates them [147] In the Raghuvaṃśa 17.68 Kālidāsa employs the word tīrtha in this sense. According to the Nītivākyāmṛta (p 29) persons who are helpers in dharma and state business are called tīrtha In the Edicts of Aśoka the high officers were called mahāmātras (in Rock Edict XII there are dharma-mahāmātras) and other officers were yuktas, rājukas and prādeśikas (in Rock Edict III) of whom the first at least were subordinate to the council of ministers. Later writers like Govindarāja on Ayodhyā 100 36, the com

146. काञ्चिद्दृष्टादृशान्येषु स्वपक्षे दश पञ्च च । त्रिभिस्त्रिभिरविज्ञातैर्वेत्ति तीर्थानि चारकैः ॥ अयोध्या 100 36=सभापर्व 5, 38=नीतिप्रकाशिका I. 52.

For गोविकर्तन see विराट 2, 7, (cr. ed.).

on the Yaśastilaka I. p. 91 differ as to the names of these 18.[148] The Rājataraṅgiṇī I. 120 informs us that in former times there were only seven departments (*karmasthānas*), that later on they became 18 and that five more were added to these eighteen (IV. 142–143 and 512) viz. mahāpratihāra, mahāsāndhivigraha, mahāśvaśāla, mahābhāndāgāra, mahāsādhanabhāga (and so the Heads were called 'adhigata-pañcamahāśabda' i e. to whom five titles with 'mahā' in them were given).[149] The Agnipurāna 220 mentions several high functionaries like the senāpati, pratihāra, dūta and heads of departments. The Śukranītisāra (II. 69–70) enumerates ten principal high functionaries of the king (prakrtis) viz. purodhas (purohita), pratinidhi, pradhāna (President of council), saciva (war minister), mantrin (Home minister), prādvivāka (minister of justice), paṇḍita (minister of ecclesiastical matters), sumantra (Finance minister), amātya (revenue minister) and dūta (minister of diplomatic relations) and remarks that others omitted purodhas and dūta from this list of ten and held that these eight should all receive the same pay (verses 71–72), while Śukra was of opinion that the ten high dignitaries should each receive in order one tenth more as pay than the succeeding one (v. 71), that the purohita was the most eminent of all, that among the rest each preceding was more eminent than each succeeding one (II. 74–77), that after these high dignitaries came the other officers (adhikārigaṇa, II. 279), that then came the darśaka (secretary ?), and lekhaka (clerk), then the menial servants who waited on the king and lastly the lowest were those who carried out dirty work. In II. 84–87 Śukra briefly brings out the special functions of the

148 उक्तं च। सेनापतिर्गणको राजश्रेष्ठी दण्डाधिपो मन्त्री महत्तरो बलवत्तरश्चत्वारो वर्णाश्चतुरङ्गबलं पुरोहितोऽमात्यो महामात्यश्चेत्यष्टादश राज्ञां तीर्थानि भवन्ति। com on यशस्तिलक I. p. 91, धर्मसमवायिनः कार्यसमवायिनश्च पुरुषास्तीर्थम्। नीतिवा p. 29 (अर्थसमुद्देश).

149. This is a meaning of *pañcamahāśabda* which is peculiar to the Rājataraṅgiṇī. Elsewhere that title generally means one before whom were beaten the five musical instruments In the Talcher grant of Kulastambha in the 9th century the epithet 'samadhigata-pañcamahāśabda' is applied to a king (mahārājādhirāja) in E. I vol XII p 157, while in an Inscription from Yewur of about 1040 A D it is applied to a mahāmaṇḍaleśvara (E I. vol XII. p 269). In the Pimpari plates of Dhāravarsa Dhruvarāja dated śake 697 the same title is applied to a minister described as महासन्धिविग्रहाधिकृतसामन्त (E. I. vol. X. p. 89) Vide J B B R A S (New series) vol. I pp. 238–245, VII. 487, VIII. 93 for discussion.

ministers from pratinidhi to dūta[150] and then in II. 88-105 at length. In I. 353-361 Śukra lays down how the king's public *durbar* should be arranged, viz. the king's throne should be in the centre of the western half of the hall on which the king should sit well-dressed, wearing his crown, armour and a drawn sword; his sons, grandsons, brother's and sister's sons should sit behind him, his daughter's sons should sit on his right and on his left should sit in order his uncles, chief agnates, members of the assembly, commanders; in front of the king to his right should be seated his maternal grandfather's relatives, the mantrins, and to the left his father-in-law, wife's brother, officers &c. The Śukranitisāra (*I* 374-376) lays down certain very practical rules for the king: 'he should personally observe villages, towns and districts every year; he should see whether his subjects are kept contented or are harassed by his officers, he should not side with the officers (with the man on the spot) but rather should take the side of the subjects, he should remove an officer who is hateful to many (lit. a hundred) people and an *amātya* should be removed if he is found to commit several illegal acts Śukra (in II. 107-113) further advises the change of portfolios among the ministers (e. g sumantra should be appointed amātya or *vice versa*); he says that for each department three should be engaged, one the most clever being the head and two others being darśakas (secretaries) who should be changed every three, five, seven or ten years; one man should not be allowed to hold the same high office for a long time, since otherwise he becomes intoxicated with power,[151] servants should not do any business without a written order nor should a king order anything to be done except in writing-(II. 290).

The words in Aśoka's Edict III 'pañcasu pañcasu vāsesu niyātu' probably refer to the practice of the transfer of high

151 Compare what Kautilya says 'चलं हि चित्तं विकरोति' (VII 14 p 305) That power corrupts is forcibly stated by Plato in his 'Laws' Book IV p 485 (Random House ed) 'Chronos knew that no human nature invested with supreme power is able to order human affairs and not overflow with insolence and wrong'

officers every five years. The 6th caste mentioned by Megasthenes (Fragment 1 p. 41 and Fragment XXXIII p. 85 in McCrindle's 'Ancient India') was that of overseers who inquired into and superintended all that went on in India, and made reports to the king or, where there was no king, to the magistrate. Megasthenes probably confounded the ministers and adhyaksas (who were often hereditary) with a caste. Vide also Fragment XXXIV pp. 86–88 about the officers of state and their duties. It is probably on account of some such rule as is stated in Śukra about frequent change of portfolios that in the inscriptions high functionaries have epithets prefixed to them which indicate their connection with several portfolios e. g. in the Banskhera plate of Emperor Harsa (E. I. vol. IV p. 208 at p. 211) Skandagupta (who is probably the same as the Skandagupta mentioned by Bāna in the Harsacarita VI as commander of the elephant arm) was the *dūtaka* of the grant and is described as 'mahāpramātāramahāsāmanta'; in the Allahabad stone pillar Ins. of Emperor Samudragupta (Gupta Inscriptions p. 10 and p. 15 n. 4), Harisena is described as 'Sāndhivigrahika' (minister for peace and war), 'Kumārāmātya' (the minister of the Yuvarāja?) and Mahā-dandanāyaka[152] (commander of an army); Prthvīsena (a brāhmana) is described as mantrin, kumārāmātya and then mahābalādhikrta (in E. I. vol X p. 72, of Gupta Samvat 117). In theory and practice the king was to issue orders in the presence or under the advice of his principal ministers We read in the grant of Rājarāja I of the Eastern Cālukya dynasty that he issued his command in the presence of the mantrin, purohita, senāpatī, yuvarāja, dauvārika and pradhāna (E. I. vol IV. p. 300 at p. 302). Śukra (II. 362–370) describes the procedure followed in issuing orders about State business. First the mantrin, prādvivāka (Chief Judge), pandita (head of ecclesiastical department), and dūta should write out the business relating to their departments, then the amātya should write thereon (*sādhu likhanam-asti*, the writing is good), sumantra adds '*samyag vicārītam*' (it is well considered), the pradhāna writes 'satyam yathārtham' (it is the truth, it is as the business requires), pratinidhi should write 'aṅgīkartum yogyam' (it is proper to accept this), the yuvarāja should write 'angīkartavyam' (it should be accepted), the purohita should write 'lekhyam svā-

152. 'Mahādaṇḍanāyaka' may mean 'the chief minister' as Manu VII 65 states 'on the amātya depends the control (of the government) and discipline (among subjects) depends on control (danda).'

bhimatam' (this writing is approved by me); all then should make their seals after their remarks and then the king should write 'angīkṛtam'[153] (it is accepted) and affix his seal

The Rājatarangiṇī shows that persons often rose to ministerial positions from low birth e g. (V. 73) it states that an engineer of Avantivarman was a foundling, (VII. 207) a watchman became chief minister.

It is necessary to say a few words about some of the great officers of State. First comes the Yuvarāja Kautilya devotes one chapter (I. 17) to taking care of the prince. The subjects of the prince's education, his association with state business, treatment of princes, good or bad, the coronation of a yuvarāja have already been dealt with (pp. 49, 83 &c.). The younger brother or eldest son was made yuvarāja (Crown Prince) during the reigning king's life (Ayodhyā, chap. 3–6, Kām. VII 6, Śukra II 14–16) Rāma on his coronation as king made Bharata the Crown Prince when Laksmana refused to be so (Yuddha 131. 93). The yuvarāja and princes were often sent as governors of different parts of the realm. The Divyāvadāna (XXVI. p 371) states that Aśoka was sent by his father Bindusāra to Taksaśilā to pacify popular disturbances and Emperor Aśoka himself is said to have sent his son Kunāla from Pātaliputra to the same town to pacify the citizens that had been offended by the arrogance of the *amātyas* (*ibid* pp 407–8) Khāravela in the Hāthigumphā Ins (E I. vol XX at pp. 79, 86) was a yuvarāja for nine years from his 16th to his 24th year From the Mālavikāgnimitra we learn that while Puṣyamitra was virtual emperor of Bharatavarsa his son Agnimitra was ruling at Vidiśā and had the authority to divide the kingdom of Berar between two brothers, Yajñasena and Mādhavasena The yuvarāja is not generally enumerated in the lists of mantrins, but he is one of the 18 tīrthas and from Śukra (above p 115) it appears that he had a seal and important matters passed through his hands along with those of the ministers. According[154] to

153. Compare the word 'drstam' occurring at the beginning of Chammak and Sivani grants of the Vākātaka emperor Pravarasena II and the same word in the plate of the Pallava king Śivaskandavarman (in E I. vol I at p 9) In most plates of the Vākātakas the word 'drstam' occurs at the beginning, vide E I vol 22 p 167

154. जीवन्सन् स्वामिता पुत्रे न देयाण्यखिला क्वचित् । स्वभावसद्गुणे यस्मान्महानर्थमवावहः ॥ विण्वत्यैरपि नो दत्ता स्वपुत्रे स्वाधिकारता । स्वायुषः स्वल्पशेषे तु सत्पुत्रे स्वाम्यमादिशेत् ॥ शुक्रनीति० V 17–18.

Śukra (II. 12) the yuvarāja and the group of amātyas are the two arms or eyes of the king, but Śukra V. 17 warns the king against transferring all power to the Crown Prince except when the king is about to die. The Matsyapurāna 220. 7 quoted in the Budhabhūsana (p. 33) prescribes that the king should entrust to the well-disciplined prince at first unimportant offices and then gradually important ones.[155] If a prince was ill-behaved he was not to be abandoned as he would go over to the enemies and harm the king, but he should be kept confined in a guarded place (Kām. VII 6, Budhabhūsana pp 33, 35, verses 77, 93). As regards his emoluments he was placed on the same footing as the mantrin, purohita, senāpati, the queen, the king's mother (Kaut V. 3). What office is meant by the Kumārāmātya in some of the Inscriptions (e. g. Gupta Ins. pp. 10, 50, E I. vol X p. 72, E. I. vol XI. p. 83) is not clear. It does not probably mean 'a royal prince who was also an amātya', but rather some minister attached to the yuvarāja, as contradistinguished from rājāmātya (which office occurs in Gupta Inscriptions, p. 218) It appears that in ancient times provincial governors could be total strangers to the royal family From Rudradāman's Junāgadh Ins. we learn that the governor of Surāstra under Candragupta Maurya was a vaiśya called Pusyagupta and under Aśoka a *Yavana* noble or king called Tusāspa[155a] (E. I. VIII p 36 at p. 43).

Next comes the *purohita*. In H. Dh vol. II pp. 40 and 363 it has been already shown how purohitas existed from the most ancient period of the Ṛgveda, how the purohita was thought to be half the soul of the king and how the co-operation of the spiritual teacher and the secular head (the king) was deemed absolutely necessary for the prosperity of the kingdom, how Gautama (XI 12-14) and Āp Dh. S II 5 10. 16 prescribed the qualities of the purohita. Our authorities show that the purohita was not a mere priest. The Ait Br. (40. 2) calls the purohita 'rāstragopa' (the saviour of the kingdom). The Śukranīti also,

155. अधिकारेषु सर्वेषु विनीत विनियोजयेत् । आद्यौ स्वल्पे ततः पश्चात्क्रमेणाथ महत्स्वपि ॥ मत्स्य 220. 7, बुध p. 33

155a It is strange that Dr Beni Prasad in 'The State in ancient India' (p 189) remarks "the former governor is designated *rāstriya* while the latter is called *adhisthāya*" 'Adhisthāya' in Rudradāman's Ins. is only a gerund of 'sthā' with 'adhi' and means 'having ruled over' राष्ट्रिय is formed from राष्ट्र according to राष्ट्रावारपाराद् घखौ (Pān IV. 2 93) and means 'one ruling over a province, a Provincial Governor' In dramas राष्ट्रिय means 'king's brother-in-law'. Kṣīrasvāmī says 'नात्यादन्यत्र राष्ट्रा-धिकृतो राष्ट्रियः'.

though a very late work, similarly describes the purohita (II. 74) as 'rājarāstrabhrt' (the supporter of the king and the kingdom) In the Rgveda III. 53. 12 we find the idea that the hymns and the spiritual power of the purohita Viśvāmitra protected the Bharata clan [156] He made the king ready for battle and accompanied him in battle murmuring 'where the arrows fly &c'. (Rg. VI. 75 17) while the fight went on (vide Āśv. Gr III 12 19 quoted below n. 308) The Visnudharmasūtra III 70, Yāj I. 313, Kām. IV 32 require that the purohita was to be well versed [157] in the vedas, itihāsa, dharmaśāstra or dandanīti, in astrology and portents, in rites of propitiation contained in the Atharvaveda, of high family, endowed with all *vidyās* and good acts as stated in the śāstras and with austerities. Kaut. (I 9) states almost the same qualifications for the purohita, requires the king to honour his advice as a pupil honours his teacher or a son his father or a servant his master and says that royal power advanced by brāhmanas, enforced as with a spell by the consultations of mantrins and endowed as with a weapon by the observance of śāstric rules becomes invincible and secures success Vide Ādi. 170 74–75, 174. 14–15, Śānti. 72. 2–18 and chap. 73, Rājanītiprakāśa pp 59–61 and 136–137, Rājadharma-kaustubha pp 255–257 for qualifications expected in the purohita Kautilya (X 3) states that while a battle is going on the (chief) minister and purohita should urge on and encourage the soldiers by exhorting them with verses from the Veda and classical Sanskrit, promising great rewards in the next world for those who fall in battle The Śukranītisāra (II. 78–80) requires in the purohita among other qualities the study of dhanurveda, proficiency in arms and in formations of armies for battle and possession of so much religious merit as to be able to pronounce an effective curse A purohita was to be distinguished from a *rtvij* (a sacrificial priest) as Manu VII 78 and Yāj I 314 show Vide Mānasollāsa II 2 60 (p 34), Rājanītiratnākara pp 16–17, Visnudharmottara II. 5, Agni 239 16–17 for further passages on purohita Some authorities include

the purohita among amātyas or mantrins (e. g. Vijñāneśvara on Yāj. I. 353, Śukra II. 69–70), while others like Yāj. I. 312 regard him as distinct from mantrins. The purohita was often hereditary. Acc. to Kautilya quoted above he was to employ means declared in the Atharvaveda to remove calamities, divine and human. The great divine calamities acc. to Kautilya IV. 3 are fire, flood, disease, famine, rats, wild elephants, snakes and evil spirits.[158] According to Manu VII. 78 the purohita was concerned with the religious rites laid down in the śrauta and grhya sūtras and Āp II. 5. 10. 14–17 show that the purohita had complete jurisdiction in matters of penance for offences. Vas. (19. 40–42) provides that if the king lets off an offender deserving to be punished the king had to fast for a day and the purohita for three days and to perform the heavy penance of Krcchra if the king punished the innocent. According to most authorities he played a role that was pre-eminently religious He is not mentioned among the 10 limbs of the sabhā in the administration of justice. Kāt. 24 (quoted in S. V. p. 20) does not require him to be an expert in arthaśāstra, though Kāt 56 quoted by the Mit. on Yāj. II. 2 and Sm. C. (II. p. 14) say that the king should enter the Hall of Justice with learned brāhmanas, the ministers, the chief justice, the purohita &c. Yāj. I. 312 and the Mit. on Yāj. I. 312–313 on the other hand prescribe that even after consulting all mantrins, the king was finally to consult the purohita in all secular and religious matters. The Nītivākyāmrta (purohitasamuddeśa) p 160 states that the divine calamities are: shower of fire (fall of lightning?), excessive rainfall, epidemics, famine, damage or disease of crops, swarms of locusts and other vermin, diseases, goblins and female evil spirits, snakes, wild elephants, rats. The purohita is required to know ritual of five kinds,[159] viz. that dealing with the propitiation of Naksatras, that of śrauta sacrifices, that of the *samhitās* (of Tantra worship), that of Atharvaśiras and that of

159. पञ्चकल्पविधानज्ञं वरयेत्तु सुदर्शनम्। नक्षत्रकल्पो वैतानस्तृतीयः संहिताविधिः। चतुर्थः शिरसा कल्पः शान्तिकल्पस्तु पञ्चमः॥ पञ्चकल्पविधानज्ञमाचार्यं माप्य भूपतिः। सर्वोत्पातमशान्तात्मा भुनक्ति वसुधां चिरम्॥ विष्णुधर्मोत्तर II. 5. 3–5 quoted in राजनीतिकौ. p. 256. शिरस् here seems to mean अथर्वशिरस् which is an Upaniṣad mentioned in Gaut. 19.12, Vas. 28. 14, Visnudharmasūtra 56. 22 among the holy Vedic texts that purify a person of sins. It begins with देवा ह वै स्वर्गं लोकमगमंस्ते देवा रुद्रमपृच्छन्को भवानिति। Vide Muir's Sanskrit Texts vol. IV, p. 356 ff for text (portion) and translation.

sāntis (such as grahaśānti &c.). Calamities, according to Kām. XIII. 20–21, are of two sorts, divine (daiva) and human: there are five kinds of the first viz. fire, flood, disease, famine and epidemic, all of which can be met by human effort and by propitiatory rites, while human calamities should be withstood by constant effort and by proper lines of policy. The same verses are Agnipurāna 241 14–16.

Acc to Kautilya (V 3) 48000 panas were the salary of the (royal) sacrificial priest, ācārya (teacher), mantrin, purohita, commander-in-chief, crown prince, the king's mother, the queens and he holds that "with that amount of maintenance they would not yield to temptation or revolt (against the king)".[160] The amātyas, the chief judge and even the purohita could be punished by the king, acc to Manu, if any of them went wrong (VIII 335 and IX 234) and Kaut. (IX. 3) prescribes that when the purohita is guilty even of a great offence, the remedy is to imprison him or banish him. Some great ministers, though not exactly purohitas of the king, were learned brāhmanas and led simple lives such as Cānakya and Mādhava There is divergence of views about the salaries set out in the Arthaśāstra (V. 3). Jayaswal (in 'Hindu Polity' part II p 136) holds that the salaries were yearly and the panas in which they were paid were silver ones. Prof Dikshitar (in 'Mauryan Polity' p 151) holds that the salaries were monthly Confusion is caused by the fact that there were panas of copper, silver and gold Vide Rājanītiprakāśa p 294 The Rājatarangini VII 950 speaks of *dīnnāras* of gold, silver and copper Rao Bahadur K. V Rangaswami Aiyangar holds that the salaries (in the Arthaśāstra) were monthly and in golden panas (in 'Ancient Indian Polity' pp 44–45) Therefore this matter must be investigated Manu (VIII 13) promises that those names of copper, silver and gold coins which are well-known among the people (of its day) for purposes of trade will be described by him Acc. to Manu VIII. 134 and 136, Visnu Dh S IV. 6–10, and Yāj I 363–365 five krsnalas are equal to a māsa, 16 māsas are equal to a suvarna, 4 suvarnas (or five acc. to some) are equal to a pala, a karsa is equal to $\frac{1}{4}$ of a pala and a piece of copper one-fourth of a pala in weight is called a pana, which is the same as kārsāpana[161] (equal to 80 *raktikās* or

guñjā berries). A pala was equal to 320 raktikās. Kaut II.19 says practically the same thing. In Kaut. V. 3 the salaries range from 48000 to 60 panas from the highest functionaries to the lowest servants. They must all be taken to be for the same period in every case and in the same metal, since Kaut expressly states no different periods and no difference in metal. Ordinarily the words pana and kārsāpana (as stated by Manu VIII 136 and the Mit. on Yāj. I. 365 and the Śukranīti IV. 1. 116) refer to copper pieces (used as coins) and bearing a stamp. Another table given by Manu VIII. 135–136, Visnu Dh. S. VI. 11–12, Yāj. I. 364 is: 2 raktikās[162] or krsnalas = one (silver) māsa, 16 māsas = one

---

162. A *raktikā* was found by General Cunningham after many experiments to weigh on an average 1.8 grains (vide his 'Coins of Ancient India' pp 45–46 and also Rapson's 'Coins' pp. 2–3) So that a silver dharana or purāna (of 32 raktikās) should weigh about 57. 6 grains and a copper pana (of 80 raktikās) should weigh 144 grains It appears that the weights of Indian coins in different parts and at different times varied a good deal. Cunningham ('Coins of Ancient India' p. 5) states that gold was cheap in India, being as one to eight rates of silver. But in medieval times i. e. about 1300 A. D. (vide Śukra IV. 2 92–93) gold was 16 times the price of the same weight of silver, which again was 80 times of the price of the same weight of copper. Though, as stated in note 161 above, a copper pana was usually equal to eighty raktikās, a copper pana of 100 raktikās (i. e of 20 māsas) was known. Nār. (pariśista verse 58) speaks of *māsa* as the 20th part of the kārsāpana and the Mit on Yāj. I 365 and Vy Nirnaya p 207 quote a verse (attributed to Usanas by Haradatta and Maskarin in Gaut. XII 19) that a māsa is a twentieth part of pana (माषो विंशतिमो भागः पणस्य परिकीर्तितः). The Agnipurāna (227 2) appears to have known a pana of 120 krsnalas (कृष्णलानां तथा पञ्चा कर्षार्धं दाम कीर्तितम्) The verses in Nār. (pariśista 58–60) are ascribed to Kāt by the Sm C II. p 99 and it is stated by both that these terms are in vogue in Pañcanada (Punjab). When the pana of copper was equal to 20 māsas (and 100 *guñjās*), the copper coin would have been almost of the weight of the modern copper half anna coin. The table given by Nār. (pari 58–60) is: 4 kākinīs=māsa, 20 māsas=kārsāpana (which is the same as Andikā), 4 kārsāpanas = dhānaka, 12 dhānakas = suvarna (also called dīnāra) The table given by Br (as quoted in Sm. C. II p. 99 and V. R. p. 667) is the same. Br. as quoted by Aparārka p 832 and V. R. p. 111 employs the word 'nānaka' for coin, which word also occurs in the Mrcchakatika and in Yāj II. 240–241. The Amarakośa states that niska and dīnāra are synonyms and also gives other meanings of niska Śabara on Jai. IV. 3 39 gives the striking example 'no one would spend a kārsāpana for finding out a kākinī that he had lost'. The Arthaśastra II 12 p 84 states that the superintendent of the mint should manufacture copper panas, half panas, kākinīs and half kākinīs. The Visnu Dh S V. 96 refers to a golden

(*Continued on the next page*)

silver purāna or dharana; 10 dharanas = one (silver) śatamāna. This table was used for silver coins. Thus a dharana would be 1/10th of a *pala* as stated in the Bṛhatsamhitā (10. 13 palada-

---

(*Continued from last page*)

māsaka. Under the Guptas golden coins are mentioned as dināras, vide 'Gupta Inscriptions' p. 29 at p. 31 where there is a gift of 25 dināras in the Gupta year 93 and pp 38, 41, 261 (where it is stated that one *bhiksu* was to be fed every day throughout the year from the permanent endowment of 12 dināras). From the Baigram plate dated Gupta *samvat* 128 it appears that one dināra was equal to 16 rūpakas (silver coins) in E I vol XXI. p 80. A Mathurā Ins of the 28th year of Huviska speaks of the deposit of 550 purānas (E. I. vol XXI p. 55 at 61). Bhāskarācārya (who was born in śake 1036 and wrote his Siddhāntaśiromani in 1072 śake i e 1150 A. D) gives the following table (in Līlāvati I 2–4)· 20 varātakas = kākini, 4 kākinīs = pana, 16 panas = dramma, 16 drammas = niska, 2 yavas = guñjā, 3 guñjās = valla (modern Marathi *vāl*), 8 vallas = dharana, 2 dharanas = gadyānaka, 5 guñjās = māsa, 16 māsas = karsa, 4 karsas = pala and a karsa of gold is called Suvarna. It will be seen that Nār. and Līlāvati differ as to काकिणी Gadyānakas of gold are referred to in the Pattadakal pillar Ins of Kirtivarman I (754 A. D.) where it is stated that a field of 30 nivartanas was purchased for thirty gadyānakas of gold (E I vol III. pp 6–7) From a verse of the Caturvimśatimata quoted by the Mit on Yāj III 258 it appears that gadyānaka was also a silver coin. From an inscription of Vikramāditya V near Gadag dated *śake* 934 it appears that fines for offences were levied in gadyānakas (E I vol. XX p 64) The following works may be consulted for further information on Indian coins viz Cunningham's 'Coins of Ancient India' (1894), Rapson's 'Indian coins' (1897) in the *Grundriss*, C. J. Brown's 'Coins of India' (in 'the Heritage of India' series, 1922) The Dharmadvaitanirnaya (pp 137–139) and the Vaijayanti on Visnu Dh S IV. 9 may be consulted for efforts to reconcile the various statements about Suvarna, Niska &c For an informing paper on the most ancient *Denarii*, vide Proceedings of the British Academy vol XVIII pp 211-266 where it is established that the earliest *denarius* period begins about 187 B C Therefore Jolly's assumption (in Recht und Sitte p 23 followed by Winternitz in 'History of Indian Literature' vol II. p. 216 n. 4 that all Indian works in which the word dināra occurs cannot have been composed before 2nd century A D is unwarranted. Prof. Keith (JRAS for 1915 p 504) does not accept Jolly's assumption The dināra was variously defined According to Visnugupta quoted in Hemādri's Vratakhanda, a rūpaka is $\frac{1}{10}$th of suvarna and a dināra was equal to 28 rūpakas, while acc to Nār and Kāt सुवर्ण and दीनार were synonyms The Dharmadvaitanirnaya says that a kārsāpana (of silver it seems) was equal to eight or ten *dhabbukas*. One of the verses of the Jñāneśvarī (composed in 1290 A D) that speaks of gold as पंधरें (15 times in price of the same weight of silver) may be cited here 'पै भांगार जरी पंधरें। तरी राजवळीची अक्षरें। लाहे (v l साहे) तैचि सरे। जियापरी।' chap 17 verse 322 (Bhide's and Madgavkar's editions)

śabhāgo dharaṇam). Nārada (pariśista 57) expressly states that a silver kārsāpana is in vogue in the south i. e. a silver pana or kārsāpana was not universal.[163] A golden suvarna also comprised 80 guñjas, while the standard silver pana was of 32. Rhys Davids (in 'Buddhist India' p. 100) states that about the time of Buddha's birth transactions were carried on in terms of the *kahāpaṇa*, a square copper coin weighing about 144 grains and guaranteed as to weight and fineness by punch marks made by private individuals, that there were half and quarter kahāpanas also, that a kahāpana would be now worth about $\frac{2}{3}$ths of a penny, though its purchasing power was then equal to about one shilling of the present day. Therefore it is proper to understand that a paṇa or kārsāpaṇa, when the word is used without any qualification, was meant to be one of copper and that *prima facie* the salaries in Kautilya were meant to be in copper panas This conclusion can be supported by various considerations Manu VII. 126 prescribes that the wages for the lowest menial servant (such as one who sweeps the house or brings water) is one pana a day and of a superior menial servant 6 panas a day and that the former was to get in addition one pair of garments every six months and every month a drona of corn (which would be equal to 1024 *muṣṭis* according to the Mit. on Yāj III. 274). Whatever ages may be assigned to the Arthaśāstra and the present Manusmrti the two works cannot be separated from each other, if at all, by more than a century or two. Therefore the economic conditions of the one may be held to have not differed much from those to which the other refers. It is impossible to hold that the lowest menial servant got one gold paṇa a day besides over 30 *muṣṭis* of corn every day (1024 in a month). If that were so, the lowest menial servants of Kauṭilya's days would have to be supposed to be a hundred times better off than their *confreres* in big cities like Bombay towards the end of the 19th century (when menial servants got from five to ten rupees a *month* without any allowance of grain). Therefore the pana in Kautilya V. 3 is not of gold. Kauṭilya (in V. 3) says that a king who has a depleted treasury may make payment of salary by giving forest produce, cattle or fields along with small quantities of cash, that if he has undertaken to colonize a waste tract he may make payment of salary in cash only and not by bestowing a village. In connection

163. कार्षापणो दक्षिणस्यां दिशि रौप्यः प्रवर्तते। नारद (परिशिष्ट 57); दशपणिको योजने दूतो मध्यमः। दशोत्तरे द्विगुणवेतन आ योजनशतादिति। कौटिल्य V 3.

with this he says that 60 panas are to be the equivalent of one ādhaka of corn (sastivetanasyādhakam krtvā hiranyānurūpam bhaktam kuryāt) [164] An ādhaka [165] came to only 256 *mustis* (handfuls) of corn and even in famine times one ādhaka could not have cost 60 silver panas, much less golden ones In V. 3 Kautilya declares that an ordinary dūta should get ten *panas* for a journey of one *yojana* and twice the wages for each yojana up to one hundred. A yojana acc to Kaut. himself (II. 20) is equal to 8000 *dhanus* (acc to another reading 4000 *dhanus*), a dhanus being equal to four aratnis (each aratni being 24 angulas). So taking the highest figure a yojana was at the

---

164 The word hiranya has two senses 'gold' and 'money or 'cash' whether in gold, silver or copper (as said by Amara who gives 'dravina' as a synonym) When Kautilya says that the king may pay 'hiranya' and not 'grāma' he means only cash payment and not necessarily only gold. vide the copperplate grant of Śīlāditya VII in Gupta Inscriptions p 179 at p 189 where the grant of a village is said to be 'sadhānyahiranyādeyah' Here *dhānya* (payment of tax in kind) is contradistinguished from payment in *hiranya* i e in cash (either gold, silver or copper). When Patañjali states that the Mauryas being greedy of 'hiranya' founded or manufactured images (Mahābhāsya vol II p. 429 on Pān V 3 99 quoted in H Dh vol II p 710 n 1696) what is meant is that they wanted cash and not merely gold.

165 The measures of capacity such as आढक, प्रस्थ occur in the Mathura Ins of Huviska (E I XXI p 55 at p. 61) According to Parāśara (VI 70) two *prasthas* are equal to an ādhaka and 32 prasthas are equal to a drona The Mit on Yāj III 275 quotes a verse to this effect 8 mustis = one *kuñcit* or *kuñci* (acc to some), 8 kuñcit = puskala, 4 puskalas = ādhaka; 4 ādhakas = drona and 16 dronas = khārī Aparārka (pp 305 and 846) quotes two verses (which the Par. M II 1 p 141 ascribes to the Bhavisya-purāna) which say 2 palas = prasrti, 2 prasrtis = kudava, 4 kudavas = prastha, 4 prasthas = ādhaka, 4 ādhakas = drona, 2 dronas = kumbha The Danda viveka p. 135 refers to this, adds that some held the kumbha to be equal to 20 dronas (Kaut II 20 holds kumbha to be equal to 20 dronas) and quotes the following verse from चण्डेश्वर 'कुडवाद्या वेदगुणाः प्रस्थाढ्यद्रोणमानकाः खार्यः। कुम्भो विंशतिखार्या दृष्टो लोके यथाक्रमशः'॥ The word drona occurs even in the Rgveda in the sense of a wooden trough used for holding water or soma juice Vide Rg. VI 2 8, VI 37 2, VI 44 20, IX 28 4 etc In Rg IV 32 17 the sage prays Indra to grant a hundred khāris of soma The words *ādhaka* and *drona* occur in the ardharcādi group (Pān II. 4 31), *Khārī* in Pān. V 1. 33 and V. 4 101. The Par M II 1 141 says on this difference about kumbha 'देशभेदेन शास्त्रद्वयस्य व्यवस्थापनीयत्वात्' Kaut (II. 19 p 104) himself tells us that the measure drona was of four varieties, 162½ palas, 175, 187½ or 200 palas according as it was used for measurement in the harem, or for servants or for ordinary dealings or for royal income.

most about 9 or 10 miles (or only $4\frac{1}{2}$ or five miles according to the other reading). To hold that 10 silver panas were allowed to an ordinary dūta for going even ten miles (which he could cover in half a day or less) would be too much. Hence also the panas in Kaut. V. 3 are only copper ones. When once it is settled that the panas are of copper, it easily follows that the salaries in panas were monthly. Artisans and craftsmen were, acc. to Kaut., to get 120 panas. If this were yearly, they would get only 10 panas a month, while, according to Manu quoted above, even the lowest menial was to get a pana a day. Therefore 120 panas (of copper) were the monthly salary of an artisan. A monthly salary is more natural and practical than a yearly one. Other ancient writers like Śankha-Likhita (in Rājanītiprakāśa p. 252) contemplate a monthly salary for soldiers (viz. two suvarnas a month).[166] From the Nasik Inscription No. 12 (E. I. Vol. VIII.

166. शङ्खलिखितौ । वाहनयोधानां सततमन्वीक्षणं प्रतिमासं द्विसौवर्णिकी वृत्तिः षाण्मास्यं स्मरणं चातुर्मास्यं वा । स्वयंतेषु दानमनुक्रोशो विदितेष्वनुग्रहदानं कुलचारित्रशील-विद्यालक्षणगुणाधिकेषु संमानं प्रयुञ्जीत । राजधर्मकाण्ड p 58, राजनीतिप्रकाश p. 252. राजधर्मकाण्ड explains राजकार्येण मृतेषु योधेषु तत्सुतादिभ्यो दानं दया च राज्ञा विधातव्या । प्रसिद्धेषु तु योधेषु दानवेतनाद्यधिकमपि वस्त्रादि देयमित्यर्थः. This provides for pension to the dependents when the soldier dies on duty, special bonuses or favours for special valour, work or worth.

A few words may be said about words like suvarna, śatamāna, niska &c. The word krsnala occurs in the Tai S II 3. 2 1. Hiranyakāra (goldsmith) is found in Vāj S 30 17. In Rg I. 126 2 gifts of a hundred niskas and horses are mentioned and in Rg IV 37 4 the Rbhus are addressed as wearing 'good niskas' In Atharva V. 14 3 'niska' occurs and in the Ait. Br (39 8) damsels who are *niskakanthyah* (whose necks are adorned with necklaces of niskas) are among the gifts So 'niska' was probably a gold piece used as a coin or an ornament or a thin plate of gold like a modern *patli*, several of which are even now worn by women in the form of a necklace In Rg II 33 10 Rudra is said to wear 'viśvarūpa-niska' which is probably an allusion to golden pieces stamped with various figures. In Rg VI 47 23 the sage says that he received ten 'hiranyapindas' (golden pieces) from Divodāsa In Rg VIII. 78 2 a prayer is offered to Indra for the bestowal of golden '*mana*', which may be the precursor of 'Śatamāna'. This last occurs in the Tai. S VI. 6 10 2 Pān (V. 1. 27, 29, 30) respectively mentions śatamāna (what is bought for a śatamāna is called śātamāna), kārsāpana, niska and V. I 34 refers to pana, pāda and māsa Patañjali (Mahābhāsya vol III. p 369 on Pān. VIII 1. 12) gives the instance 'from this kārsāpana give one māsa to each of these two persons who are here'. The sūtra of Pānini V. 2. 120 (rūpād--āhataprasastayor-yap) conveys that

(*Continued on next page*)

p. 82) we learn that in the early centuries of the Christian era 35 kārsāpanas were equal to one suvarna.

Hopkins in 'Position of the ruling caste' J. A. O. S. vol. XIII. pp. 151–162 traces how the influence of the purohita grew. One cannot accept his views about there being three layers in the Mahābhārata and the conclusions from such dealing with the text that he draws, which are rather subjective. Gradually the importance of the purohita waned As the Śukranītisāra cited above (n 150.) shows, long before that work he came to be omitted by several writers from the council of ministers and was supplanted by the Pandita. The same functions came to be exercised by an officer called dharmādhyaksa or dharmādhikaranika in Bengal and other countries The Matsyapurāna (215.24) states the qualifications of a *dharmādhikārin*.[167] Vide E I. vol. 14 p. 156 at p. 160 of the Naihati grant of Ballālasena, where we have both purohita and mahādharmādhyaksa mentioned among the great functionaries of State and the Benares copper-plate of the Cedi king Karnadeva in 1042 A D. in E I vol II. p 309 where we have mahādharmādhikaranika but no purohita. Besides another officer called sāmvatsara (astrologer) gradually took over some of the functions of the purohita. The Visnudharmasūtra III. 75 (*rājā ca sarvakāryesu sāmvatsarādhīnah syāt*) requires the king to depend on the sāmvatsara in all matters. The Brhat-samhitā (2.9) states that a king without a sāmvatsara mistakes his path like a blind man. Kām. 4.33 and Visnudharmottara II. 4. 5–16 recommend reliance on him. Kautilya[167a] IX. 4 was himself against too much reliance on astrology, while Yāj. I 307 holds that the rise and fall of kings depend on the (aspects or influence of) planets.

(*Continued from last page*)

Pāṇini knew metal pieces that were well beaten and trimmed into good-looking coins The Vārtika 'Kākinyāścopasankhyānam' (on Pāṇini V. I 33) establishes that kākini was used in those days as a medium of purchasing goods The Kāśikā gives 'rūpyo dināraḥ' as an example निघातिकाताडनादिना दीनारादिषु रूपं पटुत्वधते तदाहतमित्युच्यते। आहतं रूपमस्य रूप्यो दीनारः। रूप्यं कार्षापणम्। काशिका.

167a. नक्षत्रमतिवृच्छन्तं बालमर्थोतिवर्तते। अर्थो ह्यर्थस्य नक्षत्रं किं करिष्यन्ति तारकाः॥ अर्थशास्त्र IX. 4 (last verse but one)

Senāpati: The qualities of a commander-in-chief are stated in several places such as Kauṭilya (II. 33), Ayodhyā 100. 30 (= Sabhā 5. 46), Śānti 85. 31-32, Matsya 215. 8-10, Agnipurāna 220. 1 ff, Kām. XVIII. 27-44, Visnudharmottara II. 24. 4-6, Mānasollāsa II. 2, verses 90-92 p. 37. Acc. to the Agnipurāna 220. 1, Matsya 215. 10 the commander-in-chief must be either a brāhmana or a ksatriya. Śukra (II. 429-430) requires that a ksatriya should be preferred as senāpati, but if a valiant ksatriya be not available a brāhmana may be chosen, but a śūdra should not be chosen. Acc. to the Mānasollāsa he should possess the following qualities: good family, character, courage, profioiency in (several) languages, cleverness in riding horses and elephants and in the science of arms, knowledge of omens and medicine, knowledge of the breeds of horses and of the difference between what is essential and non-essential, liberality, sweet speech, self-control, intelligence, resoluteness. In the Mahābhārata senāpatis are elected and consecrated (vide Udyoga 151, Drona 5, Karna 10), but this was not so in later times. He is appointed by the king on his own initiative.

Dūta: (Ambassador or messenger). The word and the office of *dūta* as messenger was known in the most ancient times. In Ṛg. I. 12.1, 1.161.3, VIII. 44.3 Agni is said to be the dūta and is requested to bring the gods to the sacrifice. There is also attached to the word the meaning of espionage, since Saramā, the bitch of the gods, is represented in Ṛg. X. 108. 2-4 as sent by Indra to find out the treasures of the Paṇis. The Udyogaparva (37.27, cr. ed. 37.25) specifies the eight qualities of a dūta viz. he must not be stiff-necked, nor timid, nor dilatory, he must be kind and amiable, not liable to be won over by others, free from diseases, endowed with a fine mode of speech.[168] Śānti 85.28 refers to seven qualities. Vide Ayodhyā 100.35, Manu VII. 63-64, Matsyapurāna 215. 12-13 for the qualities of a dūta. The dūta should speak only what he has been ordered (by his king) to speak, otherwise he would be liable to be killed (Udyogaparva 72.7, cr. ed. 70.7). Śānti 85. 26-27 say that the person of the dūta is sacred. Kauṭilya devotes one chapter (I. 16) to the treatment of the subject of dūta. He states that the dūta is to be sent by the king after the line of

168. अस्तब्धमक्लीबमदीर्घसूत्रं साङ्गक्रोशं श्लक्ष्णमहार्यमन्यैः। अरोगजातीयमुदारवाक्यं दूतं वदन्त्यष्टगुणोपपन्नम्॥ उद्योगपर्व 37. 27.

policy has been settled at a council of ministers to the king who is to be attacked (vide Kām. XII. 1 also). A dūta is of three kinds: (1) nisrstārtha[169] (one to whom is entrusted full discretion as to what is to be said) is one who is possessed of the qualifications required in a minister (*amātya*), such as Krsna from the Pāndavas or the ambassadors in modern times; (2) *parimitārtha* (entrusted with a definite mission, an envoy) who possesses the same qualifications as the first less by one quarter; (3) *śāsanahara* (a mere carrier of royal writings or missives) who possesses only half the qualifications of the first. The Mit. on Yāj. I 328 lucidly explains the three varieties. Kauṭ. dilates at great length on the qualifications of the dūta, what he has to note while in the enemy country, how he is to behave (such as avoiding women and wine), how he is to gather information through spies; but all this has to be passed over for want of space. Vide Kām XII 2-24 for the same. Kām. (XII. 22-23) briefly sets out the following duties of the dūta; determining those who are inimical to the king to whom he is sent, winning over to his side the friends and relatives of the enemy king, finding out the (number and equipment of) forts, the economic resources and military strength of the enemy king, collection of news as to what the enemy intends to do, bringing over to his side the officers in charge of the districts of enemy country, collecting knowledge about the places of the enemy where battles can be waged by his king or whence he can pass away swiftly. Manu VII. 65 says that it is the dūta who brings about alliance or war. Kaut. says that when the ruler to whom the dūta is accredited becomes displeased at the message he brings, the dūta should reply[170] 'All kings, you and others, speak through their dūta. Therefore dūtas have to deliver the message entrusted to them even if weapons are raised (to threaten them); even the lowest caste dūtas (cāndālas) are not to be killed, what need be said about a dūta who is a

brāhmana? This (that I utter) is the message of another. It is my duty to say it'. The Rāmāyana (V. 52. 14–15) says that good men do not allow the killing of a dūta, but certain modes of dealing with him (viz lashing him, shaving his head) are allowed in certain cases.

A dūta is to be distinguished from a *cara* or *cāra* (spy), as done by Kaut, Kām. XII. 32, Yāj. I. 328. Kām. XII. 33 says that a dūta is an open (*prakāśa*) spy, while a *cara* is a spy who works in secret In modern times also 'an ambassador is often nothing more than an honourable spy acting under the protection of the law of nations' (Encyclopædia Britannica on 'espionage'). Kaut. devotes four chapters to spies (I. 11–14) and Kām. (XII. 25–49) also deals at great length with them. The Śukranītisāra (I. 334–336) states that the king should learn every day at night from his secret spies the intentions and actions of his subjects and officers, and the opinions of ministers, enemies, soldiers, the members of the assembly, relations and the women in the harem The *cara* must, according to Kām. XII. 25, possess ability to infer the inner thoughts (of men), must have a good memory, must be soft in speech, have quick gait, be capable of enduring privations and heavy labour, swift in action, ready-witted. Kaut. (I. 11) says[171] that spies are those who work in the guise of a *kāpatika* (a bold pupil capable of knowing the minds of others), *udāsthita* (a sham ascetic, who has fallen from the real duties of asceticism and is endowed with intelligence and pure character), *grhapatika* (a householder who is a cultivator that has not the means to maintain himself, has intelligence and is of pure character), a *vaidehaka* (a trader who cannot maintain himself by trade and is possessed of intelligence and pure character), a *tāpasa* (a spy practising austerities, who has either shaved his head or has matted hair and is desirous to maintain himself), a class-mate or colleague (*sattrin*), a desperate character (*tiksna*), a poisoner and a female mendicant. The first five of these are called by Kautilya five *samsthās* (groups

171. उपधाभिः शुद्धामात्यवर्गो गूढपुरुषाञ्छ्रुत्वादद्येत् । कापटिकोदास्थितगृहपतिकवैदेहकतापसव्यञ्जनान् सत्रितीक्ष्णरसदभिक्षुकीश्च । परमर्मज्ञः प्रगल्भः छात्रः कापटिकः । ... प्रव्रज्यामत्यवसितः भज्ञाशौचयुक्त उदास्थितः । ..... कर्षको वृत्तिक्षीणः प्रज्ञाशौचयुक्तो गृहपतिकव्यञ्जनः । वाणिजको वृत्तिक्षीणः प्रज्ञाशौचयुक्तो वैदेहकव्यञ्जनः । ... मुण्डो जटिलो वा वृत्तिकामस्तापसव्यञ्जनः । ... पूजिताश्चार्थमानाभ्यां राज्ञा राजोपजीविनाम् । जानीयुः शौचमित्येताः पञ्च संस्थाः प्रकीर्तिताः ॥ अर्थशास्त्र I. 11. प्रव्रज्यामत्यवसित means the same thing as प्रव्रज्यावसित, which occurs in याज्ञ II. 183 and is explained by the मिताक्षरा as प्रव्रज्या संन्यासस्ततोऽवसितः मच्युतः. मेधातिथि on Manu VII 154 quotes almost *verbatim* a large part of Kaut I. 11 from कापटिको० and a portion from I. 12.

or institutions), which should be honoured by the king with awards of money and marks of respect and through which the king is to test the purity of the character of his servants. Kautilya says that the spy called *udāsthita* should carry on agriculture, cattle-rearing and trade on land set apart for the purpose, should be supplied with plenty of gold and disciples and should afford to all (sham) ascetics food, clothing and lodging, direct them to detect particular crimes and report. The spy called *tāpasa* was to stay near the capital, to have many pupils, to pretend to eat once in a month or two only a handful of vegetables or grass and eat secretly his favourite dishes His disciples were to proclaim that he possessed supernatural powers, he should pretend to make predictions about gain or fires or fear from robbers after ascertaining from his pupils by nods and signs such events In I. 12 Kaut. deals with wandering spies (called *sañcara*) viz. *sattrins* (who are orphans that are to be maintained by the State and that are taught palmistry, sorcery, tricks of legerdemain &c), *tīkṣna* (desperadoes who, regardless of their lives, may fight elephants for money), *rasada* (who have no affection even for their relatives, are indolent and cruel), *bhikṣukī* or *parivrājikā* (a poor brāhmana widow, clever and desirous to earn her livelihood, honoured in the king's harem and visiting the families of mahāmātras or high ministers). These are to spy on the 18 *tīrthas* (mentioned on p 112 above) in public For spying on their private character persons pretending to be hump-backed, dwarfs, kirātas (pigmies), the deaf and dumb, idiots, the blind, and others that are actors, dancers, singers and the like and women are to be employed This information is to be tested by the persons belonging to the five samsthās (mentioned above on p 129), but these are to act without their being known by the wandering spies and *vice versa* Then further testing by other spies follows When the information received from these three sources tallies then it will be held reliable; if the information frequently disagrees, the spies should be secretly punished or discharged. A similar rule about sending several spies on the same mission without their knowing each other is laid down by Visnudharmottara II. 24. 66–67. Kaut in I 13 deals with espionage on subjects in general (i. e those in the capital and other parts of the country) Spies are to pretend to take sides, some praising the king as possessed of all good qualities, others qualifying that praise They were also to report the rumours spreading among the people, to report whether there was discontent and the king was to honour those who were reported to be contented and to

bring round the discontented by conciliation, gifts, sowing dissensions among them or by punishing them. In. I 14 Kautilya deals with the employment of spies for taking advantage of parties in a foreign State i. e groups of persons angry with the foreign king or afraid of him or of persons who are ambitious or proud, who are to be won over by appropriate words and *stimuh*. It will be seen how there was a network of spies of all kinds, so much so that Kām. XII. 28 declares that spies are the king's eyes (*cāracaksur mahīpatih*). The Visnudharmottara II. 24. 63 says the same ('*rājānaś-cāracaksusah* ') and also Udyoga 34. 34 ' *cārah pasyanti rājānah* '. In IV. 4–6 Kautilya dilates [172] upon the employment by the samāhartr (Collector) of a host of spies for suppressing those who are thorns (or disturbers of peace), these being employed for detecting judges (dharmastha) and superintendents of various departments that take bribes, counterfeiters of coins, adulterers, thieves and robbers and other criminals. Kautilya relies in extreme cases on spies even in the decision of judicial matters. He says (III. 1 last verse) ' when owing to the depositions of witnesses the plaintiff's case and the defendant's case are both destroyed, when the cause of either of the parties is found through the spies to be false, then the decree shall be passed against that party'.[173] In Dronaparva 75. 4 it is said that Krsna had his spies in the army of Duryodhana and *vice versa* (74. 1). Śānti 69. 8–12 and 140. 39–42 mention the places where spies are to be set[174] up and emphasizes that they should not know each ether. One need not feel surprised at the machinery of espionage that Kautilya so elaborately describes. All governments in modern times employ spies, informers and secret agents to keep themselves informed of the activities, views and resources of their opponents. We know also how the Indian Police, in order to catch offenders against the Prevention of Gambling Act or other similar Acts, employ agents with marked coins or notes and draw in their net unsuspecting people.

CHAPTER V

RĀSTRA (THE TERRITORY OF A STATE)

The word 'rāstra' occurs even in the Ṛgveda (IV. 42.1, 'mama dvitā rāstram ksatriyasya')-'mine is the kingdom on both sides (or in both spheres)' says king Trasadasyu In Ṛg VII. 34 11 Varuna is praised as the Lord of rāstras (rājā rāstrānām &c.) In Ṛg. VII. 84 2 and X 109. 3 the word rāstra occurs In a very famous benedictory [175] passage of the Tai. S VII 5. 18 1(= Vāj S. 22 22) one of the blessings invoked is ' may the king in this kingdom become brave, a skilled archer, and a great warrior ' Vide Tai. Br III 8 13 for explanation of the Tai. S. passage In the Atharvaveda XII. 1 8 and 10 the earth is called mother and invoked to impart to the *rāstra* strength and brilliance (or energy). Kām VI 3 says [175a] that since all the elements of the State spring from the territory of the State, the king should raise up his territory with all his efforts. The Agnipurāna 239. 2 holds that rāstra is the most important of all elements of the State. Manu VII. 69 prescribes that a king should make his home in a country that is not water-logged (i e is dry and not moist), [176] is rich in crops, inhabited mostly by Āryas (or well-conducted people), not disturbed (by epidemics &c.), that is charming (owing to trees, flowers and fruits), the chiefs in which have submitted to him and in which livelihood can be had easily Yāj. I. 321 and Visnudharmasūtra III 4-5 are to the same effect Kām (IV 50-56) remarks ' the territory of

---

175. आ ब्रह्मन् ब्राह्मणो ब्रह्मवर्चसी जायतामास्मिन् राष्ट्रे राजन्य इषव्यः शूरो महारथो जायतां दोग्ध्री धेनुर्वोढानड्वानाशुः सप्ति. पुरन्धिर्योषा जिष्णू रथेष्ठाः सभेयो युवास्य यजमानस्य वीरो जायता निकामे निकामे नः पर्जन्यो वर्षतु फलिन्यो न ओषधयः पच्यन्ता योगक्षेमो नः कल्पताम् । तै सं VII. 5 18. 1, वाज सं. 22. 22 (with slight variations).

175a. राज्याङ्गानां च सर्वेषां राष्ट्राङ्गवति सम्भव । तस्मात्सर्वप्रयत्नेन राजा राष्ट्रं समुन्नयेत् ॥ काम. VI. 3 The राज र p 86 ascribes this to शुक्र (and reads the last word as प्रसाधयेत्)

176. अल्पोदकतृणो यस्तु प्रवातः मञ्जुरातपः । स ज्ञेयो जाङ्गलो देशो बहुधान्यादिसयुतः ॥ quoted by कुल्लूक on मनु VII 69, स्वल्पवृक्षोदकपर्वतो बहुपक्षिमृगः प्रचुरवर्षातपश्च जाङ्गलो देश इति । quoted by राजनीतिप्रकाश p 197 from a स्मृति. The मिता० on या I.321 remarks यद्यप्यल्पोदकतरुपर्वतोदेशो जाङ्गलस्तथाप्यत्र सजलतरुपर्वतो देशो जाङ्गलशब्देनाभिधीयते ।

the king depends for its prosperity on the qualities of the soil, the prosperity of the territory tends to the prosperity of the king; therefore a king should choose for the sake of his prosperity land possessing good qualities. That land is preferred for the sake of prosperity that is endowed with various crops and minerals, is full of merchandise, mines and various substances, that is favourable to cattle-rearing, that abounds in water, is inhabited by well-conducted people, is charming, has forests and elephants, has facilities of water and road transport and does not depend upon rain-water only.'[177] Land that is full of gravel and stones, full of forests always infested with thieves, that is waterless, full of thorny bushes and snakes is not fit for choosing as a *rāṣṭra*. A country is to be preferred that yields livelihood easily, is possessed of the qualities of good land (cited above), is full of water, that has hills in it, that consists mostly of śūdras, artisans and merchants, the husbandmen in which undertake great projects, that is loyal (to the king) and averse to the king's enemy, that can put up with troubles and taxes, that is large in extent, full of people from various countries, that follows the right path, that possesses plenty of cattle and wealth, the principal men in which are not foolish nor vicious. These requirements show that the country must be prosperous, well-stocked with the necessaries of life and well suited to defence. There is also some difference of opinion among the smṛti writers about the composition of the population. Manu VII. 69 requires that the kingdom should consist mostly of āryas (āryaprāya), while Viṣnu Dh. S. III. 5 holds that a country should be peopled mostly by vaiśyas and sūdras. In another place (VIII. 22) Manu says that that country in which śūdras abound, which is full of atheists and void of dvijas is overwhelmed by disease and famine and perishes. Similar provisions are found in the Matsyapurāna 217. 1–5, Viṣnudharmottara II. 26. 1–5, Mānasollāsa (II. 3 verses 151–153), Nītivākyāmṛta (Janapadasamuddeśa p 191 which defines rāṣtra, viṣaya, deśa, janapada &c.) The Matsyapurāna 217 5 and Viṣnudharmottara II. 26.5, (*evamvidhaṁ yathālābham rājā upayamāvaset*) point out that

177. अदेवमातृका चेति शस्यते भूविभूतये । काम 4 52 देवो यद्यम्बु-वृष्टयम्बु-संपन्नव्रीहिपालितः । स्यात्तदीमातृको देवमातृकश्च यथाक्रमम् ॥ अमरकोश, where the rice crop depends solely on the rainfall the country is called देवमातृक (देवो माता यस्य) and where it depends on the water of rivers, tanks &c. it is called नदीमातृक.

every rāstra cannot be expected to possess all the qualities mentioned by them and that the king must do the best with such qualities as his country possesses Kautilya II 1 advises[178] the king to found a district of villages either on old sites or on new ones by inducing people from other countries to immigrate or by causing thickly populated parts of his own country to send its overflowing population and to see that each village consists of not less than one hundred families nor more than five hundred, is peopled mostly by śūdra cultivators, has an extent of one *krośa* or two and is capable of offering help to its neighbours.

According to Paurānic geography there are seven *dvīpas*, viz Jambu, Plakṣa, Śālmala, Kuśa, Krauñca, Śaka and Puṣkara (Viṣnupurāna II. 1. 11 ff) and each dvīpa is divided into *varsas* Jambudvīpa has 9 varsas of which Bharatavarsa is the first (Viṣnupurāna II. 2. 12 ff) The Mahābhārata speaks of 13 dvīpas (Ādi 75 19, Vanaparva 3 52 and 134 20) and 18 dvīpas also (Droṇa 70. 15). For Bharatavarsa vide H Dh vol. II. pp 17–18. Manu II 20 looks upon the holy land of Kuruksetra, of the Matsyas, Pañcālas and Śūrasenas as 'the chosen country' the learned brāhmanas in which were to be the leaders and guides of the whole world in appropriate thoughts and actions The Viṣnu (II 3 2), Brāhma, Mārkandeya 55 21–22 and other purānas proudly assert that Bharatavarsa is the land of action (karmabhūmi). This is patriotism of a sort but not of the kind we see in western countries Bharatavarsa itself has comprised numerous countries from the most ancient times The names of countries and the tribes or people inhabiting them were the same (vide Pānini IV 1 168,

178 भूतपूर्वमभूतपूर्वं वा जनपदं परदेशापवाहनेन स्वदेशाभिष्यन्दवमनेन वा निवेशयेत् । शूद्रकर्षकमार्यं कुलशतावरं पञ्चशतकुलपरं ग्रामं क्रोशद्विक्रोशसीमानमन्योन्यारक्षं निवेशयेत् । अर्थशास्त्र II 1 This passage clearly shows that Kautilya at least employed the word *janapada* in the sense of a territory to be colonized and as one which was either included within the kingdom or not so included. Dr Prān Nath's interpretation of *janapada* that it was only 'a part of the kingdom' (p. 47, 'Study in the economic condition of ancient India') cannot be accepted in view of the express words भूतपूर्वमभूतपूर्वम् The usage of classical writers and the Purānas shows that janapada means simply 'country' and Amara gives it as a synonym of देश and विषय and क्षीरस्वामी explains that जनपद is called राष्ट्र The Kāvyamīmāmsā on which Dr. Prān Nath relies for the number of countries employs the word *janapada* for the names of the *countries* in the four quarters of India (not for parts of any kingdom)

IV. 2. 81) In the Ṛgveda we come across the tribes of Yadus, Turvaśas, Druhyus, Anus and Pūrus (Ṛg. 1. 108. 8, VIII. 10. 5 &c) and the countries of Cedi (VIII 5 39), Kīkata (III 53. 4), Ṛjīka (VIII. 7. 29), Ruśama (V. 30 12), Vetasu (X. 49. 4). In the Atharvaveda V. 22 several peoples or countries are mentioned of which Bahlikas (in vv 5 and 9), Mūjavat (vv 5 and 8), Gandhāri, Aṅga, Magadha (in v. 14) deserve notice. The Ait Br. (38. 3) divides India into five divisions in the east south, west and north (the Uttara Kurus and Uttara Madras) and in the centre (Kuru-Pañcāla and Vaśa-Uśīnara) India was divided into two parts, Dakśināpatha (from the Narmadā southwards) and Uttarāpatha at least some centuries before Christ, since the Hāthigumphā Ins. (E. I. vol 20 at p 79) mentions a great many kings of Uttarāpatha and the Mahābhāsya refers to lakes in Dakśināpatha.[179] In the Brāhmaṇas frequent mention is made of the Kuru-Pañcālas (Tai Br. I.8. 4), Uttarakuru, Uttara-madra, Kuru-Pañcālas, Vaśa-Uśīnaras (in Ait Br.38 3), Kuru-Pañcālas, Aṅga-Magadhas, Kāśi-Kośalas Śālva-Matsyas, Vaśa-Uśīnaras in Gopatha II. 10 (ed by Gastra). The Gandhāras occur in Chāndogya Up. (VI 14 1), Videha in Bṛ. Up. III 1. 1, Madras in Bṛ.Up. III 3 1 In the Mahābhārata there are long lists of countries in various connections, which are more than 200 (e g. Sabhā 4 21–32, 20 26–30, Sabhā 25 ff, Sabhā 52. 13–19,53. 5–9, Virāta 1 12–13, Bhīsma. 9. 39–69, 50.47–53, Drona 11.15–18, 70.11–13. Āśvamedhika 73–78, 83.10 ff) The Baudhāyana-gṛhyaśeśasūtra I. 17 prescribes a maṇḍala for the worship of the Sun and names nine countries in the eight directions and in the centre as representatives The Purāṇas also contain long lists of countries e. g. Matsya 114 34–56, Mārkaṇḍeya 57 32–67 and chap 58, Brāhma 17.10-15 and 25 25–39. The same country sometimes has two names (e g. Vidarbha and Krathakaiśika denote the same country in Raghuvaṁśa VII 1 and 32). 'Buddhist India' (by Rhys Davids p 23) mentions the sixteen peoples (or countries), lists of which occur in the Aṅguttaranikāya I. p. 213, IV. p 252 and in the Dīghanikāya

179. The महाभाष्य names at least the following countries अजमीढ, अङ्ग, अम्बष्ठ, अवन्ति, इक्ष्वाकु, उशीनर, ऋषिक, कडेर, कलिङ्ग, काश्मीर, काशि, कुन्ति, कुरु, केरल, कोसल, क्षुद्रक, गान्धार, चोड, जिह्मु, त्रिगर्त, दशार्ण, नीचक, नीप, नेश, पञ्चाल, पारस्कर, पुण्ड्र, मगध, मद्र, महिष, मालव, युगन्धर, वङ्ग, विदर्भ, विदेह, वृजि, शिबि, सुह्म, सौवीर Some countries like अवन्ति, अश्मक, कलिङ्ग, काम्बोज, कुरु, कोसल, मगध, मद्र, साल्व, सौवीर are mentioned even by पाणिनि (in IV 1. 170–176, IV. 2. 108).

II. p. 200 viz. Angas, Magadhas, Kāśis, Kosalas, Vajjis, Mallas, Cetis (Cedis), Vamsas (Vatsa?), Kurus, Pāñcālas, Matsyas, Śūrasenas, Aśmakas, Avantis, Gandhāras, Kambojas Varāhamihira's Brhatsamhitā, Baudhāyana-grhyaśesasūtra I 17, Kāmasūtra V 6 33–41, Bārhaspatya Arthasāstra (III 83–117), the Kāvyamīmāmsā of Rājaśekhara (17th chapter) name numerous countries This last divides India into five regions and gives the names of about 70 countries in the four directions but none from Central India The Bhāvaprakāśana (pp. 309–310) gives a list of 64 countries and states, that Daksināpatha (Deccan) is a fourth of Bharatavarsa and that in the Tretā and Dvāpara ages people afraid of being overwhelmed by ice came down to the south.[179a] 56 countries are named in some Tantra works (vide 'Indian Culture' vol VIII. p. 33) In the lexicon called Vaijayantī of Yādavaprakāśa (11th century A.D.) edited by Dr G Oppert, over a hundred countries and capitals of some of the countries are named (in the Bhūmikānda and chapter on deśa thereof)

To constitute a rāstra a territory of some size and a large population are required There can hardly be a rāstra of a few villages or a few hundred inhabitants The boundaries of the numerous countries mentioned in the works cited above must have been fluid and must have changed from country to country owing to conquests

In ancient India the modern sentiment of nationalism had hardly taken root. Writers speak of rājya (State) and of rāstra (territory) as an element of rājya They had no sense of nationality nor did they seriously work for national unity The modern idea of a nation is more a question of feeling and sentiment than of objective fact The State has been at all times a great co-ordinating agency, but as its boundaries were extremely variable in ancient India, the modern sentiment of nationality, of 'my country, right or wrong' hardly ever arose in India (except perhaps for over a century in Mahārāstra in the 17th and 18th centuries and among the Sikhs) In the whole of Hindu India, there was no doubt a certain unity of religion, philosophy, literary forms and conventions of arts and forms of worship, and in reverence for holy places, but this did not make for a deep-seated and effective sentiment of nationhood or national unity

179a. त्रेतायुगे द्वापरे च हिमाक्रान्तिभयाज्जना । पादं पादं विसृज्यैते श्रयन्ते दक्षिणापथम् । भावप्रकाशन p. 309.

Most of the ancient sūtrakāras and smṛtis try to lay down the limits of the holy land of Āryāvarta and differentiate it from the lands of *mlecchas*. Vide H. of Dh. vol. II. pp. 11–18. The Viṣṇu (II. 3. 1–2), Mārkaṇḍeya (55. 21) and other purāṇas wax eloquent over the importance of Bharatavarṣa and describe it as the land of action for those who want to secure heaven or final release or as the land where alone sin and religious merit were to be found (*karmabhūmir-iyam svargam-apavargam ca gacchatām* or *tat-karma-bhūmir-nānyatra sampr āpti puṇyapāpayoh* in Mārk) Manu (II. 20) manifests great pride in and love for the holy countries of Brahmāvarta, Kuruksetra, Matsya, Pañcāla and Śūrasena by glorifying the brāhmaṇas of these countries as those 'from whom all men on this broad earth should learn the actions and usages appropriate to them'. Vas. I. 10 also says the same. Śaṅkha-Likhita (q. by Viśvarūpa on Yāj I. 2) hold that the country of Āryāvarta is endowed with high qualities, is ancient and holy (*deśa Āryo guṇavān ..... sanātanah puṇyaḥ*). As however the smṛtis were composed at different times, embodied the usages of different provinces in India and as they provided for the observances of all those who followed the Veda, they do not generally lay emphasis on localities but rather on what they thought was common to all Āryas in India (*yat tu samānam tad vakṣyāmah*, as Āśv. gr. says). There was no doubt a great emotional regard for Bharatavarṣa or Āryāvarta as a unity for many centuries among all writers from a religious point of view, though not from a political standpoint. Therefore one element of modern nationhood viz. being under the same government was wanting. But it must be noted that from very ancient times there was always the aspiration among great kings and the people to bring the whole of Bharatavarṣa "under one umbrella". Even in the West the sentiment of nationality practically arose after the partition of Poland, and as a consequence of the French Revolution and of the Industrial revolution, which led manufacturing countries to search for markets and to exploit backward and less developed peoples. Vide Laski's 'Grammar of Politics' chap VI. Modern nationalism undoubtedly leads to great self-sacrifice and produces certain virtues of high value in the individuals that are fired by that sentiment. But the ideals of the modern nation States are not high, particularly in their treatment of other peoples and in their attitude towards less favoured States. The one aim of the leading politicians of modern nation States and most of the inhabitants of these States seems to be to raise the standard of

living of their citizens to a high level and to maintain it at that level even by exploiting and robbing weaker races and lands. This is not the place to discuss these matters further Whatever the value of nationalism to the individuals fired by it may be, from the point of the welfare of the whole of mankind, modern nation States do not deserve to survive, unless the so-called progressive nation States are prepared to give up their racial pride, their spirit of grabbing and exploitation and to extend a brotherly hand to all struggling States to improve themselves in their own way and attain to higher standards of living without let or hindrance. It cannot be gainsaid that for several centuries in the past and also at the present moment all modern nation States have two moralities, one for their own nation and the other for their dealings with foreign States and races.

Some remarks must now be made about provincial and local administration Each kingdom comprised *deśas* (countries) and subdivisions of deśas. The governor of a rāstra was called rāstrapati or rāstriya Vide p 117 above about Pusyagupta having been the rāstriya of Surāstra (Kathiawad) under Candragupta Maurya and Śānti 85. 12 (which describes what the rāstriya is to do).

According to the Amarakosa the words desa, rāstra, visaya and janapada are synonyms Epigraphic usage is not uniform about the dimensions of these. Sometimes visaya appears to be a sub-division of deśa (vide the words 'rāstrapati-visayapati-grāmakūta' in I A. vol. VIII. at p. 20 in the grant of Cālukya Tribhuvanamalla in śake 999 and I. A, vol XII pp 247, 251 in the grant of Rāṣṭrakūta Govinda in sāke 855). But in the Hirahadagalli plates (E I vol I p. 5) 'visaya' occurs first and then 'rāstra', so it appears that there 'visaya' is deemed to be larger than rāstra According to the Sahyādrikhanda (uttarārdha, chap 4) deśa is made up of 100 villages, mandala is made up of 4 desas, a khanda of 100 mandalas and the earth has nine khandas [180] From the Cambay plate of śake 852 (930 A D.), we see that mandala was a sub-division of desa (E I. vol. 7 p 26, at p 40) From

180. शतग्रामो भवेद्देशो देशचत्वारि मण्डलम् । शतमण्डल भवेत्खण्डं नवखण्डा च मेदिनी ॥ सह्याद्रिखण्ड, उत्तरार्ध chap. 4, 'लाटदेशखेटकमण्डलान्तर्गतकाविकामहास्थान-विनिर्गताय' in E. I vol. 7 p. 40; 'श्रीपुण्ड्रवर्धनभुक्तौ कोटीवर्षविषये गोकलिकामण्ड-लान्तःपाति ... ग्रामः' in E. I. vol. 14 p. 324.

the Bangarh grant of Mahīpāla I (E. I. vol. 14 p. 324) and the Amgachhi plate of Vigrahapālā III we see that mandala was smaller than visaya which again was a subdivision of 'bhukti'. The word 'bhoga' (which is similar in origin to 'bhukti') appears to be applied to a sub-division of visaya (which in its turn is a sub-division of rāstra) in the Bhamdak[181] plate of Krsnarāja I dated śake 694 (E. I. 14 p. 121, 126) and also in the Jejuri plates of Vinayāditya in 609 śake (E. I. vol. 19 p 62 at p. 64 where the word 'rāstrapati' does not occur). The Mitāksarā on Yāj. I. 319 explains that only a king (mahīpati) can make a grant of land and not a *bhogapati* (i. e. the officer over a *bhoga*) Another ancient word for a division of a country is *āhāra* which occurs in the Rupnath Rock inscription and Sarnath pillar Edict of Aśoka (Corpus I. I. vol. I pp. 162 and 166), in the Nasik Inscriptions No. 3 and 12 (Govardhanāhāra and Kāpurāhāra, E. I. vol. VIII pp. 65 and 82) and in the Karle Ins. No. 19 (E I VII. p. 64) where we have Māmalāhāra, modern Māval (in Poona District). For want of space it is not possible to pursue this subject here. For further information vide Dr. Fleet in J. R. A. S. for 1912 p. 707 and my paper on 'the Ancient Geography of Mahārāstra' (JBBRAS. vol. XXIV for 1914–1917 pp. 648–653). In the epigraphic records particularly of the Deccan and South India we come across names of territorial divisions to which small as well as very large figures (indicating the number of villages they comprised) are affixed: e g. a group of twelve villages in Aparānta on the sea near Kalvivana (modern Kelvem) is mentioned in the Sanjan plates of Buddhavarasa (E I. 14 p 144 at p. 150), Nyāyapadra saptadaśa in Bhoja's grant in *samvat* 1076 (E. I. 18 at p. 322), Kisukād 70 (E I. 15 p. 73), Belvola 300 (in E I 13 at p. 40), Konkana 900 ruled over by the Kadamba king Jayakeśi II (E. I. 13 pp. 298, 317), Tardavādi 1000 (E. I. 15 p. 25), Kundi 3000 (E I. 13 at p. 18), Pratyandaka 4000 (E I III p. 306), Karahāta 10000 (E. I. 13 p 275), Banavāsi 12000 (E I. 13 p. 179), Nolambavādi 32000 (E. I. 19 p. 187), Kavadidvīpa sapādalaksa (one and a quarter lakh) in E I. 13 at p 299, the country of 7½ lakhs (in the Lakshmeshwar Ins of Vikramāditya VI in E I. 16 p. 31). Vide Dr. Fleet in J R A. S. 1912 pp 707–710 as to the meaning of these figures.

---

181. राष्ट्रपतिविषयपतिभोगपतिग्रभृतीन् समाज्ञापयति । E. I. vol. 14 p. 121 at p 126; सर्वानेव यथासंबध्यमानकान् राष्ट्रपतिविषयपतिग्रामकूटमहत्तरयुक्तकोपयुक्तकाधिकारिकान् समादिशति । E. I. vol. VII. p. 26 at p. 40.

Kauṭilya II. 1 says that in the kingdom groups of villages should be set up with a chief town or fort in each, a group of ten villages being called Sangrahana, of two hundred villages being called Khārvatika, of 400 villages being called Dronamukha, and in the midst of 800 villages [182] there is the Sthāniya.

182. अष्टशतग्राम्या मध्ये स्थानीयं चतु:-शतग्राम्या द्रोणमुख द्विशतग्राम्याः खार्वटिकं दशग्रामीसंग्रहेण संग्रहणं स्थापयेत् । कौटिल्य II. 1 Vide Dr Shamsāstri's note on these स्थानीय has a similarity in sound and meaning to modern *thānā*, Dr. Prān Nāth (in 'Study of the economic condition of Ancient India' p 26) principally relying on a commentator of the Jain work called Prajñāpanopānga (which he misunderstands) holds that 'grāma' does not mean 'a village', but 'an estate or survey village which can pay 18 kinds of Government taxes' The learned Doctor says that he consulted many Sanskrit lexicons, but did not find this interpretation in any one of them That should have induced him to be cautious But he makes the bold and facile assumption that 'lexicons were compiled from a literary view-point and are not of much assistance as far as the technical meanings of words are concerned'. His great authority, the Jain commentator, says 'गामनिवेसेसु इत्यादि । ग्रसति क्षुद्रप्रादीन्प्राणानिति ग्राम· यदि वा गम्यः शास्त्रप्रसिद्धानामष्टादश-कराणामिति ग्रामः'. Dr Prān Nath's Jain authority is no better than lexicographers and their commentators. क्षीरस्वामी on Amara derives grāma as 'ग्रस्यते भोगिभिर्ग्रामः' i e the word ग्राम is derived from the root ग्रस्. The Jain commentator first derives the word ग्राम from ग्रस् and then from गम् Dr. Prān Nāth forgets that a fanciful or scholastic derivation is not a *definition*. The rest of the reasoning on the new meaning of grāma is on a par with this and cannot be examined in detail A commentator expressly states (*ibid* p 27) that he gives only the *vyutpatti* (etymology) of grāma, but Dr Prān Nāth pays no heed to this He has not correctly grasped the scholastic discussion in the commentary quoted on p 27. He misunderstands the word 'samagrāmāh' in Yāj II 152. The Amarakośa expressly says that 'sama' and 'samāna' are synonyms He is often very dogmatic without looking into all ancient and medieval authorities e g on p 51 he charges Dr. Fleet with misinterpretation of a Jātaka text (addha-tiyāni śatāni) which Dr Fleet translated as 250, while Dr Prān Nāth is sure that the meaning is '150' He probably never noticed that so far back as the 2nd century B C the Mahābhāsya had explained the word 'ardhatrtiya' as Dr Fleet does (अर्धे तृतीयमेषां or अर्धे तृतीयमनयो, vide Kielhorn, vol I p 426 on vārtika 22 on Pān II 2. 24) There is hardly any warrent for Dr Prān Nāth's assertion that each grāma (as interpreted by him) contained only about five families and had only about 15 or 20 acres of cropped area (pp. 39–40). Kaut (note 178) states that a grāma contains from 100 to 500 families If the inscriptions so far published are carefully searched it will be found that grāma ordinarily meant a village in the modern sense and included several hundred acres of land For example, in a grant of Pallava Yuvamahārāja Visnugopavarman (I. A vol V p 50)

(*Continued on the next page*)

Manu VII. 114 similarly observes that in the midst of two, three or five villages the king should place a central post of guards called 'gulma' and another called 'saṅgraha' in the midst of a hundred villages. Manu VII. 115–117, Viṣnudharmasūtra III. 7–14, Śānti 87 3ff, Agnipurāna 223. 1–4, Viṣnudharmottara II. 61. 1–6, Mānasollāsa II. 2. 159–162 (p. 43) require the king to appoint a hierarchy of officers for one village, for groups of ten, twenty, hundred and thousand villages, who are to report what is wrong within their jurisdictions that they cannot themselves remedy to the officer next in grade above themselves and Manu VII. 120 prescribes that a minister of the king should supervise the doings and conflicts of all these officers. The Edicts of Aśoka show that he had to employ a hierarchy of officers such as the mahāmātras, the yuktas and rājukas for the administration of his vast empire. A similar administrative system seems to have been continued under the Gupta Emperors From the Damodarpur, Baigram and other plates (E I XV. p 113, E I. XVII. pp 345ff, E I. XXI. p 78) it appears that the Provincial Governors were appointed by the Gupta Emperor himself and were called *uparika* mahārāja, that either the Governors or Emperors appointed District officers (visayapati) who were often called Kumārāmātya, that the District officers were aided in their administrative work by a board of four advisers called nagara-śresthin (banker), sārthavāha (chief merchant), prathamakulika (chief of craft guilds) and prathamakāyastha (chief secretary), that the District officer had his

---

(*Continued from last page*)

very detailed and accurate boundaries of a village of 200 nivartanas are given A nivartana was equal to a square of twenty vamśas on each side, each vamśa being equal to ten cubits, so that a *nivartana* covered an area of 40000 cubits (200 × 200) i e. about 90000 square feet, while an acre is equal to 43560 square feet Therefore the village referred to in the above grant was over 400 acres in extent The Mahābhāsya (on vārtika 8 on Pān I 1 7) has an interesting discussion on the several meanings of the word grāma in popular language viz a number of houses (as in 'the grāma was burnt), the village wall or ditch (as in 'he entered the grāma'), 'men' (as in 'the grāma had gone'), a village with its forests and bushes, with its boundaries (such as rivers and hills) and with embanked fields (as in 'a grāma was acquired'). 'ग्रामशब्दोऽयं बहूर्थः। अस्त्येव शालासमुदाये वर्तते ... अस्ति सारण्यके ससीमके सस्थण्डिलके वर्तते। तद्यथा ग्रामो लब्ध इति। As in modern times villages are found named after trees the same was the case in the days of Pān. and Patañjali शिरीषाणामदूरभवो ग्रामः शिरीषाः तस्य ग्रामस्य वनं शिरीषवनम्। महाभाष्य on पा. I. 2. 51 (vol I. p 224.)

headquarters in a place called adhisthāna and had his several offices or courts (adhikaranas), and that in sales of lands revenue officers called *pustapālas* (keepers of records of rights) were consulted and had to report In E I. vol. *XVII* pp 345, 348 a copperplate of Kumāragupta I has 'grāmāṣta-kulādhikaranam' which means an office having jurisdiction over 8 villages. Manu VII. 119 says that the officer over 10 villages was to have as his salary a kula of land and kula is here said to mean (by Kullūka) as much land as is ploughed by two ploughs having six oxen yoked to each The Vaijayantī on Visnu Dh. S. III. 15 says 'kulam haladvaya-karsanīyā bhūh'. Śukra (I. 191–192) states that the lord of one hundred *grāmas* is called sāmanta, an officer appointed by a king over one hundred villages is called anusāmanta, one over ten villages is called nāyaka (compare modern '*naik*') Manu VII. 61 and 81, Yāj I. 322, Kām V. 75, Visnudharmasūtra III 16–21, Visnudharmottara II. 24 48–49 say that the king should appoint as many *adhyakṣas* (superintendents) as are required for the several departments of the state, who are clever, honest and of good family. Kautilya [183] II.9 prescribes 'those who are possessed of the qualifications for amātyas (cited on p. 107 above) should be appointed, according to their abilities, as superintendents of the various departments and the king should constantly examine their work, since men are naturally fickle-minded and when appointed to do work exhibit like horses change of temper'. It is pointed out in works like the Visnudharmasūtra III 16–21 and the Visnudharmottara II 24. 48–49, Śānti 69. 29, that those who are highly devoted to dharma should be appointed to the ecclesiastical or judicial department, the brave ones to military work, those who are skilled to revenue work and those who are very trustworthy should be placed in charge of mines, salts, toll-gates, ferries, elephant forests.

Kautilya in his 2nd *adhikarana* exhaustively deals with the work done in 28 departments and the duties of their superintendents He enters into very minute details about each and his work is encyclopaedic in character on this subject

183. अमात्यसम्पदोपेताः सर्वाध्यक्षाः शक्तितः कर्मसु नियोज्याः । कर्मसु चैषां नित्यं परीक्षां कारयेच्चित्तानित्यत्वान्मनुष्याणाम् । अश्वसधर्माणो हि मनुष्या नियुक्ताः कर्मसु विकुर्वते । कौटिल्य II. 9, धर्मिष्ठान् धर्मकार्येषु शूरान् संग्रामकर्मणि । निपुणानर्थकृत्येषु सर्वत्र च तथा शुचीन् ॥ विष्णुधर्मोत्तर II. 24. 48 Vide a similar verse quoted by the मिताः on या I. 322

Kautilya's work became the authority on Government and several inscriptions mention officers appointed according to the section on 'adhyaksapracāra', which is undoubtedly a reference to Kautilya's 2nd adhikarana. For example, in the Belava plate of Bhojavarmadeva (E. I. vol XII. at p. 40) and in the Barrackpur grant of Vijayasena (E. I. vol. XV. p 283) we have the words 'anyāṁśca sakala-rājapādopajīvinodhyaksapracāroktān ihākīrtitān cattabhata-jātīyān janapadān ksetrakarāmsca'. It is not possible to do anything more than indicate very briefly the sphere of each *adhyaksa*. The duty of the sannidhātr (II 5) is to look after the construction of the treasury house, the store-houses for merchandise, for grain, for forest produce, for arms and of the jail The samāhartr (the Collector-General) is to exercise superintendence over the collection of revenue from forts, the rural parts, mines, embankments, forests, herds of cattle and roads for traffic (II. 6). The samāhartr[184] has to divide (II 35) the kingdom into four districts and to arrange the villages into three grades, viz. those that are exempted from taxes, those that supply soldiers and those that pay taxes in the form of grain, cattle, money, forest produce, free labour and other equivalents for taxes It is the duty of the *gopa* to look after a group of five or ten villages under the orders of the samāhartṛ. The gopa has not only to register the total number of the inhabitants of all varṇas in the houses that pay taxes and that are exempt in the villages, but also to keep a register of the number of cultivators, cowherds, merchants, artisans, labourers, slaves, biped and quadruped animals, of the amount of money, free labour, tolls and fines that are recovered, and the number of women, men, young and old persons, and the extent of their actions, occupations, usages, expenditures. The *sthānika* (in charge of each of the four districts) should look after his charge in the same way. The superintendent of records and accounts (aksapatalādhyaksa) should have the account office constructed with its door facing the north or the east, with rooms

184. Both the samāhartr and the sannidhātr are mentioned as officers in the copperplate of Mahābhavagupta of Trikalinga (E I vol. VIII p 138 at p 141 and E I vol XI at p 94). Sabara in his bhāsya on Jaimini XII. 1. 28 refers to the samāhartr coming with his own phalanx of subordinates 'यथा सेनापतिर्मैत्यबलेन सहागतः समाहर्ता निजेन बलेन राजा तु सर्वबलैःसैन्यैश्च'. From Hionen Thsang's account of his travels (Beal's 'Buddhist Records' vol. I. p 78) we learn that each province kept a record of good and bad events

(for the clerks) set apart and with shelves of account books well-arranged (II 7) This officer had to enter numerous matters in the accounts, recover the king's dues from the sureties of servants, to check enbezzlement and to recover fines for loss due to neglect or fraud. The account year ended with the full moon of *Āsāḍha*, the year being of 354 days and the salary for an intercalary month being separately paid. Among the duties of the Superintendent of records and accounts was the important one of noting in his register the dharma, method of judicial procedure and the usages of countries, villages, castes, families and corporations (*deśagrāmajāti-kulasanghātānām dharma vyavahāra-caritra-samsthānam .. nibandha-pustakastham kārayet*) In II 8 Kautilya specifies forty modes of embezzlement by Government servants (to which a reference is made in the Daśakumāracarita VIII) In II 9 he employs the picturesque figure that it is not possible to know exactly how officers appointed to the several businesses of the State extract wealth, just as fish always dwelling in water cannot be observed when they drink water The superintendent of treasury (II. 11) shall in the presence of qualified persons receives into the treasury gems, pearls, articles of great or small value and forest produce (like sandal wood, *agaru* etc) The superintendent of mines and of government manufactories (II 12) must be proficient in the science of metals, mercury, liquids that ooze from the holes, caves and sides of mountains and hills Under him are officers called *lohādhyakṣa* (who carries on the manufacture of vessels of copper and other metals), a *lakṣanādhyakṣa* (a superintendent of mint, who manufactures silver and copper coins for the State), a *rūpadarśaka*[184a] (examiner of coins, who regulates the dealings with panas as a medium of exchange among the people and for stocking in the treasury), *khanyadhyakṣa* (who attends to conches, diamonds, pearls, coral and trade in them), a lavanādhyaksa (superintendent of salt) The suvarnādhyaksa (the superintendent of gold) has to construct a goldsmith's office for the manufacture of gold and silver articles with a single door and four halls, to appoint a skilful and trustworthy goldsmith to have a shop in the centre of the road (II. 13) and not to allow any one who is not an employee to

184a. Patañjali in the Mahābhāsya on vārtika 4 on Pān. I. 4 52 cites the example 'पश्यति रूपदर्कः कार्षापणम्। दर्शयति रूपदर्कं कार्षापणम्'. Here रूपदर्क appears to mean one who can examine a coin or probably the same as रूपदर्शक in Kaut.'.

enter the goldsmith's shop. If any one so entered he was to be beheaded. The State goldsmith (II. 14) has to manufacture gold and silver coins for the citizens and rural inhabitants through artisans employed by him. The superintendent of the storehouse (II. 15) has to keep together the produce of crown lands, taxes from the country districts, accidental revenue, manufacture of rice, oil &c. The superintendent of commerce (panyādhyaksa, II. 16) should keep himself acquainted with the demand or absence of demand for and the rise and fall in the prices of various kinds of merchandise produced on land or from water and brought by land or water routes The superintendent of forest produce (kūpyādhyaksa, II. 17) was to collect forest produce through guards of forest and Kautilya gives a long list of trees, varieties of bamboos, creepers, fibrous plants and rope-making material, drugs and poisons, skins of various animals, that came under this officer's care. The superintendent of armoury (āyudhāgārādhyaksa, II. 18) was to employ experienced artisans to manufacture arms, wheels, machines, armour &c. required in battle or for the defence of forts, or for battering the cities of the enemy The superintendent of weights and measures[185] was to get manufactured weights from half *māṣaka*

185. The weights specified are 10 seeds of māsa or 5 guñjās=1 suvarṇa-māsaka, 16 suvarṇa-māsakas =one suvarna or karsa, 4 karsas =one pala, 88 white mustard seeds =one rūpyamāsaka, 16 rūpyamāsakas or 20 śaibya seeds =one dharana The Kāśikā on Pān II 4 21 furnishes the interesting item of information that weights and measures (probably in vogue in its day) were first introduced by the Nandas (nandopakramāṇi mānāni). The chief measures of distance given in II 20 are 8 atoms=one particle of dust thrown up by a chariot wheel, 8 particles=liksā, 8 liksās=a medium-sized yūkā (louse), 8 yūkās =yava (barley corn) of medium size, 8 yavas =one angula, 12 angulas = vitasti, 2 vitastis =aratni or one prājāpatya hand, 2 vitastis plus 4 angulas (called dhanurgraha) =one hasta used in measuring pastures and cubic measures, 4 aratnis =danda or dhanus or nālikā-paurusa, 10 dandas =rajju, 3 rajjus = nivartana, 1000 dhanus (or 2000 acc to another reading) =goruta, 4 gorutas= one yojana. A *nivartana* was probably so called because it represented a day's ploughing by a team of eight or six oxen (from the root *vṛt* with *ni*), meaning the area from which they stopped after a day's work Vide H of Dh. vol. II p 859 note 2021 for *nivartana* and *gocarma*. The extent of the nivartana differed acc. to different authorities. The Matsya said it was 30 dandas square, each danda being of the length of seven hastas, while Sātātapa held the danda to be of 10 hastas The Līlāvatī (I 7) held that a nivartana was 20 vamśas sqnare, each vamśa being of 10 hastas According to the lexicon Vaijayantī, in Kosala the yojana was of four gavyūtis, while

(*Continued on the next page*)

onwards up to one hundred suvarnas, weights being made of iron or stones found in the Magadha country and the Mekala mountain. The superintendent of tolls (śulkādhyakṣa, II 21) was to erect near the principal gate of the capital a toll-house and its flag and when traders arrived with merchandise make four or five toll-collectors take down their names, whence they came, what merchandise they brought and whether it bore seal-mark. In II. 22 Kautilya specifies various rates of tolls for imports and exports. The superintendent of weaving (II. 23) was to employ qualified persons to make threads, coats (of armour), cloths and ropes and he was to employ for cutting wool, fibres, cotton, hemp and flax, widows, cripple women, girls, ascetic women paying off fines by doing work, mothers of prostitutes, old women servants of the palace, *devadāsīs* (temple girls) who have ceased to do temple services This superintendent was charged with the task of providing work for women who do not leave their homes, the wives of persons who have gone abroad, women who are cripple or unmarried and who have to work for their own maintenance. He was to give to them spinning work through the maid-servants in his department If he stared at their faces when they came to exchange their work for wages or spoke to them on any other matter he was fined in the first amercement. Thus the State helped home or cottage industry It is to be noted that he had large powers of levying fines and

---

(*Continued from the last page*)

in Magadha it was only equal to two gavyūtis (last verse of deśādhyāya in bhūmikhaṇḍa). Kaut gives hastas of various lengths for various purposes Compare Manu VIII 132–134, Viṣnudharmasūtra IV 1–7, Yāj I 362–363, Nārada pariśiṣṭa 57–60, Bṛhatsaṃhitā, 57 1 ff, Vāyupurāṇa 101 118 for some of these, which differ in some details from Kautilya's statements Kaut (II 20) states the duration of a *nāḍikā* to be the time required for the passage of one āḍhaka of water from a pot through an aperture of the same diameter as a wire of 4 angulas in length and made out of four suvarṇamāṣakas. 2 nāḍikās are equal to a muhūrta and 15 muhūrtas are equal to a day or a night In II 19 he gives measures of corn as follows — 4 kuḍumbas = prastha, 4 prasthas = āḍhaka, 4 āḍhakas = droṇa, 16 droṇas = khārī, 20 droṇas = kumbha. The droṇa differed for various purposes. Vide above (p 124 note 165) for a quotation from Mit. on Yāj III 274 Hemādri, vratakhaṇḍa pp 51–57, gives quotations from various sources for measures of time, corn &c. These measures were different in different countries and at different times The Līlāvatī (of 12th century A D) I 7 speaks of the khārī in Magadha being equal to 16 droṇas. Vide n 165 above and H. of Dh. vol. II p. 881 n. 2053 and L D. Barnett's 'Antiquities of India' (pp. 206–210) for tables of weights and measures.

awarding bodily punishments e. g. if a woman refused to work after receiving the wages he could cut off her thumb (? or bind up her thumb with the index finger so as to form a pair of tongs). The superintendent of agriculture (sītādhyakṣa,[186] II. 24) himself knowing or assisted by those who know the science of agriculture and the Āyurveda (the ancient lore) of trees was to collect at the proper times all kinds of corn, flowers, fruits, vegetables, bulbs, hemp and cotton seeds and to employ slaves, labourers and prisoners who worked to pay off fines they could not pay, to sow seeds on crown lands. In this chapter he makes interesting remarks about the extent of rainfall viz. the rainfall in a *jāṅgala* country (defined above at p. 132) is 16 dronas, in *anūpa* (very moist) countries 24 dronas, 13½ dronas in the Aśmaka country (modern Khandesh and part of Berar), 23 dronas in the Avanti country (round about modern Ujjain), an immense quantity in the Aparāntas (west coast of India) and the Himālayan regions.

The superintendent of liquor was to carry on the traffic in liquor and ferments in the capital, the other parts of the country and in army camps by employing men familiar with them, he was to impose a fine of 600 panas if any one other than the manufacturers, licensed vendors and vendees sold or purchased liquor, he was not to allow liquor-shops to be opened close to each other, he was to see that liquor was sold in small quantities such as ¼ or ½ of a *kuḍumba* or a half prastha to persons of known character in order that (lit. for fear) workmen employed should not cause loss through carelessness, that *āryas* might not violate the rules of good conduct and that desperadoes should not commit indiscreet acts Śukra was even more strict as regards

---

186 Sītā, according to the Amarakośa, means the 'lines or furrow made by the ploughshare'. Therefore Kauṭilya appears to employ the word 'sītā' in the sense of 'land that has been cultivated'. Prof V. K. Ramchandra Dīkshitar (in 'Hindu Administrative Institutions' p. 369) is not right when he explains सीता लाङ्गलपद्धतिः (of Amara) as 'methods and means connected with the plough'. Paddhati only means the line or furrow made in the field by the ploughshare Kṣīraswāmī explains as स्यति सुवे सीता हललेखा. In II 15 Kauṭilya himself explains 'sītā' as the collection of grain brought in by the superintendent of agriculture 'सीताध्यक्षोपनीतः सस्यवर्णकः सीतां'. The sītādhyakṣa appears to have been concerned with crown lands, while the share of crops leviable on lands of private ownership was called 'bali' Both these were the concern of the samāhartr as stated in V. 1 (where rāstra is said to include sītā, bhāga, bali, kara &c) When in II 15 sītā and rāstra are separately mentioned that is on the analogy of the maxim of *brāhmaṇāśramaṇa* or of *gobalīvarda*.

wine, as he did not allow any one to drink wine in the day-time (IV. 4. 43). The superintendent of slaughter houses (sūnādhyaksa. II. 26) was entrusted with the power to regulate the killing of animals for meat and was to impose the highest amercement on those who trapped or beat or killed deer, cattle, birds or fish which were declared to be under State protection or that dwelt in protected forests The superintendent of nautch-girls (ganikādhyaksa [187]) is dealt with in II 27. The topic of *veśyās* has already been treated of in H Dh. vol. II pp 637–639. Kaut. says that a *ganikā* was to be employed for a salary of one thousand panas, whether she was born in a prostitute's family or not and she was to possess beauty, youth and accomplishments (i e the 64 *kalās* enumerated in Kāmasūtra I. 3. 16). Kaut prescribes that, if she left the country or died, her daughter or sister took her place and estate or her mother could substitute some other ganikā in her place; when none of these existed the king took her wealth and her son did not inherit her wealth. A ganikā could purchase her freedom by paying to the king 24000 panas as ransom She was to hold the umbrella, the golden pitcher and the fan for the king when he was seated on the throne or in a chariot or in his palanquin. There were grades among the ganikās as best, middling and inferior and salaries differed by a thousand. The sons of prostitutes were to be the chief actors on the royal stage It appears from these provisions that the veśyas were more or less slaves The superintendent of ships (nāvadhyaksa, II. 28) was to look after the passage of ships not only over the seas and at the mouths of rivers, but also over lakes and rivers in the sthānīya (vide above p 140) and other sub-divisions of the kingdom Kaut prescribes that villages on the sea-shore and river banks were to pay a fixed tax, fishermen were to render a sixth part of the haul of fish as fees for fishing licenses and merchants were to pay the customary tolls levied in port towns. This superintendent was to request the ships that touched at a harbour on their voyage to a distant port to pay the toll, he was to destroy pirate vessels bound for the country of an enemy as well as those that violated the usages of the port The superintendent of cattle (II. 29) was entrusted with the rearing,

187. आभिरूप्युच्छ्रिता वेश्या शीलिरूपगुणान्विता। लभते गणिकाशब्दं स्थानं च जनसंसदि॥ पूजिता सा सदा राज्ञा गुणवद्भिश्च संस्तुता। प्रार्थनीयाभिगम्या च लक्ष्यभूता च जायते॥ कामसूत्र I 3 20–21. This shows that every *veśyā* was not a ganikā, but only one that was honoured for her accomplishments (in 64 kalās) and who became the cynosure of all eyes.

preservation and care of cows, bulls, buffaloes and the dairy produce. The superintendent of horses (II. 30) was to record the breed, age, colour, marks, groups and places of origin of horses, which were to be classified as those kept in salehouses for sale, those that were recently purchased, those captured in battles, those that were pledged and those temporarily kept in stables &c. Kaut notes that the breed of horses from Kāmbhoja, Sindhu (modern Sindh), Āratta (western Punjab) and Vanāyu (North-west of India) countries are the best of horses, Bāhlīka (modern Balkh), Pāpeya, Sauvīra (eastern Sindh and western Rajputana) and Taitila breeds are of middle quality and the rest are inferior. The superintendent of elephants (II 31) had to take steps to guard elephant forests and supervise elephants that were in stables, the catching, training and feeding of them, their accoutrements &c Kaut devotes one chapter (II. 32) to the training and classification of elephants and medical treatment when they fell ill The superintendent of chariots and that of infantry (II. 33) have the charge of the chariot department and of the six classes of infantry respectively. The superintendent of passports (mudrādhyaksa) issued passes to inhabitants of the country or foreigners for entering into or going out and the superintendent of pastures (II. 34) was to see the passes and devote himself to the care of pastures Kautilya provides that a pass (mudrā) was to be given on payment of a māsaka, that one could enter into or go out of a country only when one had a pass, that a person who entered without a pass was to be fined twelve panas and that the superintendent of pastures and his men were to examine whether persons not going by the royal road but through pastures had a pass or not and that the superintendent of pastures and his men were to convey the approach of thieves and enemies by beating drums and blowing conches and were to send messages about the entrance of enemies into pastures by means of domesticated pigeons carrying letters bearing the official stamp or by means of smoke and fire. The nāgaraka (the mayor of the capital or cities or the chief of the police in the capital) was to look to the affairs of the capital (or the big cities) A *gopa* (under the *nāgaraka*) was to superintend a group of twenty or forty families in the capital and an officer designated *sthānika* was to be in charge of each of four wards into which the capital was to be divided. Yāj II. 173 mentions an officer called *sthānapāla* in connection with the finding of lost goods who appears to be the same as sthānika The gopa and sthānika had to keep a register of the caste, gotra,

name and occupation of the men and women in their districts and also of their income and expenditure Managers of charitable institutions had to send information to them about the heretics and travellers arriving to reside therein. Numerous rules about reporting and punishments for various defaults and wrongs are laid down, which are passed over. Manu VII. 121 and Śānti 87. 10 also provide for the appointment in each city (in the kingdom) of a high officer, who was to superintend all matters affecting the city and who had ample powers of restraint and coercion Many of the superintendents mentioned by Kautilya occur under the same names in the Kāmasūtra e.g. gavādhyaksa, sūtrādhyaksa, nāgaraka (explained by the com as dandapāśika), panyādhyaksa (in V. 5. 7–10) Vide E I. vol. 15 pp. 127–128 for a statement on the provincial administration under the Guptas.

As regards the emoluments of the officers in charge of a village, ten villages &c. Manu (VII. 118–119) has some interesting rules: 'The headman of a village should obtain (as his emoluments) those articles which the villagers have to furnish every day to the king viz. food, drink, fuel and the like The officer over ten villages should enjoy one *kula*[188], that over twenty villages should enjoy five *kulas*, the superintendent of a hundred villages should receive the revenue of one village and the high officer over a thousand villages should enjoy (the revenue of) a town. All this, as Medhātithi says, is only approximate and recommendatory and was not literally followed, but

188. The word 'pratyaham' (every day) excludes taxes on fields that are levied once a year or taxes levied on particular occasions only; while the words 'food, drink and fuel' exclude cattle, money &c The word 'kula' appears to be used as a technical term. It may mean as much land as would be required for the maintenance of a family Bnt there is another sense given by the commentators of Manu. Sarvajña-Nārāyana quotes a text that *kula* means 'two halas'. He and Kullūka quote Hārita to the effect that a plough (yoked acc to dharma) is one of eight bullocks, one of six bullocks is employed by those who want only bare maintenance, householders employ one of four bullocks, while those who in their greed want to incur heavy sin employ a plough with two bulls only So by kula is meant as much land as can be ploughed with two ploughs to which either 8, 6 or 4 bullocks are yoked. That 6 or 8 or 12 oxen were yoked to the plough is stated in Atharva VI. 91.1 and Tai. S. V. 2. 5 2. हलं तु द्विगुणं कुलमिति वचनाद् द्वाभ्यां हलाभ्यां या कृष्यते भूस्तां कुलीतेत्यर्थः। हलमानं च-अष्टागवं धर्महलं षड्गवं जीविकार्थिनाम्। चतुर्गवं गृहस्थानां द्विगवं ब्रह्मघातिनामिति हारीतोक्तम्। धर्महल ग्राह्यं गृहस्थहलं वा। सर्वज्ञनारायण on मनु VII 119.

only means that a salary commensurate with the position and responsibilities of each officer should be received by him. Vide Śānti 87. 6–8 for rules similar to Manu's (where the officer over a thousand villages gets as his salary the revenues of a śākhānagara). Kautilya (in V. 3) sets out the salaries of many officers and servants as follows: the salary paid to the chief mantrin, purohita and a few others has been already stated above (p. 120); the dauvārika, the superintendent of the harem (antarvaṁśika), the praśāstṛ, the samāhartṛ and the sannidhātṛ were to receive 24000 panas; the princes (other than the crown prince), the nurse (mātṛ, mother?) of the princes, nāyaka, the superintendent in charge of justice (or commercial transactions?) in the capital (the pauravyāvahārika), the superintendent of royal manufactories (karmāntika), the members of the council of ministers, the rāstrapāla (governor of a province), antapāla (the guardian of the borders) were to receive 12000 panas; the salary of the heads of śrenis (the military corporations?), the heads of the elephant army, cavalry, and chariot army, and the pradestrs was 8000 paṇas; the superintendents (below the commanders) of infantry, cavalry, chariots and elephants, of the forest produce and elephant forests will each receive 4000; the chariot driver (anīka), the army physician, the trainer of horses, carpenters, *yampoṣaka* (?) will receive 2000; the foreteller (the reader of omens), astrologer (who finds auspicious times for undertakings), the reader of purānas, the sūta, māgadha (bard), the assistants (puruṣa) of the purohita and adhyaksas will receive 1000; trained foot-soldiers, the accountants and scribes will receive 500; musicians 250, but trumpet-blowers will receive 500; artisans (*kāru*) and craftsmen (*śilpin*) 120; servants in charge of bipeds and quadrupeds, workers doing miscellaneous things, attendants near the king, bodyguard and the officer procuring free labour (visti) will receive 60; those appointed to do piece work (kāryayukta, v. l āryayukta), the elephant driver, boys (mānavaka, a page?), mountain-diggers, all attendants, teachers and learned men shall receive honorarium (pūjāvetana) according to their merit from 500 to 1000; charioteer of the king 1000; spies of the five sorts (vide above p. 129) will receive 1000; the village servants (like washer-man), the spies of the type of sattrin, desperado, poisoner and ascetic women will receive 500; the wandering spies (vide above p. 130) three hundred or more according to the labour involved. The superintendents in charge of a group of hundred or a thousand (servants) were to regulate the subsistence (bhakta), cash salary, the perquisites,

the appointment and transfer of those under them. But there shall be no transfer of those who are the king's personal servants and of those who are appointed to guard forts and the country parts. The Sukranītisāra (I. 211) emphasizes that salaries should be in panas, that a king should not make a gift even of a finger-breadth of land as emolument to any servant, but that if he does give land, it should be held only for the life-time of the officer [189]. Kautilya (in II. 1) prescribes that lands may be granted as emoluments to superintendents (of the various departments), the accountants, to officers called gopa and sthānika, to officers in the army, physicians, horse-trainers, but without power to sell or mortgage Śukra II. 117–204 mentions numerous officers of the army, the treasury &c. Śukra IV. 7. 24–27 sets out the salaries of officers, when the king's income is one lakh of *mudrās* a year. Kaut provides for pensions and gratuities. He says 'the sons and wives of those that die while on duty shall get subsistence and wages. Young children, aged persons and ailing persons related to the (dying) officers shall be shown favour On occasions of funerals, sickness or childbirth the king shall bestow money and honours on them' The Mahābhārata (Sabhā 5. 54) prescribes [190] that it is the duty of the king to support the wives of those that meet death or calamities in the king's service Śukra II 406–411 contains very modern-looking rules about sick-leave, casual leave, pension after 40 years of service &c

The above provisions from Kautilya's work show how States in ancient India engaged in almost all the activities of modern States, had an equally complicated machinery of administration and an army of high and low officers. It will also be noticed how, as in India at present, comparatively very high salaries were paid to ministers and heads of departments as compared with the salaries of clerks (e g the ordinary clerks received five hundred, while the chief minister and samāhartr, the

189. न दद्याद्व्यङ्गुलमपि भूमेः स्वत्वनिवर्तनम् । वृत्त्यर्थं कल्पयेद्वापि यावद्ग्राहस्तु जीवति ॥ मृतौ तावद्वेतनार्धं विसृजेच्च सदैव हि । आरामार्थं गृहार्थं वा दद्याद्दत्ता कुटुम्बिनम् ॥ शुक्रनीतिसार I 211–212

collector-general, received respectively 48000 and 24000 i. e. 96 and 48 times as much respectively. If all the different officers mentioned in the works on dharmaśāstra, arthaśāstra and in inscriptions be collected together, they will make a formidably long list. A list from one inscription is set out below as a sample.[191] Vide Vogel's 'Inscriptions from Chamba' pp 120-136 for explanations of about 30 titles of officers occurring in the inscriptions.

A few words must be said about local administration. The word *grāma* occurs even in the Rgveda. In Rg I. 114. 1 the poet offers his praise and prayer to Rudra so that he hopes that 'all bipeds and quadrupeds may fare well and all beings in this village may be free from disease and may enjoy prosperity'.[192] In Rg. V. 54.8 'heroes (or men) conquering grāmas' are mentioned (grāmajito yathā narah). In Rg. X. 62. 11 Manu is styled 'grāmaṇī' and the bestower of a thousand (cows?) and in Rg. X. 107. 5 it is said that the 'grāmaṇī who is endowed with (or dispenses) daksinā (cows or wealth) walks in front (of the village people)'. In the Tai. S. II. 5.4.4 it is said 'the prosperous are three indeed, viz the learned brāhmana, the village headman (grāmaṇī) and the rājanya (warrior)'.[192a] In the Tai. Br. I. 1 4.8, the consecration of fire for a vaiśya sacrificer is made with the mantra 'manostvā grāmanyo vratapate vratenādadhāmi' (where Manu is styled grāmaṇī). In the Śat. Br. V. 4 4. 19 the grāmaṇī is said to be stronger than his co-sharer (sajāta). Vide S. B. E. vol. 41 p. 111. We saw above

---

191. In the Naihati grant of Ballālasena of Bengal in E I. vol. 14 p. 156 at p. 160 we have one of the longest lists of high and low officers. 'परमेश्वर-परमभट्टारक-महाराजाधिराज-श्रीमद्बल्लालसेनदेवः कुशली समुपगतांश्चराज-राजन्यक-राज्ञी-राणक-राजपुत्र-राजामात्य-पुरोहित-महाधर्माध्यक्ष-महासान्धिविग्रहिक-महासेनापति-महाक्षप्रधिकृत-अन्तरङ्ग-बृहदुपरिक-महाक्षपटलिक-महाप्रतीहार-महाभोगिक-महापीलुपति-महागणस्थ-दौःसाधिक-चौरोद्धरणिक-नौ-बल-हस्त्यश्व-गो-महिषाजाविकादित्र्यापृतक-गौल्मिक-दण्डपाशिक-दण्डनायक-विषयपत्यादीनन्यांश्च सकलराजपादोपजीविनोऽध्यक्षप्रचारोक्तानिहाकीर्तितान् चतुर्महाजातीयान् जनपदान् क्षेत्रकरांश्च ब्राह्मणान् ब्राह्मणोत्तरान् यथार्हं मानयति बोधयति समादिशति च । The word 'adhyaksapracāroktān' apparently refers as said above (p. 143) to the section II on the activities of adhyaksas in Kautilya. Vide appendix for a somewhat exhaustive list of officers mentioned in dharmaśāstra and arthaśāstra works and in inscriptions.

192. यथा शमसद् द्विपदे चतुष्पदे विश्वं पुष्टं ग्रामे अस्मिन्ननातुरम् । ऋ. I 114. 1.

192a. त्रयो वै गताश्रियः श्रुश्रुवान् ग्रामणी राजन्यस्तेषां महेन्द्रो देवता । तै. सं. II. 5. 4. 4.

(p 111) that among the *ratnins*, grāmanī (the village headman) was one Grāma did not necessarily mean a village but may have been applied to a town (though not a capital). The headman of a village was called grāmanī, grāmika or grāmādhipati (in Manu VII. 115–116, Kaut III. 10), grāmakūta (in inscriptions e. g E I vol VII p 39 of śake 852, E I. vol VII p 183, 188) and Pattakila, modern Patil (in Ujjain plates of 975 and 1023 A. D. in I. A vol. 6 p. 51, 53, vol 18 p 322 grant of Bhoja in *samvat* 1076, I. A 16 p 254, E I. vol. XI p 304, 310 of *samvat* 1176) In an inscription of the 13th century from the Poona District we have the form 'pattela' (E I vol VII at p 183) The word 'gāvunda' for a village headman in the Canarese Districts is derived from grāmakūta (E. I. vol. VII p 183) Paithīnasi[193] quoted by Aparārka p. 239 states that the food of a grāmakūta could not be partaken by a brāhmana. The Gāthāsaptaśatī frequently refers to the great influence of the grāmanī and the love adventures of his son in the village (I. 30–31, VII. 24). The Kāmasūtra states (V. 5.5) that the young son of a grāmādhipati had certain women of the village at his beck and call[194] According to the Śukranītisāra I. 193 a grāma (village) is one krośa in extent and yields a revenue of one thousand silver karsas, while half a village is called *palli* and half of palli was *kumbha*. Hemādri in Dānakhanda (p 288) quotes from the Mārkandeya-purāna definitions of pura, kheta, kharvata and grāma Yāj II. 167 makes a distinction between grāma, kharvata and nagara (town) as regards the extent of the pasture lands to be preserved round them. Baudhāyana Dh S II 3. 58 and 60 condemns residence in a city for a religious brāhmana where the body is covered with dust which enters one's mouth and eyes and recommends for residence a grāma abounding in water, fuel, fodder, fuel-sticks, kuśa grass, flowers, which is full of well-to-do people, endowed with industrious people, where the majority are āryas and which cannot be entered by robbers In the Sabhāparva 5 84 five officers of a village are referred to It appears that from being a very high officer (a ratnin) in Vedic times the grāmanī was reduced in his influence, came to be appointed by the king alone and the office became hereditary and could be given permanently Vide

193. पैठीनसिः। सांवत्सरिकघाण्टिकग्रामकूटाञ्च वियम्। अपरार्क p. 239.

194 ग्रामाधिपतेरायुक्तकस्य हलोत्थवृत्तिपुत्रस्य यूनो ग्रामीणयोषितो यत्नमात्रसाध्यास्ताश्चर्षण्य इत्याचक्षते विदाः। कामसूत्र V. 5 5.

E.I. vol. VII. p. 177, 188, 189[195]. The Śukranītisāra (II 120–21) states that there were to be six officers in a village and (II. 428–29) prescribes their caste, viz. sāhasādhipati (i.e. a magistrate to deal with wrongs involving force) was to be a ksatriya, grāmanetr (the headman) a brāhmana, bhāgahāra (the person collecting the state land revenue) a ksatriya, lekhaka (a scribe, corresponding to the modern *kulkarṇī* in the Deccan) should be a kāyastha, śulkagrāha (the toll-gate keeper) a vaiśya, pratihāra (the guard at the gate of the village wall) a śūdra. Śukra (in II. 170–175) sets out their duties. The headman was to be alert in protecting the villagers like their parents from thieves, robbers and from the State officers, the bhāgahāra was to devote special care to the tending of trees; the lekhaka was to be skilled in accounting and proficient in several spoken languages; the pratihāra was to be of strong body, proficient in arms, humble and to call the villagers with the respect due to each; and the toll-gate keeper was to levy tolls in such a way that sellers did not incur loss of capital spent by them. From Kaut III 10 it appears that the village headman had the authority to inflict fines in certain cases e g when the headman (grāmika) had to travel on some business of the whole village the villagers were to accompany him by turns, but if they failed to do so they had to pay a fine of one pana or a half pana. Similarly, if a villager does not co-operate in the getting up of a show (preksā) in the village, he or his people would not be allowed to see the show and he was to be fined if he clandestinely saw it In villages, particularly in Karnātaka and South India and in brahmadeya grants (to learned brāhmanas) the village assemblies (sabhā) carried on local administration. From the Kotavumachgi Inscription of Cālukya Vikramāditya V dated śake 934 (1012 A D) it appears that Ummachige was a great educational centre in the 11th century and 104 Mahājanas of the village were entrusted with the proper conduct of worship in the temple, the imparting of education, the feeding of ascetics, the supply of water to the village and the punishment of criminals (E. I. vol. 20 p. 59). Vide Gopalan's 'History of the Pallavas of Kāñcī' pp. 93, 153–157 for the working of the village assemblies (sabhās) from the 9th century onwards, but as he observes (p 154), 'we do not know the nature of the rules that regulated their working, their exact sphere of action and their

195. अस्य ग्रामस्य ग्रामकूटत्वं कह्लाम्बात्मजकुसुमायुधाय दत्तं शाश्वतम् । E.I. VII p. 177 at p 188 (grant of Eastern Cālukya Amma dated 945 A. D.)

relation to the central government.' An inscription of king Parāntaka I (907–947 A. D.) at Uttaramerur deals with several classes of village committees that were appointed by vote (Annual Report of Archæological Survey of India, 1904–5 pp 131 ff) Five committees, viz annual committee, garden committee, tank committee, gold committee (for currency or for collecting taxes in cash), *pañcavāra* committee, are described and reference is made to a sixth called 'justice committee' and the mode of election and the qualifications and disqualifications of members are described in detail (pp. 142–145). Prof Nilkanth Sastri in 'Studies in Cola History' (pp. 131–175) publishes the text of two Parāntaka Inscriptions with English translation and exhaustive notes. Vide also E. I. vol 22 p 5 for resolutions of the sabhā at Manur to be followed in future meetings, the qualifications in property, education and character of the members &c, E. I. vol. 24 p 28 about the *regulations* of sabhā from two Uttaramallūr Inscriptions and E. I vol 23 p 22 for a note on the pañcavāra committee. For village communities as described in Buddhist works in the 7th century B C., vide Rhys Davids in 'Buddhist India' pp. 45–51. It appears from Pānini and the commentary Kāśikā thereon that certain craftsmen were attached hereditarily to the village, were probably paid a certain part of the crop produce yearly for their services and corresponded to the modern village servants (called the twelve *balutedārs*) in the Deccan For an account of these *balutedārs*, vide Grant Duff's 'History of the Marathas' (Bombay ed of 1863, vol I. pp 23–27) For example, Pānini (VI. 2 62) teaches the accent of a compound word formed from 'grāma' with another word denoting 'silpin' (craftsman), such as grāmanāpita (village barber) or grāmakulāla (village potter), which are two examples given by the Kāśikā on this *sūtra*. From Pānini V 4 95 ('grāmakautābhyām ca taksnah') it may be inferred that a carpenter also was a village servant as in modern times in the Deccan Brhaspati[196] contains very

196. ग्रस्तश्रेणिगणाना च सङ्केत समयक्रिया। बाधाकाले तु सा कार्या धर्मकार्ये तथैव च॥ द्वौ त्रय पञ्च वा कार्या समूहहितवादिन। । कर्तव्यं वचनं तेषां ग्रामश्रेणिगणादिभि॥ सभाप्रपादेवगृहतडागारामसंस्कृतिः। तथानाथदरिद्राणा सस्कारो यजनक्रिया॥ कुलायननिरोधं च कार्यमस्माभिरञ्जसा। यत्रैतल्लेखितं पत्रे धर्म्या सा समयक्रिया॥ पालनीया समस्तैस्तु यः समर्थो विसवदेत्। सर्वस्वहरणं दण्डस्तस्य निर्वासनं पुरात्॥ बृहस्पति quoted by अपरार्क pp 792–93, स्मृतिच० II 222–223, व्य प p 332 The latter reads कुलायननिरोधश्च and states that कल्पतरु read कुल्यायननिरोधश्च meaning 'starting water courses and stemming them' अपरार्क omits the half कुलायननिरोध च &c. The word कुला० is variously explained by the digests

important information about local administration in villages. A compact formed among villages, guilds and corporations (gana) is called a *samaya* (agreement); such an agreement must be observed in times of distress and for acts of dharma. Two, three or five persons shall be appointed as advisers of groups; their advice shall be followed by the villagers, the guilds, the corporations and others Examples of agreement as to times of distress are: When there is drought, there may be a compact that for the performance of a sacrifice to the planets or the like each field or house should contribute so much money or when there is trouble from robbers, each house should send one able-bodied and armed man. Then examples are given by Brhaspati himself about acts of dharma. The village people should put down in writing what work they are going to do, such as the repair of a house for their assembly, a shed for distributing water to travellers, a temple, a tank or a garden, the performance of the necessary samskāras (upanayana or funeral rites) of the poor and helpless, gifts for the performance of sacrifices, prevention of famine-stricken groups of families from coming. Such conventions would be proper and should be respected by all the villagers. Whoever being able to carry out such agreements violates them should be punished with loss of all wealth and banishment Brhaspati further says[197] that the heads of families, guilds and ganas and the inhabitants of towns and forts may pronounce the two punishments of reprimand and condemnation against wrong-doers and may also excommunicate them and the punishments and favours declared by them according to rules should be approved of by the king, since such power is regarded by the sages as delegated to them. For ejecting out of the village one who is not guilty of theft or adultery with another's wife the village headman or the village was liable to pay, according to Kautilya III. 10, a fine of 24 panas. It will be seen from what has preceded that village administration was self-contained and would function whatever Government might happen to be at the centre The central Government did not very much interfere with local administration, except in the matter of land revenue, protection against invasion and exercised only general control and supervision. The village communities were miniature states.

197 कुलश्रेणिगणाध्यक्षाः पुरदुर्गनिवासिनः। वाग्विधर्दमं परित्यागं प्रकुर्युः पापकारिणाम्॥ तैः कृतं च स्वधर्मेण निग्रहानुग्रहं नृणाम्। तद्राज्ञोप्यनुमन्तव्य निसृष्टार्था हि ते स्मृताः॥ बृहस्पति quoted by अपरार्क p. 794, स्मृतिच II p. 225, सरस्वतीविलास p 329 There are some slight variations.

There was a great deal of decentralization or devolution of authority from the central government to the village committees and authorities. They were also entrusted with civil and criminal justice, as we shall see later on. For further details on the organization of a village as a political unit, Dr R C Majmudar's 'Corporate life in Ancient India' chap II. pp 135 ff. and Fick (p. 161) may be consulted. Just as there was some organization in villages in general, so also guilds (śrenis) and groups (ganas) had their own regulations and conventions. In XI 1 Kautilya refers to ksatriya guilds in the countries of Kāmbhoja and Surāstra that maintained themselves on husbandry and followed the profession of arms (vide above p. 88 n. 120). In III. 14 he refers to guilds of workmen or labourers (sangha-bhrtāh) Manu (I. 118) declares that his work deals not only with the enduring dharmas of countries, castes and families, but also with the dharmas of heretical sects (pāsanda) and of groups (gana). Manu (VIII. 41) requires the righteous king to consider carefully the dharmas of castes, countries, guilds and families (to find out whether they are opposed to the Vedas) and uphold those dharmas (that are not opposed) as binding (on those respective persons) Yāj. II 192 prescribes that the king should respect the usages and conventions of occupational guilds, merchants, heretical sects, and groups (corporations &c) and allow them to pursue the course of action they had followed from ancient times. Nārada (samayasyānapā-karma, verses 2–6) and Brhaspati quoted in the Vīramitrodaya (vyavahāra) contain very important directions as to what conventions of guilds the king should respect and what he is not bound to respect Nārada says that the king should enforce the conventions agreed upon by heretic sects, naigamas (merchants), srenis and other groups residing in the country or the capital. The king may allow them to follow their special rules (e g speaking the truth), their special actions (begging in the morning without having taken a bath), their mode of meeting (on hearing a drum being beaten), the means of livelihood they have been used to (e. g dressing as an ascetic) But the king should prohibit (out of their usages and conventions) such as are opposed to the king's interest, or are disapproved of by the people in general, would be ruinous to the purposes of the king The king should not tolerate their creating factious groups among themselves, taking up arms for a purpose detrimental to the State, and causing injury to each other The king should specially curb those who cause dissensions among the several

groups; if they are connived at in these activities they might cause terrible danger.[198] A good deal has already been said about guilds and corporations in H. Dh. vol. II. pp. 66–69. Among inscriptions, the following may be studied: the Nasik Ins. No. 15 of the time of Ābhīra Īśvarasena (E. I vol. VIII p. 88, where the śrenis of potters, oil-pressers and water-drawers receive deposits), Junnar Buddhist cave Inscription (A. S. W. I. vol. 4 p. 97, where a deposit of money with śrenis of bamboo-workers and braziers is made), Gupta Inscription No. 16 p. 70 (an endowment was entrusted to the guild of oil-men, whose head was Jīvanta), Gupta Inscriptions, No. 18 p. 79 (silk weavers from Lāta coming to Daśapura and building a Sun temple), E. I. vol. 15 p. 263, E. I. vol. 18 p. 326 and p. 30, E. I. 16 p. 332, E I. vol. I. 155 (of 933 *saṁvat*, inscription at Gopagiri, modern Gwalior, where the guilds of oil-millers and of gardeners are mentioned), I. 184 (Pehoa inscription, where a guild of 34 horse-dealers from different countries, some being brāhmanas, agreed to impose upon themselves and their customers tithes to be distributed to certain temples). Rhys Davids in 'Buddhist India' (pp. 90–96) gives a list of the 18 guilds that probably existed in the times of the early Buddhist works (though two or three of them are of doubtful existence) and the number of which (18) is sometimes mentioned in the Jātakas (as in Mūgapakkhajātaka No. 538, vol. VI p. 14 in Cowell's tr.). For further details about the working and organization of guilds, vide chap. I of Dr. R. C. Majmudar's 'Corporate life in ancient India', and 'Indian Culture' vol 6 (for 1940) pp. 421–28 (on the economic guilds of blacksmiths, barbers &b. in the Kusāna period).

In numerous places rules are laid down about the qualifications of the ordinary servants (parivāra, bhrtya or anujīvin) of kings, how they should conduct themselves, how servants should

198. पाषण्डिनैगमश्रेणीपूगव्रातगणादिषु । संरक्षेत्समयं राजा दुर्गे जनपदे तथा ॥ यो धर्मः कर्म यच्चैषामुपस्थानविधिश्च यः । यच्चैषां वृत्युपादानमनुमन्येत तत्तथा ॥ नाकुलं च यद्राजा प्रकृत्यवमतं च यत् । बाधकं च यदार्याणां तत्तेभ्यो विनिवर्तयेत् ॥ मिथः सङ्घातकरणं महितं शस्त्रधारणम् । परस्परोपघातं च तेषां राजा न मर्षयेत् ॥ पृथग्गणांश्च ये भिन्द्युस्ते विनेया विशेषतः । आवहेयुर्भयं घोरं व्याधिवत्ते ह्युपेक्षिताः ॥ नारद (समयस्यानपाकर्म 2–6). In the Amraoti Inscriptions (E. I. vol. 15 p. 263) we find the words धञ्ञकडकस निगमस (of the trade guild of Dhanyakata). This place is variously identified (vide E. I. vol. 20 p. 9). The अमरकोश holds that नैगम and वणिक् are synonyms. विश्वरूप on या. II. 192 explains 'सार्थवाहादिसमूहो नैगमः'; अपरार्क p. 796 explains 'सह देशान्तरवाणिज्यार्थं ये नानाजातीया अधिगच्छन्ति ते नैगमाः'.

find out whether the king is pleased or displeased with them. Vide Kautilya V. 4, Virāṭaparva 4 12–50 (where the refrain of most verses is 'sa rājavasatim vaset'), Matsyapurāna 216 (the whole of which is quoted in the Rājadharmakāṇḍa pp. 24–27 and in the Rājanītiprakāśa pp 189–192), Agnipurāna 221, Visnudharmottara II. 25. 2–28, Kām IV. 10–11, V 1–4, 6, 9, 11–63 (most of which are quoted in the Rājanītiratnākara pp 51–58), Śukranītisāra II. 54–68, 205–253. On the word 'aksudraparisad' occurring in Yāj I. 310 (where the Mit. has the reading 'aksudrosparusah') Viśvarūpa quotes a passage from Śankha [199] 'a *hamsa* (swan i e a good king) surrounded by vultures (greedy servants) is not desirable, but a vulture (i e a greedy king) surrounded by hamsas (servants of spotless character) may be preferred' The Rājanītiprakāśa (p 185) quotes the same passage from Śankha-Likhita with an addition viz. 'faults arise from those who surround the king and such faults are enough to ruin (the king) Therefore the (king) should first (before engaging his servants) put down in writing whether servants are endowed with learning, character and good family.' Śukra inculcates loyalty on servants in the following remarkable [200] words 'one should not forsake a good master when he is in adversity. Should not one always and quickly desire the welfare of one's protector whose salt (lit food) one has eaten with honour even once' (II 246–247)? This sentiment pervaded most Hindu servants in ancient and medieval times, even under foreign rulers professing a different religion The Rājanītiprakāsa p. 176 quotes a fine verse from the Garudapurāna as to matters to be principally considered in selecting servants, which are four, viz. education, character, family and

199 तथा च शङ्ख । न हंसो गृध्रपरिवारः कामं तु गृध्रो हंसपरिवारः स्यात् । विश्वरूप on या. 1 305, शङ्खलिखितौ । न गृध्रपरिवारः स्यात्काम गृध्रो राजा मेयान्न हंसपरिवारो न हंसो गृध्रपरिवारः । परिवाराद्धि दोषाः प्रादुर्भवन्ति तेऽल विनाशाय । तस्मात्पूर्वमेव तत्परिवार लिखेच्छ्रुतशीलान्वयोपपन्नम् । राजनीतिप्र. p 185. This quotation seems to be corrupt. We have probably to omit the word न before हंसपरिवारः In वसिष्ठ XVI 21–26 (Fuhrers' ed. of 1916) we have a very similar passage, but it is corrupt. Vide राजधर्मकाण्ड p. 22 for the same passage ascribed to शङ्खलिखित The पञ्चतन्त्र has a similar verse of same sense (I 302) 'गृध्राकारोपि सेव्य स्याद्धसाकारै. सभासदैः । हंसाकारोपि सत्याज्यो गृध्राकारै स तैर्नृपः ॥

200. आपद्गत सुभर्तारं कदापि न परित्यजेत् । एकवारमप्यशितं यस्याश्च ह्यादरेण च । तदिष्टं चिन्तयेन्नित्यं पालकस्याशसा न किम् ॥ शुक्र II. 246–247.

actions, just as gold is tested in four ways, viz. by weighing it or by rubbing it (on a touchstone), by cutting it and by heating it[201]

Some responsibilities of the Government or king in ancient India towards the people will now be dealt with. From Kautilya (II. 29 and II. 34) we find that the State made great efforts for the rearing of cattle, made stringent rules for their protection and for the provision of pastures. Manu VIII. 237, Yāj II. 167, Matsya 227. 24 also make provision for pastures round villages, towns and cities Kauṭilya requires the superintendent of cattle to classify cattle as calves, steers, tameables, draught oxen, bulls to be yoked, stud-bulls, bulls meant for carts, cattle meant for meat and buffaloes meant for carrying loads or for being yoked, pregnant cows, milch cattle &c. and to mark them and note in a register of beasts the branded marks, natural marks, colour, the distance between the horns. He prescribes corporal punishments and fine for those who unauthorizedly kill or steal cattle or incite others to do so. He prescribes even the amount of fodder, oil-cakes, bran and salt on which different kinds of animals put to different kinds of work are to be fed. From the Mahābhārata also we learn that even princes[201a] went to supervise and enumerate the herds of cattle belonging to the State. Vide Vanaparva 239. 4 and 240. 4-6. Even such a grammatical work as the Mahābhāsya incidentally gives expression to the view that a country's wealth consists in its food-crops and in abundance of cattle.

We saw above (pp. 130-131) that spies were to be employed (acc to Kāut.) to test whether State officers took bribes. Yāj. (I 336, 338, 339) prescribes that the king should protect his subjects from the harassment caused by *kāyasthas* (the accountants and scribes), that he should ascertain the doings of the State officers through spies, honour those that are well-conducted and severely punish those who are badly behaved and should deprive those who take bribes of their wealth and banish them from the country. Vide also Manu VII. 122-124 and Visnudharmottara for similar rules. The Pañcatantra (I. 343) has the same verse as

---

201. गरुडपुराणेपि। यथा चतुर्भिः कनकं परीक्ष्यते तुलाकषच्छेदनतापनेन। तथा चतुर्भिर्मृतकः परीक्ष्यते श्रुतेन शीलेन कुलेन कर्मणा॥ राजनीतिप्र. p. 176. This is गरुडपुराण 112 3 with slight variations.

201a. स्मारणे समयः प्राप्तो वत्सानामपि चाङ्कनम्। वनपर्व 239. 4, on which नीलकण्ठ explains 'स्मरणहेतौ कर्मणि गवां संख्यापूर्वं वयोवर्णजातिनाम्नां लेखने।; अर्थवानयं देश उच्यते यस्मिन्गावः सस्यानि च वर्तन्ते। महाभाष्य, vol. II. p 401.

Yāj. I. 336 (except the last pāda). Medhātithi on Manu IX. 294 remarks that the kingdom has no fear of ruin if kantakas (wicked people who are like thorns) are removed and justice is properly administered and that kaṇṭakas are generally under the protection of the queen, the prince, the king's favourites or the commander-in-chief

Great attention was paid to agriculture In the Sabhāparva 5. 77 the king [202] is advised to have large tanks in different parts of the country full of water and to see that agriculture did not depend on the rains alone Megasthenes (Fragment I p 30 of McCrindle's work) notes that the greater part of the soil of India was in his day under irrigation and consequently bore two crops in the year. Even from the Tai S V 1 7 3 it appears that two crops were grown in the year (tasmād dvih samvatsarasya sasyam pacyate). The Vāj S. 18 12 contains a list of twelve different kinds of crops such as rice, *yava*, wheat, *māśa*, sesame, *mudga*, *masūra* &c and the Br Up VI 3 13 enumerates ten kinds of grain (grāmyāni dhānyāni) In the Hathigumphā Inscription of Khāravela king of Kalinga (E I vol 20 p 71) it is stated that (p. 79) a canal which had already been opened in the 103rd year of the Nanda kings (i. e In the 4th century B. C) was extended by him in the 5th year of his reign. Rudradāman at great expense from his own treasury without any additional taxation or demand for free labour restored the famous Sudarśana lake near Junāgad (E.I vol VIII. p. 36) that had been built by the Governors of Candragupta and Aśoka and been breached by floods Irrigation had been made use of from Vedic times Rg VII. 49 2 refers to rivers and springs naturally flowing and to channels that were dug up. South Indian Inscriptions show how the Pallavas and kings of other dynasties built tanks which were named after the kings themselves or after some distinguished chief of the locality and that are in existence even now. Vide S I I vol. II part III, p 351, E. I. vol. IV p 152 (mention of tank called 'paramesvaratatāka '), S I I. vol I p 150, E I vol. VIII p. 145 (for mention of rājatatāka near which four nivartanas were granted by Cārudevī) The great engineer Suyya under Avantivarman of Kashmir (833–858) successfully dammed the river Vitastā with the result that a khārī of rice which could formerly be purchased for 200 *dīnāras* could be had after the great irrigation

202 काम्बोजान् सहागानि पूर्णानि च वृहन्ति च । भागशो विनिविष्टानि न कृषिर्देव-मातृका ॥ सभा 5 77.

work for 36 *dināras* (vide Rājatarangini V. 84–117). Kautilya (II. 24) refers to the various ways in which crops could be raised with water and the revenue to be demanded in each case, e.g. those who watered crops with manual labour had to pay 1/5th of the produce, those who carried water on their shoulders paid ¼th, those who watered their crops by means of water-lifts or water-wheels from natural springs paid one-third and those who raised water from rivers, lakes, tanks and wells paid ¼th. He notes that sugarcane crops are a heavy responsibility, as they are liable to many evils and entail great expense. Sugarcane had been grown even in the times of the Atharvaveda (I. 34. 5). The Śukranītisāra (IV. 4. 60) remarks that the king should see to it that there is plenty of water in his kingdom by digging wells, wells with steps, tanks, lakes &c. Megasthenes (fragment XXXIV p. 86 of McCrindle's 'Ancient India') says that some superintend the rivers, measure the land as is done in Egypt and inspect the sluices by which water is let out from the main canals into their branches so that every one may have an equal share of it. Kaut (IV. 3) devotes a special chapter to the king's duty to save the kingdom from national calamities, viz. fires, floods, diseases, famines, rats, wild elephants (or beasts), snakes and evil spirits. He gives practical hints for human and religious remedies and rites against these calamities The measures against famine suggested by him are: the king may provide the people with seeds and food, start works for those who are distressed, distribute either his own collection of provisions or that of the rich or call for help from his allies, tax the rich and make them disgorge their wealth, migrate to other countries that have abundant harvests. National calamities are called *iti*, which are six: excessive rainfall, drought, rats, locusts, parrots and too close presence of foreign kings[203] The work of Kāmandaka states that calamities are either divine or human and that the first are of five kinds. In another place he gives a longer list of calamities. There are several references in ancient and medieval works to severe famines. In the Chāndogya Upanisad I. 10. 1-3 we

203. अतिवृष्टिरनावृष्टिर्मूषकाः शलभाः शुकाः । अत्यासन्नाश्च राजान. षडेता ईतयः स्मृताः ॥ क्षीरस्वामी on अमर०, and राजनीतिप्रकाश p. 447, compare ईतयश्च न सन्ति मे । उद्योगपर्व 61. 17; हुताशनो जलं व्याधिर्दुर्भिक्षं मरकास्तथा । इति पञ्चविधं दैवं व्यसनं मानुषं परम् ॥ काम. 13. 20 = सुधासूषण p. 60 v. 329; अतिवृष्टि...शुकाः । असत्करश्च दण्डश्च परचक्राणि तस्कराः । राजानीकमिथोत्सर्गो मरकव्याधिपीडनम् । पशूनां मरणं रोगो राष्ट्रव्यसनमुच्यते ॥ काम. 13. 63–64 = सुधासूषण p. 59 verses 322–323.

have the story of Usasti Cākrāyana who took from another's plate *kulmāsas* that the other had been eating (i e. he took *ucchista* food), when the country of Kurus was overwhelmed with a shower of hail (or by locusts). The Bālakānda (chap. 9) refers to a famine in the country of Anga under Romapāda The Nirukta II 10 refers to a drought in the dim past for twelve years in the kingdom of Śantanu. A Mauryan inscription from Mahāsthāna (ancient Pundranagara) shows that Gandaka coins were distributed and also corn to famine-stricken people (J. A. S B for 1932 p. 123). The Sohagpur Copperplate Inscription (of Mauryan times) contains an order of the mahāmātras of Śrāvastī that the *dravya* storehouses were to be spent only in case of drought Vide Annals of B O. R Institute, vol. XI p. 32ff., E I. vol. 22 p. 1 and J. A. S B vol. VII (for 1941) part 2 p. 203. The Rājataranginī records several times the occurrence of famines in Kashmir at different periods (e. g vide II 17-54, V. 270-278, VII 1219 ff). The Manimekhalai (chap 28) speaks of a famine for twelve years at Kāñcī in South India There was a terrible famine (called the famine of Durgādevī) for twelve years in the Deccan about 1396 A. D. (vide Grant Duff's 'History of the Marāthas' vol. I. p. 43). Vide E. I. vol 15 p. 12 for a reference to a severe famine in *śake* 1313 when paddy could not be had even at the rate of ten nālis a panam.

It has been shown (in H. Dh. vol. II. pp. 113, 369, 856-858) how it was the king's duty to support learned brāhmanas, to hold assemblies of poets and learned men, to make gifts of land to educational institutions and to promote learning in all ways Vrddha-Hārīta VII. 229-230 says that only learned brāhmanas who are endowed with *tapas* are proper objects of the king's bounty. Some emperors like Harsa went far beyond what was reasonable. The Chinese pilgrim tells us (Beal's 'Buddhist Records &c' vol I pp 214, 233) that at the end of every five years Harsa held an assembly (*parisad*) at Prayāga and gave away all in charity. The Śukranītisāra (I. 368-369) holds that a king should be on the look-out for educated men, should appoint them to offices suited to their education, should honour every year those who have attained eminence in learning and the arts and take measures for the advancement of learning and arts. It has already been shown how this had been followed by ancient and medieval Indian kings to the letter. A comparison with the British Indian Government in the 18th century and the first decades of the 19th will be highly interesting. After the battle of

Plassey in 1757 the British East India Company got three such rich provinces as Bengal, Bihar and Orissa. During over 50 years the only thing that was done by the ruling power for the encouragement of learning among Indians was that in 1780 Warren Hastings started a *Madrassa* of Muslim religious learning at Calcutta with a *moulvi* and 40 stipendiaries and Lord Cornwallis founded a Sanskrit college at Benares in 1792. When the East India Company's Charter was renewed in 1813 the only provision that was made for education and encouragement of learning (by George III, 1813 chap 155, clause 43) was 'that *it shall and may be lawful* for the Governor-General-in-Council to direct that *out of any surplus* which may remain of the rents, revenues and profits arising from the said territorial acquisitions, after defraying the expenses of the military, civil and commercial establishments and paying the interest of the debt, a sum of *not less than one lakh of rupees* in each year shall be set apart and applied to the revival and improvement of literature and the encouragement of the learned natives of India and for the introduction and promotion of a knowledge of the sciences among the inhabitants of the British territories in India'. Detailed comment is not called for. More than 50 years after British rule began, when at least half of what is British India now had come into the hands of the British, and when the yearly income must have been many crores of rupees, the *sum* of *a lakh* of rupees was to be set apart for education of two kinds (Eastern and Western) in the whole of the then British India. Further this provision was not compulsory but only permissive, and was to be availed of only if some surplus was left after everything else had been provided for.

As in western Jurisprudence, so in India the king was looked upon as *parens patriæ*, the protector or guardian of all minors. Gaut.[204] X. 48-49 and Manu VIII. 27 prescribe that the king shall protect the property of a minor until he attains majority or until he returns from his teacher's house Medhātithi on Manu VIII 27 says that the minor's relatives like the uncles may contend that one of them is the guardian of the minor's property but it is the king who is to see that the minor's property is kept

204. रक्ष्य बालधनमाव्यवहारप्राप्णात् । समावृत्तेर्वा । गौ. X. 48-49, रक्षेद्राजा बालाना धनान्यप्राप्तव्यवहाराणा श्रोत्रियवीरपत्नीनाम् । शङ्खलिखित q in वि. र p 598, बालधनं राज्ञा स्वधनवत्परिपालनीयम् । अन्यथा पितृव्यादिबान्धवा मयेदं रक्षणीयं मयेदं रक्षणीयमिति विवदेरन् । मेधा. on मनु VIII. 27. On मनु VIII. 28 he remarks यः काश्चिदनाथस्तस्य सर्वस्य धनं राजा यथावत् परिरक्षेत् । तथा चोदाहरणमात्रं वशादय ॥

safe. Baud. Dh. S. II. 2 43, Vas. 16. 8-9, Viṣnu Dh. S III. 65, Śankha-Likhita contain a similar rule. Nār (rnādāna 35) declared that a person was a minor till the 16th year. Manu VIII. 28-29, Viṣnudharmasūtra III. 65 extend the same rule and say that the king must take care of barren women, women who have no sons, women whose families are extinct, wives and widows who are faithful to their husbands and of those who are afflicted with disease Nār.[205] as quoted by Medhātithi says that if a woman has nobody in her husband's or father's family to protect her, then it is the king who is to protect her. Kaut[206] (II 1) makes it a duty of the elders of the village to take care of and increase the properties of minors and of temples.

It was the special concern of the king to see that proper weights and measures were used. Kaut (II. 19) as stated above (pp 145-146) provides for a special superintendent of weights and measures. Vas[207] (19 13) and Manu VIII. 403 provide that all weights and measures must be duly marked (or stamped), that once in six months they must be re-examined and that the weights and measures for objects required by the class of householders must be guarded against falsifications. Yāj. II. 240 and Viṣnudharmasūtra V. 122 prescribe as punishment the highest ammercement for those who fabricate false balances, edicts, measures and coins and also for those who use them in their transactions The Nitivākyāmṛta (p. 98) requires the king to be vigilant as regards merchandise, balances and measures, since there is none who excels traders in stealing people's money before their very eyes.[208] Vide Alberuni (tr. by Sachau) vol I chap XV about weights and measures current in India in the 11th century

Another important responsibility of the king concerned thefts. Asvapati, king of Kekaya, boasted that in his kingdom there was no thief, no close-fisted person, no drinker of wine,

(Chān. Up. V. 11. 5). Āp. Dh. S.[209] (II. 10. 26. 6-8) lays down that the officers should protect a city against theft for one *yojana* round it and in the case of villages for one *krośa* round them and that whatever is stolen within those limits must be returned to the owners by the officers. Gautama X. 46-47, Manu VIII. 40, Yāj. II. 36, Visnudharmasūtra III. 66-67, Śānti 75. 10 prescribe that the king should recover from the thief stolen property and restore it to the owner (without distinction of caste), that if he cannot restore it he should compensate the sufferer from his own treasury, and that, if he retained the property recovered from a thief or did not make efforts to catch the thief and compensate the owner, the king incurred sin. Kaut. III. 16 contains a similar rule.[210] Viśvarūpa on Yāj. II. 38 quotes a prose passage[211] of Br. with a similar import. The Visnudharmottara[212] (II. 61. 52) remarks that if a person is robbed by his own servants then he (the king) may endeavour to recover it from the servants (by threatening or beating them), but need not restore it from his own treasury. Yāj II. 270-272, Nār. (pariśista 16-21) and Kāt.[213] give further directions, viz. the thief should be made to restore the property stolen or its price; if the thief cannot be found the officers and wardens of the country pay the price of the stolen articles; the property stolen in the village should be made good by the headman of the village, if the thief's foot-steps

213. गृहे तु मुषितं राजा चौरग्राहास्तु दापयेत्। अरक्षकांश्च विक्रोशान् यदि चौरो न लभ्यते॥ ग्रामान्तरे हृतं द्रव्यं ग्रामाध्यक्षः प्रदापयेत्। विवीते स्वामिना देयं चोरोद्धर्तारविवीतके॥ कात्यायन quoted by अपरार्क p 844 Vide 'Selections from Peshwa Daftar' vol. 43 p 131 (No 166) for a comparatively recent (18th century) instance of a village (Pātas in this case) being held responsible collectively for a theft.

are not traced as going out of the village; if the theft takes place in a pasture land or forest (and the thief is not found), the owner of it should be made to pay; if however the theft is not committed in a forest but on the road then the officers appointed to arrest thieves should be made to pay; the whole village may be made to pay the compensation when the theft is within the boundaries of a village but outside the limit of the residential quarters, if the footsteps of the thief are not traced as going out of the village; if the theft takes place beyond one *krosa* from a village then the surrounding five or ten villages may be made to pay the compensation Yāj II. 271 and Kāt mention an officer called 'cauroddhartā' ('or coroddhartā') The 'cauroddharanika' (thief-catcher) is an officer mentioned in numerous inscriptions e g in the Palitana plates of Dharasena II of Valabhi in Gupta year 252 (E. I. vol. XI at p 83), in the inscription of Nārāyanapāla where we have both cauroddharanika and kottapāla, modern Kotwal (I A. vol XV p 304) and in the grant of Ballālasena quoted above (p. 153, n 191) Kautilya IV 13 also gives similar rules and mentions an officer called 'corarajjuka' who has to make good the loss of merchandise by theft between two villages or lands that are not pasture lands.

The first quality required in a king according to Yāj I. 309 quoted above (p. 44) is great energy and Kaut also (in VI. 1) mentions 'great energy' (mahotsāha) among the qualities called 'ābhigāmika'. Works on dharmasāstra and arthaśāstra emphasize the fact that a king must always be full of activity and must not be lethargic or fatalistic In the Mahābhārata the topic of human effort and *daiva* (fate or destiny) comes up for treatment in numerous places and is put in the mouth of several characters with different emphasis according to circumstances. In Ādi 1 246-247, 89. 7-10, Sabhā 46. 16, 47. 36, 58 14, Vanaparva 179. 27-28, Udyoga 8 52, 40 32, 159 4, 186 18, Āsramavāsika 10. 29 the emphasis is on *daiva* as all powerful, it being said that human effort is useless as against *daiva* A golden mean is advocated in Ādi. 123. 21, Sabhā 16 12, Udyoga 79 5-6, Śānti 56. 14-15, Sauptika 2. 3, in all of which it is said that worldly affairs require both *purusakāra* (effort) and *daiva* In certain other passages it is recommended that effort is superior to daiva and that one's business is to make efforts and not to care for fate; e g. in Drona 152. 27, Śānti 27 32, 58 13-16, 153. 50, Anuśāsana 6 1 ff, Sauptika 2 12-13 and 23-24 A few of the striking passages indicative of the three lines of thought are

set out in the note below.[214] Energetic action, according to Śānti. 58 13–15, is declared by Brhaspati to be the root of rājadharma. Nectar was obtained and asuras were killed by the gods by means of energetic action and Indra secured his high position in heaven and here by energetic action. Br. makes the characteristic remark 'A man who is a hero of action leads those who are heroes in speech and the latter are seen to cater for the pleasures of the former and wait humbly on him'. The Bhagavadgītā in its final summing up of the philosophy of Activism without an eye to the fruit of it but from a sense of duty declares (XVIII. 13–16) 'that in the Sānkhya philosophy five categories are mentioned as conducive to the accomplishment of all actions viz the place, the agent, various kinds of instruments, diverse and separate activities and lastly *daiva*; that whatever action a man commences either with his body, words or mind these five are its causes, whether the action be righteous (nyāyya) or the opposite of it, and that this being the true state of things (i. e the fruit depending on the co-operation of five elements and not on one alone) that man who regards himself alone as bringing about a result is a fool and has no correct perception' Kautilya also (I. 19 last two verses) says 'activity (*utthāna*) is the root of wealth and the opposite of it is the root of evil In the absence of activity the loss of present and future acquisitions is sure; by activity a king can obtain his desired object and plenty of wealth'. Yāj (I. 349 and 351) states that success in undertakings depends upon both fate and human effort, yet fate is nothing but the

human effort of past lives manifesting its effect (in this life) and that as on a single wheel a chariot cannot progress, so fate cannot accomplish anything without human effort. Yāj. I. 350 refers to other views viz fate alone leads to success, human effort alone does so, that success results of itself (without any cause), while others say that it is Time that brings about all results. Manu VII. 205, Matsya 221. 1-12 (all of which are quoted in the Rājanītiprakāsa pp. 313-314) and Viṣnudharmottara II. 66 (which has the same verses as in Matsya 221) inculcate the same doctrine as that of Yāj. I 349 and 351 and emphasize that one must always make efforts (tasmāt sadotthānavatā hi bhāvyam-Matsya 221. 12). The Matsyapurāna 221. 2 emphatically[215] states that effort is superior. Medhātithi on Manu IV. 137 quotes a *subhāṣita* 'those devoid of effort are engaged in calculating the aspects of planets; there is nothing impossible of accomplishment for those who are determined and who are able to put forth spirited efforts'. Kaut. (IX. 4 last two verses), Kām. V. 11, XIII. 3-11 emphasize the importance of strenuous efforts. Śukranītisāra (I. 46-58) holds a long disquisition on effort and *daiva*. It contains the following fine sentiments (I. 48-49): 'Men of intellect whose career is honourable regard human effort as the highest (and not fate), while impotent men not being able to make efforts have recourse to fate; but all is centred in both daiva and effort'. Vide Rājanītiprakāśa pp. 312-315 and Nītimayūkha pp. 52-53 for further remarks on daiva and effort. In one place the Mahābhārata (Udyoga 127. 19) contains the bravest and loftiest advice 'man should always press forward (make efforts), should never bend; striving is manliness; one may even break at a point which is not the joint, but should never bend'[216]. The Bṛhat-Parāśara-smṛti X pp. 282-283 contains a long discourse on daiva and puruṣakāra. Vide Vāyu 9. 60-61 and Mārk. purāna 2. 61-62 and 23. 25-26 for similar passages on daiva and effort.

An important doctrine of the writers on Arthaśāstra is more or less based on the necessity of *utsāha*, viz the doctrine of three

śaktis, i e of *utsāha*, *prabhu* (or *prabhāva*) and *mantra*. These three occur in the Mahābhārata (Āśramavāsika 7. 6). The S. V. p. 46 quotes a sūtra of Gautama (not found in the printed Dh. S.) 'the three śaktis, viz. prabhu, mantra and utsāha are based on that (kośa)'.[216a] In VI. 2 Kautilya defines *mantra-śakti* as the power of the knowledge (of statecraft), *prabhuśakti* as the power of treasury and army and *utsāhaśakti* as the force of the king's bravery.[217] Kautilya (IX. 1) holds a discussion about the relative superiority of these three and gives it as his opinion (as against that of the ācāryas) that prabhuśakti is superior to utsāhaśakti and that mantraśakti is superior to prabhuśakti. Kām. XV. 32 defines[218] the three thus: 'the employment of the proper line of policy out of the six *upāyas* (sandhi, vigraha &c) is called mantraśakti; a full treasury and army constitute prabhuśakti and activity of the strong is called utsāhaśakti; the king possessed of all these three becomes the conqueror.' The Nītivākyāmṛta (sādguṇyasamuddesa) p. 322 defines them in the same way.[219] According to the Daśakumāracarita[220] VIII the goal (or purpose) of a king is determined by mantra (consultation with ministers about policy), commencement of actions (for securing the goal) is due to prabhāva and the successful termination of undertakings is brought about by energy. The Parasurāmapratāpa (folio 15a) quotes a verse which defines 'prabhuśakti' differently viz as the power to command. Vide also Agnipurāna 241. 1, Mānasollāsa II. 8-10 pp 91-94. Kām. (XIII. 41-58) brings together the numerous activities of the king.

A king endowed with valour has to employ several means (upāyas) to extend his dominions and to keep his hold on his own people. According to the Rāmāyana V. 41. 2-3, Manu VII. 109, Yāj. I. 346, Sukra IV. 1. 27 and others the

upāyas are four viz. sāma (conciliation), dāna (giving gifts or presents), bheda (causing dissensions) and danda (punishment or depriving of property or causing bodily harm).[221] In the Hāthigumphā Inscription, the king Khāravela (latter half of 2nd century B C.) states that in the 10th year of his reign he sent, following the policy of danda, sandhi and sāma, an expedition against Bharatvarsa, conquered that land and obtained jewels and precious things (E I. vol. XX pp. 79, 88) This shows that the theory of the upāyas must have been evolved several centuries before the Christian era. Some others such as Kām XVII 3, Matsya 222. 2, Agnipurāna 226 5-6, Bārhaspatyasūtra V 1-3, Visnudharmottara II. 146-149 add three more to the above four. Sabhā 5 21 mentions the number seven and Vanaparva 150. 42 mentions sāma, dāna, bheda, danda and upeksā About the additional three there is some difference of opinion, most holding that the three are *māyā*, *upeksā* and *indrajāla* (Kām., Agnipurāna), while the Bārhaspatyasūtra (V 263) says they are māyā, upeksā and vadha and others say they that are māyā, aksa (dice) and indrajāla (Sarasvatīvilāsa p 42) Māyā means 'deceitful trick'. The Visnudharmottara II 148 gives illustrations, such as tying a firebrand to the tail of a bird that often perches on the enemy's camp to produce the delusion that a meteor (an evil omen) fell down from the sky Kām XVII 54 cites the example of Bhīma's meeting Kīcaka dressed as Draupadī. Kām (XVII. 51-53) gives other examples of māyā. *Upeksā* consists in not preventing a person from doing what is unjust or being addicted to some vice or engaging in a fight and is illustrated by king Virāta's connivance at the death of Kīcaka (Kām XVII. 55-57) Indrajāla means 'creating an illusion by means of incantations and other tricks' e. g. creating the illusion before the eyes of the enemy that a vast army is coming to attack them or showing that angels are descending to fight against them or making a shower of blood fall in the enemy's camp etc (Kām XVII 58-59, Visnudharmottara II. 149) About the four well-known *upāyas*, Manu (VII 108-109) says that for the prosperity of one's kingdom sāma and danda (punishment) are preferred, but if

---

221 अल्पशेषमिदं कार्यं दृष्टेयमसितेक्षणा। त्रीन्नुपायानतिक्रम्य चतुर्थं इह दृश्यते॥ न साम रक्षःसु गुणाय कल्पते न दानमर्थोपचितेषु युज्यते। न भेदसाध्या बलदर्पिता जनाः पराक्रमस्त्वेव मनेह रोचते॥ सुन्दरकाण्ड 41 2-3, उपायोपपन्नविक्रमोऽनुरक्तप्रकृतिरुपदेशोपि भूपतिर्भवति सार्वभौम। न हि कुलागता कस्यापि भूमिः किन्तु वीरभोग्या वसुन्धरा। सामोपप्रदानभेददण्डा उपायाः। नीतिवाक्यामृत p 332.

the king's antagonists do not yield to him by the employment of the first three then he may bring them round by danda (i. e. fighting and harassing them) and that (VII. 198, 200) danda is to be employed as the last resort, since victory is not certain. In the Śāntiparva 69. 23 the view of Bṛhaspati is quoted[222] that fighting should always be avoided (as far as possible) and that for securing one's purpose three upāyas (other than fighting) are to be resorted to. Brhat-Parāśara X p. 280 also says that a wise man should not resort to fighting and that danda is to be resorted to only when there is no other course left. In Udyoga 132. 29-30 (cr. ed. chap. 130) Kuntī sends a message through Krsna to her son: 'begging is forbidden to you nor is agriculture appropriate for you; you are a ksatriya living by the power of his arms and a protector against injury (ksatāt trātā). Recover your ancestral share by sāma, dāna, bheda, danda and naya'. In Udyoga 150 (cr. ed 148) Krsna informs Yudhisthira how he first employed sāma, then bheda, then dāna (viz. giving up the whole kingdom for five villages) and how only danda is the proper recourse in the case of the wicked Kauravas. Hopkins, as very often, being obsessed with his ideas of three strata in the Mahābhārata says that three means appear to be the oldest form and four means a later idea. There is hardly any warrant for this opinion as for many others in the same strain (J. A. O. S. vol. XIII pp. 182-183 n). The Visnudharmottara II. 146 speaks of the four upāyas and states that danda as regards a foreign state is open (prakāśa) i. e. burning and not-open (aprakāśa i. e. by poison or secret death). The Mit on Yāj. I. 346 and Kām. XVIII 1 say the same thing. The Vismudharmasūtra III. 38 prescribes that the four upāyas are to be employed at the proper time and according to the attitudes of the hostile king, friendly king, the *madhyama* and *udāsīna* kings[223]. The Mit on Yāj. I. 346 expressly states that the four upāyas are to be employed not only in the affairs between kings but also in the lives of all ordinary people and cites a verse wherein a father or teacher addresses a son or pupil making use of all four means[224]. Kām. XVII, Mānsollāsa II.

17–20 verses 972 ff (pp 117–122). Nitivākyāmṛta pp. 332–336 treat at length of these four upāyas. A few points only are noted here. Sāma is of five kinds viz. recounting the good turns done by each to the other; praising the qualities and actions of the persons to be won over; declaring the relationship of each other; representing the good that will result in future; declaring 'I am yours and I am at your service' (Kām XVII. 4–5) Dāna consists in returning what is deposited with one by another, consenting to the taking away by another of one's things, making a gift of something new, giving what the other chooses to ask for, sending at fixed times what has to be given. *Bheda* (sowing dissensions) consists in giving heavy bribes or presents to ministers or feudatories, the crown prince and high officers of the enemy that are dissatisfied for various reasons, creating distrust between the king and his ministers, the rich men and the handsome men in the kingdom by the threat of the loss of life, honour, position, and wealth, by the fear of imprisonment, by the fear that the king may carry away the beautiful wife of a subject or by suggesting that a handsome young man has his eye on the king's harem, and suggesting to a king that a kinsman desires to secure the kingdom to himself and thereby inducing the king to put out his eyes or cut off his limbs. This is effected by secret spies or persons who are in the pay of both kings (*ubhayavetana*, acc to Mānasollāsa p 119 v. 995)[225]. Vide Kaut XI. 1, Matsya chap. 223 and Śukra IV 1 25–54 for *bheda*, Kaut XI. 1 explains at length how an aspiring conqueror is to sow dissensions between corporations and the leaders of corporations, between chiefs and other people One or two passages may be quoted by way of sample "Spies gaining access to these corporations (of warriors and others) and finding out jealousy, hatred and other causes of quarrel among them should sow seeds of a well-planned dissension among them, and tell one of them 'this man decries you'. Spies may give publicity to the consideration of priority shown to inferior persons in social intercourse in the face of the established custom of recognising the status of other persons by birth, bravery, and social position. In all these disputes the conqueror should help the inferior party with men and money and set them against the superior party. A woman who has disappointed her lover and has been for-

225 शत्रुस्थैरात्मपुरुषैर्गूढैकभवचेतनैः । भीतापमानितान् क्रुद्धान् भेदयेच्च दलद्वयात् ॥ प्राणापहो मानभङ्गो धनहानिश्च बन्धकः । दाराभिलाषोऽक्षिभङ्ग इति भेदोऽत्र षड्विधः ॥ मानसोल्लास II 18, verses 988–989 p 118.

given may approach and say to a chief 'this chief is troubling me when my mind is set on you; when he is alive I cannot stay here' and thus induce the former to slay the latter." The Matsyapurāna 223. 4 states that united people are more than a match even for Indra unless bheda is employed, that dissensions are of two kinds, internal and external, of which the former is more serious. External dissension means the quarrel with a chief, but internal dissension means dissension between a king and his queen or heir apparent or ministers. One should try to prevent dissension with one's own relatives. Śānti 69. 23 also advises the conquest of territory by fomenting dissensions. Therefore the expedient of '*divide et impera*' has a respectable antiquity. Danda in the case of a king's country consists in sentencing to death or corporal punishment or fine and in the case of the enemy in fighting, destroying or devastating his country by seizing his crops and grain, cattle, wealth, forts and in imprisoning and injuring his people, burning his villages and forests.

There were certain privileges that the king enjoyed. His rights to treasure trove have already been referred to (H. Dh. vol II, p 146) Kaut. (IV. 1) gives the following rules. The person giving information about the discovery of a mine, jewels or treasure trove gets one-sixth, but if the informer be a servant of the king he gets $\frac{1}{12}$; treasure trove beyond 100000 panas went to the king wholly (the finder being entitled to a $\frac{1}{6}$th share only up to 100000 panas of the whole); a subject who can prove that the treasure trove belonged to his ancestors would get the whole of it; if he takes it without establishing his ancestral ownership he is to be fined 500 panas and 1000 panas if he appropriated it secretly. The king also took by escheat the property of a person dying without leaving any heir except in the case of brāhmanas (vide H. Dh. II, p. 146 where some authorities are cited). This subject will be dealt with at greater length under the next section on 'law and justice' The king was also entitled to all property that was lost or given up by the true owner. Vide Gaut.[226] X. 36-38, Vas 16. 19, Manu VIII. 30-33, Yāj. II. 33, 173-174, Śaṅkha-Likhita Gaut. and Baud. Dh. S. (I. 10. 17) say that the king should preserve for one year articles found after proclaiming the finding by beat of drum, while Manu says that

226. प्रणष्टस्वामिकमधिगम्य राज्ञे प्रयच्छेयुः। विक्रयाप्य संवत्सरं राज्ञा रक्षणम्। ऊर्ध्वमधिगन्तुश्चतुर्थं राज्ञः क्षेत्रः। गौ. X. 36-38, प्रहीणस्वामिकानि राजगामीनि भवन्ति। शङ्खलिखित quoted in वि. र p. 599

the period is three years. The Mit on Yāj. II. 33 reconciles these texts by saying that if the true owner comes to the king and establishes his ownership he gets back the entire article without paying anything for safe custody, if the owner comes in the 2nd year he pays $\frac{1}{10}$ of the price for custody, if in the third year he pays $\frac{1}{10}$ and $\frac{1}{8}$ if he comes after three years The finder gets $\frac{1}{4}$ out of the share taken by the king. If the owner does not come at all the finder gets $\frac{1}{2}$ and the king the rest. The king may dispose of the article if none claims it within that period, but if the owner comes after three years and the article has been disposed off, the king should return the equivalent of the portion taken by him. Yāj II. 174 specifies other scales of charges for the custody of unclaimed animals such as four panas for a horse &c. Another special privilege of the king was that he could not be cited as a witness in a judicial proceeding between private parties. Vide Kaut III. 11 (p 175), Manu VIII. 65, Viṣnudharmasūtra 8. 2

Constitutionally there was no one who could directly bring to book the king guilty of injustice But the Dharmaśāstra writers insisted that *dharma* was the king of kings (Br Up I 4. 14 quoted above p 97 n 125), that Varuna was the chastiser of kings (Manu IX 245), therefore they appealed to the higher nature and conscience of the king and prescribed that if a king levied an unjust fine, he should offer thirty times of that amount to Varuna, throw the amount in water or distribute it among brāhmanas (Yāj II 307) and that where an ordinary man would incur a fine of one kārsāpana for a wrong, the king certainly deserves to be fined a thousand kārsāpanas (Manu VIII. 336) The remarks of Medhātithi on that verse quoted below are very interesting, when he insists on the principle that fines for the same wrong should vary with the capacity to pay[227] Even Kauṭilya (IV 13 last two verses) falls in line with Manu IX 245 and Yāj II 307 But these prescriptions of Manu, Yāj and Kaut were counsels of perfection and must have been futile No king would ordinarily fine himself Therefore some medieval

227. महाधनत्वादल्पं दण्ड न विगणयेद्राजा। अधिकृतानां मन्त्रिपुरोहितादीनामनयैव कल्पनया न्यूनाधिकभाव.। धनदण्डश्च ब्राह्मणेभ्योऽप्सु प्रवेशनेन वरुणाय वा यो तावद्दस्यति (यत्तावद्?) राज्ञा दण्डधरो हि स.। मेधा० on मनु VIII 336 Compare अदण्ड्यदण्डने राज्ञो दण्डस्त्रिंशद्गुणोभ्यासि। वरुणाय प्रदातव्यो ब्राह्मणेभ्यस्तत परम् ॥ तेन तत्प्रयते पाप राज्ञो दण्डापचारजम्। शास्ता हि वरुणो राज्ञा मिथ्या व्याचरता हृषु ॥ कौटिल्य IV 13 last two verses तस्माद्राज्ञामवान्तरनरपतीनामिति रत्नाकरोक्तमेव न्याय (ज्याय?) इति द्रष्टव्यम्। स्वस्य स्वय दण्डनाहुपपत्ते। दण्डविवेक p. 55.

digests like the Vivādaratnākara and the Dandaviveka (p 55) interpret these texts as meaning that the word 'rājan' applies here only to subordinate chiefs and not to a king who is independent

The flourishing state of a kingdom well governed by a good, well-equipped and active king is very graphically described in the Rāmāyana (II. 100. 43–46) 'I hope your country is full of hundreds of *caityas* (platforms for sacred trees) and of people who are well-placed; is rendered charming by temples, *prapās* (sheds where water is distributed to travellers *gratis*) and tanks, in which men and women are joyful; which is set off to advantage by merry gatherings and festivals; the whole extent of which is well cultivated; which is full of cattle and free from injury (to beings); which does not depend upon rains alone (for its crops); which is beautiful, free from beasts of prey and all kinds of dangers; which is endowed with mines; which is free from wicked men and enjoys prosperity and happiness' The Ādiparva chap 109 (cr. ed chap 102) also contains a fine description of a well-governed and prosperous country. The country was to be full of public wells, gardens and meeting-halls (sabhā) The Viṣṇu-dharmottara I 13. 2–12 contains an ideal description of ancient Ayodhyā. 'It was endowed with hundreds of parks; it celebrated festivals and held gatherings of people, its population was free from disease and had valiant men, it always resounded with the music of lutes, flutes and tabors, it had fair complexioned, charming *hetaras* clever in brilliant conversation; its population was always gay; it resounded with the recitation of the Veda and was endowed with companies of brāhmanas, its market rows were full of men that had applied scents to their bodies; there was not a man there who was wretched, dirty or emaciated; it stretched for three yojanas on the bank of the Śarayū and was ten yojanas in the middle'

CHAPTER VI

DURGA (FORT OR CAPITAL)

Manu IX. 294 places the capital (pura) even before rāstra Medhātithi (on IX. 295) and Kullūka explain that the loss of the capital is a more serious danger than even the loss of some territory, because if the capital, which possesses all the stocks of food, in which are centred the principal elements and the army, is saved, then it is possible to retrieve even lost territory and to protect the country. It is as it were the pivot of the whole machinery of government. Other writers (and even Manu in VII 69-70) place the capital or fort after the rāstra It is probably due to the geographical situation in North India and the nature of the fighting in ancient times that made the capital and forts of great importance in the several elements of the State. The capital mirrored the prosperity of the country and if properly walled also provided security Yāj I. 321 says that forts are meant for the safety of the king, the people and the treasury (*janakośātmaguptaye*) The reason for the construction of forts is well put by Manu VII. 74 viz that a single archer under the shelter of the fort-wall can fight a hundred of the enemy and a hundred can fight ten thousand The Pañcatantra (I 229 and II. 14) has a similar verse. Brhaspati quoted by the Rājanītiprakāsa[228] p 202 states that the king should construct a fort with walls and a gate for the protection of himself, his wives, the people and the (wealth) collected by him Kaut (II. 3 and 4) deals at length with the construction of durgas and the laying out of the capital in one of them. He says that in the four quarters of the boundaries of the kingdom forts should be built for offering resistance (to the enemy) on ground naturally fitted for the purpose He speaks of four kinds of forts viz '*audaka*' (water-protected, which is on an island surrounded by water or on a plain surrounded by low ground), *pārvata* (mountain one, such as a rocky hill or a cave), *dhānvana* (desert fort, on a waterless tract full of thickets or waste land), a forest fort full of wagtails and water and

---

228 बृहस्पतिराह । आत्मदारार्थलोकानां संत्रितानां तु गुप्तये । वृषतिः कारयेद्दुर्गं प्राकारद्वारसंयुतम् ॥ राजनी प्र. p 202 and राजधर्मकाण्ड p 28

thickets of reed. He says that the first two are suited for the protection of populous places and the last two for the protection of foresters. Vāyu 8. 108 refers to four kinds of durgas. Manu VII. 70, Śānti 56. 35 and 86. 4–5, Visnudharmasūtra III. 6, Matsya 217. 6–7, Agnipurāna 222. 4–5, Visnudharmottara II. 26. 6–9, III. 323. 16–21, Śukra IV. 6 speak of six kinds of forts viz dhanvadurga (which is waterless five yojanas round a raised plain), mahīdurga (a land fort, which is surrounded by a wall built of stones or burnt bricks, that is at least twelve feet high and twice as high as it is broad), jaladurga (water fort, surrounded on all sides by deep water), vārksa durga (fort that is surrounded for one yojana on all sides with thorny and tall trees and thorny creepers and bushes), nrdurga (fort that is guarded by a numerous army of four sections on all sides), giridurga (mountain fortress, difficult to climb and with only one narrow access). Manu VII. 71 says that the mountain fortress is the best of all, while Śānti 56. 35 states that nṛdurga is the most difficult to conquer. The Mānasollāsa (II. 5 p. 78) speaks of nine kinds of durgas (adding those built with stones, bricks and mud). The Paraśurāma-pratāpa enumerates eight kinds of durgas (Rājavallabhakānda, folio 1) and states that the wall of a fort may be of stones or of baked bricks or of mud Manu VII. 75-Sabhā 5. 36 (=Ayodhyā 100, 53), Matsya 217. 8, Kām. IV. 60, Mānasollāsa III. 5 (verses 550–555), Śukra IV. 6 12–13, Visnudharmottara II 26. 20–88 prescribe that forts should possess plenty of arms, grain, drugs and other materials, wealth, horses, elephants, beasts of burden, brāhmanas, artisans, machines (called Śataghnīs acc to Matsya, that kill a hundred), water and fodder. The Nītivākyāmṛta (durga-samuddesa p. 199) says that there must be means of leaving it secretly, otherwise it will be a prison and that no one should be allowed to enter it or leave it without a pass or without being searched. Kaut. (II. 3) gives detailed instructions for the construction of fort walls, towers, ditches, pillars, lotus ponds and buildings inside the fort, which are all passed over for want of space. Vide the Rājadharmakānda pp. 28–36 and the Rājadharmakaustubha pp. 115–117 for numerous quotations from the Dhanurveda of Uśanas, the Mahābhārata, the Matsya, the Visnudharmottara and other works on *durga*

In the Ṛgveda we have frequent mention of cities. In I. 63. 7 Indra is said to have shattered seven cities for Purukutsa

and in II 20 8 it is narrated that Indra killed the dasyus and destroyed their cities of *ayas* (copper, *hatvī dasyūn pura āyasīr ni tāsīt*). This shows that walled cities were known even at that distant date There is difference of opinion as to whether the walls were of mud and wood or of stones and bricks. Vide Hopkins in J. A O. S. XIII pp 174-176 The Tai S VI 2 3 1 speaks of the three cities of asuras constructed with *ayas*, silver and gold (*hariṇī*) In the *agnicayana* as described in the Sat Br thousands of baked bricks were required The excavations at Mohenjo-daro show that walls were built of burnt bricks (Marshall, vol I. pp 15-26) There is no reason to assume that houses, palaces and city walls could not have been built of bricks, simply because no purely Hindu ruins anterior to Alexander have yet been discovered or because Megasthenes describes that Pātaliputra had a wall of wooden palisades One must demur to the remarks of Hopkins on pp. 174-175 of J. A O S vol XIII. Walls (prākāra), toranas (arched gates) and upper stories (attālakas), moats are very often spoken of in connection with capitals in both epics The gates were sometimes called after cities e g in Vanaparva I 9-10 the Pāndavas are said to have gone out of Hastināpura from the gate called Vardhamānapura [229] Vide also Āśramavāsi-parva 16 3 The Mahābhārata states that palaces had dancing halls (nartanāgāra) attached to them (Virāta-parva 22 16 and 25-26) Śānti 69 60 states that the capital was rendered gay by natas (players) and dancers and Śānti 86 (4-15) describes how cities were to be founded in durgas, how they were to be full of music, festivals and merry gatherings (*samājotsava*) and what stores they should contain. In the Rāmāyana (V. 2. 50-53) Lankā is described as having palaces of seven or eight stories and mosaic pavements The Bṛhatsamhitā (chap 53) contains in 125 verses very accurate directions and measurements about palaces, houses &c (i. e on vāstusāstra) It states that the best kind of royal palace was to be 108 cubits broad, that palaces of 100, 92, 84, 76 cubits may be built, that the length in each case was to be one-fourth as much more as the breadth. It speaks of the dimensions of mansions for the commander-in-chief, ministers, the queen, crown prince, purohita, physician &c In v 23 it states that the walls may be of baked bricks or of wood

229. वर्धमानपुरद्वारादभिनिष्क्रम्य पाण्डवाः। उदङ्मुखाः शस्त्रभृत प्रययुः सह कृष्णया॥ वनपर्व 1. 10; स वर्धमानद्वारेण निर्ययौ गजसाह्वयात्। आश्रमवासि 16. 3

The king was to have his capital inside a fort or independent of it Manu VII. 70, 76, Āśramavāsi 5. 16–17, Śānti 86. 6–10, Kām. IV. 57, Matsya 217. 9ff, Śukra I 213–217 describe where and how a capital was to be built Kautilya (in II. 4) describes at great length how the capital was to be laid out viz the extent should be demarcated by three royal roads from west to east and three from south to north, the capital should have twelve gates, provided with concealed land and water exits : the chariot roads, the royal roads and roads leading to drona-mukha, sthāniya, the rāstra and pastures should be four dandas (16 cubits) in width. He then prescribes the width of roads for various other purposes. Occupying one-ninth of the whole area of the capital, but to the north from the centre of the capital and in the midst of people of all castes the king's own palace should be built facing the east or north To the north-east of the palace should be the residences of the king's teacher (ācārya), purohita, ministers and the sacrificial place and water reservoir. He then assigns appropriate places round about the palace for the offices of the several superintendents, to merchants, principal artisans, brāhmanas, ksatriyas, vaiśyas, prostitutes, wool workers, sūdras &c In the centre of the capital were to be constructed apartments for the images of Aparājita, Apratihata, Jayanta and Vaijayanta and the temples of Śiva, Kubera, the Aśvins, Laksmī and Madirā (Durgā ?) The principal gates named after Brahmā, Yama, Indra and Kārtikeya were to be constructed At a distance of 100 bows (400 cubits) beyond the ditch, platforms for holy trees, groves and embankments should be built The cemetery should be to the east or north but to the south for the higher varnas Heretics and cāndālas should have a place of residence beyond the cemetery. For each group of ten families there must be a well ; oil, grain, sugar, salt, medicines, dried vegetables, fire-wood, arms, and other essential commodities should be stored in such large quantities that they might last for several years in case of a siege or invasion. The Matsyapurāna (217. 9–87) differs from the above description in many ways. It prescribes four wide roads, at the ends of which a temple, the royal palace, the court of justice and the principal gate are to be respectively constructed Almost the whole of the description in the Matsya is quoted by the Rājanītiprakāśa (pp. 208–213) and also in the Rājadharmakānda pp. 28–36. The former also quotes (pp 214–219) a long passage from the Devīpurāna with regard to the construction of a *nagara*.

a *pura*, a *hatta* (market), a *purī*, a *pattana*[230] and the temples of several deities that are to be built in each, the rites to be observed in measuring out the ground for each and accurately finding out of the east and other directions. Pāṇini (VII 3. 14 prācām grāmanagarāṇām) distinguishes between grāma and nagara, while Patañjali thereon (vol III. p. 321) explains that grāma, ghosa, nagara, and samvāha are the appellations of different groups or settlements of people The Vāyupurāna (94 40) separately mentions cities (purāni) ghosas (hamlets of cowherds), villages and pattanas Vide Śukranītisāra I. 213-258 for provisions about the laying out of the capital, the palace, the court of justice, other state offices and public buildings, ditches &c and Yuktikalpataru pp 22 ff, Vāyu 8. 108 ff, Matsya 130 Śukra (I. 260-267) describes how four royal roads should start from the palace in four directions, how the best, middling and inferior royal roads should be 30, 20 and 15 cubits in breadth; he defines *padyā* (a foot-path), *vīthi* (a lane) and *mārga* as respectively equal to 3, 5 and 10 cubits in breadth, that in the capital there should be no narrow street like a padyā or vīthi, that even in villages the public road should be at least 10 cubits in width, that all roads should slope down from their middle and that all houses should face the royal road. For a description of Ayodhyā vide Rāmāyana II. 100. 40-42, which says that it was full of valiant men, had strong gates, was full of elephants, horses, and chariots, was inhabited by energetic people of all castes that were devoted to their duties, that had mansions of various sizes, that it was prosperous and had many physicians From the Rāmāyana (VI. 112. 42 *sikatharathyāntarāpanā*) and the Mahābhārata (Ādi. 221 36) it appears that the roads of the capital were watered. In the Harsacarita (III) Bāna gives a graphic description of Sthānvīśvara (modern Thanesar) For the local administration of the capital, vide the duties of the nāgaraka described above (p 149) from Kautilya (II. 36) From the Paharpur plates (dated Gupta samvat 159 i e 478-9 A. D.) it appears that a nagara-śresthin (the chief of the bankers and traders of the capital) was nominated (probably by the king) Vide E I. vol 20 p. 59 at p. 61. There was probably a board of the elders of the city (pauramukhyas or pauravrddhas

230. Compare ग्रामा इट्टादिशून्याः, पुरो इट्टादिमत्यः ता एव महत्यः पत्तनानि, दौर्गाण्यौदकादीनि । खेटाः कर्षकग्रामाः । खर्वटा. पर्वतप्रान्तग्रामा इति । श्रीधर on भागवत IV 18 31 q in राजनीतिको p 102 The शिल्परत्न (chap V) defines ग्राम, खेटक, खर्वट, दुर्ग, नगर, राजधानी, पत्तन, द्रोणीक, शिविर, स्कन्धावार, स्थानीय, विटङ्कक, निगम, शाखानगर in all 14 (Tri ed.) The मयमत (X 92) speaks of ten of these and IX 10 gives the extent of ग्राम, खेट, खर्वट, दुर्ग, नगर.

as in Kautilya) appointed to help the Governor of the capital (*nāgaraka*) in administration. In the Damodarpur copper plates also a nagaraśresthin is mentioned along with others who were approached for consenting to a purchase of land (E I. vol XV at pp. 130, 133, dated Gupta samvat 129). Megasthenes (in McCrindle's 'Ancient India', Fragment XXXIV p 187) describes the city of Palibothra (Pātaliputra) and its administration. He says that six committees of five each looked to the affairs of the city and were respectively in charge of (1) industrial arts, (2) entertainment and care of foreigners, (3) inquiries about births and deaths, (4) trade and commerce, weights and measures, (5) manufactured articles, (6) collection of the 10th of the prices of articles sold. Fragments XXV-XXVI (pp 65-67) inform us that Palibothra was 80 *stadia* in length and 15 in width, that in shape it was a parallelogram, that it was surrounded by a wooden wall with holes for discharging arrows and a ditch in front. Arrian states (pp 209-210 of McCrindle's 'Ancient India') that Palibothra had 570 towers and 64 gates. Patañjali in his Mahābhāsya frequently brings in Pātaliputra (e. g in vol. I p. 380 he states that Pātaliputra is alongside of the river Śona, on Pān. II. 1. 16), in vol. II. p 311 (vārtika 4 on Pān. IV 3. 66) he refers to its walls and to its palaces, in vol. II. p. 321 (on Pān. IV. 3. 134). In Fa-Hien's time (399-414 A. D) the royal palace and halls in the midst of the city built of stone still existed and were so grand that they were then believed to have been the work of spirits (vide Legge p 77). Vide Rhys Davids' 'Buddhist India' pp 34-41 for the ancient Indian capitals in the 7th century B. C.

In the Bhāgavatapurāna (IV. 18. 30-32) it is narrated that Prthu, son of Vena, first levelled the earth, established human habitations in villages, towns, capitals, forts &c., and that before Prthu people resided where they liked and there were no such groups as villages or towns. Bhrgu quoted by Śrīdhara according to Rājanīti-kaustubha defines grāma as the habitation of brāhmanas, their hired labourers and śūdras, that kharvaṭa is on the bank of a river and of a mixed character, one side being a village and the other a town. Śaunaka quoted by the Rājanīti-kaustubha (pp 103-4) defines kheta as a place where brāhmanas, ksatriyas and vaiśyas reside, that a place where all castes reside is called a town, that brāhmana householders should be established on soil that is whitish and has sweet odour, ksatriyas should be established in towns where the soil is reddish and wafts a sweet odour and vaisyas on yellowish soil.

CHAPTER VII

KOSA (TREASURY OR FINANCE)

Kaut (II 1) states that a king whose treasury is depleted preys upon the citizens and the rural population and (II. 8) very[231] rightly remarks that all undertakings depend upon kośa (financial position of the king), therefore the king must pay the first attention to kośa Gautama (as cited by S V p 46) holds that kośa is the basis or support of the other six elements of the State The Śāntiparva 119. 16 calls upon the king to guard his finances with great effort, since kings depend upon kośa, which tends to the prosperity (of the kingdom) Kām XIII. 33 states that it is on the lips of all that the king is dependent on kośa Śānti 133 contains a eulogy of kosa. The Visnudharmottara II. 61. 17 says that kosa is the root of the tree of State The two great pillars of the Indian States in ancient India were the revenue and the army Manu VII. 65 says that kosa and the government of the realm depend on the king i e they should be the personal concern of the king Yāj. (I. 327–328) recommends that the king should personally look into the income and expenditure every day and keep in his treasury buildings whatever is brought by those who are appointed to bring gold and wealth Kām V. 77 and Sukra I. 276–278 say the same The Rājatarangini (VII 507–508) tells us that king Kalaśa of Kashmir (1063–1089 A. D.) kept accounts like a merchant, closely watched income and expenditure and had a clerk by his side with chalk and *bhūrja* (birch leaf) to write upon. The principal means of filling the treasury is taxation It is therefore necessary to consider first the principles of taxation as evolved by our writers. The first principle was that the king could not levy, according to the smrtis, taxes at his pleasure or sweet will, that the rates of taxes which the king was entitled to levy were fixed by the smrtis and varied only according to the

---

231. कोशमूलाः कोशपूर्वाः सर्वारम्भाः। तस्मात्पूर्वं कोशमवेक्षेत । कौटिल्य II 2. कोशश्च सततं रक्ष्यो यत्नमास्थाय राजभि. । कोशमूला हि राजानः कोशो वृद्धिकरो भवेत ॥ शान्ति 119. 16; कोशमूलो हि राजेति प्रवादः सार्वलौकिक । कामन्दक XIII. 33. This last occurs in बुधभू p 36; कोशस्तु सर्वथा अभिसंरक्ष्य इत्याह गौतम· । तन्मूलत्वात्तस्य कृतीनामिति । स. चि. p. 46.

commodity and also according as the times were normal or there was danger of invasion or some other calamity impending. For example, Gaut. X. 24, Manu VII 130, Visnu Dh. S. III. 22–23 declare that the king may ordinarily take a sixth part of the grain-crops or produce of the soil, but Kauṭ (V. 2), Manu (X. 118), Śānti 87, Śukra IV. 2. 9–10 permit the king to take even one-third or one-fourth part of the crops in times of distress (*āpad*) It has however to be noted that Kautilya requires the king to beg (*yāceta*) of the people for this heavy taxation, he employs the word *pranaya* (request) for such demands, such taxation was not to be levied from inferior lands, and he expressly says that such a demand for excessive taxation is to be made only once and not twice in the same distress.[232] Śānti (87. 26–33) contains a specimen of a long address to be given to the people when a king demands higher taxation in danger (such as 'if the enemy invades you, you will lose all including even your wives, the enemy will not restore to you what he robs you of' &c.) The word 'pranaya' occurs in this sense in the Junāgadh Inscription of Rudradāman (E I. vol VIII. p. 36 ll 15–16). Another principle laid down in somewhat poetical and picturesque language is that taxation should be felt by those taxed as light and not heavy or excessive. The Udyogaparva[233] (34. 17–18) states 'just as a bee draws honey but at the same time leaves the flowers uninjured, so the king should take wealth from men without harming them. One (a bee) may search each flower (for honey) but should not cut the very root just like a garland-maker, but not like a coal-maker'. Manu (VII 129 and 140) laconically puts the matter thus 'just as the leech, the calf and the bee take their sustenance little by little, so must the king draw from his kingdom annual taxes little by little Let the king not cut up his own root (by levying no taxes) nor the root of others by[234] excessive greed'. Śānti (88

232. कोशमकोशः प्रत्युत्पन्नार्थकृच्छ्रः संगृह्णीयात् । जनपदं महान्तमल्पममार्णं वा देवमातृकं प्रभूतधान्यं धान्यस्यांशं तृतीयं चतुर्थं वा याचेत । ... इति कर्षकेषु प्रणयः । ... इति व्यवहारिषु प्रणयः । ... सकृदेव न द्विः प्रयोज्यः । अर्थशास्त्र V. 2.

233 यथा मधु समादत्ते रक्षन् पुष्पाणि षट्पदः । तद्वदर्थान्मनुष्येभ्य आदद्यादविहिंसया॥ पुष्पं पुष्पं विचिन्वीत मूलच्छेदं न कारयेत् । मालाकार इवारामे न यथाङ्गारकारकः ॥ उद्योग 34. 17–18. पराशर I. 62 is the same as the last of the two. Compare धम्मपद 49 'यथापि भमरो पुप्फं वण्णगन्धं अहेठयं । पलेति रसमादाय एवं गामे मुनी चरे ॥'

234. यथा राजा च कर्ता च स्यातां कर्मणि भागिनौ । संवेद्य तु तथा राज्ञा प्रणेयाः सततं कराः ॥ नोच्छिन्द्यादात्मनो मूलं परेषां चापि तृष्णया । ईहाहाराणि संकल्प्य राजा संभोतदर्शनः ॥ शान्ति 87. 17–18, मनु. VII 139 has the half नोच्छिन्द्यात् &c.

4–6) states that the king should draw (taxes) from the realm lightly in the way the bee draws honey from the trees, he should do so in the way of the calf and should not bruise the udders (as the calf does not) Those verses also refer to the action of the leech, of the tigress carrying her cubs between her jaws and the rat gnawing at the feet of sleeping men These ideas pervaded society so much that the same figure of the bee is instanced as regards the Buddhist bhikkhu's importunity for alms in the Dhammapada (verse 49) The king should act like a gardener who prepares garlands without harming the trees and their leaves and should not act like one who prepares coals from trees (Śānti 71 20)[235]. Manu VII 139 requires that the king should not through greed tax the subjects heavily, as he would thereby cut off the roots (i e. prosperity and contentment) of the people, nor should he cut off his own roots (i e reduce himself to bankruptcy) by levying no taxes A third principle of taxation was that when increasing taxes the rise should be gradual and a little at a time (Śānti 88 7–8) Taxes were to be recovered at a proper time and proper place (Śānti 88 12 and Kām. V 83–84)[236] When taxing traders the king should make allowance for the price they had to pay, for the chances of selling the commodity (in his kingdom), the distance over which the merchandise was brought, what they must have spent for their food and condiments and the cost of guard-

236 आदद्दीत धनं काले त्रिवर्गपरिवृद्धये ॥ यथा गौ. पाल्यते काले दुह्यते च तथा प्रजा ॥ कामन्दक V 83–84. One may note the Moscow decree that all male and female peasants between 18 and 45 years were to work six days yearly without pay on roadwork With the above principles of taxation one may compare Adam Smith's famous canons (1) the subjects of every state ought to contribute towards the support of the Government as nearly as possible in proportion to their respective abilities i e in proportion to the revenue which they respectively enjoy under the protection of the State (2) The tax which each individual is bound to pay ought to be certain and not arbitrary. The time of payment, the manner of payment, the quantity to be paid ought to be clear and plain to the contributor and to every other person (3) Every tax ought to be levied at the time or in the manner in which it is most likely to be convenient for the contributor to pay it (4) Every tax ought to be so contrived as both to take out and keep out of the pockets of the people as little as possible over and above what it brings into the public treasury (vide 'Wealth of nations' ed by Rogers, 1860, vol. II. pp 414–416)

ing the merchandise (Manu VII. 127=Śānti 87. 13-14)[237]. In the case of artisans, before taxing them, the king has to pay regard to the labour and skill involved and to the necessaries of life required by them (Śānti 87. 15). Every one, however poor, must contribute something to the finances of the realm. Manu (VII. 137-138) says that even a very poor man who maintains himself by following some occupation should be asked to contribute every year something in the nature of *kara* (a tax), while workers (like cooks), artisans (like blacksmiths), śūdras who subsist by manual labour (like porters) should be asked to contribute one day's work to the king in a month Vide Gaut X. 31-34, Visnu Dh. Ś. III 32 for the same. But Śukra IV. 2. 121 says that workers and artisans should do one day's work for the king gratis in a fortnight. Gaut. X. 34 adds that the king must supply them with food on the day they work gratis The importance of a gold and silver reserve was well understood. Kām (IV. 62-64) says [238] that the king's *kośa* should have many sources for filling it, but few outlets of expenditure, it should be full of all desired kinds of wealth, guarded by trusty officers, rich in pearls, gold and jewels, it should have been acquired according to *śāstric* rules, be capable of bearing great strain of expenditure and that *kośa* is to be preserved only for the purpose of securing the two goals viz. *dharma* and *artha*, for affording maintenance to the servants engaged by the king and as a safeguard against calamities. Śukra IV. 2 3 remarks that kośa is accumulated for the upkeep of the army and for the benefit of the people and for performing sacrifices. Gaut X. 28-29, Manu VII. 128, VIII. 306-308, Nār. (prakīrnaka 48) and others say, as has been already stated, that taxation is meant for the protection of the subjects and that it is the king's wages (*vetana*) for the protection he affords Manu IX. 305 compares the king taking taxes to the sun that produces vapour from the seas (in order to return it in the form of rain, as the Raghuvamśa I. 18 very happily puts it) Kām. (V. 78-79) enumerates eight principal sources (called *astavarga*) of filling the treasury

237. विक्रयं क्रयमध्वानं भक्तं च सपरिच्छदम् । योगक्षेमं च संप्रेक्ष्य वणिजां कारयेत्करान् ॥ शान्ति 87. 13. Manu VII. 127 reads भक्तं च सपरिव्ययम्; उत्पत्तिं दानवृत्तिं च शिल्पं सम्प्रेक्ष्य चासकृत् । शिल्पं प्रति करानेवं शिल्पिनः प्रति कारयेत् । शान्ति 87. 15.

238. बह्वादानोऽल्पनिःस्राव रक्षणतः पूजितदैवतः । ईप्सितद्रव्यसंपूर्णो हृद्य आप्तैरधिष्ठितः ॥ मुक्ताकनकरत्नाढ्यः पित्र्यैवामहोचितः । धर्मार्जितो व्ययसहः कोषः कोषज्ञसंमतः ॥ धर्महेतोस्त्वर्थार्थाय भृत्याना भरणाय च । आपदर्थं च संरक्ष्यः कोषः कोषवता सदा ॥ काम IV 62-64 quoted in राजनीतिरत्नाकर p 34

through the action of the heads of the departments viz. agriculture, trade-routes (both on land and water), the capital, water embankments, catching of elephants, working mines and collecting gold &c., levying wealth (from the rich), founding towns and villages in uninhabited spots The Mānasollāsa (II. 4 verses 539–540 p 77) advises the king to spend ordinarily three-fourths of the yearly revenues and save one-fourth Śukra (I. 315–317) prescribes that the king should save 1/6 of his total annual income and should spend 1/2 of the whole on the army and one-twelfth each on charity (to the learned, the poor and helpless &c), ministers, inferior officials, and his private purse or expenses Śukra IV. 2 26 requires the king to have as much stock of grain as would be required for three years' consumption in his country In IV 2 13 he sets before the king the impossible ideal that his treasury should be so full that he can support his army for 20 years if no taxes from agriculture or tolls were raised or no fines were recovered The Mānasollāsa (II. 4 394. 397 p 64) says that the king's treasury should be always full of gold, silver, jewels, ornaments and costly clothes, that pure gold in the form of niskas (coins) or bars or ornaments should be held in the treasury Kaut (IV 3) as stated above permitted the king in famines to make the rich disgorge their wealth. In V 2 he remarks that if after making special requests for additional taxation, when the treasury is empty and some danger is impending, to the cultivators, merchants, wine-sellers, prostitutes and those who rear pigs, poultry, cattle &c, the king may request the rich to give as much of their gold as they can and the king may honour them by bestowing on them a post at his court, or the dignity of an umbrella, a turban or some decoration in return for their wealth[239] He permits the king in calamities to take away the wealth of the corporations (*sanghas*) of heretics and of temples also, to set up all of a sudden on one night a god or a platform (caitya) for a holy tree or a sacred place for a man of miraculous powers and provide for fairs and merry gatherings there and secure the necessary money[240] He

239 सारतो वा हिरण्यमाढ्यान्याचेत । यथोपकारं वा स्ववशा वा यदुपदरेयुः स्थानछत्रवेष्टनविभूषाश्चैषां हिरण्येन प्रयच्छेत् । अर्थशास्त्र V 2

240 Compare note 164 above about the Mauryas who wanting money set up images, according to Patañjali The Rājatarangiṇī (V 166–177) describes the exactions of king Śaṅkara-varman of Kashmir (883–902) A D He plundered 64 temples under the pretext of supervision He imposed taxes on grhakrtya (i e on upanayana, marriages &c). In the 11th century king Harsa of Kashmir plundered most of the temples (Rājatarangiṇī VII 1090)

recommends many other tricks and dodges for securing money, which are passed over. Perhaps the only redeeming feature of these devices is that Kautilya is careful to point out that they were to be employed only against the seditious and the irreligious and not against others (V. 2 '*evam dūṣyeṣv adhārmikeṣu varteta netareṣu*'). Vide Nītivākyāmṛta (kosa-samuddeśa) p. 205 for similar provisions to replenish a depleted treasury. The Parasurāmapratāpa (Rājavallabhakāṇḍa, folio 27 b) quotes a verse which recommends resort to alchemy for replenishing the treasury[240a]. Śukra IV. 2 11 advises the king when in financial difficulties to promise interest to the rich and take their wealth and to return it with interest when the difficulties are got over[241]. Śānti (88. 29–30) asks[242] the king to honour the wealthy men in his kingdom, since they constitute an important element of the realm and are the most eminent among all beings and to request them 'confer along with me favours on the people'.

Several reasons are assigned for people's payment of taxes to the king Gaut X. 28 says that they should do so because he protects them. In some places the idea put forward is that taxes are the wages (*vetana*) of the king and that the subjects made a contract with the king Manu to that effect Vide Śānti 67 and 70. 10, Baud Dh. S. I. 10. 1, Nār. 18. 48, Kaut. I. 13 (quoted on p 21 above) Kāt [243] (verses 16–17) states that as the king is the owner of the earth but not of other kinds of wealth, he is entitled to get the sixth part of the produce of land and that since human beings reside on land they are declared to be owners (in ordinary parlance, but they have only a qualified ownership) Several kinds of taxes are mentioned in the dharmasāstras, arthasāstras and the inscriptions The oldest

word for a tax paid to the king is 'bali' Rg VII 6 5[244] and X 173 6 speak of the common people as 'balihrt' (bringers of *bali*, tribute or tax for the king) In the Tai Br (II. 7 18 3) it is said 'the people bring bali to him' In the Ait Br (35 3) the *vaiśya* is characterized as 'balikrt' (payer of taxes to another), since brāhmanas and ksatriyas were mostly exempt from taxation. Vide Prof. Hopkins' 'Social condition of the ruling class' J. A.O S vol XIII p 89 and Fick p 119 (as to the evidence of the Jātakas on taxation) Manu VII. 80, Matsya 215 57, Rāmāyana III. 6 11, Visnu Dh S III. 22 employ the word 'bali' in the sense of the 6th part of the produce of land that the king levied as tax. In the Rummindei Pillar Inscription of Aśoka (Corpus I. I. vol. I p 164) it is said that the village of Lummini was made free from the payment of 'bali', but had to pay one-eighth share[245] Here 'bali' is contrasted with 'bhāga' which is a general term The word 'kara' appears to mean a tax in general Vide Āp Dh S II 10 26 10, Manu VII. 128, 129, 133, Vas 19. 23, Visnu Dh. S III. 26-27 The word 'bhāga' (share) is also general and means the king's dues on land, trees, drugs, cattle, wealth &c Vide Manu VII. 130-131, VIII 305, Visnu Dh S III 25 This meaning of 'bhāga' is ancient We saw above (p 112) that *bhāgadugha* is one of the ratnins of the king The Amarakośa treats *bali*, *kara*, and *bhāga* as synonymous

The word 'sulka' generally means the tolls or customs duties levied from vendors and purchasers on merchandise carried into or out of the kingdom (Śukranītisāra IV 2. 108) The Mahābhāsya on the vārtika āyasthānebhyasthak' on Pān IV 2. 104 gives saulkika and gaulmika as examples, indicating thereby that śulka or toll was levied as a source of income (āya) at the toll-gate

The principal and perennial sources of income to the state were three viz the king's share of the produce of land, tolls and customs duties, fines levied from wrongdoers or defeated litigants (vide Śānti 71 10 and Śukra IV 2 13) From this and from Manu X. 119-120 it appears that the principal tax-payers

were agriculturists, traders, manual workors and artisans. In Manu VIII. 307 quoted in the Dandaviveka of Vardhamāna (p. 5) it is said that the king who, without affording protection, levies *bali*, *kara*, *śulka*, *pratibhoga* (pratibhāga in the printed smṛti) and *danda* (fines) goes at once to hell and Vardhamāna explains *kara* as the dues recovered every month from villagers and city-dwellers (every month or twice a year in Bhādrapada or Pausa according to Kullūka), śulka as the twelfth share recovered from traders, pratibhoga as the dues in the form of fruits, flowers and vegetables presented every day A few remarks on these and other taxes must be made here Manu VII. 130, Gaut. X. 24, Visnu Dh. S. III. 22, Mānasollāsa (II. 3. 163 p. 44) and several others prescribe that the king is entitled to the 6th, 8th or 12th part (only sixth in Visnu, also 10th in Gaut.) of the yield of grain from land. Brhaspati and the Visnudharmottara[246] (II. 61. 60–61) quoted in the Rājanītiprakāśa (pp. 262–263) make it clear under what circumstances these different shares are to be taken: viz the king takes 1/6 of *śūkadhānya* (awned or bearded grain like wheat and barley), 1/8 from śimbīdhānya (grain in pods), 10th part from crops grown on land that was fallow for many years, 1/8th from lands sownin the rainy season and one-sixth from lands that have spring crops The tax was to be paid once every year or once in six months according to the custom of the country. The varying rates prescribed by Kautilya have been indicated in describing the duties of the sītādhyaksa Śukra (IV. 2 121–122) gives a salutary rule that if a cultivator constructs a tank, a well or an artificial water-course or brings under cultivation land previously fallow, the king should not levy a tax thereon till the person making the expenditure has recovered twice the amount spent by him. Kaut. (II. 1) provides that the king may show favour (*anugraha*) to the cultivators by supplying them with seed, cattle and money and that they should return the advances by easy instalments and that the king shall bestow favours and remissions (*parihāra*) in such a way that they might tend to swell the treasury and not tend to its

246 विष्णुधर्मोत्तरे । शूकधान्येषु षड्भागं शिम्बीधान्येष्वथाष्टमम् । राजा बल्यर्थमादद्यादेशकालानुरूपतः ॥ शूकशिम्ब्यतिरिक्ते धान्ये मनुगौतमोक्तो द्वादशो दशमो वा भागः । तथा च बृहस्पतिः । दशाष्टषडं नृपतेर्भागं दद्यात्कूपीवलम् । खिलाद्वर्षावसन्नाच्च कृष्यमाणाद्यथाक्रमम् ॥ ..... स एवाह । देशस्थित्या बलिं दद्युर्नृपं षण्मासवार्षिकम् । एष धर्मः समाख्यातः कीनाशानां पुरातनः ॥ राजनीतिप्र. pp. 262–263 and राजधर्मकाण्ड p. 63 (for last two verses).

depletion.[247] It has already been stated that according to the smrtis the ordinary share of the king was one-sixth, but that in case of the danger of invasion or similar calamity he was allowed to raise it to one-fourth. Megasthenes (Fragment I, p 42) says that no person is permitted to own land and that besides the land tribute people pay into the royal treasury a fourth part of the produce This shows that the tax on land was very heavy in the times of Candragupta probably owing to his wars to drive away the Greeks and the huge armies that he had to employ Manu VII 130, Gaut X. 25, Visnu Dh. S III. 24, Mānasollāsa (II 3 163 p 44) hold that the king is entitled to the 50th part of the cattle reared by herdsmen and of the interest earned by those who lend money at interest This last appears to be analogous to modern income-tax The Śukranītisāra IV 2 128 makes the tax to be $\frac{1}{32}$ on the interest earned by money-lending.[248] Visnu adds cloth to these two Manu VII 131–132, Gaut X 27, Visnu Dh S III 25, Visnudharmottara II 61 61–63 and Mānasollāsa lay down that the king is entitled to a sixth part of trees, meat, honey, clarified butter, perfumes (like sandal-wood), medicinal plants (like *gudūcī*), rasa (salt &c), flowers, roots (like tumeric), fruits, leaves (like palm leaves), vegetables, grass, hides, articles manufactured from bamboo slips, earthenware, articles prepared from stones Visnu adds deer hides to these

Sulka is of two kinds, what is levied on goods carried by land and what is levied on goods carried by water (Mit on Yāj II 263) Gaut X 26 and Visnu Dh S. III 29 state that the sulka is 1/20th part on merchandise for sale (bought and sold in the country itself) which is interpreted by some (like Haradatta and Nandapandita) as meaning that 5 per cent of the price of articles sold should be taken by the king as tax, while the Rājanītiprakāśa (p 264) explains that the king is entitled only to five per cent of the difference between the cost price and the sale price of merchandise Manu VIII. 398 also is susceptible of these two interpretations, as the commentaries of Medhātithi and Kullūka show The Visnu Dh S (III 29–30) prescribes that the king takes one-tenth on merchandise produced in his *own* country and one-twentieth on goods *imported* from a foreign

247 धान्यपशुहिरण्यैश्चैनानन्यग्रहीयात्सान्यसङ्ख्येन दद्यु: । अनुग्रहपीडाभौ चैषां कोशवृद्धिकरौ दद्यात् । कौटिल्य *II 1. p 47*

248. वार्धुषिकाश्च कौसीदाद् द्वात्रिंशार्शं हरेन्नृपः । शुक्र *IV. 2. 128*

country Yāj. II. 261 says that the śulka on goods is twentieth part of the prices of the goods Kaut (II 21) in his chapter on the superintendent of tolls (śulkādhyakṣa) sets out several rules, of which a few interesting ones are given here Commodities intended for marriage or taken by a bride from her parents to her husband or meant as presents or for the purpose of sacrifices or the *accouchement* of women or for the worship of gods, or for the ceremonies of *caula*, *upanayana*, *godāna*, or for the observance of a *vrata* or for the consecration of a person for a sacrifice and for other special ceremonies shall be allowed to go free of tolls. Whatever commodities would cause harm to the realm or are useless should be destroyed; whatever is of great benefit and seeds not easily available should be allowed to be imported without charge[249] He further says (II. 22) that śulka is levied on exports and imports of merchandise and that on imports the tax will be one-fifth of the price of the commodities (as a general rule) and prescribes varying rates (1'6, 1/10, 1/15, 1/20, 1/25) on different kinds of articles In II 28 (on the superintendent of shipping) Kautilya gives further rules some of which have been already noted. He prescribes rules for ferries also, viz. that brāhmaṇas, ascetics, children, very old people, sick men, messengers, pregnant women are to be provided with free passes by the superintendent enabling them to use the ferries. A man with a load and small animals were to pay one māsa at a ferry, a cow or a horse two māsas and so on. The Mānasollāsa (II. 4. vv. 374-376 p 62) prescribes that the king should well guard all harbours (*velā-pura*) that are near the sea, that when the boats of sailors residing in his own country return to the harbour the king should charge one-tenth (of the price of goods brought) as the duty and that when foreign boats are driven to his harbour by an unfavourable wind, the king should confiscate all their merchandise or may give a little to the owners of those boats. In this connection a very interesting inscription may be referred to The Motupalli pillar Inscription[250] of the Kākatīya king Ganapatideva (of
